MESSAGE FROM THE PRESIDENT

In the past few decades or so, the quest for quality assurance or accreditation in higher education has emerged as a movement in response to the increasing competitiveness of universities worldwide. Despite the controversy over the meaning and value of this status, no one denies its impact on shaping the universities in general and the choices of students and parents in particular.

Since its foundation, Notre Dame University-Louaize has sustained its commitment to academic excellence and the fostering of innovation in the face of often difficult fiscal circumstances. Today, NDU has an excellent reputation. Its distinctiveness derives from the academic programs that are not wholly led by the demands of the economy or public needs but from the emphasis it puts on providing students with the competencies and motivations for life-long learning as well as a flourishing life.

Characterized by several features, namely, a comprehensive mission, a distinctive teaching and learning environment, a diverse student population, collaboration with peer institutions, and a proper use of technology in formal instruction, NDU immersed in an accreditation process and received the status of candidacy from the New England Association of Schools and Colleges (NEASC), and soon will achieve full institutional accreditation. Certainly, this continuous pursuit of quality education made NDU become more dynamic and innovative in meeting the challenges posed by technology and the advance of sciences, as well as in responding to the rapid local and regional socio-economic changes.

Aligning with this legacy of distinction, NDU’s Strategic Plan 2015-2020 calls for curricular review, that embraces new concepts of knowledge and provides a holistic approach that would ensure an integral education; thereby, preparing students to live responsibly and constructively in a world that is global and interconnected.

To that end, the General Education Requirements (GER) structure, categories, and courses have been reviewed to correlate more adequately with the mission statement. The outcome of this review is a Liberal Art Curriculum (LAC) fashioned with the aim to offer learners the critical and analytical skills so central to their success, and to enhance the inculcation of the mission values amongst NDU students. On another front, some new graduate and undergraduate degree programs have been developed in three disciplines: Business, Engineering, and Health Sciences.

Innovation and growth go hand in hand, they say. As President of NDU, I believe we have had the will to reach that far. Our aim is and will always be to redefine excellence at NDU, so that we can venture into the future with even greater confidence. Now what is needed is a more rigorous and proper implementation of our five-year plan, the fact that would propel NDU to reach a higher level of distinctiveness we all yearn for.

Catalog 2016-2017 testifies to the continued success of our mission; it sheds light on our new academic policies and initiatives. I, therefore, invite you to explore the main lines of our success toward quality education as you read through this Catalog.

Fr. WALID MOUSSA, O.M.M.
President

FACULTIES

FACULTY OF ARCHITECTURE, ART AND DESIGN
Dr. Jean-Pierre El Asmar, Dean
Ms. Janane Younes, Administrative Assistant to the Dean
Mr. George El Kayem, Workshop Assistant

Department of Architecture
Dr. Christine Mady, Chairperson
Ms. Jihane Keyrouz, Secretary to the Chairperson

Department of Design
Mr. John Kortbawi, Chairperson
Ms. Adelle Dib, Secretary to the Chairperson
Mr. Cliff Makhoul, Studio Assistant
Ms. Liliane Haddad, Photography Laboratory Assistant

Department of Music
Dr. Lola Beyrouthi, Chairperson
Ms. Diane Sarkis, Secretary to the Chairperson

FACULTY OF BUSINESS ADMINISTRATION AND ECONOMICS
Dr. Youssef Zgheib, Interim Dean
Ms. Ghada Cattan, Administrative Assistant to the Dean
Ms. Rita Khalil, Secretary to the Dean
Dr. Roy Khoueiry, Assistant Dean, Graduate Program
Ms. Maya Rashed, Administrative Assistant to the Assistant Dean, Graduate Program

Department of Economics
Dr. Mohamad Hamadeh, Chairperson
Ms. Kamale Moubarak, Secretary to the Chairperson

Department of Accounting and Finance
Dr. Viviane Neaimy, Chairperson
Ms. Kamale Moubarak, Secretary to the Chairperson

Department of Management and Marketing
Dr. Jennifer Abou Hamad, Chairperson
Ms. Grace Kanaan, Secretary to the Chairperson

Department of Hospitality and Tourism Management
Mr. George Ghaleb, Chairperson
Ms. Dunia Akiki, Secretary to the Chairperson

FACULTY OF ENGINEERING
Dr. Michel El Hayek, Dean
Ms. Jeanette Elias, Administrative Assistant to the Dean
Ms. Nancy Turc, Officer, Accreditation
Department of Civil and Environmental Engineering
Dr. Jacques Harb, Chairperson
Ms. Loulou Saliba, Secretary to the Chairperson
Mr. Wissam Haddad, Laboratory Instructor
Ms. Claudette Hajj, Laboratory Instructor
Ms. Yara Maalouf, Laboratory Instructor
Mr. Elie Lahoud, Laboratory Technician

Department of Electrical, Computer, and Communication Engineering
Dr. Semaan Georges, Chairperson
Ms. Manuella Angelini Kanaan, Secretary to the Chairperson
Mr. Georges Breidy, Laboratory Supervisor
Ms. Aline Siranossian, Senior Laboratory Instructor
Mr. Wissam El Beaino, Laboratory Instructor
Ms. Nisrine El Turkey, Laboratory Instructor

Department of Mechanical Engineering
Dr. Najib Metni, Chairperson
Ms. Ghada Khoury, Secretary to the Chairperson
Mr. Wissam Daou, Senior Laboratory Instructor
Ms. Sylvie Melki, Laboratory Instructor
Mr. Fady Awad, Senior Laboratory Technician

FACULTY OF HUMANITIES
Dr. Kamal Abou Chedid, Dean
Ms. Wassil Chemaly, Administrative Assistant to the Dean
Dr. Edward Alam, Benedict XVI Endowed Chair
Ms. Honorée Eid, Administrative Assistant to the Benedict XVI Endowed Chair

Department of English and Translation
Dr. George Abdelnour, Chairperson
Ms. Rita Orfali, Administrative Assistant to the Chairperson

Department of Religious, Cultural, and Philosophical Studies
Dr. Doumit Salameh, Chairperson
Ms. Karen Dabaghy, Secretary to the Chairperson

Department of Psychology, Education and Physical Education
Fr. Joseph Tannous, Chairperson
Ms. Karen Dabaghy, Secretary to the Chairperson

Department of Media Studies
Dr. Maria Bou Zeid, Chairperson
Ms. Alice Eid, Secretary to the Chairperson
Ms. Celine Abi Aoun, Secretary to the Chairperson

Division of Audio Visual Arts
Mr. Nicolas Khabbaz, Director
Mr. Naoum Abi Adam, Senior Officer, Equipment and Labs
Mr. Tony Abi Adam, Junior Officer, Equipment and Labs
Ms. Najwa Mallah, Officer, Students and Faculty Assistance
Ms. Sarah Gabriel, Junior Officer, Students and Faculty Assistance
Mr. George Tarabay, Projects Developer
Mr. Gilbert Mehanna, Junior Projects Developer
Mr. Samer El Achi, Producer

FACULTY OF LAW AND POLITICAL SCIENCE ______________________
Dr. Maan Bou Saber, Dean
Ms. Eliana Yazbeck Kosseify, Administrative Assistant to the Dean

Department of Law
Dr. Maan Bou Saber, Chairperson
Ms. Eliana Yazbeck Kosseify, Administrative Assistant to the Chairperson

Department of Government and International Relations
Dr. Dany Ghsoub, Chairperson
Ms. Eliane Khalil, Secretary to the Chairperson

FACULTY OF NATURAL AND APPLIED SCIENCES ___________________
Dr. George M. Eid, Dean
Ms. Nelly Geara Nakad, Administrative Assistant to the Dean

Department of Computer Science
Dr. Hoda Maalouf, Chairperson
Ms. Nicole Antoun, Secretary to the Chairperson

Department of Mathematics and Statistics
Dr. Bassem Ghalayini, Chairperson
Ms. Sandra Doris El Khoury, Secretary to the Chairperson

Department of Physics and Astronomy
Dr. Charbel Zgheib, Chairperson
Ms. Samira Ziadeh Hassoun, Secretary to the Chairperson

Department of Sciences
Dr. Colette Kabrita Bou Serhal, Chairperson
Ms. Samira Ziadeh Hassoun, Secretary to the Chairperson
Ms. Elizabeth Saliba Tabet, Laboratory Assistant
Ms. Frida Torosyan, Laboratory Assistant

FACULTY OF NURSING AND HEALTH SCIENCES _____________________________
Dr. Antoine Farhat, Dean
Ms. Nathalie Fahed Mozaya, Administrative Assistant to the Dean

Department of Nursing and Health Sciences
Dr. Jessy El Hayek, Chairperson
NDU - NORTH LEBANON CAMPUS

Office of the Director
Fr. Samir Ghsoub, Director
Fr. Tarek Machaalany, University Chaplain
Ms. Nancy Rizk Diab, Administrative Assistant to the Director

Office of the Registrar
Mr. Jean Malkoun, Officer

Office of Admissions
Mr. Raymond Khoury, Officer
Ms. Coline Ayoub, Assistant

Office of Student Affairs
Ms. Nada Moussallem Bou Francis, Secretary

Library
Ms. Carina Hawat Mansour, Supervisor
Ms. Suzanne Doumit Saad, Circulation Assistant

Faculty of Architecture, Art and Design
Mr. Joseph Chartouni, Coordinator
Ms. Nicole Ayoub Al Ojaimy, Administrative Assistant

Faculty of Business Administration and Economics
Dr. Dorine Haddad, Coordinator
Ms. Elsy Kfoury Girgis, Administrative Assistant

Faculty of Engineering
Dr. Chady El Moucary, Coordinator
Ms. Rena Ayoub Nicolas, Administrative Assistant
Mr. Walid Zakhem, Senior Lab Instructor, EE
Ms. Sawsan Sleiman, Laboratory Instructor, CE

Faculty of Humanities
Mr. Michael Hajj, Coordinator
Ms. Nicole Ayoub Al Ojaimy, Administrative Assistant

Faculty of Natural and Applied Sciences
Mr. Bachir Maroun, Coordinator
Ms. Nibelle Skaff, Laboratory Instructor, Physics
Ms. Rana Naynou Nabbout, Science Laboratory Assistant
Ms. Rena Ayoub Nicolas, Administrative Assistant

Faculty of Nursing and Health Sciences
Ms. Cecile Obeid, Coordinator
Ms. Rana Naynou Nabbout, Science Laboratory Assistant
Ms. Rena Ayoub Nicolas, Administrative Assistant
Office of University Services
Dr. Elias Rizk, Assistant Director

Computer Center
Mr. Charbel Merheb, User Support Specialist
Mr. George Sleiman, Computer Lab. Assistant

General Services
Mr. Tony Ayoub, Driver
Mr. Miled Daou, Driver
Mr. Chalita Harb, Driver
Mr. Pierre Khouwairy, Driver
Ms. Therese Assaf, Services worker, Cafeteria

Business Office
Ms. Joelle Khlat Kfouri, Accountant

Office of Public Relations
Mr. Edgard Merheb Harb, Assistant Director
Ms. Elsy Kfoury Girgis, Administrative Assistant

NDU - SHOUF CAMPUS

Office of the Director
Fr. Hanna Tayar, Director
Fr. Walid Nassif, University Chaplain
Ms. Marie Reine Bou Nassif Mina, Administrative Assistant to the Director

Office of the Registrar
Ms. Nancy Khoury Jurdy, Assistant Registrar

Office of Admissions
Ms. Maya Abou Khzam, Officer
Ms. Sahar Abboud Moussa, Assistant
Mr. Ayman Abou Hamdan, Assistant

Office of Student Affairs
Ms. Denise Nassif Saad, Officer

Physician
Dr. Youssef Boueiz, MD

Library
Ms. Isabelle Bittar Ghanem, Supervisor
Ms. Rona Bouez, Assistant

Faculty of Architecture, Art and Design
Dr. Maroun Kassab, Coordinator
Ms. Marina Bou Karroum Beainy, Secretary
Faculty of Business Administration and Economics
Dr. Talie Kassamany, Coordinator
Ms. Ms. Marina Bou Karroum Beainy, Secretary

Faculty of Engineering
Dr. Joseph Issa, Coordinator
Ms. Siham Antoun Chalhoub, Secretary
Ms. Nadine Bou Dargham, Laboratory Instructor

Faculty of Humanities
Mr. Vatche Donerian, Coordinator
Ms. Marina Bou Karroum Beainy, Secretary

Faculty of Natural and Applied Sciences
Dr. Jacques Bou Abdo, Coordinator
Ms. Siham Antoun Chalhoub, Secretary
Ms. Rêve Berberi Richa, FNAS/FNHS Lab Assistant

Faculty of Nursing and Health Sciences
Dr. Lara Youssef Gmeyil, Coordinator
Ms. Siham Antoun Chalhoub, Secretary
Ms. Rêve Berberi Richa, FNAS/FNHS Lab Assistant

Computer Center
Mr. Jean Hedary, Technical Support Specialist
Ms. Viviane Moussa, Assistant

Workshop Copy Center
Mr. Jack Bou Nassif, Officer

Telephone Services
Ms. Roula Khattar Antoun, Information Desk

Security Services
Mr. Saïd Bou Nassif, Security Supervisor
Mr. Abdo El Hayek, Security Guard
Mr. George Habib, Security Guard
Mr. Antoine Lahoud, Security Guard
Mr. George Nader, Security Guard
Mr. Youssef Oudaimy, Security Guard
Mr. Said Yazbeck, Security Guard

Cafeteria Services
Ms. Antoinette Jraidy Antoun, Senior Cafeteria Worker
Ms. Jihane Bou Abdo Mouawad, Cafeteria Worker
Ms. Daed Bou Nassif, Cafeteria Worker
Ms. Fadia Keyrouz Madi, Cafeteria Worker
Ms. Maya Nehme Atallah, Cafeteria Worker
Ms. Rita Razzouk Daoud, Cafeteria Worker
General Services Office
Ms. Jeanette Younes, Secretary
Mr. Toni Bou Abdo, Maintenance Worker
Mr. Louis Saadeh, Maintenance Worker
Mr. Fadi Antoun, Gardener
Mr. Dib Haddad, Gardener
Mr. Abdo Mghames, Gardener
Mr. Kozhaya Richa, Driver
Mr. Charbel Saadeh, Driver
Mr. Refaat Nasr, Services Worker

Business Office
Mr. Elie Bou Abdo, Senior Accountant

Office of Public Relations
Ms. Mayssam Bou Hamdan, Officer
LIST OF FULL-TIME FACULTY MEMBERS 2016-2017

Professor Emeritus
Rihani, Ameen A., PhD, 1996. Bilingual Literature, Lebanese University, Lebanon

Professors
Aboughedid, Kamal, PhD, 1997, Education, Manchester University, UK
Alam, Edward, PhD, 1996, Philosophy, University of Utah, USA
Asmar, Ghazi, PhD, 1998, Mechanical and Aerospace Engineering, University of Missouri, USA
Badr, Elie, PhD, 1994, Mechanical Engineering, University of Tulsa, USA
Bou Saber, Maan, Doctor of Education, 2009, Law, Université de Paris-II, France
Eid, Assaad, Doctorate, 1986, Applied Linguistics and TEFL, Université Saint-Joseph, Lebanon
Eid, George M., PhD, 1988, Mathematics, Polytechnic University, New York, USA
El Hayek, Michel, Docteur Européen, 1997, Sciences Appliquées, Faculté Polytechnique de Mons, Belgium
Farhat, Antoine, PhD, 1999, Nutrition, McGill University, Canada
Georges, Semaan, PhD, 2001, Electrical Engineering, Ecole de Technologie Supérieure, Canada
Ghais, Chaheine, PhD, 1998, Political Science, University of Missouri, St. Louis, USA
Haddad, Robert, Master of Fine Arts, 1980, University of Pennsylvania, USA
Hamad, Mustapha, PhD, 1995, Electrical Engineering, University of South Florida, USA
Hamadeh, Mhamad, PhD, 1998, Economics, Syracuse University, USA
Harb, Jacques, PhD, 1996, Civil Engineering, Northeastern University, USA
Hobeika, Louis, PhD, 1980, Economics, University of Pennsylvania, USA
Jahshan, Paul, PhD, 2000, American Studies, Nottingham University, UK
Kesrouani, Elias (Fr.), Diplôme de Docteur, 1989, Musicologie, Sorbonne Paris IV, France
Kfouri, Carol, Doctorate 1ère Categorie, 1997, Philosophie et Sciences Humaines, Université du Saint-Esprit Kaslik, Lebanon
Labaki, George, Doctorat d'Etat, 1984, Law, Université de Paris-I, Pantheon, Sorbonne, France
Menassa, Elie, D.B.A., 2003, Accounting & Finance, De Montfort University, UK
Moussa, Walid (Fr.), Doctorate, 1998, Ecumenical Theology, Saint Thomas Aquinas University, Italy
Nassar, Elias, PhD, 1997, Electrical Engineering, The Ohio State University, USA
Naimy, Viviane, Doctorate, 2001, Economics and Finance, Université de Paris XI, France
Nehme, Michiel, PhD, 1983, Political Science, Rutgers University, New Jersey, USA
Oueijan, Najib, PhD, 1985, English Literature, Baylor University, USA
Sabieh, Christine, Doctorat 1ère Catégorie, 1998, Philosophie et Sciences Humaines, Université du Saint-Esprit Kaslik, Lebanon
Yachoui, Elie, Doctorat d’Etat, 1982, Economics, Dauphine, France

Associate Professors
Ajami, Joseph, PhD, 1987, Mass Communication, Ohio University-Athens, USA
Akar, Bassel, PhD, 2009, Education, Institute of Education, University of London, UK
Akhras, Caroline, PhD, 2007, Doctor of Education, University of Leicester, UK
Al Hindy, Elie, PhD, 2009, Governmental & International Relations, University of Sydney, Australia
Atallah, Jad, PhD, 2008, Electrical & Computer Systems, Royal Institute of Technology, Sweden
Bassil, Charbel, Doctorate, 2010, Economics, Cergy Pontoise University, France
Bou Mosleh, Charbel, PhD, 2005, Mechanical Engineering, University of Colorado, USA
Bou Sanayeh, Marwan, Dr.-Ing., 2008, Electrical Engineering, University of Duisburg-Essen, Germany

1 Sabbatical Leave - Fall 2016
Chakar, Elie, Doctorate, 1994, Sciences et Techniques du Bâtiment, Ecole Nationale des Ponts et Chaussées, France
Chalhoub, Michel, PhD, 1995, Civil/Structural Engineering, University of California, USA
1Challita, Khalil, Doctorate, 2005, Computer Science, Paul Sabatier University, France
Doumit, Jaqueline, Doctorate, 1996, Biomedical Engineering, Université de Saint-Etienne, France
El Asmar, Jean-Pierre, PhD, 2008, Sustainable Built Environment, De Monfort University, UK
El Hage, Youssef Kamal, PhD, 1990, Physics, Technische Universität München, Germany; M.A., 1985, Philosophy, Lebanese University, Lebanon
El Khaldi, Khaldoun, Doctorate, 1996, Computer Science, Université de Franche-Comté, France
Elmurr, Sami, PhD, 1986, Electrical Engineering, Mississippi State University, USA
El Moucary, Chady, Doctorate, 2000, Lab De Génie Electrique de Paris (LGEP), France
Fahed, Ziad, Doctorate, 2001, Théologie Canonique, Université Catholique de Lyon, France
Fakih, Khalid, PhD, 1992, Journalism, University of Missouri, USA
Farhat, Hikmat, PhD, 1998, Chemical Physics, McGill University, Canada and Doctorate, 2014, Intelligence Artificielle, Universite de Toulouse III, France
Francis, Francis, PhD, 2003, Mechanical Engineering, University of New South Wales, Australia
Ghalayini, Bassem, PhD, 1995, Applied Mathematics, University of California, USA
Haddad, John, PhD, 1992, Statistics, University of Waterloo, Canada
Hage, Tanos G., PhD, 1995, Plant Biochemistry and Molecular Biology, Pennsylvania State University, USA
Hajjar, Roger, PhD, 1997, Physics and Astronomy, Université de Montréal, Canada
Harni, Hassan, PhD, 2005, Finance, University of Surrey, UK
Hasham, Elham S., PhD 2004, Educational Leadership, Management and Administration, Leicester University, United Kingdom
Jaalouk, Doris, PhD, 1997, Cell Biology, Université de Sherbrooke, Canada
Jajou, Amer F., PhD, 1987, Operations Research, Univerzita Karlova, Czechoslovakia
Jawad, Dima, PhD, 2003, Civil Engineering, Rutgers University, USA
Kabrita Bou Serhal, Colette, PhD, 1998, Biology (Circadian Rhythms, Neurobiology), Northeastern University, Boston, USA
Kassem, Abdallah, PhD, 2005, Electrical Engineering, Ecole Polytechnique de Montreal, Canada
Keirouz, Malhab, PhD, 1991, Mathematics, Purdue University, USA
Keyrouz, Fakherdine, Dr.-Ing, 2008, Electrical Engineering, Munich University of Technology, Germany
Khair, Marie, Doctorate, 1996, Computer Science, Aristotle University of Thessaloniki, Greece
Khalaf Keirouz, Leila, Doctorate, 1995, Environmental Geology, Westfälische Wilhelms-Universität, Germany
Khalil, Antoine, MBA, 1981, Finance, Pace University, USA
Khoueiri, Roy, Doctorate, 2003, Economics, Universite Paris 13, Paris Nord, France
Khoury, Rim, PhD, 2009, International Finance, Sogang University, South Korea
Kraidy, Ghassan, Doctorate, 2007, Electronics et Communications de Telecom., Ecole Nationale Superieure, France

1 Unpaid leave - academic year 2016/2017
2 Honorary Associate Professor
Maalouf, Hoda, PhD, 1998, Communication Engineering, Imperial College, University of London, England
Maalouf, Ramez, PhD, 1994, Mathematics, Imperial College, University of London, England
Malek, Amal, Doctorate, 1ère Catégorie, 2000, Philosophie et Sciences Humaines, Université du Saint-Esprit Kaslik, Lebanon
Maroun, Mariette, PhD, 2006, Mathematics, Baylor University, USA
Matar, Suhail, C.A.P.E.S., 1969, Arabic Language and Literature, Lebanese University, Lebanon
Matar Haddad, Dorine, PhD, 2006, Management, University of Leicester, UK
Melki, Habib, PhD, 2014, Arts in History, Université du Saint-Esprit Kaslik, Lebanon
Mendalek, Nassar, PhD, 2003, Electrical Engineering, Ecole de Technologie Superieure, Canada
Metni, Najib, Docteur, 2006, Automatique et Traitement du Signal et des Images, Université de Nice-Sophia-Antipolis, France
Rached Ziad, PhD, 2002, Mathematics, Queen’s University, Canada
Rahmé, Kamil, Doctorate, 2008, Sciences, Universite Paul Sabatier-Toulouse III, France
Sabra, Bassem, PhD, 2000, Physics, Ohio University, USA
Salameh, Doumit, PhD, 1988, Philosophy, St. Louis University, USA
Salem, Naim, PhD, 1992, International Studies, University of South Carolina, USA
Salem, Talal, Doctorate, 2007, Civil Engineering, Institut National des Sciences Appliquées de Lyon, France
Saliba, Holem, PhD, 1997, Mathematics, Moscow State University, Russia
Samra, Sami, Doctorate 1ère Catégorie, 1997, Philosophie et Sciences Humaines, Université du Saint-Esprit Kaslik, Lebanon
Sensenig, Eugene, Doktor Der Philosophie, 1985, Political Science and German Literature, Paris-Lodron-Universität, Salzburg, Austria
Tannous, Marie, PhD, 1998, Clinical Chemistry, University of Windsor, Canada
Yaacoub, Joseph, PhD, 1990, Education, Loyola University of Chicago, USA
Younes, Farid, PhD, 1997, Aménagement, Université de Montréal, Québec, Canada
Zgheib, Charbel, Doctorate, 2005, Physics of Condensed Matter, University of Montpellier II, France
Zgheib, Youssef, PhD, 2002, International Hospitality Management, University of Strathclyde, Scotland, UK

Assistant Professors
Aad, Pauline, PhD, 2008, Animal Breeding and Reproduction, Oklahoma State University, USA
Abdallah, Salma, 2010, Doctorate, Arabic Language & Literature, Lebanese University, Lebanon
Abdelnour Fahed, Souha, EdD, Organization and Leadership, University of San Francisco, USA, 2005
Abdelnour, George, PhD, 1997, Spanish, Yale University, USA
Abi Saleh, Richard, Doctorate, Business Administration, 2015, Universite Grenoble Alpes, France
Abou Hamad, Jennifer, Doctorate, 2013, Management, University Paris 1 Pantheon, France
Abou Jaoudé, Abdo, Doctorate, 2012, Applied Mathematics, Lebanese University + University D’Aix, Marseille, France
Abou Jawdeh, Simon, Doctorate, 2015, Clinical Psychology, University Caen Normandie, France

3 Honorary Associate Professor
4 Unpaid leave - Fall 2016
Adra, Samer, PhD, 2015, Economics, University of St. Andrews, Scotland, UK
Aki, Pierre, PhD, 2014, Computing, The Open University, UK
Akl, May, Doctorate, 2009, Translation Studies, St. Joseph University, Lebanon
Antaby, George (Fr.), Doctorate, 2008, Philosophy, University of Ottawa, Canada
Antoun, Ziad (Fr.), PhD, 2010, Education, Eastern Michigan University, USA
Aoun, Antoine, Doctorate, 2010, Nutrition, Universite de Rouen, France and MD, 2005, Family Medicine, USJ, Lebanon
Aoun, Rosy, PhD, 2010, Computer Science and Networks, Telecom Paris Tech, France
Azouri, Pamela, MA, 2004, Political Science, Universita Degli Studi Roma Tre, Italy
Badr Layla, Doctor, 2010, Natural Sciences, Chemistry, Westfalische Wihelms Universitat, Germany
Barakat, Edgard, MBA, 1981, Marketing, University of Dayton, USA
Baroud, Dina, M.A., 2007, Landscape Urbanism, Notre Dame University-Louaize, Lebanon
Baroud, Fawzi, PhD, 2011, Educational Technology-eLearning, Sheffield Hallam University, UK
Bechara, André, Master of Arts in Design, 2007, Notre Dame University-Louaize, Lebanon.
Beyrouthy, Lola, Doctorate, 2002, Music, Université du Saint-Esprit Kaslik, Lebanon
Bitar, Nicolas, PhD, 2005, International Finance and Economics, University of Wisconsin-Milwaukee, USA
Bou Abdo, Jacques, Doctorate, 2014, Computer, Telecommunications and Electronics, Universite Paris VI, France
Bou Jaoude Khoury, Karen, DBA, 2012, Architecture Project Management, Grenoble Ecole de Management, France
Bou Mitri, Christelle, PhD, 2013, Food Science/Biotechnolog, McGill University, Canada
Bou Zeid, Maria, Doctorate, 2010, Media & Communications, University Paris II, France
Chartouni, Joseph, Master in Architecture, 2006, Harvard University, USA
Chibani, Wissam, Doctor of Education, 2011, Saint Louis University, Missouri, USA
Chidiac, May, Doctorate, 2008, Information Sciences, Université Pantheon, Assas, Paris II, France
Chikri, Roger (Fr.), Doctor of Education, 2000, Wayne State University, Detroit, Michigan
Daghfal, Grazziella, Master of Arts in Design, 2002, Middlesex University, UK
Daher, Jerome, Doctorate, 2012, Sacred Theology, Atheneum Pontificium Regina Apostolorum, Italy
Dib, Robert, Doctorate, 1998, Biochemistry, Université de Nantes, France
Donerian, Vatche, M.A., 1987, Theater and TV Directing, Yerevan State Institute of Dramatic and Fine Arts, Armenia
Douaiher, Sandra, PhD, 2014, English Language and Literature, Université du Saint-Esprit Kaslik, Lebanon
Eid, Patricia, PhD, 2015, Research and Clinical Psychology, Université du Québec a Montreal, Canada
El Hage, Gabriel, Doctorate, 2011, Civil Engineering, INSA-Toulouse University, France
El Hajj, Maya, Doctorate, 2009, Science of Language: Translation, Université du Saint-Esprit Kaslik, Lebanon
El Hayek, Jessy, PhD, 2011, Nutrition and Dietetics, McGill University, Canada
El Khoury, Akram (Fr.), Doctorate, 2006, Canon Law, Pontificia Universitas Lateranensis-Rome, Italy
El Khoury, Dalia, Doctorate, 2010, Molecular Biology, Paris VII University, France
El Khoury, Jessica, PhD, 2014, Mass Communication, Texas Tech. University, USA

5 Unpaid leave - academic year 2016/2017
6 Unpaid leave - Fall 2016
7 Honorary Assistant Professor
Frayha, Norma, MBA, 1982, Accounting, American University of Beirut, Lebanon
Gabriel, Nicolas, Doctorate, 2011, Urban Geography and Planning, University Paul Valery, Montpellier III, France
Ghanem, Esther, PhD, 2010, Cell Biology, Jacobs University, Bremen, Germany
Ghanimeh, Sophia, PhD, 2012, Environment & Water Resources Engineering, American University of Beirut, Lebanon
Ghoussoub, Dany, Doctorate, 2007, Public Law, Universite Jean Moulin Lyon 3, France
Ghosn Chelala, Maria, Doctor of Education, 2011, Saint Louis University, Missouri, USA
Ghnatios, Chady, Doctorate, 2012, Mechanical Engineering, Ecole Centrale de Nante, France
Habchi, Charbel, PhD, 2010, Energy and Thermal Sciences, University of Nantes, France
Hage, Hicham F., PhD, 2010, Computer Science, University de Montreal, Canada
Hage, Ilige, PhD, 2015, Mechanical Engineering, American University of Beirut, Lebanon
Hage, Leslie, MA, 1996, Library Science, The University of Arizona, USA
Hage, Remi, Doctorate, 2012, Applied Math, University de Nantes, France
Harb Atef, PhD, 1996, Economics-Operations Research, Ecole Polytechnique de Montreal, Canada
Harb, George, Doctorate, 2007, Economic Sciences, Institute D’Etudes Politiques de Paris, France
Hassoun, George, PhD, 1996, Electrical and Electronic Engineering, University of Adelaide, Australia
Hindi, Nadine, PhD, 2015, Public Space and urban Regeneration, University of Barcelona, Spain
Hodzik, Ena, PhD, 2013, English and Applied Linguistics, University of Cambridge, UK
Houssni, Joseph, PhD, 2014, Visual and Performing Arts: Cinema and TV, Université du Saint-Esprit Kaslik, Lebanon
Hovivian, Hrair, M.S., 1984, Finance and Economics, Beirut University College, Lebanon
Hourani, Guita, PhD, 2013, Humanities, Tokyo University of Foreign Studies, Japan
Ibrahim, Elsy, Doctor of Engineering, 2010, Civil Engineering, Katholieke Universiteit Leuven, Belgium
Issa, Joseph, PhD, 2012, Computer Engineering, Santa Clara University, USA
Kaassamany, Talie, PhD, 2014, Finance and Accounting, Kingston University-London, UK
Kassab, Maroun, PhD, 2015, Architecture, The University of Sydney, Australia
Kairouz, Kaissar, Doctorate, 2013, Sciences and Techniques of Physical and Sports Activities, Universite Rennes 2, France
Khabbaz, Maurice, PhD, 2012, Electrical Engineering, Concordia University, Canada
Khabbaz, Nicolas, PhD, 2014, Visual Performing Arts-Cinema and TV, Université du Saint-Esprit Kaslik, Lebanon
Khalil, Sandra, DBA, 2015, Accounting, Grenoble Ecole de Management, France
Khoury, Mary, M.A., 1995, English Language and Literature, Lebanese University, Lebanon
Khoury, Naji, PhD, 2005, Civil Engineering, University of Oklahoma, USA
Kopaly, Toni, Doctorate, 2007, Education, Université du Saint-Esprit Kaslik, Lebanon
Kortbawi, John, Post-Graduate Diploma, 1977, Advanced Typographic Design, London College of Printing, UK
Maalouf, Rita, Doctorate, 2006, Chemistry, Claude Bernard University, France
Mady, Christine, PhD, 2010, City & Regional Planning, Cardiff University, UK
Mady, Christy, PhD, 2016, Communication, Carleton University, Canada
Malak, Sary, PhD, 1997, Structural Engineering, Northeastern University, USA
Mansour, Wissam, PhD, 2010, Humanities and Cultural Studies, Birkbeck College, UK

8 Honorary Assistant Professor
9 As of Spring 2017
10 Honorary Assistant Professor
11 Unpaid leave - academic year 2016/2017
Matar Bou Mosleh, Jocelyne, PhD, 2006, Epidemiology & Biostatistics, University of Pittsburgh, USA
Matta, Nadim, Master of Arts, 1999, Typographic Studies, London Institute/London College of Printing, UK
Merhej, Jessica, PhD, 2016, Mathematics, University of Washington, USA
Mitri, Richard, Doctorate, 2015, Architecture, Université de Strasbourg, France
Mouawad, Charbel, Doctorate, 2009, Biology and Pharmacology, Université Paris VII, France
Mounzer Karam, Nadine, Doctorate, 2013, Science of Information and Communication, University du Sud France
Mouchantaf, Maha, Doctorate, 2009, Educational Management, University of Corsica, France
Nakad, Roger, Doctorate, 2011, Mathematics, University of Nantes, France
Nassif, Nadim, Doctorate, 2013, Sports Sociology, University of Grenoble, France
Nasr, Noel, Master of Fine Arts, 2011, Photography, University of Ulster, UK
Nehmé, Cyrine, Doctorate, 2005, Astrophysics, University Paris VII, France
Oueijan, Harvey, Doctor of Education, 2011, Saint Louis University, Missouri, USA
Ramah, Chady, Doctorate, 2011, Philosophy/Epistemology, Université du Saint-Esprit Kaslik, Lebanon
Saad, Charles, PhD, 1991, Civil Engineering, University of Kentucky, USA
Stanisavljevic, Giutta, Doctorate, 2010, Mathematics, University Paul Sabatier Toulouse II, France
Nasr, Noel, Master of Fine Arts, 2011, Photography, University of Ulster, UK
Nasr, Noel, Master of Fine Arts, 2011, Photography, University of Ulster, UK
Sayyah, Rita, Doctorate, 2011, Information and Communication, University of Lumière Lyon 2, France
Sleilati, Esther, D.B.A., 2011, Marketing, Grenoble Ecole de Management, Grenoble, France
Soghomian Kiwan, Jacqueline, MFA, 2011, Graphic Design, Savannah College of Art and Design, USA
Tannous, Joseph (Fr.), Doctor of Education, 2011, Saint Louis University, Missouri, USA
Tawk, Yousef, PhD, 2011, Electrical Engineering, University of New Mexico, USA
Thouamy, Mira, Doctorate, 2013, Operations Management, HEC Montreal, Canada
Vanloa, Amira, Doctor of Education, 2013, Saint Louis University, Missouri, USA
Yazigy, Amal, PhD, 1992, Applied Linguistics, Leicester University, UK
Youssef, Lara, M.D., 2012, Pathology Laboratory Medicine, American University of Beirut, Lebanon
Zaccour, Danielle, Diplôme d’Études Supérieures, 1991 Arts Plastiques, Académie Libanaise des Beaux-Arts, Liban
Zehil, Gerard Philippe, PhD, 2013, Civil Engineering, Duke University, USA
Zgheib, Hani, Doctorate, 2001, Engineering: Living Environmental Studies, Kyushu University, Japan

Senior Lecturers
Assaf, Carole, MBA, 1995, Tourism and Marketing, Notre Dame University-Louaize, Lebanon
Beyrouthy, Ghassan, Doctorate (abd), 2008, Economics, Université de Québec a Montréal, Canada
Ghaleb, George, MBA, 2002, Management, Notre Dame University-Louaize, Lebanon
Hajj, Michael, M.A., 1997, English Literature, Notre Dame University-Louaize, Lebanon
Hajjar Muqa, Theresa, M.P.H., 1994, Biostatistics, American University of Beirut, Lebanon
Karam, Salim, MBA, 1983, University of Detroit, USA

UNIVERSITY PROFILE

LOCATION AND CLIMATE
Notre Dame University-Louaize (NDU) main campus is located in Zouk Mosbeh, a coastal area 15 km north of Beirut, Lebanon. Situated at an altitude of 100 m above sea level, the campus overlooks the beautiful bay of Jounieh, with an easy access to the economic and social life of a growing urban area. Theaters, elegant shops, coastal resorts, all lie within a short driving distance from the university. Also accessible are the Ouyoun Al Siman and Fakra winter touristic resorts. The climate of Zouk Mosbeh is moderately cold from December to March and moderately hot from June to September. The Fall and Spring seasons are usually sunny and cool. On an average, there are 300 days of sunshine per year, a fact which allows for a variety of outdoor activities.

The NDU North Lebanon Campus (NLC) is located on the green hills of Barsa, a quiet village in Koura, at an altitude of 100 m. The campus overlooks both the beautiful bay of El Mina - Tripoli, and the high mountains of Ehden and Bcharré. Moreover, it lies within a 10 - to - 15 minute driving distance from Tripoli, Zgharta, Chekka, and other villages in Koura. The clean and quiet environment, and the moderate climate add to the charm and attraction of the campus. The campus lies on a 50,000 square meters land donated by the village of Barsa. The first building constructed on the Barsa Campus, totaling 10,000 square meters of floor space, was completed in June 1999.

The NDU Shouf Campus (SC) is housed within the premises of St. Abda Monastery in Deir El-Kamar. The Monastery, a historic place, is being restored, not to its former glory but to a standard that maintains its traditional and aesthetic appeal. (The campus is expected to accommodate over 3,000 students). The visible benefits are evident everywhere. Today, rows of oak and pine trees surround the campus. The grassy evergreen slopes are well preserved. Visitors can easily admire the scenic beauty of the place. Beyond the University campus, the surrounding vicinity of Deir El-Kamar blends gracefully with the monastery premises. This historic city is located in the central area of the Shouf region. It is 35 km from Beirut and is just over 900 m above sea level. In general, the region enjoys a moderate climate except for the winter months, when the temperature may drop to 7°C or below.
IDENTITY, MISSION, VISION, AND VALUES

Identity
Notre Dame University-Louaize (NDU) is a private, Lebanese non-profit Catholic institution of higher education, which adopts the American system of education.

The religious affiliation of the university does not impose any sectarian obligations on faculty members, staff, or students. The cultural and spiritual heritage of the Maronite Order of the Holy Virgin Mary highlights a belief in a unified Lebanon, a belief in education as a means of protection against fanaticism and corruption, and a dedication to freedom of thought and expression. The university adopts such values and beliefs irrespective of color, creed, race, or gender and seeks to enhance these values through the liberal education it offers and the career preparation that caters to the real needs of Lebanon and the region.

Mission Statement
As a Catholic institution inspired by the cultural and spiritual heritage of the Maronite Order of the Holy Virgin Mary, Notre Dame University-Louaize (NDU) seeks to provide comprehensive quality education that fosters excellence in scholarship, lifelong learning, enlightened citizenship, human solidarity, moral integrity, and belief in God. In designing its curricula, NDU is committed to the philosophy and standards of the American model of liberal arts education. Conceiving itself as an authentic academic community, NDU promotes diversity, respect for human dignity and rights, and concern for the common good. Its profound aspiration is to prepare its students to be future leaders who can exercise reason upon knowledge and shape a world of truth, justice, love, and freedom.

Vision
NDU’s vision is to:

• Become the venue of choice as Lebanon’s Catholic university, offering students access to the finest faculty and a comprehensive curriculum taught in the Maronite tradition;
• Provide a highly personalized academic experience to graduate and undergraduate students;
• Integrate a strong, interdisciplinary, liberal arts core with degree-granting programs that offer preparation for professional careers and graduate studies;
• Excel in selected highly specialized areas, including signature programs that enhance the university’s reputation and serve as regional models for the delivery of educational development in Lebanon and the region;
• Foresee the changing needs with time and develop programs and utilize technologies consistent with those needs; and
• Create and sustain a community in which all aspects of University life is a reflection of its values.

Values
As a Catholic university offering a higher education in the Maronite tradition, NDU is determined to practice those core values that respect humanity and the dignity of the individual. This helps students on their life path of learning, and allows them to discover their talents through cooperation while they look for truth, for individual empowerment, and for the enhancement of the world around them. Accordingly, they dedicate themselves to the following core values:

• Faith - As a Catholic university, NDU highlights a strong belief in spiritual
motivation and education as a vehicle for a better and more just society;

- **Excellence** - In all activities of university life-teaching, scholarship, service, etc-NDU strives to be a center of quality education;
- **Scholarship** - To seek the truth, with a sense of discovery, through informed and rigorous scholarship, will place NDU among the top-ranking regional universities;
- **Freedom** - Of thought and expression; NDU commits itself to engage and enhance intellectual inquiry in the pursuit of truth by teaching students how to learn, how to think critically, how to conduct responsible research, and how to access and integrate information in preparation for career development and personal growth;
- **Integrity** - Teaching, scholarship, and student service within the university community are characterized by intellectual honesty and a sense of personal morality;
- **Service** - NDU is committed to serve not only its students, faculty and employees, but also society at large;
- **Diversity** - Empathy, tolerance and respect for all people is essential to any university community. NDU encourages students to understand and appreciate the diversity of cultures, which exist locally, nationally, and internationally. It also seeks to promote diversity appreciation through an understanding of the impact human beings have on their environment; and
- **Learning for Life** - In the tradition of a Catholic liberal arts education, NDU commits itself to lifelong learning, encourages personal responsibility, develops spiritual values, and affirms a philosophy of life which actively supports global economic equity, social justice, and human rights.

**HISTORICAL OVERVIEW AND HERITAGE**

**Historical Overview**

NDU was founded as a university in 1987 by the Maronite Order of the Holy Virgin Mary. NDU was first named Louaize College for Higher Education (LCHE) in 1978 as a joint venture between Beirut University College (BUC), now the Lebanese American University (LAU), and the Maronite Order of the Holy Virgin Mary. LCHE’s first Director was Patriarch Cardinal Mar Bechara Boutros Rahi from 1978 to 1984. Then after, Abbot Antoine Sfeir was appointed as Director of LCHE from 1984 to 1987.

In 1987, inspired by a deep apostolic concern and to address the needs of the community, the Order embarked on a new chapter in its history and founded an independent university. The legal journey of this project was the promulgation by the President of The Lebanese Republic issuing decree number 4116 on August 14, 1987, granting the Order the right to operate an independent university. Thus, NDU was born. Today it is considered the only Maronite Catholic University which adopts the American education system, not only in Lebanon but also in the entire Middle East. Three years later, in June 1991, the University was awarded its first bachelor degree to seventy-two graduates.

Along the direction set by the Vatican II Council, the Order decided to call on prominent members of the Lebanese society to oversee the operations of the University. Consequently, a Board of Trustees was established to supervise the academic and administrative operations and to help in the planning and development of the University.

In 1990, NDU established an off-campus program in North Lebanon, which in 1999, relocated to a new campus located in Barsa, Koura, now known as NLC. The campus
lies on a 50,000 square meters donated by the village of Barsa. The first building of the Barsa Campus, totaling 10,000 square meters of floor space, was completed in June 1999.

In April 1994, NDU established the Faculty of Engineering and Architecture. The Lebanese Government issued decree 9278 on October 5, 1996 granting the official recognition of the programs that lead to the Bachelor of Architecture and the Bachelor of Engineering in Civil Engineering, Computer Engineering, Electrical Engineering, and Mechanical Engineering. In Spring 2000, NDU established the Faculty of Architecture, Art and Design, and the Faculty of Political Science, Public Administration and Diplomacy. Accordingly, the Faculty of Engineering and Architecture was named the Faculty of Engineering. Furthermore, realizing on the need to serve the community, the Faculty of Nursing and Health Sciences was established in 2008.

After establishing itself as one of the leading universities in Lebanon, NDU’s administration saw a need to expand in the Shouf region and neighboring communities, and thus established a new campus in Deir El-Kamar within the Shouf district. The proposal was approved by the Board of Trustees in its meeting of March 8, 2001. The Shouf Campus was officially inaugurated on October 26, 2001. The foundation stone for the new campus in Zouk Mosbeh was laid on November 19, 1994. NDU’s current real estate holdings amount to 121,750 square meters and will grow significantly in the future with the completion of new campus facilities. True to its commitment of carrying out its historic mission, NDU’s community celebrated the University’s 25th Anniversary in 2012. This anniversary provided a unique opportunity for NDU to reflect on its past and to look forward to the road ahead.

**Heritage**

The University’s heritage and identity are traceable to strong roots in the Lebanese Synod that took place in the Monastery of Our Lady of Louaize in 1739, the motherhouse of the Maronite Order of the Holy Virgin Mary and the sponsoring society of NDU.

The Synod encouraged the mission of education within the Christian Maronite ethos that believed in Education for all. Accordingly, the Order began to spread education in Lebanon and established schools in many parts of the country.

Capitalizing on its being Catholic in spirit and Maronite in tradition and focusing on the Synod’s mission and directives, NDU as such has always sought to play its appropriate role in the Middle East.

As a Catholic university, NDU promotes the dynamic discussion of religious ideas. This dialogue strives to include the myriad voices of the Catholic tradition, past and present, as well as the voices of faculty, staff, and students of all backgrounds. Such a Catholic undertaking helps the university community understand and celebrate the differences among the various voices, identify what they have in common, and engage them in dialogue with the Catholic tradition.

Also, as a Catholic university, NDU is inspired by the Christian message of the love of God and the love of neighbor. Its administrators, faculty, staff, and students dedicate themselves to the pursuit of academic excellence in an environment of respect, care, dialogue, and justice. In addition, NDU is a community, which seeks to develop the love of truth and the desire to integrate and affirm the harmony between faith and reason. The
university has synthesized the search for truth by offering curricula rooted in the arts and sciences guided by the university’s spiritual and Catholic heritage. Students at NDU enjoy a transparent relationship and respect with their professors. It is this unique environment that helps professors draw out their students’ potentials while respecting their talents.

Drawing on these traditions, NDU seeks to endorse a Catholic presence through its student services, campus ministry, course curriculum, and administration, and continues to dwell on how this Catholic heritage brings meaning to its faculty, staff, students, and the entire NDU family.

**Directors of LCHE**
- Patriarch Bechara Rahi  1978 - 1984
- Abbot Antoine Sfeir  1984 - 1987

**Presidents of NDU**
- Abbot Boutros Tarabay  1987 - 1993
- Bishop Francois Eid  1993 - 1999
- Abbot Boutros Tarabay  1999 - 2005
- Father Walid Moussa  2005 - present

**CAMPUS MINISTRY**
Campus Ministry seeks to express the teaching of the Catholic Church as well as the spiritual heritage of the Maronite Order of the Blessed Virgin Mary by nourishing the development of faith and good works at Notre Dame University-Louaize and by encouraging the community (faculty, staff and students) to proclaim the Gospel of Jesus Christ.

While respecting all other religious traditions, we engage in every aspect of University life through prayer, liturgy, spiritual services, i.e. retreats, reconciliation, and counseling, and charity events, where all members are invited to express their care and love towards those in need.

Campus Ministry also guides and accompanies the University Pastoral Work group at Notre Dame University-Louaize and coordinates with University Pastoral Work groups at other Lebanese universities.
WASHINGTON, D.C., OFFICE
NDU established an office in Washington, D.C., U.S.A, to promote its distinctive educational values and goals in that country. Today, the D.C. office is charged with advancing the NDU Mission in the U.S.A, while supporting the various American Friends of NDU (AFNDU) chapters and NDU alumni residing in the country.

Specifically, the D.C. Office serves to:
• Support and work with AFNDU to promote NDU through events and other activities;
• Establish exchange programs between Lebanese and American students;
• Forge and maintain cooperative relationships with American institutions of higher education;
• Help NDU recruit faculty members;
• Provide support and services to NDU graduates residing in the U.S.A.; and
• Liaise with alumni, friends, and faculty members.

AMERICAN FRIENDS OF NDU (AFNDU)
Established in 2001, the American Friends of NDU (AFNDU) is a non-profit organization established to serve as a cultural link between NDU and the U.S.A. Governed by an annually elected Board of Directors, AFNDU is present in Washington, D.C. Michigan, California, and Massachusetts.
AFNDU was created to:
• Establish a cultural link and exchange program with American universities;
• Build relationships with Lebanese-American communities;
• Seek cooperation of American public libraries and university press offices; and
• Provide financial assistance to students by way of scholarships.

Today, representatives of AFNDU-DC meet on a monthly basis to focus on generating awareness for NDU, connecting and collaborating with NDU alumni in the U.S.A. and like-minded organizations, and building relationships with Lebanese-Americans through local events, e-mail campaigns, and social media outlets.

FRIENDS OF NDU FOUNDATION - CANADA
Founded in 1998, the Friends of NDU Foundation Canada acts to further cultural and educational links between Canada and NDU. The Foundation supports the University in all its efforts to link its academic and institutional functions. Its activities center on outreach efforts broadly understood, managing and strengthening Alumni and Friends chapters throughout Canada, serving as a liaison to local and national authorities to ensure the University’s presence is firmly established and recognized, and lending logistical support to the University in its multiple interactions with Canadian individuals and institutions.
OFFICE OF ADMINISTRATION

OFFICE OF HUMAN RESOURCES
The Office of Human Resources designs the University formal systems that ensure the effective and efficient use of human capital for the University to remain competitive and fulfill its mission.

This requires a strategic, global, and forward-thinking focus that positions HR as a strategic partner for the University and demonstrates how HR contributes more directly to the bottom line.

OFFICE OF CAMPUS SERVICES
The Office of Campus Services ensures the development and delivery of high quality support services that demonstrate value to the University mission and objectives.

This encompasses a wide range of services such as, not limited to, telephone, mailing, transportation, ID, classroom, housekeeping, and procurement.

OFFICE OF PHYSICAL PLANT
The Office of Physical Plant is responsible for planning, coordinating, and overseeing the University constructions and renovations projects, in addition to maintaining the University facilities and grounds.

This encompasses maintenance, landscaping, cleaning, and construction and renovation.

OFFICE OF INFORMATION TECHNOLOGY
The Office of IT provides high-technology services and state-of-the-art innovative solutions while building and maintaining a robust, reliable, and secure framework of IT infrastructure and support, of applications and software development, of network and security, and e-learning.

OFFICE OF FINANCE

BUSINESS OFFICE
The Business Office handles all University accounts in a professional and timely manner that allows the University to meet its statutory financial obligations and internal financial management objectives.

OFFICE OF PURCHASING
The Office of Purchasing plays the bridge between the University external clients and the Office of Procurement; it ensures, in an efficient and effective manner, services for better resources optimization, by commitment to excellence and ethical standards.

OFFICE OF BUDGETING
The Office of Budgeting at NDU handles all the University financial budgeting and planning in addition to allocation of financial resources for better decision-making and goals accomplishment.
OFFICE OF SPONSORSHIP
The Office of Sponsorship promotes and supports various national and international events and conferences. It performs wide-ranging sponsorship assignments such as championing the relation between the sponsor and the event organizer, supporting financially innovative academic projects and events organized by the students in cooperation with faculty members, and supporting financially selected students to represent NDU in international conferences relevant to their field of study.

OFFICE OF PUBLIC AFFAIRS AND COMMUNICATIONS
The Public Affairs and Communications Office at NDU intends to continue maintaining healthy relationships with stakeholders and to continue developing enriching networks for the welfare of the University. The main function of the Office is to provide and develop effective outreach strategies aimed at improving institutional exposure, instituting new ways of setting up a two-way flow of information, and fostering mutually beneficial relationships between the University and its internal and external stakeholders.

On behalf of NDU, its campuses, centers and staff, the Public Affairs and Communications Office presents and communicates all information, programs, and policies related to the University. It produces program brochures, material promoting special events (programs, leaflets, posters, and invitations), and handbooks.

The Office also represents the University by attending and participating in various exhibitions, fairs and conferences. It represents the University at meetings of the League of Lebanese Universities, the Association of Arab Universities, the Coordination Council for Catholic Universities in Lebanon (CCUCL), and the Association of Collegiate Registrars & Admissions Officers (Arab - ACRAO) for the universities of the Arab countries. The Public Affairs and Communications Office works in collaboration with its two Offices in the North Lebanon Campus (NLC) and the Shouf Campus (SC), coordinating all activities and social events that take place during the academic year.

The Office coordinates the activities of the following entities namely:

OFFICE OF PUBLIC AFFAIRS AND EVENTS
The main purpose of the Office of Public Relations and Cultural Affairs is to create and promote goodwill and a favorable image among the public and community toward NDU. The Office coordinates, organizes, and hosts special cultural, academic, and intellectual events and seminars with the main objective of safeguarding a positive reputation of the University on local, regional, and international levels. The Office is responsible for building and maintaining mutually beneficial relationships between the University and its stakeholders. It organizes and participates at public events conferences, conventions, awards, etc. It fosters community relations through events and through involvement in community initiatives. The Office also connects with embassies and cultural entities in Lebanon to acquaint potential international partners and to find opportunities of cooperation in the sphere of culture. The Office is the link between the University and local government and legislators. It coordinates with the Ministry of Education and Higher Education (MEHE) to obtain licences and advanced information of decisions. The Office of Public Relations and Cultural Affairs offers its support to University-wide
organized events. It represents the liaison with key spokespeople and sources, and manages programs during events.

The Office also oversees the management of the Museum.

**MUSEUM**
The Stone Wing Museum, inaugurated on March 9, 2005, includes three collections: The prehistoric stone tools collection (discovered in Kaoukaba by Laure and Frank Skeels in 1964), the minerals, rocks, precious and semi-precious stones collection, and the fossilized fish and plants collection.

The Museum is entrusted to the curator whose duties encompass the preservation and conservation of the collections, archiving and cataloguing of new acquisitions, scheduling and coordinating visits, and keeping records of all visitors.

The Stone Wing Museum charges no entry fees and is open to the public. The curator entrusted is always ready to receive and guide visitors (students from schools and universities, researchers, and interested national and international guests) to enrich them with information about the Museum and its various and valuable collections.

**OFFICE OF DESIGN AND BRANDING**
The Office of Design and branding is entrusted with designing materials and visual communication, and working on developing the NDU identity, safeguarding its core image, and building on its promise to deliver value, as reflected in the mission statement. The Office is tasked with all design activities for any type of publication involving NDU. Its role and function insure a proper creative and unified visual communication for all NDU corporate and continuous internal campaigns, in both printed publications (invitation cards, posters, brochures, books, magazines etc...) and digital publications (website, social media, corporate videos/campaigns).

**OFFICE OF COMMUNICATIONS**
The Office of Communications evaluates, safeguards, maintains, and promotes NDU’s image and reputation both internally and externally by ensuring that every established communication - whether for internal or external use (both offline and online) - is aligned with the overall set communication strategy, which reflects NDU’s values and vision. This Office aims to increase visibility and promote the University and its faculty, students, programs, and policies to a variety of internal and external stakeholders. It also provides to all the University entities strategic communication consultation in image and reputation management, media relations services, communication crisis management, media training, and internal communication.

The Office of Communications is made up of four departments: **Internal Communications** whose main objective is to deliver a planned framework that provides clear, informative, and engaging two-way communication; **Media Relations**, which aims to build a strong and loyal link between NDU and the different media (radios, TVs, newspapers, magazines, etc.) to highlight all the University’s differentiating elements; **Digital Media**, which is responsible for safeguarding NDU’s digital image and promoting all of NDU’s activities and announcements on the digital platforms that comprise the official website, social media, mobile application, and intranet; and **Copywriting**, which is responsible for developing and proofreading communication related texts serving University offices and faculties.
NDU PRESS
Three major steps have been taken by the NDU Press to revive book-publishing activities on a professional level:

- All published books, as of October 2000, carry an ISBN number, which ensures recognition for NDU Press in Lebanon, Europe, and the USA as a professional University publishing house;
- All books are reviewed with a recommendation to the President before a final decision for publication is made. Specialized scholars are consulted to support such recommendations and decisions; and
- An agreement has been entered with a distribution agency in which all books published by NDU Press are distributed to major bookshops in Lebanon and abroad.

OFFICE OF ALUMNI AFFAIRS
Graduation from NDU is NOT the end of a student’s affiliation with the University. Instead, it is the beginning of a new phase of the relationship with the University. The Office of Alumni Affairs is responsible for maintaining the links of alumni with the University. The Office of Alumni Affairs aims to:

- Serve the needs of Alumni, enduring and permanent constituencies of NDU;
- Foster a life-long relationship between the University and its Alumni;
- Build an information management system that updates and utilizes “NDU Alumni” data;
- Coordinate with NDU Alumni Association;
- Organize professional, cultural, networking and social activities for NDU Alumni;
- Communicate Alumni views, needs and interests back to the University; and
- Expand Alumni participation in promoting the strengths of NDU to the world at large through supporting the University’s mission.

The Office of Alumni Affairs serves as a focal point for all alumni activities and communications. It assists in planning or sponsoring alumni activities, such as Campus Tour, Alumni E-newsletter, Alumni Annual Awards, Alumni programs, Class Reunions, Alumni Day, Alumni College, Alumni Gala Dinners, Regional Visits, etc. The Office also maintains communication with all NDU Alumni through the Alumni webpage via the NDU website, which offers complete and timely information about NDU happenings and Alumni events, stories, and programs.

Core Values: Partnership, Service, Innovation, Excellence

Motto: Building Bonds: Get Connected / Stay Tuned

NDU Alumni Association
The NDU Alumni Association was established in 1992, by a group of graduates who wanted to remain connected to and involved with their alma mater. Its aim is to reunite all NDU graduates under a common goal: Commitment, Unity, and Prosperity (benefiting both NDU and its graduates). Through its cooperation with NDU Alumni Affairs Office, the Association seeks to provide alumni with a lasting bond to the University. A new steering committee was appointed in February 2016 to mark a new form of cooperation between the Office and the Association. The four main goals of the Alumni Steering Committee are: 1) Updating the database of NDU graduates across the three main campuses: Main, Shouf, and North Lebanon. 2) Discussing the Steering Committee’s internal by-laws.
3) Opening membership to all NDU Alumni, according to the by-laws; and Conducting elections to form an Alumni Council.

OFFICE OF ACADEMIC AFFAIRS

OFFICE OF INSTITUTIONAL RESEARCH AND ASSESSMENT
The Office of Institutional Research and Assessment is responsible for institutional research. This type of research gathers accurate and timely information to support proper decision making and institutional effectiveness efforts, assessment, and analyses, which is a continuing process aimed at understanding and improving student learning.

OFFICE OF INTERNATIONAL RELATIONS
In an increasingly interdependent world, internationalization has become a key feature of higher education institutions (HEIs) and within the overall context of higher education policies (accreditation process, intra-institutions cooperation, etc.).

The mission of the Office of International Relations (OIR) team at Notre Dame University-Louaize (NDU) is to contribute actively to the internationalization process of the University. The OIR team is working to achieve this mission through closely adhering to the University Identity, Mission, and Values and by collaborating with the University leadership, community and international partners through external networking, communication, cooperation, Students and Faculty exchanges and common projects.

The following four Objectives are inspiring and guiding the OIR team in their international initiatives and activities:

• Prepare our Students for Global Leadership Skills;
• Develop and Coordinate the Institutional External Relations;
• Promote our University Internationally;
• And be the “Organizational Memory” for International Relations.

You find below a list of our International Memberships, Networks and a list of our Agreements and Memoranda of Cooperation and Understanding.

In the same time, and in coherence with our NDU Strategic Plan 2015 - 2020, the OIR team is committed to develop specific Regional activities and cooperation.

Together we will succeed, and together we will build a “learning society”, truly inspired by our Values.

International Networks and Memberships

• Action Chrétienne en Orient (ACO), France
• American Association of Collegiate Registrar’s and Admission Officers (ACRAO), USA
• American Council on Education (ACE), USA
• Arab Association of Collegiate Registrar’s and Admission Officers (AACRAO), Jordan

• Wayne State University, College of Engineering, USA
• Yerevan State University, Armenia - New

OFFICE OF RESEARCH AND GRADUATE STUDIES
The Office of Research and Graduate Studies is managed by the Assistant Vice President for Research and Graduate Studies (AVPRGS), who is responsible for promoting and coordinating research by faculty members as well as by graduate and undergraduate students. Furthermore, the AVPRGS is tasked with overseeing the graduate programs at NDU, ensuring that they are up to the required standards. In addition, the AVPRGS supervises the activities of the following research centers:

Center for Applied Research in Education
The Center was established on October 1, 2006. The CARE objectives are: to promote multi-disciplinary research in education; to establish and utilize personal contacts with international academic institutions; to conduct analytical studies on curricula development and policy-making studies in higher educational institutions in Lebanon and Arab countries; to organize academic international conferences in the Arab countries; in order to promote excellence in education.
Center for Digitization and Preservation
The Center aims to assist mainly scholars, clergy, and governments in the preserving, imaging, and distribution of ancient writings. It offers important services such as:

- The preservation of significant philosophical and theological manuscripts by photography and/or electronic scanning;
- The digitization and incorporation of selected manuscripts into searchable electronic databases at minimal cost;
- The translation and publication of selected ancient and medieval texts.

Lebanese Center for Societal Research
The University established a center for research, studies, and documentation within the framework of a University research policy that aimed at developing the role of scientific research in the treatment of social, economic, political, educational, ethnical, and human rights issues in society and, further, at activating the contribution of spiritual and civil institutions in this treatment.

Lebanese Emigration Research Center
The political, economic, and social conditions in Lebanon and the Middle East were direct reasons for the increase in Lebanese Emigration. However, little is known about it and its impact on the Lebanese social, political, economic, and cultural structures. Lebanon feels the basic and immediate need for research studies on the subject, where the LERC can play a significant role in collecting information and conducting the necessary and proper research on this vital issue to Lebanon.

The Marian Studies Center
The Center was established by NDU to act as a center for the “International Pontifical Marian Academy” in Lebanon and the Middle East. The Center was officially inaugurated in November 2003, and was baptized as The Marian Studies Center.

OFFICE OF ACADEMIC SUPPORT
The Office of Academic Support is managed by the Assistant Vice-President for Academic Support (AVPAS), who, on behalf of the VPAA, supervises the following academic support offices: University Libraries, Students Affairs, Admissions, and Registrar.

Academic Advisory Services
Coordination of academic advising at NDU is intended to ensure appropriate advising to students. Following admission to the University, students are referred to faculty advisors who assist them in the selection of appropriate courses. The Faculty Advisory Service also helps students take academic decisions based on their abilities, interests, and goals, following up their academic progress throughout their university years and helping them to, when needed, reconsider their choices of major. Students are encouraged to seek information and assistance from faculty advisors on all matters relating to their educational plans.
**NDU LIBRARIES**

**NDU LIBRARIES MISSION STATEMENT**
The NDU Libraries strive to provide quality services by acquiring, organizing, preserving, and providing access to a variety of information resources. The libraries, thereby, support the University’s mission to foster excellence in scholarship and lifelong learning, and to educate students to be future leaders who can exercise reason based upon knowledge.

The NDU Libraries consist of the Mariam and Youssef (Main) Library at the Zouk Mosbeh Campus, the NLC Library at the Barsa Campus, the Shouf Library at the Deir El-Kamar Campus and the Division of Continuing Education (DCE) Library at the Old Zouk Mosbeh Campus. The NDU Libraries are also responsible for maintaining and developing the research collections of the Council for Research in Values and Philosophy (CRVP) Library, the Center for Applied Research in Education (CARE) Library, the FAAD Room for Inspiration - Information - Ideas, the Institute for Lebanese Thought (ILT) Library, the Marian Studies Center (MSC) Library, and the Lebanese Emigration Research Center (LERC) Library.

Recognizing that the Library is central to fulfilling the mission of the University, the NDU Libraries keep up-to-date with the latest publications relevant to the major programs of study through purchases and an active local and international gifts and exchange program. The Libraries welcome and encourage donations and institutional exchanges that support the University’s academic programs and the scholarly, teaching, and research interests of the NDU community. In addition, as a founding member of the Lebanese Academic Library Consortium (LALC) and the Lebanese Inter-library loan and Document delivery services Consortium (LIDS), the NDU Libraries actively collaborate with other Lebanese Libraries for the benefit of all.

The Mariam and Youssef Library provides access to a continuously expanding collection of core reference and circulating materials in print, manuscript, electronic, audio, visual, cartographic, and other appropriate formats. It also provides individual and group study space for more than 300 simultaneous users, an Information Commons with appropriate support and access to information and technology resources, and a classroom for Library instruction. The NLC Library, Shouf Library, and DCE Library provide access to a core collection of references, circulating materials, periodicals and electronic resources, in addition to providing space for quiet, individual study.

All NDU Libraries collections are searchable from the Libraries homepage on NDU’s website (http://www.ndu.edu.lb).

The NDU Libraries are open to all users, however, only NDU faculty, students, staff, and alumni are currently granted borrowing privileges. NDU Libraries guests and visitors are allowed to access and use the library’s resources within the confines of the library only. Furthermore, NDU Libraries materials may be requested and borrowed from any campus library, regardless of where they are housed.
OFFICE OF THE REGISTRAR
The Office of the Registrar is the unit in charge of the University's academic records. The Office is managed by the Registrar, who is entrusted with the confidentiality and integrity of students records. Being the guardian of the academic rules and regulations, the Office of the Registrar provides students and academic units with all services related to these records.

ACADEMIC RULES AND REGULATIONS (UNDERGRADUATE) STUDENT CLASSES
Students attending NDU who are not yet considered as being at the university level are classified as follows:

<table>
<thead>
<tr>
<th>Class</th>
<th>Number of Credits Completed (on courses of 100 level and below 200 level)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Remedial/Intensive</td>
<td>0 credit</td>
</tr>
<tr>
<td>Freshman</td>
<td>1 - 30 credits</td>
</tr>
</tbody>
</table>

b. Undergraduate students in the Faculties of FAAD and FE are classified as being in the 1st, 2nd, 3rd, 4th or 5th year class according to the number of credits completed as specified in their respective suggested programs.

c. Undergraduate students in the Faculties of FBAE, FH, FNAS, FNHS and FLPS are classified as follows:

<table>
<thead>
<tr>
<th>Class</th>
<th>Number of Credits Completed (on courses of 200 level or higher)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sophomore</td>
<td>31 - 60 credits</td>
</tr>
<tr>
<td>Junior</td>
<td>61 - 90 credits</td>
</tr>
<tr>
<td>Senior</td>
<td>91 and more</td>
</tr>
</tbody>
</table>

FULL-TIME STUDENTS
Full-time undergraduate degree students are those who register for at least 12 credits during the Fall or Spring semesters.

PART-TIME STUDENTS
Part-time undergraduate degree students are those who register for less than 12 credits during the Fall or Spring semesters. A part-time student does not qualify for financial assistance.

SPECIAL STUDENTS OR NON-DEGREE STUDENTS
Undergraduate students who are taking courses at NDU for credits but not working
toward a degree are considered Special Students or Non-Degree Students. Non-degree students shall be accepted on a semester-to-semester basis. Initial applications shall be made through the Office of Admissions and thereafter through the Office of the Registrar. Such students shall meet the academic standards required of degree students and shall neither be permitted to audit courses nor be qualified for any kind of financial aid.

TRANSFER STUDENTS
Credits transferred from institutions of Higher education that are recognized by the Lebanese MEHE are accepted provided that the concerned Department and Faculty ensure that the credits accepted are applicable to the corresponding degree program and that a minimum grade of C was obtained. However, the accepted credit does not count toward the student’s GPA at NDU. The criteria established by NDU regarding this policy are made available to students through its website and its catalog.

Depending on the Faculty, a transfer student is required to complete at least 30 or 45 credits at NDU in order to be eligible for a degree, while the remainder of the credits that are taken at other institutions of higher education can be transferred if they satisfy the criteria of the concerned Department and Faculty. Exceptionally, transfer students who want to join the Faculty of Engineering /Bachelor of Architecture can receive credit for NDU courses listed under the LAC, core requirements and free elective categories of the NDU contract sheet. In order to ensure that students have achieved the required outcomes and objectives specified by the concerned department, the Faculty of Engineering reserves the right not to give transfer credit for courses listed under the major requirements category even if students have taken similar courses at the institution they previously attended.

Freshman students are considered ineligible for transfer.

STUDENT EXCHANGE PROGRAM
An exchange program is a unique feature of international universities wherein a student may apply for a site transfer in any of the universities with which NDU shares an academic collaboration or exchange agreement. The student exchange program is a program coordinated by the Office of International Relations (OIR), a unit that reports to the Vice-President for Academic Affairs (VPAA).

The objective of the student exchange program is to promote international attentiveness and construct effective partnerships with established universities and educational institutions. A student exchange program will provide academic and intellectual benefit through the exchange of students between NDU and respective institutions that are party to a formal Exchange Agreement or a Memorandum of Understanding/Cooperation.

• OUTGOING EXCHANGE STUDENTS
NDU exchange students will be considered as ‘outgoing students.’ this does not mean, however, that they are no longer ndu students. no matter how long the exchange program may be, outgoing students will not receive a degree from the host institution; they have to come back to ndu to receive their degree. that being said, outgoing students must fulfill a set of requirements and complete an application to make their participation in the student exchange program a reality.
• INCOMING EXCHANGE STUDENTS
Who can be an Incoming Exchange Student?

- Someone who wishes to study part of his/her degree at NDU and take all credits achieved to his/her Home Institution; and

- Any student registered in a university that has a formal agreement with NDU in such respect.

CREDIT TRANSFER FOR EXCHANGE STUDENTS
The OIR (Office of International Relations) at NDU will work with the student to negotiate a suitable program, with credit transferable to his/her Home Institution. The student will need to work hard on this part of the process at his/her Home Institution, but should not expect to have it completely finished until he/she is here at NDU.
When the student finishes his/her study in the student exchange program at NDU, he/she will be issued an official transcript of the courses he/she has completed and the grades achieved. It is, however, the student’s responsibility to obtain his/her transcript. Therefore, follow-up on the attainment of the transcript of grades is the student’s responsibility.

AUDITORS
An auditor is an individual who has been admitted to course(s) while satisfying the requirements for admission to this course as deemed appropriate. He/she is required to pay 75% of the course(s) tuition. Once an auditor is registered, he/she cannot change his/her status back to credit. Grades and credits will not be given for auditing course(s) and hence cannot be counted for enrollment certification, and for financial aid purposes.

HOURS OF CLASSES
Usually, classes are held Monday - Friday. However, some classes may be held on Saturday. During semesters, classes start at 8:00 a.m. However, some four-credit courses may start at 7:30 a.m. For summer sessions classes start at 8:00 am.

ATTENDANCE POLICY
A student who is not officially registered may not attend a course at the Notre Dame University-Louaize. Otherwise, NDU expects regular attendance from its registered students.
Two basic rules apply to all excused absences, whether excused because of an NDU policy or at the faculty member’s discretion:

- Students must still meet all course requirements; and

- Faculty must offer students reasonable assistance in making up missed work, if and only if an excused absence has been justified.

Scope of Policy
Full participation in classes, laboratory periods, and examinations is expected of all students. Faculty must keep a record of attendance throughout the semester. Furthermore, faculty must detail the attendance policy, including procedures for submitting excuses and for scheduling makeup work when the excuses are accepted, in their syllabus that is distributed on the first day of classes. Students may be asked to provide documentation for multiple consecutive absences or frequent single class absences.
A pattern of absences may affect a student’s grade substantially. **The faculty member teaching a certain class, in full coordination with the Department Chair, is the direct authority responsible for the implementation of the Attendance Policy in such class. The Office of Student Affairs only validates absences related to University events, travel, or medical excuses upon need and only when requested by the Department Chair.**

The student is responsible for the material presented during his/her absence. The maximum number of absences for classes that meet on MWF is six and for those that meet TTH and in summer is four, (or two hours per credit course). Any student whose absences exceed the maximum limits shall automatically be unofficially withdrawn from the course, unless he or she withdraws.

**Range of Excused Absences**

NDU has a commitment to all students. Students shall receive excused absences for a reasonable number of anticipated absences, as well as for emergencies, as specified below:

- **Anticipated Absences:** Excuses for anticipated absences must be cleared with the relevant faculty member before the absence. Examples of anticipated situations where a student would qualify for an excused absence are:
  
  > The student is away from campus representing an official NDU function, such as participating in a professional meeting, as part of a judging team or athletic team;

  > The student is required to travel due to a family emergency or renewal of an expiring visa/residency permit;

  > Required military duty; and

  > Obligatory court attendance.

- **Unanticipated Absences:** Excuses for unanticipated absences must be reported to the relevant faculty member as soon as possible, but not more than one week after the return to class. Examples of unanticipated absences are:

  > Short-term illness or injury affecting the ability to attend or to be productive academically while in class, or that could jeopardize the health of the individual or the health of the classmates attending. Student must notify the relevant faculty member of such absence prior to class absence by e-mail if possible; and

  > Death or serious illness in the family when documented appropriately.

**University Closure**

Unexpected University facility closures due to weather, emergency, or disaster may occur from time to time. Students may be required to complete coursework missed due to these or other class cancellations. However, faculty members requiring mandatory makeup sessions may not penalize students if they are unable to attend due to time conflicts, etc.

**Drop for Non-Attendance**

Students are not automatically dropped from class(es) if they do not attend. They must
officially drop their class(es) by the published deadline in the academic calendar to avoid a “UW” grade.

EXAMINATIONS AND QUIZZES
All courses normally have written final examinations. Such examinations are not required in seminars, field work, internship programs, studio courses and senior projects, but the instructor concerned may choose to give one.

As to quizzes and progress tests, instructors shall give a minimum of two per course. If, for a legitimate reason acceptable to the instructor of the course, a student misses a quiz, he/she should arrange for a make-up with the instructor of the course within a maximum period of two weeks from the date assigned for that quiz.

Final examinations shall count for a maximum of 40% of the final grade. Those exams should be comprehensive by nature. The remaining 60% account for quizzes, progress projects, tests, term papers and other requirements as specified by the respective department. A minimum of 40% of the course evaluation should be known by students prior to the official withdrawal deadline.

Different sections of the same course must be given a common departmental final examination.

FINAL EXAMINATION MAKE-UP
If a student misses a final examination for a legitimate reason, he/she should make arrangements for a make-up examination with the instructor of the course and the chairperson of the department. If permission is granted, the student shall pay the University a make-up final examination fee of LBP 200,000. Consequently, the final examination make-up shall be taken no later than the 8th week of the next academic semester if a grade of incomplete “I” is submitted to the registrar. In the case where a change of grade is not received by the Office of the Registrar within the set period, a grade of “F” shall be given for that course.

GRADED FINAL EXAMINATION PAPER
The graded final examination papers of a course offered during a given semester or the summer session must be submitted to the Department Chairperson concerned within 72 hours from the scheduled date of the final examination of that course. These papers must be kept at the department concerned for at least one semester along with a copy of the course syllabus, final examination, and its solution.

FINAL GRADES
A course’s final grades should be submitted to the Office of the Registrar 72 hours after the scheduled date of the examination for that course. The instructor should submit online the final grades to the Department Chairperson who will in turn submit them to the Dean of the respective faculty for final approval.

RECORD BOOK OR BLUE BOOK
The original record/blue book of the courses taught by a faculty member during a given semester or the summer session must be submitted to the concerned Department Chairperson within 72 hours from the latest scheduled date of the final examination of his/her courses. This book shall be kept at the department concerned for at least one
academic year, with a copy of it signed by both the Faculty Member concerned and his/her Department Chairperson shall be submitted to the Office of the Faculty Dean concerned.

TRANSCRIPTS
Upon request, students can obtain an official transcript or a student copy transcript from the Office of the Registrar within two working days. Transcripts cannot be issued to students who have a financial account pending with the University.

CHANGE OF GRADE
Once a student’s grade for a course for which he/she is enrolled during a given semester or the summer session, is approved by the Faculty and processed by the Office of the Registrar, it shall be final in the absence of justified circumstances such as evidence of human error in calculation, recording, visual oversight, or confusion in the names of students or course sections.

Under justifiable circumstances, to change a grade, the instructor of the course should fill in and sign a “Change of Grade Form”, which can be obtained from the Office of the Registrar. All supporting documents including the instructor’s record book should be attached to the form. Once the new grade is approved by the department’s Chairperson, it is forwarded to the Faculty Dean for final action and then resubmitted to the Registrar’s Office.

Only under force majeure would a student’s case be considered beyond those five days. The student may petition for re-evaluation of his final grade in a particular course.

No case will be considered after a lapse of one semester.

CHANGE OF PROVISIONAL GRADE
Changes made to the provisional grade “I” and “PR” should be done within an allotted period otherwise the Office of the Registrar will directly convert the grade to “F”. The “I” grade must be changed by the end of the 8th week of the following semester and the “PR” grade must be changed by the end of the following semester.

GRADES FOR REPEATED COURSES
Students must repeat courses for which they got a grade of “F”, “UW”, or those courses for which they did not get the required passing grade set by the Department or Faculty concerned, in the case where these courses are required in the major. Students must repeat these courses immediately the next time they are offered. Students may also repeat a course for which they got a grade below “C”.
For a repeated course, only the last grade, whether higher or lower, will be computed into the GPA. The other grades are kept on the student’s transcript. A course may be repeated only twice. A student who fails to pass a course for the third time will have to comply with the instructions of the Dean concerned. The letter “R” will be placed on the student’s transcript next to the course being repeated.

GRADES UPON CHANGE OF MAJOR
1. Upon approval of change of major, all grades on transferable or non-transferable courses taken by a student in his/her old major/area of concentration remain part of his/her official transcripts. Unlike the transferable grades, the non-transferable ones
are not computed in the student’s GPA for the new major and are not counted toward
the total number of credits required for graduation for the new major. A student
cannot ask for a non-transferable course to be computed back in his/her GPA.

2. The students who benefited from the above rule (#1) cannot return to their old major,
and cannot request to have their major changed again to any major which requires a
non-transferable course grade, which was deleted from his/her GPA.

SYSTEM OF GRADES

The University uses the following system of grades. This system consists of letter grades
with their corresponding numerical ranges (i.e. percentage equivalent, and the 4.0 point maximum).

<table>
<thead>
<tr>
<th>Grade</th>
<th>Description</th>
<th>Quality Point Value</th>
<th>Percentage Equivalent</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>Outstanding</td>
<td>4.0</td>
<td>97 - 100</td>
</tr>
<tr>
<td>A</td>
<td>Excellent</td>
<td>4.0</td>
<td>93 - 96</td>
</tr>
<tr>
<td>A-</td>
<td>Very Good</td>
<td>3.7</td>
<td>89 - 92</td>
</tr>
<tr>
<td>B+</td>
<td>Good</td>
<td>3.3</td>
<td>85 - 88</td>
</tr>
<tr>
<td>B</td>
<td>Good</td>
<td>3.0</td>
<td>80 - 84</td>
</tr>
<tr>
<td>B-</td>
<td>Good</td>
<td>2.7</td>
<td>77 - 79</td>
</tr>
<tr>
<td>C+</td>
<td>Satisfactory</td>
<td>2.3</td>
<td>73 - 76</td>
</tr>
<tr>
<td>C</td>
<td>Satisfactory</td>
<td>2.0</td>
<td>70 - 72</td>
</tr>
<tr>
<td>C-</td>
<td>Passing</td>
<td>1.7</td>
<td>66 - 69</td>
</tr>
<tr>
<td>D+</td>
<td>Passing</td>
<td>1.3</td>
<td>63 - 65</td>
</tr>
<tr>
<td>D</td>
<td>Lowest Passing</td>
<td>1.0</td>
<td>60 - 62</td>
</tr>
<tr>
<td>F</td>
<td>Failure</td>
<td>0.0</td>
<td>0 - 59</td>
</tr>
</tbody>
</table>

**UW** Unofficial Withdrawal  The grade “UW” is assigned by the instructor when a
registered student has never attended a class or has ceased attending and has not submitted an official course withdrawal request to the Office of the Registrar. This grade is computed as an “F” grade in the GPA.

**W** Official Withdrawal  The grade “W” indicates withdrawal without academic penalty. This grade is issued by the Office of the Registrar only to students submitting an official course withdrawal form by the scheduled deadline. The grade “W” is not computed in the student’s GPA and may not be changed to any other grade under any circumstances.

**PR** Progress, Re-enroll  The grade “PR” is a provisional grade, and hence it is not computed in the student’s GPA. It is used to reflect progress on continuing research efforts for the senior study or the senior research or design project until it is completed. If this provisional grade is unresolved by the end of the following semester, the Office of the Registrar will automatically convert it to the grade of “F” and it will be computed in the student’s GPA.
U  Audit

The grade “U” indicates that the individual was an auditor or listener in the course. This does not have any quality point value, and hence it is not computed in the student’s GPA. Neither the credits nor a written statement can be given for a class audited, and no instructor is authorized to admit anyone as an auditor to any of his/her classes unless the individual has registered as such.

I  Incomplete

The grade “I” is a provisional grade, and hence it is not computed in the student’s GPA. It indicates that the student has for good and justified reasons not completed all course requirements, but there is a reasonable expectation that he/she will successfully complete it. If this provisional grade is unresolved by the end of the 8th week of the following semester, the Office of the Registrar will automatically convert it to the grade of “F”, and will then be computed in the student’s GPA. However, students, who are out of attendance in the semester following the one in which the course was taken, have one year to complete the work. Degree candidates should be aware that an “I” grade received during the last semester in any of the courses required for graduation will automatically result in the postponement of graduation.

P  Pass

“P” indicates a passing performance in a course taken in a Pass/No Pass. The credits if any will be added to the number of credits passed, but will not be included in the average. It has no quality points.

NP  No Pass

“NP” indicates a failing performance in courses taken on a Pass/No Pass basis. No credits will be added to the student’s record, nor will the average be affected. It has no quality.

GRADE-POINT AVERAGE

The Grade-point-average (GPA) or index is the ratio of the total quality point values divided by the number of the credit hours attempted by the student, as shown below.

<table>
<thead>
<tr>
<th>Course Number &amp; Designation</th>
<th>Grade Earned</th>
<th>Credit Hours Attempted</th>
<th>Quality Point Values</th>
<th>Total Quality Point Values</th>
</tr>
</thead>
<tbody>
<tr>
<td>ARB 211</td>
<td>B+</td>
<td>3</td>
<td>3.3</td>
<td>9.9</td>
</tr>
<tr>
<td>BAD 425</td>
<td>A</td>
<td>4</td>
<td>4</td>
<td>16</td>
</tr>
<tr>
<td>HUT 305</td>
<td>D</td>
<td>3</td>
<td>1</td>
<td>3</td>
</tr>
<tr>
<td>MAT 215</td>
<td>F</td>
<td>3</td>
<td>0</td>
<td>0</td>
</tr>
<tr>
<td>CSC 200</td>
<td>C-</td>
<td>1</td>
<td>1.7</td>
<td>1.7</td>
</tr>
<tr>
<td>14</td>
<td></td>
<td></td>
<td></td>
<td>30.6</td>
</tr>
</tbody>
</table>

The GPA of the five courses would then be: \[
\frac{30.6}{14} \approx 2.19
\]
which is equivalent to a grade of “C”. Students are expected to know how to compute their own GPA. Courses with a grade of “W”, “U”, “PR”, or “I” are not counted in computing the cumulative GPA. The same applies to all transfer courses. Hence, grades for work done at institutions other than NDU are not included in the GPA. Only courses and credits may be transferred. Thus, the cumulative GPA is an average of all the credit hours attempted by the student at NDU.

ACADEMIC STANDING
There are 4 kinds of academic standing for an undergraduate student at NDU:

Good Academic Standing
An undergraduate sophomore student is deemed in good academic standing if his/her cumulative GPA satisfies any of the following cases:

<table>
<thead>
<tr>
<th>Cumulative GPA</th>
<th># of Undergraduate Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>At least 1.5/4.0</td>
<td>1 cr. - 12 cr.</td>
</tr>
<tr>
<td>At least 1.75/4.0</td>
<td>13 cr. - 24 cr.</td>
</tr>
<tr>
<td>At least 2.0/4.0</td>
<td>25 cr. or more</td>
</tr>
</tbody>
</table>

Academic Probation
An undergraduate student will be on academic probation if his/her cumulative GPA satisfies any of the following cases:

<table>
<thead>
<tr>
<th>Cumulative GPA</th>
<th># of Undergraduate Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Less than 1.5/4.0</td>
<td>1 cr. - 12 cr.</td>
</tr>
<tr>
<td>Less than 1.75/4.0</td>
<td>13 cr. - 24 cr.</td>
</tr>
<tr>
<td>Less than 2.0/4.0</td>
<td>25 cr. or more</td>
</tr>
</tbody>
</table>

Academic Suspension
An undergraduate student placed on academic probation for three consecutive semesters will be placed on academic suspension (i.e. third probation is the suspension) irrespective of whether she/he is registered or not. If the third semester of probation happens to be the first (ie Fall) or second (ie Spring) semester of the academic year, the student is granted one more semester for the removal of suspension.

Students placed on suspension may consider the following options:

1. The student may register, upon the written approval of his/her academic advisor, in a number of courses at other accredited institutions of higher education. The credits for the courses completed with a grade of “C” or better may be transferred, as appropriate, towards the requirements of his/her degree at NDU. The grades and GPA for these courses, however, shall not be transferred.

OR

2. The student may petition to the Dean of his/her Faculty to reconsider the suspension decision. The Dean will, then, determine the final status of the student in the light of the GPA obtained:
• If the Cum. GPA is 1.79 or lower the student will be placed on academic suspension in his/her Faculty but may, nonetheless, register in another Faculty at NDU following due procedure;
• The suspension may be withheld if the Cum GPA is 1.8-1.99. The student is given another chance to obtain good standing.

Academic Dismissal
An undergraduate student is dismissed from the University if he/she fails to maintain good academic standing either during the semester immediately following reinstatement from academic suspension or after the student had been granted permission from the Faculty Dean to have the suspension removed but failed to do so.

If the student’s semester GPA is at least 1.5/4.0, 1.7/4.0 or 2.0/4.0, and his cumulative GPA is still below 2.0/4.0, the student is granted another extra semester. If at the end of this semester the student still fails to be in good academic standing (cumulative GPA), he/she will be dismissed.

ACADEMIC RECOGNITION
There are two kinds of academic recognition:

1. Dean’s Honor List:
   Full time students who obtain a semester GPA of 3.20/4.00 or higher with no incomplete grades, during a given semester are placed on the Dean’s List for that semester. These students are invited to attend the Dean’s Luncheon held in their honor.

2. Graduation with Distinction:
   An undergraduate student with high academic achievement will graduate with:
   • Cum Laude (Distinction), if the cumulative GPA falls between 3.20/4.0 and 3.49/4.0;
   • Magna Cum Laude (High Distinction), if the cumulative GPA falls between 3.50/4.0 and 3.79/4.0;
   • Summa Cum Laude (Highest Distinction), if the cumulative GPA is 3.80/4.0 or above.

Such distinctions appear on the student’s transcript and degree. A transfer undergraduate student is only eligible for these distinctions if he/she has completed at least 60 credits at NDU.

ACADEMIC INTEGRITY
Students are expected and encouraged to be honest and to maintain the highest standards of academic integrity in their academic work and assignments at the University. They shall refrain from any academic dishonesty or misconduct including, but not limited to:
• Plagiarism; that is, the presentation of someone else’s ideas, words or artistic, scientific, or technical work as one’s own creation. Also, paraphrasing, summarizing, as well as well as direct quotations are considered as plagiarism, if the original source is not properly cited;
• Cheating;
• Assisting in cheating;
• Substituting a student in the taking of an examination;
• Substituting examination booklets;
• Submitting the same work for more than one course and the like;
• Submitting papers written by others;
• Receiving or providing unauthorized help or assistance in any academic work or assignment;
• Intentional violation of program and degree requirements and regulation as established by the University;
• Dishonest reporting of computational, statistical, experimental, research, results, or the like.

Penalties of Academic Dishonesty
Committing any academic dishonesty or misconduct will definitely subject the student(s) to serious academic penalties including, but not limited to:
• Failure in an assignment or a course;
• Suspension from the University for the remainder of the semester. The student will receive from the Registrar, a notice forbidding him/her, for the specified semester to occupy any portion of the University premises, and denying him/her all University privileges, including class attendance. Suspension becomes effective immediately upon receipt of the notice. There is no refund of fees for the semester in which the action is taken, but any fees paid in advance for a subsequent semester are refunded. Following the expiration of the term of suspension, the student shall be enrolled under probation for one regular semester or Summer session;
• Suspension for additional period. The total duration of the suspension should not exceed one academic year;
• Dismissal from the University. The student will receive from the Registrar a written notice which permanently terminates his/her student status. The same policy will be followed regarding notification and the refund of fees as in the case of suspension.

Reporting Academic Dishonesty
If an instructor has reason to believe that a student has committed an act of academic dishonesty, he/she must inform the student and discuss the circumstances of the matter with him/her. The instructor shall also consult with his/her Chairperson and take the appropriate action. The Chairperson shall inform the student's advisor in writing about the accident and the action taken. The student will receive a copy of that letter. If the Chairperson believes the misconduct deserves suspension or dismissal from the University, he/she should forward the case to the Dean. If the student wants to challenge the action, he/she can appeal by petitioning to the to the University Student Affairs Committee through the Registrar.

CHANGE OF MAJOR
1. Within a Faculty
To be eligible for a change of major within the same faculty, the student must meet the requirements for admission to the new major. He/She must submit a petition for change of major provided by the Office of the Registrar. The request for the student’s admission is considered by the new department and by the dean concerned. After approval, the petition is sent to the Office of the Registrar for implementation.

2. From a Faculty to a Faculty
A student moving into another Faculty within the University is considered as a new student by the new Faculty. The student is required to fill in a petition form for a change of major provided by the Office of the Registrar and signed by the Business Office and by
his/her advisor. The form is to be submitted to the Office of the Registrar, which in turn will send the form to the University Admission Committee.

3. By University Action
A student will be asked to change his/her major for any of the following reasons:
- If he/she is on probation and fails at the end of a semester or summer session in two or more of his/her major and/or core courses;
- If he/she fails to pass a major course after having repeated it twice.

DEADLINE FOR SUBMISSION OF CHANGE OF MAJOR
The deadline for submission of the petition for change of major for both categories is:
- The last Friday of December month for the Spring semester;
- The last Friday of June month for the Fall semester.

GRADUATION REQUIREMENTS
Degree Requirements
Students are required to fulfill the following requirements in order to be eligible for a bachelor degree:
- Completing all required credits for the degree;
- Fulfilling satisfactorily all course requirements for the degree as well as remedial/intensive courses given upon admission;
- Fulfilling all other admission requirements;
- Maintaining at least a 2.0/4.0 cumulative GPA for the degree;
- Satisfying the residency requirements for the degree;
- Maintaining the required minimum cumulative GPA for the major and core courses required for the degree, as specified by the concerned Department;
- Maintaining good academic discipline;
- Settling all accounts with the University.

These conditions must be met together with the degree requirements in effect during the semester of the student's first registration at NDU. This shall also apply to reinstated students. However, readmitted students must meet the degree requirements in effect during the semester of their readmission, unless their readmission letter states otherwise. Students who do not have the required cumulative GPA of 2.0/4.0 for the degree and/or the required cumulative GPA for the major and core courses required for the degree, but yet have completed all other requirements, may repeat up to 5 courses, as approved by the Academic Advisor, to meet the required numerical level(s).

Second Degree Requirements
A student with a Bachelor degree may register for another degree at NDU after being accepted by the University. Such a student must:
- Satisfy all the requirements for the new degree in accordance with the statements of Section I of this policy;
- Have a residency of at least two full semesters;
- Complete at least 30 credits in the new degree over and above the credits already used to satisfy the first degree with a minimum cumulative GPA of 2.0/4.0.

TEACHING DIPLOMA REQUIREMENTS
A holder of the official Lebanese Baccalaureate Part II or its equivalent will be eligible for a Teaching Diploma upon completing satisfactorily at least 18 credits beyond his/her Bachelor degree with a cumulative GPA of at least 2.0/4.0.
TEACHING CERTIFICATE REQUIREMENTS
A holder of the official Lebanese Baccalaureate Part II or its equivalent will be eligible for a Teaching Certificate upon completing satisfactorily 18 credits with a cumulative GPA of at least 2.0/4.0.

GRADUATION CHECK LIST
Two semesters prior to graduation, the Office of the Registrar must submit to the concerned Academic Advisors and students a graduation list of potential candidates for graduation for verification. This list must include the following:

- The already completed requirements for the degree;
- The requirements, which remain to be completed for graduation;
- The cumulative GPA for the degree;
- The major courses and the core courses average.

Once the checking process is completed, the checked list must be returned to the Office of the Registrar to finalize the tentative graduation list and hence send it back to the Faculty for voting at the end of the student last semester.

CONFERRING OF DEGREES
Degrees are conferred three times a year, at the end of Fall, Spring, or Summer session. Students expecting to graduate must apply for graduation at the Office of the Registrar by the following deadlines:

- November 15 for the graduates of the Fall and Spring semesters;
- March 15 for the graduates of the Summer session.

Any delay in applying may delay graduation. The formal conferring of degrees by the President occurs annually at the Commencement on the second Friday of each July. Potential Summer graduates can not participate in the ceremony of the conferring of degrees.

RESIDENCY REQUIREMENTS
Residency Requirements for Bachelor of Art, Bachelor of Science, Bachelor of Business Administration and Bachelor of Hotel Management
There are 2 kinds of Government Regulations for the B.A., B.S., B.B.A., B.H.M., and the like:

1. Minimum Residency: A minimum of 8 semesters of residency is required, beginning with the Freshman Class, or 6 semesters, beginning with the Sophomore Class. Two Summer sessions will be considered as equivalent to one regular semester. This period of time must be spent at a recognized and accredited institution of higher education; however, at least 30 credits requirement must be completed at NDU with a cumulative GPA of 2.0/4.0, in addition to all other graduation requirements for the degree.

2. Maximum Residency: A maximum of 16 semesters of residency is allowed, beginning with the Freshman Class, and 12 semesters, beginning with the Sophomore Class.

Residency Requirements for the Bachelor of Engineering
1. A minimum of 10 semesters and a maximum of 20 semesters.
2. At least the last 45 credits must be completed at NDU, in addition to all other graduation requirements for the degree.
Residency Requirements for the Bachelor of Architecture
1. A minimum of 10 semesters and a maximum of 20 semesters.
2. At least the last 45 credits must be completed at NDU, in addition to all other graduation requirements for the degree.

Residency Requirements for the Bachelor of Law
1. A minimum of 8 semesters and a maximum of 16 semesters.
2. At least the last 45 credits must be completed at NDU, in addition to all other graduation requirements for the degree.

PARTICIPATION IN COMMENCEMENT EXERCISES
The University encourages June graduates to participate in the Commencement exercises. Summer and Fall graduates may participate in the following Commencement exercises provided they notify the Office of the Registrar of their intent by mid-June at the latest by submitting the online form.

COURSE DESIGNATION
A. Designation and Belonging
The letters preceding the course number indicate the area or subject of study to which the course belongs. The following is a designation list grouped by Departments and Faculties’ affiliations.

Faculty of Architecture, Art and Design
Department of Architecture
ARP - Architecture
MAP - Masters of Architecture

Department of Design
IDP - Interior Design
GDP - Graphic Design
FTP - Fashion Design
FDP - Design
PDP - Photography
MAD - Design

Department of Music
MUA - Arab Musicology
MUE - Music Education
MUJ - Jazz Music
MUM - Musimedialogy
MUS - Musicology

Department of Arts
FAC - Arts and Crafts
FAP - Studio Arts

Faculty of Business Administration and Economics
Department of Accounting, Finance and Economic
ACO - Accounting
BAF - Banking and Finance
ECN - Economics
FEN - Financial Engineering

Department of Management and Marketing
BAD - Business Administration
HCM - Health Care Management
MRK - Marketing
MGT - Human Resource Management

**Department of Hospitality and Tourism Management**

FBM - Food and Beverage Management
TTM - Hotel Management and Tourism
HSM - Hotel Management and Tourism
HVM - Hospitality Events Management

**Graduate Division**

FIN - Finance
QMT - Quantitative Methods
BUS - Business
HRM - Human Resources
MBS - Business Strategy
MGT - Management
MRK - Marketing
ECN - Economics
ACO - Accounting
FRM - Fiancial Risk Management
PRM - Project Management

**Faculty of Engineering**

ENG - Engineering

**Department of Civil and Environmental Engineering**

CEN - Civil Engineering

**Departments of Electrical and Computer and Communication Engineering**

EEN - Electrical Engineering

**Department of Mechanical Engineering**

MEN - Mechanical Engineering

**Faculty of Humanities**

**Department of English and Translation**

ARB - Arabic
CHI - Chinese
ENL - English
FRC - French
GEM - German
INT - Interpretation
ITL - Italian
LIR - Literature

AST - Astronomy
PHS - Physics

Department of Sciences
BIO - Biology
CHM - Chemistry
ENS - Environmental Science
GEO - Geology

Faculty of Nursing and Health Sciences
NHS - Nursing and Health Sciences
NUR - Nursing
HEA - Health
MLT - Medical Laboratory Technology
NTR - Nutrition and Dietetics
FQM - Food Safety and Quality Management
B. Digits of a Course Number
The following digits are used as follows:

<table>
<thead>
<tr>
<th>First Digit</th>
<th>FNAS, FNHS, FBAE &amp; FH</th>
<th>ENG, RCT, VIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>0</td>
<td>Non-Credit Remedial Courses</td>
<td>Year 0</td>
</tr>
<tr>
<td>1</td>
<td>Freshman Course</td>
<td>Year 1</td>
</tr>
<tr>
<td>2</td>
<td>Sophomore Course</td>
<td>Year 2</td>
</tr>
<tr>
<td>3</td>
<td>Junior Course</td>
<td>Year 3</td>
</tr>
<tr>
<td>4</td>
<td>Senior Course (Undergraduate Only)</td>
<td>Year 4</td>
</tr>
<tr>
<td>5</td>
<td>Courses that are considered preparatory for</td>
<td>Year 5</td>
</tr>
<tr>
<td></td>
<td>graduate studies. When passed, their credits</td>
<td></td>
</tr>
<tr>
<td></td>
<td>should not be counted in the total of credits</td>
<td></td>
</tr>
<tr>
<td></td>
<td>required for graduation and they should be</td>
<td></td>
</tr>
<tr>
<td></td>
<td>completed during the first academic year.</td>
<td></td>
</tr>
<tr>
<td>6 or higher</td>
<td>Graduate Course</td>
<td>Year 6</td>
</tr>
</tbody>
</table>

Second Digit for Undergraduate and Possibly Graduate Courses

<table>
<thead>
<tr>
<th>Second Digit</th>
<th>Description</th>
</tr>
</thead>
<tbody>

</tr>
<tr>
<td>8</td>
<td>Seminar or Internship</td>
</tr>
<tr>
<td>9</td>
<td>Senior Study; Senior Project, Thesis or Research Project</td>
</tr>
</tbody>
</table>

Third Digit
Any digit ranging from 0 to 9

C. Course Number, Title and Credits

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MAT 215</td>
<td>Linear Algebra I</td>
<td>(3.0)</td>
</tr>
<tr>
<td></td>
<td>Official Course Title</td>
<td></td>
</tr>
<tr>
<td></td>
<td>The first component of the above ordered pair designates</td>
<td></td>
</tr>
<tr>
<td></td>
<td>the number of lecture hours/week.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>The second component is</td>
<td></td>
</tr>
<tr>
<td></td>
<td>the number of laboratory hours/week.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Number of credits (cr) earned if course is successfully completed.</td>
<td></td>
</tr>
</tbody>
</table>

Lecture hours/week is a period of 50 minutes duration.

Credits are based upon the number of 50-minute periods scheduled weekly during one semester or summer session. One credit signifies a minimum of either a 50-minute period of class work, or 2-3 hours of laboratory over a period of 15 weeks or its equivalent.
D. Course Prerequisite and Corequisite

A prerequisite is a course which must have been completed before registering for the subject course.

A corequisite is a course which must be completed before registering for the subject course, or a course which may be taken concurrently.

UNDERGRADUATE REGISTRATION

ACADEMIC ADVISING

Upon admission and prior to registration, each student shall be assigned an Academic Advisor by his/her Department Chairperson, upon the approval of the Faculty Dean. The Academic Advisor shall:

• Advise his/her advisees to observe the basis of admissions as set in his/her letter of acceptance;
• Make himself/herself available to his/her advisees during office hours, and when necessary by appointment, throughout the academic year;
• Assist his/her advisees to properly fulfill all requirements of the degree enrolled in;
• Study and update the files of his/her advisees throughout his/her residency at NDU;
• Make his/her advisees aware of and familiar with the University academic rules, regulations and policies;
• Explain clearly the:
  - Registration process;
  - Course offerings;
  - Course substitution;
  - Course prerequisite;
  - Course selection;
  - Full-time / part-time credit load;
  - Degree planning.

and other related matters. Hence, students are encouraged to consult with their Academic Advisors on a regular basis all throughout their residency at NDU.

REGISTRATION ELIGIBILITY

An undergraduate student will be eligible for registration upon settling all previous pending issues (academic, financial, disciplinary, administrative, etc.) with the University at the offices concerned. Otherwise, he/she cannot proceed any further toward his/her registration.

Registration

The registration date for undergraduate students is assigned by the Office of the Registrar. To register, a student should:

• Receive tuition statement from the Business Office;
• Pay the appropriate tuition and fees to the allotted bank(s);
• Prepare his/her course schedule;
• Register for courses; off campus (internet) or on campus (intranet): Advisor or Office of Information Technology.

New students should register at the Advisor’s Office.
REGISTRATION BY ABSTENTIA
An NDU undergraduate student is allowed to register in abstentia (or by proxy) by some legally recognized individuals (i.e., parent, sister, or the like) under justifiable reasons such as illness, being abroad, and the like. Such a student shall be entirely responsible for discrepancies in his/her proxy registration, if any.

LATE REGISTRATION
After the third day of classes in either the Fall semester or the Spring semester or the second day of the Summer session the late registration period shall be scheduled and its fees shall be determined. No student may be registered beyond this day for the current semester or the Summer session. During the late registration day, a student shall follow the steps of the registration, as described in section IV of this policy. Further, it shall be understood that students registering during the late registration day shall be responsible for all work assigned from the beginning of the semester or the session. They shall be also subject to the requirements of the attendance policy as of the first day of classes.

CROSS-REGISTRATION
An NDU undergraduate student may be allowed to cross-register a course at another institution if:

- The course is not offered at NDU during the semester in which the student is expected to graduate;
- The course in which the student intends to cross-register is equivalent to his/her required course at NDU;
- The course does not conflict with his/her course schedule at NDU;
- The student has the Cross-Registration and Registration Forms signed by his/her Department Chairperson, and Academic Advisor as well as the Office of the Registrar and the Business Office;
- The student returns the appropriate Cross-Registration form(s) to NDU Registrar’s Office after officially registering at the other institution;
- The student has to submit an official transcript of records for his/her cross-registered course to the Office of the Registrar at NDU.

A non-NDU undergraduate student may be allowed to cross-register a course at NDU upon submission of a written authorization from his/her institution allowing him/her to register for this course at NDU in accordance with NDU undergraduate registration policy.

EXCHANGE STUDENTS REGISTRATION

• OUTGOING EXCHANGE STUDENTS

ELIGIBILITY REQUIREMENTS
In order for the applicant to be eligible for the student exchange program, the following criteria have to be met:
a) The applicant has to have:
   - A current enrolment at NDU;
   - Successfully completed at least 15 credits of study;
- No record of failing a course in the program in which the applicant is enrolled;
- A minimum GPA of 2.5/4.00 (undergraduate) and 3.00/4.00 (graduate);
- Provided an academic recommendation from an appropriate faculty member, and a statement of purpose;
- A proven record that he/she is socially, psychologically, and intellectually fit for an exchange program;
- A proper conduct; and
- No outstanding financial record.

b) The student is expected to be in good health.

c) The applicant has to agree to:
- Be responsible for meeting all costs of the student exchange program such as travel, accommodation and insurance, and pay all administration fees to NDU by the due dates;
- Enroll at the Host Institution for no more than two semesters and one summer, unless specific circumstances require other arrangements to be made; and
- Abide by the rules and regulations of the Host Institution.

d) Where there are more applicants than places available for a given institution, eligible students will be ranked according to academic merit and may be offered a student exchange program at their second or third preferred institution.

REGISTRATION REQUIREMENTS
a) The NDU Registrar will register a student for courses if the student presents a properly signed form listing the course(s) to be taken at the Host Institution (see the attached form).

b) The student must have completed all course prerequisites.

c) All credits earned will be considered as resident credits at NDU for degree purposes.

d) At the end of the period of study at Host Institution, no official diploma or certificate whatsoever will be delivered to the student, but an official transcript of records will be issued for the exclusive purpose of transfer to the Home Institution.

e) An exchange student is entitled to an enrolment statement from NDU.

APPLICATION PROCESS
Students who wish to participate in a student exchange program are required to:

a) Complete and lodge an application form with the OIR by the date specified on the application form.
b) Agree in writing to the terms and conditions set out in the student exchange program.

c) Be aware that the attainment of the transcript of grades from the Host Institution is the student’s responsibility.

• INCOMING EXCHANGE STUDENTS

ELIGIBILITY REQUIREMENTS
Student exchange programs at NDU are short-term programs that enable international students to study for up to two academic semesters and a summer session (one academic year, not renewable) in any of the NDU campuses.

REGISTRATION REQUIREMENTS
The NDU Registrar will register a student for courses if the student:
a) Presents a properly signed form listing the course(s) to be taken.

b) Has completed all prerequisites of the courses to be taken.

All credits earned shall be considered as resident credits at NDU for degree purposes. The registration of exchange students is valid for one academic year and is not renewable. At the end of the period of study, no official diploma or certificate whatsoever will be delivered to the student; only an official transcript of records will be issued for the exclusive purpose of transfer to the Home Institution. An exchange student is entitled to an enrollment certificate from the Home Institution.

REGISTRATION PROCEDURES
For registration, an incoming exchange student will observe the following steps:
a) Secure an official exchange form from the Home Institution.

b) Hand in all the required documents to the Director of OIR.

c) Obtain an acceptance letter as an exchange student from the Office of Admissions.

d) Proceed to the Office of the Registrar in order to finalize registration.

e) The NDU Registrar will sign the student exchange program form. The following copies should be distributed:
   - Copy to the Host Institution;
   - Copy to the Business Office;
   - Copy to the Office of the Registrar;
   - Copy to the OIR; and
   - Copy to the student.
IMPROPER REGISTRATION
Only officially enrolled students in a class are allowed to attend the class. The instructor of the class should inform any non-officially enrolled student of his/her improper registration and should immediately report it, in writing, to the Office of the Registrar, and should also ask the student to immediately proceed to the Office of the Registrar for a settlement.

CHANGES IN REGISTRATION
Changes in registration become effective and official on the date the approved completed form is submitted to the Office of the Registrar, and accepted and processed, and the financial obligations resulting from these changes are settled with the Business Office.

ADDING AND/OR DROPPING COURSES
A student may add or drop a course or change a section in his/her registration schedule during the add/drop day only. This can be done by:

- Dropping or Adding by himself/herself at the Office of Information Technology or in the Advisor’s Office;
- In the Drop/Add period, two modifications are allowed by the student;
- In case a section is closed, or a student wishes to wave prerequisites/co-requisites and the like, only during Drop/Add period he/she has to fill in a Drop/Add form to secure the concerned Dean’s signature;
- Receive his/her modified tuition statement from the Business Office.

WITHDRAWAL FROM COURSES
In accordance with the University Refund Policy, students may officially withdraw from courses without academic penalty by the late registration day. In this case no grades will be inscribed on their record. They may also withdraw any time prior to the 14th week of the Fall or Spring semesters and before the 28th day of the Summer session. Then a grade of “W” will be inscribed on their records. Withdrawal after the deadline will result in an “F” or “UW” on the dropped course. No withdrawal is allowed beyond this period unless the student petitions to the Dean concerned, due to urgent reasons. Once the petition is approved, the Registrar will then be instructed by the VP for Academic Affairs to assign the grade “W” on the dropped course(s).

ATTENDANCE AFTER WITHDRAWING
Once a student has withdrawn from a course, he/she cannot continue to attend or audit this course during the same semester.

STUDENT REINSTATEMENT
Upon return, a student with leave of absence shall inform the Office of the Registrar for reinstatement. Those students on probation who have been approved for leave of absence will remain on probation upon reinstatement.

DROPPING A COURSE WHILE ON PROBATION
A student on probation may drop any course during the probation period.

REGISTRATION IN A COURSE WITH AN “I” GRADE
Students may not register in a course if he/she has an incomplete grade in its prerequisite(s).
STUDENT ACADEMIC LOAD
Full-Time and Part-Time Loads
Registration in at least 12 credits for the Fall or Spring semester constitutes a full-time load for an undergraduate student. Otherwise, it constitutes a part-time load.

Maximum Load for Registration per Semester
The maximum load for registration during the Fall or Spring semester by any undergraduate student is either 17 credits or the number of credits specified in his/her suggested program for that particular semester. However, student on good academic standing can take up to 19 credits per semester provided that this number of credits does not contradict any residency requirements. Student with a cumulative GPA of 3.50 and above, may petition to register for one additional three credits course over and above the regular load. This additional load, may be approved provided the residency requirements are met.

Maximum Load for Registration in the Summer Session
The maximum load for registration by any undergraduate student in the Summer session is 9 credits or less as determined by the Faculty concerned.

Maximum Load for Students on Probation
Students who are on probation may register for a maximum of 13 credits per semester of which at least 9 credits for courses that must be repeated, if any.

Maximum Load for Students with Incomplete(s)
Students who have two or more incomplete grades from a previous semester or the Summer session may register for a maximum of 13 credits per semester unless these courses are senior projects or the like.

Maximum Load for Students with Cross-Registration
The combined load for students with both registration at NDU and cross-registration in another institution must not exceed the maximum load stated above.

1TUITION AND FEES
NDU is a non-profit institution. Tuition and fees paid by students represent a small percentage of the full cost of a student’s education. The deficit is covered by income from gifts, grants and donations from foundations, alumni and friends of the University. The fees cover applications, membership in National Social Security Fund (NSSF), activities, Yearbook and Student Association, and Insurance. Membership of Lebanese students in the NSSF is mandatory by law. Thus prior to registration, students are urged to follow the instructions given by the Students Affairs Office concerning the clearance for NSSF.

Because of the rising cost of higher education, universities are facing severe financial problems. NDU reserves the right to change tuition, fees and expenses at any time without prior notice. A student may not complete registration, graduate, or receive any transcripts of records until all dues are paid.

**Refund Policy**

Contracts with faculty members and provisions for education are made by the University in advance for the entire year. Accordingly, if a student withdraws for justifiable reasons after final registration, refund of tuition will be made according to the following schedule of withdrawals:

- During drop/add period, 75% of the tuition is refunded;
- During the first week of classes, 50% of the tuition is refunded;
- Tuition is not refunded after the first week of classes;
- Refund policy does not apply during summer session. No refund of tuition is made for any withdrawal during summer session.

**Financial Support for Re-enrolled courses**

Students who re-enroll for any reason in any course shall not benefit from any financial support for the enrolled courses.
UNDERGRADUATE ACADEMIC MINORS

RATIONALE
The objective of establishing undergraduate academic minors, hereinafter called minors, at NDU is to offer a wide, versatile, and creative spectrum of basic knowledge for students in areas other than their major programs of study, an objective that is in line with the American liberal arts model of higher education. Additionally, establishing minor enhances the attractiveness of the departments and Faculties in terms of allowing them to offer relatively quick training or specialization programs to interested students.

The establishment of undergraduate academic minors is a matter that is totally internal to the University and is outside the scope of governmental licensing and recognition.

The following rules and regulations do not allow students to enroll in the University for the sole purpose of pursuing minor studies.

GENERAL RULES AND REGULATIONS FOR MINORS AT NDU

Number of Credits for Minors
A Minor shall consist of 15 cr. to 18 cr. A Minor may not include more than two courses (6 credits) which are counted in the student’s “Major Requirements” category.

Eligibility for Minors
Only enrolled students at NDU and in junior standing and above can declare minors.

Declaring Minors
A student wishing to declare a minor should do so through an appropriate request form submitted to the department or Faculty concerned offering the minor. Approval by the latter is required prior to registration.

Contract Sheets and Advisors for Minors
Each minor shall have a separate contract sheet specified and supplied by the department or Faculty offering the minor. Students declaring a minor have to follow the corresponding contract sheet with the assistance of an academic advisor, preferably the same person advising the student in his/her major. The student and his advisor are recommended to closely communicate with an advisor from the chosen minor. All academic advisors in the University should be aware of the different minors offered across the University so that they can assist their advisees towards a specific minor.

Pursuing More than One Minor
Students are allowed to satisfy the requirements for a maximum of two minors, provided that they do not pursue more than one minor at a time. Accordingly, declaring an additional minor is conditional to either the successful satisfaction of the requirements of an already declared minor or to the official withdrawal from a current minor.

Withdrawing from Minors
A student is allowed to officially withdraw from a declared minor no more than twice.

Students on Probation
Students on probation cannot declare minors.
Passing Grades and GPAs for Minors
The passing grade for a minor shall be specified by the department or Faculty offering the minor, provided that the acceptable overall GPA for any successfully completed minor is not below 2.

Overall GPA
A student, with or without a declared minor, shall have one and only one overall GPA including every course taken. A separately calculated GPA for the minor shall be considered by the Registrar for the sole aim of judging the successful fulfillment of the requirements for that minor.

Minor Courses and Graduate Studies
If any, a student applying for graduate studies is allowed to use earned minor credits as remedial credits upon the approval of the concerned faculty.

Graduation and Minors
A registered student pursuing a major degree with a declared minor is allowed to graduate when the requirements of both the major degree and the minor are satisfied.

Recognition of Minors by the University
The University shall recognize only a completed minor, and solely by a specific acknowledgement of the completion of a minor on the student’s transcript of records and, upon though student’s request, by an official statement from the Registrar. The University does not issue any diploma or certificate recognizing the completion of a minor.

Additional Requirements
Within the previously mentioned rules that give the general guidelines for all minors, departments and Faculties have the right to state additional requirements for their minors as they deem necessary.

ACADEMIC RULES AND REGULATIONS (GRADUATE)
CROSS-REGISTRATION
Students enrolled at NDU may take courses at other recognized institutions of higher education.
A student registered at NDU may be permitted to cross-register if:
- He/She expects to graduate at the end of that particular semester and the said course is not offered at NDU but is a graduation requirement;
- The course to be taken carries the same content as that offered at NDU;
- The student’s academic advisor sends a written statement to the NDU Admissions and Office of the Registrars who in turn contact their counterparts of the university concerned to confirm the above-mentioned conditions.

Students enrolled at other recognized institutions of higher education may take courses at NDU. Students studying at other universities and who wish to take courses at NDU must secure the following to facilitate cross-registration:
- Written permission by the academic advisor to take specified courses at NDU (if any of the above mentioned conditions apply to the incoming student);
- The permission of the Faculty concerned at NDU;
- The above documents are submitted to the NDU Admissions and Registrar’s Offices by their counterparts;
- Finalize registration according to cross-registration procedures at NDU.
AUDITING
Provided that they have satisfied the admission requirements, candidates that are interested in auditing graduate courses will be issued letters of acceptance as auditors.

TUTORIALS
To meet graduation requirements, students may take courses on a tutorial basis. Registration for a tutorial course can only happen after the consent of the concerned professor and the approval of the respective faculty.

COURSE/PROGRAM CHANGES
Any change from one graduate degree to another requires students to reapply and meet the admission requirements of the requested graduate program. Required courses may be substituted upon the recommendation of the student’s graduate advisor and the approval of the respective Faculty. A maximum of 9 substitute credits will be considered.

SUPERVISION
Upon admission, students will be assigned an academic advisor who will guide and assist the student in planning a course of study. When applicable, a thesis advisor will be assigned. After consultation with the Faculty Dean, every Faculty will set its own guidelines for thesis defense. Candidates are required to give a public presentation. Thereafter, the Thesis Committee will notify the Dean and schedule the final defense.

COURSES AND GRADES
Courses taken as part of a student’s graduate study program fall in one of two categories, graduate or remedial, with different grading systems.

Graduate Level Courses
These are normally numbered 600 and above. The minimum passing grade for a graduate course is “B”. Students in graduate study are required to maintain a cumulative average of at least “B” in all courses taken for graduate credit. According to the NDU Attendance Policy, a student who is absent without excuse from more than one third of the number of sessions in any one course, or who fails to sit for scheduled examinations, or fails to fulfill required written or oral work, will be given F. Results of tutorial courses and projects will be reported as Pass “P” or Fail “F”. Grades on thesis courses may be assigned as either Pass (P) or Fail (F), or as letter grades (A+, A, etc.).

The Faculties’ grading system for these courses is as follows:
- FAAD, FBAE, FH, FLPS and FNAS: letter grades
- FE and FNHS: P or F

Remedial Courses
These are usually undergraduate courses, taken to make up for any particular deficiencies. They do not carry graduate credit. The minimum passing grade for a remedial course is B; however, a department or program may set a higher minimum passing grade.

GRADES UPON CHANGE OF MAJOR
Upon approval of change of major, all grades on transferable or non-transferable courses taken by a student in his/her old major/area of concentration remain part of his/her official transcripts. Unlike the transferable grades, the non-transferable ones are not computed in the student’s GPA for the new major and are not counted toward the total number of credits required for graduation for the new major. A student cannot ask for a non-transferable course to be computed back in his/her GPA.
The students who benefited from the above rule (#1) cannot return to their old major, and cannot request to have their major changed again to any major which requires a non-transferable course grade, which was deleted from his/her GPA.

**PROBATION AND DISMISSAL**

Graduate students may be placed on academic probation after completing 12 credits in the graduate program, if they:

- Fail any course in the graduate program;
- Do not maintain a cumulative average of “B”.

A graduate student on probation should register for a minimum of 6 credits the following semester.

The student is dismissed from the graduate program if:

- The probation status is not removed within a period of two consecutive semesters;
- The department or program, and irrespective of the grades obtained, deems student’s work as unsatisfactory;
- The student fails the comprehensive examination twice, or fails the thesis defense twice.

**COMPREHENSIVE EXAMINATION**

Where applicable, a student must pass a comprehensive examination after completion of most of the course requirements for the degree. The department concerned will schedule the examination. The purpose of the examination is to ascertain the student’s knowledge of the field of specialization and related areas. A student who does not pass the comprehensive examination may repeat it only once after a time lapse of at least three months but only with the approval of the concerned graduate committee.

**THESIS**

In partial fulfillment of the requirements for the master’s degree, a student must submit a thesis, when applicable, based on results of original and independent research. Except in departments or programs in which the medium of instruction is not English, the thesis must be in English.

An abstract not exceeding 350 words must be submitted with the thesis. If the thesis is in a language other than English, the abstract must be written both in that language and in English.

The Department concerned must ensure the availability of a copy of the Thesis Manual, which provides instructions on the preparation of theses. Its application is mandatory and theses not conforming to its requirements will not be accepted. For all matters not discussed in the manual, theses must follow the form and style described in the latest edition of K. L. Turabian, Manual for Writers of Term Papers, Theses and Dissertations (University of Chicago Press), or any other form specified by the department or program provided this conforms to the manual.

Copies of the thesis, unbound but ready for binding, should be submitted to the members of the thesis committee at least two weeks before the defense. Copies may be obtained by any legible and durable form of reproduction. Additional copies may be required, as specified by the concerned department or program.
In a thesis course, a grade of PR could remain on the student’s transcript for three consecutive, regular semesters, after which a different grade should be assigned. A student may petition for an extension beyond the three semesters if justified by the student’s thesis advisor. Otherwise, the PR grade will automatically turn into F.

**Thesis Committee**
The Master’s thesis committee should be composed of at least three members recommended by the department or program and approved by the faculty graduate committee. The proposal of the thesis topic and the selection of the advisor and the members of the thesis committee for candidates for the Master’s degree should have been approved by the faculty or school graduate committee at least four months before the student defends the thesis. It is advisable that the thesis committee includes one external member. This member may be from an institution other than NDU. All committee members should hold professorial ranks. The thesis committee approves the thesis topic and research program and conducts the thesis defense examination.

**Thesis Defense**
The thesis defense may be open to the public and must be carried out no later than June 10, October 30, or March 1, for students who wish to graduate at the end of the summer session, the fall, or the spring semester respectively. Pass or Fail is reported for the combined thesis and thesis defense. If fail is reported, the student may resubmit the thesis and defend it after a period of at least three months. Failure on the second attempt results in discontinuation from graduate work. Students must be registered for the thesis or at least one course in the session in which they expect to graduate in order to present their defense.

**Deposit of the Thesis in the Library**
After passing the thesis defense examination, the student is required to deposit at the library two copies of the thesis. A library receipt of these copies must be delivered to the Office of the Registrar before the student is awarded the degree. The student should sign a release form indicating whether or not the library is authorized to supply copies of the thesis to other libraries or individuals. The non-authorization option is valid for a period of two years only, after which copies of the thesis will be supplied on request.

**PROVISIONS FOR THE MASTER’S DEGREE**
In addition to satisfying the general requirements set in the preceding sections, students working towards a Master’s degree must fulfill the requirements described below:

**Course Requirements**
Two types of Master’s degree programs are available:
• A thesis based on independent research work. Students following this program are required to take a minimum of 24 graduate credit hours; a maximum of 9 credits may be in tutorial courses;
• A non-thesis program where students are required to take a minimum of 33 graduate credit hours and should follow a course of study approved by the Department or program and by the graduate committee of the Faculty.

Language Requirements
Aside from English proficiency requirements, there are no special University language requirements for the Master’s degree. However, individual Departments and programs may set their own language requirements either as a general rule or in specific cases. The Faculty graduate committee will determine examination procedures.

Residency Requirements
To meet the minimum residency requirements for the Master’s degree, students must register and be in residence, as graduate students, for at least two semesters, one semester and two summers, or four summers.

All requirements for the Master’s degree must be completed within a period of four years after admission to graduate study. Students attending summer sessions only must complete all requirements within a period of six summers after admission to graduate study. Extension beyond the maximum period of study requires the approval of the graduate committee of the faculty.

GRADING SYSTEM
The University uses the following grading system for the graduate programs:

<table>
<thead>
<tr>
<th>Grade</th>

</tbody>
</table>

I  This grade is given by an instructor only when there is reasonable expectation that a student will successfully complete course requirements. If this grade
is unresolved by the eighth week of the following semester, the Registrar’s Office will automatically convert it to the grade of “F”. Degree candidates should be aware that an “I” grade received during the last semester in any of the courses required for graduation will result in the delay of graduation.

PR This grade is used to indicate progress on research for the Master’s thesis or project up to time of completion, when the appropriate letter grade is entered on the transcript. In a thesis course, a grade of PR could remain on the student’s transcript for three consecutive, regular semesters, after which a different grade should be assigned. A student may petition for an extension beyond the three semesters if justified by the student’s thesis advisor. Otherwise, the PR grade will automatically turn into F.

UP This grade is used to reflect that unsatisfactory progress is being made in a Master’s research project or thesis.

W The grade “W” indicates withdrawal without academic penalty. This grade is issued by the Office of the Registrar to students filling in an official course withdrawal form by the scheduled deadline. The grade “W” is not counted in the GPA and may not be changed to any other grade under any circumstances.

UW The “UW” is assigned by the instructor when a student has never attended a class or has ceased attending and has not submitted an official course withdrawal to the Office of the Registrar. This grade is counted as an “F” in the GPA.

U Students have the option of auditing courses instead of receiving credits and grades for them. A “U” will appear on the student’s permanent record.

ATTENDANCE POLICY
Classes are held from Monday to Friday. Graduate courses are offered in the afternoon as of 5:30 p.m.

Students are expected to attend all classes and laboratory sessions. Absence, whether excused or not, does not absolve a student from the responsibility for the work done or from conforming to any announcement made during his/her absence.

Instructors are responsible for clearly informing the students in writing of the attendance requirement for each course and the consequences of poor attendance. For legitimate reasons a student is allowed to be absent for a maximum of 6 hours per three-credit course.

ACADEMIC ADVISOR
Students are responsible for the proper completion of their academic programs. They must be familiar with the rules and regulations of Graduate Studies, as well as the general academic regulations promulgated by individual Faculties and departments. The offices of the deans and department chairpersons, in cooperation with student advisors and faculty members, endeavor to follow each student’s academic progress, and students are encouraged to seek counsel whenever there is a need. If advisors are unable to satisfactorily resolve problems, they will refer students as is deemed appropriate and necessary.
ACADEMIC HONESTY POLICY
It is the expressed policy of the University that every aspect of graduate academic life, related in whatever fashion to the University, should be conducted in an absolutely and uncompromisingly honest manner by graduate students.

The University Disciplinary Committee will deal with apparent and alleged breaches of this policy.

ACADEMIC STANDARDS
Continuation in the graduate programs requires satisfactory progress toward a graduate degree. Evidence of such progress includes maintaining a 3.0/4.0 cumulative average throughout the course of graduate study. Furthermore, in order to graduate, a student must have at least a 3.0/4.0 cumulative GPA.

Failure to obtain a GPA of 3.0/4.0 for the first twelve credit hours will result in notification of probationary status. Any student who did not remove his/her probation in two semesters will be suspended from the University.

A graduate student will also be suspended if he/she obtains two “Fs”.

WITHDRAWAL POLICIES

Leave of Absence
Graduate students may request a leave of absence from a program through written appeal to their advisors. The advisor will forward the request along with a recommendation to the Dean of the Faculty who will answer on behalf of the University. A student who does not register for courses for more than one calendar year must reapply for admission to the University and to the graduate degree program.

Withdrawal from Courses
After the date of dropping and/or adding courses, students are allowed until the end of the 14th week as of the beginning of a semester to withdraw from courses. “W” will be inscribed on their records. No withdrawal is allowed beyond this period.

Withdrawal must be made by the deadline set for dropping a course. Late withdrawal may be accepted only in case of illness or circumstances beyond control.

APPLICATION FOR GRADUATION
Students who expect to graduate must complete and submit the Application for Graduation to the Office of the Registrar. Degrees earned during any semester or summer will be awarded only at the following commencement exercises. Commencement is held once a year.

PARTICIPATION IN COMMENCEMENT EXERCISES
The University requires June graduates to participate in the Commencement exercises. Summer and fall graduates may participate provided they notify the Office of the Registrar of their intent by mid-June at the latest by submitting the online form.

SUMMER SESSION
The University may offer the opportunity to pursue graduate studies during the summer. Although graduate-level courses are offered during the summer session, the University
does not guarantee that any particular course will be offered. A student may register for a maximum of six credit hours in the summer.

**GRADUATE RESEARCH ASSISTANTSHIP POLICY**

**Preamble**
In accordance with the mission, vision, core values, and strategic goals of NDU, the present Student Research Assistantship Policy is set to provide NDU students at the graduate level with research opportunities that help them develop critical thinking, scholarly competence, cultural maturity, and professional experience.

**Definition of a Student Research Assistantship Appointment**
A graduate student is a valuable asset who may be offered an assistantship in the form of tuition waiver and/or stipend. A University Graduate Student Assistantship (UGSA) is offered to a student who is assigned as Graduate Teaching Assistant (GTA) or as Graduate Research Assistant (GRA) by the respective department. A GTA will mainly teach remedial and/or introductory courses whereas a GRA will mainly be engaged in research projects under the supervision of a full-time faculty member. The objective of a UGSA is to increase the efficiency of teaching, enhance research activities and promote NDU’s graduate programs. In addition, it provides graduate students teaching and research opportunities that help them develop their critical thinking, scholarly competence, cultural maturity, and professional and administrative experiences in accordance with the mission, vision, core values and strategic goals of Notre Dame University-Louaize.

**Graduate Student Assistantship Rules and Regulations**

**Eligibility**
To be eligible, all applicants should have a full-time load.
(a) NDU Students must have:
   (i) A minimum of 3.3 GPA in the undergraduate major
   (ii) Three recommendation letters
   (iii) An interview by the concerned Faculty Graduate Committee
(b) In addition to the above, applicants from other universities to NDU should complete a minimum of 6 graduate credits at NDU with a GPA of 3.5 and above. This requirement may be waived upon the discretion of the Faculty Graduate Committee
(c) Other grading systems will be assessed by the concerned Faculty Graduate Committee to determine the GPA in the major field of study
(d) During the summer session, graduate students may be eligible for a GTA/GRA depending on the approved needs of the respective department

**Duration**
A GTA/GRA is granted assistantship for the duration of one semester/summer session.

**Conditional Renewal**
A GTA/GRA is renewed if,
- The respective department decides on the continuous need for an assistantship.
- The student maintains a GPA of 3.5 and above.

**Duties of a GTA/GRA**
A GTA/GRA will be assigned duties by the Faculty Graduate Committee upon the request of the chairperson of the respective department.
(a) The duties of a GTA/GRA shall be defined by the concerned department and shall be 20 hours per week.
(b) A Teaching/Research Assistant will not be assigned to perform non-academic duties.

**Selection Process and Appointment Procedure:**
Upon announcement of a GTA/GRA by the concerned Faculty:
(a) A graduate student shall submit an application
(b) The concerned Faculty Graduate Committee will oversee the selection process. It shall:
   (i) Review applications (transcripts, recommendation letters, etc.).
   (ii) Conduct interviews.
   (iii) Assess the research potential of the candidate.
   (iv) Evaluate a one-hour teaching presentation by the candidate.
(c) Upon approval, the concerned dean shall offer the student, on behalf of the University, an official letter/contract for final signature.
(d) The appointment procedure is completed when the candidate signs the letter/contract and when it is ratified by the signature of the President on behalf of the University.

**Compensation**
The GTA/GRA shall receive:
(a) Full tuition waiver. For a GRA, the tuition shall be paid for, primarily, by grants/funds received by the GRA advisor/thesis supervisor. Any outstanding tuition balance shall be settled by NDU through the GRA carrying additional academic duties.
(b) A stipend of up to LL300,000/month.
(c) Student parking during the duration of the contract.

**GRADUATE REGISTRATION**

**REGISTRATION PROCESS**
A registration guide is distributed to every graduate student before the period assigned for registration. Students are advised to read the registration guide and this section of the catalog carefully. Registration involves the following steps:

**Payment of Fees**
The first step in registration is the payment of fees. Every registrant must pay the fees in full, or make arrangement for payment two weeks before the beginning of registration. Regardless of the manner of payment, every student must clear his/her registration with the Business Office. Outstanding balances must be settled in full before a student is allowed to register. Those who fail to honor the terms of the arrangement of payment of fees will be denied the privilege of future arrangements.

**Consultation with Academic Advisors**
Each student is assigned an academic advisor. With a proposed semester course schedule, the student proceeds to his/her advisor for consultation and the finalization of the selected courses. Students should consult with their academic advisors in the places assigned them for registration. The selection of courses is initially undertaken by the registrant himself/herself. Registration in absentia or by proxy is not permitted. Continuing students should check the course requirements as prescribed for every major, and compare them with the ones they have already completed. In the light of this comparison, they should check the course offerings for the given semester and then fill in their
semester course schedules. New students must make sure that all required documents, particularly those mentioned in the letter of admission, are submitted to the Office of the Registrar. They should also have in hand their letters of admission and identity cards or passports to present them to their advisors. Students should follow the steps indicated in the registration guide.

**COURSE LOAD**
A full-time graduate student must register for nine credits per semester. Students registered for less than nine credits per semester are considered part-time graduate students. Graduate students cannot register for more than six credits in the Summer session.

**AUDITING**
Students may register for courses on an auditing basis. Courses in which a student is so enrolled carry no credit but are listed in the student’s transcript as audit. The fee charged by the University shall be 75% of the fee paid by regular students. Student auditors should fulfill the same admission conditions as any other regular student.

**DISCLOSURE OF STUDENTS’ RECORDS**
The University does not disclose information and academic records of any student except with his/her prior consent. Exceptions to this principle are made only in compliance with judicial orders and health or safety emergency.

**TUITION AND FEES**
NDU is a non-profit institution. Tuition and fees paid by students represent a small percentage of the full cost of a student’s education. The deficit is covered by income from gifts, grants and donations from foundations, alumni and friends of the University. The fees cover applications, membership in National Social Security Fund (NSSF), activities, Yearbook and Student Association, and Insurance. Membership of Lebanese students in the NSSF is mandatory by law. Thus prior to registration, students are urged to follow the instructions given by the Students Affairs Office concerning the clearance for NSSF.

Because of the rising cost of higher education, universities are facing severe financial problems. NDU reserves the right to change tuition fees and expenses at any time without prior notice.
A student may not complete registration, graduate or receive a transcript of record until all fees are paid.

REFUND POLICY
Contracts with faculty members and provisions for education are made by the University in advance for the entire year. Accordingly, if a student withdraws for justifiable reasons after final registration, refund of tuition fees will be made according to the following schedule of withdrawals:

- During drop/add period, 75% of the tuition is refunded;
- During the first week of classes, 50% of the tuition is refunded;
- Tuition is not refunded after the first week of classes;
- Refund policy does not apply during summer session. No refund of tuition is made for any withdrawal during summer session.

FINANCIAL SUPPORT FOR RE-ENROLLED COURSES
Students who re-enroll, for any reason, in any course, shall not benefit from any financial support for the-enrolled courses.
LAC, FRESHMAN PROGRAM AND DEGREES

Liberal Arts Curriculum (LAC)
A set of 27-30 credits in interdisciplinary courses, called Liberal Arts Curriculum (LAC), as a foundation for a liberal arts and basic science education. These LAC shall be distributed as follows:

Category I. English and Arabic Communication 9 cr.
A. English Communication 6 cr.
   ENL 213 Sophomore Rhetoric 3 cr.
   And
   ENL 230 English in the Workplace 3 cr.
   Or
   ENL 223 Communication Arts 3 cr.

B. Arabic Communication (One from the following pool) 3 cr.
   ARB 211 Appreciation of Arabic Literature
   ARB 212 Applied Arabic Grammar
   ARB 224 Arabic Literature and Human Thought
   ARB 231 Technical Arabic
   ARB 306 The Modern Arabic Novel and Short Story
   ARB 310 Arabic Theatre

Category II. Religion 3 cr.
   REG212 Religion and Social Issues
   REG 213 Catholicism
   REG 215 World Religions
   REG 313 Maronite Faith and Cultural Heritage
   REG 314 Marriage and Family in the Catholic Church

Category III. Ethics 3 cr.
   COA 360 Media Ethics
   ENG 310 Ethics in Engineering
   BAD 431 Business Ethics
   CSC 203 Information Age and Ethics
   ENS 205 Environment, Society and Ethics
   PHL 311 Ethics and the Modern World
   POS 345 Ethics and Leadership
   NUR 203 Introduction to Bioethics

Category IV. Citizenship 3 cr.
   POS 201 Introduction to Political Science
   POS 209 Citizenship
   POS 210 Government and Politics of Lebanon
   POS 319 Democracy and Human Rights
   POS 240 Law and Society
   FQM 200 Food Security and Sustainability

Category V. Cultural Studies and Social Science 6 cr.
Faculty Contributions
A. Cultural Studies
PHL 211 Logic and the Scientific Method
PHL 232 Ancient World Philosophy
PHL 333 Medieval World Philosophy
PHL 334 Modern and Contemporary World Philosophy
LIR 214 Introduction to Literary Genres
LIR 217 American Literature to the End of the 19th Century
LIR 305 Novel to the End of the 19th Century
ARP 215 Cultural Themes in Lebanese Architecture
FAP 215 Art and Culture
MUS 210 Music Appreciation
HIT 211 History of Lebanon
POS 225 Politics of Catholic Social Theory
TTM 326 Domestic Travel and Tourism Development
TTM 201 Introduction to Tourism & Hospitality Management
NTR 215 Foods and Nutrition of World Cultures
COA 315 World Cinema Survey
COA 350 Current Issues

B. Social Science
SOL 201 Introduction to Sociology
SOL 316 Society and Women
SOL 322 Family: Sociological Perspectives
SOL 323 Society and Role of Global Intercultural Communication
PSL 201 Introduction to Psychology
BAD 201 Fundamentals of Management
MRK 201 Fundamentals of Marketing
ECN 211 Principles of Microeconomics
ECN 212 Principles of Macroeconomics
ENG 220 Engineering Innovation
ENG 210 Introduction to Engineering Economy
CSC 206 Games and Society

Category VI. Applied and Life Sciences  6 cr.

Faculty Contributions

A. Applied Science
CSC 201 Computers and Their Use
CSC 202 Computers for Visual Arts
GIS 211 Principles of Geographical Information Sciences
MIS 201 Management Information Systems
MAT 202 Mathematics for Arts

B. Life and Natural Sciences
BIO 201 Your Body in Action
HEA 201 Health Awareness
HEA 204 Contemporary Health Issues
NTR 201 Basic Human Nutrition
CHM 211 Principles of Chemistry
AST 201 Discovering Astronomy
ENS 201 Introduction to Environmental Science
ENS 202 The Environment and Sustainable Development
FRESHMAN PROGRAM

1. A student entering the Freshman Program at NDU as Freshman is required to complete a minimum of 30 credits. He/She has to follow either the Arts or the Science program.

2. The Freshman Program includes courses from the following areas: (Arts and Science)
   - Humanities and Social Sciences 9cr.  
     (a minimum of 3crs. in each area)
   - Natural Sciences and Mathematics 6cr.  
     (a minimum of 3 crs. in Natural Sciences)

3. Freshman students cannot be considered sophomore students unless they have completed 30 crs. of Freshman courses successfully.

4. In exceptional cases, the Equivalency Committee in the Lebanese Ministry of Education will give the permission to the freshman student who misses one course or 5 credits from the freshman requirements, to register in sophomore courses, on condition he/she registers for the missing freshman course and passes it successfully.

5. Freshman students cannot register in sophomore courses without having this prior authorization.

6. According to the regulations of the Lebanese Ministry of Education the above mentioned areas include the following subjects:
   - Humanities: Languages, Literature, Philosophy, History;
   - Social Sciences: Psychology, Sociology, Anthropology, Economics, Geography, Business Administration, Management, Political Studies;
   - Natural Sciences: Biology, Chemistry, Physics, Geology, Astronomy, Nutrition;
   - Mathematics;
   - Computer Science;
   - Arts: Art-Music-Drama (not to exceed 3 credits).

DEGREES OFFERED

Faculty of Architecture, Art and Design (FAAD)
Bachelor of Architecture 172 credits
Bachelor of Arts in Interior Design 136 credits
Bachelor of Arts in Graphic Design 102 credits
Bachelor of Arts in Fashion Design 102 credits
Bachelor of Arts in Photography 102 credits
Bachelor of Arts in Decorative Arts & Crafts 102 credits
Bachelor of Music and Musicology - Musicology 99 credits
Bachelor of Music and Musicology - Music Education 99 credits
Bachelor of Music and Musicology - Musimediaology 99 credits
Bachelor of Music and Musicology - Arabic Musicology 99 credits
Bachelor of Music and Musicology - Jazz Music 99 credits
Master of Arts in Design 36 credits
Master of Arts in Music 36 credits

Faculty of Business Administration and Economics (FBAE)
Bachelor of Business Administration - Accounting 106 credits
Bachelor of Business Administration - Banking & Finance 106 credits
Bachelor of Business Administration - Int’l Business Management 107 credits
Bachelor of Business Administration - Marketing 106 credits
### Bachelor of Science in Economics
90 credits

### Bachelor of Business Administration
106 credits

**With the following emphasis:**
- Distribution and Logistics Management 106 credits
- Financial Engineering 106 credits
- Health Care Management 106 credits
- Human Resources Management 106 credits
- Management 106 credits

### Bachelor of Hotel Management and Tourism
103 credits

**With the following emphasis:**
- Food & Beverage Management 104 credits
- Hospitality Management 103 credits
- Travel & Tourism Management 103 credits
- Hospitality Events Management 103 credits

### Master of Business Administration (M.B.A.)
39 credits

### Master of Science in Financial Risk Management
30 credits

### Master of Science in Business Strategy
30 credits

### Faculty of Engineering (FE)

- Bachelor of Engineering in Civil Engineering 150 credits
- Bachelor of Engineering in Computer and Communication Engineering 150 credits
- Bachelor of Engineering in Electrical Engineering 150 credits
- Bachelor of Engineering in Mechanical Engineering 150 credits
- Master of Science in Civil Engineering 30 credits
- Master of Science in Electrical and Computer Engineering 30 credits
- Master of Science in Mechanical Engineering 30 credits

### Faculty of Humanities (FH)

- Bachelor of Arts in Education - Basic Education 99 credits + TD = 120 credits
- Bachelor of Arts in Communication Arts
  - Radio/TV 103 credits
  - Journalism & Electronic Media 102 credits
- Bachelor of Arts in Advertising & Marketing 102 credits
- Bachelor of Arts in Psychology 97 credits
  - Clinical 97 credits
  - Educational 97 credits
  - Industrial 97 credits
- Bachelor of Arts in English Language 102 credits
- Bachelor of Arts in Translation & Interpretation 108 credits
  - Translation 108 credits
  - Interpretation 108 credits
- Bachelor of Arts in Physical Education & Sport 99 credits + TD = 120 credits
  - Teaching Certificate 18 credits
  - Teaching Diploma in Arabic Language and Literature 21 credits
  - Teaching Diploma in Basic Education 21 credits
  - Teaching Diploma in Life Science 21 credits
  - Teaching Diploma in Chemistry 21 credits
  - Teaching Diploma in Computer Science 21 credits
Teaching Diploma in English  21 credits
Teaching Diploma in Mathematics  21 credits
Teaching Diploma in Physics  21 credits
Teaching Diploma in Physical Education  21 credits
Teaching Certificate in Arabic Language and Literature  18 credits
Master of Arts in English Language & Literature  30 credits
With the following emphasis:
   Applied Linguistics and TEFL  30 credits
   Literature  30 credits
Master of Arts in Translation  36 credits
With the following emphasis:
   Interpretation  36 credits
   Translation  36 credits
Master of Arts in Media Studies  39 credits
With the following emphasis:
   Advertising  39 credits
   Electronic Journalism & Public Relations  39 credits
   Television Management and Production  39 credits
Master of Arts in Education  33 credits
Master of Arts in Psychology - Educational Psychology  36 credits

**Faculty of Law and Political Science (FLPS)**
Bachelor of Law  140 credits
Bachelor of Arts in Political Science  105 credits
With the following emphasis:
   NGOs  105 credits
Bachelor of Arts in Political Science - American Studies  105 credits
Bachelor of Arts in Political Science - Euro-Mediterranean Studies  105 credits
Bachelor of Arts in International Affairs & Diplomacy  105 credits
Bachelor of Arts in Public Administration  105 credits
Master of Arts in Political Science  36 credits
With the following emphasis:
   NGOs  36 credits
   Human Rights  36 credits
Master of Arts in International Affairs & Diplomacy  36 credits
With the following emphasis:
   International Law  36 credits
Master of Arts in Public Administration  36 credits

**Faculty of Natural and Applied Sciences (FNAS)**
Bachelor of Science in Computer Science  94 credits
Bachelor of Science in Computer Science - Information Technology  94 credits
Bachelor of Science in Computer Science - Computer Graphics and Animation  94 credits
Bachelor of Science in Actuarial Sciences  94 credits
Bachelor of Science in Mathematics  90 credits
Bachelor of Science in Biology  92 credits
Bachelor of Science in Environmental Science  92 credits
Bachelor of Science in Chemistry  92 credits
Bachelor of Science in Business Computing  94 credits
Bachelor of Science in Business Computing - Management Information Systems  94 credits
Bachelor of Science in Geographic Information Systems  91 credits

OFFICE OF ADMISSIONS

Statement of Purpose
NDU is a Lebanese non-profit Catholic institution of higher education that adopts the American system of a liberal arts education. NDU stresses the cultural and spiritual heritage of the Maronite Mariamite Order, a pioneer in education as a means of promoting human dignity since its foundation in 1695. The religious affiliation of the University does not entail any sectarian obligation: applicants are granted equal opportunity irrespective of, religion, gender, creed, disability, race, or national origin. By promoting its academic and administrative facets and by recruiting students from local, regional and international provenance, the Office of Admissions aims at enhancing the universal image of NDU, an institution where all can explore the horizons of positive plurality within a rich human spectrum. At present, the seven Faculties at NDU are attracting students from across the world and are catering for the market demands of Lebanon and its surroundings.

UNDERGRADUATE ADMISSION
Applications may be downloaded from the NDU Home Page (www.ndu.edu.lb). Applicants must complete the application form and return it with a fee of 100,000 L.L. to the Office of Admissions. NDU entrance examination fees are 150,000 L.L. 75,000 L.L. (English); 75,000 L.L. (Aptitude). All fees are non-refundable.

The following documents must be submitted with each application form:
• A Secondary School Record for the last three academic years (Grades 10, 11 and 12);
• A Letter of Recommendation from the Principal;
• A photocopy of the Identity Card or Passport;
• Two recent passport-size photos;
• A certified copy of the Lebanese Baccalaureate Part II or its equivalence;
• Scores of exams taken outside NDU (TOEFL, SAT I and IELTS).

Freshman applicants must additionally submit:
• An official school document attesting that they have completed and passed their High School requirements or High School Diploma;
• A certified copy of the written authorization from the Equivalence Committee;
• Scores of both SAT I (mandatory), and SAT II (if available).

Documents must be original. All documents submitted to complete a file become the property of NDU. Whether accepted or rejected, applicants may not claim any of the documents.

**FRESHMAN ADMISSION REQUIREMENTS**

Non-Lebanese students or students who have followed a High School program for at least three years may apply to the Freshman Class. They must hold a secondary school certificate (Grade 12) recognized by the Lebanese Ministry of Education. Applicants to the Freshman Class are required to take the Scholastic Aptitude Test SAT I prior to registration as required by the Lebanese Ministry of Education for the equivalence of the Lebanese Baccalaureate Part II. The SAT II should be taken during the freshman year. These tests will be specified according to either the Freshman Sciences or Arts stream. SAT I includes Evidence-Based Reading/Writing and Math. SAT II (Arts) includes Math 1C plus two SAT II Subject Tests. SAT II (Sciences) includes Math 2C plus two of the following science subjects (Biology, Chemistry, Physics). The required minimum score for the combined SAT I & SAT II is 2600 for Freshman Arts and 2750 for Freshman Sciences (old scores) whereas
2150 for Freshman Arts and 2300 for Freshman Sciences (new scores). All applicants must satisfy an acknowledged level of English proficiency in order to be admitted. NDU recognizes one of the following instruments to measure this level: EET (English Entrance Test) administered by NDU, or TOEFL (Test of English as Foreign Language), or the writing/evidence-based reading & writing section of the SAT I, or the International English Language Testing System IELTS Score.

Moreover, applicants to the Freshman Class must obtain a written authorization from the Equivalence Committee of the Lebanese Ministry of Education. This document will allow students to pursue their higher education on the basis of a foreign program.

Note: Freshman students must successfully complete at least 30 credits in order to receive an equivalence. Students may not be promoted to a Sophomore (or any other) class before they complete all Freshman requirements.

SOPHOMORE AND FIRST YEAR ADMISSION REQUIREMENTS
To be eligible for the Sophomore or First Year Class, applicants must hold the Lebanese Baccalaureate Part II or its equivalent, as determined by the Lebanese Ministry of Education. The strand of the Lebanese Baccalaureate Part II (General Sciences, Literature and Humanities, Social Sciences and Economics, Life Sciences) must correspond to the requirements of the desired program of study of the respective Faculties at NDU. Applicants must accumulate a certain composite score (CS) required by these Faculties to be admitted in their respective majors. This score is calculated by allocating 55% weight to the last 2 years school final averages and 45% to NDU Math Aptitude Test or Math for SAT I.

TRANSFER ADMISSION REQUIREMENTS
Applicants who have completed at least 12 credits at the Sophomore level and/or First Year level outside NDU with a cumulative GPA of at least 2.0/4.0 beyond their secondary school education, and have been accepted by NDU’s Office of Admissions to register for a full-time load during the Fall or Spring semester, are considered transfer students. Courses earned at other institutions recognized by the Lebanese Ministry of Education and Higher Education, graded C or higher and matching courses offered at NDU, are considered transferable. Only courses completed at NDU will be computed in the student’s GPA. Transfer students to the Faculty of Architecture, Arts and Design (excluding the BA in Graphic Design) and Faculty of Engineering must complete at least 45 credits at NDU with a cumulative GPA of 2.0/4.0 and meet all other graduation requirements for that degree. Transfer students to all other faculties must complete at least 30 credits at NDU with a cumulative GPA of 2.0/4.0 and meet all other graduation requirements for that degree.

Transfer students to the Department of Law - Bachelor of Law, must complete at least 60 credits at NDU with a cumulative GPA of at least 2.3/4.0 in the core and major requirements. Transfer applicants must submit official transcripts of records as well as a catalog from the previous college or university along with an application for admission to NDU. The conditions for acceptance are specified by the University Admissions Committee, and applicants will be notified of these conditions prior to registration.

ADMISSION REQUIREMENTS FOR INTERNATIONAL STUDENTS
Foreign applicants must complete an application form and submit it to the Office of Admissions along with the appropriate documents. The form can be downloaded from
ADMISSION REQUIREMENTS FOR SPECIAL STUDENTS
Students who are not working toward a degree are considered Special Students. Applicants must complete an application form and submit it to the Office of Admissions along with the appropriate documents. Admission requirements for such applicants are the English Entrance Test (EET), if they are from non-English institutions, and the Lebanese Baccalaureate Part II or its equivalence. Special status is granted for one academic semester. Thereafter, to petition for a ‘Regular Student Status,’ students must fulfill all admission requirements, including passing the required entrance exam.

ADMISSION REQUIREMENTS FOR AUDITORS
Students applying as Auditors are not entitled to a degree or credits or grades for the courses that they attend. An application form must be completed and submitted to the Office of Admissions along with the appropriate documents. Admission requirements for such applicants are the English Entrance Test (EET) if they are from non-English institutions. In general, applicants must be university level students. If not, their files are considered on an individual basis.

ADMISSION REQUIREMENTS FOR A SECOND DEGREE
Students who already have a university degree can apply for a second degree. The number of credits required for graduation is determined by the concerned Faculty. However, the minimum residency requirements are 30 credits.

ADMISSION REQUIREMENTS FOR TEACHING DIPLOMA/ CERTIFICATE
Applicants who hold a Bachelor Degree can apply for the Teaching Diploma in the same area of specialization. Applicants who have the Lebanese Baccalaureate Part II, or a Bachelor Degree in a different area of specialization, may apply for a Teaching Certificate. Applicants who have been out of school for five years or more are required to fulfill NDU admission requirements.

ADMISSION REQUIREMENTS FOR SUMMER ARABIC PROGRAM
To join the Summer Arabic Program offered by NDU, students must submit an Undergraduate or Graduate Application Form (to be downloaded from www.ndu.edu.lb under Office of Admissions) along with the Summer Arabic Program Application Form found in the brochure. Other requirements include an official transcript of the most recent academic year, a recommendation from an Arabic teacher and a sample of Arabic writing. The questionnaire of purpose (see the brochure) must be completed and submitted. The non-refundable application fee is US$30 (check or money order made to Notre Dame University-Louaize, Lebanon).

ADMISSION REQUIREMENTS FOR UNIVERSITY EMPLOYEES
NDU employees who request admission to a program of study must meet the admission requirements of the respective Faculty. Employees are considered regular applicants and must abide by University policies and procedures. The Director of Admissions will issue a letter of acceptance to identify the academic status of the applicant.
ENGLISH PROFICIENCY REQUIREMENTS

All applicants must satisfy an acknowledged level of English proficiency to be admitted. NDU recognizes one of the following instruments to measure this level:

- The English Entrance Test (EET) administered by NDU;
- Test of English as Foreign Language TOEFL
- Writing Section of SAT I.
- International English Language Testing System IELTS Score

A student must pass the EET with a minimum score of 650 to be admitted without remedial English courses, and a minimum score of 350 to be admitted with Intensive English course (ENL 002). Below are the required remedial English courses along with their corresponding EET score ranges.

<table>

**FACULTY ADMISSION REQUIREMENTS**

**FACULTY OF ARCHITECTURE, ART AND DESIGN (FAAD)**

Applicants must pass the Lebanese Baccalaureate Part II (any strand) or its equivalent as identified by the Lebanese Ministry of Education.

The selection depends on the following assessment model:

- TOEFL, or Writing Section of SAT I, or IELTS, or EET (for NDU English proficiency requirements)
- SAT I or the NDU Entrance Test (Aptitude Test).
- Secondary School Grades.

Applicants must accumulate a certain **composite score (CS)** required by the FAAD to be admitted in its respective majors. **This score is calculated by allocating 55% weight to the last 2 years school final averages and 45% to NDU Math Aptitude Test or Math for SAT I.**

Students who are transferring from accredited departments of Architecture are eligible to be accepted to pursue their studies in Architecture if they fulfill all the conditions below:

- They were enrolled in an accredited Faculty/Department of Architecture;
- They have completed a minimum of 12 credits at their institution with a cumulative GPA of 2.3 and higher;
- They are eligible to continue their studies at their home institution. Students who are subject to disciplinary action will not be accepted as transfer students;
- Students should submit a statement certifying the number of years spent at their home institution.

Students who are transferring from non-architecture majors (Mathematics/Physics/Engineering) at accredited institutions are accepted provided that:

- They have completed a minimum of 12 credits of Mathematics/Physics/Engineering courses at the sophomore level or higher with a minimum grade of C+;
- They have a cumulative GPA of 2.3 or higher;
- Students from non-science/engineering majors are considered for acceptance on a case-by-case basis.
The admission application along with official transcripts, course description, syllabi for all courses and academic portfolio (hard copy, A3 format) should be submitted before July 1st for fall admission and December 1st for spring admission. Submission of any missing documents must be completed before July 15 for fall admission and January 15 for spring admission.

FACULTY OF BUSINESS ADMINISTRATION AND ECONOMICS (FBAE)
Applicants must pass the Lebanese Baccalaureate Part II (any strand) or its equivalent as identified by the Lebanese Ministry of Education.

The selection depends on the following assessment model:
- TOEFL, or Writing Section of SAT I, or IELTS, or EET (for NDU English proficiency requirements).
- SAT I or NDU Entrance Test (Aptitude Test).
- Secondary School Grades.

Applicants must accumulate a certain composite score (CS) required by the FBAE to be admitted in its respective majors. This score is calculated by allocating 55% weight to the last 2 years school final averages and 45% to NDU Math Aptitude Test or Math for SAT I.

FACULTY OF ENGINEERING (FE)
Applicants must pass the Lebanese Baccalaureate Part II in the General Sciences strand or the Life Sciences strand, or its equivalent as identified by the Lebanese Ministry of Education.

The selection depends on the following assessment model:
- TOEFL, or Writing Section of SAT I, or IELTS, or EET (for NDU English proficiency requirements).
- SAT I or NDU Entrance Test (Aptitude Test).
- Secondary School Grades.

Applicants must accumulate a certain composite score (CS) required by the FE to be admitted in its respective majors. This score is calculated by allocating 55% weight to the last 2 years school final averages and 45% to NDU Math Aptitude Test or Math for SAT I.

Students who hold the Lebanese Baccalaureate Part II in the Sociology and Economics strand or the Literature and Humanities strand cannot be accepted directly as new students in the Faculty of Engineering. However, they can transfer to any Engineering major after having completed the following requirements in other majors at NDU: a minimum of 12 credits of Mathematics/Physics/Chemistry courses (minimum passing grade B) at the sophomore level or higher with a total GPA of 2.7 minimum in addition to all other University requirements for transfer between majors.

Students who are transferring from accredited faculties of Engineering are eligible to be accepted to pursue their studies in one of the majors in the Faculty of Engineering if they fulfill all the conditions below:
- They were enrolled in an accredited Faculty of Engineering;
- They have completed a minimum of 12 credits at their institution with a cumulative GPA of 2.7 and higher;
- They are eligible to continue their studies at their home institution. Students who are subject to disciplinary action will not be accepted as transfer students;
• Students should submit a statement certifying the number of years spent at their home institution.

Students who are transferring from non-engineering majors (scientific majors) at accredited institutions are accepted provided that:
  • They have completed a minimum of 12 credits of Mathematics/Physics/Chemistry courses at the sophomore level or higher with a minimum grade of “B”;
  • They have a cumulative GPA of 2.7 or higher.

The admission application along with official transcripts, course description and syllabi for all courses should be submitted before July 1st for fall admission and December 1st for spring admission. Submission of any missing documents must be completed before July 15 for fall admission and January 15 for spring admission.

Students accepted to NDU in non-engineering majors can use their composite score to gain admission to engineering majors up to one year from the date of the entrance exam given that they are on good academic standing as defined in the NDU catalog.

FACULTY OF HUMANITIES (FH)
Applicants must pass the Lebanese Baccalaureate Part II (any strand) or its equivalent as identified by the Lebanese Ministry of Education.

The selection depends on the following assessment model:
  • TOEFL, or Writing Section of SAT I, or IELTS, or EET (for NDU English proficiency requirements).
  • SAT I or NDU Entrance Test (Aptitude Test).
  • Secondary School Grades.

Applicants must accumulate a certain composite score (CS) required by the FH to be admitted in its respective majors. This score is calculated by allocating 55% weight to the last 2 years school final averages and 45% to NDU Math Aptitude Test or Math for SAT I.

Applicants for the degree of Arts in Arabic Language and Literature are also required to sit for an additional placement test in Arabic. Moreover, applicants to Translation and Interpretership are required to sit for placement tests in Arabic and French.

FACULTY OF NATURAL AND APPLIED SCIENCES (FNAS)
Applicants to the FNAS majors in Biology, Environmental Sciences, Computer Science (M.I.S.) and Business Computing must pass the Lebanese Baccalaureate Part II (any strand) or its equivalent as identified by the Lebanese Ministry of Education. Applicants to the remaining majors offered by the FNAS must pass the Lebanese Baccalaureate Part II in one of the strands of General Sciences, Life Sciences or Social Sciences & Economics (applicants to Computer Science are subject to additional remedial courses upon admission) or its equivalent as identified by the Lebanese Ministry of Education.

The selection depends on the following assessment model:
  • TOEFL, or Writing Section of SAT I, or IELTS, or EET (for NDU English proficiency requirements).
  • SAT I or NDU Entrance Test (Aptitude Test).
  • Secondary School Grades.
Applicants must accumulate a certain composite score (CS) required by the FNAS to be admitted in its respective majors. This score is calculated by allocating 55% weight to the last 2 years school final averages and 45% to NDU Math Aptitude Test or Math for SAT I.

FACULTY OF NURSING AND HEALTH SCIENCES (FNHS)
Applicants to the FNHS must pass the Lebanese Baccalaureate Part II (any strand) or its equivalent as identified by the Lebanese Ministry of Education. The selection depends on the following assessment model:
- TOEFL, or Writing Section of SAT I, or IELTS, or EET (for NDU English proficiency requirements).
- SAT I or NDU Entrance Test (Aptitude Test).
- Secondary School Grades.

Applicants must accumulate a certain composite score (CS) required by the FNHS to be admitted in its respective majors. This score is calculated by allocating 55% weight to the last 2 years school final averages and 45% to NDU Math Aptitude Test or Math for SAT I.

FACULTY OF LAW AND POLITICAL SCIENCE (FLPS)
Applicants must pass the Lebanese Baccalaureate Part II (any strand) or its equivalent as identified by the Lebanese Ministry of Education. The selection depends on the following assessment model:
- TOEFL, or Writing Section of SAT I, or IELTS, or EET (for NDU English proficiency requirements).
- SAT I or NDU Entrance Test (Aptitude Test).
- Secondary School Grades.

Applicants must accumulate a certain composite score (CS) required by the FLPS to be admitted in its respective majors. This score is calculated by allocating 55% weight to the last 2 years school final averages and 45% to NDU Math Aptitude Test or Math for SAT I.

Remedial Math Courses
In some selected majors, a student may be required to take one remedial course in Mathematics (besides the English remedial course(s); see above) if, upon evaluating his/her application, he/she did not accumulate the minimum composite score required by the Faculty for admission to these majors.

The following are the selected majors along with their corresponding remedial Math courses and the minimum passing grade in each.

### GRADUATE ADMISSION

**Statement of Purpose**

Graduate Studies at NDU promote humanistic, ethical, and spiritual values in order to enhance intellectual inquiry and awareness of human integrity and solidarity. In addition, the graduate program seeks to develop the mental, physical and spiritual potential of its student body. NDU also seeks to enhance these values through liberal education and career preparation that caters to the needs of Lebanon and the region.

**Admission Procedures**

To be eligible for admission to a graduate studies, an applicant must hold a Bachelor degree or its equivalent from an accredited institution of higher education preceded by a secondary school certificate recognized by the Lebanese Ministry of Higher Education as equivalent to the Lebanese Baccalaureate Part II. Admission to graduate programs at NDU is made on a semester basis and follows the same deadlines as specified for undergraduate applicants.

Only complete files will be studied.
Applications for Graduate Admission are available in the Office of Admissions or can be downloaded from the NDU Home Page (www.ndu.edu.lb). The application, submitted to the Office of Admissions, should include the required documents indicated on the form with a non-refundable fee of 200,000 LL. Admission requirements for graduate study are established and monitored by the Departments and Faculties concerned.

The Office of Admissions will process applications, review credentials and issue letters of notification. The Office of Admissions informs applicants in writing as soon as final decision is taken. Applicants may check their admission status on the website; the status is not final until the applicant receives the letter of acceptance from the Office of Admissions.

**Required Documents**
- A certified copy of the Bachelor degree from the University and its equivalence certified from the Lebanese Ministry of Education and Higher Education (NDU-Louaize graduates only need to submit a non-certified copy);
- An official transcript of the undergraduate record;
- A certified copy of the Lebanese Baccalaureate Part II or its equivalence (excluding NDU graduates)
- A photocopy of the Identity Card or Passport
- Two recent photographs;
- Two letters of recommendation (1 Academic and 1 Professional) (excluding NDU-Louaize graduates).

Applicants from NDU are not required to take the English Entrance Test. Applicants who must sit for the EET at NDU should abide by the examination dates as they are specified for undergraduate applicants in The Admissions Guide.

English is the medium of instruction at NDU; applicants for graduate study should demonstrate proficiency in the English-language. Applicants from institutions where English is not the language of instruction will be required to sit for either the NDU English Entrance Test (EET) or the Test of English As a Foreign Language (TOEFL); the minimum score must be 600 for the EET and 96 - 97 for the iBT.

Applicants All documents become part of the permanent records of NDU and will not be returned. MBA applicants must in addition provide the following documents:
- Official GMAT or GRE score (excluding applicants holding doctoral degrees);
- Curriculum Vitae;
- Employment certificate.

MS in Engineering applicants must in addition provide the following documents:
- Official GRE score;
- Curriculum Vitae.

The concerned Faculty will contact applicants to schedule interviews with the Graduate Admissions Committee.

**Other Requirements**
Individual Faculties retain the right to request further requirements for admission to graduate programs such as the Graduate Management Admission Test (GMAT) and the Graduate Record Examination (GRE). Other requirements may include recommendations from employer(s), auditions, interviews, and samples of the student’s work or personal
statements. These further admission requirements will be stated in the letters of conditional admission authorized by the Faculty concerned.

**TYPES OF ADMISSION**

**Regular Admission**
Regular Admission is granted to those applicants who have fulfilled all undergraduate admission requirements. The minimum required cumulative Grade Point Average (GPA) is 3.0/4.0.

**Conditional Admission**
Applicants whose cumulative GPA at the undergraduate level ranges between 2.7/4.0 and 2.99/4.0 may be considered for conditional admission; this is determined by the Faculties concerned. Applicants must maintain the level of academic excellence expected of all graduate students and meet the graduate admission requirements. These applicants may be required to take up to 9 credit hours of undergraduate courses in the areas of identified deficiencies, and earn a minimum GPA of 3.0/4.0 in these courses to be eligible to pursue their graduate studies.

**Prospective Applicants**
Candidates qualify for this category if they apply for a major other than the undergraduate degree from NDU or an equivalent degree from any other recognized institution of higher education with a cumulative GPA of at least 2.7/4.0. The appropriate Faculty shall study the files of prospective graduate students. They may recommend supplementary undergraduate courses that the applicant must complete with a minimum cumulative GPA of 3.0/4.0 prior to consideration for admission to graduate study. Credits earned for undergraduate courses will not be counted toward the graduation requirements for the relative Masters degree.

**Transfer Applicants**
Applicants wishing to transfer and complete their graduate study at NDU must meet the graduate admission requirements of NDU. A complete record of all courses completed with course description must be submitted. Faculties concerned shall evaluate and determine the transferability of academic credits in addition to the applicant's eligibility for graduate-level study at NDU. Normally, a maximum of 9 transfer credits from previous work completed at another accredited institution of higher education recognized by the Lebanese Ministry of Education and Higher Education, is permitted upon the discretion of the Faculty Evaluation Committee. The course content and quality must correspond to the NDU course description as required for the major requested. The minimum score of each course must be “B” or its equivalent. Transfer credits are not computed in the Cumulative GPA but marked “Transfer”.

**International Applicants**
Transcripts and degrees from foreign institutions require special evaluation and must be certified by the offices concerned. Consequently, prospective international students are advised to submit their application forms, test scores, and all other required documents at least one semester before the beginning of the semester for which they are applying.

**Non-degree Applicants**
Individuals seeking graduate coursework without the desire of candidacy for an advanced degree may apply if they meet all requirements for admission to a graduate program as a non-degree (graduate) student.
READMISSION
The Letter of Acceptance to NDU is valid for three consecutive semesters; otherwise, the student must reapply for admission.
OFFICE OF STUDENT AFFAIRS
The Office of Student Affairs at the University is a service-oriented unit. It provides a number of activities and services to complement the academic work of students and help them actualize their full potential. The office creates healthy physical, social, personal, moral and cultural environments to ensure that students can make the most of their university experience. The Office of Student Affairs coordinates all other activities involving students on campus.

- Student Union.

DEPARTMENT OF FINANCIAL AID
Objectives
It is the philosophy of Notre Dame University-Louaize NDU that students should not be denied the opportunity to further their university education because of limited financial resources. The Student Financial Aid Program was established to meet the goal of this philosophy by providing qualified students with financial aid regardless of color, race, gender, religion, nationality, or political affiliation.

NDU has created several types of Financial Aid programs to cater to the needs of undergraduate students and these include:

Work-Study Grants (WSG)
The Work-Study Grant is a financial assistance for undergraduate students based on demonstrated need.
The Work-Study Grant is designed to assist full-time students with proven financial need to cover part of the cost of their education. Students who qualify as assistants are assigned to various departments or offices in the University.
Placement is made on the basis of capability, need and job availability. Students will have to set a schedule for their working hours. The schedule should not conflict with their class schedule and should be signed by the Supervisor and the Financial Aid Officer.
The hourly rate for students on WSG is 4.5% of the actual rate per credit of each major. Students may receive up to 40% of his/her tuition fees through WSG.
Students eligible for a WSG will have the added benefit of developing their working skills as well as gaining a deeper sense of personal responsibility and accomplishment.

Eligibility
To attain eligibility status, the student must:
- demonstrate financial need;
- have completed 12 credits at NDU (remedial credits not included);
• have demonstrated academic potential (cumulative GPA, minimum 2.3/4.0) and be enrolled as a full-time student with a minimum of 12 credits each semester except during the last semester before graduation when the number of credits may drop to nine (9).

**Conditions**

Any student who has been granted a WSG will be covered for a full academic year (exclusive of summer session) unless:

- his /her GPA drops below 2.3/4.0;
- he/she receives a scholarship from another institution exceeding 50% of tuition;
- he/she benefits from the scholarship;
- he/she registers for less than 12 credits during each semester and less than 9 credits during the last semester at NDU;
- he/she does not fulfill the job requirements assigned by the Financial Aid Officer;
- he/she does not abide by the rules and regulations of the assignment; and
- it is revealed later that the information submitted is fallacious

**Procedures**

Undergraduate students may apply for financial aid by filling out an application form, which can be obtained from the Financial Aid Office.

Upon taking this application, the student should schedule an interview with the Financial Aid Officer and submit the complete form along with the appropriate documents before the official deadline. Every semester, dates and deadlines for obtaining and submitting applications will be updated and posted on the NDU Website, and scheduled in the academic year calendar.

WSG applications must be submitted one semester in advance (for a Fall semester WSG, the application must be received by the Financial Aid Office during the previous Spring semester).

WSG applications must be renewed for every academic year by filling a “Renewal Form,” which can be obtained from the Financial Aid Office.

Students applying for WSG may receive a home visit from representatives of the Financial Aid Office. After the procedure is completed, the Financial Aid Committee will review each application carefully and give the appropriate decision. Applications that have missing documents will be considered incomplete and hence will not be studied.

For more information about WSG, you may send an email, call or visit the Financial Aid Office.

**Student Employment**

Full-time students proving to have special skills which none of the WSG students possess may be employed for the duration of one semester upon the request of Faculty Deans for academic reasons. The Financial Aid Committee will determine the working hours and the hourly rate.

**Grants**

**a. Grant for Excellence**

Students demonstrating excellence in sports, artistic, cultural, and social activities, and representing the University in national and international contests could benefit from a
grant ranging from 10 to 15% of tuition as determined by the Financial Aid Committee upon the recommendation by the Dean of Office of Student Affairs.
To be eligible for a sports grant, the student has to:

- Join a sports team at NDU;
- Complete 12 credits at NDU (remedial credits are not included);
- Be enrolled in 12 credits each semester, and in at least 9 credits during the last semester;
- Maintain a minimum cumulative GPA of 2.00.

b. Sibling Grant
NDU provides a family discount when there are two or more siblings enrolled simultaneously. Students can benefit from the Sibling Grant starting their first semester.

Eligibility
To attain eligibility status, the student must:

- Be enrolled as full-time student with a minimum of 12 credits except during the last semester before graduation when the number of credits may drop to 9 credits;
- Maintain a minimum cumulative GPA of 2.00;
- Be enrolled in a regular Undergraduate Program (Intensive, Freshman, and Masters Students are not eligible to benefit from Sibling Grant).

If one of the siblings does not fulfill the above criteria, the other(s) may benefit if his/her sibling is enrolled in 9 credits minimum for the undergraduate students and in 6 credits minimum for the graduate students.

Conditions
If eligible, two siblings enrolled at the same time in the University will benefit from a 15% discount each; three or more siblings will be entitled to a 25% discount each;

In case of financial need, eligible siblings will have the possibility to raise the percentage given to a maximum of 40% by applying to the WSG during the dates scheduled in the academic calendar;

A 25% scholarship will limit the percentage of Sibling Grant to 15%, a 50% scholarship will reduce the percentage of Sibling Grant to 10% and a 75% scholarship will totally eliminate the Sibling Grant discount.

Procedure
The students must submit the Sibling Grant form and attach it to a copy of their Family Identity Card. The form can be obtained from the Financial Aid Office during the first week of each semester. Dates and deadline are scheduled in the academic calendar.

The siblings will benefit from the discount as long as they are eligible. They do not have to renew their application unless a new sibling is enrolled for the first time with them.
Undergraduate Scholarship
The Undergraduate Scholarship is awarded to students with high academic standing and according to the following scale:

Cumulative GPA from 3.40/4.00 to 3.65/4.00 -------- 25% Scholarship;
Cumulative GPA from 3.66/4.00 to 3.79/4.00 -------- 50% Scholarship;
Cumulative GPA from 3.80/4.00 to 4.00/4.00 -------- 75% Scholarship.

Eligibility
To attain eligibility status, the student must:

- Have completed 12 credits at NDU (remedial credits are not included);
- Be enrolled in 12 credits each semester except during the last semester before graduation when the number of credits may drop to nine (9); and
- Have demonstrated academic excellence by maintaining a high cumulative GPA (3.40/4.00 and above).

Procedure
If a student meets the above criteria, he/she does not have to apply, and will automatically benefit from the discount on his/her tuition fees. The Scholarship amount will be automatically calculated and will appear on his/her SIS payment details.

The Scholarship is granted as long as the cumulative GPA of the student is above 3.4, and provided the credit eligibility is maintained.

Re-enrollment Policy
Students, who re-enroll, for any reason, in any course, shall not benefit from any financial support for the re-enrolled courses

E-mail: financialaid@ndu.edu.lb

DEPARTMENT OF SOCIAL SECURITY
Returning Students
Returning students under the age of 30 who are sophomores, juniors, seniors, graduate, and who

a. Benefit from any of those governmental health plans:

- صندوق تعاونية موظفي الدولة
- صندوق تعاضد القضاة
- صندوق تعاضد الهيئة التعليمية في الجامعة اللبنانية
- البلدوات
- الصندوق الوطني للضمان الاجتماعي

must:
- Fill out Form B (تصريح استفادة)
- Attach an original statement from the local office they (or their parents) belong to (إفادة من مركز التبعية الرسمي), which certifies their benefit
- A photocopy of their Family Status Record (إخراج قيد عائلي) not older than one year
b. Benefit from أنظمة القوى الأمنية (الجيش، الأمن الداخلي، الأمن العام، أمن الدولة، والجمارك)
must:
- Fill the Form B (تصريح استفادة)
- Attach a photocopy of their benefit card;
- A photocopy of their Family Status Record (إخراج قيد عائلي) not older than one year

N.B: The procedure is repeated at the beginning of every academic year.

c. Have stopped benefiting from a governmental health plan (mentioned above) while at NDU must:
- Fill out Form A1 (تصريح عن طالب جامعي) and Form A2 (تعهّد عدم استفادة)
- Attach a photocopy of the Family Status Record (إخراج قيد عائلي) not older than one year

d. Do not benefit from any governmental health plan (mentioned above) while at NDU and are enrolled for the second or more consecutive year at NDU must:
- Verify their cleared status through the SIS program prior to payment at the Bank and the registration procedure accomplishment.

Filling out Form C (إعلان عن طالب مسجل) is the responsibility of the Department of Social Security - Office of Student Affairs.

Thus, students who are registered at the National Social Security Funds (NSSF) as NDU students and who did not report any change of status, are not required to pass by the Office of Student Affairs. Their coverage by NDU will be automatically renewed for a fee of LBP 202,500 L.L. payable along with their tuition fee at the bank.

However, if any change of status takes place (new work, new National Social Security Funds coverage...) students are required to inform the Office of Student Affairs. Students who did not complete this step are totally held responsible for any problem that might arise due to an incomplete NSSF file.

- Returning students who reach the age of 30 years old are exempted from presenting any official document and have to fill Form B (تصريح إستفادة);

Students will not be able to register if they do not submit the required documents at the Department of Social Security at the Office of Student Affairs.

Students can pick up their appropriate forms from the Department of Social Security at the Office of Student Affairs or from the Internet (www.ndu.edu.lb).

New students

New students who:

a. Do not benefit from any governmental health plan
must:
- Fill out Form A1 (تصريح عن طالب جامعي) and Form A2 (تعهّد عدم استفادة)
- Attach a photocopy of the Family Status Record (إخراج قيد عائلي) not older than one year
b. Benefit from any governmental health plan must:
   • Fill out Form B (تصريح إستفادة)
   • An original statement from the local office they (or their parents) belong to (إفادة من مركز التبعية الرسمي)، which certifies the benefit
   • Attach a photocopy of the Family Status Record (إذخريم قيد عائلي) not older than one year

New students accepted as Intensive English or Freshman (Arts, Sciences) are not exempted from NSSF benefit obligations.

After fulfillment of any of these two levels’ requirements (Intensive or Freshman) and before registration of their regular courses, students are requested to pass by the Department of Social Security - Office of Student Affairs to present documents required for Clearance like any other regular NDU student.
New students accepted as Foreigners (non-Lebanese students) are exempted from NSSF benefit obligations but they are still entitled to clearance procedure (NR- non-Lebanese).
New students (transferred) who benefit from the NSSF through the former university for one or more consecutive years must submit their NSSF number and if not they must:

1. Fill out the Form C (إعلان عن طالب مسجّل)
2. Attach Receipts (per Academic year) or Administrative Statement in Arabic from the former university
3. Attach a photocopy of their Family Status Record (إذخريم قيد عائلي) not older than one year

New students (transferred) willing to register for the Spring Semester and having NSSF clearance as beneficiary from the previous university for the Fall Semester of the current Academic year must submit their NSSF number and if not they must:

1. Fill out the Form B (تصريح إستفادة)
2. Attach a Receipt or Administrative Statement in Arabic from the former university
3. Attach a copy of their Family Status Record (إذخريم قيد عائلي) not older than one year

Students can pick up their appropriate Forms from the Department of Social Security - Office of Student Affairs or from the Internet (www.ndu.edu.lb).

On forms A1, A2, B, C, the statement, and the photocopy of the Family Status Record (إذخريم قيد عائلي) students must write on the top:

1. I.D. number as it appears on the letter of acceptance
2. Major
3. Date of birth (D.O.B.) as it appears on the I.D. (العويمه)
The Social Security Fund covers 80% of the medication, radiology and 90% of the hospitalization. Besides, it is a Governmental requirement from every student.

The governmental health plans approved by the National Social Security Fund (NSSF) are limited to the following ONLY:

- صندوق تعاونية موظفي الدولة
- تعاضد القضاة
- استاذة الجامعة اللبنانية
- البلدانات الصندوق الوطني للضمان الاجتماعي
- الجمارك
- السلوك العسكري
- الإباضة من مركز التبعية الرسمي
- وليس من مركز العمل

Exception (صورة عن البطاقة المجددة)

For more information please contact the NDU number (09/208000) then ext: 2114 or direct line 09/208805, or nssf@ndu.edu.lb

DEPARTMENT OF COUNSELING AND HEALTH
Counseling Services
The Counseling Services at NDU offers therapeutic accompaniment and psychological support, by a specialized psychotherapist, trained to use the following therapies:

- Cognitive and Behavioral Therapy (CBT);
- Trauma Therapy (EMDR);
- Emotional Therapy (EFT);

These services are free of charge and are rendered with utmost respect and confidentiality.

Assistance is available for a variety of concerns which include, but are not limited to, the following:

- Overall stress and anxiety;
- Crisis intervention for individuals facing traumatic stress;
- Problems related to eating disorders;
- Concerns related to addiction (drugs, alcohol, etc.);
- Personal issues;
- Relationship problems;
- Chronic illness;
- Sadness and depression;
- Difficulty adjusting to new situations;
- Grief and bereavement counseling.

Find out more about this service at the Medical House or by contacting the NDU number (09/208000) then ext: 2049 or direct line 09/208809 or medicalhouse@ndu.edu.lb.

Health Services
NDU provides all its students with a variety of health services at the NDU Medical House located at the Office of Student Affairs in collaboration with “Centre de Biologie Moléculaire et Polyvalente - BMP” in Adonis.

a. The following tests are mandatory for all new students before registration period:
• Blood cell count;
• Blood grouping;
• Serology HIV;
• Hepatitis B;
• Hepatitis C;
• Chest X-ray;
• Tuberculosis test.

All these tests will be administered at the NDU Medical House for a fee of LBP 205,000 to be paid in advance at Byblos Bank or Bank of Beirut. This fee will also allow students to benefit from other services provided at the Medical House. Any student who is readmitted at NDU after 2 semesters of absentia will have to undergo the same procedure again.

b. The “Centre de Biologie Moleculaire et Polyvalente - BMP” provides a technician to administer blood tests between 8:00 and 16:00 daily at the NDU Medical House.

c. NDU reserves the right to request random medical tests from any student to test for drug use or for any other medical reason.

The University physician is available daily (M-F) from 12:00 to 14:00 at the Medical House and is on call for any help and for free consultations 24/7 free of charge. The University nurse is available on a daily basis from 8:00 to 16:00.

Serious cases are sent to the nearest hospital.

All students with medical ailments have to contact the NDU physician for validation within 48 hours of their sickness/injury. No medical excuses will be accepted at NDU unless validated by the NDU physician.

Find out more about this service at the Medical House or by contacting the NDU number (09/208000) then ext: 2049 or direct line 09/208809 or medicalhouse@ndu.edu.lb.

**Insurance Policy**

NDU students who have an accident when practicing any kind of activity inside or outside the University premises are insured for up to US$1,000. Students should pass by the Medical House during regular working hours in order to fill out the appropriate form.

If the accident occurs outside working hours, students should go to the Medical House at a later date to complete the procedure.

This insurance service is in addition to the NSSF coverage. For more information please contact the NDU number (09/208000) then ext.: 2049 or direct line 09/208809 or medicalhouse@ndu.edu.lb or pass by the Medical House.
DEPARTMENT OF STUDENT LIFE

Attendance Policy
Students should attend all classes and laboratory sessions on time. Absences, whether authorized or not, even if below the maximum number (specified below), may alter one’s grade substantially. The Office of Student Affairs alone authorizes absences. No absence absolves a student from responsibility regarding the material presented during his/her absence. The maximum number of absences permitted in classes that meet on MWF is six; the maximum number of absences permitted in classes that meet on TTH and in the summer is four. Any student whose absences exceed the maximum limit shall automatically be considered as having failed the course unless the student withdraws.

The Student Life Office follows up with the students who are facing attendance problems and investigates every case closely and accurately under the Dean’s supervision.

Students who miss classes or exams should contact the University physician, Dr. Elias Chemaly, within 48 hours of their sickness. The NDU physician should examine each student before deciding whether a medical report should be given or not. The Office of Student Affairs will not issue any excuse without the approval of the NDU physician.

Dr. Elias Chemaly, M.D. (Tel. # 03.725559) is available from 12:00 until 14:00 hours at the Infirmary, Office of Student Affairs.

Tutoring Program
The Student Life Office also assists in managing the Office of Student Affairs Tutoring Program in coordination with the Financial Aid Office.

International Student Services
The international Student Services provides support for international students at NDU and assistance in whatever they may need. It also helps them to integrate into the NDU community, specifically with other students. International students are urged to pass by the Office of Student Affairs upon arrival and on a regular basis.

E-mail: sao@ndu.edu.lb

STUDENT HOUSING
The Student Housing facility provided by Notre Dame University-Louaize is a student service dormitory located in the university premises.

The Student Housing facility offers a safe, well-maintained, and reasonably priced residence for eligible NDU students. They might be coming from abroad or residing in a remote area.

Mission Statement
The NDU Student Housing facilities aim at providing and promoting a living environment that is conducive to learning and that encourages residents to use all the available housing resources needed to pursue their education at NDU. In line with the university’s mission, the Student Housing facilities promote diversity, respect for human dignity and rights, and concern for the common good.
**Reservations**

Applications for on-campus housing are made through the Student Housing Office-Office of Student Affairs. Students and their parents/guardians are asked to pass by the Student Housing Office, to be informed about the rules and regulations and visit the housing facility. Student Housing's charges appear on the statement of fees issued to the student by the Business Office.

E-mail: studenthousing@ndu.edu.lb

**DEPARTMENT OF ATHLETICS**

NDU’s athletics programs are designed to offer students the opportunity to fully develop their physical potential and competitive spirit while engaging in a sports activity for fun and for health reasons.

NDU’s Sports Office provides a wide range of sports activities including: Basketball, Volleyball, Judo, Taekwondo, Aikido, Physical Fitness, Body Building, Tennis, Swimming, Soccer, Handball, Rugby, Track and Field, Water-Polo, Table Tennis, Chess, etc.

NDU’s athletic teams are trained by qualified coaches and participate in local, regional, and overseas tournaments earning recognition for themselves and the University.

A multipurpose gym for fitness, martial arts, body building, and dancing is situated under the tennis courts. It opens on weekdays from 12:00 p.m. till 8:00 p.m.

For more information please contact the NDU number (09/208000) then ext: 2563 or sportdep@ndu.edu.lb.

**DEPARTMENT OF STUDENTS ACTIVITIES**

One way for students to be more involved in life on campus is through participation in extracurricular activities by being active members in clubs and societies. For a club to be recognized, its purpose must be consistent with the stated University Bylaws and must have a full-time faculty member as an advisor. The Department of Students

Activities also assists students and clubs in organizing public events on Campus. The following student clubs and societies are established at the beginning of every academic year to provide recreational and co-curricular activities:

**Clubs and Societies**

- Accounting
- Advertising
- ASHRAE
- ASME
- Astronomy
- Awareness Society
- Chabab Loubnan
- Debate
- Discovery
- E Sports
- EWB
- Green
- Hospitality, Tourism and Events
The Department of Community Service and Awareness at Notre Dame University-Louaize (NDU) aims at providing students with opportunities to be civically engaged by working with Non-Profit Organizations (NGOs) and bringing together students with diverse talents and educational backgrounds to plan, adopt, and complete projects while maintaining sustainability in the relationship between the Department of Community Service and Awareness and NGOs.

The Department of Community Service and Awareness aims to help the students in optimizing their potentials and instilling in them a spirit of responsibility and moral awareness.

Through this, the students will be able to transmit their shared experience to their communities, families, and country.

To volunteer contact: cso@ndu.edu.lb

**DEPARTMENT OF CAREER AND PLACEMENT**

Placement services

The Placement Services provide NDU students and alumni with employment opportunities by acting as a liaison between graduates and a growing network of local, regional, and multinational companies.

The Office makes every effort to ensure that eligible students and alumni are given job opportunities that best suit their needs and potentials by providing them with online access to job listings through which they can search for full-time or part-time employment.
In addition, the Office also organizes an annual Job Fair, which gathers leading companies operating locally, regionally, and internationally.

Moreover, the Office conducts meetings for students and alumni relating to interview skills and building CVs and job search techniques as well as organizing workshops, seminars, and presentations on topics focused on the job market, job vacancies, career development, etc.

The Office also schedules and provides support for on-campus interviews with employers and conducts mock interviews.

**Internship services**
The Internship Services provide students with practical experience in their major before graduation. For this purpose, the Internship Services is building a contact database in and outside Lebanon with leading reputable institutions, companies, embassies, and banks, among others.

The internships offered are intended to provide real-life experience that complements the curricula taught in the classroom. Personal and professional growth is fostered through the proper balance of guidance, independence and the acceptance of responsibility. Internships frequently open the doors to future employment and confirm career plans; and in certain cases, internships may prompt students to consider other career options.

**STUDENT UNION (SU)**
The Student Union is the elected body representing students. Its purpose is to speak on behalf of the students, defend their rights within the framework of the University Rules and Regulations in compliance with the SU Bylaws, and organize events that cater to the student body at large.
FAAD ACADEMIC SUPPORT FACILITIES

FAAD studios are designed to meet the various needs of Architecture, Art and Design programs. The studios are furnished with professional drafting tables and are appropriately equipped to provide support to all Architecture, Design and Fine Art courses.

MAC Computer Laboratory
Graphic Design and Fashion Design students have access to the up-dated Mac Computer Laboratory and the latest softwares to facilitate their performance.

Photography Laboratory
The Photography Laboratory is a place where Architecture, Design, and Art students, as well as other disciplines at NDU, learn how to capture still images, develop, print, and experiment with the techniques of digital and analog photography. The studios are professionally designed and equipped with the latest technology and darkrooms for experimented analog prints to provide hands-on learning experience and optimal working conditions under the supervision of qualified instructors.

Dorothy Salhab Kazemi - Ceramic Workshop
This Ceramic Atelier is equipped with two kilns and several wheel tables. Students can enjoy manual work with clay (slab, coil building, throwing, etc), and clay enamels powder glazing. The Ceramic Atelier has a terrace, overlooking pine trees.

Metal and Wood Workshop
The Metal and Wood Workshop has the necessary tools that will help Architecture, Interior Design, Graphic Design, and Fashion Design students in the creative process of their works. Its main purpose is to create a tangible approach to the methodologies of teaching between the theoretical and applied.

Silk Screen Printing Workshop
The Silk Screen Printing Workshop is equipped with the necessary tools that will help mainly Graphic Design students in the hands-on process of their work. Its main purpose is to create a tangible approach between the theoretical and applied methodologies of teaching. A movable types printing facility is also available in the same workshop.

Smart Rooms
Within FAAD premises, 23 classrooms are equipped with Active Boards Touch, and another 12 have LCD projectors.

Architecture Computer Workshop
Two Computer Workshops have been set up for the Architecture and Interior Design students; located within the Architecture studios. Both workshop are equipped with facilities, including 15 computers, an LCD projector and related projection screen. Each computer contains the latest versions of graphic software, in addition to Ecotect.

Design Computer Workshop
Two fully equipped computer workshops have been developed in proximity to the studios for Graphic Design and Fashion design students. Both equipped with room facilities, including 19 G4 Macintosh computers. Each computer contains the latest versions of graphic software.
Fashion Design Studio
The Fashion Design facilities consist of three studios, one studio with mannequins and large patternmaking tables, adjacent is a sewing studio with professional steam iron and sewing machines. Furthermore, a Macintosh computer workshop is set-up to ensure a professional studio setting of digital illustration and pattermaking skills and hands-on execution. Students also have access to a catwalk installation and will produce fashion shows of their creations.

Music Department Facilities
The Music Department facility consists of three repetition halls equipped with projection facility and a piano, and 6 small practice rooms for a one-to-one music instrumentation practice. The halls and rooms are all acoustically isolated and outfitted with the most updated sound system.

WRITING CENTER
The Writing Center hosted by the FH, NDU’s Writing Center helps improve students’ academic skills in English. The Center is open to all students and is staffed with experienced instructors from the Department of English and Translation. The center offers workshops on topics, ranging from effective writing techniques and time management to tips on avoiding plagiarism.

Students benefit from the writing center by scheduling a 30-minute appointment with an instructor to discuss a written assignment. Open daily, students can drop by in person or request an appointment by contacting the Center.

The Interpretation Laboratory
The Interpretation Laboratory at the FH serves students specializing in interpreting within the program of Translation. Newly refurbished in 2015, the lab is equipped with state-of-the-art equipment and interpretation booths for continuous student practice and simulation. Students listen, interpret, and record their voices using digital software for further instructor-provided feedback and analysis.

ENGINEERING LABORATORIES
Engineering programs are supported by state-of-the-art laboratories open to all engineering students. These laboratories and workshops are managed by qualified and dedicated staff.

The Department of Civil and Environmental Engineering offers various laboratory courses to cover the main topics in the fields of concrete and pavement design, environmental engineering, mechanics of materials, soil mechanics, hydraulics, field surveying, geophysical and engineering graphics.

The lab equipment are continuously upgraded and updated to ensure that our students are exposed to the most recent and advanced systems. The department also secures highly accurate and professional testing facilities such as spectrophotometry, strain gauging, triaxial testing, open and closed channel flow measurements, and total station applications. Most of the lab facilities are connected to data acquisition systems. In addition, field equipment are available for in-situ testing, such as soil investigation, groundwater and
surface water testing, and concrete quality control. Professional commercial testing as well as community services are also performed on a regular basis in the above areas. The Department of Electrical, Computer and Communication Engineering has several laboratories, which support teaching in the areas of communication systems, electronic circuit design, including microprocessors and programmable logic controllers, instrumentation, electric machines, power electronics, control systems, and digital signal processing. The laboratories are also used by students for executing their engineering project designs. The equipment are regularly updated to ensure that students are exposed to the best possible laboratory experience.

State-of-the-art laboratory equipment are being used in the Department of Mechanical Engineering for training purposes. The list includes a large wind tunnel for aerodynamics testing, energy testing facilities (solar systems, combustion, etc.), turbomachinery testing systems (pumps, fans, Pelton wheel, turbines, etc.), air-conditioning testing units (heating, cooling, refrigeration, etc.), mechatronics and instrumentation equipment, mechanical vibration benches, and mechanical components and systems. A full workshop made of a set of machine-tools, including a CNC machine, is used for student training and regular machining needs. The laboratories are constantly maintained and updated to integrate new concepts, and to keep up with advancements in different mechanical engineering fields.

**SCIENCE LABORATORIES**

**Biology Lab**
The Biology Laboratory is equipped with many facilities, which support teaching and research across the biology curriculum. Disciplines supported include:

- Microbiology: Culture and analysis of viral, bacterial and parasitic species;
- Molecular biology: DNA purification, analysis, and manipulation, with preliminary PCR facilities for DNA amplification. Other available equipment such as an electroporator, promote research studies that require electrotransformation or transfection of cells;
- Cell culture: Preparation, culture and cryopreservation of animal cells;
- Plant biology: Plant cell culture and analysis;
- Histology: Histological assessment and histopathological examination of tissue samples.

Available equipment include microscopes (including a laser scanning microscope) and photomicrographic systems, biological safety cabinets, incubators, liquid nitrogen containers, diurnal growth chamber, autoclave, centrifuges, ovens, microtome, paraffin histoembedder, electrophoresis and blotting apparatus, thermal cycler (RT-PCR), flowcytometer, Rodent tail cuff blood pressure system, chromatography systems, in addition to an animal house, green house, and herbarium facilities.

**Chemistry Lab**
The Chemistry Laboratory provides a wide variety of facilities to support chemistry students and faculty members’ research and teaching. Students are introduced to the fundamental quantitative, organic, and food analysis experimental methods through experiments in:

- Chromatographic analysis of alcohol content in beverages;
- Determination of nutrients, vitamins, and minerals in foods;
• Properties of enzymes;
• Browning reactions in foods;
• Spectrophotometric determination of analytes in different sample types;
• Water analysis;
• Precipitation and complexation titrations.

In addition, an analytical unit houses a number of modern equipment such as UHPLC, GC/GCMS, FTIR, AA, etc., gas chromatograph, UV-visible spectrophotometers, digestion-distillation unit for nitrogen determination, solvent extraction apparatus, digital densimeter, electronic refractometer, pH meters, ion-selective electrodes, etc.

Geology Lab
Geology Laboratory courses are held in the Sciences Lab building and are supported by a varied collection of rock-forming minerals, including silicates, carbonates, sulfates, fluorides, and oxides, as well as a core collection of igneous, sedimentary, and metamorphic rocks. Additional teaching support of sample specimens is provided by the Stone Wing Museum, which houses a rich collection of minerals and archaeological items from Lebanon.

Physics Lab
The Physics Laboratory at NDU is a state-of-the-art teaching laboratory offering computer controlled data acquisition and analysis as well as interesting experiments covering a wide range of topics in physics. Experimental work goes hand in hand with the theoretical physics courses at NDU. The physics lab is well equipped to allow students to perform experiments that will help them understand the physical phenomena covered in the classroom. In many cases, the experiments follow closely the lecture courses leading to a better understanding of the physics.

Moussa and Farid Raphael Observatory
NDU has an on-campus observatory that contains a 60cm telescope equipped with a set of research-grade equipment consisting of CCD cameras, filters, and spectrograph. It is the most well-equipped observatory in the Arab countries and its telescope is the largest in the Arab Middle East. The observatory is made possible by a generous donation from His Excellency Ambassador Gilbert Chaghoury.

Meteorological Station
The Department of Sciences houses a meteorological station that provides climatic data for the Keserwan area. This station is supported by the L.A.R.I. society.

Tutoring Center
The tutoring center helps the students in remedial, freshman, and sophomore in math, biology, physics and computer science.
OFFICE OF INFORMATION TECHNOLOGY
The Office of IT provides high-technology services and state-of-the-art innovative solutions while building and maintaining a robust, reliable, and secure framework of IT infrastructure and support, of applications and software development, of network and security, and e-learning.

Goal for Faculty
Provide stronger links with faculty members in order to promote and facilitate their use of technology to support teaching and learning.

Goal for Students
Ensure that students have the necessary skills to take advantage of NDU’s technological environment.

Goal for Staff
Provide staff members with the necessary technological tools that are current and reliable, so they can serve the NDU community effectively.

Equipment and Facilities
The administrative Computer Center is equipped with enterprise servers used for the Registrar, Library, and various Business and Administration applications, using the latest Data Base technologies.

For academic purposes, SUN and IBM Mini computers, Terminals, and X-Stations, operating under Unix, are used by Computer Science and Engineering students. A set of servers, operating under Unix, control the campus Internet and Intranet networks.

All Faculties have active computers running various platforms such as PC/Windows, PC/Linux, Sun/Solaris, and IBM/AIX. Unix workstations and Windows 2000 operating systems have transparent access to the Servers, and to one another through Network File System and Remote File System access.

The Main Campus Intranet is a fully interconnected, multimedia, multi-protocol infrastructure spanning well over 1 km of area networks and over 800 computers on the network. The new network is a routed, full duplex, fiber based, Gigabyte Ethernet backbone with Gigabyte Ethernet (1000 Mbps) links to all the major buildings. Network connection in offices and rooms are at 100 Mbps switched Ethernet.

A PowerPC and Macintosh network is connected to a variety of peripherals, and are available for Visual Arts students including: color laser printers, scanners and plotters.

Special classrooms are linked to the backbone network via communication lines and have local resources to allow the instructor an indoor on-line demonstration with illustrative materials projected during class hours. Students are required to put into practice the theoretical concepts and gain working knowledge during regular laboratory sessions scheduled individually for each course.
DIVISION OF AUDIO VISUAL ARTS
The Division of Audio Visual Arts at NDU is a unit that handles all academic and technical audio-video matters related to students majoring in communication arts, advertising, and music in order for them to execute their projects assisted by their academic instructors and professionals in the field.

The facilities include: Radio Studio, TV Studio, Acting Studio, Editing suits, Computer/Sound Lab, Projection Room and News Room, Theater Issam Fares, Conference Hall Pierre Abou Khater Auditorium, Friends Hall, Exhibition Hall, Exam Halls, NDU Choir Recording Unit.

All facilities are “high-tech” and fully equipped, and are at the service of students, staff, and faculty members.

Smart Rooms
The DAVA has four Smart Rooms that are fully equipped with computer hardware and software, LCD projector, DVD and Data players, and surround sound systems for film screenings.

DVD Library
The DVD Library includes more than 1,500 DVDs (films, documentaries, series, and others). All members of the NDU community may check out these films.

DIVISION OF CONTINUING EDUCATION
The Division of Continuing Education (DCE) provides learning opportunities for individuals who want to develop their knowledge and skills without enrolling in regular academic programs.
The courses given by the DCE are administered in the afternoon, each for a period of six weeks.
The following are the various programs offered by the DCE:

Business Certificates
Business Management
Business Marketing
Business Accounting
Banking & Finance
Human Resources Management
Entrepreneurship

Computer Certificates
Computer Applications & Office System
Computer Engineering & Architectural Production
Desktop Publishing
Website Design
Multimedia Production
TV-Production & Motion Graphics
English Language
Proficiency in English
English for Bankers
English for Business
Spoken English
Public Speaking

Other Programs

Certification Programs
CMA: Certified Management Accountant
CPA: Certified Public Accountant
CFA: Chartered Financial Accountant

Executive Training Program
LMI: Leadership Management International
AIF: Applied Investment Finance

Arts and Crafts
Drawing and Painting
Lace Embroidery
Cooking and Decoration
Ceramics

University Preparatory Programs
SAT I; SAT II; TOEFL; EET; GMAT

FACULTY OF ARCHITECTURE, ART AND DESIGN (FAAD)

Professors: Kesrouani, Elias (Fr.); Haddad, Robert

Associate Professors: El Asmar, Jean-Pierre; Melki, Habib; Younes, Farid

Assistant Professors: Baroud, Dina; Beyrouti, Lola; Bechara, André; Bou Jaoudeh Khoury, Karen; Chartouni, Joseph; Daghfal, Graziella; Kortbawi, John; El Hage, Gabriel; Gabriel, Nicolas; Hindi, Nadine; Kassab, Maroun; Mady, Christine; Mansour, Wissam; Matta, Nadim; Mitri, Richard; Nasr, Noel; Soghman, Jacqueline; Zaccour, Danielle; Zgheib, Hani

Lecturers: Akl, Salim; Baroud, Janine; Bteich, Chadi; Challita, Carol; Chamoun, Claudine; Daher, Bassam; Hawi, Elie; Jabbour, Layla; Lawoun, Dolcy Majdalani; Roula; Melhem, Wissam; Mouawad, Paul; Samra, Kristine; Shebaby, Rina; Tannous, Charbel

Lab Instructor: Akl, Charbel;
FACULTY OF ARCHITECTURE, ART AND DESIGN (FAAD)

FACULTY PROFILE
In September 1987, NDU started its ‘Visual Arts’ programs with the Faculty of Humanities. As of September 1994, the Faculty of Engineering and Architecture, was founded. In September 1999, the Faculty of Architecture, Art and Design (FAAD) was founded. FAAD has evolved from two different Departments, Visual Arts and Architecture into a unique, growing and independent Faculty housing four Departments with their respective and varied undergraduate and graduate majors.

In Fall 2001 the Graphic and Interior Design majors were offered in the North Lebanon Campus (NLC) campus. In Fall 2002, the graphic design major started to be offered in the Shouf Campus (SC). In 2010 the Architecture department started accepting students in the NLC and SC.

FAAD now comprises four departments with an enrollment of 1389 students enrolled (Spring 2015) in its three branches (Main, NLC, and SLC).

At present, the Faculty awards various degrees in a range of disciplines at both the undergraduate and graduate levels.

MISSION, VISION, AND VALUES

Mission
The Faculty of Architecture, Arts, and Design (FAAD) strives at promoting an academic milieu, for students from Lebanon and abroad, where design, arts, and architecture are the vectors of NDU’s values. The range of programs offered by the various departments of FAAD is devised to foster an environment of intellectual inquisitiveness. Based on the American Liberal Arts system, FAAD will prepare its offspring (Musicians, Interior Designers, Graphic Designers, Fine Artists, Photographers, Fashion Designers, and Architects) to be the standard-bearers of NDU’s moral, social, and academic values.

Vision
The Faculty will strive to be the leading provider of professional programs in Arts and Design, and will deliver outstanding education/training programs and provide opportunities to develop high levels of creative ambitions and technical skills to enable students to play a dynamic role in continuing development. Students will learn to challenge conventional wisdom from an informed and constructive position and be encouraged to engage in self-directed approaches to the acquisition of knowledge and understanding. Supporting faculty members’ involvement in research, professional practice, development of teaching and learning methodology are a must in order to establish a more scholarly and professional environment.

Values
Educating our students to build their future does not solely rely on us providing them with the technical tools and learning material to pursue a career; on the contrary, we pride ourselves in providing guidance to help individuals discover their own vision and thus become both professional and responsible.
On-campus interaction between NDU - FAAD faculty, staff, and students, is characterized by a mutual respect for long-held traditions as well as openness and acceptance of positive change and constructive criticism. One of our main values, is to foster a culturally diverse environment where everyone is treated according to their human values, regardless of religion, race, belief, or gender.

We encourage our students’ active involvement in environmental educational and social issues and support them in their quest to make a genuine and lasting difference in their surroundings.

Our faith is part of our identity; this is why we rely on open communication and full cooperation to insure that every one’s views and beliefs are respected at NDU in general and FAAD specifically. In order to maintain a healthy yet exciting learning environment while shaping principled individuals, we cherish these values as part of our educational identity and thus promote:

- Tolerance of all human beings regardless of background;
- Cooperation between all members of NDU to ensure personal and professional growth;
- Communication of views and beliefs within a positive and responsive environment;
- Diversity and cultural exchange devoid of prejudice and judgment.

GENERAL FACULTY LEARNING OBJECTIVES

The overall aim is to provide a comprehensive and flexible range of programs in response to the educational and professional needs of the local community, the region, national and international demand, and to secure the opportunity for personal and professional development in any of the following areas: Architecture, art, or design. In more specific terms:

- To help individuals develop their creative, intellectual, and technical abilities, and enhance their expertise to make an informed contribution to the cultural, technological, social, and economic needs of society in general;
- To foster fundamental learning and research skills coupled with an understanding of the historical, cultural, social, and commercial arena within which those engaged in architecture, arts, and design operate;
- To equip individuals for an array of career paths and changes in employment patterns, thus, promoting ingenuity, adaptability, and mobility;
- To enable students at all levels to deal flexibly with varied problems and tasks and technologies.
ACADEMIC DEPARTMENTS AND PROGRAMS

The following departments and programs constitute the Faculty of Architecture, Art and Design:

- Department of Architecture;
- Department of Design;
- Department of Music;
- Department of Arts.

Degrees

The Department of Architecture offers an undergraduate program leading to the degree of:
- Bachelor of Architecture (172 credits).

The Department of Design offers undergraduate programs leading to the degrees of:
- B.A. in Graphic Design (102 credits);
- B.A. in Interior Design (136 credits);
- B.A. in Fashion Design (102 credits);
- B.A. in Photography (102 credits).

And a graduate program leading to the degree of:
- Master of Arts in Design (36 credits).

And Minors in the following fields:
- Minor in Graphic Design (18 credits);
- Minor in Photography (18 credits).

The Department of Music offers undergraduate programs leading to the degree of:
- B.A. in Music and Musicology - Musicology (99 credits);
- B.A. in Music and Musicology - Music Education (99 credits);
- B.A. in Music and Musicology - Musimedianology (99 credits);
- B.A. in Music and Musicology - Arabic Musicology (99 credits);
- B.A. in Music and Musicology - Jazz Music (99 credits).

And a graduate program leading to the degree of:
- Master of Arts in Music (36 credits);
- And a minor in Jazz (15 credits).

The Department of Arts offers an undergraduate program leading to the degree of:
- B.A. in Decorative Arts and Crafts (102 credits).
POLICIES AND PROCEDURES

Admission Requirements:
In addition to the University admission requirements, prospective candidates must complete any remedial course(s) the first year of enrollment. Students who fail to meet these requirements will not be allowed to proceed to their bachelor degree in the Faculty of Architecture, Art and Design.

Liberal Arts Core Curriculum (LAC)
The LAC are distributed as follows:

Category I. English and Arabic Communication (9 credits)
A. English Communication (6 credits)
   ENL 213 Sophomore Rhetoric (3 credits).
   And
   ENL 230 English in the Workplace (3 credits)
   Or
   ENL 223 Communication Arts (3 credits)

B. Arabic Communication 3 credits (One from the following pool)
   ARB 211 Appreciation of Arabic Literature
   ARB 212 Applied Arabic Grammar
   ARB 224 Arabic Literature and Human Thought
   ARB 231 Technical Arabic
   ARB 306 The Modern Arabic Novel and Short Story
   ARB 310 Arabic Theater

Category II. Religion (3 credits)
REG 212 Religion and Social Issues
REG 213 Catholicism
REG 215 World Religions
REG 313 Maronite Faith and Cultural Heritage
REG 314 Marriage and Family in the Catholic Church

Category III. Ethics (3 credits)
COA 360 Media Ethics
ENG 310 Ethics in Engineering: Architecture Department
BAD 431 Business Ethics
CSC 203 Information Age and Ethics
ENS 205 Environment, Society and Ethics
PHL 311 Ethics and the Modern World: Design, Art and Music Department
POS 345 Ethics and Leadership
NUR 203 Introduction to Bioethics

Category IV. Citizenship (3 credits)
POS 201 Introduction to Political Science
POS 209 Citizenship
POS 210 Government and Politics of Lebanon
POS 319 Democracy and Human Rights
POS 240  Law and Society  
FQM 200  Food Security and Sustainability

**Category V. Cultural Studies and Social Science (6 credits) - Faculty Contributions**

A. Cultural Studies
- PHL 211  Logic and the Scientific Method
- PHL 232  Ancient World Philosophy
- PHL 333  Medieval World Philosophy
- PHL 334  Modern and Contemporary World Philosophy
- LIR 214  Introduction to Literary Genres
- LIR 217  American Literature to the End of the 19th Century
- LIR 305  Novel to the End of the 19th Century
- ARP 215  Cultural Themes in Lebanese Architecture
- FAP 215  Art and Culture
- MUS 210  Music Appreciation
- HIT 211  History of Lebanon
- PSL 225  Politics of Catholic Social Theory
- TTM 326  Domestic Travel and Tourism Development
- TTM 201  Introduction to Tourism & Hospitality Management
- NTR 215  Foods and Nutrition of World Cultures
- COA 315  World Cinema Survey
- COA 350  Current Issues

B. Social Science
- SOL 201  Introduction to Sociology
- SOL 316  Society and Women
- SOL 322  Family: Sociological Perspectives
- SOL 323  Society and Role of Global Intercultural Communication
- PSL 201  Introduction to Psychology
- BAD 201  Fundamentals of Management
- MRK 201  Fundamentals of Marketing
- ECN 211  Principles of Microeconomics
- ECN 212  Principles of Macroeconomics
- ENG 220  Engineering Innovation
- ENG 210  Introduction to Engineering Economy
- CSC 206  Games and Society

**Category VI. Applied and Life Sciences (6 credits) - Faculty Contributions**

A. Applied Science
- CSC 201  Computers and Their Use
- CSC 202  Computers for Visual Arts
- GIS 211  Principles of Geographical Information Sciences
- MIS 201  Management Information Systems
- MAT 202  Mathematics for Arts

B. Life and Natural Sciences
- BIO 201  Your Body in Action
- HEA 201  Health Awareness
- HEA 204  Contemporary Health Issues
- NTR 201  Basic Human Nutrition
CHM 211  Principles of Chemistry
AST 201  Discovering Astronomy
ENS 201  Introduction to Environmental Science
ENS 202  The Environment and Sustainable Development

CSC 201, CSC 202, MAT 201, and MAT 202 courses should not be taken by Architecture students.
DEPARTMENT OF ARCHITECTURE

Associate Professors: El Asmar, Jean-Pierre; Melki, Habib; Younes, Farid

Assistant Professors: Baroud, Dina; Bou Jaoudeh Khoury, Karen; Chartouni, Joseph; El Hage, Gabriel; Gabriel, Nicolas; Hindi, Nadine; Kassab, Maroun; Mady, Christine; Mansour, Wissam; Mitri, Richard; Zgheib, Hani

Lecturers: Bteich, Chady; Daher, Bassam; Hawi, Elie; Jabbour, Layla; Mouawad, Paul; Samra, Kristine; Tannous, Charbel

Lab Instructor: Akl, Charbel

The Degree of Bachelor of Architecture

Mission
The mission of the Bachelor of Architecture (B. Arch.) program is to train students to develop critical thinking through deep analysis of architectural history and theory, to increase awareness of environmental, urban, social, and cultural issues, and most importantly, to design, based on a process of research, analysis, and conceptual thinking that lead to innovative architectural applications.

Program Educational Objectives
The B. Arch. program offered by the Department of Architecture at the Faculty of Architecture, Art and Design (FAAD), aims at:

- Providing the learner with the proper exposure to enhance reflective approach to design and foster students’ critical thinking;
- Developing the intellectual and theoretical backgrounds of the students through the study of ancient, modern and contemporary history, and theories of architecture;
- Increasing student’s awareness with respect to environmental and social issues. This concern mainly focuses on the interrelated influence between the human being, society, and architecture;
- Contributing in building-up an architectural epistemology; and
- Preparing the learner for professional practice and post-graduate studies.

Program Learning Outcomes
Upon graduation, B. Arch. students will:

- Develop design and communication skills;
- Practice critical thinking in design research;
- Relate cultural and historical knowledge to architectural design;
- Integrate environmental, financial, and social concerns to conduct sustainable design approaches;
- Conduct comprehensive design approaches including technological and structural systems and assemblies;
- Implement design solutions related to safety, regulations, and accessibility standards;
- Manage design projects including various stakeholders;
- Appraise professionally and ethically the requirements of clients, the public, and other stakeholders; and
- Lead in supporting communities on projects to meet social needs in a collaborative manner.
Admission Requirements
In addition to the University admission requirements, prospective candidates must complete all remedial courses, Math and/or English, if any, during their first year at NDU. Students who fail to meet the above requirements will not be allowed to proceed to the degree courses in Architecture and other majors of the Faculty of Architecture, Art & Design.

Graduation Requirements
To obtain the degree of bachelor of architecture, a student must complete a total of 172 credits with an overall GPA of at least 2.0/4.0 and a minimum cumulative GPA of 2.3/4.0 in the Core and Major requirements.
In addition, all Core and major courses must be successfully completed with a minimum grade of “C-”.
In addition, all Architectural Design courses (ARP 222, ARP 232, ARP 311, ARP 322, ARP 433, ARP 444, ARP 555, ARP 556, ARP 590, ARP 591, and ARP 593) must be successfully completed with a minimum grade of “C+”.
Prior to enrolling into the ARP 590-Senior Study courses, student will have to fulfill the following requirements:

A minimum of 21 credits of their LACs must be completed prior to taking ARP 590.
Prerequisites: ARP 438, ARP 552, ARP 556, ARP 562, ARP 568.
Students must have a minimum of 2.3 (C+) GPA in their cumulative major courses.
Courses CSC 201, MAT 201 and MAT 202 are not allowed for Architecture students.
ENG 310 is obligatory for architecture students.

These 172 credits are divided into:

Degree Requirements (172 credits)

Liberal Arts Core Curriculum (LAC) 27 cr.

Core Requirements 3 cr.
FAP 211.

Major Requirements 136 cr.
ARP 221, ARP 222, ARP 223, ARP 224, ARP 225, ARP 226, ARP 232, ARP 233, ARP 301, ARP 311, ARP 313, ARP 316, ARP 317, ARP 322, ARP 324, ARP 325, ARP 327, ARP 328, ARP 424, ARP 426, ARP 433, ARP 434, ARP 435, ARP 438, ARP 444, ARP 446, ARP 551, ARP 552, ARP 553, ARP 554, ARP 555, ARP 556, ARP 557, ARP 561, ARP 562, ARP 563, ARP 568, ARP 590, ARP 592, ARP 594.

Choose one course from the following Major Electives I (3 cr.): ARP 564, ARP 565, ARP 566, ARP 567, ARP 568, ARP 569, ARP 571, ARP 572.

Choose two courses from the following Major Electives II (2 cr.): ARP 233, ARP 422, ARP 423, ARP 581, ARP 582, ARP 583, ARP 584, ARP 585, ARP 586.

Free Electives 6 cr.
ARP 215 Cultural Themes in Lebanese Architecture (3.0); 3 cr. Initiation to the Lebanese Art and Architecture pointing toward the conceptual determinants and constants omnipresent in the Lebanese Culture. A historical overview showing the morphological development through time.

ARP 216 Technical Drawing I (3.0); 3 cr. The course is a studio based course. It aims at the development of students’ graphic communication skills. Students will learn 2D as well as 3D techniques of drafting to describe objects of the man made and natural environment. The focus will be on survey of architecture, drafting to scale and rendering techniques, as well as professional sheet layout. Prerequisites: PHS 101 and MAT 112 (if required).

ARP 221 Architectural Sketching and Rendering (3.0); 3 cr. The aim is to develop abilities in observation of the physical environment in a methodical and analytical manner. The skills are to be obtained through free-hand sketching and sketch-measuring using different media. Prerequisites: FAP 211, ARP 226.

ARP 222 Principles of Architectural Design (3.0); 3 cr. It is a continuation of GDP 212 with an emphasis on applying three dimensional design principles on architectural settings. The dynamics of motion, light, form, and space are also explored via readings and workshops. Another major topic of this course is the Spatial Analysis of natural and man-made environment and their graphical representation through Bubble diagrams, Site and Area analysis, photography, etc. Prerequisites: PHS 101 and MAT 112 (if required).

ARP 223 Descriptive Geometry (3.0); 3 cr. Study of geometric projections in space. Emphasis on volumetric development, shade and shadow construction. Prerequisite: PHS 101, MAT 112 (if required).

ARP 224 Applied Architectural Design I (3.0); 3 cr. The application of computer aided design (CAD) concepts in developing and communicating architectural ideas and projects. Prerequisites: ARP 311.

ARP 225 Statics for Architecture (3.0); 3 cr. Study of forces, moments and couples; free body diagrams; shear and bending moment diagram; centroids; moments of inertia; problems involving beams, trusses, and frames. Prerequisites: MAT 112, MAT 213, PHS 101, ENL 105, ENL 110 (if required).

ARP 226 Technical Drawing I (3.0); 3 cr. The course is a studio based course. It aims at the development of students’ graphic communication skills. Students will learn 2D as well as 3D techniques of drafting to describe objects of the man made and natural environment. The focus will be on survey of architecture, drafting to scale and rendering techniques, as well as professional sheet layout. Prerequisites: PHS 101 and MAT 112 (if required).

ARP 227 Architectural Design Project (3.0); 3 cr. This is a continuation of ARP 226. The course will focus on the development of a design project in response to a client brief. Students will be required to develop a design solution that addresses the client’s needs and requirements. Prerequisites: ARP 226.

ARP 228 Architectural Graphics (3.0); 3 cr. The course covers the use of architectural graphic techniques to communicate design ideas. Students will learn how to create and present architectural designs using traditional and computer-aided methods. Prerequisites: ARP 226.

ARP 229 Architectural History (3.0); 3 cr. This course provides an overview of the history and development of architecture. Students will be introduced to key architectural movements, styles, and architects throughout history. Prerequisites: ARP 226.

ARP 230 Architectural Theory (3.0); 3 cr. This course explores the theoretical foundations of architecture, including the relationship between architecture and society, the environment, and the built environment. Prerequisites: ARP 226.

ARP 231 Architectural Drafting (3.0); 3 cr. The course covers the principles and techniques of architectural drafting. Students will learn how to create and present architectural designs using traditional and computer-aided methods. Prerequisites: ARP 226.

ARP 232 Methodology of Architectural Design (3.0); 3 cr. This course is a continuation of ARP 222, a design studio that covers methodologies used in architectural design, stressing on the different design processes, strategies through direct analysis/ readings of selected projects, and conceptualization and work on small architectural projects. Corequisite: ENL 213, MAT 213 (if required). Prerequisites: MAT 112, MAT 213, PHS 101, ENL 105, ENL 110 (if required), ARP 222.

ARP 233 3D Architectural Survey (2.0); 2 cr. The objective of this course is to help students understand deeply and experiment why and how to construct architectural models of different scale and different kinds of materials. Students will plan and do research on the use, detail, budget, and techniques before starting construction.

ARP 301 Technical Drawing II (3.0); 3 cr. A continuation of Technical Drawing I, with an emphasis on perspective as a powerful visualization tool for the Architect. The course covers the mechanical construction method same as One, Two and, Three vanishing points perspective. It also introduces the study of shadows (different light directions) and reflections in perspective.
projects, each in two phases, shall be more of residential, public, and administrative nature. **Prerequisites:** ARP 311.

**ARP 324 History of Architecture II (3.0); 3 cr.** The course covers the development of architecture in the Byzantine Age, Middle Ages in Western Europe, and Islamic Architecture in Eastern Europe and the Near East. The course is a continuation of the previous course in surveying important milestones in architecture history and theory. **Prerequisite:** ARP 313.

**ARP 325 Applied Architectural Design II (3.0) 3 cr.** The application of 3D studio VIZ creating complex 3D representations, rendering and animation. **Prerequisite:** ARP 224.

**ARP 327 Structural Analysis (3.0); 3 cr.** Analysis of structurally determinate and indeterminate structures; moving load structures, and approximate methods; modeling and analysis of structures; deflection of beams; discussion on real life examples. **Prerequisite:** ARP 316.

**ARP 328 Building Technology II (3.0); 3 cr.** Preliminary analysis and design consideration of building support systems to assist students in the execution project. The application of structural, safety codes, electrical and mechanical systems; lighting, water distribution, drainage, heating, ventilating, and air-conditioning (HVAC) are the systems included in this course. **Prerequisite:** ARP 317.

**ARP 422 Lighting Design and Electrical Systems (2.0); 2 cr.** Types of artificial light sources and the human eye. Production, measurement and control of light. Design of lighting systems. Electrical requirements and distribution in buildings and related execution problems. **Prerequisite:** ARP 328.

**ARP 423 Acoustics (2.0); 2 cr.** Analysis, design and detailing of acoustical factors influencing spaces and building design. **Prerequisite:** ARP 328.
ARP 424 Bio-climatic Architecture (3.0); 3 cr. Understanding of environmental aspects in Architectural Design and the focus on energy efficiency from the concept to the detailing stages concluded with market investigations that permit the evaluation and use of local materials. Prerequisites: ARP 328, ARP 433.

ARP 425 Architectural Practice (2.0); 2 cr. A supervised internship and lectures dealing with: business correspondence, building up the corporate image of the firm, dealing with tender bids and offers, duties, responsibilities, and fees of the different phases of a project. Prerequisites: ARP 328, ARP 552.

ARP 433 Architectural Design III (6.0); 6 cr. This course is a continuation of Architectural Design II introducing a design methodology that tackles contextual design, uses critical analysis and synthesis tools. The design application to deal with topography, applicable buildings laws, structural solutions and optimal parking designs. Proposed projects to be of an office, public service and mixed use typology with a focus on the later on residential architecture with a retail podium. Tools learned in previous courses to be applied along contextual, applicable laws and social factors. Prerequisites: ARP 224, ARP 313, ARP 322, ARP 328.

ARP 434 Electrical and Mechanical Systems (3.0); 3 cr. Preliminary analysis, estimation, and design consideration, of building electrical and mechanical systems, to assist students in the execution project. Electricity and lighting; water distribution; drainage; heating; ventilating; and air-conditioning (HVAC) are the systems included in this course. Prerequisite: ARP 328.

ARP 435 History of Architecture III (3.0); 3 cr. This course exposes the students to the pre-modern architecture, ranging from Renaissance to the 19th century industrial Architecture, discusses various factors of revivalism (Renaissance and other) and their outcome. It also paves way to the modern architecture. Prerequisite: ARP 324.

ARP 438 Reinforced Concrete Design (3.0); 3 cr. Behavior of reinforced concrete; ultimate strength design method; studying the concrete structural elements; design of beams for flexure and shear, one-way and introduction to two-way slabs, footings, and short columns. Analysis methods of concrete frames. Application design project of a multi-storey building. Prerequisite: ARP 327.

ARP 444 Architectural Design IV (6.0); 6 cr. This course is a continuation of the precedent Architectural Design courses, with an emphasis on the implementation of the Lebanese building codes and regulations on complex architectural settings in urban contexts. Three projects, each in two phases, shall be more of residential, public, and administrative nature. The latter will be the outcome of applying the building rules and regulations while dealing with the imperatives of the immediate urban surrounding. Prerequisites: ARP 224, ARP 433.

ARP 446 History of Architecture IV (3.0); 3 cr. This course exposes the student to modern and contemporary architecture: from the school of Chicago, passing through the various European and American modern architectural approaches, until the 21st century architecture. Prerequisite: ARP 435.

ARP 551 Construction Detailing Studio I (3.0); 3 cr. This course is meant to acquaint the student with the elaboration of professional construction document of architectural projects, and the adaptation of standard construction details to various architectural contexts. Prerequisites: ARP 224, ARP 328, ARP 311.

ARP 552 Construction Detailing Studio II (3.0); 3 cr. A continuation of Construction Detailing Studio I, with an emphasis on detail problem solving. Students are expected to develop further their architectural designs to reach the final stage of construction documents. Prerequisite: ARP 551.
ARP 553 Specifications and Quantity Surveying (3.0); 3 cr. Specifications and tender documents writing. The sources and the methods of classification for subsequent use. Practice projects. Prerequisite: ARP 551.

ARP 454 Surveying and Field Surveying (3.0); 3 cr. Surveying and instrumentation; introduction to optical, photographical, mathematical, and geometrical principles relevant to photogrammetry and remote sensing; introduction to global positioning system. Field plane surveying; topographic mapping; location survey and route surveying. Prerequisites: ARP 311, ARP 328.

ARP 555 Architectural Design V (6.0); 6 cr. This course is a continuation of Architectural Design IV, having greater emphasis on complex aspects of the built environment, mainly tackling larger scale projects with a considerable impact on their urban environment. Stress is given to the process, starting with site analysis leading to conceptual approach, followed by programming and massing, ending with architectural design implementation, while managing both cohesion and heterogeneity within an existing urban setting. Prerequisites: ARP 444, ARP 551.

ARP 556 Architectural Design VI (6.0); 6 cr. This course is a continuation of Architectural Design V having a further focus on the built environment. Analysis and synthesis of an urban area selected for its problematic issues. The course encourages students to develop urban modeling techniques/approaches and to understand the existing relationship between architectural and urban scales and spaces. Proposed projects and related programs will result from analysis/synthesis. Standards, new technologies, environmental, and social factors learned in previous courses are applied. Corequisite: ARP 552. Prerequisites: ARP 555, ARP 561, ARP 563.

ARP 557 Architectural Theories (3.0); 3 cr. Survey of architectural theories as stated by architects, historians, and architectural critics. The main objectives of this course are to have a global view on the different schools of thought in architecture and to heighten the student’s awareness of the various interpretations of the architectural paradigm as well as to the evolution of theories in architecture; Prerequisite: ARP 446.

ARP 561 Urbanism I (3.0); 3 cr. A survey of urban morphology in terms of characteristic phases of development with emphasis on environmental, cultural and economic factors governing urban growth. Prerequisite: ARP 444.

ARP 562 Urbanism II (3.0); 3 cr. A survey of different basic approaches to urban and city planning present and past. A comprehensive and critical survey of urban planning in Lebanon. Prerequisite: ARP 561.

ARP 563 Building Rules and Regulations (3.0); 3 cr. Professional code of ethics for the practice of the profession. The moral and legal responsibilities of the architect towards the executed project and concerned parties. A survey of construction building codes and a study of the Lebanese construction laws. (taught in Arabic). Prerequisite: ARP 311.

ARP 564 Restoration of Monuments (3.0); 3 cr. The purpose of this course is to prepare the students for restoration projects, having professional characteristics, on a building which will be freely chosen by themselves. Prerequisites: ARP 226, ARP 435.

ARP 565 Landscape Architecture (3.0); 3 cr. Theory and principles of design and problem solving processes as applied to fundamentals of design form in the landscape. Prerequisites: ARP 226, ARP 446.

ARP 566 Basic Industrial Design (3.0); 3 cr. Introduction to the theories, methods and practices of industrial design with primary emphasis on basic visual language and visual encoding practices. Prerequisite: ARP 226.
ARP 567 Archaeology (3.0); 3 cr. Studying the cultural heritage and rediscovering human experience since its origin to the present. It focuses on the archaeology of Lebanon: Its history, artifact recording or ethnographic data, composition and description. Prerequisites: ARP 226, ARP 435.

ARP 568 Social Architecture (3.0); 3 cr. The course aims at initiating students to the research in sociology; to give a comprehensive overview of the contribution of the behavioral sciences to architectural theory; to present generalizations on what the built environment affords people and a set of concepts for understanding the relationship between architecture and human behavior. Prerequisite: ARP 446.

ARP 569 Project Planning and Management (3.0); 3 cr. This course focuses on providing an overall understanding of the project development. The course tackles: Theoretical frameworks and tools; quantitative methods and process used in analyzing project investment decisions; case studies. Project scope definition, phasing, scheduling, and control method. Prerequisite: ARP 552.

ARP 571 Seminar III (3.0); 3 cr. Lectures and conferences held by visiting instructors. Prerequisite: ARP 433.

ARP 572 Seminar IV (3.0); 3 cr. Lectures and conferences held by visiting instructors. Prerequisite: ARP 433.

ARP 581 Seminar I (2.0); 2 cr. Lectures and conferences held by visiting instructors. Prerequisite: ARP 433.

ARP 582 Seminar II (2.0); 2 cr. Lectures and conferences held by visiting instructors. Prerequisite: ARP 433.

ARP 583 Design Theory (2.0); 2 cr. Some recent examples include virtual and dynamic environments. The architecture of professional architects housing and modernity, 20th Century Design. Prerequisite: ARP 433.

ARP 584 Topics in Oriental Architecture (2.0); 2 cr. Analysis of theoretical, culture and historical determinants as they may be applied to a select array of oriental architects and buildings. Prerequisite: ARP 433.

ARP 585 Topics in Japanese Architecture (2.0); 2 cr. Analysis of theoretical, culture and historical determinants as they may be applied to a select array of Japanese architects and buildings. Prerequisite: ARP 433.

ARP 586 Topics in Lebanese Architecture (2.0); 2 cr. Analysis of theoretical, culture and historical determinants as they may be applied to a select array of Lebanese architects and buildings. Prerequisite: ARP 433.

ARP 590 Senior Study (2.0); 2 cr. An introduction to the senior design courses that allows students to choose and justify their final senior project. Prerequisites: ARP 552, ARP 554, ARP 556, ARP 557, ARP 438, ARP 562.

ARP 592 Senior Project I (0.4); 4 cr. The course involves a research that includes a theoretical and philosophical thought defining the problematic situational aspect of the theme and the aim; specifying the hypothesis/concepts and justifying the raison d’être of the project. In respect to the theoretical thought, the conceptualization and “operationalization” of the hypothesis into concepts, dimensions and indicators, leads to the embryonic aspect of the proposed project. Prerequisite: ARP 590.

ARP 594 Senior Study II (0.4); 4 cr. This Final senior course proposes a complete and comprehensive development of the project in which the relevance to the thesis presented in Senior Project-I should be demonstrated graphically. A complete set of drawings models, photographs, and recordings must be finalized by the student under the supervision of an advisor and collaborators. Prerequisite: ARP 592.
DEPARTMENT OF DESIGN

Professor: Haddad, Robert

Assistant Professors: Bechara, André; Daghfal, Graziella; Kortbawi, John; Matta, Nadim; Nasr, Noel; Soghman, Jacqueline; Zaccour, Danielle

Lecturers: Akl, Salim; Baroud, Janine; Challita, Carol; Chamoun, Claudine; Majdalani, Roula; Melhem, Wissam; Shebaby, Rina

Goals
The Department of Design provides an undergraduate degree which stresses the educational needs of a professional designer in a comprehensive and flexible manner.

The Department of Design actively contributes to the University as well as to local, national, and international industries through its scholarly and creative activities, educational programs, and service efforts.

The B.A. programs offered by the Department of Design will enable students to:
- Communicate as professional designers with clients, audience and industries, utilizing various forms of messages while maintaining personal and professional integrity;
- Critically assess designs through research and reflection while respecting both moral and ethical issues in cultural and social contexts of local, regional or global environments;
- Embrace the dynamic design process that reflects creativity in producing innovative and effective solutions;
- Understand and respond to a client’s needs by following a design process which analyzes a problem, proposes a hypothesis and synthesizes relevant findings before designing possible solutions;
- Demonstrate flexibility while applying various theories from historical movements or schools of thought to support the generation of conceptual and contextual solutions.

Degrees
The Department of Design is currently offering four undergraduate degrees:
- Bachelor of Arts in Graphic Design;
- Bachelor of Arts in Interior Design;
- Bachelor of Arts in Fashion Design;
- Bachelor of Arts in Photography.

The Department of Design offers a graduate degree:
- Master of Arts in Design.

And Minors in:
- Photography;
- Graphic Design.
The Degree of Bachelor of Arts in Graphic Design

Program Description
Graphic Design is a creative and analytical process that integrates design and technology to communicate ideas and information from a client to an audience. The primary goal of the Graphic Design curriculum is to educate students to become innovators and leaders in print and screen related areas of professional practice.

Furthermore, the Graphic Design program encourages exploration through problem solving methodologies, innovative investigations, and creative research in all forms of communication. The program is dedicated to excellence in teaching, academic and creative research and professional practice.

The B.A. program aims to educate graphic designers through focusing on creative and intellectual thinking, awareness of individual, social and cultural issues in a global context, the integration of new technology and the concern for ethical implications and the natural environment.

The Bachelor of Arts Degree in Graphic Design is a 3-year full-time program of 102 credits.

Mission
The mission of the Bachelor of Arts (B.A.) in Graphic Design program is to train students to acquire creative and analytical processes that integrate Design and technology, to communicate ideas and information from a client to an audience, and to become innovators and leaders in print and screen related areas of professional practice. The Graphic Design program, furthermore, encourages exploration through problem-solving methodologies, innovative investigations, and creative research in all forms of communication. The program is dedicated to excellence in teaching, academic and creative research, and professional practice by focusing on creative and intellectual thinking, awareness of individual, social and cultural issues in a global context, the integration of new technology and the concern for ethical implications and the natural environment.

Program Educational Objectives
The B.A. in Graphic Design program offered by the Department of Design at the Faculty of Architecture, Art and Design (FAAD), aims at:

- Providing the learner with the proper exposure to enhance reflective approach to design and foster critical thinking;
- Developing the intellectual and theoretical backgrounds of the students through the study of modern and contemporary history and theories of Graphic Design;
- Increasing student’s awareness with respect to social issues, cultural and global themes, and awareness of the individual; and
- Preparing the learner for professional practice.

Program Learning Outcomes
Graphic Design graduates will:

- Develop design and communication skills;
- Practice critical thinking in design research;
- Relate cultural and historical knowledge to problem-solving;
- Implement design solutions related to client needs and social issues;
- Manage design projects including various variables; and
• Appraise professionally and ethically the requirements of clients and the project.

**Graduation Requirements**
To receive the degree of Bachelor of Arts in Graphic Design, a student must complete a total of 102 credits with an overall GPA of at least 2.0/4.0 and a minimum cumulative GPA of 2.3/4.0 in all Core and Major Courses. All major courses with a grade of less than “C-” must be repeated. The 102 credits necessary for graduation are divided as follows:

### Degree Requirements (102 credits)

**Liberal Arts Core Curriculum (LAC)**
- 27 cr.

**Core Requirements**
- 9 cr.
  - FAP 211, GDP 212, FAP 221.

**Major Requirements**
- 60 cr.

**Free Electives**
- 6 cr.
Minor in Graphic Design (18 credits)

The focus is on Typography in Graphic Design, students will develop a critical eye, and demonstrate proficiency in applying “type” to express clear and legible communication for different media. Students are qualified to manage a design project, and prepare and supervise for final production hereby enabling them to have additional work possibilities. The Minor can be taken by all except Graphic Design students; the only prerequisite is prior knowledge of Photoshop.

The courses are carefully chosen from the major to order for the students to arrive at a sufficient level of skills that allow them to actually produce design projects in print; therefore there are no electives.

In order to challenge the students, two courses with strong conceptual and creative process’ are included: GDP 321 Visual Communication and GDP 415 Branding for Graphic Design.

Career Opportunities
Students can work in the fields of Advertising Agencies, Design Studios, Production Houses, and Printing Presses and Webdesign Houses as Visual Communicators.
Undergraduate Courses: Graphic Design

**GDP 212 Design Principles I (3.0); 3 cr.** Various design elements are introduced such as line, shape, plane, texture, color, style and composition. The students are encouraged to be creative and develop individual style.

**GDP 217 Conceptual Communication in Digital Media (3.0); 3 cr.** Students will learn the process of generating creative ideas, and apply principles of design to conceptual communication. In parallel, students are introduced to the fundamental tools to produce vector and raster-based graphics through the use of latest software for graphic production. Projects and assignments will focus on the exploration of concepts, and implementation through digital media. Corequisite: GDP 212.

**GDP 222 Design Principles II (3.0); 3 cr.** Relations between 3-D structure and space are explored analytically and synthetically. Students will investigate a given subject; learn to follow a problem-solving process in order to reach a functional and defendable design solution. Prerequisite: GDP 212.

**GDP 223 Fundamentals of Typography (3.0); 3 cr.** Students will learn how to classify type according to its history and development, type measurements, series of exercises exploring: space, hierarchy, order, kerning, tracking, type size and weight. Furthermore, the students will explore the use of type and space together with the development of grids through the application of design to a variety of formats. Prerequisite: GDP 217 or FDP 214.

**GDP 227 Digital Media I (3.0); 3 cr.** This course is designed to help graphic designers master professional studio techniques including photo-montage, photo retouching and special photographic effects. It also covers the fundamental software tools and techniques to produce publications and prepare the end product for printing process. Prerequisite: GDP 217 or FDP 214.

**GDP 315 Color and Illustration for Graphic Designers (3.0); 3 cr.** An introduction to color using traditional tools and materials. The course will cover perceptual understanding of color and the use of color as a communication medium. It will also include the fundamentals in illustration which draws upon use of existing materials, illustration on location, abstract subject matter to assist the student in bringing an idea to life. A range of media will be introduced such as pencil, paints and pastels. Prerequisites: GDP 222, GDP 227.

**GDP 317 Digital Media II (3.0); 3 cr.** This course concentrates on training design students to produce graphic solutions for online environment. Terminology, theory, structure, html basics and appropriate software tools for web design will be covered enabling the students to design Websites. Students will also be exposed to understand the process of conveying a message in motion and it interacts within the website. Prerequisite: GDP 227.

**GDP 321 Visual Communication (3.0); 3 cr.** Students will learn how to approach conceptual problem solving through the use of visual rhetoric and the science of semiotics. The course will also focus on signs and symbols, ideograms, sequential design, publication, and information design whilst taking into consideration the potential audience. Prerequisites: GDP 223, GDP 227.

**GDP 322 Applied Typographic Design (3.0); 3 cr.** Students will explore projects of greater complexity; learn how to analyze substantial data, appreciate the design functions of relating ideas and develop logical structural systems to organize information for legible and clear communication. Students will be able to transform manuscripts into printed publications i.e. book design, newspaper, magazine, and
instruction manual. They will have to follow a design process to assess typographical text application, expression, hierarchy, sequential design, layout and page systems including production. **Prerequisites:** GDP 223, GDP 227.

**GDP 323 History of Graphic Design and Contemporary Issues (3.0); 3 cr.** The course exposes the students to the genesis and development of graphic design in the 20th century. The students investigate the theory and practice of graphic design under the two main philosophies of the 20th century: modernism and postmodernism. The course aims to develop the student’s ability to comprehend theoretically and visually the graphic design movements and pioneers as a source of inspiration and reference for their conceptual and innovative process.

**GDP 324 Photography for Graphic Designers I (3.0); 3 cr.** Students will be exposed to critical thinking and will learn the history of photography including the different photography movements. Students will learn the principles and use of black and white photography, and its application in documentary photography and Photojournalism. The student will learn the concept of photo editing as it applies to printed matters. **Prerequisite:** GDP 227.

**GDP 361 Type Design and Experimental Typography (3.0); 3 cr.** Students will learn the principles of designing fonts ready for print and screen. They transfer the manually developed typeface into true type font using professional software. Furthermore, this course will provide the opportunity to experiment with type and research various methods and techniques to serve a pragmatic purpose to express ideas using type. The students will also learn how to develop a visual identity system and how to combine type with signs and symbols. **Prerequisites:** GDP 317, GDP 322.

**GDP 362 Interactive Design and Motion Graphics (3.0); 3 cr.** The course introduces the student to website history and digital interface, website structures and grids, website management and design principles using type, image, color scheme, hierarchy, sequential design, visual identity, animation and sound. Furthermore, Students will create visual projects for screen and TV through the understanding and application of type and image. They will learn how to plan movie concept through sketching and storyboarding and will gain knowledge on how to develop graphic sound tracks to be synchronized with motions. They will also learn the principles of generating short movies and the techniques of editing them. Through assigned projects, students are responsible to follow a design process in order to deliver a specific message using motion graphics. **Prerequisites:** GDP 317, GDP 322.

**GDP 412 Packaging (3.0); 3 cr.** Packaging is an important factor in retail environments and a key element in marketing strategies. This course focuses on the technical knowledge needed to execute a design, to prepare die-cuts, molds, paper section and boards, colors, quality and quantity. Size consideration, shapes and practicality will also be covered. Field trips are required in this course. **Prerequisite:** GDP 322.

**GDP 413 Print Management and Production (3.0); 3 cr.** Covers print methods and print techniques including color separation, film preparation, plate processing and the actual production process. It will also include the choice of papers, printing onto various surfaces, paper engineering and management and finishing processes and binding. **Prerequisites:** GDP 321, GDP 322.

**GDP 415 Branding for Design (3.0); 3 cr.** Students will create the visual corporate identities of products, build the brand marketing strategy, analyze and define the unique selling proposal, and communicate its value. The students will learn how to make professional presentations including documentation of the process. **Prerequisites:** GDP 321, GDP 322.
GDP 416 Collaborative Design for Change (3.0); (3cr) This course will introduce students to real life projects through collaborative design works in the area of information visualization and experience design. Students will answer briefs from the industry exploring a range of possibilities in visualizing data and information as well as design elements and techniques for new technology application.

GDP 423 Professional Practice and Portfolio Preparation (3.0); 3 cr. Overview of the business aspects of design: Translation of jobs into properly written documents, meetings with clients and presentation of work, design and production processes, understanding the brief, debriefing, coding, encoding, budgets, estimating design, fees, and official contracts. During the semester, students will have to cover hours for the internship. This course also assists students in the development of their professional visual identity and portfolio. Prerequisite: GDP 413.

GDP 463 Environmental Graphics and Arabic Type Design (3.0); 3 cr. This course will introduce the students to the history of Arabic typography. Students will learn to identify the different Arabic type styles and their classifications, as well as applying a creative design process to produce Arabic typeface. Students are also introduced to ways of analyzing and creating meaning in graphic and typographic design solutions for indoor and outdoor environment. In the context of theory and practice, the students will develop way-finding systems, semiotics, and information presentation for the public. They will become aware of issues pertaining to the identification, categorization and structure of raw and complex information from different fields. Prerequisite: GDP 361.

GDP 464 3D in Motion (3.0); 3 cr. Students will learn how to communicate effectively using type, image and sound progressively with more and more complex needs for motion graphics. Students will know how to inform while underpinning the media constraints. In parallel, they will learn how to create interface design and promotional broadcasting graphic movies using different software platforms and advanced tools tracking 2D and 3D animations. Furthermore, the students are introduced to the principles of 3D animation; learn how to sketch, illustrate and design characters as well as developing contemporary design solutions with new approaches of type, image, and characters for screen using appropriate tools and techniques to develop 3D motion graphics for multimedia. Students will investigate and formulate their senior project proposal. Prerequisite: GDP 362.

GDP 465 Senior Studio (3.0); 3 cr. Students will research, develop and design their individual senior project under instructor guidance. Articles, discussions, seminars and lectures will take place during class sessions in support of the development of the senior projects. The senior project and related process will be presented in front of a professional jury. The senior project proposal can take the form of a screen and/or print based solution. Prerequisites: GDP 463, GDP 464.
The Degree of Bachelor of Arts in Interior Design

Program Description
Our Interior Design program consists of a sequential undergraduate design studios that form the core of the professional interior design major. Basic architectural and design principles of form-making are the initial focus that soon shift to issues of people and space.

The program helps students develop critical thinking, creative design and evaluation of how interior design meets the needs of people, which is the essence of their professional curriculum. Within the instructional settings of the upper design studios, students learn about the dynamic interactions between people and space in the commercial, institutional, hospitality, healthcare and retail facilities. Graduates develop competency in specific interior design subject areas as they learn how to creatively make the world a better place for people. The program provides opportunities for the students to achieve excellence in the design of interior environments also to engage in research and develop a specialization in a related field and possible topics for advanced studies in furniture design, environmental design, historic preservation, visualization and interior applications for computers, design research and theory as well as design education.

Mission
The mission of Interior Design Program is to prepare students to develop critical thinking and effective problem-solving approach in both public and private spaces. The program arms students with the knowledge to find different ways to improve and develop the physical environment. The program also provides students with the means to creatively make the world a better place in which to live.

Program Educational Objectives
The Bachelor of Arts (B.A.) in Interior Design program offered by the Department of Design at the Faculty of Architecture, Art and Design (FAAD), aims at:

- Providing the learner with the proper exposure to enhance critical thinking;
- Developing the intellectual and theoretical backgrounds of students through the study of ancient, modern and contemporary history of Interiors, Furniture, and Styles;
- Providing the knowledge of human factors and human behavior in the interior environment;
- Leading students to develop the attitudes and values of professional responsibility and effectiveness;
- Providing the students with the basic fundamentals in interior design, the theories of design and design sustainability; and
- Preparing the learner for professional practice and post-graduate studies.

Program Learning Outcomes
Interior Design graduates will:

- Develop proficiency in communication skills using strong verbal, written, and graphic methods;
- Acquire understanding of historical and theoretical influences on design;
- Demonstrate an innovative and creative approach to design process through conceptual and critical thinking;
- Employ technical skills and knowledge of materials and systems including related safety, environmental concerns, ecology, and sustainability;
- Appraise the knowledge, understanding, and skills required for a professional interior designer, as global citizen and leader;
- Initiate research to assess and develop a design project that requires service-learning skills in various cultural and social environments; and
- Manage constituent ideas to give new concepts and/or propose alternative solutions.

**Graduation Requirements**

To receive the degree of Bachelor of Arts in Interior Design, a student must complete a total of 136 credits with a minimum cumulative GPA of 2.3/4.0 in all Core and Major Courses. All major courses with a grade of less than C must be repeated. The 136 credits necessary for graduation are divided as follows:

Undergraduate Courses: Interior Design

IDP 210 Basic Skills for Interior Design (3.0); 3 cr. This course helps the student develop the necessary skills and techniques required to communicate visually his interior design ideas effectively and professionally. This course will give the student the ability to draw and sketch, assess, evaluate and understand existing structures, also learn to survey sites and collect data and take them to the drawing board. Topics include: Design briefs and specifications; comprehensive drawing files: presentation techniques, layouts and renderings; technical drawing files:Scaled drawing , plans, elevations, sections, etc.

IDP 211 History of Interiors and Furniture I (3.0); 3 cr. A study of ancient architecture, interiors and furniture from the beginning of human civilization to the modern civilization.

IDP 212 Fundamentals of Interior I (3.0); 3 cr. Essentials of planning an interior architectural environment in relationship with spatial organization. Prerequisite: IDP 215.

IDP 214 Materials and Methods of Construction (3.0); 3 cr. This course combines case studies with lectures, readings and discussions on concepts of design technology. Corequisite: IDP 212.

IDP 215 Descriptive Geometry for Int. Design. (3.0); 3 cr. Study of the different interrelated geometric fields and three dimensional forms in the interior environment. Emphasis on the formation of volumetric development, light sources, shades, shadows and their constructions. Prerequisite: IDP 210.

IDP 222 Fundamentals of Interior II (3.0; 3 cr. Study of structural setting in any architectural space leading to constraints in the design process. Prerequisite: IDP 212.

IDP 223 Drawing for Interior Design (3.0); 3 cr. This is an intense studio course developing free hand drawing skills, scaled perspective appropriate for the presentation of interior design projects. This course also develops a wide range of rendering skills and techniques applicable in traditional and computer media. Prerequisite: FAP 211.

IDP 224 Colors in Interiors (3.0); 3 cr. This course will teach the student to achieve the right choices of colors in different interior spaces and environments, and they will also learn to develop the opulent designer’s eye when required to balance color schemes and combinations. Topics included : Color theories, color psychology, color science, color characteristics and notation. Corequisite: IDP 226.

IDP 225 Materials and Finishes (3.0); 3 cr. This course offers an introduction to construction detailing for interiors, focusing on architectural millwork. Corequisite: IDP 222.

IDP 226 Textiles for Interiors (3.0); 3 cr. Effects of fibers, yarns, fabrics and finishes on appearance and performance. Study of the construction of textile products used in interiors. Prerequisite: IDP 222.

IDP 227 Human Factors for Int. Des. (3.0); 3 cr. This course investigates human factors as an essential ingredient in the design process. Physical and psychological human factors will be examined in an attempt to better understand The spatial relationship between humans and their environment. Topics include: Proximics, cognitive mapping, imageability, human sensory and ergonomics. Corequisite: IDP 222.

IDP 311 History of Modern Contemporary Interiors (3.0); 3 cr. This course is an overview of the 20th century art, culture, interior and furniture. Prerequisite: IDP 211.
IDP 312 Interior Design Project I (3.0); 3 cr.
This course covers the creative triggering of the design problem solving process through schematics. It also investigates human factors as an essential ingredient in the design process. Prerequisite: IDP 222.

IDP 313 Applied Interior Design I (3.0); 3 cr. This course explores the pragmatics of computer hardware and software as integral tools to contemporary design. Prerequisite: IDP 210.

IDP 314 Interior Detailing and Construction I (3.0); 3 cr. The course introduces the students to the various material finishes used in interior design. Corequisite: IDP 312.

IDP 321 Environmental Graphic Design (3.0); 3 cr. This course studies the presentation of information in the designed environment. Prerequisite: IDP 322.

IDP 322 Interior Design Project II (4.0); 4 cr. The student is challenged to work on a major construction displaying creativity and ability to remodel this space according to new functions. Prerequisite: IDP 312.

IDP 323 Applied Interior Design II (3.0); 3 cr. This course develops a more professional and creative approach to design while broadening the student’s technical base. Prerequisite: IDP 313.

IDP 324 Interior Detailing and Construction II (3.0); 3 cr. Review, discussion and analysis of interior construction systems used in commercial and institutional structures. Prerequisite: IDP 314.

IDP 326 Concepts of Historic Preservation (3.0); 3 cr. Projects consist of a search for new remodeling techniques, constructing and preserving historic buildings and monuments. Prerequisite: IDP 322.

IDP 327 Furniture Design (3.0); 3 cr. This course exposes the student to the design industry starting form the drawing board and ending with a full scale furniture model. The student will learn to implement the step by step hands on model making of furniture pieces that he created, the student will be using the ergonomic knowledge that he learned in the human factors course. Topics included: Ergonomic design for the global industry. Designing for the Industry. Model making, Specimen building and mass production. Prerequisite: IDP 227.

IDP 328 Lighting Design in Interiors (3.0); 3 cr. This course takes a practical approach to lighting, and the student will learn about the different types of lighting such as ambient, task and decorative. The student will also learn the fundamentals of lighting design in relation to residential and contract interiors. The subjects tackled in this course will give the student enough knowledge to incorporate lighting in the total interior design scheme. Topics covered: Natural, artificial lighting, quality of light. Technicalities: Switches and wiring. Finally, electrical plans and specifications. Corequisite: IDP 322.

IDP 411 Quantity Surveying for Interior Designers (3.0); 3 cr. Emphasis on the principals of construction. Corequisite: IDP 412.

IDP 412 Interior Design Studio I (6.0); 6 cr. This course covers all aspects of professional presentation of a complete construction drawing-file to secure accurate executions. Prerequisite: IDP 322.

IDP 413 Applied Interior Design III (3.0); 3 cr. This course shows students how to create computer animation and 3-rendered materials within an interior space. Corequisite: IDP 412.

IDP 421 Business Practice for Interior Designers (3.0); 3 cr. Focuses on the legal aspects of design and contract documents for interior architecture. Corequisite: IDP 422.
IDP 422 Interior Design Studio II (6.0); 6 cr. This course is structured to challenge the student to deal specifically with contract interiors. *Prerequisite:* IDP 412.

IDP 423 Integrated Building Systems (HVAC and Plumbing) (3.0); 3 cr. This course provides a structured opportunity to study and integrate all components of architectural technology into a comprehensive whole. *Corequisite:* IDP 412.

IDP 424 Interior Design Management (3.0); 3 cr. This course exposes the student to the main management principles in interior design with the understanding that this profession is an integral part of the construction industry. The student will learn the different management techniques and skills that an interior designer needs to practice in his business formation starting with managing his office ending up with a contract and passing by all the processes that require a business-like attitude. Finally, the student will learn the design-built team working approach. *Corequisite:* IDP 422.
The Degree of Bachelor of Arts in Fashion Design

Program Description
Lebanon has already established itself in the international fashion design industry and as a result there is a potential for a prosperous local market in need of competent fashion designers. The graduates will be able to produce traditional as well as innovative and contemporary design concepts suitable for the national, regional and international market. The program combines advanced design concepts supported by current technology in order to produce creative and original, individual prototypes for haute couture or industrial production.

Career Opportunities
Fashion Design graduates will be ready to work in the fashion industry as creators of new collections, textile designs, managers, journalists, patternmakers, and in various fields of fashion commerce.

Mission
The mission of the Bachelor of Art (B.A.) in Fashion Design is to train students in critical and creative thinking through visual communication in fashion design illustrations, studio, and patternmaking, and to expand student awareness of research, history, trends, concepts, and marketing in fashion design.

Program Educational Objectives
The B.A. in Fashion Design offered at the Faculty of Architecture, Art and Design (FAAD) aims at:
• Providing the learner with the exposure to reflective approaches to design and critical and creative thinking;
• Developing the intellectual and theoretical backgrounds through study of history, trends, concepts, and marketing in fashion design;
• Develop the technical skills in professional fashion design, such as patternmaking, visual communication, and analysis; and

Program Learning Outcomes
Fashion Design graduates will:
• Develop visual communication skills, such as professional illustrations and technical drawings;
• Practice critical and creative thinking in fashion design;
• Relate history and cultural knowledge to fashion design, and communicate the ways fashion reflects cultural, political, and humanistic issues;
• Relate silhouettes, color, fabric, details, and styling to the design concept; and
• Propose appropriate marketing plans guided by research, market trends, and marketing concepts.

Graduation Requirements
To receive the degree of Bachelor of Arts in Fashion Design, a student must complete a total of 102 credits with an overall GPA of at least 2.0/4.0 and a minimum cumulative GPA of 2.3/4.0 in all Core and Major Courses. All major courses with a grade of less than “C-” must be repeated. The 102 credits necessary for graduation are divided as follows:
Degree Requirements (102 credits)

Liberal Arts Core Curriculum (LAC)  
30 cr.

Core Requirements  
FAP 211.  
3 cr.

Major Requirements  
FTP 212, FTP 214, FTP 222, FTP 224, FTP 226, FTP 228, FTP 229, FTP 314,  
FTP 315, FTP 319, FTP 325, FTP 326, FTP 328, FTP 329, FTP 415, FTP 418,  
63 cr.

Free Electives  
6 cr.
Undergraduate Courses: Fashion Design

FTP 212 Fashion Illustration I (3.0); 3 cr. Students will learn to develop and illustrate fashion figures and garment details through analysis of the fashion canon, the figure research and the study of lines and proportions; resulting in fashion design sketches and illustrations. The emphasis is on the ability to express ideas visually and in a personal style. Corequisite: FTP 229.

FTP 229 Fashion Design I (3.0); 3 cr. The students will learn to develop design fashions, in parallel they will sketch figures and garment details through analysis of photographs and research, resulting in fashion design sketches. The ability to design through creative exploration is an integrated part of the course. Techniques for rendering the characteristics of various fabric textures, weights and patterns will be explored. Prerequisite: FTP 222.

FTP 214 Textile Technology (3.0); 3 cr. This course is an overview of the textiles in fashion design including printing techniques. Advanced surface treatments are investigated. Students are encouraged to experiment and apply original designs as inspiration for creation of textiles.

FTP 222 Fashion Illustration II (3.0); 3 cr. The students will explore the different techniques for illustrating fashion, analyzing the structural rhythm and movements of various poses, by combining media and advanced rendering techniques; including software used in the fashion industry; leading to new fashion design creations. Prerequisite: FTP 212.

FTP 224 History of Fashion Design (3.0); 3 cr. This course traces the history of fashion tradition from antiquity until 1890, including the ancient civilizations of Egypt, Mesopotamia, Greece, Rome, and continuing with the Renaissance, the French Revolution until the Art Nouveau Period.

FTP 226 Digital Fashion Design (3.0); 3 cr. The student is introduced to digital technologies such as Adobe Photoshop and illustrator, through applications in design principles; illustration, and presentation techniques as well as fashion idea development, from the basis of this course including web and computer portfolio. Corequisite: FTP 229. Prerequisite: FTP 212.

FTP 314 Contemporary Issues of Fashion Design (3.0); 3 cr. The students will investigate the relationship between fashion design and the contemporary issues of the 20th and 21st century, beginning with the Art Nouveau period, the 'between the two Wars' period, the New York era, innovations of the 20th century to end with the contemporary era. Prerequisite: ENL 213.

FTP 228 Patternmaking I (3.0); 3 cr. Students will study the use of the pattern for various sectors while developing basic concepts as well as original designs according to professional standard through hands-on practice. Corequisite: FTP 229.
fore-casting services. Students will focus on the details such as accessories in new dimensions and materials; thus enhancing their creative potential.

**FTP 325 Fashion Studio II (3.0); 3 cr.** Students will develop skills and techniques necessary to produce garments of various sectors, including professional processes and assembly procedures. *Prerequisite:* FTP 315.

**FTP 328 Patternmaking II (3.0); 3 cr.** The students will learn to create advanced patterns using computer and appropriate software as a tool for production, in order to efficiently reflect and execute their creative and original ideas. *Corequisite:* FTP 315. *Prerequisite:* FTP 228.

**FTP 329 Fashion Design III (3.0); 3 cr.** Creative thinking in both process and product will encourage the students to create trade sketches and storyboards of their fashion designs. The aim is to develop cohesiveness in a collection based on individual concepts with diverse applications, and to present the designs in fashion portfolios. *Prerequisite:* FTP 319. *Corequisite:* FTP 325.

**FTP 415 Fashion Studio III (3.0); 3 cr.** The students will continue to employ industrial standards for tailoring garments, including advanced construction processes and assembly procedures to ensure a high quality garment. *Prerequisite:* FTP 325.

**FTP 418 Patternmaking III (3.0); 3 cr.** The students master the translation of any volume or idea regardless of material or purpose. Students will further construct, in tandem manually and digitally, advanced patternmaking for final execution. *Prerequisites:* FTP 328, FTP 315.

**FTP 419 Fashion Design IV (3.0); 3 cr.** Creative and advanced design methodology will ensure unique and professional development of a collection with personal style and effective communication of sketches, fashion design, storyboards and portfolios for their senior collection. *Prerequisite:* FTP 329.

**FTP 423 Professional Practice and Marketing (3.0); 3 cr.** The students will be exposed to the professional aspects of Fashion Design: Management of inventory, decision making, planning, licensing, plus strategies to enhance market strength. The process of learning happens through daily journaling, written reports and a presentation of their internship experience. It is the student’s responsibility to find an internship and to notify the instructor for approval. Furthermore, the students will design, prepare and present a professional portfolio of their individual collections including the senior project. *Prerequisites:* FTP 415, FTP 419.

**FTP 425 Fashion Studio IV (3.0); 3 cr.** Students will apply professional standards to the execution of their senior collection and its process will be presented in front of a jury in order to develop high quality prototypes. *Prerequisite:* FTP 415.

**FTP 428 Patternmaking IV (3.0); 3 cr.** The concepts developed through design and research will inform the patternmaking for a collection as their senior project resulting in professional execution. *Prerequisites:* FTP 418, FTP 415.

**FTP 438 Senior Collection Execution (3.0); 3 cr.** This course supports the culmination of knowledge and skills and students are encouraged and expected to further develop different methodologies for creating patterns and executions for their Final Collection, including various levels of “Finishing Effects” within the fashion industry; Haute Couture, New Designs and Ready to Wear. Special. Special attention is given to the various “drapery” techniques.
The Degree of Bachelor of Arts in Photography

Program Description
Photography is by far the most used medium amongst all the creative disciplines. From fine arts, design, multimedia, artistically, and commercially, the photograph has proven its strength and ability in delivering various sustainable messages in an innovative and challenging process.

The design department understands photography as a multidisciplinary medium devoted to research and experimentation. The photography program encourages the exploration and development of the individual style in a project based system where initiative, research, and analytical thinking underlie each task.

The B.A. in photography offers the students the opportunity to learn photography combined with animation, multimedia, video and other related fields. Students are invited to combine traditional and contemporary methods to create photography, including still and moving images as well as image and text.

Graduates will develop a strong learning while tackling all the areas of the photographic industry enabling them to pursue a promising career in their chosen field of interest.

Career Opportunities
Students graduating in Photography will have the opportunity to work as freelancers, covering the creative and artistic needs of the market such as advertising, editorial, fashion and documentary. They can also work as creative directors, image consultants, and photojournalists. In parallel to their commercial work, graduates will be capable of setting up their own exhibitions and publishing their work.

Mission
The Bachelor of Arts (B.A.) in Photography offers the students the opportunity to learn photography combined with animation, multimedia, video, and other related fields. Students are invited to combine traditional and contemporary methods to create photography, including still and moving images as well as image and text. Graduates will develop a strong knowledge while tackling all the areas of the photographic industry, enabling them to pursue a promising career in commercial and fine art photography, or other visual communication fields.

Program Educational Objectives
The main objectives of a Major in Photography offered at the Faculty of Architecture, Art and Design (FAAD) are to:

- Familiarize students with the different genres of photography, its history and its contemporary form;
- Equip students with the necessary skills, knowledge, and ethical dispositions to excel in the photographic industry;
- Prepare professionals who will be capable of working in the fields of visual communications; and
- Raise students’ awareness to the multidisciplinary aspect of the photograph and its various forms of publication.
Program Learning Outcomes
Photography graduates will:
• Demonstrate fundamental understanding of the critical theory, historical and contemporary practice of art and photography;
• Produce a high quality, technically relevant, coherent body of work to a professional standard in any chosen area of photography;
• Communicate various concepts proficiently and contextualize creative work in the contemporary culture;
• Effectively adapt multimedia, design, and branding techniques in creative photographic projects; and
• Adopt a moral and ethical approach to the use of photography.

Degree Requirements (102 credits)

Liberal Arts Core Curriculum (LAC) 30 cr.

Core Requirements 9 cr.
FAP 211, GDP 212, GDP 222.

Major Requirements 57 cr.
PDP 216, PDP 221, PDP 223, PDP 227, PDP 311, PDP 312, PDP 313, PDP 317, PDP 321, PDP 323, PDP 327, PDP 411, PDP 412, PDP 413, PDP 414, PDP 415, PDP 421, PDP 422, PDP 423.

Free Electives 6 cr.
Minor in Photography (18 credits)

This Minor is ideal for students who believe in the alchemy of the still image and its creative and inspiring process. Out of all the visual communication media, photography stands out for its power in freezing time and capturing the essence of the real. Used in every discipline, it manages to travel through the eye to reach the mind and engrave its codes in the heart. New digital technologies and traditional techniques are merged here to offer pioneering creative methods in this challenging field. Students who choose this Minor will acquire solid analytical, intellectual and technical skills necessary for the development of a consistent photographic body of work. It is the hope that such a Minor can enrich the lives of the students by introducing a creative medium and sufficient skill to produce work.

Career Opportunities
Students can work as freelancers responding to the creative and artistic needs of the market such as advertising, editorials, fashion, and documentaries.
Undergraduate Courses: Photography

PDP 201 Basic Photography (3.0); 3 cr. An introduction to the camera, dark room, film, and processing. Students will learn about basic techniques of exposure, lighting and laboratory.

PDP 216 Introductory Photography (3.0); 3 cr. Students will develop a strong basis for the creation of the image while exploring digital and analog techniques that will enable them to express their own ideas visually. They will explore several photographic topics and represent them through various concepts and techniques.

PDP 221 Portraiture (3.0); 3 cr. Students will develop individual ideas through an understanding of the photographic portrait, including past and present representation of the self and the other. An interpretation of the facial representations and body language is expressed through analog and digital techniques. Prerequisite: PDP 216.

PDP 223 History of Photography (3.0); 3 cr. This course gives an overview of the history of photography starting from the pioneers’ era in the beginning of the 19th century until mid of the 20th century. It will cover the influence of science and technology in the creation of the image, as well as the challenge between painters and photographers. Prerequisite: PDP 216.

PDP 227 Grain to Pixel (3.0); 3 cr. Students will learn how to handle and manipulate digital images for diverse outcomes. They will be introduced to professional software for image retouching, montages, collage and special effects. Prerequisite: PDP 216.

PDP 311 Branding in Photography (3.0); 3 cr. Students learn to analyze a brand and target a given audience. They will be exposed to the process of how to deconstruct the commercial image, through the development of a brief; research, concept to image creation. Through photography students will learn to communicate successfully the image identity of a brand. Prerequisite: PDP 227.

PDP 312 Glamour and Fashion (3.0); 3 cr. Creativity and originality in the production of the fashion image and the ability to transmit the stylistic concept is an integrated part of this course. Students will learn to manage the team necessary for glamour shooting, whether in the studio, outdoors or during catwalk. Prerequisite: PDP 227.

PDP 313 Contemporary Photography (3.0); 3 cr. This course will cover photography from the beginning of the 20th century until present day. It will introduce critical and cultural theories pertaining to the contemporary image, including multimedia and the digital era. Prerequisite: PDP 223.

PDP 317 Line to Pixel (3.0); 3 cr. Students will master the manipulation of digital images in a variety of media. They will be introduced to different software in relation to design and publications, enabling the students to produce professional printed matter. Prerequisite: PDP 227.

PDP 321 Photojournalism and Documentary (3.0); 3 cr. Students will be aware of the responsibility and integrity of the photographer in capturing the moment and producing striking photographs. They will analyze the photograph in relation to various media while addressing ethical and social issues objectively and grasp a deeper insight of the ambiguity of the message. Prerequisite: PDP 312.

PDP 322 Photography and Culture (3.0) 3 cr. Students will investigate the way images are read, used and understood in different cultures in an international scope. They will research, identify and define the different obstacles that may limit or transform the meaning of a photograph in a global context.
PDP 323 Time and Space (3.0); 3 cr. Students will analyze the cultural meaning of a certain space or place and the signs held within its image. The architectural elements and methods for visual investigation will be explored through the quality and quantity of light in conveying different moods. Prerequisite: PDP 312.

PDP 327 Web Image (3.0); 3 cr. Students will learn the structure of websites, for clients and for self promotion, that reflect the genre of their work while understanding and analyzing creative website used by professional photographers. Prerequisite: PDP 317.

PDP 411 Image and Type (3.0); 3 cr. Students will understand and analyze different typefaces and the relation between a specific image and expressive typefaces, as well as the different messages that type and image can convey. They will experiment with their own photographs and produce design solutions for various publications. Prerequisite: PDP 327.

PDP 412 Experimental Photography (3.0); 3 cr. This course will offer a survey of the contemporary experimental photography; emphasizing past and present methods. Students will create original and unique images through exploration and application of alternative techniques. Prerequisite: PDP 321.

PDP 413 Senior Project I (3.0); 3 cr. Students will investigate and formulate their senior project proposal. They will determine subject matter and concepts, after researching and analyzing the disciplines in which their own practice is located. Dissertations will be submitted and approved by a jury of academics and professionals. Prerequisite: PDP 321.

PDP 414 Movie Production (3.0); 3 cr. This course aims to acquaint the student with multi-camera usage in a studio setting and on location, combining photography and moving image towards movie production. The common language of the contemporary moving and still image is explored through the concept of storyboarding, directing and digital editing techniques. Prerequisite: PDP 327.

PDP 415 Photography and Animation (3.0); 3 cr. Students will experiment different processes and techniques to produce an animation, including stop-motion using related software. Students will develop concepts and ideas through sketching and storyboarding enabling them to produce animation and synchronized sound tracks. Prerequisite: PDP 327.

PDP 416 Photo and printing techniques (3.0); 3 cr. This course combines darkroom and digital techniques. Aesthetic and conceptual problems will be addressed through assignments and critiques. Emphasis is on individual directions and approaches. It includes image combination, processing and printing techniques. Prerequisite: PDP 325.

PDP 421 Promotion and Publication (3.0); 3 cr. Students will be exposed to the process of promoting their own work, through exhibitions, installations, and publications, locally and internationally. They will be responsible to manage and organize professionally all the preparation needed for a successful promotion. Prerequisite: PDP 413.

PDP 422 Professional practice and portfolio (3.0); 3 cr. This course aims to acquaint the student to develop their professional portfolio for self promotion. In parallel students will be exposed to the legal issues related to the copyright of the image and the way to protect their rights as professional photographers. Prerequisite: PDP 413.

PDP 423 Senior Project II (3.0); 3 cr. Students will develop their set objectives and produce their senior project in photography under instructor guidance. Articles, discussions, seminars, lectures and fieldtrips will take place supporting of the development of the senior projects. The senior project and related process will be presented in front of a professional jury. Prerequisite: PDP 413.
Other Design Courses

**FDP 201 Basic Design (3.0); 3 cr.**  
Introduces students to basics of visual expression and organization. *Prerequisite:* Sophomore Standing.

**FDP 214 Design for Advertising (3.0); 3 cr.**  
This course is designed for the communication art students. It emphasizes both the functional and the aesthetic aspects of design. *Prerequisite:* FDP 201.
The Degree of Master of Arts in Design

The Master of Art in Design program is designed for students of Visual Arts and Design who wish to engage in a further period of study as a continuum to their Bachelor studies. It is also designed for experienced students who wish to raise their intellectual and professional experience in a field of study, following a period of work in industry or in the professions associated with design.

The post-graduate status of the Master Program derives from the emphasis given to the relationship between theoretical concepts and practical realization of a problem; theory and practice at an informed and exploratory level.

The post-graduate status also derives from a teaching approach, which lays considerable emphasis upon the managerial and professional aspects of project research and development designed to raise the standards of the successful implementation of the subjects in the professional, applied context of society and industry.

Finally, the post-graduate status of the course allows the student to disengage from the daily pursuit of tasks in their field, which are normally carried out under constraints which limit their exploration of the subject in a holistic sense. Instead, the students are enabled to look deeply into the context of their work, the history and theory, the practice and achievement of specialists in this and other countries on an international, global scale.

The impacts of traditional, new and developing technologies are studied. Graduates of the course can keep abreast of current trends by providing themselves with the intellectual network and contacts necessary to remain fully informed throughout their future professional lives; a benefit to themselves, and their employers.

Master students are able to follow their intellectual and creative discoveries to a depth and distance which will give the opportunity to create pilot schemes and projects which can be developed in the true scientific manner of trial and error: Testing, revision, and proposals for further development. Thus, building a body of knowledge on their subject provides the basis for further pioneering and exploratory work, creatively and technically.

The Program Aims:
- To extend and further develop the intellectual, professional and technical skills of graduates and of mid-career practicing designers;
- To explore the social and cultural context within which the processes of designing take place;
- To support the individual in developing high-level research ability and to explore the interrelationship of theory and practice.

Admission Requirements
The Master of Art in Design is set for students from the several disciplines that are embraced by the term visual arts and designs, who wish to engage in a period of study beyond the Bachelor level, and who wish to raise their intellectual and/or professional experience associated with visual arts and/or design.

Students with Bachelor degrees from other disciplines are invited into the program after they have fulfilled undergraduate requirements of the University admission policy.
In addition to the University admission requirements for graduate students, the candidate must submit a portfolio of work for assessment and schedule an interview with M.A. course faculty.

In order to be accepted into the program, the student must take a minimum of 6 credits per semester as a part-time candidate and 9 credits as a full-time candidate.

**Transfer**
Although transfer is not generalized, some credits from major universities can be transferable upon admission by the Graduate Committee. A transferred course must be passed at the grade of 80 according to the NDU grading Bylaws.

In addition, applicants for the graduate program may be granted a maximum of nine transfer credits of graduate studies taken at another accredited institution of higher education provided that the transfer course(s) correspond to the NDU course requirements.

**Graduation Requirements**
Students seeking the degree of Master of Design must meet the University graduation requirements and complete 36 credits with a cumulative average of at least 3.0/4.0

**Degree Requirements (36 credits)**

Graduate Courses: Master of Arts in Design

MAD 615 Design Research Methodologies (3.0); 3 cr. A survey of current design thinking and research methodologies to aid the student in the development of projects in response to a critical content framework. The course is intended to offer the student support and direction in the formation of the critical thinking that will inform their written and visual solutions. Includes lectures, readings, and discussion of contemporary issues in design in social and cultural contexts.

MAD 616 Contemporary Issues in Design (3.0); 3 cr. A seminar in which topics of current relevance to design practice and critical thinking will be explored and analyzed. The course content will change each semester to remain up to date within the profession.

MAD 617 Design Studio I (6.0); 6 cr. Design projects in response to the critical content of Contemporary Issues in Design. Includes the role of designed objects in contemporary culture and the effect on society, including interaction with potential audiences. Corequisite and/or Prerequisite: MAD 616.

MAD 625 Design Research Development (3.0); 3 cr. Development of conceptual and analytical skills for the self-initiated design research, which will culminate in a written proposal. Prerequisite: MAD 615.

MAD 626 Cultural Issues in Design (3.0); 3 cr. A seminar that will consider the relevance of culture to design particularly in the Lebanese context. An introduction to recent theories in various disciplines concerning cultural understanding of design. The course content will change each semester to remain up to date within the profession. Prerequisite: MAD 616.

MAD 627 Design Studio II (6.0); 6 cr. A visual application of the topics and ideas covered in Cultural Issues in Design. The course is a platform for experimentation and exploration of concepts from the seminars. It focuses on the role of design objects as cultural artifacts and their reflection of social diversity on both designers and audience. It includes creation, reproduction, distribution and reception of messages. Corequisite and/or Prerequisite: MAD 626.

MAD 635 Thesis I (3.0); 3 cr. This course will support and assist the student in the development and preparation of their research into a comprehensive written document that will complement the visual work to be undertaken in Thesis II. The two components will interrelate to support the theories, hypothesis and conclusions. Prerequisite: MAD 627.

MAD 636 Special Topic (3.0); 3 cr. This course is given by an invited instructor to explore topics of current interest. Prerequisite: MAD 627.

MAD 645 Thesis II (6.0); 6 cr. The course provides further guidance during the development of the thesis. The final outcome answers the research study develop in thesis I. Prerequisite: MAD 635.
DEPARTMENT OF MUSIC

Professor:  Kesrouani, Elias (Fr.)
Assistant Professor:  Beyrouti, Lola
Lecturer:  Lawoun, Dolcy

The Degree of Bachelor of Arts in Music and Musicology

Mission
The Bachelor of Arts (B.A.) in Musicology offers the students the opportunity to
develop competence and expertise in the areas of music, history, theory, analysis, and
composition. Learners will further acquire professional skills in voice and instrument
playing. In addition, the B.A. in Music presents many interesting and challenging
opportunities to students as teachers, performers, creative artists, and employees in the
music industry.

Program Educational Objectives
The main objectives of a Major in Musicology offered at the Faculty of Architecture, Art
and Design (FAAD) are:
• Providing the students with knowledge of music cultural heritage and history;
• Appreciating musical creativity and the aesthetic value of music;
• Developing the necessary skills of students to meet professional teaching and
performing standards in the music field; and
• Familiarizing learners with diversity of musical ideas and styles throughout the
world’s cultures.

Program Learning Outcomes
Musicology graduates will:
• Demonstrate knowledge of music history, theory, analysis, performance, and
composition;
• Acquire high technical skills, growth in musical interpretation and artistry;
• Develop the ability of arranging, improvising, and conducting ensembles of classic
and jazz music;
• Express a competency in musicology culture and ethnomusicology; and
• Manipulate with both electronic and acoustic media.

Admission Requirements
Prior to admission, applicants will be subject to a practical evaluation, which covers
instrument, voice, and musical background.

Graduation Requirements
To receive the degree of Bachelor of Arts in Music, a student must complete a total of
99 credits with a minimum cumulative GPA of 2.3/4.0 in all Core and Major Courses. Any
major course with a grade of less than “C” must be repeated. The 99 credits necessary
for graduation are divided as follows:
Degree Requirements (99 credits)

Liberal Arts Core Curriculum (LAC)  30 cr.

The Degree of Bachelor of Arts in Music and Musicology - Jazz Music

Jazz music was the musical phenomenon that combined American, African, and Indian music and heritage. Developed in the American Continent, it spread around the world. It became evident that such a rich form of music was able to touch a great number of music lovers and scholars at an international level. It is a musical art with its own language, rhythms, harmony, which excelled in its creative improvisation. Our students will become knowledgeable with the masters of such art including composers, performers, and schools.

Minor in Jazz (15 credits)
Selection and preparation of courses for the Minor in Jazz Music at the Department of Musicology at NDU is based on the observation that the contemporary application of jazz music seems more attractive to the younger generations. The number of students inquiring about jazz music exceeds the number of students inquiring about other minors in Music. This minor will educate students about the background theory and the applied instrumental needed to qualify for job opportunities in entertainment, teaching, festivals, directing, etc.

NDU will be the first university offering this Minor in Jazz Music and creating opportunities for students to add to their education an added knowledge in the subject and in accordance with the mission of the University and its commitment to the philosophy and standards of the American model of liberal arts education.

Our goal is to attract students from other Faculties to learn jazz music language and appreciate the cultural richness of this field. Theory and application will be combined to provide the knowledge and creativity in becoming aware of this music.

Proposal: The NDU minor in Jazz Music comprises 15 credits. The candidate could be an amateur musician practicing a musical instrument. Occasionally students with a good academic standing of a GPA of 2.0/4 or above may enroll in this minor. They can count only 6 credits that they have taken from the list of the Jazz Music minor requirements while pursuing another major.

15 cr.
Undergraduate Courses: Musicology

MUS 201 Music Archeology (3.0); 3 cr.
The course offers clear understanding of the musical role in forming religious rituals, cultural development, ethno-sociological beliefs and behavior, art and civilizations. It played a central role in shaping most forms of artistic creation.

MUS 210 Music Appreciation (3.0); 3cr. A brief survey of the music history in various cultures and ages aiming at introducing students to knowing and appreciating the art of music in its different forms, and instruments. The course relies heavily on listening to music through visual aids relaying the sound to the instrument.

MUS 211 Applied Music Instrumental or Vocal I (1.0); 1 cr. Private lessons with the teacher on the student’s major instrument or voice. Prerequisite: Knowledge of 20% of the Latin program or its equivalent.

MUS 214 Introduction to Musicology (3.0); 3 cr. A survey of musicology, its philosophy and objectives, relating musicology to auxiliary disciplines. MUS 221 Applied Music Instrumental or Vocal II (1.0); 1 cr. Private lessons with the teacher on the student’s major instrument. Prerequisite: MUS 211.

MUS 222 Theory of Music I (1.0); 1 cr. Last and general survey of Theory of Music aiming to fill up any lack in theory supposed to be achieved.

MUS 223 Sight Singing and Ear Training I (1.0); 1 cr. Ear training and sight singing exercises in the keys of C major, A minor, F major, D minor, G major, and E minor.

MUS 224 History and Analysis of Western Music: Medieval - Baroque Period (3.0); 3 cr. Survey of composers, pieces, languages and styles of Medieval, Renaissance, and Baroque periods.

MUS 228 History and Analysis of Western Music A: Medieval - Baroque - Classical Period (3.0); 3 cr. Survey of composers, pieces, languages and styles of Medieval, Baroque and Classical periods. The instructor focuses on explaining the basic concept of the Medieval, Baroque and Classical philosophies relating the art of music to other fine arts of the same period. The process of music languages teaching focuses on reading the scores, playing it on instruments and listening to it recorded.

MUS 229 History and Analysis of Western Music B: Romantic - Post Romantic - 20th Century and Contemporary Music (3.0); 3 cr. Survey of composers, pieces, languages and styles of Romantic, Post Romantic and 20th century periods. The instructor focuses on explaining the basic concept of the Romantic, Post Romantic and 20th century philosophies relating the art of music to other fine arts of the same period. The process of music languages teaching focuses on reading the scores, playing it on instruments and listening to it recorded.

MUS 232 Theory of Music II (1.0); 1 cr. The modes (other than the major and minor modes), chords (up to five tone chords), modulation, phrases and the different kinds of cadences, transposition, ornaments and abbreviations, and the contemporary notation. In brief: open horizon on harmony. Prerequisite: MUS 222.

MUS 233 Sight Singing and Ear Training II (1.0); 1 cr. Sight singing and ear training exercises in keys with up to four alterations. Introduction to the eighth and 16th notes and syncopation, and the cut-time time signature. Prerequisite: MUS 223.

MUS 234 History and Analysis of Western Music: Classical Period (3.0); 3 cr. Survey of composers, pieces, languages and styles of the Classical period.
MUS 243 Lebanese Music (3.0); 3 cr.
Traditional and popular Lebanese music: forms, metrics, modes, rhythms and instruments from early time to the 20th century.

MUS 244 Ethnomusicology (3.0); 3 cr.
Introduction to music of different cultures and times.

MUS 245 Musical Forms (3.0); 3 cr.
Genres, styles, forms, structures of music throughout history.

MUS 324 History and Analysis of Western Music: Romantic and Post-Romantic Period (3.0); 3 cr. Survey of composers, pieces, languages and styles of Romantic, and Post-Romantic periods.

MUS 331 Applied Music Instrumental or Vocal III (1.0); 1 cr. Private lessons with the teacher on the student’s major instrument. Prerequisite: MUS 221.

MUS 334 History and Analysis of Western Music: 20th Century and Contemporary Music (3.0); 3 cr. Survey of composers, pieces, and styles of 20th century and contemporary periods.

MUS 341 Applied Music Instrumental or Vocal IV (1.0); 1 cr. Private lessons with the teacher on the student’s major instrument. Prerequisite: MUS 331.

MUS 342 Harmony I (1.0); 1 cr. Three tone chords, cadences, and modulation. Harmonizing short pieces and the dominant seventh chords. Prerequisite: MUS 232.

MUS 343 Sight Singing, Rhythmic Chanting, and Ear Training III (1.0); 1 cr. Sight singing and ear training exercises in keys with up to 6 alterations in the key signature. Introduction to composite measures, and more in depth applications of syncopation. Prerequisite: MUS 233.

MUS 344 Religious Music (Gregorian, Byzantine, and Syriac) (3.0); 3 cr. Survey of Gregorian, Byzantine, and Aramaic chants and their modes.

MUS 352 Harmony II (1.0); 1 cr. 9th, 11th, and 13th chords, diminished seventh chords, and altered chords. Prerequisite: MUS 342.

MUS 353 Sight Singing, Rhythmic Chanting, and Ear Training IV (1.0); 1 cr. Sight singing and ear training exercises in the key of F with advanced rhythms. Prerequisite: MUS 343.

MUS 382 Methodology (research methods) of Music (3.0); 3 cr. Introduction to musical sources, principles of research, research styles, citations, and formatting. Art of writing theses and scientific works.

MUS 384 Research Seminar (3.0); 3 cr. Presentation of a research project under the supervision of the teacher. Prerequisite: MUS 382.

MUS 441 Applied Music Instrumental or Vocal V (1.0); 1 cr. Private lessons with the teacher on the student’s major instrument. Prerequisite: MUS 341.

MUS 444 Philology of Music (3.0); 3 cr. Musical intelligence, development of musical principles, intervals, and scales. Prerequisite: MUS 352.

MUS 451 Applied Music Instrumental or Vocal VI (1.0); 1 cr. Private lessons with the teacher on the student’s major instrument: Knowledge of 50% of the Latin program or its equivalent. Prerequisite: MUS 441.

MUS 452 Harmony III (1.0); 1 cr. Retardation, pedal points, passing tones, neighboring tones, anticipation, the appoggiatura, and escape notes. Prerequisite: MUS 352.

MUS 453 Sight Singing, Rhythmic Chanting, and Ear Training V (1.0); 1 cr. Sight singing and ear training exercises
in simple keys with advanced rhythms. 
Prerequisite: MUS 353.

MUS 454 Instrumentation (3.0); 3 cr. Study of instrumentation and arranging different music to different ensembles. 
Prerequisite: MUS 352.

MUS 455 Orchestration (3.0); 3 cr. Art of orchestra composing based on the evolution of instruments and music Schools.

MUS 462 Counterpoint and Fugue (1.0); 1 cr. Writing music for more than one voice in the modal styles of the organum, Motet... to fugue. 
Prerequisite: MUS 352.

MUS 463 Sight Singing, Rhythmic Chanting, and Ear Training VI (1.0); 1 cr. Sight singing and ear training exercises in all tonalities, and the C-clef. Prerequisite: MUS 453.

MUS 475 Acoustics of Music (3.0); 3 cr. Principles of sounds. Science of sound and the process of hearing. The study of hall acoustics.

Undergraduate Courses: Music Education

MUE 335 Music Education (3.0); 3 cr. A survey of the various musical education methods, such as the Orff, Dalcroze, Kodaly, Suzuki, and other methods.

MUE 446 Teaching Music at the Elementary Level (3.0); 3 cr. Writing lesson plans appropriate to the elementary level and applying them. Learning teaching methods suitable for the age group (6-11).

MUE 474 Child Theater Music (3.0); 3 cr. This course is divided into two parts: one theoretical and the other practical. This course requires music majoring students to study and apply the learned material to create and develop theatrical events for children in neighbouring schools.

MUE 476 Teaching Music at Secondary Level (3.0); 3 cr. Writing lesson plans appropriate to the secondary level and applying them. Learning teaching methods suitable for the age group (12-17).

MUE 479 Lebanese Folk Educational Music (3.0); 3 cr. This course centers upon a variety of music folk education covering a wide span beginning with the childhood to adulthood. Special emphasis will be on exploring the local folk musical trends and traditions which would drive the educator to focus on local modalities: rhythms and forms.

Undergraduate Courses: Musimedialogy

MUM 347 Computer and Music (3.0); 3 cr. Introduction to different musical notation and MIDI programs.

MUM 350 Audio-Video Music Workshop (3.0); 3 cr. The art of using Audio-Video equipment within the context of musical software for composition such as “Nuendo, VSTs” and other listening and working tools. This course adds an extra dimension to this Audio-Video art, serving as well as composing and producing an audio work,
conceiving and realizing music for video in its broadest meaning, from advertising music to purely music composing. Students will be exposed to new tools, ways and skills of composing during the course.

**MUM 354 Organology of music (3.0); 3 cr.** Music Prototype Instruments manufacture and evolution through history: Strings, winds..., ear, and vocal cords.

**MUM 437 Music Management (3.0); 3 cr.** Business aspects of the arts; selecting suitable musical acts for performances, providing the venue, selecting the program, promoting the act, and selling the tickets, rules and P.R. required for musician relation with consumer public and producers. Music Managements study the procedures and techniques applied to administer and manage areas in the musical industry such as choirs, classes, concerts, production, festivals, musical events, management of talented artists through the public marketing of the final production.

**MUM 447 Survey of Art Schools (1.0); 1 cr.** A course surveying the Art schools aiming at preparing the Musical Criticism.

**MUM 448 Musical Criticism (3.0); 3 cr.** Writing musical critiques, reviews, and previews of musical events.

**MUM 457 Radio and Television Music Casting (3.0); 3 cr.** Performing critiques, reviews, and previews of musical events, live or taped on the radio or the television. Students are required to maintain 2 free hours, one before and the other after the lecturing time of the course.

**MUM 474 Music Law (3.0); 3 cr.** The course focuses on the national, regional and international laws protecting the rights of composition, production, distribution, and marketing locally and internationally. Students will be acquainted with the various international organizations protecting intellectual property such as SACEM, WTO and others.

---

### Undergraduate Courses: Arabic Musicology

**MUA 218 Arabic Prosody (2.0); 2 cr.** علم العروض، الأوزان الشعرية العربية وإيقاعاتها، موسيقى الشعر

**MUA 222 Arabic Music Theory I (3.0); 3 cr.** (Theory, Maqamat, rhythms and forms).

**MUA 227 Arabic Music Theory II (3.0); 3 cr.** تحليل معقّدة للنظريات الموسيقية العربية: نظريات الموسيقى العربية، المقاطع المركبة وإيقاعات المركّبة.

**Prerequisite:** MUA 222.

**MUA 228 History and Analysis of Western Music A (3.0); 3 cr.** The course is a condensation of two courses MUS 224 and MUS 234.

**MUA 234 History and Analysis of Arabic Music II (2.0); 2 cr.** Al-Kindy - Andalusian music.

**MUA 254 History of Arabic music I. (3.0); 3 cr.** A general survey of the history of Arabic music from the beginning to the contemporary era.

**MUA 318 Qoran Chanting (2.0); 2 cr.** (الإنشاد القرآني)

**MUA 324 History and Analysis of Arabic Music III (3.0); 3 cr.** Al-Farabi.
MUA 332 Arabic Music Theory III (2.0); 2 cr.  
Khaliel Moushaqa, Al-Ikhawan Al-Safa, Ibn Rushd.

MUA 334 History and Analysis of Arabic Music IV (2.0); 2 cr.  
Ibn Sina, Al-Ikhawan Al-Safa, Ibn Rushd.

MUA 343 Oriental Sight Singing 1 (1.0); 1 cr.  
Soufijeh Shami

MUA 344 History and Analysis of Arabic Music V (2.0); 2 cr.  
Cairo Congress of Arabic Music 1932-1934 Michael Moushaqa and contemporary theorists.

MUA 343 Oriental Sight Singing 2 (1.0); 1 cr.  
Soufijeh Shami 2. Prerequisite: MUA 343.

MUA 363 Oriental Sight Singing and Ear Training 3 (1.0); 1 cr.  
Soufijeh Shami 3  
Prerequisite: MUA 353.

MUA 364 History and Analysis of Arabic Music VI (3.0); 3 cr.  
Arab Renaissance-Modern Arabic Music.

MUA 363 Oriental Sight Singing and Ear Training 4 (1.0); 1 cr.  
Soufijeh Shami 4  
Prerequisite: MUA 363.

MUA 374 Arabic Instrumental Ensemble (2.0); 2 cr.  
This course offers the student the possibility to apply within an ensemble the Arabic Music Instrument he plays or the Arabic Chanting he studied, not withstanding that the difference between playing instrument and singing alone would not provide the student the same knowledge and experience compared to the same application in a group.

MUA 374 Arabic Instrumental Ensemble (2.0); 2 cr.  
This course offers the student the possibility to apply within an ensemble the Arabic Music Instrument he plays or the Arabic Chanting he studied, not withstanding that the difference between playing instrument and singing alone would not provide the student the same knowledge and experience compared to the same application in a group.

MUA 374 Arabic Instrumental Ensemble (2.0); 2 cr.  
This course offers the student the possibility to apply within an ensemble the Arabic Music Instrument he plays or the Arabic Chanting he studied, not withstanding that the difference between playing instrument and singing alone would not provide the student the same knowledge and experience compared to the same application in a group.

MUA 424 History and Analysis of Arabic Music V (2.0); 2 cr.  
Cairo Congress of Arabic Music 1932-1934 Michael Moushaqa and contemporary theorists.

MUA 424 History and Analysis of Arabic Music V (2.0); 2 cr.  
Cairo Congress of Arabic Music 1932-1934 Michael Moushaqa and contemporary theorists.

MUA 444 History and Analysis of Arabic Music VI (3.0); 3 cr.  
Arab Renaissance-Modern Arabic Music.

MUA 444 History and Analysis of Arabic Music VI (3.0); 3 cr.  
Arab Renaissance-Modern Arabic Music.

MUA 463 Oriental Sight Singing and Ear Training 4 (1.0); 1 cr.  
Soufijeh Shami 4  
Prerequisite: MUA 363.

MUA 477 Andalusian Music (3.0); 3 cr.  
Al-Omara Al-Baghdadi, Al-Musawir.

MUA 477 Andalusian Music (3.0); 3 cr.  
Al-Omara Al-Baghdadi, Al-Musawir.
Undergraduate Courses: Jazz Music

**MUJ 311 Jazz Sight Singing, Ear Training and Rhythmic Analysis I (1.0); 1 cr.** The course deals with the basic sight singing so that students would begin to grasp the specificities of elementary level of Jazz melody and rhythm. Practicing by voice and instrument are an integral part of this course.

**MUJ 322 Jazz Sight Singing, Ear Training and Rhythmic Analysis II (1.0); 1 cr.** The course provides students with an intermediate level of learning the specificities of Jazz melody and rhythm based mainly on major and minor. *Prerequisite:* MUJ 311.

**MUJ 324 History and Analysis of Jazz Music I, (2.0); 2 cr.** The course provides an historical and analytical overview of the Jazz roots and development. It focuses on the works of the master Jazz composers, starting with Oliver till Hawkins.

**MUJ 325 History and Analysis of Jazz Music II, (2.0); 2 cr.** The course provides an advanced analysis of the works and performance of the Jazz master composers and performers during the thirties.

**MUJ 342 Jazz Theory I, (1.0); 1 cr.** Theory of Jazz Music is divided into two credit courses to be taught in the span of two academic semesters: MUJ 342 and MUJ 352. This course provides in addition to the classical theory of music, the specific foundations of Jazz Theory and harmony. MUJ 342 begins with basic Jazz Theory, the Major Scale and the II-V-I Progression, Chord, Major Scale Harmony, Melodic Minor Scale Harmony, Diminished Scale Harmony, Whole Tone Scale Harmony, to how to practice Scales and Slash Chords. The course will be taken in conjunction with other four semesters courses dealing with Sight Singing and Ear Training.

**MUJ 345 Afro-Cuban Music and Percussion (2.0); 2 cr.** The course explores from a historical perspective the various styles of Afro-Cuban Music and Percussion along its dual relationship to the Jazz language. The percussion instruments are all studied and explored in group setting. Afro-Cuban religious ceremonial rhythms, in addition to drum set applications, are also covered. The course also focuses in depth upon the analysis and knowledge of the inner workings of clave and basic techniques on the major battery of Afro-Cuban percussion (congas, bongo, timbales) in addition to minor battery (maracas, guiro, shakers, cowbells, etc.).

**MUJ 352 Jazz Theory II, (2.0); 2 cr.** In continuity with Jazz Theory I, this course includes improvisation from Scales to Music, the Bebop Scales, playing “Outside”, Pentatonic Scales, the Blues, “Rhythm” changes, melodic construction, choir voicing and voice leading. The course aims at exposing students to other important and related topics to include basic music analysis, the blues, standard Jazz forms and typical chord substitutions. *Prerequisite:* MUJ 342.

**MUJ 355 American Ethnic Music (2.0); 2 cr.** American Ethnic Music role is considered as the basis (raw material) for creation and development of the Jazz music in addition to contributions offered by African and Asian ethnic music. This American music culture has been a faithful mirror of the pluralistic ethnic American socio-cultural composition.

**MUJ 356 African and Far-East Ethnic Music (2.0); 2 cr.** The course studies in depth the basic connecting relations between the African music: melody, modalities and rhythms recognized as the inspirational source of jazz, developed by the Afro-American symbiosis of the people and cultures. The same applies to the Far-Eastern cultural contributions.

**MUJ 411 Jazz Sight Singing, Ear Training and Rhythmic Analysis III (1.0); 1 cr.**
MUJ 422 Jazz Sight Singing, Ear Training and Rhythmic Analysis IV (1.0); 1 cr. This is an advanced level in learning sight singing and ear training of Jazz music. It focuses on reaching and analyzing complex melodies and rhythms. Prerequisite: MUJ 411.

MUJ 434 History and Analysis of Jazz Music III, (2.0); 2 cr. The course focuses on the development of the Jazz music during the fifties and sixties with special emphasis on the works of the masters of this period.

MUJ 435 History and Analysis of Jazz Music IV, (2.0); 2 cr. Students will be exposed to the evolution of the Jazz language, styles and forms as presently performed.

MUJ 464 Gospel Chorus (2.0); 2 cr. The course is designed for all students interested in singing gospel music: styles, ranging form traditional to contemporary schools. A special emphasis will be on phrasing, stamina and singing techniques.

MUJ 474 Jazz Ensemble I (1.0); 1 cr. The course offers the students the opportunity to prepare him/herself, accompanied by the instructor, to master, and qualify as a competent member of the Jazz ensemble. The course encompasses the elementary forms of the big band.

MUJ 475 Jazz Ensemble II (1.0); 1 cr. This course is an advanced level of Jazz ensemble. The main objective centers upon giving the student the necessary experience from playing in a band and spending longer time into applying the practical side of learning. It develops sight reading skills and creativity in the student so that he/she might be able to perform arrangements and compositions as well as playing in bands. (Students who register for this course should understand that each teaching hour tends from two to three hours in practice).

MUJ 485 Jazz Arranging I (2.0); 2 cr. The course provides the student with the basic techniques and methods to arrange existing Jazz melodies for small groups.

MUJ 486 Jazz Arranging II (2.0); 2 cr. In this advanced level the student will master the techniques regarding voicing, instrument sonorities, capabilities and other extended forms. It focuses on large group. Prerequisite: MUJ 485.

MUJ 494 Advanced Re-harmonization I (1.0); 1 cr. This course provides the students with an overview of the variety of techniques for re-harmonization. Prerequisite: Theory of Music II or equivalent.

MUJ 495 Advanced Re-harmonization II (1.0); 1 cr. The course will focus in-depth on materials stressing the pedal point and the creation of chromatic voicing to enable students develop a personalized relationship with the harmony. Prerequisite: MUJ 494.

MUJ 422 Jazz Sight Singing, Ear Training and Rhythmic Analysis IV (1.0); 1 cr. This is an advanced level in learning sight singing and ear training of Jazz music applied to accidental and ethnic modalities that Jazz had developed. Prerequisite: MUJ 322.

MUJ 434 History and Analysis of Jazz Music III, (2.0); 2 cr. The course focuses on the development of the Jazz music during the fifties and sixties with special emphasis on the works of the masters of this period.

MUJ 435 History and Analysis of Jazz Music IV, (2.0); 2 cr. Students will be exposed to the evolution of the Jazz language, styles and forms as presently performed.

MUJ 464 Gospel Chorus (2.0); 2 cr. The course is designed for all students interested in singing gospel music: styles, ranging form traditional to contemporary schools. A special emphasis will be on phrasing, stamina and singing techniques.

MUJ 474 Jazz Ensemble I (1.0); 1 cr. The course offers the students the opportunity to prepare him/herself, accompanied by the instructor, to master, and qualify as a competent member of the Jazz ensemble. The course encompasses the elementary forms of the big band.
The Degree of Master of Arts in Music

Graduate study in Musicology covers approaches such as historical and ethnomusicological investigation as well as hermeneutics, semiotics, and criticism. Students are expected to become familiar with a wide range of areas: methods, philosophies, and techniques of historical research methods for analysis of music and ethnomusicological research.

Students enrolled in the program are expected to familiarize themselves with the current state of musicological research and thinking through independent study as well as in consultation with faculty members. Students are also expected to take an active part in the working musicological community at large, through participation in regional, national, and international meetings and concomitant informal contacts with students and faculty at other institutions.

The program aims:

- To develop and sharpen the skills each student needs to realize his or her future specialization intentions;
- To expand each student's conception of what is possible in construing music performance or research through speculation and experimentation;
- To develop a larger and sharper sense of the context in which the students work, and on which it depends by continued study and research.

Admission Requirements

Applicants will normally hold a Bachelor degree in Music or an equivalent qualification. They need to submit an extended piece of writing on a musical subject in order to provide evidence of writing skills and intellectual ability appropriate for musicological study at master’s level. An English test is required except for students majoring in Arabic music. Selection is based on information submitted by the applicant, and by interview when necessary.

Transfer

Although transfer is not generalized, some credits from major universities can be transferable upon admission by the Committee. A transferred course must be passed at the grade of 80 according to the NDU grading and University Bylaws. In addition, applicants for the graduate program may be granted a maximum of nine transfer credits of graduate studies taken at another accredited institution of higher education provided that the transfer course(s) correspond to the NDU course requirements.

Graduation Requirements

To receive the degree of Master of Arts in Music, a student must complete a total of 36 credits with a minimum cumulative GPA of 3.0/4.0 in all Major Courses.

Structure and Time-table

The program is delivered over four semesters. All students, whether full- or part-time, initially complete the program requirements, and attend the research method course. Classes are normally timetabled in the afternoons.

The program moves from general methodological concerns towards greater specialisations:
• Research methodology.
• Academic study. All students are required to take courses in Musical Thought, languages and aesthetics.
• Dissertation. Here students embark on a programme of independent study, supervised by a dissertation advisor.

Degree Requirements (36 Credits)

Major Courses 36 cr.
MUS 615, MUS 616, MUS 617, MUS 625, MUS 626, MUS 627, MUS 636, MUS 637, MUS 638, MUS 639, MUS 699.
MUS 615 Methodology of Research (3.0); 3 cr. The students learn the art of writing the M.A. thesis. In this course, students will use a variety of methods, skills, and sources, including, but not limited to, qualitative and quantitative information, i.e. documentation techniques. Students will need to focus on the application side of methodological techniques and international theory displaying the ability to analyze, discover, evaluate, and using the actual archives, musicological tools and technology, and other source or reference material.

MUS 616 Seminar in Musicology I (3.0); 3 cr. Original work in areas of current musicological significance will be presented to and reviewed by the seminar as the occasion arises. Emphasis is given to student projects, but work in progress by any member of the seminar may be discussed or a topic of particular controversy examined.

MUS 617 Seminar in Musicology II (3.0); 3 cr. A Student may chose a free subject related to his/her one musical interest that he/she may specialize in for his/her PhD.

MUS 625 Seminar in Ethnomusicology I (3.0); 3 cr. Research Methods in Ethnomusicology: Musical Ethnography, an introduction to the theories and methods of ethnomusicological fieldwork, including changing conceptions of the research site, ethical concerns, interview techniques, the ethnography of musical performance, and data analysis and interpretation. Individual research project required.

MUS626 Seminar in Ethnomusicology II (3.0); 3 cr. Ethnomusicology: Theory and Structure of oriental or occidental Classical Music. Students analyze rhythmic and melodic structures of musical genres and forms, examine relative explanatory tools and assess alternate theories of Music material.

MUS 627 Art Criticism (3.0); 3 cr. This course studies the methods used by various schools of art criticism throughout history with special emphasis on helping students see how technology and the diversity of languages in modernity have influenced contemporary methods of art criticism.

MUS 636 Aesthetic Philosophy (3.0); 3 cr. This course investigates the fundamental nature or soul of art and aesthetic experience. Students explore and scrutinize the artistic theories and aesthetic principles that are presupposed in both Western and Eastern art. This course provides students with both a personal appreciation of aesthetics, as well as a basic ability to apply this appreciation to art criticism.

MUS 637 Modern Music: 1900 - 1960 (3.0); 3 cr. A survey of major works from occidental music, spanning the first six decades of the 20th century. Divided into three periods: 1900 to World War I; WWI to WWII; and 1945 to the early 1960s. The following composers receive greatest attention: Schoenberg, Berg, Webern, Ravel, Stravinsky, Prokofiev, Shostakovich, Ives, Britten, Messiaen, Stockhausen, and Carter. By studying the great masters of modern music, the student would learn how to discern their creations in order to produce and apply his/her own particular musical language using new elements of his/her own cultural content.

MUS 638 Serial Music (3.0); 3 cr. A critical examination primarily of twelve-tone serialism. Particular emphasis is given to the relations embodied in the twelve-tone set and its transformations, associated invariants, combinatorial, derivation, and aggregate structure, with reference to representative compositional realizations. The dimensions and the levels of structure

Graduate Courses: Music
that do not necessarily manifest set relations are also examined.

**MUS 639 The Music Industry (3.0); 3 cr.**
The course will assist the student to invent and invest in music. It prepares the student for a more fruitful interaction with the present techniques and music technology by managing the world of sound from the microphone to the commercial music items.

**MUS 699 Thesis (6.0); 6 cr.** A dissertation of around 15,000 words on an agreed subject is required.
The Degree of Bachelor of Arts in Decorative Arts and Crafts

Mission
The Bachelor of Arts in Decorative Arts and Crafts is a degree program for students planning to become professional artists and designers. The program is designed to provide the essential skills in: Ceramics, Jewelry/Metalsmithing, Wood/Furniture and Textiles/Fibre Arts. Students will acquire a thorough understanding of materials, techniques inspired from traditional methods and new technologies including computer applications. They will work with 2D and 3D applications with an emphasis on creative approaches to design, craftsmanship and personal interpretation.

The program aims at developing the aesthetic and practical aspects in the creation of functional or one of a kind collections and artworks.

Graduates will become craft artists/designers in jewelry, ceramic, textile, metal, wood and furniture. They may design for the industry, while others start their own business or build an exhibition portfolio as a Fine Artists.

Program Educational Objectives
- To provide an understanding of historical and contemporary issues in the various craft disciplines;
- To demonstrate critical understanding of the technical and creative processes in the creation of Art and Design pieces;
- To employ critical and creative research to enable students to produce their unique Art and Design creation;
- To engage with ethical, social and environmental issues associated with craft to attain standards of excellence in students to become professional artists and designers;
- To apply technological innovations and creative processes in Ceramics, Metalsmithing & Jewelry, Fiber Arts and in Wood & Furniture;
- To develop communication skills.

Program Learning Outcomes
By completing BA in Decorative Arts & Crafts, students will be able to:
- Communicate personal Arts and Craft in professional formats;
- Produce original pieces in ceramics, fiber arts, metal smithing, jewelry, wood and furniture, while respecting ethical and sustainable aspirations;
- Contextualize Arts and Craft trends and recognize cultural, theoretical and historical influences;
- Develop and utilize critique skills to improve creative work;
- Embrace technical development and proficiency of various craft techniques within their specific field area;
- Communicate and articulate ideas via conversation, presentation skills and writing.

Admission Requirements
In addition to the University admission requirements, prospective candidates must
complete any remedial English course(s) the first year of enrollement. Students who fail to meet the above requirements will not be allowed to proceed to the degree courses in Decorative Arts and Crafts and other majors in the Art Department of the Faculty of Architecture, Art & Design.

**Graduation Requirements**
To receive the degree of Bachelor of Arts in Decorative Arts and Crafts, a student must complete a total of 102 credits with an overall grade-point average of at least 2.0/4.0 and a minimum cumulative grade point average of 2.3/4.0 in all Core and Major Courses. All major courses with a grade of less than C- must be repeated. The 102 credits necessary for graduation are divided as follows:

<table>
<thead>
<tr>
<th>Degree Requirements: Decorative Arts and Crafts (102 credits)</th>

Undergraduate Courses: Decorative Arts and Crafts

FAC 213 History of Decorative Arts and Crafts (3.0); 3 cr. This course examines major achievements from prehistoric period to the beginning of the 20th century, with a focus on 17th through early 20th centuries European and American decorative arts. The course covers ceramics, fiber arts, metalsmithing, jewelry, wood and furniture. Emphasis is placed on how craft objects reflect the culture, the societies and the times in which they were created. Required: students should have passed all remedial English courses to enroll in this course.

FAC 222 Conceptual Visual Thinking: Arts and Crafts (2.2); 3 cr. This course uses design elements and principles for the creation of 3-D objects. The application of material and processes are drawn from the fiber arts, metals, wood, clay and mixed media. Forming techniques may use methods such as basketry, felting, paper or clay casting, wood carving, wiring, and deconstruction of found material. Prerequisite: GDP 212, FAC 213.

FAC 223 Applied Modelling and Rendering I (2.2); 3 cr. Computer modeling and rendering have become an essential procedure for artists and designers who seek for accuracy and presentation for the main goal to concretize their ideas with the utmost accuracy and realism. The course covers the basic concepts of 2D and 3D modeling and rendering: modeling, lighting, texture mapping and rendering are introduced in a production setting. Corequisite: FAC 222.

FAC 325 Contextual Studies in Modern and Contemporary Crafts (3.0); 3 cr. This course will introduce students to Contemporary Craft theory and practice. Students will become familiar with the recent history of contemporary Craft movements, practitioners and their motivation. The role of craft as an expressive Art form will be explored as well as its role in industrial Design. They will learn about the complex debates surrounding contemporary Craft's “raison d'être” and become aware of the varying points of view attributed to the leading authors of this field. Prerequisite: FAC 222.

FAC 331 Pottery and Ceramics (2.2); 3 cr. Pottery and Ceramics will concentrate on basic hand building techniques: such as mixing and de-airing, pinching, coiling, slab building, wheel throwing. The student will be introduced to glazing and kiln firing.

FAC 332 Application in Fibers (2.2); 3 cr. An overview of fabric construction processes emphasizing structure and applications in fiber arts including loom or non-loom weaving, basketry, felting, knotting, and papermaking. Procedures for warping, drafting pattern, texture and color problems are considered.

FAC 333 Metallurgy (2.2); 3 cr. This course will cover the basic hand made techniques in metalsmithing enabling the student to acquire the needed skills in jewelry making.

FAC 334 Wood (2.2); 3 cr. Introduces the students to various wood finishes used in Decorative Arts and Crafts. Students are expected to explore the different kinds of wood and its characteristics. Creative projects will be tackled during the semester exploring unlimited possibilities with wood.

FAC 341 Glazing and Surface Effects (2.2); 3 cr. Once the student potter has developed a thorough understanding of the capacity of clay as a medium of creation based on basic hand-building techniques and has been introduced briefly to glazing in the previous FAC 331 “Pottery & Ceramic” course; now the student is in a position to indulge deeply in enlarging his spectrum
of glazing and surface effects which will fuse in harmony with form and function. *Prerequisite:* FAC 331.

**FAC 342 Surface Design (2.2); 3 cr.** This course considers all aspects of surface design covering styles, the use of imagery, repeats, printing, dying, fiber properties and fabric finishes. *Prerequisite:* FAC 332.

**FAC 343 Jewelry (2.2); 3 cr.** Having completed FAC 333 ‘Metalsmithing’ course and apprenticeship, the student should be qualified to step ahead in jewelry designing and making. This course focuses exclusively on designing, making a skillfully crafted conceptual piece of jewelry and miniature scaled sculptures. It is based on creating silver and copper jewelry with enamel finishing and patination techniques. *Prerequisite:* FAC 333.

**FAC 344 Wood and Furniture (2.2); 3 cr.** The course will investigate physical and psycho-logical human factors to better understand the relation between humans and their furniture. Stress will be mainly on the use of wood to create contemporary furniture responding to ‘day to day’ needs. Reading, research, and workshops are held to investigate the characteristics of wood, way and means of construction. *Prerequisite:* FAC 334.

**FAC 345 Applied Modelling and Rendering II (2.2); 3 cr.** This course builds upon skills introduced in FAC 223 “Applied Modeling & rendering I” course. Being familiar with main modeling and rendering tools of 3D software, students will develop their 3D modeling and rendering skills, mastering the software modeling tools through more complex geometry, advanced rendering techniques, and animation. *Prerequisite:* FAC 223.

**FAC 431 Architectural Ceramics (2.2); 3 cr.** Students will learn to design and execute architectural ceramic projects in response to their own creative ideas and concepts with a deep understanding and great consideration of historical and contemporary architectural ceramics in different cultures and civilizations. Focus will be on developing basic forming techniques in particular, slab-building, glaze, surface texturing techniques and others, encouraging students to research and go beyond the traditional boundaries. The main goal of this course is to create and make architectural ceramic projects reflecting all learnt skills into an innovative conceptual context which will perfectly fit in the surrounding environment. *Prerequisites:* FAC 331, FAC 341.

**FAC 432 Concepts in Contemporary Fibers (2.2); 3 cr.** This course is designed to allow students to pursue in more depth the ideas and techniques introduced in FAC 332 “Application in fibers” and FAC 342 “Surface Design”. Students investigate contemporary uses of weaving, printing, knitting, or any improvised construction techniques. Using both handlooms and dobby looms, students may explore more possibilities in weaving. Material quality, color, and potential end use will be part of the criteria for analyzing work. Students’ work can range from installations to two-dimensional pieces. *Prerequisites:* FAC 332, FAC 342.

**FAC 433 Contemporary Jewelry (2.2); 3 cr.** This course focuses on designers-makers who will create both the concept and the perfectly crafted piece of jewelry. It includes researching and working with a very wide range of materials, organic and synthetic, and demonstrates both that craftsmanship is paramount and that contemporary jewelry is accessible to all, creating a self-expressive piece which will become the precious antique of the future. *Prerequisites:* FAC 333, FAC 343.

**FAC 434 Special Topic: Wood and other Material (2.2); 3 cr.** This is a conceptual and technical course in which the senior student associates different disciplines to develop
and execute in a high level of proficiency a prototype production using wood as the main element. Students will progressively develop analytical problem solving and explore the different possibilities of productive implementation. Prerequisites: FAC 334, FAC 344.

**FAC 445 Senior Studio Craft (2.2); 3 cr.**

This course is designed for students to prepare a substantial body of work culminating in a senior exhibition. The course emphasizes the students’ independent work and will help them integrate the learning acquired throughout the curriculum.

Prerequisites: FAC 334, FAC 344.

**FAC 446 Craft and Entrepreneurship (3.0); 3 cr.**

This course is designed to guide students through the process of developing their arts and crafts related ventures, from concept initiation to branding scenario identification. The study involves thorough concept development, market research and feasibility studies for the venture’s business plan. Corequisite: FAC 445.

---

**Undergraduate Courses: Fine Arts**

**FAP 101 Introduction to Music and Art (3.0); 3 cr.** Introduces students to techniques and representative works in the music and arts of various periods.

**FAP 201 Intro to Painting (2.2); 3 cr.** Introduces the student to different materials of painting, construction, composition and paint handling.

**FAP 203 Intro to Ceramics (2.2); 3 cr.** This course will allow the students to build forms from clay using basic handbuilding techniques and the potter’s wheel.

**FAP 211 Drawing I (2.2); 3 cr.** Eye and hand coordination are developed through the use of different drawing techniques.

**FAP 214 Performing Arts and Music (2.2); 3 cr.** Designed to enhance student’s creativity in discovering the fields of theater, dance and music.

**FAP 215 Art and Culture (1.2); 3 cr.** The course focuses on how artworks reflect the culture, the societies, and the times. Students will learn to see, analyze, and understand the works of art in relation to the relevant context. This course will be organized thematically and will explore modern issues from historical, cultural and social perspectives.

**FAP 221 Drawing II (2.2); 3 cr.** Drawing is encouraged through observation and application. The human figure is considered in relation to the environment. Prerequisite: FAP 211.
The Faculty of Business Administration and Economics is a member of AACSB International The Association to Advance Collegiate Schools of Business. www.aacsb.edu/about.

FACULTY PROFILE

Founded in 1987 as the School of Business Administration, the newly established School catered for 78 students and marked a new era in business education in Lebanon. The name was changed to the Faculty of Business Administration in 1994 and to the Faculty of Business Administration and Economics (FBAE) in 1996. Since then, the FBAE has grown in enrolment and in programs. The FBAE is home today for more than 2000 students at the three University campuses: Zouk Mosbeh (main), Barsa (North Lebanon), and Deir El Kamar (Shouf).

Currently, four main departments constitute FBAE (the Graduate Division, Department of Accounting and Finance, Department of Economics, Department of Marketing and Management, and Department of Hotel Management and Tourism), and offer nine licensed degrees with different concentrations including three programs at the graduate level. In addition to these degrees, the Faculty offers more than ten minors and emphasis areas. These tracks are designed to give our students a competitive advantage when it comes to managing their current or future careers. Thus, although relatively young compared to its competitors, the FBAE has accomplished phenomenal achievements in its short history and has received praise from local and regional employers for the academic and professional qualities of its graduates.

The demands for FBAE programs made it one of the fastest growing Faculties at Notre Dame University-Louaize. Conscious about the professional responsibilities and civic duties imposed by its success, the FBAE is continuously being renewed and transformed. July 2013 witnessed a new episode of FBAE’s life. The Faculty successfully achieved membership of the AACSB, the Association to Advance Collegiate Schools of Business. Since then, the FBAE embarked on preparing the grounds for achieving this prestigious North American Accreditation. From this perspective, Assurance of Learning as well as faculty sufficiency and qualifications became central to all Faculty operations. Moreover, multiple streams of action were planned and implemented, informed by the AACSB pillars (Innovation, Impact, and Engagement) and based on the detailed five-year Strategic Plan’s goals and objectives (2014-2019).

MISSION, VISION, AND VALUES

Mission
Consistent with the University mission, the Faculty of Business Administration and Economics at NDU strives for excellence in teaching and community involvement, as well as relevant research. We instill in our students the necessary knowledge, skills, and moral values to become ethical and socially responsible professionals within the framework of a liberal arts system of higher education. The Faculty collaborates with local, regional, and international stakeholders for mutually beneficial exchange of knowledge and expertise. We also promote fair advancement opportunities for faculty and staff, and we endeavor to provide our students with a stimulating educational environment.

Vision
To be identified as a premier business school to work and study at, offering life-transforming experiences that are directly relevant to the local and regional market place.

Values
Consistent with those of the University, the FBAE is inspired by the following values:
• Openness and faith;
• Performance and accountability;
• Freedom and enquiry;
• Empowerment and engagement;
• Life-transforming experiences.

ACADEMIC DEPARTMENTS AND DEGREE PROGRAMS
The Faculty of Business Administration and Economics has a graduate division and three undergraduate departments, offering a Master of Business Administration, a Master of Science in Financial Risk Management, a Master of Science in Business Strategy, a Bachelor of Business Administration, a Bachelor of Science in Economics, and a Bachelor of Hotel Management and Tourism.
UNDERGRADUATE DEGREES

Bachelor of Business Administration

The Department of Accounting and Finance and the Department of Management and Marketing offer programs leading to the degrees of Bachelor of Business Administration, whereas the department of Economics offers the Bachelor of Science in Economics.

Liberal Arts Core Curriculum

Category I. English and Arabic Communication 9 cr.

A. English Communication 6 cr.
   ENL 213 Sophomore Rhetoric 3 cr.
   And
   ENL 230 English in the Workplace 3 cr.
   Or
   ENL 223 Communication Arts 3 cr.

B. Arabic Communication (One from the following pool) 3 cr.
   ARB 211 Appreciation of Arabic Literature
   ARB 212 Applied Arabic Grammar
   ARB 224 Arabic Literature and Human Thought
   ARB 231 Technical Arabic
   ARB 306 The Modern Arabic Novel and Short Story
   ARB 310 Arabic Theate

Category II. Religion 3 cr.

REG212 Religion and Social Issues
REG 213 Catholicism
REG 215 World Religions
REG 313 Maronite Faith and Cultural Heritage
REG 314 Marriage and Family in the Catholic Church

Category III. Ethics 3 cr.

COA 360 Media Ethics
ENG 310 Ethics in Engineering
BAD 431 Business Ethics
CSC 203 Information Age and Ethics
ENS 205 Environment, Society and Ethics
PHL 311 Ethics and the Modern World
POS 345 Ethics and Leadership
NUR 203 Introduction to Bioethics

Category IV. Citizenship 3 cr.

POS 201 Introduction to Political Science
POS 209 Citizenship
POS 210 Government and Politics of Lebanon
POS 319 Democracy and Human Rights
POS 240 Law and Society
FQM 200 Food Security and Sustainability
Category V. Cultural Studies 6 cr.

A. Cultural Studies
- PHL 211 Logic and the Scientific Method
- PHL 232 Ancient World Philosophy
- PHL 333 Medieval World Philosophy
- PHL 334 Modern and Contemporary World Philosophy
- LIR 214 Introduction to Literary Genres
- LIR 217 American Literature to the End of the 19th Century
- LIR 305 Novel to the End of the 19th Century
- ARP 215 Cultural Themes in Lebanese Architecture
- FAP 215 Art and Culture
- MUS 210 Music Appreciation
- HIT 211 History of Lebanon
- POS 225 Politics of Catholic Social Theory
- TTM 326 Domestic Travel and Tourism Development
- TTM 201 Introduction to Tourism & Hospitality Management
- NTR 215 Foods and Nutrition of World Cultures
- COA 315 World Cinema Survey
- COA 350 Current Issues

Category VI. Applied and Life Sciences 6 cr.

A. Applied Science
- CSC 201 Computers and Their Use
- CSC 202 Computers for Visual Arts
- GIS 211 Principles of Geographical Information Sciences
- MIS 201 Management Information Systems
- MAT 202 Mathematics for Arts

B. Life and Natural Sciences
- BIO 201 Your Body in Action
- HEA 201 Health Awareness
- HEA 204 Contemporary Health Issues
- NTR 201 Basic Human Nutrition
- CHM 211 Principles of Chemistry
- AST 201 Discovering Astronomy
- ENS 201 Introduction to Environmental Science
- ENS 202 The Environment and Sustainable Development
Undergraduate Degree Curricula
I. Bachelor of Business Administration (B.B.A.)

Required Common Core courses
All candidates for the B.B.A. degree, irrespective of their area of concentration, must complete the following required common courses. These courses are designed to provide business students with basic management skills (quantitative, behavioral, and technical) which every manager should possess in order to meet the demanding requirements of modern business organizations and to be able to face new challenges. The courses are:

ACO 201 Principles of Accounting I
ACO 202 Principles of Accounting II
ACO 311 Managerial Accounting (not required for majors in the Marketing and Mgt
BAD 201 Fundamentals of Management
BAD 311 Business Law (not required for Financial Engineering Emphasis)
BAD 323 Software Tools for Bus. Application
BAD 453 e-Business
BAF 311 Principles of Financial Management I
ECN 211 Principles of Microeconomics
ECN 212 Principles or Macroeconomics
ECN 333 Managerial Economics
MRK 201 Fundamentals of Marketing
STA 206 Applied Statistics for Bus. and Eco. I
STA 207 Applied Statistics for Bus. and Eco. II
MAT 205 Math for Business and Economics II
ACO 201, ACO 202, ECN 211, ECN 212 and BAF 311 require a minimum passing grade of C.

Major Requirements
Candidates should complete certain concentration courses specified by their respective departments. Together with the common required courses, these courses provide some depth in one particular area of business. For the courses required for each concentration, see the concerned degree requirements.

Free Electives
Business students except students following Healthcare Management and Financial Engineering emphasis must choose six to seven credits offered by any Faculty.

Internship Program
Internship provides an opportunity for business majors to test and utilize theories learned in the classroom. It gives valuable on-the-job experience, and facilitates finding employment. The internship should be related to the students’ majors, and should consist of a specific project. Seniors are placed in the offices of cooperating firms under the supervision of staff of the firm. The student earns 1 credit. To earn this credit, the intern should work for 120 to 150 hours (depending on the concentration). He/she should keep a record for hours worked signed by his/her direct supervisor. He/she should present periodic reports and at the end of the internship, he/she should write a 10-page report on the internship, verified by the authorized supervisor. It is preferable to have the internship in the summer.

Additional details are available with the internship advisors.

II- Bachelor of Science in Economics, (BS)
DEPARTMENT OF ECONOMICS

Professors: Hamadeh, Mohamad; Hobeika, Louis; Yachoui, Elie

Associate Professors: Bassil, Charbel; Khoueiri, Roy

Assistant Professors: Bitar Nicholas; Harb, Georges; Hovivian, Hrair

General Description
The Economics Major is designed to provide the student with an understanding of the principles and institutions governing economic decisions made by Households, Businesses and Governments. This type of knowledge combined with studies in related areas, provides an appropriate background for employment in financial and non-financial business firms and governmental agencies. It also provides a solid basis for graduate study in economics, business and public administration, international studies, urban planning and law.

Mission
Consistent with the Faculty mission, the Bachelor of Science in Economics at Notre Dame University-Louaize provides a combination of academic rigor and career preparation. The program emphasizes undergraduate study in a liberal arts education environment. It maintains a high standard of education through a continuously revised curriculum. It prepares students for either future graduate studies or for a variety of careers in the private and public sectors. The program provides students with a challenging educational experience that enhances innovation, competence and sense of social responsibility, while offering an equal chance for all students.

Program Learning Goals and Outcomes
By the end of the program graduates will be able to:

Goal 1: General Skills:
Our graduates will demonstrate socially responsible professionalism.
• use technology and statistical packages to analyze data;
• employ analytical tools for reasoning and socially responsible decision making;
• apply effective written and oral communication skills;
• utilize basic research tools to writing reports;

Goal 2: Economics Specific Skills:
• understand the principles governing economic decisions;
• devise economic policies to solve economic issues;
• use critical thinking in analyzing economic situation;
• analyze the functioning of the economy in a global environment.

Graduation Requirements
Students seeking the degree of Bachelor of Science in Economics must complete a total of 90 credits. The degree requires an overall average of at least 2.0/4.0 and a minimum average of 2.3/4.0 in the common core and major requirements. These credits are divided into: Liberal Arts Core Curriculum, Common Core Requirements, Major Requirements,
Faculty Electives, Free Electives. In addition, the passing grade for Principles of Accounting I and II, Principles of Microeconomics and Macroeconomics, and Principles of Financial Management I, is “C”. The passing grade for remedial Math courses is “C”. Students are strongly advised to plan their courses in advance for the entire program.

Admissions Requirements
All applicants must satisfy an acknowledged level of English proficiency in order to be admitted. For more information please refer to appropriate pages in the university catalogue. A student may be required to take Math 105 as a remedial course in mathematics if, upon evaluating his/her application, he/she did not accumulate the minimum composite score required by the FBAE.

General Description
The economics program at Notre Dame University equips students with solid analytical skill and problem solving abilities. Such skills are keys to success in the job market and in graduate school. Holders of economics degrees occupy leading positions in financial, educational, tourism, real estate, insurance, trade and manufacturing sectors. In addition, they often find employment in the public sector as well as at international agencies and NGOs.

The Degree of Bachelor of Science in Economics
The economics degree aims to help students analyze the social phenomena from economic perspective. It allows students to understand decision making of individuals, firms and the government who face limited resources. Due to the importance of quantitative skills, the Department requires students to study two econometrics courses, one math course, one statistics course and one mathematical economics course. In addition, students might study purely qualitative courses like History of Economic Thought. This unique combination of courses helps students acquire a range of analytical, communication and critical thinking skills needed to apply economic theory to real world problems.

Degree Requirements (90 credits)

| Liberal Arts Core Curriculum | 27 cr. |
| Core Requirements | 18 cr. |
| **Major Requirements** | 24 cr. |
| Chose five faculty elective courses from the following | 15 cr. |
| ECN 325, ECN 327, ECN 431, ECN 432, ECN 433, ECN 434, ECN 435, ECN 436, ECN 439, BAF 315. |
| Free Electives | 6 cr. |
| Students are free to choose any six (6) credits offered by the University. |

Note: In rare cases graduating students may petition to substitute one business course for another, if the required business course is not offered in any one semester.
**Minor in Economics (15 credits)**

A Minor in Economics is to provide students with the analytical tools which will enable them to apply economic reasoning to problem solving in business, economic and political issues.

A Minor in Economics is an excellent choice for business, political science, public administration, and diplomacy majors.

A student who graduates with a minor in economics should be able to:
- Understand the decision making mechanisms of households and firms;
- Understand and analyze economic data;
- Use computers and statistical packages to manipulate, read and interpret data;
- Evaluate the role of the government in the economy.

**Total** 15 cr.
Undergraduate Courses: Economics

**ECN 101 Fundamentals of Economics (3.0); 3 cr.** This course is designed for students with no economics/business background. It attempts to equip aspiring students with the basics of micro and macroeconomics thus allowing them to successfully embark on business or economics majors. Topics include but not limited to supply and demand, elasticity, national income accounts and business cycles.

**ECN 211 Principles of Microeconomics (3.0); 3 cr.** This course is an introductory course that teaches the fundamentals of microeconomics. It analyzes the behavior and decision making of individuals in the market economy. Topics include demand and supply, elasticity, consumer theory, the theory of the firm, price and output determination under different market conditions; and pricing of factors of production. The passing grade for FBAE students is “C”.

**ECN 212 Principles of Macroeconomics (3.0); 3 cr.** This course is an introductory course to basic macroeconomic principles. It analyzes the functioning of the economy as a whole. It studies the functioning of real and money markets and analyzes equilibrium conditions in each market. The course emphasizes the role of government policies on economic growth, inflation and unemployment. Topics include national income accounts, inflation, unemployment, fiscal policy and monetary policy. The passing grade for FBAE students is “C”.

**ECN 308 Quantitative Techniques (3.0); 3 cr.** This course aims to enhance students’ quantitative skills and allows them to use those skills to sharpen their understanding of economics. Students will learn how to tackle economic problems using quantitative frameworks. As such, students are expected to be able to interpret the economic concepts and findings behind their results. Topics include: optimization techniques with single constraints, optimization techniques with multiple constraints, dynamic analysis, strategic behaviors of duopolies and intertemporal analysis. **Prerequisites:** ECN 211, ECN 212, MAT 204, STA 207 or STA 210.

**ECN 313 Introduction to Econometrics (3.0); 3 cr.** This course uses statistical tools to analyze economic data. Topics include basic data analysis, simple and multiple regressions, remedies for violations of the classical regression model assumptions like autocorrelation and heteroskedasticity. **Prerequisites:** ECN 211, ECN 212, MAT 204, STA 207 or STA 210.

**ECN 314 Applied Econometrics and Time Series (3.0); 3 cr.** This course provides students with a comprehensive treatment of econometric techniques applied in time series models. The course stresses on application and econometric theory. This course introduces students to many topics in Time Series including stationary and non-stationary time series models, the difference between deterministic and stochastic trend, and the estimation and elimination of trend notation. Students will also learn univariate time series models (AR, MA, ARMA, ARIMA and Seasonal ARIMA models). They will also learn the Box and Jenkins forecasting methodology. The course also covers the concept of Granger causality and the estimation of Multivariate models (Vector Autoregressive models). An interactive econometric software package is used (Eviews). **Prerequisite:** ECN313.

**ECN 321 Intermediate Microeconomics (3.0); 3 cr.** This course studies and analyzes the decisions made by households, firms, employees and policy makers and how their decisions affect markets, in partial and general equilibrium frameworks. It combines the intuitive, graphical and mathematical tools of analysis to explain economic decisions. Topics include consumer choice, pricing and output strategies under the four market structures. **Prerequisite:** ECN 211.
ECN 323 Intermediate Macroeconomics (3.0); 3 cr. This course covers the main topics of macroeconomics. It analyzes the forces of the market and the determinants of the general level of output, prices, and employment. It also tackles the relationship between economic growth and business cycle fluctuations. Finally, it studies the policies needed to achieve full employment and price stability. Topics cover the Classical, Keynesian and new classical models of the macroeconomy, growth theory, the roles of fiscal and monetary policies in the short run and long run, in closed and open economies. *Prerequisite:* ECN 212.

ECN 325 Labor Economics (3.0); 3 cr. The course is an analytical study of the labor market. It uses microeconomic theory to explain the functioning and the dynamics of labor supply and demand. It examines labor mobility, productivity, wage determination, the decisions of prospective and present labor market participants, and the roles of public policies and labor unions relating to the employment and payment of labor resources. *Prerequisites:* ECN 211, ECN 212.

ECN 327 History of Economic Thoughts (3.0); 3 cr. A study of origins and development of economic thought from mercantilism to present. The course emphasizes “thought” rather than history. It covers carefully economic reasoning of great and influential economists that led into modern economic analysis. Topics include mercantilism, physiocrats, Adam Smith, David Ricardo, Robert Malthus, pre Marxian socialists, John Stuart Mill, Karl Marx, Austrian economists, Alfred Marshall and John Maynard Keynes. *Prerequisites:* ECN 211, ECN 212.

ECN 431 International Economics (3.0); 3 cr. This course gives students the opportunity to understand the different theories and to critically assess the different perspectives on international trade and finance. Topics include absolute and comparative advantage, Heckscher-Ohlin theory, new theories of trade, gains from trade, barriers to trade, balance of payments and adjustment mechanisms, the effects of economic policies under different exchange rate regimes and regional integration. *Prerequisites:* ECN 211, ECN 212.

ECN 432 Urban Economics (3.0); 3 cr. This course explores the economics of cities. It differs from other economics fields as it introduces space and geography into economic analysis. While economics answers the questions of what, how and for whom to produce, Urban Economics adds the “where” to produce and “where” to locate. So, location theory is at the heart of urban Economics. Topics include reasons for the development of cities, market forces in the development of cities, urban economic growth, land rent and land use, zoning, causes of poverty and public policy, housing problems and policy, education and crime. *Prerequisites:* ECN 211, ECN 212.

ECN 333 Managerial Economics (3.0); 3 cr. Application of economic analysis to business problems. Topics covered include: risk analysis; theory of consumer choice; estimation and analysis of demand, production and cost functions; forms of competition; pricing techniques; profits; game theory. *Prerequisites:* ECN 211, STA 206 or STA 210.

ECN 434 Environmental and Natural Resource Economics (3.0); 3 cr. This course develops an in-depth understanding of environmental and resource economics. The course covers topics in environmental, resource, and ecological economics, with a focus on the sustainability of human-economic activities and their impact on the natural environment and economic valuation of environmental issues and development policies. The course covers both traditional neoclassical economic models and recent extensions in the areas of behavioral and ecological economics. The focus will be on international issues with important environmental implications that have become prominent on the environmental policy agenda recently; particularly biodiversity loss and climate change. Besides examining global environmental issues, the course links global environmental problems with that of Lebanon’s environmental situation. *Prerequisites:* ECN 211, ECN 212.
ECN 435 Monetary Theory and Policy (3.0); 3 cr. This course studies the effect of monetary variables on the economy. It emphasizes the role of the central bank in shaping economic conditions. Topics include demand and supply for money, nature of the Monetarist-Keynesian debate, the banking system, the transmission mechanism of monetary policy, theories of nominal rigidities and the Phillips curve, and coordination between monetary and fiscal policies. Prerequisites: ECN 211, ECN 212.

ECN 436 Public Finance and Fiscal Policy (3.0); 3 cr. This course examines the economics of the public sector. It has two broad topics: government expenditures and revenues. The course thoroughly examines the efficiency/equity trade-off of government policies. Topics include: market failures and optimal taxation, cost/benefit analysis of government projects, income redistribution and poverty programs, political economy and voting the economics of local governments, tax systems. Prerequisites: ECN 212, ECN 321.

ECN 439 Economics of Developing Countries (3.0); 3 cr. The course focuses on development issues in the context of third world problems such as poverty, illiteracy, urbanization and unemployment. It presents abstract models and then applies them to real world cases. It is a policy oriented course that aims to enhance students’ abilities to understand third world problems and to reach policy conclusions about possible solutions. Topics include meaning of underdevelopment; historical patterns of economic change in the developing countries; population problems; obstacles to development; role of industry and agriculture; inequality of income and wealth distribution; economic planning; environmental problems linked to development. Prerequisites: ECN 211, ECN 212.

ECN 450 Research Methods (2.0); 2 cr. This course is designed to introduce students to research in a broad area of economics and to prepare students to undertake their own research projects. Since this is a senior standing course, it is designed to apply the basic microeconomics and macroeconomics theory developed in introductory and intermediate theory courses to the analysis of contemporary policy issues. The course requires students to a project proposal paper that satisfies both the writing and the theory prerequisite requirements for economics. Students will learn in this course to apply effective writing and oral communication skills to the analysis of international or national economic problems. Prerequisites: Senior Standing.

ECN 481 Seminar in Economics (1.0); 1 cr. An in-depth study of a selected topic in theoretical or applied economic. Students have to present a term-paper on a Lebanese government economic institution. With the permission of the instructor, students may repeat this course if topics vary. Prerequisite: Senior Standing.

ECN 482 Internship (1.0); 1 cr. This course provides students with an opportunity to balance their classroom experience with work experience. Students will have the opportunity to develop new and practical skills by working under the direction and supervision of an experienced practitioner. The internship will be done in cooperating and department approved firms. A minimum of 150 hours of internship is required. Prerequisite: Senior Standing.
General Description
In alignment with NDU mission, the Department of Accounting and Finance (DAF) is committed to offering high quality BBA with concentrations in Accounting, Banking and Finance, and Financial Engineering. These concentrations provide students with sound theoretical education coupled with a solid professional and technical background. The DAF programs are designed to help students progress in their chosen career by developing the knowledge, skills and competencies employers are looking for. The breadth of subjects within these concentrations enables students, in addition to their major courses, to explore a range of business disciplines including management, marketing, accounting, finance, strategy and communications. Alongside the structure of the program, a professional team of instructors constituted of practitioners and researchers, is dedicated to helping students achieve their study and career goals.

Mission
Consistent with the Faculty mission, the Bachelor degree of Business Administration in all of its related tracks adopts an inter-disciplinary perspective to prepare students for real world challenges at the national and international levels. Through dynamic and continuous improvement of curricula, the program aims to prepare students for different career opportunities and further academic studies and professional certifications. Moreover, our graduates will be endowed with high ethical standards to act in a socially responsible manner.

Program Goals and Learning Outcomes

Goal 1: General Skills:
Our graduates will demonstrate socially responsible professionalism.

Outcomes: by the end of the program graduates will be able to:
1.1: Demonstrate ethical and socially responsible behavior
1.2: Behave professionally and in an informed manner
1.3: Communicate effectively.

Goal 2: Management Specific Goals:
Our graduates will demonstrate the ability to apply theoretical knowledge to business-related challenges in the constantly changing environment.

Outcomes: by the end of the program graduates will be able to:
2.1: Identify the role of business functions  
2.2: Recognize and evaluate the impact of internal and external risks and opportunities  
2.3: Demonstrate adequate skills to jump-start their careers  
2.4: Use information technology in operational decision-making  
2.5: Pursue professional and academic development  
2.6: Appraise business performance based on quantitative and qualitative data  
2.7: Use basic research tools to write papers and reports at the undergraduate level

Graduation Requirements
Students seeking the degree of Bachelor of Business Administration - Finance, Accounting, and Financial Engineering must complete a total of 106 credits. An overall average of at least 2.0/4.0 and a minimum average of 2.3/4.0 in the common core and major requirements. These credits are divided into: Liberal Arts Core Curriculum, Common Core Requirements, Major Requirements, Faculty Electives, Free Electives. In addition, the passing grade for Principles of Accounting I and II, Principles of Microeconomics and Macroeconomics, and Principles of Financial Management I, is “C”. The passing grade for remedial Math courses is “C”. Students are strongly advised to plan their courses in advance for the entire program.

Admissions Requirements
Applicants must pass the Lebanese Baccalaureate Part II (any strand) or its equivalent as identified by the Lebanese Ministry of Education. An applicant is accepted if he or she fulfills all the NDU admission requirements. In addition, there are three states of selection to the BBA, acceptance, conditional acceptance, and rejection. Students may be assigned MAT 105 as a remedial course in light of their composite scores.
The Degree of Bachelor of Business Administration - Accounting

The major in Accounting is designed to provide students with the opportunity to acquire the basic and advanced knowledge of accounting theory and practice in addition to the analytical skills and tools essential to a solid business education. Courses are designed to enable a student to understand the intellectual threads of modern accounting and its interrelationship to the various fields of business and management.

Accounting majors are increasingly taking and passing the Certified Public Accountant (C.P.A.) Certified Management Accountant (C.M.A.) and Certified International Audit (C.I.A.) examinations through training in Accounting and related fields. It provides the practical and theoretical background needed to succeed in the dynamic and fascinating world of Accounting.

Degree Requirements (106 credits)

Liberal Arts Core Curriculum 27 cr.

Required Common Courses 45 cr.

Major Requirements 28 cr.

ACO 323, ACO 313, ACO 411, ACO 413, ACO 421, ACO 48, BAF 312,
Choose three (3) faculty elective courses from the following:
ACO 314, ACO 321, ACO 350, ACO 406, ACO 414, BAD 429, BAD 431,
BAF 452, BAF 485, CSC 221, CSC 315, CSC 321.

Free Electives 6 cr.

Students are free to choose any six (6) credits offered by the University.

Note: In rare cases graduating students may petition to substitute one business course for another, if the required business course is not offered in any one semester.

The accounting major highlights four (4) areas where students along with their respective advisors can develop their business elective courses in a way to meet their potential job / career requirements. The following four areas are:

- Accounting Information Systems (AIS);
- General Accounting (GA);
- Management Accounting & Control (MA&C);
- Auditing (A).

All Accounting majors must complete an internship course which provides field experience prior to graduation.

The Accounting Information Systems (AIS) field was developed in response to employers indicating an increased need for accounting majors with computer expertise. The AIS program prepares students for career opportunities in the field of accounting systems design, accounting systems management and accounting systems auditing and other systems-related areas of accounting. Electronic processing of financial transactions is now the norm in small and large businesses alike. Accountants must be prepared to design, select, install and configure numerous accounting applications such as accounts receivable and billing systems, human resources management systems, and financial reporting systems.
Other Accounting majors may choose business elective courses meeting the track of General Accounting (GA). This field is designed to provide graduates with the knowledge and skills necessary to enter professional careers leading to an accounting designation or entry-level positions in accounting. Students can expect to develop conceptual and technical accounting competence and analytical abilities.

The Management Accounting & Control (MA&C) field of concentration was established to better serve the needs of students interested in industry or government. Typically, careers begin in one area of a company but soon involve work in a number of different functions within the organization such as the Controller’s Department, Internal Audit, Treasury and Finance, Cost Accounting, planning and budgeting, etc. The purpose of the required courses in this track is to give students an understanding of these areas and the basic skills required to successfully enter the organization in any of these positions.

This track is distinct, because it gives an increased emphasis on understanding the role of Accounting and in assisting management with decision making and organizational control as well as producing necessary information for external reporting.

The Auditing (A) field of concentration is designed for students who desire to reach the top levels in public accounting. It provides the students with a strong technical and theoretical background which is helpful in solving today’s complex auditing and reporting problems.
Minor in Accounting (15 credits)

A Minor in Accounting will provide students with a broad understanding of the examination, organization, management, design and communication, accurate recording and reporting procedures of Financial and Business transactions. The student who graduate with a Minor in Accounting will be able to:

• Demonstrate a basic comprehension of Accounting principles, concepts and technical skills;
• Demonstrate through the evaluation and communication of financial information, the skills to provide information to internal and external users for decision making;
• Show ability to analyze, compare, and evaluate information to provide analysis for short and long term planning;
• Demonstrate knowledge of professional standards of ethics necessary for decision making;
• Use computers and financial software for financial analysis and presentation.

Undergraduate Courses: Accounting

ACO 201 Principles of Accounting I (3.0); 3 cr. Introduction to the basic principles, concepts, and techniques of financial accounting. Explanation of the basic techniques of measuring, classifying, summarizing, reporting, and interpreting financial information. The passing grade for this course is “C”.

ACO 202 Principles of Accounting II (3.0); 3 cr. A continuation of ACO 201. Explanation and understanding of more advanced procedures of accounting for partnerships, corporations, long-term debts and marketable securities. Includes use of accounting software. The passing grade for this course is “C”. Prerequisite: ACO 201.

ACO 311 Managerial Accounting (3.0); 3 cr. Fundamental managerial accounting procedures and techniques used in management decision-making. Topics covered include: cost types; cost behavior patterns; cost-volume-profit relationships; budgeting and planning; and performance evaluation. Prerequisite: ACO 202.

ACO 313 Intermediate Accounting I (3.0); 3 cr. An in-depth study of accounting theory and concepts. Topics covered include: issues related to recording revenues, assets, liabilities and equity structure. Prerequisite: ACO 202.

ACO 314 Intermediate Accounting II (3.0); 3 cr. This course is the continuation of ACO 313. Topics include: handling of long-term investments, stockholders’ equity, accounting for leases, analysis of financial statements, and other accounting topics.

ACO 321 Cost Accounting (3.0); 3 cr. In-depth study of the procedures for gathering cost information. Topics covered include: mixed cost analysis; relevant costs; capital budgeting; and decision models. Prerequisite: ACO 311.

ACO 323 Accounting Information Systems (3.0); 3 cr. Examination of the systems for collecting and processing data necessary in planning, decision-making and the control of business organizations. Includes use of accounting software packages. Prerequisite: ACO 202.

ACO 350 Corporate Financial Reporting (3.0); 3 cr. This course covers the financial reporting system, principal financial statements other sources of financial information, statement of cash flows, foundations of ratio and financial analysis, analysis of business combinations, analysis of multinational operations, valuation and forecasting. Prerequisite: BAF 311.

ACO 406 Government and Non-Profit Accounting (3.0); 3 cr. Principles, procedures and ethics of financial reporting for non-profit organizations including state & local government. Includes the use of funds, budgets appropriations and encumbrances as means of control. Prerequisite: ACO 313.

ACO 411 Taxation (3.0); 3 cr. Application of the Lebanese income taxes to business entities and its reporting procedures. Also discussion of the issues related to the Lebanese accounting system such as multi-currency transactions, chart of accounts and closing procedures. Prerequisite: Senior Standing.

ACO 413 Auditing I (3.0); 3 cr. This course covers the functions and work of the independent auditor. Topics include: the auditing profession, the professional ethics auditor liabilities, overview of the audit process including the audit evidence, objective, audit program, working papers, planning audit, materiality, risk, post audit and reporting on audited income statement. Prerequisite: ACO 202.

ACO 414 Auditing II (3.0); 3 cr. This course is the continuation of Auditing I. This course provides a thorough understanding of the detailed audit procedure, audit planning, complete audit and post audit. The audit
covers cash changes (cash flow) assets, inventory, accounts receivable, accounts payable, fixed assets, auditing revenue cycle, other services and reports and assurance services. *Prerequisite:* ACO 413.

**ACO 421 Advanced Accounting (3.0); 3 cr.** A comprehensive study of financial accounting for partnerships, branches, business combinations, and the reporting of consolidated financial statements. Also discussion of accounting for non-profit organizations. *Prerequisite:* Senior Standing.

**ACO 481 Accounting Internship (1.0); 1 cr.** Interns will have the opportunity to develop new skills by working under the direction and supervision of an experienced practitioner and acquiring practical skills. The internship will be done in cooperating and department approved firms. A minimum of 150 hours of internship is required. *Prerequisite:* Senior Standing.
The Degree of Bachelor of Business Administration - Banking and Finance

The Banking and Finance concentration is designed to develop an understanding of the financial aspects of the contemporary economy, the operations of financial institutions and markets, and the financial management of business operations. The major develops analytical skills in the planning, management and control of financial resources to achieve the financial goals of the organization. Central to this task is the evaluation of the risk and return consequences of finance decisions. The major financial decisions studied are selection of assets, (equipment, buildings, inventories, securities, etc.) and among financing alternatives (selling stock, borrowing from a bank, issuing bonds, etc.)

Banking and Finance students will become familiar with computer applications in finance, and will know how to access and utilize financial information; they are increasingly taking and passing the Chartered Financial Analysts (C.F.A.) examination and the Certified Financial Planner (C.F.P.) examination. The program in Finance and related fields provide the practical and theoretical background needed to succeed in the dynamic and fascinating world of domestic and international finance.

Degree Requirements (106 credits)

Liberal Arts Core Curriculum  
27 cr.

Required Common Core Courses  
45 cr.
ACO 201, ACO 202, ACO 311, BAD 201, BAD 311, BAD 323, BAD 453, BAF 311, ECN 211, ECN 212, ECN 333, MRK 201, MAT 205, STA 206, STA 207.

Major Requirements (MR)  
28 cr.
BAF 312, BAF 315, BAF 321, BAF 433, BAF 438, BAF 450, BAF 481.  
Choose three (3) Faculty Elective Courses from the following:  
BAF 317, BAF 319, BAF 325, BAF 352, BAF 421, BAF 452, BAF 444, BAF 461, BAF 485, ACS 310, ECN 313, ACO 411, BAD 425, ECN 431, ECN 435.

Free Electives  
6 cr.
Students are free to choose any six (6) credits offered by the University.

Note: In rare cases graduating students may petition to substitute one business course for another, if the required business course is not offered in any one semester.

The Finance major highlights six (6) areas where students, along with their respective advisors, can develop their business elective courses in a way to meet their potential job / career requirements. The following six areas are:

- Investments Management (IM);
- Corporate Finance (CF);
- Real Estate Finance (REF);
- Banking (B);
- Personal Financial Planning (PFP);
- General Finance (GF).
All Banking & Finance majors must complete an Internship course which provides field experience prior to graduation.

Investment Management (IM) has been revolutionized by rapid advances in computerization. Modern investment theory of portfolio selection, asset pricing models, pricing of options and other derivative securities, and views on the efficiency of security markets have contributed to major improvements in investment management practice.

Other Finance students can choose the elective courses to meet the requirements of career such as Corporate Finance (CF) Corporate financial officers oversee the efficient allocation of funds within enterprises and borrow funds on the most favorable terms possible through banks, corporate commercial papers, bonds, or new stock issue. Corporate financial managers examine corporate policies toward dividends, debt leverage, and agency conflicts between firm stakeholders.

The Real Estate (RE) courses deal with the acquisition, ownership, and management of real assets such as shopping centers, office buildings, industrial parks, and housing. Majors acquire broad, multidisciplinary background designed to make them effective in controlling assets with significant wealth. Knowledge of financial management is initial to the success of any real estate activity - brokerage, development, property management or mortgage lending. Throughout the various areas of real estate and finance, there exists a natural interrelationship between the two disciplines. The Real Estate major prepares students for a broad range of international careers in consulting, trust and estate management, appraisal, brokerage, real estate development and government.

The banking industry has undergone massive transformations due to competition from non-bank financial institutions. The Banking (B) area of interest is established to provide the Banking community with timely Research and source of new employees who recognize the specialized needs of financial institutions and the banking industry.

NDU banking courses provide students with the necessary qualifications and preparation to meet the industry’s new demands. NDU students, with their knowledge of more than one language, are ideally qualified for employment in international banking. Banking and Finance graduates assume increasingly responsible positions over time and move up the management ranks.

Financial services are one of the most rapidly growing and dynamic fields in finance. It includes Banking, Securities, Insurance, and Personal Financial Planning. Personal Financial Planning (PFP) is a new service industry, which has sprung from its insurance, securities and banking roots to become an important link between a variety of individuals and businesses and the broad spectrum of finance information. Students interested in working directly with people to organize their finances and plan for their financial futures should consider a major in Personal Financial Planning. Students need to know about all areas of business and finance, and they must be able to deal with quantitative measures and information, as well as understand sophisticated theoretical concepts.

In the General Finance (GF) field, students can choose courses among several courses. By carefully selecting these courses, students may develop a program of study that fits with their interests and career preparation needs. In order to maximize the benefit of their programs, students are strongly encouraged to work closely with their assigned advisor in developing their program of study.
Minor in Finance (15 credits)

A Minor in Finance will provide students with a broad understanding of the principles and practices needed to make financial decisions in corporations. The student who graduates with a minor in Finance will be able to:

- Master the current methods for analyzing, interpreting, and reporting financial information;
- Estimate short-and-long term financing needs;
- Prepare and analyze capital budgeting projects;
- Describe the different dimensions of international finance and trade;
- Think critically, analyze information, and solve problems related to complex financial crises;
- Use computers and financial software for financial analysis and presentation.

**Total** | **15 cr.**
Undergraduate Courses: Banking and Finance

BAF 311 Principles of Financial Management I (3.0); 3 cr. An introduction to the role of the financial manager and to the techniques for obtaining and using funds to maximize the value of the firm. Topics covered include: discounted cash-flow analysis; valuation methods; risk and rates of return; financial analysis and forecasting; financial planning and control; working-capital policy; cash and marketable securities management. The passing grade for this course is “C”. Prerequisites: ACO 202, STA 206 or STA 210, MAT 325 or MAT 326.

BAF 312 Principles of Financial Management II (3.0); 3 cr. This course is the continuation of BAF 311. Topics covered include: capital budgeting techniques; project cash flows and risk; the cost of capital, capital structure and leverage; dividend policy; common stock financing; long term debt; short-term financing; inventory and credit management. Prerequisite: BAF 311.

BAF 315 Financial Institutions and Markets (3.0); 3 cr. An introduction to the objectives and roles of various financial institutions and markets. Topics covered include: various financial intermediaries and their function in the economy; determination of interest rate levels; financial markets; financial claims; distribution channels for financial products; performance analysis and foreign exchange. Prerequisite: BAF 311.

BAF 317 Personal Financial Planning: Concepts and Principles (3.0); 3 cr. Designed to serve the personal finance needs of students regardless of their major fields. Practical applications in personal and family financial problems planning, including credit money management, buying, borrowing, banking, insurance, savings, investments, taxation, estate planning and home ownership. Discusses the method integrating these disciplines into an overall financial plan tailored to individual needs. Prerequisites: BAF 311, Junior Standing.

BAF 321 Fundamentals of Investments (3.0); 3 cr. Principles and practices involved in the field of investment. Topics covered include: sources and determination of holding period; determination of security prices; capital asset pricing models; portfolio selection problems; investment companies. Corequisite: BAF 312.

BAF 325 Real Estate Principles (3.0); 3 cr. Deals generally with urban real estate with emphasis on principles and practices of the real estate business. The course will include discussion of markets and methods of financing real property. An investment strategy will be developed. The real estate market in Lebanon will be emphasized. Prerequisite: BAF 312.

BAF 352 Commercial and Investment Banking (3.0); 3 cr. This course is designed to equip students with principles and tools which allow them to tackle realistic risk management problems associated with financial institutions. Another objective is to provide students with an understanding of the fundamental principles and concepts that underlie the Investment Banking process including market making, underwriting, and syndication. Also this course will examine recent trends in regulations and product innovation by both commercial and investment banks. This includes origination, underwriting, and distribution of new securities to the public. In addition formulation of objectives and policies of banks are discussed, including management of assets & liabilities, sources and uses of funds, administration of reports and loans and evaluation of bank performance. Prerequisites: BAF 312, BAF 315.

BAF 421 Advanced Investment Finance (3.0); 3 cr. An advanced level treatment of current theory and practice relating to contingent securities, speculative markets and portfolio management issues. Emphasis on recent innovations and developments in
financial markets, including options, futures and portfolio insurance, etc. Prerequisite: BAF 321.

BAF 433 International Business Finance (3.0); 3 cr. Discussion of the environment and problems facing a financial manager in a multinational enterprise. Topics covered include: balance of payments; foreign exchange markets; transactions and operating exposure; financing of international trade; international financial markets; risk evaluation in foreign direct investments; international banking. Prerequisites: BAF 311, ECN 212.

BAF 438 Credit Analysis and Commercial Lending (3.0); 3 cr. Focuses on how organization of the commercial lending business contributes to bank profitability; covers the commercial lending process from the initial loan request through collection. Topics include loan interviewing and credit investigation, credit analysis, structuring and negotiation, documentation and closing, problem loans, and follow-up. Also examination of analytical techniques to assume the role of credit officer. Prerequisites: BAF 315, BAF 321.

BAF 444 International Banking (3.0); 3 cr. Internationalization of banks to meet the global financial needs of multinational activities. Theory and practice of international banking; subjects include current international monetary and financial environment and typical problems of international banking from a management perspective. Interaction with international financial markets and financial centers. Prerequisite: BAF 312.

BAF 450 Futures and Options (3.0); 3 cr. Provides an introduction to financial futures such as currency futures, swaps and interest rate futures. Explores the markets on which they are traded. Also analyzes pricing of options and other derivative securities. Includes the leverage and risk aspects of options. Prerequisite: BAF 321.

BAF 452 Financial Modeling (3.0); 3 cr. This course is wrap-up of financial, statistical and computational concepts and techniques needed in the field of Financial Engineering and Computational Finance. Topics include: Introduction to Financial programming in VB, overview of statistical techniques used in Finance (Regression, Time Series, Sampling, Data Analysis), and overview of financial concepts, such as financial price simulation, and cash flow maps. Prerequisite: BAF 321.

BAF 461 Special Topics in Finance (1.0 - 3.0); 1-3 cr. Various topics in Finance are considered. They will vary depending upon recent developments in the field and upon the research interests of the instructor. The topics to be included are announced at the time of the course offerings, offered only when faculty are available and sufficient student interest exists. Prerequisite: Senior Standing.

BAF 481 Finance Internship (1.0); 1 cr. Interns will have the opportunity to develop new and practical skills by working under the direction and supervision of an experienced practitioner. The internship will be done in cooperating and department approved firms. A minimum of 150 hours of internship is required. Prerequisite: Senior Standing.

BAF 485 Advanced Corporate Finance (3.0); 3 cr. This course is about corporate financial management from the stand point of the general manager. Integration of financial operations with other operations of a business unit, including working capital management, financial planning and financial control, capital budgeting, the theory of corporate finance. Prerequisite: Senior Standing.
The Degree of Bachelor of Business Administration (B.B.A.)

Financial Engineering Emphasis

Disclaimer: Emphasis area appears on student transcript of record but not on student diploma.

Financial Engineering is the application of the mathematical tools and computational methods commonly used in engineering to financial problems, especially the pricing and hedging of derivative instruments. It involves the development and creative application of financial theory and Financial instruments such as forwards, futures, swaps, options, and related products to structure solutions to complex financial problems and to exploit Financial opportunity.

Financial Engineering is not a tool, it is a profession that uses tools, of which derivatives are one. Importantly, the term “Analysis” means to “decompose in order to understand”. The term “Engineering” means “Build”.

Degree Requirements (106 credits)

Liberal Arts Core Curriculum 27 cr.

Common Requirements 42 cr.
ACO 201, ACO 202, ACO 311, BAD 201, BAD 323, BAD 453, BAF 311, ECN 211, ECN 212, ECN 333, MRK 201, MAT 205, STA 206, STA 207.

Major Requirements 37 cr.
BAF 312, BAF 315, BAF 321, BAF 421, BAF 450, BAF 452, CSC 216, CSC 372, FEN 431, FEN 442, FEN 455, FEN 463, MAT 336.

Note: In rare cases graduating students may petition to substitute one Business course for another if the required Business course is not offered in any semester.

Undergraduate Courses: Financial Engineering

FEN 431 Fixed Income Securities (3.0); 3 cr. This course provides a quantitative approach to fixed income securities and bond portfolio management. Topics include: Bond valuation, duration, yield curve and term structure measurement and theory, mortgage backed securities, as well as interest rate models (Vasicek and Cox Ingersoll Ross). Prerequisite: Senior Standing.

FEN 442 Financial Risk Management (3.0); 3 cr. This course explores various aspects of financial risk management, including credit risk, market risk, and operational risk. Emphasis is on quantitative measurement techniques, covering value at risk, dynamic portfolio distribution and extreme value analysis. Prerequisite: BAF 450.

FEN 455 Advanced Derivatives Models (3.0); 3 cr. This course focuses of efficient implementation of advanced derivative models aimed at pricing and hedging derivative securities. Pseudo codes and algorithms will be studied and programming application developed.
using VB. Topics include: Black-scholes implementation, trees construction (binomial and trinomial trees), Monte Carlo application to option pricing and implied volatility, and advanced interest rate models, (Ho and Lee, Hulland White, Black-Derman, Toy, Heath-Jarrow-Morton). Prerequisite: BAF 450.

FEN 463 Computational Finance and Simulation (3.0); 3 cr. This course provides the computational skills required in the field of Financial Engineering. Students will learn how to program financial models and develop simulations using VB. Prerequisite: BAD 323.
The Degree of Bachelor of Business Administration (B.B.A.) - Management Emphasis

Disclaimer: Emphasis area appears on student transcript of record but not on student diploma.

The B.B.A. Management option is designed to provide students with an understanding of the processes and structures of organizations to enable them to be more effective managers. The courses taken in addition to the required common courses provide the students with proficiency in management skills and decision-making. The program prepares candidates for managerial responsibilities in both the private and public sectors.

Mission
Consistent with the Faculty mission, the Bachelor degree of Business Administration in all of its related tracks adopts an inter-disciplinary perspective to prepare students for real world challenges at the national and international levels. Through dynamic and continuous improvement of curricula, the program aims to prepare students for different career opportunities and further academic studies and professional certifications. Moreover, our graduates will be endowed with high ethical standards to act in a socially responsible manner.

Program Goals and Learning Outcomes

Goal 1: General skills:
Our graduates will demonstrate socially responsible professionalism.

Outcomes: by the end of the program graduates will be able to:
1.1: Demonstrate ethical and socially responsible behavior
1.2: Behave professionally and in an informed manner
1.3: Communicate effectively.

Goal 2: Management specific goals:
Our graduates will demonstrate the ability to apply theoretical knowledge to business-related challenges in the constantly changing environment.

Outcomes: by the end of the program graduates will be able to:
2.1: Identify the role of business functions
2.2: Recognize and evaluate the impact of internal and external risks and opportunities
2.3: Demonstrate adequate skills to jump-start their careers
2.4: Use information technology in operational decision-making
2.5: Pursue professional and academic development
2.6: Appraise business performance based on quantitative and qualitative data
2.7: Use basic research tools to write papers and reports at the undergraduate level.

Graduation Requirements
Students seeking the degree of Bachelor of Business Administration must complete a total of 106 credits with an overall average of at least 2.0/4.0 and a minimum average of 2.3/4.0 in the common core and major requirements. These 106 credits are divided into:

**Degree Requirements (106 credits)**

**Liberal Arts Core Curriculum**

<sup>1</sup> Minimum passing grade is “C”
In response to great demand from our student body, the Department of Management and Marketing has designed a minor in Management. This minor is intended to enhance our students’ area of expertise, through acquiring knowledge of management theory and its application, which will allow them to be successful members in the global environment. The world in which we live is marked by rapid change where both managers and employees need to handle change as well as manage the day-to-day functions in the market-driven economy.

For those students who come from a business background, this minor will enhance their scope and depth in the managerial area. For those who come from another background, a minor in Management will expose them to the key managerial functions of planning, organizing, leading, and controlling, and, in doing so, will increase their level of efficiency and effectiveness in the work context.

Undergraduate Courses: Business Administration

BAD 101 Introduction to Business (3.0); 3 cr. An orientation to the field of business. Topics covered include: types of business organizations; financing of businesses; marketing functions; management functions; human resources management; production management; accounting; international business.

BAD 201 Fundamentals of Management (3.0); 3 cr. An introduction to the basic elements of the managerial process and the basic theories of management. Topics covered include: management objectives; organizational structure; material and human resource utilization; human relations; decision making, planning, organizing, staffing, directing, and controlling.

BAD 311 Business Law (3.0); 3 cr. Survey of Lebanese Commercial Law. Topics covered include: the nature of the law; the courts system; contracts; property sales and secured transactions; insurance; commercial papers; agency; business organizations; bailment; bankruptcy; banking operations; taxation.

BAD 315 International Business (3.0); 3 cr. An introduction to international business management principles and an overview of global organizations. Topics covered include: nature and importance of international business; human, cultural, political, economic and legal considerations in international business; commercial policies; international agreements; international trade and investment; the international monetary system. Prerequisites: BAD 201.

BAD 317 Organizational Behavior (3.0); 3 cr. An examination of the study of individual and group behavior in organizations. Topics covered include: perception; motivation; leadership; organizational development; communication; power politics; group behavior; conflicts; work design. Prerequisite: BAD 201.

BAD 321 Managing a Small Business (3.0); 3 cr. Procedures and techniques needed to start-up, purchase and manage a small firm. Emphasis on the differences between small and large firm environments and problems. Topics covered include: franchising; market research; site selection; sales and advertising; pricing and credit policies; managing human resources; financial planning; accounting and budgeting. Prerequisite: Junior Standing.

BAD 323 Software Tools for Business Applications (3.0); 3 cr. Application of software to business information processing and decision making in different business areas. Prerequisite: Junior Standing.

BAD 325 International Business Law (3.0); 3 cr. An introduction to the legal aspects and ramifications of international trade. Topics covered include: international business transactions including sales contracts, agency and distribution contracts, investment contracts, licensing agreement, joint ventures; intellectual property; arbitration; dispute settlement before the WTO; problems in foreign investment; tariff regulation; taxation regulation; technology transfer. Prerequisite: BAD 311.

BAD 329 Labor and Social Security Law (3.0); 3 cr. Exploration of individual and collective aspects of employment in Lebanon. Topics covered include: employment contract; duties of employers and employees; impact of legislation providing for health, safety and welfare; workers’ compensation; industrial disputes; strikes; social security law. Prerequisite: BAD 311.

BAD 421 International Business Management (3.0); 3 cr. An examination of management problems of organizations with international interests. Topics covered include: nature and role of international business management; impact of cultural,
political, social and economic factors on management policies and practices; strategic planning; organizing international operations; human resource management in international corporations; managing foreign-exchange risk; production and marketing; asset management; ethics and social responsibility. Prerequisite: Senior Standing.

BAD 423 Business Research (3.0); 3 cr. An intensive study of the objectives and methodologies of research for business decisions. Topics covered include science and the scientific method; techniques of defining problems; research design; methods for collecting, analyzing and interpreting data. Includes presentation of a research proposal. Prerequisite: Senior Standing.

BAD 425 Quantitative Techniques for Management (3.0); 3 cr. Quantitative techniques in problem solving and decision making using mathematical methods and modeling. Topics covered include: linear programming; network models; Markov analysis; queuing theory; decision theory; project management; simulation. Prerequisite: Senior Standing.

BAD 427 Human Resource Management (3.0); 3 cr. Theories, policies and practises of human resource management in a firm. Topics covered include: employee selection; training and development; performance appraisal and compensation; job analysis and design; benefits administration; labor-management relations. Prerequisite: BAD 317.

BAD 429 Operations Management (3.0); 3 cr. Introduction to the concepts, techniques and methodology of modern operations management. Topics covered include: forecasting; production planning and scheduling; facility location and layout; quality control; productivity; inventory systems; process design; maintenance and reliability. Prerequisite: Senior Standing.

BAD 431 Ethics in Business (3.0); 3 cr. A practical rather than philosophical approach to the ethical dimension of business actions. The course deals with the ethical problem and dilemmas of individuals, managers, and organizations.

BAD 433 Business Policy and Strategic Management (3.0); 3 cr. A capstone course in management. Understanding of strategies pursued by contemporary organisations. Integration of concepts and skills previously learnt, utilizing readings, projects, simulations, and case studies. Emphasis on the strategic issues facing domestic and international firms. Prerequisite: Senior Standing.

BAD 453 e-Business (3.0); 3 cr. The course examines the history, foundations, tools, and major issues surrounding the electronic commerce. Students will develop skills and learn how the economic framework and electronic technology come together in actual business applications, and how these applications become operational in the global business environment. Prerequisite: Senior Standing.

BAD 481 International Business Management Internship (1.0); 1 cr. Interns will have the opportunity to develop new skills by working under the direction and supervision of an experienced practitioner and acquire practical skills. The internship will be done in cooperating and department approved firms. A minimum of 120 hours of internship is required. Prerequisite: Senior Standing.

BAD 482 Management Internship (1.0); 1 cr. Interns will have the opportunity to develop new skills by working under the direction and supervision of an experienced practitioner and acquire practical skills. The internship will be done in cooperating and department approved firms. A minimum of 120 hours of internship is required. Prerequisite: Senior Standing.
Economic and business activity is becoming increasingly internationalized. There is a great demand for business students who are equipped with conceptual and analytical skills and can formulate feasible and effective management policies in a complex international setting. The objective of B.B.A. - International Business Management program is to answer this need.

The program provides useful preparation for careers in a variety of organizations, including local business firms with international trade, licensing or financial arrangements; headquarters or subsidiaries of multinational companies; banks and other international financial institutions, and various governmental organizations.

Graduation Requirements
Students seeking the degree of B.B.A.-International Business Management Concentration must complete a total of 107 credits with an overall average of at least 2.0/4.0 and a minimum average of 2.3/4.0 in the core and concentration requirements. These 107 credits are divided into:

The Degree of Bachelor of Business Administration (B.B.A.) - Distribution and Logistics Management Emphasis

Disclaimer: Emphasis area appears on student transcript of record but not on student diploma.

This emphasis is designed to offer knowledge in the field of supply chain management and to build candidates’ capacities, in all of its major components namely: packaging, warehousing, procurement, transportation, inventory, and physical distribution management.

The distribution and logistics management activities are carried out by manufacturers, wholesalers, retailers, public warehouse firms, freight forwarders as well as public and private transportation firms with heavy dependence on innovative technological breakthroughs in this field. Globalization, the increasing demand for the movement of goods across the world, and the applied knowledge required by the candidates will be the focal learning points for the candidates.

Graduation Requirements
Students seeking the degree of Bachelor of Business Administration in Distribution and Logistics Management must complete a total of 106 credits with an overall average of at least 2.0/4.0 and a minimum average of 2.3/4.0 in the core and concentration requirements. These 106 credits are divided into:

Degree Requirements (106 credits)

Liberal Arts Core Curriculum 27 cr.

Required Common Courses 45 cr.
ACO 201, ACO 202, BAD 201, BAD 311, BAD 317, BAD 323, BAD 433, BAD 453, BAF 311, ECN 211, ECN 212, MRK 201, STA 206, STA 207, MAT 205.

**MRK 201 Fundamentals of Marketing (3.0); 3 cr.** Introduction to the marketing process in social, economic, and legal environments. Topics covered include: consumer and institutional behavior patterns; market segmentation; product and service development; pricing strategy and promotion; channels of distribution; retailing and wholesaling; marketing research.

**MRK 205 Principles of Channel Management (3.0); 3 cr.** This course surveys, organizes, and integrates theories and practices relative to current issues of marketing channel management, with a focus on key strategic marketing principles. Physical distribution is reviewed as a functional area within the firm and its interface with channel intermediaries is analyzed. Topics include retailing, wholesaling, industrial marketing, transportation, warehousing, location, inventory control, and channel design. **Prerequisite:** MRK 201.

**MRK 215 Fundamentals of Purchasing (3.0); 3 cr.** This course is designed to present the purchasing process as it relates to such topics as inventory control, price determination, vendor selection, negotiation techniques, and ethical issues. The focus of the course will be on the role and function of purchasing in the Logistics Management Process. **Prerequisite:** MRK 201.

**MRK 311 Consumer Behavior (3.0); 3 cr.** Concepts and theories to explain the decision making process of consumer and organizational buying. Attention is focused on economic, psychological, sociological, and anthropological variables to understand, predict, and control purchasing behavior. **Prerequisite:** MRK 201.

**MRK 313 Salesmanship (3.0); 3 cr.** Examination of persuasive techniques used in promotional presentations conducted on a person-to-person basis. Emphasis on effective selling techniques, understanding the company and its products, understanding the customer and the selling environment, recognizing selling opportunities, and planning, implementing, and control of the personal selling programs. **Prerequisite:** MRK 201.

**MRK 315 Import-Export Management (3.0); 3 cr.** Application of management theories to efficient management of an import-export business. Topics covered include: starting an import-export business; international trade; export financing; import-export documentation; export promotion; tariffs and duties. **Prerequisite:** MRK 201 and Junior Standing.

**MRK 321 Promotional Strategy (3.0); 3 cr.** Introduction to various promotional strategies adopted by different companies and guidelines for determining a company’s promotional mix. Topics covered include: advertising; personal selling; publicity and promotion; determination of objectives and budgets; situation analysis. Also, discussion of managerial issues and problems. **Prerequisite:** MRK 311.

**MRK 323 Retail Management (3.0); 3 cr.** Application of management and marketing theories to retailing. Topics covered include: management, organization and control of retail outlets, consumer behavior, store location, financial management, promotion, presentation, pricing, control of inventories, advertising, personnel, and wholesaler-retailer relationship. **Prerequisite:** MRK 201.

**MRK 325 Services Marketing (3.0); 3 cr.** An introduction to the distinctive aspects of service marketing. Topics covered include: understanding services marketing; improving service quality and productivity; positioning a service in the marketplace; managing the customer portfolio; creating and delivering services; developing and managing the customer service function. **Prerequisite:** MRK 311.

**MRK 335 Materials and Warehouse Management (3.0); 3 cr.** This course covers...
the organization and operations of warehouses and distribution centers. Topics covered include the role, types, and functions of warehouses and distribution centers, location analysis, facility layout and design, equipment handling, employee safety, public and private warehouses, computer control and tracking, conveyance equipment, and hazardous materials handling. Prerequisite: MRK 205.

MRK 345 Logistics and Supply Chain Management (3.0); 3 cr. This course develops an integrated approach to the analysis of physical distribution problems. It deals with transportation and assignment problems; application of network techniques to production; distribution systems design; optimal allocation of inventory; cost allocation methods; pricing policies; and power structure of shareholders within a firm. Prerequisite: MRK 205.

MRK 372 Internet Marketing (3.0); 3 cr. e-marketing is traditional marketing using electronic methods. It helps students develop the skills necessary to understand and integrate Internet technology and characteristics into marketing strategy. It helps students recognize and understand the implications of the Internet not only as a market place but also as a set of tools and opportunities. Prerequisite: BAD 323.

MRK 404 Transportation Management (3.0); 3 cr. This course includes an introduction to the principles of transportation with emphasis on transportation modal operations (rail, highway, air, pipeline, water transportation) and transportation management. Consideration is given to the economical, social and political aspects of the transportation industry and strategic issues in transportation management. Prerequisite: MRK 345.

MRK 421 Sales Management (3.0); 3 cr. Development, operation, and control of a sales organization. Topics covered include: managing the sales force; selecting, training and compensating the sales force; forecasting sales and establishing budgets; structuring a sales organization; motivating salespeople. Prerequisite: Senior Standing.

MRK 422 Packaging, Warehousing and Inventory Control (3.0); 3 cr. The course deals with important supports for a modern material handling process. Among other things, it discusses packaging and carriers, and their importance to logistics. Furthermore, it deals with systems and IT tools for material handling, such as Warehouse Management Systems (WMS), bar codes and other identification systems, transport administration systems, and systems for controlling material flows in logistical networks. The course also gives an overview of material handling equipment, such as forklifts, storage systems, bar code scanners etc. Prerequisite: MRK 335.

MRK 423 International Marketing (3.0); 3 cr. Analysis and strategies for marketing in an area with different social, political, legal, and economic environment. Topics covered include: cross-national consumer behavior; direct foreign investment; strategy of international product development, pricing, promotion and distribution policies; forms of international involvement. Prerequisites: MRK 201, Junior Standing.

MRK 425 Business-to-Business Marketing (3.0); 3 cr. Development of principles of distribution of industrial goods and management of industrial marketing organizations. Topics covered include: industrial marketing system and organization buying behavior; management of industrial marketing mix; industrial market-research; planning, pricing, selling and advertising decisions; strategies for industrial markets. Prerequisites: MRK 201, Senior Standing.

MRK 431 Marketing Research (3.0); 3 cr. Techniques and procedures of collecting and analyzing information to identify marketing problems and facilitate their solution. Topics covered include: marketing research design; questionnaire construction; sample design; data analysis. Prerequisites: MRK 201, STA 207.
MRK 433 Marketing Strategies and Policies (3.0); 3 cr. A capstone course in marketing. Emphasis on strategic and executional issues connected to marketing policy. Integration of materials previously taken, utilizing readings, projects and case studies. Prerequisite: Senior Standing.

MRK 481 Marketing Internship (1.0); 1 cr. Interns will have the opportunity to develop new skills by working under the direction and supervision of an experienced practitioner and acquire practical skills. The internship will be done in cooperating and department approved firms. A minimum of 120 hours of internship is required. Prerequisite: Senior Standing.

MRK 482 Distribution and Logistics Management Internship (1.0); 1 cr. Interns will have the opportunity to develop new skills by working under the direction and supervision of an experienced practitioner and acquire practical skills in logistics and distribution. The internship will be done in cooperating and department approved firms. A minimum of 120 hours of internship is required. Prerequisite: Senior Standing.
The Degree of Bachelor of Business Administration (B.B.A.) - Human Resources Management Emphasis

Disclaimer: Emphasis area appears on student transcript of record but not on student diploma.

Today, corporations consider human resources management as a strategic partner in order to help them achieve a competitive advantage. The Human Resources Management emphasis stresses on both strategic and operational aspects through theories, policies and practices of human resources management in a firm. Topics learned cover employee staffing as well as recruitment and selection, training and development, performance appraisal and compensation and benefits administration, job analysis and design as well as labor-management relations.

Graduation Requirements
Students seeking the degree of Bachelor of Business Administration in Human Resources Management must complete a total of 106 credits with an overall average of at least 2.0/4.0 and a minimum average of 2.3/4.0 in the core and concentration requirements. These 106 credits are divided into:

Undergraduate Courses: Human Resource Management

MGT 201 Principles of Human Resources Management (3.0); 3 cr. Theories, policies, and practices of human resources management in a firm. Topics covered include employee selection, training and development, performance appraisal and compensation, job analysis and design, benefits administration, and labor-management relations.

MGT 210 Organizational Staffing (3.0); 3 cr. This course provides an in-depth examination of the organizational staffing process. Procedures for human resources needs assessment such as personnel audits and forecasting are discussed. Recruitment strategies and the process of organizational choice of candidates are explored. There is emphasis on understanding basic types of assessment tools and procedures for choosing new employees. Prerequisite: MGT 201.

MGT 312 Training and Career Development (3.0); 3 cr. The course is an advanced study of personnel training and development in contemporary organizations. Emphasis is placed on the identification of training needs, program design, selection of training methods, monitoring the process, and evaluating the results. Prerequisites: MGT 201, Junior Standing.

MGT 325 Compensation and Reward Systems (3.0); 3 cr. This course provides the study of labor markets and examines the general structure of an organization and the rewards employees seek in exchange for their services and contributions to the firm. Topics covered include developing pay structure, measuring performance, providing employee benefits, rewards and a motivating work environment, and administering the compensation plan. Prerequisites: MGT 201, Junior Standing.

MGT 337 Recruitment and Selection (3.0); 3 cr. The objective of this course is to describe to students how organizations search for prospective employees and influence them to apply for available jobs. It is an advanced study of recruitment and selection practices of organizations. Prerequisite: MGT 210.

MGT 402 Business Negotiations (3.0); 3 cr. Negotiation permeates human interactions. It affects the balance and distribution of resources among nations, organizations, families, and individuals. Students will understand the theory behind successful negotiation, recognize situations that call for negotiation, and study the utilization of alternative negotiating strategies and tactics. Prerequisite: Senior Standing.

MGT 411 Leadership, Quality and Performance (3.0); 3 cr. The purpose of this course is to focus on the major traits, which come together in a leader to produce Leadership. Theory, Power, Motivation, and Communication, this course explores the causes and consequences of effective leadership in organizations. Prerequisite: Senior Standing.

MGT 453 Global Human Resources Management (3.0); 3 cr. This course is designed to help students develop skills as global managers and to provide them with an understanding of critical issues in the management of multinational organizations. Topics covered include international leadership skills, cross-cultural negotiations, ethical dilemmas in cross-cultural environments, and designing and managing multinational organizations. Prerequisite: Senior Standing.

MGT 475 Managing Employment Relations (3.0); 3 cr. This course provides an overview of the relationships between human resources and parties to employment. It considers contract negotiations, discipline and grievance procedures, and human resources department assistance in conflict resolutions. Special attention is given to the organizational structure of the parties and their diversified
by working under the supervision of an experienced business practitioner. Internship is conducted under the supervision of a program director at NDU and in cooperation with the Interns employer. A minimum of 120 working hours are required. **Prerequisite:** Senior Standing.

**MGT 483 Human Resources Management Internship (1.0); 1 cr.** The Internship program is designed to provide the Interns with the opportunity to develop professional skills related to their studies objectives. **Prerequisites:** MGT 210, BAD 329.
The Degree of Bachelor of Business Administration (B.B.A.) - Health Care Management Emphasis

Disclaimer: Emphasis area appears on student transcript of record but not on student diploma.

The health care industry size is growing worldwide driven by increasing consumerism and health needs, advancing technologies, changing regulations, aging population as well as an enhanced awareness towards a healthier lifestyle.

In addition to providing effective care, today’s health care organizations urgently need to be managed in terms of organizational issues, human resources and cost control. The program provides students with business management skills and knowledge of healthcare delivery system needed to work in this growing field.

Graduation Requirements
Students seeking the degree of Bachelor of Business Administration in Health Care Management must complete a total of 106 credits with an overall average of at least 2.0/4.0 and a minimum average of 2.3/4.0 in the core and concentration requirements. These 106 credits are divided into:

Degree Requirements (106 credits)

Liberal Arts Core Curriculum 27 cr.

Required Common Courses 48 cr.
ACO 201, ACO 202, BAD 201, BAD 315, BAD 317, BAD 323, BAD 433, BAD 453, BAD 427, BAD 429, BAF 311, ECN 211, ECN 212, MRK 201, STA 206, STA 207.

Required Major Courses 31 cr.
HCM 301, HCM 302, HCM 401, HCM 402, HCM 403, HCM 404, HCM 405, HCM 406, HCM 407, HCM 408, BAD 423.

Minimum passing grade is “C”
Undergraduate Courses: Health Care Management

HCM 301 Introduction to Health Care Management (3.0); 3 cr. This course provides an overview of the evolution, structure and current issues in the health care system. It examines the unique features of health care as a product, and the changing relationships between patients, physicians, hospitals, insurers, employers, communities, and government. The course examines three broad segments of the health care industry: payers, providers, and suppliers. Within the payer segment, the course examines the sources and destinations of spending, MOH, CNSS, insurance, technology assessment and renewal, and payer strategy. Within the provider segment, the course examines the impact of cost containment and competition on hospitals and integrated HC delivery systems, and physicians’ relationships. Within the supplier segment, the course will examine developments in the biotechnology, pharmaceutical, medical devices (equipment and supplies), genomic and IT industries.

HCM 302 Health Care Economics (3.0); 3 cr. This course is designed to build an understanding of the health care delivery system from an applied economics perspective. The application of these skills will be drawn from examples that illustrate the production of and demand for health. The economic analysis of health care delivery is based on microeconomic theory: elasticity of demand, price sensitivity, etc. As the managed care model develops, greater emphasis is being placed on individual choice and responsibility as determinants of healthcare utilization. This trend has resulted in greater emphasis on the use of economic theory to both plan and evaluate the health care setting. Insurance is a major economic lever of these trends. The rationale for government intervention in medical markets as well as the effectiveness and efficiency of various health policies, including: MOH medical aid, CNSS coverage, price regulation of hospitals, physician payment reform, are surveyed. Prerequisite: ECN 212.

HCM 401 Management Of Health Care Organizations I (3.0); 3 cr. The purpose of this course is to prepare you for managing health care organizations within an environment of cost containment and quality management of health care services. In Module I, we will first focus on the profession of health care management. This will present a picture of the daily tasks health care managers faces and knowledge, skills, and abilities needed to be successful. The second focus is on the management of health care teams. This section will equip the student to participate in and successfully manage, coach and/or mentor teams of clinicians, managers, and others. Prerequisites: HCM 301, HCM 302.

HCM 402 Management Of Health Care Organizations II (3.0); 3 cr. The purpose of this course is to prepare you for managing health care organizations within an environment of cost containment and quality management of health care services. In Module II, we will focus on quality improvement since many health care facilities are turning to total quality management concepts and processes as they strive for efficiency in operations and improvement of medical care delivered. Cost containment programs will be discussed with an emphasis on supply chain management and IT driven processes. Prerequisite: HCM 401.

HCM 403 Health Care Strategic Management (3.0); 3 cr. This course provides an introduction to how health care organizations (Payers, Providers, Suppliers) identify, create, and market their services within the context of a long-term strategic plan. The course will analyze the evolution of strategic management within the healthcare industry, and how it has responded to individuals in need of healthcare services. The class will also examine the core components of a strategic management approach, including situation analysis, formulation of a strategy, implementation, and follow-up relative to the mission and vision of the health
care organization. As an adjunct to these concepts, the class will review real world cases studies from throughout the healthcare industry. Finally, the communication of the organization’s mission, vision, and overall strategic management plan will be discussed. *Prerequisites: HCM 301, HCM 302.*

**HCM 404 Health Care Marketing Management (3.0); 3 cr.** This course focuses on strategic and tactical marketing issues facing health systems including: payers, providers and suppliers. The course requires a basic understanding of what is marketing. Emphasis is placed on analyzing market and patient needs and on understanding branding, service line marketing, patient retention, patient satisfaction, measuring marketing effectiveness, internet marketing and marketing implementation programs. The course explores the practical application of these marketing concepts on major industry players: Hospitals, Insurers, Medical Device Suppliers, and Pharmaceutical companies. *Prerequisites: MRK 201, HCM 301, HCM 302.*

**HCM 405 Health Care Financial Management (3.0); 3 cr.** This course examines the tools and methods of financial management in health care organizations with emphasis on allocation and use of funds in managing the components of health care delivery systems. Analysis of cost drivers and constraints of alternative source of funds, and the application of financial decision instruments and their effect on operational management and market value of the entity, including valuation methodology and risk management, are covered. Modeling profitability analysis and planning for health care providers and payers is surveyed. *Prerequisites: BAF 311, HCM 301, HCM 302.*

**HCM 406 Health Care Legal Environment (3.0); 3 cr.** This course provides a description of the legal framework in which Health Care Services operate. The course focuses on the national legislation at the level of the Ministry of Health, the National Social Security Fund (NSSF) and the Ministry of Labor to focus on citizens’ rights, patients’ rights and the duties, responsibilities and obligations of health care professionals, complemented with an overview of the laws surrounding the activities of private health care insurance providers. Professional orders will also be covered to complete the review at the local level. More globally, the course will investigate the statutes of the United Nations World Health Organization and its relationship with national Health Care Services entities. Ethical issues will be discussed to emphasize the particular nature of Health Care provision. *Prerequisites: HCM 301, HCM 302.*

**HCM 407 Seminars and Topics in Health Care Management (3.0); 3 cr.** Health care organizations are under continued pressure to contain costs while maintaining high quality health care. The purpose of this course is twofold: (1) to help you learn about the many controversial issues facing the healthcare industry; and (2) to prepare you for analyzing the issues affecting health care institutions, including payers, providers, and suppliers. You will learn how the various sectors of the health care delivery system deal with conflicting demands from an assortment of stakeholders, including governments, insurers, suppliers, employers, health care professionals, and patients. *Prerequisites: HCM 401, HCM 402, HCM 403.*

**HCM 408 Health Care Internship Program (1.0); 1 cr.** This course is required of all students in the Health Care Management Program. The course is designed to give students first hand experience in a health care setting. Students receive practical experience under the supervision of a qualified professional. In collaboration with the preceptor, students define a complex problem in the assigned firm/facility and in the area of responsibility, conduct an analysis of the problem and conceptualize a project to resolve the problem. In addition, upon completion of the course students should have the tools to effectively search for their first job. *Prerequisites: HCM 301, HCM 302.*
The Degree of Bachelor of Hotel Management and Tourism (BHMT)

Mission
Consistent with the Faculty mission, the Bachelor Program in Hospitality and Tourism Management at NDU contributes to the development of the Lebanese tourism industry and provides local, regional, and international markets with high caliber professionals of different areas of expertise. The Program aspires to embed in students an entrepreneurial spirit, sustainability principles as well as ethical and multicultural values.

Program Goals and Learning Outcomes

Goal 1: General skills:
Our graduates will demonstrate socially responsible professionalism.

Outcomes: by the end of the program graduates will be able to:

1.1: Act in light of sustainable development principles and the common good
1.2: Embrace universal human values and moral integrity
1.3: Behave professionally and in an informed manner
1.4: Provide customer-centered services
1.5: Communicate effectively.

Goal 2: Management specific goals:
Our graduates will demonstrate the ability to apply theoretical knowledge to business related challenges in the dynamic hospitality and tourism environment.

Outcomes: by the end of the program graduates will be able to:

2.1: Identify the role of business functions in the hospitality and tourism industry
2.2: Recognize and evaluate the impact of internal and external risks and opportunities
2.3: Demonstrate adequate skills in performing post-entry position operations
2.4: Use information technology in operational decision-making
2.5: Pursue professional and academic development.

All candidates for the Bachelor of Hotel Management and Tourism degree have to complete 18 3-credit courses as specified by the Department, 2 courses of Lab application, and an Internship to be preferably taken during the summer vacation. These courses provide the core Business, and Hospitality and Tourism operational skills needed prior to choosing a field of concentration.

Concentration Requirements
Consists of six 3-credit courses and 1 Internship depending on the chosen concentration
and the candidates preferred sub-specialization. These courses are to equip students with advance knowledge in their future professional field.

**Electives**
In addition to the major requirements, candidates need to fulfill 3 credits as free electives according to their personal interests.

**Admission Procedures and Requirements**
For admission procedures and requirements to the undergraduate degree programs offered by the Faculty of Business Administration and Economics, refer to the Office of Admissions, Undergraduate Admission section of the catalog.

**Registration Procedure**
For registration procedure for newly admitted and old students, late registration, course load, withdrawal from courses, and change of courses, see the appropriate page numbers in this catalog.

**Academic Rules and Regulations**
For complete and detailed information regarding academic rules and regulations for the undergraduate degree programs, students should refer to the appropriate page numbers in this catalog. The following additions and amendments pertain to the Faculty of Business Administration and Economics.

**Repeating Courses**
A student in the Faculty of Business Administration and Economics cannot register for a core or major course more than three times. At the third attempt, if the student still fails to get a passing grade, he/she should shift to another major or Faculty.

**Academic Probation**
A student in the Faculty of Business Administration and Economics will be placed on academic probation if at the end of a semester his/her overall GPA falls below 2.0/4.0.

**Dropping a Major**
A student in the Faculty of Business Administration and Economics who is on probation and fails at the end of a semester or summer session in two or more core and/or major courses, will be asked to change his/her major. Also, a student will be asked to change his/her major or Faculty if his/her GPA in the core and major courses drop below 2.0/4.0 for two consecutive semesters, provided he/she has completed 15 credits in the core and major courses.

**Readmission**
A business student who was asked to change his/her major or his/her Faculty of study due to poor performance in his/her major will not be readmitted in the same major or in the Faculty.

**Change of Major**
A change of major to the Faculty of Business Administration and Economics may be approved if the student meets the admission requirements and academic standards established by the Faculty.
Incomplete Grade
This grade is used only when the student, for reasons beyond his/her control, is unable to finish the work of the course, and there is reasonable expectation that he/she will successfully complete course requirements. If this grade is not resolved by the end of the eighth week of the following semester, the Office of the Registrar will convert the “I” to “F”. Granting “I” needs the prior approval of the Dean of the Faculty.

Disclaimer: Emphasis area appears on student transcript of record but not on student diploma.

The Hospitality, travel, and tourism industry ranks among the top three largest industries in the world. The NDU program of Bachelor of Hotel Management and Tourism is designed to prepare students for successful professional and executive careers in the hospitality and tourism industries by allowing them to specialize in one of the following four concentrations: Hospitality Management, Food & Beverage Management, Travel and Tourism Management, as well as Hospitality Events Management.

The various concentrations provide a sound foundation in hotel, restaurant management, tourism administration and events management through focused academic coursework, hands-on work experience, and intense interaction with the industry. They also provide relevant educational opportunities for persons currently employed in these industries and wishing to upgrade their skills.

Hospitality and Tourism Management students at NDU benefit from a rare opportunity to acquire the international management techniques, and seek knowledge adapted to their professional career orientations and specializations.

The academic program follows a dynamic process allowing it to adapt to the evolving and changing trends in the market. Students are required to perform practical internships locally and internationally to accumulate experience that will enable them to jump-start their careers.

Bachelor of Hotel Management and Tourism
The Department of Hotel Management and Tourism offers a program leading to the degree of Bachelor of Hotel Management and Tourism.

Graduation Requirements
Students seeking the degree of Bachelor of Hotel Management and Tourism must complete a total of 103 credits (104 credits for the Food and Beverage concentration) with an overall average of at least 2.0/4.0 and a minimum average of 2.3/4.0 in the major and concentration requirements. The 103 credits are divided into:
Degree Requirements (103/104 credits)

**Liberal Arts Core Curriculum**
27 cr.

**Major Requirements**
54 cr.
TTM 201, TTM 204, HSM 205, HSM 211, HSM 224, HSM 227, TTM 237, HSM 281, HSM 311, FBM 313, HSM 314, FBM 316, HSM 319, FBM 324, TTM 326, FBM 351, HSM 411, HSM 451, HSM 459.

**Concentration Requirements**
19/20 cr.
Hospitality Management Emphasis (19 cr.)
Food and Beverage Management Emphasis (20 cr.)
Travel and Tourism Management Emphasis (19 cr.)
Hospitality Events Management Emphasis (19 cr.)

**Free Electives**
3 cr.
Halfway through their university education, students majoring in Hotel Management and Tourism are provided with the opportunity to choose one of four concentration schemes. These options allow graduates to enhance their expert knowledge in one of the four most englobing fields of hospitality and tourism; thus, differentiating themselves from their peers and improving their potential for professional success.

**Hospitality Management Emphasis**
19 cr.

**Major Requirements**
10 cr.
FBM 381 or TTM 382, HSM 432, HSM 437, HSM 460.

**A choice of 3 courses from the following**
9 cr.
FBM 332, FBM 424, FBM 444, TTM 342, FBM 343, TTM 344, TTM 346, TTM 445, HSM 447, HSM 485, STA 206, ECN 211, COA 252, BAF 312, NTR 313, GEM 202 or ITL 202 or SPA 202, HVM 201, HVM 420, HVM 422, HVM 311, HVM 301.

**Food and Beverage Management Emphasis**
20 cr.

**Major Requirements**
11 cr.
FBM 332, FBM 381, FBM 414, FBM 424.

**A choice of 3 courses from the following**
9 cr.
FBM 343, HSM 432, HSM 437, FBM 444, HSM 447, FBM 464, HSM 485, STA 206, ECN 211, BAF 312, NTR 313, GEM 202 or ITL 202 or SPA 202, HVM 201, HVM 301, HVM 311, HVM 420, HVM 422.
Travel and Tourism Management Emphasis 9 cr.

Major Requirements 10 cr.
TTM 342, TTM 345, TTM 382, TTM 445.

A choice of 3 courses from the following 9 cr.
FBM 343, TTM 344, TTM 346, HSM 432, HSM 437, FBM 444, HSM 447, TTM 462, HSM 485, STA 206, ECN 211, BAF 312, GEM 202 or ITL 202 or SPA 202, HVM 201, HVM 301, HVM 420, HVM 422, HVM 311.

Hospitality Events Management Emphasis 19 cr.

Major requirements:
5 courses will be required as major core courses:
1. HVM 201 (3 cr.): Introduction to the International Events Industry
2. HVM 301 (3 cr.): Events Management Operations and Logistics
3. HVM 311 (3 cr.): Events Sponsorship, Fundraising and Partnership
4. HVM 431 (3 cr.): Event Management Project
5. HVM 382 (1 cr.): Internship

Major Electives 6 cr.
A choice of two courses from the following:
HVM 401, HVM 414, HVM 416, HVM 420, HVM 422, HVM 425, HVM 430, HSM 437, FBM 332, HSM 432, FBM 444, FBM 343, HSM 460, HSM 485, TTM 345, GEM 201 or ITL 202 or SPA 202, STA 206, NTR 313, TTM 342.
Minor in Hospitality Services Management (18 credits)

This minor introduces the student to the hospitality branch of the tourism industry, i.e. the world of hotels, clubs, casinos, service institutions, and all other accommodation facilities.

Undergraduate Courses: Hotel Management and Tourism

**TTM 201 Introduction to Tourism and Hospitality Management (3.0); 3 cr.** A comprehensive overview of the tourism and hospitality global industry. The course is a broad introduction of the industry’s scope, supply and demand components, socio-economic and environmental impacts, operations, career opportunities, and requirements for success. Students further gain exposure to the basic managerial functions and how they relate to the tourism and hospitality industry.

**TTM 204 Economics of Tourism (3.0); 3 cr.** This course applies economic principles to the tourism and hospitality industry. Special emphasis is placed on supply and demand and the determination of prices. It also discusses the impact of the GDP, growth, and fluctuations on the Tourism industry. The course further focuses on the contribution of tourism to the overall performance of the economy.

**HSM 205 Principles of Hospitality Financial Accounting (3.0); 3 cr.** Hospitality accounting principles, concepts, and practices pursuant to the industry’s systems of accounts. Careful consideration is given to practical transaction analysis, flow of accounting data to the financial statements and their implications with respect to cash flow, revenues, expenses, assets, liabilities, and equity management. **Corequisite: TTM 201.**

**HSM 211 Hospitality and Tourism Law (3.0); 3 cr.** A study of the legal responsibilities affecting the operations of the hospitality and tourism industries, including aspects of innkeeping, occupier’s liability, trades practices, licensing, health, taxation, and employment. Other topics include: corporation legislation, the law of contract, the role of ethics, and a comparative approach to foreign legislations relating to hospitality and tourism industries. **Prerequisite: TTM 201.**

**HSM 224 Front Office Operations and Management (3.0); 3 cr.** The course acquaints the student with the operations and procedures involved in managing the guest services area of a lodging operation. Functions covered deal with the guest cycle from reservations through checkout, including the night audit and their interaction with other operations. Intensive lab applications. **Prerequisite: TTM 201.**

**HSM 227 Housekeeping Operations and Management (0. 4); 2 cr.** This course is a guide to various aspects of housekeeping in a lodging industry from cleanliness, hygiene, maintenance, and aesthetic upkeep of the property. It deals with duties from those of executive housekeeper to room attendant. Intensive lab applications. **Corequisite: HSM 224.**

**TTM 237 Hospitality and Tourism Marketing (3.0); 3 cr.** An introduction to the concept, principles and practices of contemporary marketing as they apply to the specialized needs of the hospitality industry. Subjects covered are marketing concepts and environment, segmentation and positioning, consumer behavior, and marketing mixed strategies. The development of a practical marketing plan for an actual hospitality business is a special feature of this course. **Prerequisite: TTM 201.**

**HSM 281 Internship I: Rooms Division Operations; 1 cr.** A supervised on-the-job work experience in the lodging business. Arranged with a Department approved cooperating institution. This field experience _of no less than 500 hours_ emphasizes front office and housekeeping operations and management tasks. Student must check course guidelines before registering. **Prerequisites: HSM 224, HSM 226.**

**HSM 311 Hospitality Managerial Accounting (3.0); 3 cr.** This course focuses on the use of accounting information for management decision-making and control. Topics include costing, management control
systems and performance measurement. Emphasis is on cost-volume analysis, budgeting and pricing decisions. Prerequisite: HSM 205.

**FBM 313 Food Production (3.0); 3 cr.** An introduction to food production techniques and management. The course is designed to familiarize students with food composition and properties, commercial food preparation, safety, and sanitation. Students will develop the ability to standardize recipes, plan menus, and manage potential production problems. Practical involvement in food production is included. Intensive lab applications.

**FBM 316 Food Production Lab (0.6); 3 cr.** Practical implementation of the culinary concepts and techniques taught in Food Production (FBM 313). Corequisite: FBM 313 for HTM students only.

**HSM 314 Human Resources Management in the Hospitality Industry (3.0); 3 cr.** Knowledge of the human resources management function in the context of hospitality organizations is developed. In addition to personnel management techniques, exposure will focus on the HRM activities aimed at attracting, retaining, and motivating hospitality employees. Prerequisite: TTM 201.

**TTM 326 Domestic Travel and Tourism Development (2.2); 3 cr.** The course provides a complete description and geography of domestic tourism from the viewpoint of the traveler and the travel/tourism entrepreneur. Students will gain a solid practical understanding of local travel and tourism development, and potentials from a specific destination and potentials. Field trips and projects are part of this course. Junior Standing.

**FBM 324 Restaurant Operations and Floor Management (3.0); 3 cr.** An extensive theoretical and practical exposure to dining room operations and management. Students learn and practice different service and functions concepts as well as learn to manage scheduling, hosting, selling, cashiering, sanitation and safety, and operational performance. Service and related software labs are intensely used.

**FBM 332 Catering, Functions and Banqueting Management (3.0); 3 cr.** Course leading to a thorough understanding of the different catering concepts for special functions. Lectures and demonstrations focus on menu planning, working methods, catering equipment, kitchen and service layout, service, events preparation and execution, sales, and human resources organization. The course will equip students to operate and manage different types of food and beverage service, on and off premises. Corequisite: FBM 313.

**TTM 342 Travel Agency and Tour Management (3.0); 3 cr.** A thorough examination of the services and functions of retail and wholesale travel agencies. Specifically covered are agency organization, automation, and operations as well as wholesale package planning, implementation and evaluation. Field trips and actual projects will supplement classroom discussions. Junior Standing.

**TTM 344 International Travel and Tourism (3.0); 3 cr.** A complete description and
geography of international travel, notably current trends and cultural behavior, popular destinations, and international tourism organizations as well as major international travel transportation modes and routes. A comparative approach and evaluation of national and international destinations organization, management and marketing.

**TTM 345 Airline Passenger Services (3.0); 3 cr.** An introduction to the most important air transport service and safety skills essential to maintain traveler satisfaction. The course enables students to understand the application of international air transport standards relating to passenger and baggage handling functions. Practical working knowledge of airport passenger service functions will be acquired. *Junior Standing.*

**TTM 346 Automated Travel System (3.0) 3 cr.** A comprehensive, hands-on computer learning experience. Students will progress from the characteristics and development of automation in the retail travel agency to practical applications in computerized reservations and back-office systems. *Corequisite: TTM 342.*

**FBM 351 Food, Beverage and Labor Cost Control (3.0); 3 cr.** This fundamental course is designed to familiarize the student with the theory and practice of internal cost controls in the hospitality industry. A comprehensive and thorough understanding of quality assurance versus cost impact on profitability management is provided. Practical financial problems and actual operational techniques of functioning systems of internal control are studied. The focus is to provide future hospitality managers with the ability to handle the diverse issues regarding service quality, employee morale and cost management. *Prerequisite: FBM 313.*

**FBM 381 Internship II: Food and Beverage Operations; 1 cr.** A supervised on-the-job work experience in the food and beverage business, particularly restaurants and catering. Arranged with a Department approved cooperating institution, this field experience of no less than 500 hours emphasizes operations and management functions in service, production, inventory, and cost control. Student must check course guidelines before registering. *Prerequisite: FBM 324.*

**TTM 382 Internship III: Travel Agency and Tour Operations; 1 cr.** A supervised on-the-job work experience in the travel and tourism business, particularly travel agency and tour operations. Arranged with a Department approved cooperating institution, this field experience - of no less than 500 hours - emphasizes agency and group travel operations and management functions. Student must check course guidelines before registering. *Corequisite: TTM 342.*

**HSM 411 Hospitality Managerial Finance (3.0); 3 cr.** Understanding the role of the hospitality financial controller through the application of accounting, finance and cost control principles, aimed at maximizing the organization value. Focus areas include: preparation of financial statements, bond and stock valuation, working capital management, short-term financing, capital budgeting, and alternative financing arrangements. *Prerequisite: HSM 311.*

**FBM 414 Advanced Food Production (2.4); 4 cr.** The course aims to examine the latest techniques and production systems in the food service industry. Commercialized innovations in forms of food, techniques in production, storing and serving, and new technological developments in food service equipments are explored. *Prerequisite: FBM 313.*

**FBM 424 Restaurant Development and Management (3.0); 3 cr.** Students systematically plan and develop a restaurant from concept to operations. The course comprises concept analysis, feasibility study, menu development and pricing, technical and architectural planning, staffing, and pre-opening, opening, and operational administration. An applied project approach is used. *Prerequisite: FBM 324.*
HSM 432 Hospitality Property Management (3.0); 3 cr. This course provides an understanding of the peculiar responsibilities of the engineering and maintenance department. It includes a basic technical understanding of the major building operating systems (HVAC, sound, water, safety, and security), landscaping as well as the related operating energy and cost management. Field property visits included.

HSM 437 Hospitality Sales and Promotional Techniques (3.0); 3 cr. An analysis of hospitality buyers’ motivations and behavior, and the related effective promotional and sales techniques. This partly experiential course provides the opportunity to develop and practice promotional and personal-selling skills. Prerequisite: TTM 237.

FBM 444 Alcoholic Beverages Appreciation (3.0); 3 cr. This course provides knowledge and appreciation of the major alcoholic beverage from cultural background to production, evaluation purchasing, storing, and service etiquette. Wine, whisky, arak, beer, and spirits are emphasized. A further introduction to coffee, tea and non-alcoholic beverages is provided. Evaluation by tasting is an integral part of the course. Laboratory fee.

TTM 445 Sustainable Tourism (3.0); 3 cr. A deeper understanding and analysis of the business-society interface. Policy guidelines to bring both hospitality business and society towards sustainable, workable and mutually beneficial solutions are studied. Topics investigated: ecotourism, corporate policy and social responsibility, ethics and values in business, business interests and community issues, business and media relations, corporation and government relations.

HSM 447 Advanced Hospitality and Tourism Marketing (3.0); 3 cr. This elective course builds on the student’s previous exposure to the principles and practices of marketing. The key feature is the comprehensive and in-depth coverage of global market analysis for business opportunities and sustainable competitive advantage. A strong emphasis is placed upon the development of a greater appreciation of consumer behavior and competition analysis, selling and communication strategies and management as well as business negotiations. The course is heavily case oriented. Prerequisite: TTM 237.

HSM 451 Hospitality Management (3.0); 3 cr. Analysis of hospitality operating practices and policies and their managerial implications on the individual and group behavior in the organizational setting. The focus is on the acquisition and implementation of leadership styles to enhance organizational effectiveness and individual well-being. The course includes the study of group behavior, attitudes and stress management, communication, motivation, leadership, power politics, conflict, and organizational culture. Life case discussions and field projects are included. Prerequisite: HSM 314.

HSM 459 Hospitality and Tourism Strategic Management (3.0); 3 cr. This capstone course in hospitality and tourism features the integration of business theories and practices into strategic decision making. Focus is on external and internal analysis for business opportunities, organizing for market competitive orientation, quality assurance and sustainable competitive advantage. The course is heavily case-oriented to bring forward realism, and develop critical thinking and decision-making ability.

HSM 460 Special Topics in Hospitality (3.0); 3 cr. Selected readings and case studies referring to current topics and developments within the lodging and food service industries. The purpose is to expose students to recent developments, current challenges and future trends affecting the industry. Studied during the course is the impact of change on hotel and food service management. This is a seminar and case study course.

TTM 462 Special Topics in Travel and Tourism (3.0); 3 cr. An overview and analysis of current developments, trends, and challenges
in travel and tourism. Studied during the course are the impact and decision-making challenges faced by management due to macro and micro environmental changes with the resulting shifts of tourism destinations and expectations. This is a seminar and case study course.

**FBM 464 Special Topics in Food and Beverages** (3.0); 3 cr. This course provides students discussion and problem solving in major and current topics in the F&B field. Topics are announced in the term schedule.

**HSM 485 Seminar in Hospitality and Tourism Management** (3.0); 3 cr. Individual and group studies of a hospitality and tourism business in an area of special interest. It is an in-depth dissection of the managerial functions of the business concern. Findings and decisions are reported and discussed in class. *Corequisite:* HSM 451.

**HVM 201 Introduction to the International Events Industry** (3.0); 3 cr. This course is the initiation of the international events industry. The students throughout this course will gain understanding of the scope and purposes of the wide variety of events. The different components, timeline, and major integral parts that constitute an event will be emphasized. Appropriate skills and knowledge will be developed in order to adequately perform and assume responsibility of the management of an event. Practical exposure to case studies, field visits, and guest speakers will be part of this course.

**HVM 301 Events Management Operations and Logistics** (3.0); 3 cr. This course is comprehensive that examines the details of event planning, management, and operations. The students go through the nuts and bolts of events operations in terms of timeline, logistics, budget control, resources, stakeholders, laws, and regulations methodologies in order to organize successful fly plan and management events. *Prerequisite:* HVM 201.

**HVM 311 Event Sponsorship, Fundraising and Partnership** (3.0); 3 cr. This course develops the students’ research planning skills, to develop effective financial plans and feasibility studies, as well as to identify source and secure fund raising, sponsorship, and partnership opportunities. Applied case studies that investigate the above issues in the private, public, and non-profit sectors will be used intensively. *Prerequisite:* HVM 201.

**HVM 431 Events Management Project** (3.0); 3 cr. In this course, experiential learning opportunity will be given to the students to apply theoretical, knowledgeable, and practical skills acquired in class to organize and manage public events (from pre-paining concept phase, to executive and post-evaluation phases). *Prerequisite:* HVM 301.

**HVM 382 Internship;** 1 cr. A supervised on-the-job work experience in the events industry, particularly MICE, arranged with a Department- approved cooperating institution. This field experience - of no less than 500 hours - emphasizes operational involvement in the planning and execution of events. Students must follow the course’s pre-set guidelines. *Corequisite:* HEM 414.

**HVM 401 Contemporary Issues and Best Practices in Events Management** (3.0); 3 cr. This course is a highly interactive course that is destined to identify major trends, contemporary issues, and best practices in the events management industry. Through intensive use of case studies drawn from real life events. Students will have the opportunity to discuss and conduct post-event evaluations to identify success and failure factors, winning strategies, and potential challenges will be outlined. Thus, students will learn to develop alternative planning scenarios. *Prerequisite:* HVM 201.

**HVM 414 Events Production and Technical Issues** (3.0); 3 cr. This course conveys advanced knowledge of key production and technical issues, including: design, layout, printed material, power, lights, sound, audiovisual, information technology, special effect, music, colors, decoration, and
and audio-visual requirements, the transportation, the recruitment of labor and material, the measures of safety and security, the assessment of the event’s success, and all other related necessities. **Prerequisite:** HVM 201.

**HVM 416 Risks and Safety in Events Management (3.0); 3 cr.** A framework of contingency procedures will be elaborated to respond to possible safety and security risks that can hinder an event execution. Legal, logistics, financial, risk assessment, and operational safeguards to ensure protection against failures, losses, damage, and injury will be emphasized. **Prerequisite:** HVM 201.

**HVM 420 Protocol and Etiquette in Events Management (3.0); 3 cr.** This course outlines the importance of protocol and etiquette in events management. The student will enhance his/her manners and savoir vivre skills in conducting events and business transactions. Areas that will be emphasized include: the knowledge of agenda and time management, verbal and written communication, guest management, media management, dress codes, postures and gestures, and table manners. The outcome of the course is a student that carefully and professionally deals with both: known situations and difficult or unfamiliar situations to avoid any social “faux pas” that could ruin a perfectly good business deal. **Prerequisite:** HVM 201.

**HVM 422 M.I.C.E (meetings, incentives, conferences, and exhibition) Management (3.0); 3 cr.** This course serves as an overview of the Size and scope of the MICE industry. Upon completion, Students will acquire specialized managerial skills required to package, plan, execute, and evaluate these product segments. The management of such events incorporate the determination of the purpose, the message, the budget, the selection of site, the negotiation of contracts, the prospection for attendees, the setting of dates and timelines, the management of exhibit spaces, the lodging services, the procurement of food and beverages, the telecommunications and audio-visual requirements, the transportation, the recruitment of labor and material, the measures of safety and security, the assessment of the event’s success, and all other related necessities. **Prerequisite:** HVM 201.

**HVM 425 Casino and Entertainment Management (3.0); 3 cr.** A specialized course that provides a blend of technical, operational, and managerial knowledge that pertains to the gaming and entertainment businesses. The content emphasizes ethical and regulatory issues, technological and operational expertise, site and property management, security and surveillance systems, financial and marketing management, behavior-metrics, and the relationship of the casino and entertainment industries to the overall tourism and socio-cultural environments. **Prerequisite:** HVM 201.

**HVM 430 Recreational, Leisure and Sports Events Management (3.0); 3 cr.** This course covers the guidelines and principles of managing, executing, and evaluating recreational leisure and sport events. Students will broadly consider the different forms that these events can take; with a focus on the ones that are most popular. On top of the standard planning, logistics, funding, operations, design, maintenance, risk and safety tasks; Students will also learn to manage the interaction of the different stakeholders involved from a psychological and sociological perspectives. Patterns of behavior, control techniques, safety and environmental concerns, and demographic characteristics will be examined. **Prerequisite:** HVM 201.
GRADUATE DIVISION
The Graduate Division offers:

1. a program leading to the degree of Master of Business Administration.
2. a program leading to the degree of Master of Science in Financial Risk Management.
3. a program leading to the degree of Master of Science in Business Strategy.

1. Master of Business Administration Program
The MBA program provides students, who have distinct academic ability, with advanced business and management skills. It also targets practicing managers who aim to develop their capabilities and access to higher positions in their chosen careers. Although the program is designed as a terminal degree program, graduates are well prepared to pursue higher degrees in business and economics.

Mission
Consistent with the Faculty mission, the MBA program at NDU aims at providing aspiring candidates, of various professional and educational backgrounds, with a set of theoretical knowledge and technical skills allowing them to make informed business decisions in a socially responsible manner. The program equips them with the competencies necessary to advance in their careers or pursue further education, as well as being active players in local, regional, and international markets.

Program Goals and Learning Outcomes

General Attributes

Goal 1: Our students will be able to communicate effectively in written and oral forms:
- Objective 1.1: Students will prepare and deliver a professional speech on a business issue
- Objective 1.2: Students will produce professional quality business reports

Goal 2: Our students will integrate corporate social responsibility in their managerial thinking
- Objective 2.1: Students, when analyzing a business situation, will incorporate the corporate social responsibility concepts of a firm.

Goal 3: Our students will develop leadership skills
- Objective 3.1: Students demonstrate effective leadership in a team setting

Specific Attributes

Goal 4: Our students will demonstrate systematic thinking abilities:
- Objective 4.1: Students will systematically analyze complex business problems and produce feasible solutions.

Goal 5: Our students will be effective decision makers
- Objective 5.1: Students will be able to integrate the business knowledge to assess business scenarios and make effective strategic decisions

Research Skills

Goal 6: Our students will develop research skills
- Objective 6.1: Students will be able to plan develop and write academic research and professional reports.
Admission Procedures and Requirements
In addition to the general university requirements, applicants to the MBA program should submit the following documents:
  • The application form;
  • Two recent photographs;
  • Official transcripts from the university of origin and the overall GPA;
  • The official GMAT or GRE score;
  • Two recommendation letters (at least one from a former professor);
  • The CV showing work experience (if any);
  • Employment Letters specifying present position and years of service;
  • In addition to the documentation above, there will be an interview with the graduate committee.

Applicants holding a Doctoral degree are exempted from presenting transcripts and GMAT or GRE score.

Applicants coming from institutions where English is not the language of instruction, a minimum score of 600 in the English Entrance Test is required.

Eligibility for Admission
A composite score, consisting of weighted criteria, will be used to determine the eligibility of graduate applicants. Applicants to the MBA program could be:
  • Admitted;
  • Admitted on probation; students should obtain a minimum cumulative GPA of 3.0/4.0 upon completing 12 credits of graduate courses.

Applicants holding non-bachelor degrees in Business Administration or Economics may be required to take up to three credits of foundation courses. A minimum grade of “B” should be scored in each foundation course. The grades of these courses are not included in the GPA.

Graduation Requirements
Students seeking the degree of Master of Business Administration must complete a total of 39 credits on full-time or part-time basis with an overall average of at least 3.0/4.0.

2. Master of Science in Financial Risk Management Program
The Master of Science in Financial Risk Management is a specialized degree. It aims at providing students with a specialization in the field of Financial Risk Management. With adequate effort, our graduates will be well prepared to sit for the Financial Risk Manager (FRM®) professional certificate and to pursue education in doctoral programs.
The MS FRM is designed to attract:
  • Financiers, bankers, investors, auditors and other finance/accounting/insurance professionals, preparing themselves for the next stage in their careers;
  • Fresh business and economics graduates preparing themselves to jump-start a career in financial risk management;
  • Professionals and business or economics graduates aspiring to pursue doctoral studies in financial risk management or any other subject allied to finance;
  • Professionals and graduates of other scientific disciplines, in particular, engineering and hard sciences, contemplating a move into the world of finance and risk management.
Mission
The MS in Financial Risk Management (denoted MS FRM) at Notre Dame University-Louaize aims at providing aspiring candidates with a set of professional and technical skills allowing them to identify and manage various types of financial risk and solidly advance in their chosen pathway, whether that is further academic or professional studies, or employment.

Program Goals and Learning Outcomes
Goal 1: General Skills
Our graduates will demonstrate leadership and socially responsible professionalism.

Outcomes: by the end of the program graduates will be able to:
1.1: Identify and assess ethical dilemmas and propose appropriate courses of action
1.2: Behave pragmatically and in an informed manner
1.3: Demonstrate leadership traits
1.4: Perform effectively as a team member toward the achievement of a common goal
1.5: consider socio-environmental concerns in the decision making process

Goal 2: Program Specific Skills
Our graduates will demonstrate ability to identify and manage various types of financial and operational risk.

Outcomes: by the end of the program graduates will be able to:
2.1: use derivative instruments in trading and hedging
2.2: build, evaluate and manage investment portfolios
2.3: assess the impact of macro environmental factors and policies on financial markets and systems
2.4: apply a variety of techniques to examine operational and liquidity risks
2.5: use information technology to identify relevant scholarly works and theories and empirically assess their implications for financial risk management
2.6: calculate and manipulate value at risk
2.7: assess and manage credit risk

Goal 3: Research Capacity
Our graduates will demonstrate ability to engage in business research.

Outcomes: by the end of the program graduates will be able to:
3.1: Relate existing theories to research propositions
3.2: Understand and use the scientific method in social research
3.3: Plan, develop and write academic research and professional reports

Admission Procedures and Requirements
The requirements for entry into the MS FRM program are:

- BUSINESS AND ECONOMICS GRADUATES
  - An application form duly completed;
  - Two recommendation letters, one of which is from a university professor;
  - A cumulative average of 80% or 3.0/4.0.

- OTHER SCIENTIFIC DISCIPLINES GRADUATES
  - Same admissions requirements as indicated above in addition to up to 18 credits of relevant undergraduate Business courses.
Applicants from institutions where English is not the language of instruction, a minimum score of 600 in the English Entrance Test is required.

Credit Transfer
Up to 6 relevant master’s level credits can be transferred from other relevant master’s programs. Relevant programs include (list not exhaustive):
- MS, MA, MPhil or MRes programs in Business/Management;
- MS, MA, MPhil or MRes programs in Economics or Financial Economics;
- MBA (with or without concentration).

Graduation Requirements
Students seeking the degree of MS FRM must complete a total of 30 credits on full-time or part-time basis with an overall average of at least 3.0/4.0.

3- Master of Science in Business Strategy Program
The Master of Science in Business Strategy is a specialized degree. It aims at providing students with a specialization in the field of Business Strategy. This program is designed to attract:
- Business professionals preparing themselves for advancement in their careers.
- Fresh graduates of business and other faculties preparing themselves to jump-start a career in management.
- Professionals and fresh graduates aspiring to pursue doctoral studies in business strategy, or any other subject linked to the discipline.
- Professionals and graduates of other faculties contemplating a move into the world of business and management.

Mission
The MS in Business Strategy at Notre Dame University-Louaize aims at providing aspiring candidates with a set of professional and technical skills allowing them to incorporate a strategic perspective in their business processes and solidly advance in their chosen pathway be it further studies or employment.

Program Goals and Learning Outcomes
General Attributes

**Goal 1:** Our students will be able to communicate effectively in written and oral forms:
- Objective 1.1: Students will deliver professional business speeches and presentations
- Objective 1.2: Students will produce professional quality business papers

**Goal 2:** Our students will integrate corporate social responsibility in their managerial thinking
- Objective 2.1: Students will include the corporate social responsibility concepts of a firm when analyzing business situations.

Specific Attributes

**Goal 3:** Our students will demonstrate strategic and analytical thinking abilities:
- Objective 3.1: Students will analyze complex business problems and recommend optimal strategies.
Goal 4: Our students will be effective decision makers
   – Objective 4.1: Students will be able to assess business scenarios and make
effective and efficient decisions.

Research Skills
Goal 5: Our students will develop research skills
   – Objective 5.1: Students will be able to plan, develop, and write academic
research and professional papers.

Admission Procedures and Requirements
The requirements for entry are:
   • BUSINESS AND ECONOMICS GRADUATES
     - An application form duly completed
     - Two recommendation letters, one of which is from a university professor
     - A GPA of 3.0/4.0 or its equivalent at the undergraduate level
   • OTHER DISCIPLINE GRADUATES
     - Same requirements as indicated above in addition to up to 18 credits of relevant
undergraduate business courses.

Applicants from institutions where English is not the language of instruction, a
minimum score of 600 in the English Entrance Test is required.

Credit Transfer
Up to 6 relevant master’s level credits can be transferred from other relevant master’s
programs. Relevant programs include (list not exhaustive):
   • MS, MA, MPhil or MRes programs in Business/Management;
   • MS, MA, MPhil or MRes programs in Economics or Financial Economics;
   • MBA (with or without concentration).

The below items are applicable to all programs:

Time schedule
All the graduate courses are offered starting 5:30 p.m.

Registration Procedure
For registration procedure to the graduate program, see corresponding pages in this catalog.

Course Load
The maximum course load is 12 credits per semester.

Academic Advisor
Each graduate student shall be assigned an academic advisor to assist him/her in the
preparation of the plan of study and in selecting a supervisor for his/her thesis or research
project. However, it is the student’s ultimate responsibility to ensure that all graduation
requirements are met.

Academic Rules and Regulations
For complete and detailed information regarding academic rules and regulations of the
graduate degree programs, students should refer to corresponding pages in this catalog.
It is the responsibility of the graduate student to read and observe the academic rules and regulations set by the University and the Faculty. Ignorance of a rule or a regulation is not a justification for not applying them.

**Repeating Graduate Courses**
A graduate course may be repeated only once. In the calculation of the student’s cumulative GPA, only the last grade is considered.

**Dismissal from the Graduate Program**
A graduate student will be dismissed from the program for one of the following reasons:
- Failure to remove probation within two consecutive semesters after being placed on probation;
- Failing the research project or the thesis defense twice.
The Degree of Master of Business Administration (M.B.A.)
A student, guided by his advisor, can opt for an emphasis area by selecting specific Professional Enhancement Courses in Finance, Human Resources Management, Project Management or he/she can choose these courses from the different areas of emphasis (as Elective courses) and opt for a General MBA.

The Structure
The MBA Program consists of 39 credits of courses; it comprises:
- Two Foundation (Pre-MBA/preparatory) courses: a total of 3 non-earned credits

The foundation courses aim at equipping applicants from a non-business/economics background with a minimum level of knowledge pertaining to business studies. Moreover, students can concurrently register a non-related graduate course to Accounting or Finance. In this case, the maximum number of credits cannot exceed 6 cr. inclusive of the foundation course(s). These courses are:

Foundation Courses

**ACO 501 Fundamentals of Financial Accounting (1.0); 1 cr.** This course covers areas in financial accounting and aims at providing students with the basic accounting fundamentals enabling them to understand financial statements that are of concern to managers. Topics in accounting include but not limited to the accounting equation, the balance sheet, the income statement, the statement of cash flow.

**FIN 501 Fundamentals of Finance (2.0); 2 cr.** This course covers areas in managerial finance and aims at providing students with the basic finance fundamentals enabling them to deal with issues in finance that are of concern to managers. Topics in finance cover the time value of money, risk and return, and securities valuation.

---

Major Core Courses

**ACO 620 Accounting for Managerial Decision Making (3.0); 3 cr.** Business decisions are mostly based on accounting records and success is usually measured in financial terms. This course is directly concerned with those managerial aspects related to the use of accounting information to make sound and informed short-term and long-term calculated decisions. Topics include categorizing relevant costs, costing systems, and cost-volume-profit relationship. Special attention is also drawn to profit planning and budgetary control, pricing products and services, and measuring and managing customer relationships and life cycle costs. This course will also develop graduate students’ ability to analyze the published statements of corporations. *Prerequisite:* ACO 501 or Equivalent.

**FIN 620 Corporate Finance and Investment Decisions (3.0); 3 cr.** This course takes a practical look at the cores of corporate financial management and investment decisions. It treats the principal topics and issues that are
of concern to financial managers of modern organizations. These include but not limited to capital budgeting, capital structure, financing instruments, and derivatives. Prerequisite: FIN 501 or Equivalent.

MGT 620 Modern Corporate Management (3.0); 3 cr. This course aims to provide MBA candidates with a broad theoretical and practical understanding of some key concepts in modern corporate management. To achieve this aim, its looks at these concepts from three separate but interrelated lenses: organizational theory, organizational behavior, and human resource management. Topics include but not limited to organizational structure design, organizational change and development, leadership in organizations, motivation, recruitment and selection, and training and development. 

MGT 630 Operations and Supply Chain Management (3.0); 3 cr. Operations management is critical to ensure a smooth running of the supply chain and to deliver value to customers and the business as a whole within its overall strategy. This course examines the different frameworks for designing, diagnosing and improving operations and thereby, contributing in creating and sustaining a competitive edge in the workplace. Topics include but not limited to operations design, capacity planning and control, scheduling, supply chain logistics, and quality control and continuous improvement. Prerequisite: MGT 620.

MGT 640 Corporate Strategic Planning (3.0); 3 cr. This is a capstone course integrating the various concepts and skills taught in the other business courses. It focuses on strategic planning, business policy formulation and implementation. Strategic Planning is viewed as the process by which an organization maintains its competitiveness within its work environment by determining its present business position, where it wants to go, and how it wishes to get there. This is done by identifying business resources and competitive capabilities, and directs these resources towards gaining sustainable competitive advantages. The course treats also modern strategic perspectives such as global strategic planning, corporate governance and sustainable strategies, strategic games and business thinking. Prerequisites: FIN 620, MGT 620, MRK 620.

MRK 620 Marketing Management (3.0); 3 cr. This course aims to develop the MBA candidates’ critical understanding of the marketing function and its contribution to the success of an organization. It discusses and applies ideas in the areas of marketing planning, market research, consumer behavior and strategic marketing. Topics include but not limited to environment scanning and marketing planning, consumer and business purchasing processes, target markets and promotion, competitive intelligence and managerial decision making.

Support Core Courses

QMT 665 Quantitative Methods for Business (3.0); 3 cr. This course is a survey of multivariate data analysis techniques as applied to business problems. It aims at equipping MBA candidates with the necessary knowledge and skills to analyze complex data for sound decision-making. Topics include but not limited to statistical inferential methods, time series and forecasting techniques. The focus is on application rather than theoretical derivation.

BUS 668 Research Methodology for Business (3.0); 3 cr. This course views research as a strategic activity that occurs within the context of limited resources and within a framework of ethical, legal, and social constraints. It is at a graduate level in the theory and practice of social science research as applied to business problems.
The focus is on available research strategies and methods and their application to the development of a formal research design leading to successful implementation of research projects. MBA candidates will also be introduced to the conventions of reporting research and receive guidance in relation to the structure and format of their graduate reports and theses. **Prerequisites:** 12 Credits.

---

**Graduate Research Report**

**BUS 680 Graduate Applied Project (3.0); 3 cr.** A Graduate Applied Report yields a written report culminating from the systematic study of a significant problem in the field of business. It identifies the problem, states the major assumptions, explains the significance of the undertaking, sets forth the sources for and methods of gathering information, analyzes the data and offers conclusions, identifies limitations and suggest recommendations. This can be a group effort of a maximum of 2 students per group. Any full-time/part-time faculty member at the FBAE may serve as a supervisor subject to Dean’s approval. Students produce a structured report based on a research proposal that was submitted earlier to the Graduate Division within four weeks from the time of registration. **Prerequisite:** BUS 668, Corequisite: QMT 665.

**BUS 690 Thesis (6.0); 6 cr.** An MBA Thesis is a significant contribution to knowledge which shows a critical appreciation of existing knowledge in the field. The work must be communicated coherently in a thesis presented in a critical, literary and orderly way, and must show evidence of adequate analysis and discussion of results. This is an individual work. Only full-time faculty members can act as supervisors. Students produce a structured report based on a research proposal that was submitted earlier to the Graduate Division within four weeks from the time of registration. **Prerequisite:** BUS 668. Corequisite: QMT 665.

---

**Professional Enhancement/Elective Courses**

**FIN 625 Commercial Bank Financial Management (3.0); 3 cr.** The objective of this course is to equip students with theoretical principles and technical tools that allow them to:

- Understand sources and uses of bank funds and the risk of banking.
- Manipulate economic models of bank performance and valuation.
- Operate the bank’s Asset-Liability Management and interest rate risk.
- Study the capital and dividend management.
- Understand the traditional approach to business lending and in order to use modern methods for analyzing and managing credit.
- Assess the liquidity risk and apply liquidity management. Analyze the operational risk, securitization, and derivatives activities within banks. **Prerequisite:** FIN 620.

**FIN 627 Derivatives (3.0); 3 cr.** This course focuses on options and futures derivatives, and risk management at an advanced level. It presents a detailed but flexible coverage of options, futures, forwards, swaps (including interest rate, currency, and equity swaps), and risk management - as well as a solid introduction to pricing, trading, and strategies - and offers a strong blend of institution material, theory, and practical applications. **Prerequisite:** FIN 620.
FIN 629 Investment (3.0); 3 cr. The focus of this course is on financial theory and empirical evidence for making investment decisions. Topics include: portfolio theory, equilibrium models of security prices (including the capital asset pricing model and the arbitrage pricing theory); the empirical behavior of security prices; market efficiency; performance evaluation; and behavioral finance. Prerequisite: FIN 620.

MGT 625 International Business Management (3.0); 3 cr. The course aims at providing students with an operational perspective of the global business environment. While opening up horizons, emphasis will be on providing incentives and pre-requisites for effective, executive strategies to go international. The course ultimately explores the strategic context and operational determinants for cross-border commerce and the role of location, international competition, comparative macroeconomics, multinational corporate organizations, multiculturalism, cross-national alliances, international mergers and acquisitions. Prerequisites: MGT 620, MRK 620.

MGT 627 Organizational Behavior and Change Management (3.0); 3 cr. Organizational behavior - OB - investigates the impact individuals, groups and structure have on behavior and performance within organizations. Responding timely and effectively to dynamic environmental demands requires a good operational understanding of individual and group dynamics, values, needs and attitudes, perceptions and motivations, power politics and conflicts at work. OB is concerned with what people do in organizations and how that behavior affects performance. Prerequisite: MGT 620.

MGT 629 Entrepreneurship and Small Business Management (3.0); 3 cr. This course examines the peculiar attitude, skills and behavior needed for successful launching of new ventures and managing of small businesses, the backbone of modern economies. Aimed for those with a desire to become entrepreneurs, work in start-ups, or develop careers in consultancy,
venture capitals and investment banking, the course studies the best practices that foster innovation and new business development in independent or corporate settings. Referring extensively to business case examples and the experience of creative guest speakers, students will conduct analyses of new venture ideas and comprehensive transformation business plans. Prerequisite: MGT 620.

**PRM 625 Project Management Fundamentals (3.0); 3 cr.** This course will provide the students with a deep understanding of the fundamentals of project management. It covers mainly the process and framework of project management. The topics will include scope management, time management and cost management as well as the scheduling and the concept of earned value. This course will also tackle the role of the project manager in initiating, planning, executing, monitoring and closing projects.

**PRM 635 Quality and Risk Management (3.0); 3 cr.** More than half of global business projects fail. This failure can be due to different reasons and it is key for organizations to understand the most common causes in order to improve chances of success. This course is designed around project failures, contingency plans and projects recovery as well as the human resources management in the midst of it. PRM 635 applies quality control techniques and risk management concepts to projects to improve their success rate. Topics include quality planning, quality assurance, quality control, continuous improvement, risk identification, qualitative analysis, quantitative analysis, response planning, monitoring & control, and proactive planning.

**PRM 645 Processes Integration and Project Management (3.0); 3 cr.** This capstone course integrates the five processes that define project management. It covers the phases of initiation, planning, execution, monitoring and closeout and links them to the nine areas of knowledge in project management, being the integration, scope, time, cost, quality, human resources, communication, risk and procurement. Moreover, this course focuses on project communication, procurement and stakeholder management to provide the student with an in-depth understanding of the project structure and the management of its external environment.
The Degree of Master of Science in Financial Risk Management (MS FRM)

The MS program is predominantly composed of structured learning opportunities (taught elements) and discipline-related research components.

The Structure
The MS program consists of a total of 30 Credits of courses; it comprises:

Major Core Courses
There are a total of 6 major core courses that equip students with a solid base in the MS program. These courses are:

- **FRM 610** Derivatives 3 cr.
- **FRM 620** Advanced Investment 3 cr.
- **FRM 630** Economics of Financial Markets 3 cr.
- **FRM 640** Operational and Liquidity Risk Management 3 cr.
- **FRM 650** Credit Risk Management 3 cr.
- **FRM 660** Advanced Value Risk Management 3 cr.

Core Support Courses
The two support courses aim at:

- Increasing the MS candidates’ awareness of the main theories in the disciplines of Finance and Financial Risk Management;
- Equipping the MS candidates with the latest statistical and financial econometrics techniques;
- Providing the relevant training in finance research design, thus allowing them to write robust research proposals and conduct research at the forefront of the discipline;
- These courses are:

  - **FRM 665** Quantitative Methods for Finance 3 cr.
  - **FRM 680** Finance Research Methods 3 cr.

Research Project
The final phase of the MS program consists of writing a structured Master’s research thesis in the areas of finance, financial risk management, operational risk management, or allied disciplines (financial economics, econometrics, internal controls, etc.) based on an approved research proposal. Rules governing the procedures and the management of the MS Thesis are provided by the Graduate Division.

- **FRM 690** MS Thesis 6 cr.
Major Core Courses

**FRM 610 Derivatives (3.0); 3 cr.** This course focuses on options and futures, derivatives, and/or risk management at an advanced level. It presents a detailed but flexible coverage of options, futures, forwards, swaps, and risk management - as well as a solid introduction to pricing, trading, and strategy - and offers an outstanding blend of institution material, theory, and practical applications.

**FRM 620 Advanced Investment (3.0); 3 cr.** This course is designed to acquaint the student with the concepts of portfolio theory, portfolio management process, investment strategies and analysis with applications to the markets for equities and fixed income securities. The course discusses principles for valuing and managing financial assets such as bonds and stocks. It covers establishment of appropriate investment objectives, development and construction of portfolio strategies, estimation of risk-return tradeoffs, and evaluation of investment performance and risks. In addition, it focuses on institutional investors such as mutual funds and hedge funds, and also includes coverage of international investing.

**FRM 630 Economics of Financial Markets (3.0); 3 cr.** The Economics of Financial Markets aims to help student understand the role that financial markets play in the business environment. It also provides an understanding of the underlying institutions that either help financial markets work well or that interfere with the efficient performance of these markets. This course develops a series of applications of principles from finance and economics that explore the connection between financial markets and economy. In addition, it focuses on many public policy issues and examines how the most important players in financial markets, central banks, operate and how monetary policy is conducted in addition to possible reforms of international financial system.

**FRM 640 Operational and Liquidity Risk Management (3.0); 3 cr.** This course explores two major areas in risk management: operational and liquidity risks. Its covers the used techniques to estimate and calculate the risks and the risk VaR with application on real case studies. The Basel II & III frameworks are explored. Also, the dimension of leverage is analyzed and the hedge funds description together with their related risks measures are considered.

**FRM 650 Credit Risk Management (3.0); 3 cr.** This course introduces the structuring and the securitization processes and provides the students with the ability to analyze credit risks and credit derivatives. Topics include pricing and hedging counterparty risks, cash collateralized debt obligations, default risks and portfolio effects.

**FRM 660 Advanced Value Risk Management (3.0); 3 cr.** This course examines modern techniques for managing financial risks. It covers the different measurement approaches commonly used in several arenas including investing, hedging and trading. GARCH models are explored together with the EWMA for the volatility estimation and prediction. Copulas, VAR and stress testing are also studied for the optimization of strategies. Prerequisites: 18 Credits.
Core Support Courses

FRM 665 Quantitative Methods for Finance (3.0); 3 cr. This course presents a review of the mathematical models necessary to conduct research in finance and financial risk management and to use a variety of quantitative methods to analyze data and make decisions. It starts with an appraisal of some relevant mathematical and statistical concepts including probability (discrete, continuous, marginal, conditional, joint, etc.) and probability distribution (Normal, Binomial, Poisson and exponential). Sampling and sampling distributions, confidence interval estimation, and Hypothesis testing will be covered and applied on real finance cases. Then, regression analysis and statistical inferences together with the time series and forecasting analyses will be conducted. The ultimate objective of the course is to lead students to describe large complex data sets, run regression analyses, make quantitative forecasts, create optimization models, and run simulations.

FRM 680 Finance Research Methods (3.0); 3 cr. This course is at a graduate level in the theory and practice of social science research applied to Finance and Financial Risk Management problems. It covers the following three interrelated areas: (1) research design and data collection, (2) assumptions for discipline-based multivariate data analysis, and (3) contemporary finance theory, thus providing the relevant training allowing students to write robust research proposals and conduct research at the forefront of the disciplines of Finance and other allied subjects.

Research Project

FRM 690 MS Thesis (6.0); 6 cr. The MS Thesis is a scholarly research study of Finance topic preferably related to Financial and/or Operational Risk Management, that is grounded in relevant theories and which uses advanced quantitative/qualitative data analysis techniques. Based on a research proposal approved by the Thesis Committee, the MS Thesis culminates in a report of a minimum of 15,000 words. Graduating students should satisfactorily defend the research design and findings before a grade could be assigned. Although not a requirement for graduation, students are expected to submit their work for publication in refereed conference proceedings and/or esteemed journals. Prerequisites: FRM 665, FRM 680.
The Degree of Master of Science in Business Strategy

The MS program is predominantly composed of structured learning opportunities and discipline-related research components.

The Structure
The program consists of a total of 30 credits; it comprises:

Major Core Courses
Four major core courses equip the student with a solid base; these courses are:

- **MBS 610** Modern Corporate Management 3 cr.
- **MBS 620** Marketing Strategy 3 cr.
- **MBS 630** Strategic Financial Analysis 3 cr.
- **MBS 640** Strategic Operations Management 3 cr.

Major Elective Courses
The choice of the major elective courses will depend on student interest; two courses from the following pool must be chosen:

- **MBS 615** Strategic Marketing Communications 3 cr.
- **MBS 625** Corporate Governance 3 cr.
- **MBS 635** Strategic Brand Management 3 cr.
- **MBS 645** Entrepreneurship 3 cr.

Capstone Course
The capstone course utilizes the collective knowledge in the different functional areas in business to equip the student with the necessary skills he/she requires in crafting and implementing the strategic plan.

- **MBS 660** Business Policy 3 cr.

Research Component
The final phase of the MS program consists of writing a structured Master’s research thesis based on an approved research proposal preceded by a course that introduces students to quantitative and qualitative research methods.

- **BUS 668** Research Methodology for Business 3 cr.
- **BUS 690** MS Thesis 3 cr.
**MBS 610 Modern Corporate Management (3.0); 3 cr.** This course aims to provide candidates with a broad theoretical and practical understanding of some key concepts in modern corporate management. To achieve this aim, its looks at these concepts from three separate but interrelated lenses: organizational theory, organizational behavior, and human resource management. Topics include but not limited to organizational structure design, organizational change and development, leadership in organizations, motivation, recruitment and selection, and training and development.

**MBS 620 Marketing Strategy (3.0); 3 cr.** The focus of this course is strategic marketing analysis and marketing planning. Students will study the components and construction of a strategic marketing plan, and they will learn to analyze complex marketing situations/decisions. Current cases will be used. This course will also review trends in marketing including the integration of marketing communications, customer relationship management, global markets, the impact of e-commerce and the expanding organizational role of marketing.

**MBS 630 Strategic Financial Analysis (3.0); 3 cr.** This course provides the students with a systematic framework for using financial statements in business analyses, equipping students with the finance skills to make strategic finance and business decisions. Students will learn to interpret financial information and value opportunities in order to make good decisions regarding ongoing business performance, choosing between project investment alternatives, resource allocation, company valuations and company capital structures.

**MBS 640 Strategic Operations Management (3.0); 3 cr.** Operations management is critical to ensure a smooth running of the supply chain and to deliver value to customers and the business as a whole within its overall strategy. This course examines the different frameworks for designing, diagnosing and improving operations and thereby, contributing in creating and sustaining a competitive edge in the workplace. Topics include but not limited to operations design, capacity planning and control, scheduling, supply chain logistics, and quality control and continuous improvement.
Major Elective Courses

MBS 615 Strategic Marketing Communications (3.0); 3 cr. Strategic Marketing communications tackles an area of growing importance in strategic management that of developing and managing an integrated marketing communications plan aligned with the corporate, business and functional strategies of an organization. The aim of this course is to go beyond the tactics of marketing communications to incorporate the long-term strategy into an overall program that efficiently meets the business and marketing objectives of the firm.

MBS 625 Corporate Governance (3.0); 3 cr. Corporate governance is a topic of increasing importance in strategic management. The aim of this course is to build a critical understanding of corporate governance. To this end, we will examine the mechanisms and control systems of an enterprise that will ensure that it pursues its strategic goals successfully and legally. We will explore the governance structure including the internal and external monitoring systems as well as the independent auditing while emphasizing on ethics, transparency and the social responsibility.

MBS 635 Strategic Brand Management (3.0); 3 cr. Some of a firm’s most valuable assets are the brands that it has invested in and developed over time. This course provides students with insights into how profitable brand strategies can be created. It addresses three important questions. How do you build brand equity? How can brand equity be measured? How do you capitalize on brand equity to expand your business? The course content has relevance to students pursuing a variety of different career goals in virtually any type of organization (public or private, large or small, etc.).

MBS 645 Entrepreneurship (3.0); 3 cr. This course examines the peculiar attitude, skills and behavior needed for successful launching of new ventures and managing of small businesses, the backbone of modern economies. Aimed for those with a desire to become entrepreneurs, work in start-ups, or develop careers in consultancy, venture capitals and investment banking, the course studies the best practices that foster innovation and new business development in independent or corporate settings. Referring extensively to business case examples and the experience of creative guest speakers, students will conduct analyses of new venture ideas and comprehensive transformation business plans.

Capstone Course

MBS 660 Business Policy (3.0); 3 cr. This is a capstone course integrating the various concepts and skills taught in the other business courses. It focuses on strategic planning and business policy formulation and implementation. Strategic Planning is viewed as the process by which an organization maintains its competitiveness within its work environment by determining its present business position, where it wants to go, and how it wishes to get there. This is done by identifying business resources and competitive capabilities, and directs these resources towards gaining sustainable competitive advantages. The course treats also modern strategic perspectives such as global strategic planning, corporate governance and sustainable strategies, strategic games and business thinking. Prerequisites: 18 credits.

Research Component

BUS 668 Research Methodology for Business (3.0); 3 cr. This course views research as a strategic activity that occurs within the context of limited resources and within a framework of ethical, legal, and social constraints. It is at a graduate level in the theory and practice of social science research as applied to business problems. The focus is on available research strategies
and methods and their application to the development of a formal research design leading to successful implementation of research projects. Candidates will also be introduced to the conventions of reporting research and receive guidance in relation to the structure and format of their graduate reports and theses. Prerequisites: 18 credits.

**BUS 690 Thesis (6.0); 6 cr.** A MS Thesis is a significant contribution to knowledge which shows a critical appreciation of existing knowledge in the field. The work must be communicated coherently in a thesis presented in a critical, literary and orderly way, and must show evidence of adequate analysis and discussion of results. This is an individual work. Faculty members with expertise in the research field can act as supervisors. Students produce a structured report based on a research proposal that was submitted earlier to the Graduate Division within four weeks from the time of registration. Prerequisite: BUS 668. Corequisite: MBS 660
FACULTY OF ENGINEERING
FACULTY DIRECTORY
Office of the Dean
El Hayek, Michel, Doctorate, Dean
FE Building, 3rd floor, Room E 3018

**Advisors**
Bou Mosleh, Charbel (E 2028); Francis, Francis (E 2008); Ghnatiuos, Chady (E 2006);
Habchi, Charbel (E 2070); Metni, Najib (E 3010)

**Advisor North Lebanon Campus**
Francis, Francis (E 2008, NLC - F 8)

**Laboratory Instructors**
Daou, Wissam (E 0012); Melki, Sylvie (E 1015).
FACULTY OF ENGINEERING

Mission of the Faculty
The Faculty of Engineering at NDU endeavors to graduate engineers who understand the ethical, social, economic, and environmental contexts of their profession at the local, regional, and international levels, and who apply their knowledge with sound judgment and responsibility in order to develop ways to utilize the materials and forces of nature in a sustainable manner for the benefit of mankind. The Faculty of Engineering is committed to the education of the whole person according to the University’s model of liberal arts education and through its applied curricula, quality research, and extra-curricular activities. Students are encouraged to pursue lives of global citizenship, community service, life-long learning, and exemplary leadership. In keeping with the University mission, the Faculty of Engineering aims to graduate students who are rooted in their faith of God.

Vision of the Faculty
To be recognized as a regional center of excellence for engineering education where highly qualified faculty and outstanding students pursue knowledge in a context of ethical and social values. This distinguished education will enable students to contribute in a socially responsible manner to the development of Lebanon and the region.

Values of the Faculty

- **Excellence in education and scholarship:** Highly qualified faculty educate students through theory and hands-on instruction using the latest available technologies. High quality research addresses problems of relevance to the community and enhances classroom instruction.

- **Life-long learning:** Our students will be equipped with the tools and skills that enable them to keep up to date in their field.

- **Service:** Our students will be encouraged to use their knowledge for the service of the community through engineering projects and extra-curricular activities.

- **Faith and integrity:** In keeping with the tradition of the Maronite Mariamite Order, we aim to graduate students that are rooted in their faith in God. This faith expresses itself in respect for God’s creation and integrity in their daily professional and social interactions.

FACULTY PROFILE

The Faculty of Engineering at Notre Dame University-Louaize was established in 1996 by Lebanese Government decree no. 9278 as the Faculty of Engineering and Architecture. The name was changed to the current one in 1997 following the move of the architecture program to the Faculty of Architecture, Art and Design. The Faculty currently enrolls more than 1600 students in its three departments offering four bachelor of engineering degrees and three master of science in engineering degrees, and has more than 2600 alumni around the world.

The Faculty of Engineering endeavors to offer an excellent education for its graduates and to prepare them to enter the professional practice in the engineering field. Despite its relatively young age, the Faculty of Engineering at NDU has positioned itself as one of the top engineering schools in Lebanon and the region. To further strengthen its position, the Faculty is currently seeking international accreditation for all its programs and the outcomes are expected soon.
Our curricula have a strong applied component supported by state of the art laboratory facilities. Engineering students develop their design skills by tackling real world projects in laboratory courses, class design projects and senior engineering design projects, many of which are done in cooperation with industry. Emphasis is also placed on giving the students an understanding of the ethical, social, economic and environmental impact of engineering work.

In keeping with high academic standards, all our full-time faculty members hold PhD degrees in their field and our selective admission and transfer policies ensure that we get the highest caliber of students. These students have distinguished themselves by winning prizes at national and international design competitions and by publishing their undergraduate research findings in national and international conferences.

Our small class sizes ensure good interaction with instructors and good access to academic help outside of the classroom. Several on-campus chapters of international professional organizations are active in the Faculty (ASCE, ASHRAE, ASME, IEEE & EWB). These ensure that students are exposed to the latest technical developments in their field. Several agreements with universities in Europe and the USA have been signed. These agreements provide opportunities for our students to engage in research and graduate studies at reputable universities.

With the fast technological developments our society is witnessing, engineering is becoming a profession where one needs to be equipped for life-long learning, to have excellent communication skills and an ability to engage in effective teamwork. These objectives are achieved through the rigorous educational program in the Faculty and they are the qualities that enable our students to succeed in today’s job market.

While keeping an eye on the latest developments in engineering education and striving to implement them for the benefits of the students, the Faculty endeavors to maintain a healthy environment within the spirit and mission of a catholic institution like NDU. The Faculty does care about the human dimension, a feature that all our graduates miss when experiencing different academic or work environments.

This is an exciting time to be an engineer and NDU offers a unique engineering education where students have access to the latest technology, qualified instructors, excellent facilities and exposure to the values of faith, excellence and service embedded in NDU’s mission.

**ACADEMIC DEPARTMENTS AND DEGREE PROGRAMS**

The Faculty of Engineering consists of the following departments:

- Department of Civil and Environmental Engineering;
- Department of Electrical & Computer and Communication Engineering;
- Department of Mechanical Engineering.

and offers degree programs in Civil Engineering (CE), and Computer and Communication Engineering (CCE), Electrical Engineering (EE), and Mechanical Engineering (ME) leading to the degree of Bachelor of Engineering. The Faculty offers also graduate programs in Civil Engineering, Electrical and Computer Engineering, and Mechanical Engineering leading to the degree of Master of Science (MS) in Engineering.

The Department of Civil and Environmental Engineering offers a minor in Engineering Management which is opened to all Engineering students.
POLICIES AND PROCEDURES

Admission Requirements

Admission to the Engineering programs is governed by the University admission requirements as outlined in the general section of the University Catalog.

Transfer Requirements

The Faculty of Engineering at NDU accepts transfer students from Engineering, Sciences and Architecture majors at recognized universities provided they have completed a minimum of 12 credits at their institution with a cumulative GPA of 2.7. For students from French-system universities, they need to have successfully completed a minimum of one academic year with an average of 70/100. All applicants must be eligible to continue their studies at their home institution.

In addition to that, students from Science and Architecture majors should have completed a minimum of 12 credits of Mathematics/Physics/Chemistry courses at the sophomore level or higher with a minimum total GPA of 3.0 in these 12 credits.

Transfer students can receive credit for NDU courses listed under the Liberal Arts Curriculum (LAC), Core Requirements, and Free Elective categories of the NDU contract sheet. In order to ensure that the student has achieved the needed outcomes and objectives specified by the concerned Department, the Faculty of Engineering reserves the right not to give transfer credit for courses listed under the Major Requirements category even if the student has taken similar courses at his or her institution. For students transferring from Science and Architecture majors, no courses listed under major requirements or technical electives can be transferred.

For a list of required documents and the relevant dates and deadlines, students planning to transfer to the Faculty of Engineering need to check with the NDU Office of Admissions.

Residency Requirements

Full-time students entering the Engineering programs of first year standing must complete the listed program within eight years of the date of enrollment in the corresponding program.

A transfer candidate with a Bachelor of Engineering degree from a recognized institution is required to successfully complete a minimum of 45 credits of upper-division course work including a graduation project. A transfer student without a Bachelor of Engineering degree is required to successfully complete a minimum of 60 credits of upper-division course work including a project work.

Course Load Requirements

In general, students are not allowed to carry more than 17 credits per semester, nor more than 9 credits in a summer session unless otherwise specified in their suggested program. Restrictions may be imposed on students whose overall GPA is less than 2.3/4.0. A student whose overall GPA is no less than 3.2/4.0 may petition to take a maximum load of 18 credits per semester.

Students in their last semester may petition to take up to 20 credits given they have a cumulative GPA of 3.5 and above and they satisfy the minimum residency requirement for their major. Students with a cumulative GPA less than 3.5 may petition to take up to 19 credits maximum in their last semester provided they satisfy all other requirements.
Graduation Requirements
To receive a degree of Bachelor of Engineering offered by the Faculty of Engineering, a student must complete a total of 150 credits with an overall GPA of at least 2.0/4.0 and a minimum average of 2.0/4.0 in the major requirements and technical electives. In addition all major requirements and technical elective courses must be successfully completed with a minimum grade of “C-”.
LIBERAL ARTS CURRICULUM
All engineering degree programs share a common pool of Liberal Arts Curriculum (LAC), made of 27 credits distributed as follows:

**Category I. Communications Skills** 9 cr.
A. English (6 cr.)
   - ENL 213: Sophomore English Rhetoric
   - and one course from:
     - ENL 223: Communication Arts
     - ENL 230: English in the Workplace

B. Arabic (3 cr.)
   - One course from:
     - ARB 211: Appreciation of Arabic Literature
     - ARB 212: Advanced Arabic Grammar
     - ARB 224: Arabic Literature and Human Thought
     - ARB 231: Technical Arabic
     - ARB 306: The Modern Arabic Novel and Short Story
     - ARB 310: Arabic Theater

**Category II. Religion** 3 cr.
- One course from:
  - REG 212: Religion and Social Issues
  - REG 213: Catholicism
  - REG 215: World Religions
  - REG 313: The Maronites: Faith and Cultural Heritage
  - REG 314: Marriage and Family in the Catholic Church

**Category III. Ethics** 3 cr.
- ENG 310: Ethics in Engineering

**Category IV. Citizenship** 3 cr.
- One course from:
  - POS 201: Introduction to Political Science
  - POS 209: Citizenship
  - POS 210: Government and Politics of Lebanon
  - POS 319: Democracy and Human Rights
  - POS 240: Law and Society
  - FQM 200: Food Security and Sustainability

**Category V. Cultural Studies and Social Sciences** 6 cr.
- Two courses from:
  - **A. Cultural Studies**
    - PHL 211: Logic and the Scientific Method
    - PHL 232: Ancient World Philosophy
    - PHL 333: Medieval World Philosophy
    - PHL 334: Modern and Contemporary World Philosophy
    - LIR 214: Introduction to Literary Genres
    - LIR 217: American Literature to the End of the 19th Century
LIR 305: Novel to the End of the 19th Century
ARP 215: Cultural Themes in Lebanese Architecture
FAP 215: Art and Culture
MUS 210: Music Appreciation
HIT 211: History of Lebanon
POS 225: Politics of Catholic Social Theory
TTM 326: Domestic Travel and Tourism Development
TTM 201: Introduction to Tourism & Hospitality Management
NTR 215: Foods and Nutrition of World Cultures
COA 315: World Cinema Survey
COA 350: Current Issues

B. Social Sciences
SOL 201: Introduction to Sociology
SOL 316: Society and Women
SOL 322: Family: Sociological Perspectives
SOL 323: Society and Role of Global Intercultural Communication
PSL 201: Introduction to Psychology
BAD 201: Fundamentals of Management
MRK 201: Fundamentals of Marketing
ECN 211: Principles of Microeconomics
ECN 212: Principles of Macroeconomics
ENG 220: Engineering Innovation
ENG 210: Introduction to Engineering Economy
CSC 206: Games and Society

Category VI. Applied and Life Sciences 3 cr.
One course from:
AST 201: Discovering Astronomy
BIO 201: Your Body in Action
CSC 202: Computers for Visual Arts
ENS 201: Introduction to Environmental Science
ENS 202: The Environment and Sustainable Development
GIS 211: Principles of Geographical Information Sciences
HEA 201: Health Awareness
HEA 204: Contemporary Health Issues
MIS 201: Management Information Systems
NTR 201: Basic Human Nutrition
Common Engineering Courses

The Faculty of Engineering offers general courses of interest to all degree programs:

**ENG 201 Introduction to Engineering (3.0); 3 cr.** Engineering design: needs, specifications, feasibility, models. System, detailed alternative and optimum design. Reliability and liability. Communication. Patents and copyrights. Ethics.

**ENG 202 Computers and Engineering (3.0); 3 cr.** Introduction to basic programming in engineering using software tools such as MATLAB and LabView. Introduction to number conversions and systems. **Corequisite:** MAT 215.

**ENG 210: Introduction to Engineering Economy (3.0); 3 cr.** Interest and time value of money. Investment, financing, depreciation, and economic selection. Analysis of engineering costs and capital investment in the design and implementation of engineering projects. **Prerequisite:** ENG 201.

**ENG 220: Engineering Innovation (3.0); 3 cr.** Introduces students to innovative thinking and practice and how entrepreneurship and technological innovation are organically related. It includes topics such as life skills in innovative thoughts and actions, engineers vital role in problem solving and innovation, lessons learned and entrepreneurship, research and development, market strategy, management of entrepreneurial firms and products, networking, startups, examples of projects leading to multinational companies.

**ENG 310: Ethics in Engineering (3.0); 3 cr.** Ethical issues in the practice of engineering: corporate responsibility; personal rights; honesty, ethical aspects of safety, risk and liability and conflicts of interest; environmental issues and sustainability; codes of ethics; emphasis on developing the capacity for independent ethical analysis of real cases.
Minor in Engineering Management

Objectives and Outcomes
The Objective of this minor is to provide engineering students with better exposure to project management methods, planning, engineering economy, and leadership. It offers students the necessary tools for managing technical projects in an interdisciplinary environment. This minor is intended to prepare engineering students in any engineering discipline to acquire specific useful management skills and to be able to use technology more appropriately. It strives to graduate engineers who understand the market and financial investments of engineering projects.

Eligibility
The Minor in Engineering Management program is opened to NDU undergraduate engineering students:
- In their second or third year of studies.
- Who are in a good academic standing (GPA>2.0).
- Who have applied and been admitted into the program.

Curriculum
The Minor in Engineering Management requires at least six courses (18 credits) chosen as follows:

A: Required Courses (12 credits)
- ACO 201 Principles of Accounting I
- BAD 201 Fundamentals of Management
- CEN 393 Project Management
- One course from:
  - CEN 392 Engineering Economy
  - ENG 210 Introduction to Engineering Economy

B: Elective Courses (6 credits)
Choose 2 courses from the following pool:
- BAD 317 Organizational Behavior
- BAD 429 Operations Management
- BAD 425 Quantitative Techniques for Management
- CEN 471 Civil Engineering Laws and Ethics
- CEN 493 Construction Planning
- ECN 200 Survey of Economics
- MAT 339 Numerical Analysis
- MGT 201 Principle of Human Resources
- MGT 411 Leadership Quality & Performance
- MRK 201 Fundamentals of Marketing

A minimum grade of “C-” is required in each course of the minor. The cumulative GPA should be at least 2.0.

Application Procedure
An Application Form is available in the Department of Civil and Environmental Engineering. Students must submit a petition through their advisor and attach the application form. All application forms must be received by July 10 for fall enrollment and January 10 for spring enrollment. Late or incomplete application forms will not be considered.
Withdrawal Procedure
Withdrawal from the Minor in Engineering Management must be done by filing a petition through the advisor.
The Degree of Bachelor of Engineering in Civil Engineering

Mission
The Civil Engineering Program seeks to graduate civil engineers who use their knowledge and ability to design and construct sustainable civil and environmental engineering systems which both serve the needs of society and adhere to professional ethical standards. The program is to prepare students to engage in lifelong learning and to be leaders who understand the practical aspects of engineering along with successful management and business practices and public policy. Students and graduates are prepared to successfully compete for regional and international grants and positions.

Program Educational Objectives
- Apply technical and non-technical skills to design, construct and manage sustainable projects;
- Exhibit ethical and professional commitments to the community and the environment;
- Pursue a life-long learning, such as graduate work and continuing education;
- Become leaders who demonstrate strong communication, multidisciplinary teamwork, and management skills in their chosen profession.

Program Learning Outcomes
- An ability to apply knowledge of mathematics, science, and engineering;
- An ability to design and conduct experiments, as well as to analyze and interpret data;
- An ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability;
- An ability to function on multidisciplinary teams;
- An ability to identify, formulate, and solve engineering problems;
- An understanding of professional and ethical responsibility;
- An ability to communicate effectively;
- The broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context;
- A recognition of the need for, and an ability to engage in life-long learning;
- A knowledge of contemporary issues;
- An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.
**Degree Requirements**
The Department of Civil and Environmental Engineering offers one program leading to the degree of Bachelor of Engineering in Civil Engineering. The course requirements of the degree involve a total of 150 credits divided into the following pools:

**Liberal Arts Curriculum**  
27 cr.

**Core Requirements**  
47 cr.
CHM 211, CHM 271, BIO 204, EEN 205, ENG 201, ENG 202, MAT 213, MAT 215, MAT 224, MAT 235, MAT 326, MAT 339, MEN 201, MEN 215, PHS 206, PHS 275, GEO 201.

**Major Requirements**  
58 cr.

**Approved Professional Training**  
CEN 489.  
1 cr.

**Technical Electives**  
12 cr.

**Or you may choose to follow a concentration on one of the tracks below:**

**Concentration: Structural and Material Engineering**  

**Concentration: GeoEnvironmental Engineering**  

**Concentration: Transportation and Planning Engineering**  
CEN 392, CEN 393, CEN 450, CEN 543, CEN 544, CEN 493, CEN 594.

**Concentration: Construction Management**  
5 cr.
CEN 370, CEN 392, CEN 393, CEN 471, CEN 493, CEN 594.

**Free Electives**  
Include any course offered of particular interest, of sophomore level (200-level) or above.
Undergraduate Courses: Civil Engineering

CEN 201 Engineering Mechanics (3.0); 3 cr. Forces; free body diagrams; beams; trusses, tension, compression, shear and bending moment diagrams; stress-strain relationship; stresses in beams due to bending and shear forces; torsion of circular members, buckling of columns. Opened only to EE and CCE students.

CEN 202 Statics (3.0); 3 cr. Forces, moments and couples; free body diagrams; problems involving beams, trusses, and various engineering applications. Corequisite: ENG 201.

CEN 203 Mechanics of Materials (3.0); 3 cr. Tension, compression, shear and bending moment diagrams; torsion; stress-strain relationship; stresses in beams; pressure vessel; combined loading and unsymmetric bending; Mohr’s circle beam deflections; buckling of columns. Prerequisite: CEN 202.

CEN 204 Mechanics of Materials Laboratory (0.2); 1 cr. Testing for material characterization. Experiments related to static and fatigue testing of various types of materials. Tests include tension, compression, bending and buckling. Prerequisite: CEN 203.

CEN 210 Structures I (3.0); 3 cr. Structural forms; analysis of structurally determinate structures; moving loads, influence lines; introduction to indeterminate structures. Collapse and analysis. Prerequisite: CEN 203.

CEN 220 Soil Mechanics (3.0); 3 cr. Stress-strain relations and properties of soil, seepage and flow nets. Bearing capacity of soils, footings on sand and clay. Prerequisite: CEN 203.

CEN 221 Soil Mechanics Laboratory (0.2); 1 cr. The nature of soil behavior; laboratory tests include physical properties of soils, stress-strain relationships, compressibility, and shear strength. Prerequisite: CEN 220.

CEN 250 Surveying (2.0); 2 cr. Surveying and instrumentation; Introduction to optical, photographic, mathematical, and geometrical principles relevant to photogrammetry and remote sensing; introduction to global positioning system.

CEN 251 Field Surveying (0.2); 1 cr. Field plane surveying; topographic mapping; location survey and route surveying. Corequisite: CEN 250.

CEN 270 Engineering Graphics (0.2); 1 cr. Drawing of three-dimensional objects, orthographic, sectional, pictorial view. Developed surfaces and intersections.

CEN 271 Civil Engineering CAD (0.2); 1 cr. This is an introductory course lab on CAD tools to be used by engineers and architects. CAD systems are interface soft wares. The CAD systems shall be used in conjunction with civil engineering basic drafting tools to form visualizations in 2D and 3D engineering entities. It constitutes the basic knowledge in AutoCAD, TransCAD, and other CAD software systems. Corequisite: CEN 270.

CEN 311 Structures II (3.0); 3 cr. Analysis of statically indeterminate structures; methods of consistent deformations, slope, deflection, and moment distribution. Energy theorems and applications to trusses, beams, and frames. Prerequisite: CEN 210.

CEN 325 Shallow Foundations (3.0); 3 cr. Subsurface explorations, methods of exploration and sampling, design of sheeting and bracing systems for shallow foundations. Consolidation theory, settlement analysis. Prerequisite: CEN 220.

CEN 343 Transportation Engineering I (3.0); 3 cr. Transportation in society, and mobility; people and goods. Introduction to operating principles and procedures for transportation systems. Level-Of-Service, vehicle flow and capacity. Traffic analyses and control. Transportation Planning; Travel Demand Forecasts; demand-supply relationships; modeling. Project. Prerequisite: Third Year Standing. Corequisite: MAT 326.

CEN 360 Hydraulics (3.0); 3 cr. Open channel flow, momentum and energy principles; water surface profiles; flow measurement. Prerequisite: MEN 215.

CEN 361 Hydraulics Laboratory (0.2); 1 cr. Applying continuity, momentum, and energy principles to flow problems. Experiments include laminar and turbulent flows, major and minor losses, hydraulic jump, weirs, flow measurements. Prerequisite: CEN 360.

CEN 370 Electrical, Mechanical, and Sanitary Systems (3.0); 3 cr. Electrical requirements and distribution in buildings; design of heating, cooling, and ventilation systems; selection and design of water distribution and plumbing systems.

CEN 392 Engineering Economy (3.0); 3 cr. Engineering economic analysis for project and design evaluation, decision making including replacement and retention, budget limitation, breakeven and sensitivity analysis. Case studies in the design/system analysis process, time value of money and economic evaluation of alternatives, risk analysis, and the effects of depreciation and taxes. Prerequisites: ENG 201, Junior Standing.

CEN 393 Project Management (3.0); 3 cr. Fundamentals of Project Management, engineering organization, planning, budgeting, scheduling and cost controls, bidding process, tender documents and contracts. Examples will be given in all fields of Engineering. Prerequisite: Junior Standing.

CEN 407 Advanced Mechanics of Materials (3.0); 3 cr. Three dimensional strain and stress states, application of energy methods, torsion of noncircular members, nonsymmetrical bending of straight beams, shear center for thin-wall beam cross sections, curved beams. Prerequisite: CEN 210.

CEN 430 Concrete Design II (3.0); 3 cr. Study of the strength, behavior, and design of indeterminate reinforced concrete structures, with primary emphasis on slab systems; emphasis on the strength of slabs and on the available methods of design of slabs spanning in two directions, with or without supporting beams. Analysis and design of long columns, and footings. Prerequisite: CEN 330.

CEN 431 Concrete and Pavement Design Laboratory (0.2); 1 cr. Experiments dealing with concrete and asphalt properties, proportioning, design and analysis. Prerequisite: CEN 330. Corequisite: CEN 443.

CEN 440 Steel Design (3.0); 3 cr. Design of steel beam girders, tension member columns, bolted, riveted, and welded connections. Prerequisite: CEN 210.

CEN 443 Transportation Engineering II (3.0); 3 cr. The geometric design of highways, drainage, roadbed, environmental concerns, cost. Highway interchanges concepts. Roadbed construction; pavement design, construction, and management. Intermodal stations, airports design concepts. Project. Prerequisite: CEN 343.

CEN 450 Advanced Surveying (3.0); 3 cr. Subdivision theory, usage of total station in field surveying. Prerequisites: CEN 250, CEN 251.

CEN 461 Water Pollution control and treatment (3.0); 3 cr. Fundamental principles and engineering application of physical, chemical, and biological processes
(like sedimentation, filtration, coagulation, flocculation, membranes, aerobic, anaerobic biological processes) are discussed. **Prerequisite:** CEN 462 or instructor’s approval.

CEN 462 Environmental Engineering (3.0); 3 cr. Quantitative evaluation of the environmental, economic, and technical problems involved in control of pollutants of the air, water, and land. **Prerequisite:** MEN 215.

CEN 463 Water and Waste Water Networks (3.0); 3 cr. Quantities of water and wastewater; collection, transportation, and distribution; water distribution network; design of sanitary and storm-water sewer systems. **Prerequisite:** CEN 360.

CEN 465 Environmental engineering Laboratory (1.0); 1 cr. Laboratory and field experiments related to pollution of air, water and soil. Tests include air sampling, water testing, sound measurement, wastewater treatment, compost tests and landfill cover performance. **Prerequisite:** CEN 462.

CEN 471 Civil Engineering Laws and Ethics (3.0); 3 cr. Survey of Lebanese construction codes and regulations; civil engineering practice as related to environmental destruction and moral behavior.

CEN 489 Approved Professional Training (0.0); 1 cr. Department approved summer training practice in Civil Engineering. A report is required. **Prerequisites:** Senior Standing, Third year standing, CEN 325, CEN 330, CEN 392.

CEN 493 Construction Planning (3.0); 3 cr. Job Planning and management, selection of construction equipment, soil stabilization, tractors, scrapers, excavating equipment, trucks, operation analysis, drilling rock, blasting, tunneling.

CEN 495 Engineering Project (3.0); 3 cr. Individual supervised work in one of the main field of Civil Engineering. **Prerequisites:** CEN 491, ENL 230.

CEN 510 Elasticity (3.0); 3 cr. Stress-Strain, elasticity formulation, solution by potentials, stress functions, torsion, thick cylinders, rotating disks, thermal stresses, straight simple beams, curved beams. **Prerequisite:** CEN 407.

CEN 520 Matrix Method for Structural Analysis (3.0); 3 cr. Displacement (stiffness) method, truss applications, rectilinear, tapered and curved beams, matrix transformation, frame analysis, influence coefficients and coordinate transformation, force method. **Prerequisite:** CEN 311.

CEN 521 Dynamics of Structures (3.0); 3 cr. Theory and application of structural dynamics for single and multiple degree-of-freedom models of buildings due to dynamic forces. Concepts of overall seismic design of buildings, proportioning, and detailing to achieve satisfactory seismic response. **Prerequisite:** Senior Standing.

CEN 522 Structural Project (3.0); 3 cr. Usage of commercial software packages in the analysis and design of multi-story concrete and steel buildings, Bridges and storage tanks. **Prerequisite:** CEN 430.

CEN 523 Design of Structural Systems (3.0); 3 cr. The whole structural design process including definition of functional requirements, selection of structural scheme, formulation of design criteria, preliminary and computer-aided proportioning, and analysis of response, detailing. **Prerequisites:** CEN 430, CEN 440, or instructor’s approval.

CEN 524 Prestressed Concrete (3.0); 3 cr. Fundamentals of analysis and design of post-tensioned and pre-tensioned structural members, proportioning of members, calculation of the amount and positioning of reinforcement. **Prerequisite:** CEN 430 or instructor’s approval.

CEN 530 Slope Stability (3.0); 3 cr. Slope stability analysis methods. Use of software packages. **Prerequisite:** CEN 325.
CEN 531 Deep Foundations (3.0); 3 cr. Subsurface exploration and sampling, design of sheeting and bracing systems for deep foundations. Pile and corrosion analysis. Prerequisite: CEN 325.

CEN 541 Advanced Steel Design (3.0); 3 cr. Design of structural systems for multiple loads, combined loading, torsion, and fatigue in structural members, plate and box members. Prerequisite: CEN 440.

CEN 543 Transportation Engineering III (3.0); 3 cr. One, two, or three topics in Transportation Engineering shall be offered. The course shall be concerned with the process of analyses and design of the topic concerned. Topics like airports; ports and harbours; railways and railway stations; traffic; supply-demand modelling; others. Projects. Topics shall be specified when the course is offered. Prerequisite: Fourth Year Standing Corequisite: CEN 443.

CEN 544 Designs of Highway Bridges and Interchanges (3.0); 3 cr. Geometric design of highway interchanges and analyses and design of simple highway bridges. Project. Prerequisites: Fourth Year Standing, Instructor approval.

CEN 560 Air pollution Engineering (3.0); 3 cr. Characterization of sources, emissions, transport, transformation, effects, and control of air pollutants. Prerequisite: CEN 462, or instructor’s approval.

CEN 580 Finite Element Methods I (3.0); 3 cr. Theory and application of finite element methods as an analysis tool for two-dimensional stress problems in engineering. Prerequisite: CEN 203 or MEN 202.

CEN 581 Finite Element Methods II (3.0); 3 cr. Solution of advanced three-dimensional stress problems in engineering. Prerequisite: CEN 580.

CEN 594 Selected Topics in Civil Engineering (3.0); 3 cr. Structured presentations of new and developing areas of knowledge in civil engineering offered by the department to augment the formal courses available. Prerequisite: Individually identified for each offering under this course number.

CEN 598 Engineering Design I (1.0); 1 cr. The objective of this course is to develop a project proposal that includes the following items: Choice of project topic, literature survey, market analysis, feasibility study, project timeline, list of materials and cost, engineering ethics issues, social and environmental impact, etc. Prerequisite: ENL 230 or ENL 223, Department approval.

CEN 599 Engineering Design II (2.0); 2 cr. Implementation of the engineering design project that was proposed in CEN 598. Includes report, final presentation. Prerequisite: CEN 598.
The Degree of Master of Science in Civil Engineering

Program Objectives
The aim is to graduate civil and environmental engineers with a strong knowledge in one of the fields of Transportation, Project Management and Urban Planning, Geoenvironmental, or Structure and Material. Candidates will then move into the workplace with a strong theoretical background, as well as design experience in the field of their expertise.

Admission Requirements
Admission to the MS in Civil Engineering program is subject to the graduate admission requirements of the university as stated in the catalog under “Graduate Admission”. In addition, the following requirements are to be met:

- Bachelor of Engineering degree in civil engineering or its equivalent from a recognized university (holders of BS degrees in civil engineering will have to take a set of remedial courses to be specified on a case by case basis in order to meet the total number of credits required);
- Cumulative GPA of 3.0 minimum (or its equivalent from a recognized faculty of engineering);
- GRE Scores;
- Approval of the Faculty Graduate Committee.

Furthermore, applicants should be able to demonstrate proficiency in the English language. All English requirements, as stated in the catalog under “Graduate Admission”, are to be fulfilled.

Graduation Requirements
The program leads to the degree of Master of Science in Civil Engineering awarded once the following requirements are fulfilled:

- The candidate must complete a total of 30 credits with a minimum cumulative GPA of 3.0/4.0. All courses are to be passed with a minimum of B grade as per rules and regulations concerning graduate studies at NDU. Failed courses may be repeated once provided that the grade on the failed course is equal to D or higher. Failing a course with an F grade means an automatic exclusion from the program;
- Holders of a bachelor of engineering in civil engineering (5-year program leading to the degree of BE) from a recognized university may apply to transfer a maximum of twelve credits from their undergraduate upper level courses equivalent to 500-level elective civil engineering courses at NDU. Only courses with a B grade can be considered for transfer;
- The residency requirements and maximum load per semester are as per rules and regulations for graduate programs at Notre Dame University-Louaize.

Course Requirements
The 30 credits are composed of:

- 12 credits (4 courses) of required courses in the major field;
- 9 credits of technical electives (3 courses) from the other three fields, listed below, or from other departments upon the decision of the graduate committee;
- 3 credits (1 course) of graduate electives approved by the graduate committee;
- 6 credits of research dedicated to writing a Master Thesis and defense. The topic selected should be related to the major field. A student selects a topic of research with the assistance of his/her advisor. A thesis defense is to be performed in front of a committee.
Major Fields

A. Transportation and Urban Planning

B. Water Management and Geoenvironmental Engineering

C. Structures and Materials
CEN 600, CEN 601, CEN 602, CEN 603, CEN 604, CEN 605, CEN 606, CEN 607, CEN 611, CEN 612, CEN 613, CEN 614, CEN 615, CEN 616, CEN 617.

D. Project Management
Graduate Courses: Civil Engineering

CEN 600 Advanced Mechanics of Materials (3.0); 3 cr. Three dimensional strain and stress states, application of energy methods, torsion of noncircular members, nonsymmetrical bending of straight beams, shear center for thin-wall beam cross sections, curved beams.

CEN 601 Elasticity (3.0); 3 cr. Stress-Strain, elasticity formulation, solution by potentials, stress functions, torsion, thick cylinders, rotating disks, thermal stresses, straight simple beams, curved beams. Prerequisite: CEN 600.

CEN 602 Matrix Method for Structural Analysis (3.0); 3 cr. Displacement (stiffness) method, truss applications, rectilinear, tapered and curved beams, matrix transformation, frame analysis, influence coefficients and coordinate transformation, force method.

CEN 603 Dynamics of Structures (3.0); 3 cr. Theory and application of structural dynamics for single and multiple degree-of-freedom models of buildings due to dynamic forces. Concepts of overall seismic design of buildings, proportioning, and detailing to achieve satisfactory seismic response.

CEN 604 Design of Structural Systems (3.0); 3 cr. The whole structural design process including definition of functional requirements, selection of structural scheme, formulation of design criteria, preliminary and computer-aided proportioning, and analysis of response, detailing.

CEN 605 Earthquake Resisting Structures Design (3.0); 3 cr. Earthquake analyses and design of structures; static and dynamic forces, Lebanese earthquake design codes; Soil properties and local ground conditions, ductility and demands on structural components; inelastic behavior of structural components, redundancy. Shear walls and bracing under cyclic loading of concrete structures. Design applications.

CEN 606 Finite Element Methods (3.0); 3 cr. Theory and application of finite element methods as an analysis tool for two-dimensional stress problems in engineering; solution of advanced three-dimensional stress problems in engineering.

CEN 607 Nonlinear Finite Element Methods (3.0); 3 cr. Isoparametric finite element discretization, incremental equations of motion. Total and update Lagrangian formulation. Nonlinear geometry, nonlinear material problems. Use of software packages for final solutions. Prerequisite: CEN 606.

CEN 611 Prestressed Concrete (3.0); 3 cr. Fundamentals of analysis and design of post-tensioned and pre-tensioned structural members, proportioning of members, calculation of the amount and positioning of reinforcement.

CEN 612 Concrete Technology - Materials and Admixtures (3.0); 3 cr. Properties, behavior and technology of concrete in both fresh and hardened states; microstructure properties, strength, dimensional stability, and durability. Concrete materials, mix proportioning, early age properties, hydraulic cements, chemical admixtures. Advances and future challenges in concrete technologies and mechanics. Project.

CEN 613 Strengthening and Rehabilitation of Concrete Structures (3.0); 3 cr. Evaluation, analyses and design of concrete existing structures. Strengthening and repair methods and procedures to rehabilitate concrete structures. Non-destructive testing methods, properties, behavior and application of repair materials chemically-modified, durability. Design Project.

CEN 614 Special Topics in Concrete (3.0); 3 cr. Earthquake load and seismic

**CEN 615 Design of Composite Construction (3.0); 3 cr.** Introduction to composite construction. Composite beams, composite box girders in bridges, composite floors and composite columns. Design of Multi-storied commercial and residential composite building. Seismic behavior of composite structures.

**CEN 616 Advanced Steel Design (3.0); 3 cr.** Design of structural systems for multiple loads, combined loading, torsion, and fatigue in structural members, plate and box members.

**CEN 617 Probability and Statistics for Civil Engineers (3.0); 3 cr.** Introduction to random variables, probability distributions, expectations and moments. Random processes. Methods of perturbation. Monte Carlo simulation. Stochastic finite element.

**CEN 621 Deep Foundations (3.0); 3 cr.** Subsurface exploration and sampling, design of sheeting and bracing systems for deep foundations. Pile and corrosion analysis.

**CEN 622 Slope Stability (3.0); 3 cr.** Slope stability analysis methods including stresses in soils, Mohr circles, failure theories, shear strength of cohesive and cohesion less soils. Use of software packages is also applied in an assigned project.

**CEN 623 Geotechnical Reliability Analysis and Reliability-Based Design (3.0); 3 cr.** Review of Probability, Characterization of geotechnical uncertainties, Estimating random properties from spatial data, Simulation of geotechnical variability, Reliability analysis methods (FOSM, FORM, Monte Carlo simulation etc...), Reliability-based design of geotechnical structures, Partial factors and Load and Resistance Factor Design (LRFD).

**CEN 643 Transportation Engineering III (3.0); 3 cr.** One, two, or three topics in Transportation Engineering shall be offered. The course shall be concerned with the process of analyses and design of the topic concerned. Topics like airports; ports and harbors; railways and railway stations; traffic; supply-demand modeling; others. Projects.

**CEN 644 Designs of Highway Bridges and Interchanges (3.0); 3 cr.** Geometric design of highway interchanges and analyses and design of simple highway bridges. Capacity analysis and site selection. Environmental and socio-economic impacts of transportation structures. Software’s Application; Project.

**CEN 645 Pavement Design and Management (3.0); 3 cr.** Highway and airport pavement design; flexible and rigid pavements; ESAL calculations, pavement materials, stresses and deflections in pavements; pavement drainage; design of overlays; pavement management, priority programming and rehabilitation. Project.

**CEN 646 Traffic Engineering (3.0); 3 cr.** Fundamentals of traffic engineering, queuing theory, AASHTO and HCM criteria; capacity analysis and level of service concepts, traffic demand at at-grade intersections and highway segments; intersections design and control; weaving, interchanges. Software application. Project.

**CEN 647 Urban Transportation Planning (3.0); 3 cr.** Urban travel demand pattern time evolution in metropolitan areas; travel demand surveys; demand and supply; land-use models, macro-level urban transportation models (traditional four-step and activity-based), and micro-level operational models. Software application. Project.

**CEN 648 Transportation and Land Development (3.0); 3 cr.** Land subdivision theory and practice; socio-demographic forecasts, landuse planning and zoning, impact on metropolitan road network;
urban development, site planning and traffic impact studies (TIS); site access and parking facilities, and local streets design; interdependence of transportation with urban land-use patterns. Project.

CEN 649 Transportation System Analysis (3.0); 3 cr. Systems analysis and decision making using concepts from economics, engineering, public policy analysis, operations research, and management science; application to transportation systems; air pollution, mitigation techniques, traffic congestion and road safety issues. Project.

CEN 650 Advanced Surveying and GPS (3.0); 3 cr. Land subdivision theory and practice; total station field usage and data digitization; highway and land surveys and location; remote sensing and global positioning system (GPS). Project.

CEN 651 Infrastructure Planning and GIS (3.0); 3 cr. Theory and a comprehensive practical application of the geographic information systems (GIS) and remote sensing technologies for analysis and solution of different transportation and infrastructure issues (GIS-T), impact related issues and mitigation techniques. Project.

CEN 652 Rail Roads, Ports and Harbors (3.0); 3 cr. Planning and design of railway tracks and stations, overview of port planning, management and operations with reference to terminal processes and engineering aspects of port development, port management models, port pricing and financing. Project.

CEN 653 Airports; Planning and Design (3.0); 3 cr. Airport planning and design parameters, site selection. Airports layouts and capacity, runways and taxiways; land side and airside terminal building layout and design. Demand forecasting, access and air traffic operation and management. Project.

CEN 654 Building laws, Site Selection and Parking (3.0); 3 cr. A comprehensive review of Lebanese building and construction laws with respect to design criteria, site parking and impact criteria, design principles and of on- and off-street design, mechanical parking systems, preliminary project sizing. Civil engineering practice and ethical issues. Project.

CEN 656 Planning using GIS (3.0); 3 cr. Theory and a comprehensive practical introduction to the use of geographic information systems (GIS) and remote sensing technologies for the analysis and solution of different water and environmental problems (for example urban planning, pipe-network systems analysis, river basin management, groundwater analysis and water pollution assessment).

CEN 658 Transportation Economics (3.0); 3 cr. The concepts, theory and methods of economic theory in transport demand analysis, transport pricing, congestion pricing tools, welfare considerations, and transport policy evaluation. Transportation projects funding and its new trends such as public-private partnership and procurement strategies.

CEN 659 Transportation Asset Management (3.0); 3 cr. The concepts, theory and methods of infrastructure management, asset management principles, concepts and identification of asset performance requirements, community and stakeholder benefits and consultation, system performance and measures, level of service and Infrastructure Management Information Systems (IMIS).

CEN 620 Advanced Soil Mechanics (3.0); 3 cr. Soils characterization, mineralogy,
stresses in soils, basic porous media flow principles, effective stress principle, compaction, consolidation theory and application drained and undrained stress-strain-strength concepts.

**CEN 661 Air Pollution Engineering (3.0); 3 cr.** Characterization of sources, emissions, transport, transformation, effects, and control of air pollutants.

**CEN 662 Solid Waste Management (3.0); 3 cr.** Engineering principles, socioeconomic and regulatory issues related to solid and hazardous waste management. Integrated solid waste management system, hazardous waste management practices. Design and decisions in waste management alternatives.

**CEN 663 Bioremediation (3.0); 3 cr.** Microbiology, Cell structure, morphology, cell nutrition and growth, energy transfer and utilization, aerobic and anaerobic microbial metabolism, biological wastewater process theory and modeling, biological nutrients removal, and disinfection of relevant microorganisms, enzyme kinetics and kinetic coefficients for biotreatment, laboratory techniques of treatment.

**CEN 664 Integrated Water Management (3.0); 3 cr.** Water resources, water quality, planning and management. Watershed stresses, ecological endpoints; optimization, environmental protection; total maximum daily load process; standards and environmental goals; economic and equity issues; and watershed restoration. Legal framework, Clean Water Act, EU Water Framework and the Lebanese Framework.

**CEN 665 Advanced Hydrology (3.0); 3 cr.** Hydrologic principles of surface and ground water as an integrated resource. Hydrologic cycle, hydrologic measurements and monitoring, surface and ground water hydrology. Hydrologic design, stochastic hydrology, and simulation modeling.

**CEN 666 Advanced Water and Wastewater Treatments (3.0); 3 cr.** Design for removal of impurities from water. Treatment, unit operations and processes. Industrial wastewater, advanced chemical treatment technologies, land treatment, membrane technologies, liquid and solid streams recycling or reuse.

**CEN 667 Water Distribution, Drainage and Sewerage Systems (3.0); 3 cr.** Water demand and pipeline, components of piped systems, pipe material, bedding and laying, hydraulics flow in pressurized networks, water transportation and distribution systems, storm water drainage systems and foul sewerage systems. Operation and maintenance of piped systems. Design tools using computer models.

**CEN 669 Environmental Impact Assessment (3.0); 3 cr.** Global approach to the Environmental Impact Assessment of projects on the environment. Project evaluation, constraints, limitations, precautions. Introduction to mitigation processes, legal measures, methodologies, investigation techniques, in-situ surveillance.

**CEN 684 Building: Energy and Environment (3.0); 3 cr.** Energy efficiency and environmental quality, analyses of various utility rate structures, life cycle cost and techniques, renewable and conventional energy sources, dynamics of the envelope, energy audit procedures, effect of operation and maintenance on the energy use. Project.

**CEN 685 Risk Engineering (3.0); 3 cr.** Analysis of uncertainty in engineering projects and processes including planning, design and construction. Review and application of probabilities, statistics, and decision analysis applications. Variability of loads, environmental concerns; materials properties; prediction and system reliability analysis. Risk analysis and the decision process.

**CEN 690 Advanced Project Management (3.0); 3 cr.** Presentation of concepts and important issues in managing projects.
effectively. It includes project selection, planning, negotiation, budgeting, cost estimation, scheduling, resource allocation, control, auditing, and termination.

CEN 691 Six Sigma Techniques and Total Quality Management (3.0); 3 cr. Advanced topics in Engineering Management and Total Quality Management (TQM). Topics such as costs of quality, statistical tools, initiating change, advanced topics, and TQM in practice will be covered in addition to Six Sigma Quality Techniques.

CEN 692 Financial Engineering (3.0); 3 cr. Use of principle and financial economics in engineering. Capital asset pricing, term structure of interest, and other capital allocation models will be covered. Assessment of real-options using binomial lattice, Black-Scholes and other pricing models.

CEN 693 Simulation Modeling (3.0); 3 cr. Principles and methods for discrete-event simulation modeling. Use of simulation in the planning systems. Simulation modeling perspectives and languages, variance reduction methods, model validation, and output testing.

CEN 694 Dynamic Optimization (3.0); 3 cr. Methods including dynamic programming, the calculus of variations, and optimal control theory. Focus is on the modeling and solution of practical problems applying these techniques.

CEN 695 Advanced Construction Planning (3.0); 3 cr. Job Planning and management, selection of construction equipment, soil stabilization, tractors, scrapers, excavating equipment, trucks, operation analysis, drilling rock, blasting, tunneling.

CEN 696 Advanced Operations Research (3.0); 3 cr. Review of quantitative methods to gain skills in modeling and decision-making. It includes z-transforms and difference equations, Markov Chains, decision analysis techniques, goal programming, game theory, queuing theory and nonlinear programming.

CEN 697 Decision Analysis (3.0); 3 cr. Review of methods of optimizing decisions. It includes decision models, fuzzy controls, statistical decision theory, formal logic, game theory, stochastic programming, information theory, multiobjective decisions, and qualitative aspects of the decisions.

CEN 698 Special Topics in Engineering Infrastructures (3.0); 3 cr. Presentations of recent issues in Engineering Infrastructure related to a developed project or research. This course complement students knowledge by addressing latest techniques and their implementation.

CEN 699 Sustainable Development Planning (3.0); 3 cr. Policy and planning for sustainable development. Sustainability as a method of social, organizational, and political development based on cases from the MENA region. Discussions on ecological enhancement; sustainable technology development, international and intergenerational fair trades, and democratic governance.

CEN 700 Master Thesis; 6 cr. Implementation of a proposal developed with the approval of the advisor. It includes a Thesis report and a final defense in front of a committee.
DEPARTMENT OF ELECTRICAL, COMPUTER AND COMMUNICATION ENGINEERING

Professors: Georges, Semaan; Hamad, Mustapha; Nassar, Elias

Associate Professors: Atallah, Jad; Bou Sanayeh, Marwan; El Mounacry, Chady; El Murr, Sami; Kassem, Abdallah; Keyrouz, Fakheredine; Kraidy, Ghassan; Mendalek, Nassar;

Assistant Professors: Hassoun, George; Khabbaz, Maurice; Tawk, Youssef; Issa, Joseph

Senior Laboratory Instructors: Breidy, Georges; Siranossian, Aline; Zakhem, Walid

Laboratory Instructors: Bou Dargham, Nadine; El Beaino, Wissam; El Turkey, Nisrine

Mission of the Department
The mission of the Department of Electrical, Computer and Communication Engineering is to provide students with excellent undergraduate engineering education following a liberal arts model of education whilst promoting ethical and spiritual values. The department is dedicated to endow students with quality knowledge, technical skills, and values that prepare them to excel as engineers and leaders in their profession and to be committed to life-long learning and good citizenship at the local, regional, and international levels.

Department Profile
The Department of Electrical, Computer and Communication Engineering offers two programs leading to the degrees of Bachelor of Engineering in Electrical Engineering and Bachelor of Engineering in Computer and Communication Engineering. A graduate program leading to the degree of Master of Science (MS) in Electrical and Computer Engineering is also offered.

The Degree of Bachelor of Engineering in Computer and Communication Engineering

Mission
The mission of the Computer and Communication Engineering Program is to provide excellent undergraduate education which includes the theory and practice of balanced topics in computer and communication engineering following the liberal arts education model. Besides promoting ethical and spiritual values and serving the community, the graduates are expected to acquire quality knowledge, critical thinking, and civic responsibility in a variety of computer and communication engineering fields through a
balance of required courses and technical electives. The program seeks to prepare qualified computer and communication engineering graduates for professional practice or graduate studies at the local, regional and international levels. Graduates are able to work skillfully and effectively in multidisciplinary teams and are competent to engage in lifelong learning.

Program Educational Objectives
- Lead productive careers in a broad range of computer and communication engineering specializations at the local, regional, and international levels.
- Pursue successful graduate studies and engage in life-long learning.
- Practice the engineering profession with critical thinking, ethics, integrity, leadership, and civic responsibility so as to enhance the quality of living.
- Work skillfully and effectively in multidisciplinary teams and contribute to the well-being of the society and the environment.

Program Learning Outcomes
- An ability to apply knowledge of mathematics, science, and engineering;
- An ability to design and conduct experiments, as well as to analyze and interpret data;
- An ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability;
- An ability to function on multidisciplinary teams;
- An ability to identify, formulate, and solve engineering problems;
- An understanding of professional and ethical responsibility;
- An ability to communicate effectively;
- The broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context;
- A recognition of the need for, and an ability to engage in life-long learning;
- A knowledge of contemporary issues;
- An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

Degree Requirements
The course requirements of the degree of Bachelor of Engineering in Computer and Communication Engineering involve a total of 150 credits divided into the following pools:

Liberal Arts Curriculum 27 cr.

Core Requirements 41 cr.
CEN 201, ENG 201, ENG 202, MAT 211, MAT 213, MAT 215, MAT 224, MAT 235, MAT 326, MAT 339, CHM 211, CHM 271, PHS 212, PHS 213, PHS 271.

Major Requirements 59 cr.
CSC 212, CSC 213, EEN 323/CSC 312, CSC 414, EEN 442/CSC 425, EEN 201, EEN 202, EEN 203, EEN 220, EEN 221, EEN 310, EEN 311, EEN 312, EEN 322, EEN 324, EEN 325, EEN 330, EEN 331, EEN 340, EEN 344, EEN 443, EEN 489, EEN 598, EEN 599.

Technical Electives 20 cr.
Students should complete 20 credits of approved technical electives in EEN and CSC courses including two elective laboratories.
Year 3 Technical Electives (2 CSC courses):
CSC 311, CSC 313, CSC 316, CSC 323, CSC 385, CSC 387.

Year 4 Technical Electives (2 EEN and 2 EEN/CSC courses, at most one EEN 300 level course may be taken as part of Year 4 Electives):
CSC 412, CSC 422, CSC 423, CSC 426, CSC 431, CSC 432, CSC 463, EEN 327, EEN 350, EEN 360, EEN 416, EEN 421, EEN 426, EEN 430, EEN 431, EEN 436, EEN 473, EEN 480, EEN 534, EEN 546, EEN 548.
Technical Elective Lab. 2 courses: EEN 439, EEN 444, EEN 481.

Free Elective
This elective is chosen by the students according to their interests in broadening their knowledge. It can be any course offered by the University provided that it is of Sophomore level (200 level) or above.

The Degree of Bachelor of Engineering in Electrical Engineering

Mission
The mission of the Electrical Engineering Program is to provide excellent undergraduate education which includes the theory and practice of balanced topics in electrical engineering following the liberal arts education model. Besides promoting ethical and spiritual values and serving the community, the graduates are expected to acquire quality knowledge, critical thinking, and civic responsibility in a variety of electrical engineering fields through a balance of required courses and technical electives. The program seeks to prepare qualified electrical engineering graduates for professional practice or graduate studies at the local, regional and international levels. • A recognition of the need for, and an ability to engage in life-long learning;
• A knowledge of contemporary issues;
• An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

Degree Requirements
The course requirements of the degree of Bachelor of Engineering in Electrical Engineering involve a total of 150 credits divided into the following pools:

Liberal Arts Curriculum 27 cr.

Core Requirements 44 cr.
CEN 201, ENG 201, ENG 202, MEN 210, MAT 211, MAT 213, MAT 215, MAT 224,
MAT 235, MAT 326, MAT 339, CHM 211, CHM 271, PHS 212, PHS 213, PHS 271.

Major Requirements 53 cr.
CSC 212, CSC 213, EEN 323/CSC 312, EEN 201, EEN 202, EEN 203, EEN 220,
EEN 221, EEN 310, EEN 311, EEN 312, EEN 324, EEN 330, EEN 331, EEN 340,
EEN 350, EEN 352, EEN 360, EEN 452, EEN 489, EEN 598, EEN 599.

Technical Electives 23 cr.
Students should complete 23 credits of approved technical electives in EEN and CSC courses including two elective laboratories.

Year 3 Technical Electives (1 EEN course and 1 EEN/CSC course):
CSC 313, CSC 318, CSC 387, EEN 322, EEN 327, EEN 344. The EEN/CSC course can be substituted by EEN 377 and any two courses from the Technical Elective Labs 1 and 2.

Year 4 Technical Electives (4 EEN and 1 EEN/CSC course):
One course from the Electronics pool: EEN 416, EEN 421, EEN 426, EEN 455.
One course from the Electromagnetics pool: EEN 430, EEN 431, EEN 436, EEN 534.
Two courses from the Power and Control pool: EEN 453, EEN 455, EEN 457, EEN 461, EEN 553.

One course chosen from the above areas or from the following courses:
(Communication Pool): EEN 443, EEN 546, EEN 548.
(Signal Processing Pool): EEN 473, EEN 480.
Technical Elective Lab. 2 courses: EEN 439, EEN 444, EEN 456, EEN 462, EEN 481.

Free Elective 3 cr.
This elective is chosen by the students according to their interests in broadening their knowledge. It can be any course offered by the University provided that it is of Sophomore level (200 level) or above.
EEN 201 Circuits Analysis I (3.0); 3 cr.

EEN 202 Circuits Analysis II (3.0); 3 cr.

EEN 203 Circuits Laboratory (0.2); 1 cr.

EEN 205 Electric Circuits (3.0); 3 cr.

EEN 206 Electronics (3.0); 3 cr.

EEN 207 Instrumentation and Circuits Laboratory (0.2); 1 cr. Measuring equipment such as voltmeter, ammeter, ohmmeter, function generator, and oscilloscope. Experiments in circuits, electronics, digital circuits, electronic transducers and machines. Not open to EE and CCE students. Corequisite: EEN 206.

EEN 220 Introduction to Logic Design (3.0); 3 cr.
Binary and non-binary systems. Boolean algebra. Logic gates. Logic minimization, combinational circuits, sequential circuits, flip-flops, synthesis of synchronous sequential circuits. PLDs (ROM, PLA, PAL). Prerequisite: MAT 211.

EEN 221 Logic Design Laboratory (0.2); 1 cr.
Experiments with basic Logic gates, combinational network design, sequential network design. Designing with counters, registers, decoders, multiplexers, and adders. Prerequisite: EEN 220.

EEN 310 Electronic Circuits I (3.0); 3 cr.

EEN 311 Electronic Circuits II (3.0); 3 cr.

EEN 312 Electronic Circuits Laboratory (0.2); 1 cr. Experiments based on EEN 210 and EEN 311. Introduces the practical applications of analog circuits, including transistor and diode circuits, operational amplifiers applications, simple amplifiers, filters, and oscillators. Prerequisite: EEN 203. Corequisite: EEN 311.

EEN 322 Digital Integrated Circuits (3.0); 3 cr.
Properties and definitions of digital ICs. Basic logic circuit families: TTL,
CMOS, dynamic CMOS, BiCMOS, ECL, and GaAs; with emphasis on CMOS digital logic. Oscillators, Schmitt Trigger. **Prerequisites:** EEN 220, EEN 311.

**EEN 323 Fundamentals of Computer Hardware (3.0); 3 cr.** Basic computer system hardware architecture, implementation, organization, functionality, general feature of MIPS instruction set. Arithmetic floating point operations, performance evaluation using Amdahl’s law, pipelining, data and branch hazards, memory, IO hierarchies. Introduction of the parallel computing architecture in a cloud environment and graphic processing unit (GPU) architecture. **Prerequisite:** EEN 220.

**EEN 324 Microprocessor System Design (3.0); 3 cr.** Microprocessor internal architecture. Registers, CPU, memory organization. Instructions, execution and timing. Interfacing with peripherals. Interrupts. Designing and Interfacing with state of the art microprocessors. Assembly language programming. **Prerequisites:** EEN 310, CSC 312.

**EEN 325 Microprocessor Laboratory (0.2); 1 cr.** Experiments and design project related to the course EEN 324. **Prerequisite:** EEN 221. **Corequisite:** EEN 324.

**EEN 327 Advanced Logic Design (3.0); 3 cr.** Combinational and sequential network design. State machine SM charts, Asynchronous sequential Networks. State Assignment and Flow Tables. Hazards, PLDs and hardware description languages (HDL). **Prerequisite:** EEN 324.

**EEN 328 Advanced Digital Design Laboratory (0.2); 1 cr.** Designing combinational and sequential digital circuits with an FPGA board (Xilinx, Altera or similar) and a CAD tool (HDL). **Prerequisite:** EEN 221. **Corequisite:** EEN 327.

**EEN 350 Fundamentals of Electric Machines (3.0); 3 cr.** Magnetic materials. Fundamental operation of transformers, DC and AC machines. Design considerations of rotating machinery. **Prerequisite:** EEN 202. **Corequisite:** EEN 331.

**EEN 352 Fundamental of Electric Machines Laboratory (0.2); 1 cr.** Experiments with single phase and three-phase transformers. DC and AC machines. **Corequisite:** EEN 350.

EEN 363 Instrumentation Laboratory (0.2); 1 cr. Input and output transducers. Position, temperature, light intensity, force, speed and sound measurements and display. Introduction to PCB design techniques. Design project. Prerequisite: EEN 312.

EEN 365 Programmable Logic Control Laboratory (0.2); 1 cr. Programmable control applications. Advanced PLC control techniques using pneumatic sequencer. Control of an automation system. Prerequisite: EEN 324.

EEN 377 Technical Drawing for Electrical Engineering (0.2); 1 cr. Build and supervise electrical installations drawings. Create and modify electrical controls systems. Create intelligent panel layout drawings. Use the tagging and linking panel components. Generate a bill of material (BOM) report. Prerequisite: EEN 312.

EEN 421 Introduction to VLSI Design (3.0); 3 cr. Large-scale MOS Design. Topics: MOS transistors, static and dynamic MOS gates, MOS circuit fabrication, design rules, resistance and capacitance extraction, power and delay estimation, scaling, MOS combinational and sequential logic design, registers and clocking schemes, memory and data-path. Elements of computer-aided circuit analysis, synthesis, and layout techniques. Prerequisite: EEN 322.

EEN 426 Biomedical Engineering (3.0); 3 cr. Design consideration for clinical and health care devices. Design of biomedical devices. Involves analog, digital and microprocessor / microcontroller based designs. Design of monitoring devices. Prerequisites: EEN 311, EEN 324.

EEN 430 Antenna Design for Wireless Communications (3.0); 3 cr. Fundamentals of radiation from antennas. Wire antennas such as monopole, dipole and loop antennas. Aperture antennas such horn and reflector antennas. Wideband antennas. Antenna arrays. Application to cellular systems. Course includes design project. Prerequisite: EEN 331.

EEN 431 Microwave Circuit Design (3.0); 3 cr. Coverage of passive and active microwave devices including transformers, couplers, resonators, circulators, oscillators and amplifiers. Course includes project consisting of computer-aided design of a microwave circuit. Prerequisites: EEN 311, EEN 331.

EEN 436 Fiber Optics (3.0); 3 cr. Ray optics and wave optics. Design optimization of fibers for optical data transmission. Fiber fabrication. Signal degradation in optical fibers. Fiber connections and diagnostics. Prerequisite: EEN 331.

EEN 439 Electromagnetics Laboratory (0.2); 1 cr. Properties of magnetic materials. Electromagnetic devices. Transmission lines. Impedance matching. Antennas and microwave circuits. Includes design project and computer simulations. Prerequisite: EEN 331.

EEN 442 Computer Networks (3.0); 3 cr. Introduction to data networks, wired

**EEN 445 Computer Network Laboratory (0.2); 1 cr.** Design, troubleshooting, modeling, and evaluation of computer networks, network addressing, IP routing, route discovery, TCP and UDP, socket programming, IP fragmentation, and Network simulation. Corequisite: EEN 442 or CSC 425.

**EEN 453 Electric Drives (3.0); 3 cr.** Introduction to elements of drive systems, characterization of mechanical loads, requirements of electric drive systems, dc drives with various power electronics based conversion sources, dynamic equations and closed loop control of dc drives, induction motor drives, ac controller, slip-energy recovery, volts/Hz control, synchronous motor drives, permanent magnet motors, reluctance motors. Prerequisites: EEN 210, EEN 350.

**EEN 455 Power Electronics (3.0); 3 cr.** Switching power supplies. AC power controllers. Controlled rectifiers. DC choppers and DC-AC converters. Bridge structure inverters. Prerequisites: EEN 210, EEN 350.

**EEN 456 Power Electronics Laboratory (0.2); 1 cr.** Experiments based on EEN 455. Corequisite: EEN 455.

**EEN 457 Industrial Electrification (3.0); 3 cr.** Lighting design for residential and industrial facilities. Emphasis on latest lighting technologies. Cable types and sizing. Motor control centers. Includes design project. Prerequisite: EEN 350.

**EEN 461 Digital Control (3.0); 3 cr.** Sampling and data reconstruction in computer control systems. Z-transforms and state equations to describe discrete and mixed data systems. Analysis of digital feedback systems using frequency domain techniques and state space techniques. Non-linear digital feedback systems. Prerequisite: EEN 360.

**EEN 462 Control Systems Laboratory (0.2); 1 cr.** Laboratory based on EEN 360. Analog and digital control systems, PID control, PLC systems. Prerequisite: EEN 360.

**EEN 473 Special Topics in Electrical Engineering (3.0); 3 cr.** Material includes coverage of recent developments in Electrical Engineering that are needed to update students on the latest technologies. Department determines topics to be covered and prerequisites when offered. Open to EE and CCE students.

EEN 481 Signal Processing Laboratory (0.2); 1 cr. Digital filtering techniques. Architectural feature of single-chip DSP processors. Design project. Prerequisite: EEN 480.

EEN 489 Approved Professional Training (0.0); 1 cr. Department approved practice in industry in one of the areas of Electrical, Computer and Communication Engineering. A report is required. Prerequisite: Department approval.

EEN 546 Algebraic Coding and Information Theory (3.0); 3 cr. Information theory and its relation to statistics. Kolomogrov complexity, entropy and inference. Shannon theory of communication. Source coding for noisy channels. Capacity theorems for multiple user channels. Prerequisite: EEN 443.

EEN 548 Wireless Communications (3.0); 3 cr. Introduction to wireless systems and cellular principles, modulation techniques for mobile radio, speech and channel coding, multiple access techniques, applications to wireless systems. Prerequisites: EEN 331, EEN 443.

EEN 598 Engineering Design I (1.0); 1 cr. The objective of this course is to develop a project proposal that includes the following items: Choice of project topic, literature survey, market analysis, feasibility study, project timeline, list of materials and cost, engineering ethics issues, social and environmental impact, etc. Prerequisite: ENL 230 or ENL 223 Department approval.

EEN 599 Engineering Design II (2.0); 2 cr. Implementation of the engineering design project that was proposed in EEN 598. Includes report, final presentation. Prerequisite: EEN 598.
The Degree of Master of Science in Electrical and Computer Engineering

Program Objectives
The Master of Science Programs in Electrical and Computer Engineering is designed to prepare a select group of students for successful professional careers in the industry with specialized technical expertise as well as for further graduate studies in doctoral degree programs. Its educational objectives are the following:

- Provides a scientific approach to increase student’s understanding and problem solving abilities with a special emphasis on performing independent theoretical and applied research;
- Provides an adequate level of specialization in the following major areas: Integrated Circuits and Computer Systems, Electromagnetics and RF Systems, Communications and Signal Processing, Power and Control Systems and Renewable Energy;
- Provides graduates with the required background to synthesize technical issues in the solution of electrical and computer engineering problems.

Admission Requirements
Admission to the MS in Electrical and Computer Engineering program is subject to the graduate admission requirements of the university as stated in the catalog under “Graduate Admission”. In addition, the following requirements are to be met:

- Bachelor of Engineering degree in Electrical/Computer engineering or its equivalent from a recognized university (holders of BS degrees in engineering will have to take a set of remedial courses to be specified on a case by case basis in order to meet the total number of credits required);
- Cumulative GPA of 3.0 minimum (or its equivalent from a recognized faculty of engineering);
- GRE Scores;
- Approval of the Faculty Graduate Committee.

Furthermore, applicants should be able to demonstrate proficiency in the English language. All English requirements, as stated in the catalog under “Graduate Admission”, are to be fulfilled.

Graduation Requirements
The program leads to the degree of Master of Science in Electrical and Computer Engineering awarded once the following requirements are fulfilled:

- The candidate must complete a total of 30 credits with a minimum cumulative GPA of 3.0/4.0. All courses are to be passed with a minimum of B grade as per rules and regulations concerning graduate studies at NDU. Failed courses may be repeated once provided that the grade on the failed course is equal to D or higher. Failing a course with an F grade means an automatic exclusion from the program;
- Holders of a bachelor of engineering in electrical/computer engineering (5-year program leading to the degree of BE) from a recognized university may apply to transfer a maximum of twelve credits from their undergraduate upper level courses equivalent to 500-level electrical engineering courses at NDU. Only courses with a B grade can be considered for transfer;
- The candidate must attend a series of 0-carrying credit seminars as recommended by the Graduate Committee of the Faculty. The course grading is based on attendance and is pass or fail;
• The residency requirements and maximum load per semester are as per rules and regulations for graduate programs at Notre Dame University-Louaize.

Course Requirements:

Mandatory Course (3 cr.):
One graduate course related to advanced mathematics, approved by the Graduate Committee, is required to start the master program.

Thesis and Seminar Courses (6 cr.):
EEN 780, EEN 790.

Electives (21 cr.):

Area 1: Integrated Circuits and Computer Systems
EEN 611, EEN 612, EEN 613, EEN 620, EEN 621, EEN 622, EEN 623, EEN 624, EEN 627, EEN 722, EEN 729.

Area 2: Electromagnetics and RF Systems
EEN 630, EEN 631, EEN 632, EEN 634, EEN 635, EEN 636, EEN 637, EEN 638.

Area 3: Communications and Signal Processing
EEN 645, EEN 646, EEN 647, EEN 648, EEN 680, EEN 685, EEN 743, EEN 783.

Area 4: Power and Control Systems
EEN 650, EEN 651, EEN 652, EEN 653, EEN 654, EEN 655, EEN 656, EEN 657, EEN 658, EEN 661, EEN 662, EEN 663, EEN 664, EEN 665, EEN 666, EEN 667, EEN 668.

Area 5: Renewable Energy
EEN 652, EEN 654, EEN 661, EEN 665, EEN 752.
EEN 611 Integrated Circuit Fabrication Processes (3.0); 3 cr. Fundamental principles of integrated circuit fabrication processes; physical and chemical models for crystal growth, oxidation; ion implantation, etching, deposition, lithography, and back-end processing.

EEN 620 Advanced Microprocessor System Design (3.0); 3 cr. Architectures of 32/64-bit RISC processors. Performance and architectural limitations of RISC and CISC microprocessors (Intel, Motorola, ARM...). Address/instruction pipelines, burst cycles, memory caching and cache coherency issues, register renaming, and microprocessor coherency interfaces.

EEN 621 VLSI Design (3.0); 3 cr. Static and dynamic CMOS gates, CMOS circuit fabrication, design rules, resistance and capacitance extraction, power and delay estimation, scaling, MOS combinational and sequential logic design, registers and clocking schemes, memory and data-path; elements of computer-aided circuit analysis, synthesis, and layout techniques.

EEN 623 Advanced Computer Architecture (3.0); 3 cr. Performance evaluation; Instruction set design; including data speculation, performance synchronization methods, advanced instruction level parallelism, pipelining, branch prediction; memory hierarchy, cache memory, virtual memory, and virtual memory; I/O interface devices, specification, and modeling pipelining, caches, virtual memory, and multiprocessors.

EEN 624 Embedded Systems Design (3.0); 3 cr. Embedded hardware and software design; Design specification, hardware/software co-design, co-verification, testing; embedded computing platforms, systems-on-a-chip, intellectual property (IP) core design, embedded networks; software design tools and technologies using CAD tools, compilers, and assemblers; hardware design tools, hardware-description languages, high-level synthesis tools, ASIC and FPGA design flows; and real-time operating systems.

EEN 627 Optoelectronic Devices (3.0); 3 cr. Principles of light-emitting diodes (LEDs), lasers, and photodetectors; population inversion at a junction; generation of coherent radiation; heterojunctions, quantum-well LEDs and lasers, and vertical cavity surface-emitting lasers (VCSELs); PIN and avalanche photodiodes; photonic fabrication and packaging.

EEN 630 Antenna Design for Wireless Communications (3.0); 3 cr. Fundamentals of radiation from antennas;
wire antennas such as monopole, dipole and loop antennas; aperture antennas such as horn and reflector antennas; wideband antennas; antenna arrays; application to cellular systems.

**EEN 631 Microwave Circuit Design (3.0); 3 cr.** Passive and active microwave devices including transformers, couplers, resonators, circulators, oscillators and amplifiers; computer-aided design of microwave circuits.

**EEN 632 Numerical Methods for Wireless Propagation (3.0); 3 cr.** Basic coverage of the main numerical techniques in electromagnetics: Finite Difference Time Domain (FDTD) and Finite Element (FE) methods; simulation of radiation and propagation of waves in a wireless communication environment.

**EEN 634 Radar Systems and Remote Sensing (3.0); 3 cr.** Operation of a radar system including antennas, circuitry and wave propagation; remote sensing and mapping of the earth; ground penetrating radar, intelligent vehicle highway system; aircraft navigation.

**EEN 635 Electromagnetic Compatibility (3.0); 3 cr.** Fundamentals of Electromagnetic Compatibility (EMC): regulations, grounding, shielding and cross talk; modeling and reduction techniques of noise and interference phenomena in electrical circuits; effect of radiation on the human body; design of electronic devices to minimize undesired radiation and susceptibility to electromagnetic emissions.

**EEN 636 Electromagnetic Field Theory (3.0); 3 cr.** Separable guided wave and scattering boundary value problems; one-dimensional Green’s functions with applications; multi-conductor transmission lines. Multi-dimensional potential Green’s functions. Integral equation formulation. Use of asymptotic methods to obtain high-frequency solutions; geometrical optics and the propagation through inhomogeneous media; geometrical theory of diffraction and its application to antenna and scattering problems.

**EEN 637 Antenna Theory and Design (3.0); 3 cr.** Aperture antennas; ground plane effects; horn and reflector antennas; pattern synthesis; Smart antennas; antenna measurements in anechoic chamber.

**EEN 645 Optical Communication (3.0); 3 cr.** Fundamentals of fiber optic communication systems; principles of light propagation in slab and cylindrical waveguides; signal multiplexing techniques used in optical transmission; signal degradation in optical fibers; noise and detection; optical sources, detectors, and amplifiers; optical link design.

**EEN 646 Algebraic Coding and Information Theory (3.0); 3 cr.** Information theory and its relation to statistics; Kolomogrov complexity, entropy and inference; Shannon theory of communication; source coding for noisy channels; capacity theorems for multiple user channels.

**EEN 647 Statistical Communication Theory (3.0); 3 cr.** Concepts of probability and random process theory necessary for advanced study of communications; stochastic control; detection and estimation problems.

**EEN 648 Wireless Communications (3.0); 3 cr.** Wireless systems and cellular principles, modulation techniques for mobile radio, speech and channel coding, multiple access techniques; applications to wireless systems.

**EEN 650 Power System Stability and Control (3.0); 3 cr.** Static and dynamic power system stability problems; transient stability; small-signal stability, eigenvalue analysis, power
system stabilizer, wide area measurements; relaying and system protection; computational techniques for power system stability and control system operation.

**EEN 651 Power System Security** (3.0); 3 cr. Power system modeling and analysis, conditions for secure operation; mathematical programming techniques for system operation, state estimation, unit commitment, optimal power flow, economic load dispatch, security dispatch; heuristic methods.

**EEN 652 Sustainable Power Generation** (3.0); 3 cr. Solar, wind, hydro, tidal, bio-mass, geo-thermal, and wave power generation; storage technologies and energy conversion, characteristics and limitations; distributed generation, technical challenges and opportunities, connection in distribution grids; environmental aspects of electricity generation.

**EEN 654 Electric Drives** (3.0); 3 cr. Elements of drive systems, characterization of mechanical loads, requirements of electric drive systems, dc drives with various power electronics based conversion sources, dynamic equations and closed loop control of dc drives, induction motor drives, ac controller, slip-energy recovery, volts/Hz control, synchronous motor drives, permanent magnet motors, reluctance motors.

**EEN 655 Energy Markets** (3.0); 3 cr. Operation of electricity markets, economic procedures, and emissions trading; restructuring and deregulation in generation, transmission and distribution; pool, bilateral, and imbalance market mechanisms; transmission congestion and demand side management; models for analyzing the impact of risk and uncertainty, risk management techniques.

**EEN 656 Power System Planning and Reliability** (3.0); 3 cr. Planning and reliability of power systems, load forecasting, load duration curves, loss of load expectation; Generation, transmission and distribution system reliability; factors affecting power system planning and expansion; system adequacy, security, and ancillary services; reliability in electricity markets.

**EEN 657 Selected Topics in Power and Control** (3.0); 3 cr. Current issues in areas relevant to state of arts in renewable energy and related fields. Department determines topics to be covered and prerequisites when it is offered.

**EEN 658 Flexible AC Transmission Systems** (3.0); 3 cr. Operating principles of controllers of flexible AC transmission systems (FACTS); active and passive harmonics compensation methods; integration of modern power electronics in shunt and series advanced static VAR controllers, phase shifters, and unified power flow controllers (UPFC).

**EEN 660 Linear System Theory and Control** (3.0); 3 cr. State-space models for analysis and design of linear control systems; canonical realization of transfer functions; state observability and controllability; pole placement; state feedback and asymptotic observers; reduced order observer; direct transfer function design.

**EEN 661 Digital Control** (3.0); 3 cr. Sampling and data reconstruction in computer control systems; Z-transforms and state equations to describe discrete and mixed data systems; analysis of digital feedback systems using frequency domain techniques and state space techniques; non-linear digital feedback systems.
EEN 662 Advanced Feedback Control Systems (3.0); 3 cr. Principles of analyzing and designing linear feedback control systems; system representations; controller design methods and criteria; robust design; LQG; servo compensators; H-infinity design techniques.

EEN 663 Introduction to Estimation Theory (3.0); 3 cr. Linear dynamic systems with random inputs; least squares estimation, mean-squared estimation, Kalman filtering and applications.

EEN 664 Optimal Control Theory (3.0); 3 cr. Optimal control by dynamic programming; Pontryagin’s maximum principle and variational methods; minimum time, energy, and fuel problems for linear continuous and discrete systems.

EEN 665 Nonlinear Control Systems (3.0); 3 cr. Dynamic formulation of nonlinear systems; Lyapunov stability; phase plane techniques; describing functions; input-output and input-to-state analysis and control; discontinuous and sliding mode control; model reference adaptive control.

EEN 666 Optimization (3.0); 3 cr. Finite dimensional optimization theory and basic optimization algorithms; unconstrained optimization; Newton methods; steepest descent; conjugate gradient; constrained optimization; active set methods; penalty methods; quadratic programming; global optimization; integer programming.

EEN 667 Neural Networks and Fuzzy Logic in Control (3.0); 3 cr. Fundamental methods and techniques of artificial neural networks and fuzzy logic; architecture, circuit implementations, and system identification.

EEN 668 Automation and Robotics (3.0); 3 cr. Fundamental principles of automation and robotics; robotic manipulator kinematics; dynamics and control; components of a robot system; types of robotic manipulators; electronic system components; analog-to-digital conversion, and applications.

EEN 680 Discrete-Time Signal Processing (3.0); 3 cr. Fundamental concepts of discrete-time signals and systems; digital signal processing of discrete signals; sampling theory and reconstruction; discrete Fourier transforms and analysis of digital filters in the frequency domain; Z-transforms, causality and stability; state-space equations; design and analysis of FIR and IIR digital filters; windowing; bilinear transformation; filter structures.

EEN 685 Biomedical Signal Processing (3.0); 3 cr. Analysis of biological signals; random signals; windowing with Fourier transform; z-transform, and wavelet transform; signal processing techniques applied to vital signs signals such as ECG, EEG, and EMG; high resolution CG and signal averaging.

EEN 722 Advanced VLSI Design (3.0); 3 cr. Advanced topics in VLSI design. Layout synthesis and optimization, design-rule checking, and design circuit for testability. VLSI Algorithms, VLSI for communications and signal processing. Interconnect, packaging, sources of noise. VLSI technologies (silicon and GaAs).

EEN 729 Selected Topics in Integrated Circuits (3.0); 3 cr. A course on current issues in areas relevant to state-of-the-art integrated-circuit technologies. Department determines topics to be covered and prerequisite when offered.

EEN 743 Advanced Wireless Communications (3.0); 3 cr. Detection in fading channels, diversity, interference management, capacity of wireless channels, opportunistic communication, spatial multiplexing, space-time coding, overview of wireless systems (IEEE 802.11n, IEEE 802.16e / WIMAX, 3GPP Long Term Evolution).
EEN 752 Power Electronics for Renewable Energy Systems (3.0); 3 cr. Converter structures for photovoltaic and wind energy systems connected to the grid, issues related to the control of the converters, power quality, reactive power compensation, active power filters, and the use of simulation tools for design and analysis.

EEN 780 Seminar 0 cr. A series of seminars covering state-of-the-art topics in electrical engineering. Prerequisite: advisor approval.

EEN 783 Advanced Digital Signal Processing (3.0); 3 cr. Advanced techniques in signal processing; multirate signal processing, upsampling and downsampling in the Z-domain; non-stationary signals; frequency-domain adaptive filtering; the correlation matrix; least-squares adaptive algorithms; linear prediction; the wavelet transform.

EEN 790 Master Thesis 6 cr.
DEPARTMENT OF MECHANICAL ENGINEERING

Professors: Asmar, Ghazi; El Hayek, Michel

Associate Professors: Bou Mosleh, Charbel; Francis, Francis; Metni, Najib

Assistant Professors: Ghnatinos, Chady; Habchi, Charbel; Hage, Ilige

Senior Laboratory: Daou, Wissam

Laboratory Instructor: Melki, Sylvie

The Degree of Bachelor of Engineering in Mechanical Engineering

Mission
The Mechanical Engineering Program strives to graduate mechanical engineers who understand the ethical, social, economic, and environmental context of their profession and who apply their knowledge with judgment and responsibility to develop ways to utilize the materials and forces of nature for the benefit of mankind. The program prepares students to either immediately enter professional practice upon graduation or to pursue graduate studies, without neglecting the requirements for a fruitful life by emphasizing the University’s model of liberal arts education. The curriculum of the program shares three basic tenants: scientific and technological excellence, balance between theory and practice, and a commitment to self-maintained, and enduring personal and professional development. The results are mechanical engineers naturally inclined to life-long learning and problem solvers ready to deal with any technological challenge at local, regional, and/or international scales.

Program Educational Objectives
• Practice professionally in local, regional and international work environments by appropriately applying mechanical engineering fundamentals and by using state-of-the-art tools within the broad range of the mechanical engineering profession;
• Advance within their careers as team members or leaders with the ability to think critically and communicate effectively in order to solve multidisciplinary problems taking into account realistic constraints;
• Engage in ongoing professional development and quality research activities by either continually learning and improving or pursuing graduate studies.

Program Learning Outcomes
• An ability to apply knowledge of mathematics, science, and engineering;
• An ability to design and conduct experiments, as well as to analyze and interpret data;
• An ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability;
• An ability to function on multidisciplinary teams;
• An ability to identify, formulate, and solve engineering problems;
• An understanding of professional and ethical responsibility;
• An ability to communicate effectively;
• The broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context;
• A recognition of the need for, and an ability to engage in life-long learning;
• A knowledge of contemporary issues;
• An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

Degree Requirements
The Department of Mechanical Engineering offers one undergraduate program leading to the degree of Bachelor of Engineering in Mechanical Engineering. The course requirements of the degree involve a total of 150 credits divided into the following pools:

**Liberal Arts Curriculum**  
27 cr.

**Core Requirements**  
42 cr.
CHM 211, CHM 271, PHS 203, PHS 212, PHS 273, EEN 205, EEN 206, EEN 207, ENG 201, ENG 202, CSC 212, MAT 215, MAT 235, MAT 326, MAT 335, MAT 339.

**Major Requirements**  
64 cr.
CEN 202, CEN 204, CEN 270, MAT 213, MAT 224, MEN 200, MEN 201, MEN 202, MEN 210, MEN 211, MEN 270, MEN 302, MEN 310, MEN 320, MEN 321, MEN 330, MEN 340, MEN 370, MEN 376, MEN 401, MEN 430, MEN 435, MEN 437, MEN 471, MEN 489, MEN 598, MEN 599.

**Major Electives**  
12 cr.
Choose any four courses from the following pool: MEN 400, MEN 410, MEN 439, MEN 503, MEN 507, MEN 510, MEN 511, MEN 512, MEN 515, MEN 516, MEN 517, MEN 518, MEN 520, MEN 521, MEN 523, MEN 525, MEN 526, MEN 530, MEN 534, MEN 540, MEN 541, MEN 544, MEN 550, MEN 580, MEN 581.

**Laboratory Electives**  
2 cr.
Choose any two courses from the following pool: MEN 571, MEN 573, MEN 576, MEN 578.

**Free Electives**  
3 cr.
Choose any course of sophomore level or higher offered by the University.
Undergraduate Courses: Mechanical Engineering

MEN 201 Engineering Mechanics: Dynamics (3.0); 3 cr. Description of force, position, velocity and acceleration in fixed and moving reference frames. Kinematics and kinetics of particles, of collections of particles and of rigid bodies. Energy and momentum concepts. Prerequisite: MAT 235.

MEN 210 Thermodynamics I (3.0); 3 cr. Fundamentals of engineering thermodynamics: properties and behavior of pure substances, concepts of work and heat, systems and control volume analyses, first law, second law, entropy and entropy production, introduction to availability, Carnot cycle. Prerequisite: PHS 203 or CEN 201.

MEN 211 Thermodynamics II (3.0); 3 cr. Thermodynamic cycles: steam and gas power systems, refrigeration and heat pump systems. Compressible substances: thermodynamic properties, general thermodynamic relations, virial equations of state. Introduction to psychrometrics. Introduction to combustion and equilibrium calculation. Prerequisite: MEN 210.

MEN 215 Introduction to Thermal-Fluid Sciences (3.0); 3 cr. Fundamentals of thermal sciences including thermodynamics, fluid flow and heat transfer for non-ME students: properties of pure substances, energy & power, first law of thermodynamics, systems/ control volumes, fluid statics, Bernoulli equation, momentum equation, introduction to conduction, convection and radiation heat transfer. Prerequisite: MAT 235.

MEN 216 Introduction to Thermal-Fluid Sciences (3.0); 3 cr. Fundamentals of thermal sciences including thermodynamics, fluid flow and heat transfer for non-ME students: properties of pure substances, energy & power, first law of thermodynamics, systems/ control volumes, fluid statics, Bernoulli equation, momentum equation, introduction to conduction, convection and radiation heat transfer. Prerequisite: MAT 235.

MEN 270 Computer-Aided Design (0.2); 1 cr. Application of existing CAD software to engineering problems: basic concepts of engineering graphics in a computerized environment; Representation of engineering objects; 2D/3D representations, CAD Standards. Prerequisite: CEN 202.

MEN 321 Fluid Mechanics II (3.0); 3 cr. Incompressible and compressible flows: laminar/turbulent flows, pipe flow, boundary layers, lift and drag, introduction to turbulence, elementary gas dynamics. Unsteady flow phenomena. Introduction to centrifugal and axial flow machinery: pumps, fans, hydraulic turbines, and torque converters. Prerequisite: MEN 320.

MEN 340 Manufacturing Processes (3.0); 3 cr. Fundamentals and technologies used in processing various industrial materials: casting, forging, machining, metal-sheet processing, joining techniques, etc. Prerequisites: MEN 200, MEN 370.

MEN 370 Graphics for Mechanical Engineers (0.2); 1 cr. Application of the basic concepts of engineering graphics to the representation of mechanical components: shafts, bearings, fasteners, keys, springs, gears, cams, etc.; Assembly drawings; Dimensioning and tolerancing; Standards. CAD tools are to be used throughout the course for representation purposes. Prerequisite: MEN 270.

MEN 376 Thermo/Fluid Laboratory (0.2); 1 cr. Experiments related to fundamentals of fluid and thermal sciences. Topics include fluid properties, flow regimes, flow measurement, energy and power, heat transfer modes, pressure and temperature measurement, data acquisition. Prerequisite: MEN 210. Corequisite: MEN 320.

MEN 380 Practical Training in Mechanical Engineering (0.0); 3 cr. Two-month-training in a mechanical engineering environment in which the student is exposed to different aspects of mechanical engineering practice and equipment: design, construction, testing, maintenance, etc. Prerequisite: Senior standing.

MEN 400 Mechanics of Composite Materials (3.0); 3 cr. Introduction to composite materials. Lamina and laminate mechanical properties. Micromechanics. Mechanical and hygrothermal behavior of laminae and laminates. Lamina and laminate strength theories. Prerequisite: MEN 302.

MEN 401 Introduction to Mechatronics (3.0); 3 cr. Interfacing of mechanical and electrical systems; Analysis of smart systems: sensors and transducers, electronics and logics, microprocessors and programmable logic controllers, data acquisition, and actuators; Integration of these components to create a complete functional mechatronics system. Prerequisites: ENG 202, EEN 206.

MEN 410 Internal Combustion Engines (3.0); 3 cr. Analysis of internal combustion engines: dynamics, thermodynamics, combustion, friction and wear, and other factors affecting power, efficiency and emissions. Design and operating characteristics of different types of engines. Prerequisite: MEN 310.

MEN 430 Theory of Machines (3.0); 3 cr. Kinematics of machinery: linkages, cams, gears, bearings, belts, etc. Static and dynamic balancing and force analysis of machines. Prerequisites: MEN 201, MEN 370.

MEN 435 Automated Controls (3.0); 3 cr. Feedback analysis and control of linear systems, with emphasis on linear system dynamics, time and frequency response, stability analysis, classical control theory, and controller design for Mechanical Engineering applications. Prerequisites: MEN 201, MAT 235.

MEN 437 Mechanical Engineering Design (3.0); 3 cr. Design of machine elements. System reliability. Interchangeability of
mechanical devices. Stress-strain relationship in mechanical elements configuration. Prerequisite: MEN 302.

MEN 439 Engineering Instrumentations (3.0); 3 cr. Fundamentals of experimental methods, data acquisition and treatment, error analysis. Design and selection of measurement tools used in mechanical engineering. Prerequisite: MEN 401.

MEN 471 Manufacturing Technology Laboratory (0.2); 1 cr. Experiments related to fundamentals of manufacturing processes. Topics include properties of materials, metrology, foundry processes, cold and hot working of metals, machining processes and machines tools, welding and joining processes, heat treating techniques. Prerequisite: MEN 401.

MEN 489 Approved Professional Training (0.0); 1 cr. Two-month-training in a mechanical engineering environment in which the student is exposed to different aspects of mechanical engineering practice and equipment: design, construction, testing, maintenance, etc. Prerequisite: Department Approval.

MEN 503 Theory of Plates and Shells (3.0); 3 cr. Rectangular and circular plates. Variational methods in the analysis of plates and shells. Plates of unusual shape. Shear deformation effects. Large deformation analysis. Analysis of cylindrical shells. Prerequisite: MEN 302.

MEN 507 Fracture Mechanics (3.0); 3 cr. Mechanics of flawed structure. Concepts include Griffith theory, Irwin analysis, energy analysis of cracked bodies, fracture toughness testing, plane strain, plane stress, transition temperature concepts, subcritical flaw growth. Prerequisite: MEN 302.

MEN 510 Energy Conversion (3.0); 3 cr. Fundamentals of energy conversion: thermal powerplants, nuclear and fossil fuels, etc.; Energy resources; Energy conservation and recovery; Energy Storage; Pollution and environmental issues. Prerequisite: MEN 310.

MEN 511 Heat Exchangers (3.0); 3 cr. Fundamentals of heat exchangers design: Types and selection of heat exchangers, Thermal design of heat exchangers; Mechanical design of heat exchangers. Prerequisites: MEN 302, MEN 310.

MEN 512 Industrial Refrigeration (3.0); 3 cr. Fundamentals of refrigeration systems; Refrigeration cycles; Design and selection of components; Cold storage facilities. Prerequisite: MEN 310.

MEN 515 Heating, Ventilating and Air-Conditioning (3.0); 3 cr. Design and analysis of HVAC systems and components, comfort, cooling and heating load calculations, piping and duct design, domestic hot and cold water system. Introduction to refrigeration. Prerequisite: MEN 310.

MEN 516 Piping Networks (3.0); 3 cr. Design of piping networks with emphasis on water distribution systems in buildings: plumbing systems, fire-fighting systems, hot and cold water distribution; Codes and standards. Prerequisite: MEN 321.

MEN 517 Solar Energy (3.0); 3 cr. Fundamentals of solar radiation, design and analysis of solar systems for both low and high temperature applications, passive and active solar thermal engineering, design of solar collectors, energy storage systems. Prerequisite: MEN 310.

MEN 518 Renewable Energy Systems (3.0); 3 cr. Renewable energy resources and systems: Solar energy, wind energy, geothermal energy, biomass, etc. Applications in buildings and power generation. Prerequisite: MEN 310.

MEN 520 Fluid Power Control (3.0); 3 cr. Fundamentals of fluid power technology: hydraulic fluids and system components like pumps, valves, motors,
and cylinders; pneumatic systems, fluidic components. Design, analysis and control of fluid power circuits. **Prerequisite:** MEN 321.

**MEN 521 Viscous Flow and Boundary Layers (3.0); 3 cr.** Fundamentals of real flow phenomena: concepts of stress and strain and derivation of Navier-Stokes equations. Application to boundary layers, creeping flows and lubrication. Flow instabilities and turbulence. **Prerequisite:** MEN 321.

**MEN 523 Applied Aerodynamics (3.0); 3 cr.** Fundamental concepts of aerodynamics and their application to the design of airplanes, automobiles and racing cars. Steady/unsteady, incompressible/compressible, inviscid/viscous fluid flows over airplane wings, airplanes and automotive bodies. **Prerequisite:** MEN 321.

**MEN 525 Combustion and Flame (3.0); 3 cr.** Introduction to combustion processes; combustion thermodynamics and reaction kinetics; combustion phenomena: ignition, quenching, detonation and deflagration; flame instabilities; diffusion and premixed flames; introduction to turbulent combustion. **Prerequisite:** MEN 310.

**MEN 526 Fundamentals of Gas Turbines (3.0); 3 cr.** Types of gas turbines; Design and selection of components: Compressors, Combustion Chambers, Turbines, Diffusers/Nozzles; Systems for stationary, automotive and aircraft applications. **Prerequisite:** MEN 310.

**MEN 530 Advanced Vibration Analysis (3.0); 3 cr.** Advanced topics in vibration theory and its application to Mechanical Systems. Topics include vibration analysis of multi-degree of freedom, distributed and nonlinear systems, random vibration analysis, and vibration control. **Prerequisite:** MEN 330.

**MEN 534 Joining Processes: Welding, Soldering and Brazing (3.0); 3 cr.** Analysis of various joining processes: mechanisms of surface bonding; welding metallurgy; effect of heat input on resulting microstructures; residual stresses and distortion; welding processes: MIG, TIG, Laser, electron beam, spot welding, resistance welding. **Prerequisite:** MEN 340.

**MEN 540 Robots and Manipulators (3.0); 3 cr.** Concepts underlying the design and application of computer-controlled manipulators: Manipulator geometry, work volume, sensors, feedback control of manipulator linkages, kinematics, trajectory planning, programming, robot system architecture, applications in mechanical engineering. **Prerequisites:** MEN 430, MEN 435.

**MEN 541 Automotive Mechatronics (3.0); 3 cr.** Fundamentals of automotive mechatronics; Overview of sensors and actuators used in motor vehicles; Communication protocols and control systems. **Prerequisite:** MEN 401.

**MEN 544 Computer-Aided Manufacturing (3.0); 3 cr.** Fundamentals of industrial automation; numerical control (NC) systems; part programming; robotics in manufacturing; materials handling and automated storage systems; group technology; automated identification and inspection systems; flexible manufacturing systems. **Prerequisites:** MEN 340, MEN 370.

**MEN 550 Computational Methods in Thermal and Fluid Mechanics (3.0); 3 cr.** Physical and mathematical foundations of computational fluid mechanics and heat transfer with emphasis on applications: governing equations and mathematical approximations; partial differential and integral equations, discretization and solution methods, stability and convergence. Introduction to physical modeling of turbulence, combustion, and radiation. **Prerequisites:** MEN 310, MAT 335, CSC 212.
linkages, springs, gears and gear trains, bearings, etc... - assembly processes, geometric dimensioning and tolerancing, mechanical vibrations, balancing of machineries. Prerequisites: MEN 330, MEN 430, MEN 471.

MEN 573 Mechatronics and Control Laboratory (0.2); 1 cr. Applications of control theory to mechanical systems and evaluation of their performance. Topics include feedback systems, PLC control systems, mechatronics systems, etc. Prerequisites: MEN 401, MEN 435, EEN 207.

MEN 576 Applied Fluid Mechanics Laboratory (0.2); 1 cr. Applications of thermo-fluid theories to the design and evaluation of turbomachinery. Topics include pumps and pumping stations, hydraulic turbines, fans and compressors, drag and lift experiments using wind tunnels. Prerequisites: MEN 321, MEN 376.

MEN 578 Applied Energy Laboratory (0.2); 1 cr. Experiments dealing with energy related technology. Topics include heating, ventilating, air-conditioning, refrigeration, combustion techniques, energy conversion, renewable energy - solar, wind, etc... Prerequisites: MEN 310, MEN 376.

MEN 580 Finite Elements Methods (3.0); 3 cr. The concepts and fundamentals of the finite element method with applications to problems in solid mechanics, fluid mechanics, and heat transfer. Prerequisites: MEN 302, MEN 310.

MEN 581 Special Topics in Mechanical Engineering (3.0); 3 cr. Material includes coverage of recent developments in mechanical engineering that are needed to update students on the latest technologies. Department determines topics to be covered and prerequisites when offered.

MEN 598 Engineering Design I (1.0); 1 cr. Development of a project proposal that includes the following items: Choice of project topic, literature survey, market analysis, feasibility study, project timeline, list of materials and cost, engineering ethics issues, social and environmental impact, etc. Prerequisites: ENL 230 or ENL 223, Department approval.

MEN 599 Engineering Design II (2.0); 2 cr. Implementation of the engineering design project that was proposed in MEN 598. Includes report, final presentation. Prerequisite: MEN 598.
The Degree of Master of Science in Mechanical Engineering

Program Objectives
• To provide mechanical engineers with the opportunity to further develop their knowledge and skills in mechanical engineering so that they can adapt very quickly to technological changes in the workplace;
• To produce graduates with the ability to practice their profession with advanced skills or to continue for upper doctoral studies;
• To prepare graduates for personal and professional success, both as individuals and in team environments.

Admission Requirements
Admission to the MS in Mechanical Engineering program is subject to the graduate admission requirements of the university as stated in the catalog under “Graduate Admission”. In addition, the following requirements are to be met:
• Bachelor of Engineering degree in mechanical engineering or its equivalent from a recognized university (holders of BS degrees in mechanical engineering will have to take a set of remedial courses to be specified on a case by case basis in order to meet the total number of credits required);
• Cumulative GPA of 3.0 minimum (or its equivalent from a recognized faculty of engineering);
• GRE Scores;
• Approval of the Faculty Graduate Committee.

Furthermore, applicants should be able to demonstrate proficiency in the English language. All English requirements, as stated in the catalog under “Graduate Admission”, are to be fulfilled.

Graduation Requirements
The program leads to the degree of Master of Science in Mechanical Engineering awarded once the following requirements are fulfilled:
• The candidate must complete a total of 30 credits with a minimum cumulative GPA of 3.0/4.0. All courses are to be passed with a minimum of B grade as per rules and regulations concerning graduate studies at NDU. Failed courses may be repeated once provided that the grade on the failed course is equal to D or higher. Failing a course with an F grade means an automatic exclusion from the program;
• Holders of a bachelor of engineering in mechanical engineering (5-year program leading to the degree of BE) from a recognized university may apply to transfer a maximum of twelve credits from their undergraduate upper level courses equivalent to 500-level mechanical engineering courses at NDU. Only courses with a B grade can be considered for transfer;
• The candidate must attend a series of 0-carrying credit seminars as recommended by the Graduate Committee of the Faculty. The course grading is based on attendance and is pass or fail;
• The residency requirements and maximum load per semester are as per rules and regulations for graduate programs at Notre Dame University-Louaize.
Course Requirements

Mandatory Courses (6 cr.):
MEN 600 or equivalent (as approved by the Graduate Committee), MEN 700.

Thesis and Seminar Courses (6 cr.):
MEN 680, MEN 790.

Elective Courses (18 cr.):
Choose one course, at least, from each required pool and the remaining from the pools of electives under each category. The electives must include at least one 700-level course.

Mechanics/Sciences of Materials:
Required: MEN 601 or MEN 602 or MEN 603.
Electives: MEN 620, MEN 621, MEN 624, MEN 625, MEN 626, MEN 720, MEN 721, MEN 722.

Thermal/Fluid Sciences:
Required: MEN 605 or MEN 606 or MEN 607.
Electives: MEN 631, MEN 632, MEN 634, MEN 636, MEN 645, MEN 730, MEN 731, MEN 732, MEN 734, MEN 737.

Manufacturing/Machinery:
Required: MEN 610 or MEN 611 or MEN 612.
Electives: MEN 650, MEN 652, MEN 654, MEN 655, MEN 750, MEN 751, MEN 753.

Control/Mechatronics:
Required: MEN 615 or MEN 616 or MEN 617.
Electives: MEN 660, MEN 663, MEN 760, MEN 761, MEN 764.

Engineering Analysis and Special Topics:
Electives: MEN 672, MEN 673, MEN 681, MEN 781, MEN 770.
Graduate Courses: Mechanical Engineering

MEN 600 Computational Methods for Mechanical Engineering (3.0); 3 cr. Advanced numerical techniques for mechanical engineering fields involving differential and integro-differential equations, special functions and integrals, transforms, etc.

MEN 603 Materials and Their Properties (3.0); 3 cr. Structure-processing-properties relationship of materials including metals, polymers, glasses and ceramics, electronic materials, and composites.

MEN 605 Statistical Thermodynamics (3.0); 3 cr. Fundamentals of statistical mechanics. Quantum mechanics and statistics as applied to thermodynamics. Behavior of gases and solids. Fermi and Bose systems. Chemical equilibrium.

MEN 610 Advanced Vibration (3.0); 3 cr. Advanced topics in vibration theory and its application to mechanical systems. Topics include vibration analysis of multi-degree of freedom systems, distributed and nonlinear systems, random vibration analysis, and vibration control.

MEN 615 Advanced Mechatronics (3.0); 3 cr. Advanced concepts of Mechatronics. Embedded microcontrollers and their programming. Power and interfacing electronics. Actuators and sensors, and their integration to create complete functional mechatronics systems; Design and development of intelligent machines, emphasizing topics related to sensor-based control of mobile robots.

MEN 616 Advanced Topics in Control Theory (3.0); 3 cr. Fundamentals of modern and advanced control systems. Analog and digital control. Multivariable systems. Robust and optimal control of linear systems. Introduction to intelligent control techniques (neural network, fuzzy logic,…). Case studies involving applications in mechanical engineering fields.
MEN 617 Advanced Instrumentation (3.0); 3 cr. Fundamentals of experimental methods. Data acquisition and signal processing. Uncertainty analysis. Design and selection of analog and digital sensors used in mechanical engineering.

MEN 620 Continuum Mechanics (3.0); 3 cr. Mechanics of continuous media. Basic concepts of stress, strain, constitutive relationships; conservation laws are treated using Cartesian tensor notation. Examples from both solid and fluid mechanics investigated.

MEN 624 Fracture Mechanics (3.0); 3 cr. Mechanics of flawed structures. Concepts include Griffith theory, Irwin analysis, energy analysis of cracked bodies, fracture toughness testing, plane strain, plane stress, transition temperature concepts, subcritical flaw growth.

MEN 625 Experimental Stress Analysis (3.0); 3 cr. Experimental techniques including strain gages and strain gage-based devices. Interferometric techniques. Photoelasticity and geometric Moire methods.

MEN 626 Mechanics of Composite Materials (3.0); 3 cr. Introduction to composite materials. Lamina and laminate mechanical properties. Micromechanics. Mechanical and hygrothermal behavior of laminae and laminates. Lamina and laminate strength theories.

MEN 631 Convective Heat Transfer (3.0); 3 cr. Fundamentals of convection. Forced convection. Free convection. Similarity between momentum and heat transport. Interaction with other heat and mass transfer mechanisms. Introduction to numerical techniques.

MEN 634 Experimental Methods in Thermal/Fluid Sciences (3.0); 3 cr. Theory and practice in the use of instrumentation for measuring temperature, velocity, pressure and concentration; measurement of classical flow fields; Laser-based measurement techniques.

MEN 636 Turbomachinery: Design and Analysis (3.0); 3 cr. Representation of performance of turbomachines. Mechanism of energy transfer. Factors limiting design and performance including surge, choking, and cavitation. Two- and three-dimensional flow phenomena. Performance analysis including multistage effects and off-design performance. Introduction to computational techniques.

MEN 645 Computational Fluid Dynamics (3.0); 3 cr. Physical and mathematical foundations of computational fluid mechanics and heat transfer with emphasis on applications: governing equations and mathematical approximations; partial differential and integral equations, discretization and solution methods, stability and convergence. Introduction to physical modeling of turbulence, combustion, and radiation. Prerequisite: MEN 600.

MEN 652 Machining Processes (3.0); 3 cr. Introduction to machining operations. Cutting tools and tool wear mechanisms. Cutting forces and mechanics of machining. Machining process simulation. Surface generation. Temperatures of the tool and workpiece. Machining dynamics. Non-traditional machining.

MEN 660 Nonlinear and Adaptive Control (3.0); 3 cr. Analysis of the qualitative behavior of nonlinear systems. Synthesis and design of controllers for such systems. Introduction to nonlinear system theory and stability analysis. Techniques for nonlinear control design with particular emphasis on techniques applicable to mechanical and mechatronics systems.

MEN 672 Finite Element Methods (3.0); 3 cr. The concepts and fundamentals of the finite element method with applications to problems in solid and fluid mechanics and heat transfer.

MEN 673 Perturbation Methods (3.0); 3 cr. Solution of nonlinear problems in solid and fluid mechanics and dynamics by use of asymptotic perturbation techniques. Asymptotic expansions. Regular and singular perturbations and applications in dynamics, potential, viscous and compressible flows. Uniformly valid approximations in various physical problems. Generalized boundary-layer techniques. Coordinate straining techniques. Matched asymptotic expansions and multiple scales. Problems with several time or length scales. Prerequisite: MEN 600.

MEN 680 Seminars in Mechanical Engineering; 0 cr. A series of seminars related to mechanical engineering to be attended on regular basis as advised by the graduate advisor. Prerequisite: Department Approval.

MEN 681 Special Topics in Mechanical Engineering (3.0); 3 cr. A course to accommodate various topics related to mechanical engineering non listed with a specific course name. Prerequisite: Department Approval.

**MEN 721 Theory of Plasticity (3.0); 3 cr.** Plastic yield conditions and stress-strain relations. Behavior of elastic-perfectly plastic members. Plain strain in plastic members. \textit{Prerequisite}: MEN 602.

**MEN 730 FEM for Fluid Dynamics (3.0); 3 cr.** Analysis of finite element methods for basic problems in fluid mechanics. Scalar transport equations. Compressible and incompressible Navier-Stokes equations. Emphasis on developing and analyzing formulations that are stable and higher-order accurate such as Galerkin/least-squares methods and SUPG methods. \textit{Prerequisite}: MEN 672.

**MEN 732 Multiphase Flows and Heat Transfer (3.0); 3 cr.** Fundamentals of multiphase fluid mechanics, pressure drop, stability analysis, critical flow and dynamic waves, flow regime analysis, and phase separation and distribution phenomena. Single and multicomponent boiling and condensation heat transfer phenomena. \textit{Introduction to computational techniques. Prerequisite}: MEN 606.

**MEN 750 Optimization Methods in Design (3.0); 3 cr.** Optimum design of mechanical elements and systems. Formulation and solution of mechanical design problems by use of mathematical programming methods. \textit{Prerequisite}: MEN 611.

**MEN 751 Reliability in Mechanical Design (3.0); 3 cr.** Theory and applications of probabilistic methods in the analysis and synthesis of engineering systems. Review of basic probability concepts, random variables and distributions and uncertainty quantification and propagation. First-order, second-order and advanced mean value reliability methods. Monte Carlo simulation, variance reduction techniques, sensitivity analysis and reliability-based design optimization. \textit{Prerequisite}: MEN 611.

**MEN 753 Design for Sustainability (3.0); 3 cr.** Environmentally conscious design or Ecodesign. Applicable standards and limits. Life cycle assessment. Sustainable technology for sustainable planning. Case
studies: Waste reduction and management and renewable energy sources. Prerequisite: MEN 611.

MEN 761 Robotics: Design and Control (3.0); 3 cr. Advanced approaches to modeling, control and applications of robot manipulators: Kinematic modeling of manipulators; methods for obtaining dynamic model of manipulators; control of manipulators based on independent joint and multivariable control approaches, control of the contact forces between a manipulator and its environment; and adaptive control of manipulators.

MEN 764 Microelectomechanical Systems (3.0); 3 cr. Introduction to Microelectromechanical (MEMS) systems. Basic concepts of smart materials. Micorsystem design and analysis. Simulation and manufacturing. Typical applications: microsensors, microfluids, etc. Prerequisite: MEN 615.

MEN 770 Advanced Finite Element Methods (3.0); 3 cr. Advanced concepts of the finite element method. Hybrid and boundary element methods. Nonlinear, steady-state, propagation, and eigenvalue problems. Prerequisite: MEN 672.

MEN 781 Advanced Topics in Mechanical Engineering (3.0); 3 cr. A course to accommodate advanced topics related to mechanical engineering non listed with specific course name and requiring basic skills developed in lower level courses. Prerequisite: Department Approval.

MEN 790 Master Thesis; 6 cr. Implementation of a research project including the writing of a thesis report and a final presentation. Prerequisite: MEN 700.
FACULTY OF HUMANITIES
FACULTY DIRECTORY
Office of the Dean
Abouchedid, Kamal, PhD, Dean
Pink Building, 3rd floor, Room HA 342
Tel: 09-218950/1/2 (Extension 2433), Direct line: 09-208500
E-mail: kabouchedid@ndu.edu.lb

Chemaly, Wassil, Administrative Assistant to the Dean
Pink Building, 3rd floor, Room HA 344
Tel: 09-218950/1/2 (Extension 2423), Direct line: 09-208501
E-mail: fhum@ndu.edu.lb
wchemaly@ndu.edu.lb

Edward Alam, PhD, Benedict XVI Endowed Chair
Pink Building, 3rd floor, Room HA 335
Tel: 09-218950/1/2 (Extension 2405), Direct line: 09-208524
E-mail: ealam@ndu.edu.lb

Honorée Eid, Administrative Assistant to the Benedict XVI Endowed Chair
Pink Building, 3rd floor, Room HA 334
Tel: 09-218950/1/2 (Extension 2405), Direct line: 09-208524
E-mail: honoree.eid@ndu.edu.lb

Department of English and Translation
Abdelnour, George, PhD, Chairperson
Pink Building, 3rd floor, Room HA 338
Tel: 09-218950/1/2 (Extension 2572), Direct line: 09-208544
E-mail: det@ndu.edu.lb
gabdelnour@ndu.edu.lb

Orfali, Rita, Administrative Assistant to the Dean
Pink Building, 3rd floor, Room HA 351
Tel: 09-218950/1/2 (Extension 2426), Direct line: 09-208509
E-mail: det@ndu.edu.lb
rorfali@ndu.edu.lb

Undergraduate/Graduate English Advisor
Abdelnour, George, PhD
Pink Building, 3rd floor, Room HA 338
Tel: 09-218950/1/2 (Extension 2572), Direct line: 09-208544
E-mail: gabdelnour@ndu.edu.lb

Undergraduate/Graduate Translation Advisor
El Hajj, Maya, Doctorate
Pink Building, 2nd floor, Room HA 230
Tel: 09-218950/1/2 (Extension 2163), Direct line: 09-208539
E-mail: melhajj@ndu.edu.lb

Akl, May, Doctorate
Pink Building, 2nd floor, Room HA 232
Tel: 09-218950/1/2 (Extension 2420), Direct line: 09-208541
E-mail: maki@ndu.edu.lb

Department of Psychology, Education and Physical Education
Tannous, Joseph (Fr.) EdD, Chairperson
Pink Building, 3rd floor, Room HA 326
Tel: 09-218950/1/2 (Extension 2410), Direct line: 09-208512
E-mail: jtannous@ndu.edu.lb

Dabaghy, Karen, Secretary to the Chairperson
Pink Building, 3rd floor, Room HA 353
Tel: 09-218950/1/2 (Extension 2430), Direct line: 09-208505
E-mail: dped@ndu.edu.lb
kdabaghy@ndu.edu.lb

Undergraduate Education/Teaching Diploma/Teaching Certificate Advisor
Oueijan, Harvey, Ed.D.,
Pink Building2nd floor, Room HA 256
Tel: 09-218950/1/2 (Extension. 2415 ), Direct line: 09-208540
E-mail: houeijan@ndu.edu.lb

Graduate Education Advisor
Sabieh, Christine, Doctorate
Pink Building, 2nd floor, Room HA 245
Tel: 09-218950/1/2 (Extension 2409), Direct line: 09-208510
E-mail: csabieh@ndu.edu.lb

Physical Education Advisor
Nassif, Nadim, Doctorate
Pink Building, 3rd floor, Room HA 358
Tel: 09-218950/1/2 (Extension 5078), Direct line: 09-208533
E-mail: nnassif@ndu.edu.lb

Physical Education Advisor
Keyrouz, Kaisser, Doctorate
Pink Building, 3rd floor, Room HA 359
Tel: 09-218950/1/2 (Extension 5074), Direct line: 09-208499
E-mail: kkeyrouz@ndu.edu.lb

Psychology Advisor
Yaacoub, Joseph, PhD
Pink Building, 2nd floor, Room HA 240
Tel: 09-218950/1/2 (Extension 2414), Direct line: 09-208526
E-mail: jyacoub@ndu.edu.lb

Psychology Advisor
Eid, Patricia, PhD
Pink Building, 2nd floor, Room HA 236
Tel: 09-218950/1/2 (Extension 2418), Direct line: 09-208523
E-mail: peid@ndu.edu.lb
Department of Media Studies
Bou Zeid, Maria, Doctorate, Chairperson
Pink Building, 3rd floor, Room HA 340
Tel: 09-218950/1/2 (Extension 2547), Direct line: 09-208521
E-mail: mbouzeid@ndu.edu.lb

Abi Aoun, Celine, Secretary to the Chairperson
Pink Building, 3rd floor, Room HA 352
Tel: 09-218950/1/2 (Extension 2443), Direct line: 09-208490
E-mail: mediastudies@ndu.edu.lb
cabiaoun@ndu.edu.lb

Eid, Alice, Secretary to the Chairperson
Pink Building, 3rd floor, Room HA 354
Tel: 09-218950/1/2 (Extension 2427), Direct line: 09-208503
E-mail: mediastudies@ndu.edu.lb
aeid@ndu.edu.lb

Journalism Advisor
Lahoud, Sam, MA
Yellow Building, 2nd floor, Room HB 216
Tel: 09-218950/1/2 (Extension 2389), Direct line: 09-208078
E-mail: slahoud@ndu.edu.lb

Graduate Media Studies Advisor
Bou Zeid, Maria, Doctorate
Pink Building, 3rd floor, Room HA 340
Tel: 09-218950/1/2 (Extension 2547), Direct line: 09-208521
E-mail: mbouzeid@ndu.edu.lb

Advertising & Marketing Advisor (A)
Ajami, Joseph, PhD
Pink Building, 2nd floor, Room HA 258
Tel: 09-218950/1/2 (Extension 2404), Direct line: 09-208538
E-mail: jajami@ndu.edu.lb

Advertising & Marketing Advisor (B)
Mounzer Karam, Nadine, Doctorate
Pink Building, 3rd floor,
Tel: 09-218950/1/2 (Extension 5097)
E-mail: nkaram@ndu.edu.lb

Advertising & Marketing Advisor (C-D-E)
Mady, Christy, PhD
Pink Building, 3rd floor, Room HA 393
Tel: 09-218950/1/2 (Extension 5068), Direct line: 09-208547
E-mail: cmady@ndu.edu.lb

Advertising & Marketing Advisor (F-G-H)
Sayyah, Rita, Doctorate
Pink Building, 3rd floor, Room HA 367
Tel: 09-218950/1/2 (Extension 2209), Direct line: 09-208489
E-mail: rsayyah@ndu.edu.lb

Advertising & Marketing Advisor (I-M)
Awki, Zoya, MA
Studio, Room ST 127
Tel: 09-218950/1/2 (Extension 2385), Direct line: 09-208553
E-mail: zawky@ndu.edu.lb

Advertising & Marketing Advisor (N-R)
El Khoury, Jessica, PhD
Pink Building, 3rd floor, Room HA 395
Tel: 09-218950/1/2 (Extension5096)
E-mail: jessica.elkhoury@ndu.edu.lb

Advertising & Marketing Advisor (S-Z)
El Fakih, Khalid, PhD
Pink Building, 3rd floor, HA 392
Tel: 09-218950/1/2 (Extension 5069), Direct line: 09-208520
E-mail: kfakih@ndu.edu.lb

Radio and Television Advisor (A-B-C)
Khabbaz, Nicolas, PhD
Studio, Room ST 108
Tel: 09-218950/1/2 (Extension 2417), Direct line: 09-208559
E-mail: nkhabbaz@ndu.edu.lb

Radio and Television Advisor (D-E-F)
Hosni, Joseph, PhD
Studio, Room ST 127
Tel: 09-218950/1/2 (Extension 2717 ), Direct line: 09-208569
E-mail: jhosni@ndu.edu.lb

Radio and Television Advisor (G-H-I-J)
Abi Adam, Naoum, M. F. A.
Studio, Room ST 114
Tel: 09-218950/1/2 (Extension 2383), Direct line: 09-208569
E-mail: nabiadam@ndu.edu.lb

Radio and Television Advisor (K-M)
Al Achy, Samer, MA
Studio, Room ST 104
Tel: 09-218950/1/2 (Extension 2395), Direct line: 09-208561
E-mail: sachy@ndu.edu.lb

Radio and Television Advisor (N-Z):
Mallah, Najwa, MA
Studio, Room ST 105
Tel: 09-218950/1/2 (Extension 2219), Direct line: 09-208560
E-mail: nmallah@ndu.edu.lb
Department of Religious, Cultural and Philosophical Studies
Salameh, Doumit, PhD, Chairperson
Pink Building, 3rd floor, Room HA 341
Tel: 09-218950/1/2 (Extension 2429), Direct line: 09-208504
E-mail: dsalameh@ndu.edu.lb

Dabaghy, Karen, Secretary to the Chairperson
Pink Building, 3rd floor, Room HA 353
Tel: 09-218950/1/2 (Extension 2430), Direct line: 09-208505
E-mail: rcps@ndu.edu.lb
    kdabaghy@ndu.edu.lb

Freshman Arts Advisors
Freshman Arts Advisor (A-G)
Daher, Jerome, Doctorate, Pink Building, 3rd floor, Room HB334
Tel: 09-218950/1/2 (Extension 5098 ), Direct line: 09-208494
E-mail: jdaheer@ndu.edu.lb

Freshman Arts Advisor (H-O)
Chibani, Wessam, EdD
Pink Building, 2nd floor, Room HA 231
Tel: 09-218950/1/2 (Extension 2400), Direct line: 09-208519
E-mail: wchibani@ndu.edu.lb

Freshman Arts Advisor (P-Z)
Azouri, Pamela, Doctorate
Pink Building, 3rd floor, Room HA 398
Tel: 09-218950/1/2 (Extension 5073), Direct line: 09-208502
E-mail: pazouri@ndu.edu.lb

Coordinators of Regional Campuses
Shouf Campus
Donerian, Vatche, MA
Pink Building, 2nd floor, Room HA237
Tel: 09-218950/1/2 (Extension 2041), Direct line: 09-208522
E-mail: donerian@ndu.edu.lb

North Lebanon Campus
Hajj, Micheal, MA
Tel: 06-416100 (Extension 3144), Direct line: 06-416100
E-mail: mhajj@ndu.edu.lb

Director DAVA
Khabbaz, Nicolas, PhD
Studio, Room ST 108
Tel: 09-218950/1/2 (Extension 2417), Direct line: 09-208559
E-mail: nkhabbaz@ndu.edu.lb
MISSION, VISION AND VALUES

Mission
The mission of the FH is to provide opportunities for NDU students to develop their intellectual and interpersonal capacities to their full potential. The Faculty also aims to encourage students to appreciate their culture and to work for justice and peace in their world. With a liberal arts education as the foundation of its programs, the mission of the FH is to equip students with a well-rounded knowledge base, enabling them to think critically and independently, to reflect on timeless issues, and to shape progress. The Faculty also aims to train students in professional career-based degrees.

Vision
During the next five years, the Faculty will strive to make NDU a university of choice for undergraduate degrees in Education, English, Physical Education, Psychology, Arabic, Translation, and Media Studies, and minors in Philosophy and Sociology. To attain this goal, the curriculum will be reviewed and updated with special emphasis given to the inclusion of courses that offer students exposure to the career they have chosen. In addition, efforts will be made to promote interdisciplinary studies and place greater emphasis on research for both students and faculty members. In line with Pope Saint John Paul II’s Ex Corde Ecclesiae “research activities will study serious contemporary problems in areas such as the dignity of human life, the promotion of justice for all, the quality of personal and family life, the protection of nature, and the search for peace and political stability…. ” (Article 32). Graduate programs will continue to be expanded to welcome adult learners who wish to further their area of specialization for further skills development.

Values
As an integral part of a Catholic university which embraces the Maronite tradition of faith in the role of education to empower its members, the Faculty of Humanities places special emphasis on the following in all of its courses and activities:

- Academic integrity;
- Academic excellence;
- Personal ethics;
- Belief in one’s own worth;
- Responsibility of the individual towards one’s family and community;
- Respect for tradition;
- Becoming independent, critical thinkers;
- Serving others;
- Compassion;
- Developing the ability to work in a team atmosphere for the good of the entire group;
- Cross-cultural understanding;
- Social consciousness;
- Encouraging dialogue between faith and reason (Ex Corde Ecclesiae # 15).
**FACULTY PROFILE**

The Faculty of Humanities plays two roles in the academic life of the University. The first is to offer degree programs on both the undergraduate and graduate levels, the second is to provide a large array of general education requirements, foreign language courses, and special programs designed for students at the various stages of their academic careers.

The Faculty of Humanities had its place with the two other founding faculties at NDU: The Faculty of Business Administration and Economics, and The Faculty of Natural and Applied Sciences.

During its early years as LCHE, the Faculty mainly provided the NDU community with service courses in the English language, Human Thought, Arabic, Religion, Political Science among others. In 1987, a B.A. in Communication Arts and a B.A. in Interior and Graphic Design were offered. In 1991, the B.A. in Advertising and Marketing was introduced. Between 1993 and 1999, additional degrees in English, Translation, Physical Education, Arabic, International Affairs and Diplomacy on both the undergraduate and graduate levels were successfully introduced.

The Faculty of Humanities had become so large by 1999 that as of 2000, the Faculty of Political Science and the Faculty of Architecture, Art and Design were founded as independent entities.

Today, in addition to offering General Education courses and a large variety of elective courses, the Faculty of Humanities offers 8 undergraduate degree programs and 5 M.A. programs. It also offers Teaching Diplomas and Certificates and welcomes a large number of Intensive English students each semester.

ACADEMIC DEPARTMENTS AND DEGREE PROGRAMS

The Department of English and Translation:
- B.A. English Language;
- B.A. Translation and Interpretation;
- M.A. English Language and Literature;
- M.A. Translation;
- Minor in Arabic;
- Minor in English;
- Minor in Translation;
- Summer Arabic Program.

The Department of Psychology, Education and Physical Education:
- B.A. Psychology - Clinical Psychology Emphasis;
- B.A. Psychology - Educational Psychology Emphasis;
- B.A. Psychology - Industrial Psychology Emphasis;
- B.A. Education - Basic Education;
- B.A. Physical Education and Sport;
- M.A. Psychology - Educational Psychology Emphasis;
- M.A. Education;
- Teaching Diploma;
- Teaching Certificate;
- Minor in Psychology;
- Minor in Physical Education;
- FIFA/CIES Sport Management Certificate.

The Department of Media Studies:
- B.A. Advertising and Marketing;
- B.A. Communication Arts - Journalism and Electronic Media Emphasis;
- B.A. Communication Arts - Radio and Television Emphasis;
- M.A. Media Studies - Advertising Emphasis;
- M.A. Media Studies - Television Management and Production Emphasis;
- M.A. Media Studies - Electronic Journalism and Public Relations Emphasis;
- Minor in Advertising and Marketing;
- Minor in Radio and Television;
- Minor in Journalism;
- Minor in Public Relations.

The Department of Religious, Cultural and Philosophical Studies
- Minor in Philosophy;
- Minor in Sociology.
Liberal Arts Curriculum (30 cr.)
The Liberal Arts Core Curriculum (LAC) will be applied to new entering students as of Fall 2016:

**Category I. English and Arabic Communication**

A. English Communication  
ENL 213: Sophomore Rhetoric 3 cr.

And
ENL 223: Communication Arts 3 cr.

Or
ENL 230: English in the Workplace 3 cr.

B. Arabic Communication (One from the following pool)  
ARB 211: Appreciation of Arabic Literature 3 cr.
ARB 212: Advanced Arabic Grammar 3 cr.
ARB 224: Arabic Literature and Human Thought 3 cr.
ARB 231: Technical Arabic 3 cr.
ARB 306: The Modern Arabic Novel and Short Story 3 cr.
ARB 310: Arabic Theater 3 cr.

**Category II. Religion**

REG 212: Religion and Social Issues 3 cr.
REG 213: Catholicism 3 cr.
REG 215: World Religions 3 cr.
REG 313: The Maronites: Faith and Cultural Heritage 3 cr.
REG 314: Marriage and Family in the Catholic Church 3 cr.

**Category III. Ethics**

COA 360: Media Ethics 3 cr.
ENG 310: Ethics in Engineering 3 cr.
BAD 431: Business Ethics 3 cr.
CSC 203: Information Age and Ethics 3 cr.
ENS 205: Environment, Society and Ethics 3 cr.
PHL 311: Ethics and the Modern World 3 cr.
POS 345: Ethics and Leadership 3 cr.
NUR 203: Introduction to Bioethics 3 cr.

**Category IV. Citizenship**

POS 201: Introduction to Political Science 3 cr.
POS 209: Citizenship 3 cr.
POS 210: Government and Politics of Lebanon 3 cr.
POS 319: Democracy and Human Rights 3 cr.
POS 240: Law and Society 3 cr.
FQM 200: Food Security and Sustainability 3 cr.
Category V. Cultural Studies and Social Sciences (6 credits) - Faculty Contributions

A. Cultural Studies
- PHL 211 Logic and the Scientific Method
- PHL 232 Ancient World Philosophy
- PHL 333 Medieval World Philosophy
- PHL 334 Modern and Contemporary World Philosophy
- LIR 214 Introduction to Literary Genres

Intensive English Program
Students who score less than 400 on the NDU EET are offered the opportunity to take a one-semester 12-credit Intensive English course. Students may also take one Math remedial course simultaneously. The passing grade in Intensive English is “C” (70). A student who scores a “B” or above is placed automatically in ENL 110. Students may repeat this course only once.

Intensive English is divided into two components:
- Grammar and Writing (6 cr.);
- Reading and Oral (6 cr.).

In addition to the traditional class setting, students are encouraged to participate in the University’s academic life by sitting in on regular University classes, and will have access to the Mariam and Youssef Library and the Writing Center.

Communication Skills Courses
The placement of students in Communication Skills Courses is based upon their EET scores (see Undergraduate Admission).

The Department offers the following remedial and communication skills courses:
- ENL 105 - College English I (5 non-credit carrying; passing grade is “C”);
- ENL 110 - College English II (3 non-credit carrying; passing grade is “C”);
- ENL 213 - Sophomore English Rhetoric (3 cr.);
- ENL 223 - Communication Arts (3 cr.);
- ENL 230 - English in the Workplace (3 cr.).

Languages
The Department offers courses in the following languages:
Chinese, French, German, Italian, Latin, Spanish, Syriac.
The Degree of Bachelor of Arts in English Language

Mission
The mission of the B.A. in English Language is to provide students with mastery over the English language and its literature broadly conceived. Students are prepared for future careers in teaching, communications, or for advanced degrees in the field of English studies.

Program Educational Objectives
The graduates of the program should be able to:
- Develop knowledge of English and its diverse cultural and literary forms;
- Become lifelong learners of English as an academic discipline, acquiring graduate degrees and pursuing opportunities to build on their undergraduate training;
- Follow a successful career path by turning academic skills into professional competences;
- Use their training in interpretation and analysis to become lifelong critical thinkers in all their endeavors;
- Construct a code of ethics to guide their professional and personal lives.

Program Learning Outcomes
Upon graduation, students should be able to:
- Describe the different stages of English literary history and of the most representative writers of the English language;
- Explain the structure of the English language as it has evolved over time through the use of linguistics as an academic discipline;
- Apply critical and interpretive methods to the study of language and literature;
- Understand the multiplicity of Anglophone dialects and literatures of the world;
- Articulate how literary and cultural texts can transform one’s understanding of self and others.

Graduation Requirements
Students majoring in English must successfully complete a total of 102 credits with an overall GPA of at least 2.0/4.0 and a minimum average of 2.0/4.0 in the major requirements. A minimum grade of “C” is required in ENL 213 and ENL 223.

Degree Requirements (102 credits)

Liberal Arts Core Curriculum 30 cr.
English students may not take LIR 214 to satisfy the GER requirement.

Core Requirements 48 cr.
ENL 301, ENL 311, ENL 312, ENL 313, ENL 314, ENL 316, ENL 415, ENL 416, LIR 214, LIR 215, LIR 216, LIR 217, LIR 305, LIR 306, LIR 315, LIR 316.

Major Requirements from the following pool 15 cr.
ENL 315, ENL 317, ENL 321, ENL 322, ENL 324, ENL 411, ENL 412, ENL 413, ENL 414, ENL 417, ENL 421, ENL 430, LIR 323, LIR 324, LIR 325, LIR 411, LIR 412, LIR 421, LIR 422, LIR 423, LIR 424, LIR 425, LIR 426, LIR 427, LIR 428, LIR 430.

Free Electives 9 cr.
Minor in English (18 credits)

Students minoring in English must successfully complete a total of 18 credits with a minimum average of 2.0/4.0 in the minor courses. A minimum of “C” is required in ENL 213.

Option I: Language (18 cr.)
ENL 301
9 credits at the 300-level
6 credits at the 400-level

Option II: Literature (18 cr.)
LIR 214
3 credits at the 200-level
12 credits at the 300 and 400-levels
Undergraduate Courses: English

**ENL 002 Intensive English II (12.0); 0 cr.**
Designed to improve the students' level of English and to prepare for University. Emphasis on reading, writing, speaking and grammar. Passing Grade is “C”.

**ENL 105 College English I (5.0); 5 cr.**
This course places emphasis on listening, speaking, reading, and writing skills that will enable students to succeed in other courses offered at NDU. The passing grade for this course (non-credit carrying) is “C”.

**ENL 110 College English II (3.0); 3 cr.**
This course bridges the gaps for those students who need to reinforce the basic skills taught in ENL 105 in order to succeed in sophomore-level university courses. Emphasis is on consolidating research techniques and further development of academic reading and writing skills. The passing grade for this course (non-credit carrying) is “C”.

**ENL 111 Public Speaking (3.0); 3 cr.**
Introduces Freshman students to the art of public speaking and communication in the English language. Emphasizes personal experience, informative and persuasive speaking. The course also aims to prepare for a successful transition into academic life. For Freshman students.

**ENL 213 Sophomore English Rhetoric (3.0); 3 cr.**
Aims at developing the use of logic and reasoning in argumentation. A properly documented critical paper is required. 
**Prerequisite:** ENL 110 or placement.

**ENL 223 Communication Arts (3.0); 3 cr.**
Designed to introduce the student to the art and science of speech making and communicating with others. 
**Corequisite:** ENL 213.

**ENL 230 English in the Workplace (3.0); 3 cr.**
Provides students with the practical technical skills required for professional communication. 
**Corequisite:** ENL 213.

**ENL 301 Introduction to the Study of Language (3.0); 3 cr.**
An introduction to the study of language; its nature, structure, and development. 
**Corequisite:** ENL 213.

**ENL 311 Phonetics (3.0); 3 cr.**
Study of articulatory phonetics with emphasis on English sound systems. Practice in phonetic transcription. 
**Corequisite:** ENL 301.

**ENL 312 Morphology (3.0); 3 cr.**
Word formation and the attempts to formulate a theory of word structure. 
**Corequisite:** ENL 301.

**ENL 313 Syntax (3.0); 3 cr.**
Analysis of phrase and sentence structure in English and their immediate constituents and types. 
**Corequisite:** ENL 312.

**ENL 314 English Vocabulary (3.0); 3 cr.**
A detailed study of meaning relationships, with a study of borrowings from other languages. 
**Corequisite:** ENL 312.

**ENL 315 Transformational Grammar (3.0); 3 cr.**
Involves students in solving exercises in a transformational generative syntax of English. Chomsky’s grammar models are included. 
**Corequisite:** ENL 301.

**ENL 316 Fundamentals of Discourse Analysis (3.0); 3 cr.**
Aims at introducing students to the different structural and communicative levels of discourse: textual organization (reference, cohesion, coherence, etc.), shared beliefs (presupposition, implicature, given-new information structure, etc.) and conversational analysis (turn-taking, interruptions, etc.). 
**Prerequisite:** ENL 301.

**ENL 317 Language Acquisition Theories (3.0); 3 cr.**
Studies the process by which language develops in humans. Theories concerning first language acquisition as
well as second language acquisition are discussed.

**ENL 321 Semiotics (3.0); 3 cr.** A study of the various patterns of bodily activities, and/or gestures which different English speaking communities systematically use in order to communicate.

**ENL 322 Language and Culture (3.0); 3 cr.** A study of cultural matter i.e. customs, traditions, ways of thinking, taboos, etc. which influence ‘meaning’ in language use.

**ENL 324 Creative Writing (3.0); 3 cr.** A course in creative writing through practical experiment, discussion, and stylistic study of models. Students will practice various writing genres. *Corequisite: ENL 213.*

**ENL 411 History of the English Language (3.0); 3 cr.** A study of the major phonological, syntactic and lexical developments since 9th century. *Corequisite: ENL 314.*

**ENL 412 Phonology (3.0); 3 cr.** Studies phonological theory development. Emphasizes generative phonology of English. *Corequisite: ENL 311.*

**ENL 413 Advanced English Grammar (3.0); 3 cr.** Study of English grammar as dealt with by the traditional grammarians. *Corequisite: ENL 313.*

**ENL 414 Sociolinguistics I (3.0); 3 cr.** Treats language as a social phenomenon. Linguistic variations, social, and contextual factors are studied. *Corequisite: ENL 314.*

**ENL 415 Applied Linguistics (3.0); 3 cr.** Studies the application of modern linguistics to teaching. Includes contrastive analysis between English and Arabic and error analysis. *Corequisite: ENL 314.*

**ENL 416 Language Theories (3.0); 3 cr.** Studies the historical development of linguistic theory with a critical analysis of the competing theories of language. *Corequisite: ENL 411.*

**ENL 417 Introduction to Critical Linguistics (3.0); 3 cr.** Looks at language from a functional systemic perspective. It utilizes linguistic techniques (tense, reference, deixis, transitivity, voice, theta roles, modality, etc.) in order to uncover implicit ideologies inherent in texts. Texts covered include scientific, religious, literary, political, and advertising texts. *Prerequisite: ENL 301.*

**ENL 421 Varieties of English (3.0); 3 cr.** A systematic analysis of the major features/characteristics of the different ‘styles’ of English, i.e. commercial, scientific, legal, etc.

**ENL 430 Special Topics in Linguistics (3.0); 3 cr.** Investigation of special topics of current interest in Linguistics. May be repeated for credit with change of topic. *Prerequisite: ENL 301.*

**ENL 500 English for Specific Purposes (3.0); 3 cr.** This course is designed for graduate students in the sciences with deficiencies in the English language. The course focuses on developing vocabulary and grammar needed for expository writing, critical reading and discipline-specific tasks such as problem-solution sets, data commentary and reviews of research.
Undergraduate Courses: Languages

**CHI 201 Basic Chinese (3.0); 3 cr.** This course introduces students to basic Chinese conversation. Students practice everyday situations and learn how to read elementary Chinese. At the end of the course students will be able to give oral summaries.

**CHI 202 Intermediate Chinese (3.0); 3 cr.** This course is a continuation of Chinese 201. Emphasis is on improving conversational Chinese in addition to reading and writing.

**FRC 105 Freshman French I (3.0); 3 cr.** This course introduces the student to basic spoken and written French. Students will practice conversation on subjects of a daily nature. They will read and write on an elementary level. This course is designed for students who have no previous knowledge of the French language. For beginners only.

**FRC 110 Freshman French II (3.0); 3 cr.** This is an intermediate-level course in which students will improve their ability to hold conversations in French. They will read and write on an intermediate level; they will write paragraphs; summarizing and paraphrasing will also be practiced. *Prerequisite:* Placement test.

**FRC 222 Sophomore French I (3.0); 3 cr.** Refines the students’ ability to write in French. Critical analysis, and argumentation will be practiced.

**FRC 223 Sophomore French II (3.0); 3 cr.** Emphasizes fluency in French. Students will present both extemporaneous and prepared speeches.

**FRC 231 French for Business (3.0); 3 cr.** This course aims to prepare students with a French education to work in a career setting which uses the French language as its language of correspondence and negotiation. Students will practice both oral skills of business presentations and the written skills of report writing, resumé preparation, external and internal business correspondence. An aptitude test is obligatory before the “drop and add period.”

**FRC 235 Survey of Modern French Literature (3.0); 3 cr.** This course offers an introduction to French literature of the modern period through the study of texts representative of key movements from the end of the 18th century to the present.

**GEM 201 German I (3.0); 3 cr.** Practice in basic spoken German.

**GEM 202 German II (3.0); 3 cr.** Continuation of GEM 201. Emphasis on writing and reading.

**ITL 101 Introduction to Italian (3.0); 3 cr.** This course introduces the students to basic spoken and written Italian. Students will practice conversation on subjects of daily interest. They will read and write at the elementary level. For freshman students only.

**ITL 201 Italian I (3.0); 3 cr.** Practice in basic spoken Italian.

**ITL 202 Italian II (3.0); 3 cr.** Continuation of ITL 201. Emphasis on writing and reading.

**LTN 201 Latin I (3.0); 3 cr.** Explanation of the different characteristics of the Latin language.

**LTN 202 Latin II (3.0); 3 cr.** Continuation of LTN 201. Emphasis on writing and reading.

**POR 201 Elementary Portuguese I (3.0); 3 cr.** This course introduces students to the rudiments of the Portuguese language. The course equips students with the skills necessary to cope with a variety of day-to-day situations, including making personal introductions, asking for directions, expressing preferences, dealing with emergencies, among others.
POR 202 Elementary Portugues II (3.0); 3 cr. This course is further introduction to the study of the Portuguese language begun in POR 201. The course completes the survey of Portuguese grammar and lays the foundation for more advanced study of the language. Students continue to build their lexical base while applying more complex rules of the language, including different past tenses and verbal modes. Prerequisite: POR 201 or department approval.

SPA 101 Introduction to Spanish (3.0); 3 cr. This course introduces Freshman students to the Spanish language and civilization. Students will practice speaking, reading, and writing. Emphasis will be developing the ability to communicate with Spanish-speaker. For Freshman students.

SPA 201 Spanish I (3.0); 3 cr. Practice in basic spoken Spanish.

SPA 202 Spanish II (3.0); 3 cr. Continuation of SPA 201. Emphasis on writing and reading.

SYR 201 Syriac I (3.0); 3 cr. This course introduces students to the Syriac Language.
Undergraduate Courses: Literature

**LIR 101 Introduction to Literature in English (3.0); 3 cr.** This introductory course is aimed at providing freshman students with an opportunity to appreciate literature and improve their English communication skills. Students will study significant literary genres, including fiction, poetry, and drama. Material covered will be representative of pre-Modern, Modern and Post-Modern literature originally written in English, and will include Women’s, Children’s, and Minority literature. For Freshman students.

**LIR 214 Introduction to Literary Genres (3.0); 3 cr.** Studies the essential features of poetry, fiction, and drama. Selections include representative texts by British, Irish, and American literary figures. *Corequisite:* ENL 213.

**LIR 215 Introduction to Literary Criticism (3.0); 3 cr.** Presents the basic principles of literary criticism from its beginnings with Plato to the end of the 19th century. *Corequisite:* ENL 213.

**LIR 216 English Literature to the End of the 19th Century (3.0); 3 cr.** Surveys the literary currents and movements of poetry and prose, excluding fiction and drama, from the Anglo-Saxon period to the end of the 19th century. *Corequisite:* ENL 213.

**LIR 217 American Literature to the End of the 19th Century (3.0); 3 cr.** Studies major American authors and movements from the Colonial period to the end of the 19th century. *Corequisite:* ENL 213.

**LIR 305 Novel to the End of the 19th Century (3.0); 3 cr.** A study of the development of the novel to 1900. Selections will include representative novels by Defoe, Richardson, Austin, Dickens, the Bronte sisters, Eliot, and Hardy.

**LIR 306 Drama to the End of the 18th Century (3.0); 3 cr.** A study of the development of drama from its origins to 1800. Selections will include major representative works.

**LIR 315 Modern and Contemporary Novel (3.0); 3 cr.** Presents the major works of British and American novelists of the 20th century. Contemporary authors are emphasized.

**LIR 316 Lebanese Writers (3.0); 3 cr.** Studies major Lebanese writers and their impact on both the East and the West with emphasis on Lebanese immigrant literature.

**LIR 323 Orientalism and Post-Colonial Studies (3.0); 3 cr.** Defines Orientalism and Post-Colonialism, and traces their germination and development.

**LIR 324 Modern and Contemporary Poetry (3.0); 3 cr.** Presents the major works of British and American poets of the 20th and 21st centuries. Contemporary authors are emphasized.

**LIR 325 Science Fiction (3.0); 3 cr.** Envisioning the advances of science through the exercise of creative imagination, this course on science fiction traces the evolution of its dominant themes, metaphors, and techniques, and its cultural significance. Material covered includes written text, film, and digital representations.

**LIR 411 Shakespeare (3.0); 3 cr.** Studies the major dramatic works of Shakespeare and his contemporaries.

**LIR 412 Modern and Contemporary Drama (3.0); 3 cr.** Presents the major works of British and American playwrights of the 20th and 21st centuries. Contemporary authors are emphasized. *Prerequisites:* LIR 214, LIR 215.

**LIR 421 Modern and Contemporary Critical Theory (3.0); 3 cr.** Presents
the major developments of modern and contemporary critical theory from its beginnings with Formalism, passing by New Criticism and Structuralism, to the latest developments in Post-Structuralist theory. Latest trends are stressed. Prerequisites: LIR 214 and LIR 215.

LIR 422 Urban Studies [“The City as Literary Artefact”] (3.0); 3 cr. Studies the representation of the city as literary artefact based on literary and critical theory paradigms. Corequisite: LIR 421.

LIR 423 Film and Media Studies (3.0); 3 cr. Presents the juncture between literary theory and the latest developments in film and media studies. Prerequisites: LIR 214, LIR 215.

LIR 424 Gender Studies (3.0); 3 cr. Traces themes of gender in literature through the prism of a critical theory that addresses the feminine and masculine.

LIR 425 Women Writers (3.0); 3 cr. Studies the ways female writers have contributed to, challenged, and reshaped the literary tradition. Traces women writers’ choice of themes and genres, the relationship between expectations for women writers and readers and what women wrote, and the changing social role of the woman author writing for herself and for others across several centuries of cultural change.

LIR 426 World Literature (3.0); 3 cr. This course is a critical study of world masterpieces in translation.

LIR 427 Marketing Literature: The Best-Seller (3.0); 3 cr. Literature as marketed through various institutions such as book prizes, media advertising, reviews, and the role of critical assessment in the formation of canons and counter-canons are explored in connection with the phenomenon of the best-seller. Questions such as how and why best-sellers are produced, and how they influence and shape the existing narrative discourse are raised.

LIR 428 Travel Literature (3.0); 3 cr. This course explores the germination and development of travel writing and its influence on cross-cultural awareness; representations of discourse, landscape, and ethnicity; and movements across cultural landscapes through narratives embodied in novels, explorer journals, travelogues, and others.

LIR 430 Special Topics in Literature (3.0); 3 cr. Explores particular authors, topics, themes in depth. May be repeated for credit with change of topic. Prerequisites: LIR 214, LIR 215.
The Degree of Bachelor of Arts in Translation and Interpretation

Mission
The mission of the B.A. in Translation and Interpretation is to prepare students to become expert translators and interpreters in order to meet present and future demands of the profession in the fields of law, economics, diplomacy, media, and the arts. The program provides intensive language training to students in Arabic, English, and French. Arabic and English are the principal languages of translation, with training in French as the third working language.

Program Educational Objectives
The graduates of the program should be able to:

• Build on previous knowledge in order to develop advanced proficiency in English, French, and Arabic;
• Follow a successful career path that reflects their training and competences;
• Apply strategies and make decisions as translators in various contexts and across diverse professional fields;
• Contribute to their growth as practitioners through ongoing professional training;
• Act ethically in their academic studies and later as professional translators and interpreters.

Program Learning Outcomes
Upon graduation, students should be able to:

• Describe the diverse schools of translation and the theories underlying them;
• Demonstrate fluency in at least two basic languages of the program, with advanced knowledge of the third (English, French, and Arabic);
• Apply leading principles of translation to diverse forms of discourse, including judicial, scientific, and literary, among others;
• Develop competence in the use of technology and software in the field of translation;
• Analyze and research texts as precursor steps to sound translation and interpretation.

Students may choose to emphasize either Translation or Interpretation. Once admitted to the program students are required to develop competence in the three languages: English, Arabic, and French. Students may be required to take remedial courses in these languages in which a “C” or above is required.

Graduation Requirements
Students majoring in Translation and Interpretation must successfully complete a total of 108 credits with a minimum grade point average of 2.0/4.0 and a minimum average of 2.0/4.0 in the major requirements including the emphasis area.

Minor in Translation (16 credits)

Students minoring in Translation must successfully complete a total of 16 credits with a minimum average of 2.0/4.0 in the minor courses. Students in this minor would choose between two language options: Arabic/English or Arabic/French.

Option I: Arabic/English (16 cr.)
- TRA 201 Translation Theory and Methodology 3 cr.
- TRA 211 Translation of English Contemporary Texts 3 cr.
- TRA 301 Translation of English Documents 4 cr.
- TRA 331 Mechanical Translation 3 cr.
- TRA 401 Translation of English Business Texts 3 cr.

Option II: Arabic/French (16 cr.)
- TRA 201 Translation Theory and Methodology 3 cr.
- TRA 212 Translation of French Contemporary Texts 3 cr.
- TRA 302 Translation of French Documents 4 cr.
- TRA 331 Mechanical Translation 3 cr.
- TRA 402 Translation of French Business Texts 3 cr.
INT 431 Interpreting: English-French-Arabic I (3.0); 3 cr. Aims to help students develop competence in consecutive interpretation needed at international conferences. Students learn the principles of consecutive interpretation and practice the basic skills. General themes are covered. Accuracy is emphasized. Prerequisite: TRA 421.

INT 432 Interpreting: English-French-Arabic II (3.0); 3 cr. Aims to help students develop competence in consecutive interpretation needed at international conferences. Students practice the basic skills. Themes related to the United Nations are covered. Accuracy is emphasized. Prerequisite: TRA 422.

INT 433 Interpreting: French-English I (3.0); 3 cr. Aims to help students develop competence in simultaneous interpretation needed at international conferences. Students practice the basic skills needed for competence. Correct language is emphasized. General themes are covered. Prerequisite: INT 431 or INT 432.

INT 434 Interpreting: English-Arabic II (3.0); 3 cr. Aims to help students develop competence in simultaneous interpretation needed at international conferences. Students practice on specialized texts in economics, political science, and humanities. Prerequisite: INT 431.

INT 435 Interpreting: French-Arabic II (3.0); 3 cr. Aims to help students develop competence in simultaneous interpretation needed at international congresses. Students practice on technical texts. Prerequisite: INT 432.

INT 436 Interpreting: French-English II (3.0); 3 cr. Aims to help students develop competence in simultaneous interpretation needed at international conferences. Students practice on technical texts. Prerequisite: INT 433.

INT 437 Interpreting: Arabic-English I (3.0); 3 cr. Aims to help students develop competence in simultaneous interpretation needed at international conferences. Correct language is emphasized. General themes are covered. Accuracy is emphasized. Students spend time both in class and in the booth. Prerequisite: INT 431.

INT 438 Interpreting: Arabic-English II (3.0); 3 cr. Aims to help students develop competence in simultaneous interpretation needed at international conferences. Students practice on specialized texts in economics, political science, humanities. Students spend time both in class and in the booth. Prerequisite: INT 437.

INT 439 Interpreting: English-Arabic III (3.0); 3 cr. Aims to help students develop competence in simultaneous interpretation needed at international conferences. Technical texts are covered. Students spend time both in class and in the booth. Prerequisite: INT 434.

INT 440 Interpreting: Arabic-Arabic III (3.0); 3 cr. Aims to help students develop competence in simultaneous interpretation needed at international conferences. Technical texts are covered. Students spend time both in class and in the booth. Corequisite: INT 438.

INT 480 Interpreter Internship; (1.0); 1 cr. Practical training in a professional setting at conferences using simultaneous interpretation supervised by the instructor. Prerequisite: INT 433.

TRA 201 Translation Theory and Methodology (3.0); 3 cr. Provides students with a firm foundation of both translation and methodology. Students will study the major contributors to translation theory and will practice translation using the various methodologies.
Undergraduate Courses: Translation

TRA 211 Translation of Contemporary Media Texts: English/Arabic (3.0); 3 cr. Familiarizes students with different kinds of texts from the media pertaining to various aspects of current issues in English/Arabic combination. Prerequisite: TRA 201.

TRA 212 Translation of Contemporary Media Texts: French/Arabic (3.0); 3 cr. Familiarizes students with different kinds of texts from the media pertaining to various aspects of current issues in French/Arabic combination. Prerequisite: TRA 201.

TRA 301 Translation of United Nations Documents in English (3.2); 4 cr. Develops competence in translating various types of United Nations (UN) documents covering the different areas of activity in English/Arabic combination. Basic research and translation of data will be covered. Students will be exposed to the functions of diverse UN agencies. Guest speakers and field trips will be required. Prerequisites: TRA 211, ENL 213.

TRA 302 Translation of United Nations Documents in French (3.2); 4 cr. Develops competence in translating various types of UN-related documents covering the different UN areas of activity in French/Arabic combinations. Basic research and translation of data will be covered. Students will be exposed to UN agencies; guest speakers and field trips will be required. Prerequisites: TRA 212, FRC 223.

TRA 311 Translation of English Legal Documents (4.0); 4 cr. Trains students in interpreting and translating English and Arabic texts which cover diverse areas of law. English/American legal system will be studied. Students will carry out basic comparative research on both systems. Prerequisite: TRA 301.

TRA 312 Translation of French Legal Documents (4.0); 4 cr. Trains students in interpreting and translating French and Arabic texts which cover diverse areas of law. Students will carry out basic comparative research on French and Lebanese systems of law. Prerequisite: TRA 302.

TRA 331 Mechanical Translation and Interpretation (3.0); 3 cr. Use of modern equipment in the field of translation and interpretation. Prerequisites: TRA 301, TRA 302.

TRA 401 Translation of Economic Texts in English (3.0); 3 cr. Trains students in translating English and Arabic economic texts covering diverse fields of business, micro- and macroeconomics, finance, and banking. Prerequisite: TRA 301 or TRA 311.

TRA 402 Translation of Economic Texts in French (3.0); 3 cr. Trains students in translating French and Arabic economic texts covering diverse fields of business, micro- and macroeconomics, finance, and banking. Prerequisites: TRA 302 or TRA 312, and FRC 223.

TRA 403 Seminar in French and English Translation (3.0); 3 cr. Offers intensive practice in translating various types of texts from diverse contexts from English into French and vice versa. Prerequisites: ENL 213, FRC 223.

TRA 413 Multimedia Translation (2.0); 2 cr. Focuses on the translation of the literature and language of motion pictures and television-related productions such as documentaries in English, French and Arabic. Students will learn to use standard software required for subtitling. Field visits to television stations will be organized. Prerequisites: ENL 213, FRC 223.
TRA 421 Translation of English Literature (2.0); 2 cr. Offers intensive practice in translating English literary and artistic texts into Arabic. Prerequisite: TRA 301.

TRA 422 Translation of French Literature (2.0); 2 cr. Offers intensive practice in translating French literary and artistic texts into Arabic. Prerequisite: TRA 302.

TRA 431 Intercultural Communication and Translation I (4.0); 4 cr. Focuses on the intricate and complex relationship between language and culture on the one hand, and cultural communication and translation on the other. The course equips students with the knowledge and practical tools needed to translate culturally-specific texts in English/Arabic combination. Prerequisite: TRA 421.

TRA 432 Intercultural Communication and Translation II (4.0); 4 cr. Focuses on the intricate and complex relationship between language and culture on the one hand, and cultural communication and translation on the other. The course equips students with the knowledge and practical tools needed to translate culturally-specific texts in French/Arabic combination. Prerequisite: TRA 422.

TRA 440 Translation of Scientific and Medical Texts (4.0); 4 cr. Trains students in translating English French and Arabic texts which cover diverse areas of Science and Medicine. Prerequisites: TRA 401, TRA 402.

TRA 480 Translation Internship (1.0); 1 cr. Practical training in a professional setting supervised by the instructor. Corequisite: TRA 422.
Minor in Arabic Language and Literature (15 credits)

In order to complete a minor in Arabic Language and Literature, the student must take the two courses following below:

ARB 212  Applied Arabic Grammar (3 cr.)
ARB 231  Technical Arabic (3 cr.)

Two from the following pool: (6 cr.)
ARB 211  Appreciation of Arabic Literature
ARB 224  Arabic Literature & Human Thought
ARB 317  Themes of Modern Arabic Literature in Lebanon (20th Century)
ARB 333  Modernism in Abbasid Poetry

One of the following courses: (3 cr.)
ARB 302  Practice in Uses of Arabic
ARB 423  The Evolution of the Critical Movement in Lebanon
ARB 415  The Arabic Modernization Movement
<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credit Hours</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>ARB 101</td>
<td>Arabic Essay Reading and Writing I (3.0); 3 cr.</td>
<td></td>
<td>Concentrates on the essay, its development, and its various types. For Freshman students.</td>
</tr>
<tr>
<td>ARB 102</td>
<td>Arabic Essay Reading and Writing II (3.0); 3 cr.</td>
<td></td>
<td>Continuation of ARB 101. Prerequisite: ARB 101 or placement. For Freshman students.</td>
</tr>
<tr>
<td>ARB 211</td>
<td>Appreciation of Arabic Literature (3.0); 3 cr.</td>
<td></td>
<td>Addresses essential characteristics of literature as well as literature themes, schools, and genres. Prerequisite: Sophomore Standing.</td>
</tr>
<tr>
<td>ARB 212</td>
<td>Advanced Arabic Grammar (3.0); 3 cr.</td>
<td></td>
<td>Designed to improve students’ command of Arabic grammatical structures and their application in discourse. Prerequisite: Sophomore Standing.</td>
</tr>
<tr>
<td>ARB 224</td>
<td>Arabic Literature and Human Thought (3.0); 3 cr.</td>
<td></td>
<td>This course focuses on the relationship between philosophical thought of selected Arab and Lebanese writers and the philosophical concepts in Arabic literature from “al Jahiliyah” until the present. Students will analyse and discuss the various philosophical views and theories in the passages studied.</td>
</tr>
<tr>
<td>ARB 231</td>
<td>Technical Arabic (3.0); 3 cr.</td>
<td></td>
<td>Designed to train students in using proper Arabic linguistic tools pertaining to various technical, scientific, and professional settings. Prerequisite: Sophomore Standing.</td>

The Degree of Master of Arts in English Language and Literature - Literature Emphasis

Mission
The mission of the M.A. in English Language and Literature is to deepen students’ knowledge of English literature and of the workings of the English language. Degree holders are equipped with the analytical and conceptual tools for further graduate study in English, or for a career in foreign language teaching, program administration, and communications.

Program Educational Objectives
The program will prepare students to:

• Deepen their knowledge of English literature and culture across time and place;
• Undertake complex analysis of written texts and other forms of discourse and identify the ways in which meaning is generated;
• Display critical, self-reflexive and ethically-grounded thinking and judgment;
• Pursue doctoral studies in a variety of fields that build on their knowledge of English studies.

Program Learning Outcomes
Upon graduation, students should be able to:

• Demonstrate specialized knowledge of the broad field of English literary studies, from canonical and non-canonical perspectives;
• Demonstrate a comprehensive understanding of, and ability to apply, diverse critical approaches to the study of literature;
• Analyze tensions in literary and cultural contexts;
• Apply key academic research techniques to writing and speaking successfully;
• Analyze new, complex and unpredictable texts that require a broad range of critical and analytical skills for understanding.

Graduation Requirements
To satisfy the requirements for the Master of Arts in English Language and Literature, with Literature Emphasis, the student must complete 30 credits with an overall average of 3.0/4.0 including submitting and defending a thesis.

Degree Requirements (30 credits)

Major Requirements 15 cr.
ENL 601, LIR 605, LIR 662, LIR 699.

Electives 15 cr.
Students may select electives from the following:
LIR 604, LIR 606, LIR 607, LIR 608, LIR 609, LIR 610, LIR 612, LIR 613, LIR 615, LIR 616, LIR 617, LIR 618, LIR 619, LIR 620, LIR 626, LIR 627, LIR 628, LIR 629, LIR 630, LIR 634, LIR 635, LIR 636, LIR 637, LIR 640, LIR 682.
**Graduate Courses: English Language and Literature - Literature Emphasis**

**LIR 604 Literature and War in the 20th and 21st Centuries (3.0); 3 cr.** This course will explore contemporary literature that responds to and depicts war and violence including the World Wars, the Vietnam War, the Lebanese Civil War, the Palestinian/Israeli crisis and the Iraq War among others. The objective of this course is to explore the modalities of war and violence in a range of forms and contexts and the role they play in the construction/reconstruction of subjectivities and narratives. Writers will include Kurt Vonnegut, Virginia Woolf, Tim O’Brien, Ghada Al-Samman, Nuha Al-Radi, René Girard, Elaine Scarry and others.

**LIR 605 Critical/Literary Theory (3.0); 3 cr.** A major course which lays the ground for advanced interpretative studies and skills, Critical/Literary Theory addresses contemporary critical issues dealing with the ways in which literary texts are read in the context of an increasingly rich and complex multi-cultural and multi-disciplinary world.

**LIR 608 Feminist Literary Criticism (3.0); 3 cr.** This course will examine the ways in which developments in feminist criticism reflect trends in mainstream contemporary literature and culture. Topics studied may include Feminism and Colonialism, Feminism and Psychoanalysis, French Feminism, Marxist Feminism, and Eco-Feminism and writers will include Hélène Cixous, Julia Kristeva, Judith Butler, Luce Irigaray, Donna Haraway, Caroline Marchant, and Simone de Beauvoir.

**LIR 609 Postmodernism and Beyond: The Rise and Fall of Theory (3.0); 3 cr.** Postmodernism has been hailed as one of the most significant transformations in the interpretative history of humanity, and a body of principles and practices, known as “Theory,” has stormed academia since the last quarter of the twentieth century. The most notable theoreticians of this peculiar interest have been centered mainly in Europe but also in the United States. Yet, at the beginning of the third millennium, voices have been raised against what is perceived as the hegemony of “theory,” and attempts are being made, on the one hand, to break the dictatorship of postmodernist thought and, on the other hand, to delineate the features of the new age. Theorists include J. Hillis Miller, Terry Eagleton, Fredric Jameson, Umberto Eco, and others.

**LIR 610 Postcolonial Discontents (3.0); 3 cr.** “What is English about English literature?” writes Salman Rushdie, effectively giving voice to a primary theme and preoccupation of postcolonial literary theory. In this course we will read both postcolonial theory and postcolonial literatures, so as to gain some appreciation of these forms of writing and critical inquiry. Novels include Malouf’s *An Imaginary Life*, Harris’ *Palace of the Peacock*, Rhys’ *Wide Sargasso Sea*, Conrad’s *Lord Jim*, Morrison’s *Beloved*.

**LIR 613 Advanced Shakespearean Studies (3.0); 3 cr.** This advanced course deals with the latest trends in Shakespearean studies and criticism, such as playwriting, theater, and performance.

**LIR 616 Romantic Narrative Poetry: A Seminar (3.0); 3 cr.** The course studies the Romantics’ long narrative poetic works. It explores romantic narrative poetry as a reflection of the romantics’ concern in the hero as a person of magnitude facing the mystifying and incomprehensible or as a common person living the tragic events of everyday life. The course pays particular attention to long narrative poetry as a replacement for the epic. Texts include: Wordsworth’s *The Prelude*, *The Ruined Cottage*, and *Michael*, Coleridge’s *Christabel* and *The Rime of the Ancient Mariner*, Byron’s *Don Juan* and *Childe Harold’s Pilgrimage*, Shelley’s *Alastor* and *Epipsychidion*, and Keats’s *Endymion*, *Isabella*, and *Hyperion*. 
LIR 617 Identity Through Writing: Women Writers of the Arab World (3.0); 3 cr. This course will examine how Arab women have articulated and expressed their subjectivity, responded to cultural, social, political and familial demands and created a literary and feminist aesthetic. Authors include Naomi Shihab Nye, Ahdaf Soueif, Evelyne Accad, Etel Adnan, Margot Badran, Fadia Faqir, and Diana Abu-Jaber.

LIR 618 Representations of the City in 20th-Century American Fiction (3.0); 3 cr. The city has been, since Theodore Dreiser’s *Sister Carrie*, one of the important loci of American fiction. As the city landscape developed, the relationship between city-dwellers and their urban practices has evolved and produced a narrative which attempts to fictionalize the experience of living and moving in the city, as well as inscribing the self in the frame of the emerging polis. Authors include Thomas Pynchon, Paul Auster, Don Delillo, Steven Millhauser, E.L. Doctorow, and others.

LIR 619 Seductive Identifications (3.0); 3 cr. Multicultural or ethnic minority literature has come to be recognized as an important aspect of the cultural landscapes of Australia, Canada, and the United States. In this course we will read both creative and critical literatures in English that define specific sites of multicultural engagement. Readings include Castro’s *Birds of Passage*, Haikal’s *Seducing Mr Maclean*, Kureishi’s *The Buddha of Suburbia*, and the poetry of Antigone Kefala.

LIR 620 Lord Byron and the Orient: A Seminar (3.0); 3 cr. The course is an in-depth study of the Oriental peoples, cultures, traditions, sites, climes, themes, and colorings of Lord Byron’s Eastern Tales: *The Bride of Abydos*, *The Giaour*, *The Corsair*, and *Siege of Corinth*. Short selections of other major works like *Lara*, *Childe Harold’s Pilgrimage*, and *Don Juan*, which allude to the Orient, will be studied as well. Students will investigate Byron’s Oriental scholarship and his authenticity in representing the various elements of the East.

LIR 626 Visual Storytelling (3.0); 3 cr. An unexplored literary genre, the graphic novel provides a unique interplay of words and images whereby the narrative is relayed through words accompanied by illustrative art. The course will examine the link between visuality and narrativity and will focus on meaning, agency, representation, semiotics, and myth. Students will study the evolution of the genre, its structure, language and impact on today’s readers. Authors might include the Pulitzer-Prize winner Art Spiegelman, Raymond Briggs, R. Crumb, Marjane Satrapi, Paul Auster, Jean Baudrillard, Walter Benjamin, and Roland Barthes.

LIR 627 Re-Creations of the Industrialized Past and Visions of the Virtual Future: The Influence of Steampunk and Cyberpunk (3.0); 3 cr. The last two decades of the twentieth century have been marked by unprecedented advances in science, and fiction has been quick to incorporate the findings of what is called the “New Technologies” into its narrative representations of the nature of reality, society, and the individual. Recreated memories of an advanced past and visions of a dystopian future, and imagined virtual worlds challenging our notions of what reality is, have been the centerpiece of the two new genres of steampunk and cyberpunk. The works of Bruce Bethke, William Gibson, Bruce Sterling, Pat Cadigan, Neal Stephenson, Jeff Noon, Greg Bear, and others are included.

LIR 629 Ameen Rihani and Kahlil Gibran: A Seminar (3.0); 3 cr. The course studies the English works of the Lebanese-American writers Ameen Rihani and Kahlil Gibran. Emphasis will be on *The Book of Khalid* and *The Prophet* and their enormous influence on building bridges between the East and the West. Those and other works like Rihani’s essays and Gibran’s prophetic narratives, which have become so well...
known and studied in the curricula of world universities, will be studied as advancing East-West cross-cultural integration.

**LIR 630 Contemporary Voices in Exile (3.0); 3 cr.** What is the relationship between exile and literary creativity? Does exile contribute to creative freedom or entrap the writer in nostalgia? Why do some writers choose to write in the language of their adopted country? The condition of exile has produced a distinctive literary voice where the dilemmas of language, identity, politics and diaspora are examined. This course will examine the effects of such dilemmas on writers living and writing in exile. Authors may include Amine Maalouf, Hanif Kureishi, Andrea Levy, Miroslav Jancic, Samuel Beckett, Salman Rushdie, Etel Adnan, Vladimir Nabokov and Chinua Achebe.

**LIR 635 Out-Posting Empire (3.0); 3 cr.** The works of Edward Said, Homi Bhabha and Gayatri Spivak among others, study postcolonial criticism of imperial culture. In this course we will trace the trajectory of their works. Some of the themes covered are: critique of textualism, engagement with the work of Foucault, and intellectual vocation.

**LIR 636 Western Images of the East (3.0); 3 cr.** This course studies the major Western figures, literary ones, artists, travelers, scientists, explorers, and so on, who projected the image of the East in their literary and scholarly works and in their travelogues and documents. Students study particularly, but not exclusively, Orientalists like Sir William Jones, Simon Ockley, Sir Henry Hollad, Lady Mary Wortley Montagu, Sir Richard Burton, Godfrey Higgins, John Lewis Burckhardt, Eugene Delacroix, and others.

**LIR 637 From Modernism to Postmodernism: Readings in 20th Century British and American Fiction (3.0); 3 cr.** This course explores the ways in which British and American fiction have developed between the first and second halves of the twentieth century. The passage from modernism to postmodernism has been most obvious in literary discourse and the study of British and American narratives in these two periods will help not only understand this epochal shift in consciousness but will also place these narratives in their social and cultural frame. Authors include Anthony Burgess, John Fowles, Kurt Vonnegut, Norman Mailer, Thomas Pynchon, and others.

**LIR 640 Selected Topics and/or Figures (3.0); 3 cr.** This course aims at accommodating the students’ particular research interests.

**LIR 662 World Literature (3.0); 3 cr.** A study of major literary works by non-Anglo-Saxon authors.

**LIR 682 Seminar in Selected Topics (3.0); 3 cr.** An in-depth analysis of selected topics and themes as delineated in literature.

**LIR 699 Thesis (6.0); 6 cr.** The research for the master thesis must show the student’s proficiency in approved topics in literature.
The Degree of Master of Arts in English Language and Literature - Applied Linguistics and TEFL Emphasis

Mission
The mission of the M.A. in English Language and Literature is to deepen students’ knowledge of English literature and of the workings of the English language. Degree holders are equipped with the analytical and conceptual tools for further graduate study in English, or for a career in foreign language teaching, program administration, and communications.

Program Educational Objectives
The program will prepare students to:
• Develop an understanding of the process of foreign language acquisition and language learning;
• Build on their academic and professional experiences to make the link between linguistic theory and actual practice;
• Master pedagogical principles of course design, curriculum development, and language assessment in teaching English as a foreign language;
• Become researchers and reflect on Applied Linguistics as an academic field of inquiry.

Program Learning Outcomes
Upon graduation, students should be able to:
• Apply leading theories of second language learning and acquisition;
• Analyze their academic and professional experiences in light of the theories and latest trends in the field of second language acquisition;
• Demonstrate the application of pedagogical skills in writing instructional objectives, effectively planning classroom instruction, developing teaching material, and assessing learning;
• Plan research studies, collect and analyze data, and draw theoretical and practical conclusions using appropriate tools and methods;
• Construct a code of ethics to guide their professional and personal lives.

Admission Requirements
Preference is given to applicants with additional qualifications and professional experience (teaching). Applicants must provide evidence of a high level of proficiency in English before their application can be considered; a minimum of 600 in the EET (English Entrance Test) is required for admission. For those who take the GRE (Graduate Record Exam), proof of a satisfactory performance is required.

Graduation Requirements
To satisfy the requirements for the M.A. in English Language and Literature, Applied Linguistics and TEFL emphasis, the student must complete a total of 30 credits with an overall average of 3.0/4.0 including submitting and defending a thesis.

Major Requirements
These consist of the following: ENL 601, ENL 602, ENL 612, ENL 613, ENL 623, ENL 631, ENL 699.
Electives  6 cr.
Students may select electives from the following:
ENL 611, ENL 621, ENL 622, ENL 624, ENL 632, ENL 633, ENL 641,
EDU 681, EDU 682, EDU 683, EDU 684.
Graduate Courses: English Language and Literature  
Applied Linguistics and TEFL Emphasis

ENL 601 Bibliography and Methodology of Research (3.0); 3 cr. Studies the materials, tools, and methods of research.

ENL 602 Intro. to Applied Linguistics and Lang. (3.0); 3 cr. Introduces the fundamental concepts of language learning, and teaching.

ENL 603 Linguistics (3.0); 3 cr. A study of major trends and methodologies in linguistics.

ENL 611 Analytical English Grammar (3.0); 3 cr. Analyzes the problems of teaching grammar in light of current developments in the field.

ENL 612 Psycholinguistics (3.0); 3 cr. Emphasizes learners’ strategies L1 and L2 acquisition and motivation.

ENL 613 Sociolinguistics II (3.0); 3 cr. Studies the links between sociolinguistic theory and L2 acquisition.

ENL 621 Arabic Linguistics and Sociolinguistics (3.0); 3 cr. Emphasizes Arabic phonology, semantics, and syntax as well as language varieties in the Lebanese community.

ENL 622 Contrastive Analysis and Error Analysis (3.0); 3 cr. A classroom-based study of L1 (Arabic) and L2 (English) along with detailed analysis of Lebanese learners’ errors.

ENL 623 Language Teaching Methodology (3.0); 3 cr. Relates language-teaching theory to teaching aural/oral reading and writing skills. Corequisites: ENL 612, ENL 613.

ENL 624 Discourse Analysis (3.0); 3 cr. Emphasizes text analysis in order to produce relevant teaching material.

ENL 631 Measurement and Evaluation (3.0); 3 cr. Investigates linguistic tests and measurements and emphasizes test evaluation.

ENL 632 Syllabus and Materials Design (3.0); 3 cr. Studies syllabus design; EAP and ESP course designs are stressed. Corequisite: ENL 623.

ENL 633 Data Processing in L2 Teaching (3.0); 3 cr. Emphasizes the use and design of computer programming for L2 learning.

ENL 641 Field Methodology (3.0); 3 cr. Considers the theory and practice of training teachers of English as a foreign or second language. Prerequisite: ENL 623.

ENL 699 Thesis (6.0); 6 cr. Research for the master’s thesis must show the student’s proficiency in approved topics in applied linguistics.
The Degree of Master of Arts in Translation

Mission
The mission of the M.A. in Translation is to provide students with advanced training in preparation for employment in various translation fields. The program serves the needs and career goals of students and working professionals seeking to upgrade their knowledge in translation studies.

Program Educational Objectives
The program will prepare students to:

• Develop expertise in accurate translation and interpretation of texts from and/or to English, French, and Arabic;
• Become researchers, applying information literacy skills as a fundamental component of sound translation and interpretation;
• Pursue higher studies in a field commensurate with their knowledge of foreign languages and professional competences;
• Demonstrate a commitment to ethical, professional conduct over a lifetime of professional practice.

Interpretation emphasis students will meet the United Nations requirement of 500 hours in the interpretation booth.

Program Learning Outcomes
Upon graduation, students should be able to:

• Apply advanced analytical skills to the translation and interpretation of written and oral texts;
• Produce near-native fluency in the use of the program’s main languages of English, French, and Arabic;
• Construct a lexical glossary of technical and professional terms for ready translation in various areas such as law, economics, and media;
• Use software and technology as an aid to successful translation;
• Apply ethical behavior in their academic and professional training as translators and interpreters.

Admission Requirements
M.A. candidates must pass a written language proficiency test in French and Arabic. A grade of 70 or above is required in both exams. In addition, an interview in English, French, and Arabic is required. If only a small deficiency in one of the three languages is detected, remedial courses will be required during the first semester. A “B” grade must be obtained in the remedial courses.

Students admitted with a Bachelor degree other than Translation must take TRA 201 and TRA 311 or TRA 401 during the first semester and earn a B or higher.

Graduation Requirements
To satisfy the requirements for a Master of Arts in Translation/Interpretation, the student must complete 36 credits inclusive of thesis for the Translation emphasis with an over-all average of 3.0/4.0.
Degree Requirements (36 credits)

Translation Emphasis

**Major Requirements**  
24 cr.
TRA 610, TRA 620 or TRA 621, TRA 622, TRA 630, TRA 690, ENL 601.

Plus  
**8 credits** from the following pool:  
TRA 631, TRA 632, TRA 633, TRA 634, TRA 635, TRA 636, TRA 637, TRA 638, TRA 639.

**Electives**  
6 cr.
Choose 2 from the following: ENL 611, LIR 605, LIR 662, IAF 641, IAF 621, IAF 605, INT 610, or any two 600 level courses.

**Thesis**  
6 cr.
TRA 699 Thesis.

Interpretation Emphasis

**Major Requirements**  
30 cr.
Complete the following required courses: TRA 621, INT 610, INT 620, INT 621, INT 622, INT 623, INT 624, INT 625, INT 626.

**Electives**  
6 cr.
Choose 2 of the following: TRA 610, TRA 620, TRA 622, TRA 630, ENL 611, LIR 605, LIR 662, or any two 600 level BAD, COA or IAF courses.
Graduate Courses: Translation

INT 610 Consecutive and “A Vue” Translation Arabic-English-French (3.0); 3 cr. An advanced course with emphasis on language use.

INT 620 Conference I Arabic-English-French (4.0); 4 cr. An advanced course with emphasis on U.N. agencies, education and development texts. Students will observe at conferences.

INT 621 Conference II Arabic-French (4.0); 4 cr. Terminology and intensive practice in all aspects of medical translation and relevant scientific concepts.

INT 622 Conference III Arabic-English (4.0); 4 cr. Terminology and intensive practice in science and technology related to Middle East development. Students will sit in silent booth at conferences.

INT 623 Consecutive II: English-Arabic/Arabic-English (3.0); 3 cr. Aims to help students develop competence in advanced consecutive interpretation needed in analytical documents and technical presentations. Correct language is emphasized. Technical themes are covered. Accuracy is emphasized. Prerequisite: INT 610.

INT 624 Consecutive III: French-Arabic-English (3.0); 3 cr. Aims to help students develop competence in advanced consecutive interpretation needed in analytical documents and technical presentations. Correct language is emphasized. Technical themes are covered. Accuracy is emphasized. Prerequisite: INT 610.

INT 625 Conference IV: English-Arabic (3.0); 3 cr. Aims to help students develop competence in simultaneous interpretation needed in general or specialized conferences (General texts: NGOs, environment, social,…or legal texts) Students spend time both in class and in booth. Technical texts are covered. Prerequisite: INT 620.

INT 626 Conference V: French-Arabic-English (3.0); 3 cr. Aims to help students develop competence in simultaneous interpretation needed in general or specialized conferences (General texts: NGOs, environment, social,…or legal texts) Students spend time both in class and in booth. Technical texts are covered. Prerequisite: INT 620.

TRA 610 Advanced English Writing (3.0); 3 cr. Fine points of English writing including: clarity, accuracy style, proofreading and revision. It also a very useful resource to develop the practical writing skills to a very advanced level. This course builds upon the skills acquired in “English Writing Skills” to further develop students’ critical thinking and academic writing competencies. The course devotes a good part of the semester to the skills of writing summaries, critiques, and syntheses; paraphrasing and using quotations. It then leads students through the process of writing a research paper.

TRA 620 Linguistics for Translation Students (3.0); 3 cr. This course familiarizes students with the problems of linguistic specificity and translation. The nature and structure of language, its role in society, the theory and methods of linguistics: phonology, syntax, semantics and lexicon as applied in translation.

TRA 621 Comparative Stylistics and Advanced Translation Theory (3.0); 3 cr. In-depth analysis of the latest trends and theories in translation studies and of their application to various texts related to inter-linguistic transfer. By including translation-oriented, contrastive grammatical and stylistic analysis of Arabic, French, and English, the course aims to enrich students’ knowledge of the implementation of translation theories.

TRA 622 Terminology Arabic-English-French (3.0); 3 cr. History of Terminology.
The terminologist’s task. Terminology’s research methods. Use of documentation. Practical work in term research and subject field research. Intensive workshop approach treating both English, French and Arabic texts.

**TRA 630 Computer Assisted Translation (3.0); 3 cr.** Computer aids for translation, desktop publishing, terminology management. Machine and machine-assisted translation. This course introduces students to Computer Assisted Translation (CAT) highlighting its success and failure in comparison to human translation. In a first part, the course trains the students in the practical use of the computer assisted translation focusing on the problems, difficulties, advantages and shortcomings of this type of activity. In a second part, students are introduced to the latest translation software* and how to use them. The advantages as well as the limitations of such programmes are discussed with a special reference to the translation of scientific and literary texts.

**TRA 631 Advanced Translation of Literature Arabic-English (3.0); 3 cr.** Study and analysis of translated works. Translation into Arabic of a work, which was not previously translated. We focus on how we read and understand literature; how reading and writing literature influence identity, meaning and value; and how to develop strategies for reading, discussing, and writing about literary works in order to translate literary work properly.

**TRA 632 Advanced Translation of Literature Arabic-French (3.0); 3 cr.** Study and analysis of translated works. Translation into Arabic of a work which was not previously translated. We focus on how we read and understand literature; how reading and writing literature influence identity, meaning and value; and how to develop strategies for reading, discussing, and writing about literary works in order to translate literary work properly.

**TRA 633 Advanced Legal Translation Arabic-English (2.0); 2 cr.** Translation of highly specialized legal texts. Students gain an introduction to the theory and practice of Legal Translation, including the legal knowledge needed to make well-founded choices while translating. Furthermore, they are aware of the challenges involved in this particular area of specialist translation. Finally, students improve their translation skills and are able to use appropriate terminology to discuss problems they encounter.

**TRA 634 Advanced Legal Translation Arabic-French (2.0); 2 cr.** Translation of highly specialized legal texts. Students gain an introduction to the theory and practice of Legal Translation, including the legal knowledge needed to make well-founded choices while translating. Furthermore, they are aware of the challenges involved in this particular area of specialist translation. Finally, students improve their translation skills and are able to use appropriate terminology to discuss problems they encounter.

**TRA 635 Advanced Business & Economic Texts Arabic-English (2.0); 2 cr.** Translation of highly specialized business, economic, and administrative texts. Familiarize the student with current business practices, i.e., determining fees and negotiating contracts.

**TRA 636 Advanced Business & Economic Texts Arabic-French (2.0); 2 cr.** Translation of highly specialized business, economic, and administrative texts. Familiarize the student with current business practices, i.e., determining fees and negotiating contracts.

**TRA 637 Advanced Medical Translation Arabic-French-English (2.0); 2 cr.** Medical terminology and phraseology which would allow the translator to correctly translate medical texts. Relevant basic scientific concepts. Practice in translation in such areas as medical, pharmaceutical, communications, and science textbooks. Development of specialized glossaries in English, French & Arabic.
TRA 638 Advanced Translation of Media Arabic-English (2.0); 2 cr. Translation of various genres of media. This course introduces students to the linguistic varieties used in various media. It aims to develop a reasonable command of the language of media. It also offers students the opportunity to develop an understanding of cultural differences between English and Arabic and how to tackle them when translating. Translation strategies and media skills are given a reasonable emphasis.

TRA 639 Advanced Translation of Media Arabic-French (2.0); 2 cr. Translation of various genres of media. This course introduces students to the linguistic varieties used in various media. It aims to develop a reasonable command of the language of media. It also offers students the opportunity to develop an understanding of cultural differences between English and Arabic and how to tackle them when translating. Translation strategies and media skills are given a reasonable emphasis.

TRA 690 Internship (1.0); 1 cr. A supervised practicum designed to allow students to put their knowledge of translation and terminology to work in an actual translation service, mainly, in a business firm, social service agency, or government office. Weekly discussions of specific texts and problems arising from the field work experience. Supplementary written and laboratory assignments.

TRA 699 Thesis (6.0); 6 cr. The research for the master’s thesis must show the student’s ability to do original research in one of the following areas of translation studies. Terminology, Lexicology-lexicography, Translation studies.
Summer Arabic Program

Program Objective
Making the Arabic language (colloquial, formal, and written) accessible to students in the most efficient and beneficial way possible.

Program Overview
This program engages students in the culture of contemporary Lebanon, one of the world's most dynamic countries. Participants study at NDU, Lebanon, where the SAP program is set for teaching formal and colloquial Arabic at the preliminary, preparatory, intermediate, and advanced levels. Intensive personalized classroom instruction is supplemented by review sessions, individual tutorials, and daily practice with Lebanese conversation partners chosen mostly from NDU students and staff. Group excursions in Lebanon give students insight into Lebanese culture, society, and lifestyle, and provide students with opportunities to use their language skills with native speakers.

Program Duration
5 weeks: Classes begin the first week of July.
N.B.: Credits acquired in the SAP Sessions are transferable.

Admission Requirements
Anyone who is interested in the program is kindly requested to submit the following documents:

- Application form (downloaded from website www.ndu.edu.lb under Summer Arabic Program - Faculty of Humanities);
- Official transcript of grades (if applicable);
- Arabic language teacher’s recommendation (if applicable);
- Writing sample from the most recent Arabic course (if applicable);
- Non-refundable application fee of US$30 (check order made payable to Notre Dame University-Louaize, Lebanon);
- Application Deadline is June 15th.
Courses: Summer Arabic Program (SAP)

The SAP is made up of 4 levels:

Level I (Preliminary Arabic):

ARB 100 Emphasis A: The Formal Language; 3 cr. Designed to initiate non-Arabic-speaking students to the study of standard Arabic, the course aims at enabling foreign students to use and properly pronounce simple Arabic words and to listen, speak, read and write simple sentences. This course also offers a preliminary approach to Arabic grammar. Beginners need not have any previous knowledge of Arabic.

ARB 104 Emphasis B: The Spoken (Colloquial) Language - The Lebanese Dialect; 3 cr. Emphasis is placed on the elementary means of expression, the basics of pronunciation, and the knowledge of articulation. The course initiates speech and dialogue through audiovisual aids, periodic stays with families, programmed visits to industrial plants, shops, markets, cafes, and sight-seeing in groups or individually. Developing elementary vocabulary, learning proper pronunciation, getting the feel of the language. No previous knowledge of Arabic is required.

Level II (Preparatory):

ARB 203 Emphasis A: The Formal Language; 3 cr. This course introduces basic vocabulary and sentence structure in standard Arabic, and focuses on developing basic skills of listening, speaking, reading, and writing simple sentences that are used frequently. Designed to help non-Arabic speaking students study standard Arabic, the course aims at enabling foreign students to use simple Arabic words and basic phrases, to listen, speak, use and compose sentence structures, and to acquire the basics of Arabic grammar. Prerequisite: ARB 100 or equivalent.

ARB 204 Emphasis B: The Spoken (Colloquial) Language - The Lebanese Dialect; 3 cr. This course develops basic language skills used in day-to-day conversation. Exercises focus on structured practice in vocabulary, listening, and articulating. The content themes include: shopping, answering or making telephone calls, visiting a doctor, looking for a job, giving a present, attending wedding ceremonies, enjoying local cuisine, taking holidays, etc... Provides students with a rich package of selected vocabulary suitable for different occasions, helps students to adapt

Level III (Intermediate):

ARB 205 Emphasis A: The Formal Language; 3 cr. This course is designed to improve student’s writing and reading skills through the following approaches: in-depth applied study of grammar and parsing (قواعد النحو والاعراب); familiarity with figures speech and of style; development of advanced skills in pronunciation. The course aims at improving the student’s linguistic competence in preparation for further Arabic studies. Prerequisite: ARB 203 or equivalent.

ARB 202 Emphasis B: The Spoken (Colloquial) Language - The Lebanese Dialect; 3 cr. In this course the emphasis is placed on the basic means of expression and the basics of pronunciation and articulation. It introduces the students to speech and dialogue and to the description of facts and recounting of events through audiovisual aids, periodic stays with families, programmed visits to industrial plants, shops, markets, cafes, and sight-seeing in groups or individually, etc. Developing a basic vocabulary, learning proper pronunciation, getting the feel of the language. Prerequisite: ARB 104 or equivalent.
to social settings appropriate for different occasions. **Prerequisite:** ARB 202 or equivalent.

**Level IV (Advanced Arabic):**

**ARB 225 Emphasis A: The Formal Language; 3 cr.** This course focuses on further language skills in simple modern written styles through reading and writing together with improving fluency in oral communication. It includes the study of Arabic prose and poetry texts. Oral presentations and written reports are required. The aim of this course is to improve students’ ability to read, write, and understand correct, simple and practical modern Arabic. **Prerequisites:** The successful completion of Preparatory and Intermediate Arabic or their equivalents.

**ARB 226 Emphasis B: The Spoken (Colloquial) Language - The Lebanese Dialect; 3 cr.** In this course the student will practice holding conversations on common daily concerns. The content themes include: shopping, answering or making telephone calls, visiting a doctor, looking for a job, giving a present, learning adequate behavior at social occasions (etiquette for weddings, birthday parties, regular daily visits, enjoying local cuisine, taking holidays, etc.) The aim of this course is to give students the opportunity to develop their communication skills in the spoken language in order to achieve spontaneity in speech and a smooth social integration.
DEPARTMENT OF PSYCHOLOGY, EDUCATION, AND PHYSICAL EDUCATION

Professors: Abou Chedid, Kamal; Kfouri, Carol; Sabieh, Christine

Associate Professors: Akar, Bassel; Malek, Amal; Samra, Sami; Yaacoub, Youssef

Assistant Professors: Abou Jawdeh, Simon; Antoun, Ziad, (Fr.); Chibani, Wissam; Chikri, Roger, (Fr.); Ghosn Chelala, Maria; Eid, Patricia; Hage, Leslie; Keyrouz, Kaissar; Nassif, Nadim; Oueijan, Harvey; Kopaly, Toni; Mouchantaf, Maha; Tannous, Joseph, (Fr.); Van Loan, Amira

Senior Lecturer: Samrani, Diana

Teaching Diploma
The purpose of the Teaching Diploma program is to prepare school teachers.

The program is designed to cater to both the freshly-out-of-school, inexperienced graduate and the teacher who has already had some experience but who lacks scientific preparation.

The course material will cover the various aspects of teaching, regardless of the subject matter. Such aspects include general educational theories of acquisition, basic educational psychology, discipline and management in the classroom, testing and evaluating, and the different methods of the teaching-learning process.

Admission Requirements
To qualify for admission, a candidate must either be working towards a BA/BS degree, or hold a recognized B.A./B.S. degree in the following: English, Mathematics, Life Science, Physical Education, Chemistry, Physics, and Computer Science. All candidates must pass the EET with a minimum score of 500.

Recognition
The Government of Lebanon recognizes the Teaching Diploma as equivalent to the “License d’Enseignement” if the student holds the Lebanese Baccalaureate Part II and has successfully passed the number of credits required for the Diploma over and above the total number of credits required for the B.A./B.S. degree.

Graduation Requirements
In order to obtain the Teaching Diploma, students must successfully pass 21 credits with a GPA of 2.0/4.0 or above in the following courses:

EDU 201 Introduction to Education
EDU 313 Psychology of Education: Learning

And in 5 of the following courses:
EDU 343 Classroom Management
EDU 330 or 331 or 332 or 333 Curriculum Development and Evaluation
EDU 350 or 351 or 352 or 353 or 354 or 355 or 356 or 357 Methods of Teaching
EDU 430 or 431 or 432 or 433 or 434 or 438 Tests, Measurement and Evaluation
EDU 460 or 461 or 462 or 463 or 464 or 465 or 466 or 468 Teaching Practicum I
EDU 470 or 471 or 472 or 473 or 474 or 475 or 476 or 477 or 478 Teaching Practicum II

In addition, depending on their original Bachelor’s degree, English, Mathematics, Life Science, Physical Education, Chemistry, Physics, and Information Technology students must select an additional set of 3 courses suited to their discipline. NDU students may elect to begin their Teaching Diploma parallel to their degree program.

The purpose of the Teaching Diploma program is to prepare school teachers.

Teaching Diploma in Arabic Language and Literature

The program is designed to cater to both the freshly-out-of-school, inexperienced graduate and the teacher who has already had some experience but who lacks scientific preparation.

The course material will cover the various aspects of teaching Arabic. Such aspects include general educational theories of acquisition, basic educational psychology, discipline and management in the classroom, testing and evaluating, and the different methods of the teaching-learning process.

Admission Requirements
To qualify for admission, a candidate must either be working towards a B.A. degree in Arabic or hold a recognized B.A. degree in Arabic.

Recognition
The Government of Lebanon recognizes the Teaching Diploma as equivalent to the “License d’Enseignement” if the student holds the Lebanese Baccalaureate Part II and has successfully passed the number of credits required for the Diploma over and above the total number of credits required for the B.A. degree in Arabic.

Graduation Requirements
In order to obtain the Teaching Diploma, students must successfully pass 21 credits with a GPA of 2.0/4.0 or above in the following courses:

EDU 202 Introduction to Education (in Arabic)
EDU 314 Educational Psychology (in Arabic)
EDU 315 Literary Criticism (in Arabic)
EDU 345 Methods of Teaching Arabic Language and Literature (in Arabic)
EDU 359 Curriculum Design (in Arabic)
EDU 414 Writing Styles and Textual Analysis (in Arabic)
EDU 477 Practicum in Teaching Arabic (in Arabic)
Teaching Certificate

The Teaching Certificate program is designed to help school teachers conduct their classes scientifically. The candidate is not required to hold a university degree to join. This program will cater to elementary school teachers who are already teaching in a school but do not hold a university degree.

Admission Requirements
To qualify for admission, a candidate must hold a Lebanese Baccalaureate Part II or its equivalent. The candidate must prove English language proficiency by passing the EET with a minimum score of 500. The candidate must also sit for an oral interview before he/she can be admitted to the program.

Academic Requirements
In order to receive the Teaching Certificate, a candidate must successfully complete 18 credits with a GPA of 2.0/4.0 or above in 6 of the following courses:

- EDU 201 Introduction to Education
- EDU 313 Psychology of Education: Learning
- EDU 343 Classroom Management
- EDU 350 Methods of Teaching - Elementary Level
- EDU 430 Tests, Measurement and Evaluation - Elementary Level
- EDU 460 Elementary Teaching Practicum I
- EDU 470 Elementary Teaching Practicum II

Teaching Certificate in Arabic Language and Literature

The Teaching Certificate program is designed to help school teachers conduct their classes scientifically. However, this is not a graduate program: the candidate is not required to hold a university degree to join. This program will cater to elementary school teachers who are already teaching in a school but do not hold a university degree.

Admission Requirements
To qualify for admission, a candidate must hold a Lebanese Baccalaureate II or its equivalent. The candidate must prove Arabic language proficiency. The candidate must also sit for an oral interview before he/she can be admitted to the program.

Academic Requirements
In order to receive the Teaching Certificate, a candidate must complete 18 credits with a GPA of 2.0/4.0 or above in the following courses:

- EDU 202 Introduction to Education (in Arabic)
- EDU 314 Educational Psychology (in Arabic)
- EDU 315 Literary Criticism (in Arabic)
- EDU 345 Methods of Teaching Arabic Language and Literature (in Arabic)
- EDU 359 Curriculum Design (in Arabic)
- EDU 414 Writing Styles and Textual Analysis (in Arabic)
- EDU 477 Practicum in Teaching Arabic (in Arabic)
The Degree of Bachelor of Arts in Psychology

Mission
The mission of the B.A. in Psychology is to train students to be able to work within the community continuously evaluating the ways to create better adjustment within it in relation to psychological, physical, social, political and religious domains, by teaching them the fundamental concepts of psychology and training them in using psychological assessment tools, strategies and methods of intervention.

Program Educational Objectives
The graduates of the program should be able to:

• Lead a productive career in their chosen concentration area;
• Apply their learned skills to analyze current issues in psychology and propose means of addressing them;
• Work with professionals in organizations and various institutions that deal with various issues related to psychology.

Program Learning Outcomes
Upon graduation, students should be able to:

• Demonstrate knowledge of the major concepts, theoretical perspectives, empirical findings, and historical trends in psychology;
• Apply basic research methods, including research design, data analysis, and interpretation;
• Use psychological and physiological principles to personal, social, and organizational issues;
• Analyze the complexity of socio cultural diversity and interpret resulting data.

The psychology program at NDU is specifically developed to promote the ability to deliver service skills within the community. At the B.A. level, students will not be qualified to function independently as practicing psychologists; however, they will be able to cope with work in a community setting.

The program will train a student to be aware of problems that exist and of the possible approaches to resolve them. Using psychological assessment, strategies, and methods of intervention, the student will work within the community, continuously evaluating the ways to a better adjustment within it in relation to psychological, physical, social, political, and religious domains.

Admission Requirements
For a student to be admitted to the program, a grade of “C” or above is required in the following courses: PSL 201, STA 202, ENL 213, ENL 223.

Graduation Requirements
In order to graduate, a student must meet the General Education Requirements, and successfully complete a total of 97 credits with a minimum GPA of 2.0/4.0, and a minimum average of 2.3/4.0 in the major and concentration requirements.
Degree Requirements (97 credits)

Liberal Arts Core Curriculum 30 cr.
- Psychology students must take 30 credits of GERs.
- Psychology students will be required to take only 3 credits from the Cultural and Social Sciences category other than PSL 201.
- Psychology students must take STA 202 to fulfill the 3-credit requirement in Science and Technology.

Major Requirements 36 cr.
PSL 201, MAT 202, PSL 211, PSL 217, PSL 317, PSL 319, PSL 321, PSL 411, PSL 413, PSL 415, PSL 417, PSL 481.

Free Electives 1 cr.

Concentration - Clinical 30 cr.
PSL 310, PSL 315, PSL 213, PSL 230, PSL 382, PSL 484, PSL 215, PSL 345, PSL 320, PSL 323.

Concentration - Industrial 30 cr.
PSL 322, BAD 201, PSL 362, PSL 323, PSL 332, BAD 317, PSL 386, PSL 215, BAD 427, PSL 424.

Concentration - Educational 30 cr.
PSL 313, PSL 315, PSL 213, PSL 324, EDU 422, EDU 350, EDU 330 (EDU 331, EDU 332 or EDU 333), PSL 385, EDU 362, PSL 345.
Minor in Psychology (18 cr.)

A minor in psychology is merited upon successful completion of 18 credit hours in psychology. The passing grade per course is “C”.

Students majoring in a bachelor degree and who have already passed Psychology 201 with a “C” are required to take 15 credits of Psychology from the courses listed below.

The program of the minor in Psychology consists of the six courses below:

- PSL 201 Introduction to Psychology;
- PSL 211 Psychology of the Young Child;
- PSL 217 Personality Psychology;
- PSL 319 Abnormal Psychology;
- PSL 345 Counseling Psychology;
- PSL 481 Undergraduate Seminar in Psychology.
Undergraduate Courses: Psychology

PSL 101 Principles of Psychology (3.0); 3 cr. Introduces students to the basic concepts of psychology. Topics include learning, memory, motivation, and habits. For Freshman students.

PSL 201 Introduction to Psychology (3.0); 3 cr. Offers a critical survey of general topics, principles, and findings of modern psychology.

PSL 211 Psychology of the Young Child (3.0); 3 cr. Covers the study of the individual from conception through the early school years. Emphasis is placed on the child between 3 and 5 years old.

PSL 213 Psychology of Learning (3.0); 3 cr. Introduces various principles and theories of learning and memory. Prerequisite: PSL 201.

PSL 215 Social Psychology (3.0); 3 cr. Explores the perceptions and attributions of social influences e.g., prejudice, love, aggression, attitude, etc. The construction of the Self in a social context is emphasized. Prerequisite: PSL 201.

PSL 217 Psychology of Personality (3.0); 3 cr. Examines personality theories, methods and applications to social and clinical concerns. Classic theories of personality are discussed including psychoanalytic, behavioral, trait, humanistic, cognitive and social roles are explored and evaluated. Prerequisite: PSL 201.

PSL 230 Theories of Psychotherapy (3.0); 3 cr. Places an emphasis on understanding the theories and techniques of psychotherapy. Topics considered will involve individual, family, and group therapy. Prerequisite: PSL 201.

PSL 310 Psychology of the Family (3.0); 3 cr. Explores relations between the individual and the family within a community. Focus is placed on diverse family patterns due to social class, race, ethnicity, and gender within a historical and sociopolitical context. By examining epidemiological, cross cultural, and clinical data, a student is introduced to intervention techniques to reduce malfunction and/or abusive situations. Prerequisite: PSL 201.

PSL 313 Psychology of Adolescence (3.0); 3 cr. Introduces theories and research on social, cognitive, sexual, and identity development in adolescence in order to promote a healthier adult. Implications within the community are a major focus. Prerequisite: PSL 201.

PSL 315 Sensation and Perception (3.0); 3 cr. Examines the basic knowledge and theories concerning the central nervous system, mainly the brain, its functions and disorders relates them to the higher cognitive functions of the human being. The brain’s functions are linked to psychological disorders and pharmacology. Prerequisites: PSL 201, PSL 217.

PSL 317 Cognitive Psychology (3.0); 3 cr. Addresses the current theoretical and experimental foundations concerning how humans acquire and use knowledge. Piaget, Bruner, and Uygotsky theories of cognitive growth are studied. Topics discussed include the development of language, reasoning, problem solving, creativity, and intelligence. Prerequisite: PSL 201.

PSL 319 Abnormal Psychology (3.0); 3 cr. Introduces factors behind abnormal behavior and resulting disorders. Emphasis is on theories, etiology, classifications and various modalities of treatments. Prerequisites: PSL 201, PSL 217.

PSL 320 Psychopathology (3.0); 3 cr. Focuses on psychological and/or organic determinants of behavior disorders. Prerequisite: PSL 319.
PSL 321 Experimental Psychology (3.0); 3 cr. Introduces the research process in psychology. Topics include methodology, data collection, descriptive statistics, analysis, and report writing. Prerequisites: STA 201, PSL 213 or PSL 317.

PSL 322 Industrial Psychology (3.0); 3 cr. Applies a socio-psychological approach to an individual in a work setting. Topics discussed include management in an organization to promote productivity, change, role definition, and leadership qualities. Prerequisite: PSL 201.

PSL 323 Deviance (3.0); 3 cr. Focuses on the psychopathological behavior in its social context. Questions about normality and abnormality studied. Topics include juvenile delinquency, rape, substance abuse, psychopathy, sociopathy, sexual pathologies such as all the paraphilias (fetishism, exhibitionism...). Forensic psychology and criminal profiling are also tackled. Prerequisites: PSL 201, PSL 217.

PSL 324 Educational Psychology (3.0); 3 cr. Introduces basic principles of psychology applied to the field of education. Topics include learning and instruction, motivation, classroom management, and testing and evaluation. Prerequisite: PSL 201.

PSL 332 Personnel and Human Factors in the Work Community (3.0); 3 cr. Addresses the human capabilities, needs, and limitations within a system. Concentration on job analysis, satisfaction, testing, training, group dynamics, leadership and social influence, motivation, equipment design. Consumer behavior and its effect on productivity and work quality within the community are examined. Prerequisite: PSL 322.

PSL 345 Counseling Psychology (3.0); 3 cr. Prevention of psychological crisis is the focus of the course. Practices of the various schools of psychology are explored such as behaviorism, psychoanalysis, phenomenology, rational emotive therapy, Existentialism and other contemporary theories. Prerequisite: PSL 217.

PSL 362 Psychology of Work and Law (3.0); 3 cr. This course provides an introduction to the application of psychological methodology and research on practical and applied problems. Areas concerned include marketing, advertising, management, and law. Psychological human factors serve as background to this course. Prerequisite: PSL 201.

PSL 382 Practicum I: Clinical (1.3); 3 cr. Provides a student with supervised work experience within his/her concentration. Specific duties during the internship will be determined by the department and the institution supervisor. Prerequisite: PSL 201.

PSL 385 Practicum I: Educational (1.3); 3 cr. Provides a student with supervised work experience within his/her concentration. Specific duties during the internship will be determined by the department and the institution supervisor. Prerequisite: Junior or Senior standing.

PSL 386 Practicum I: Industrial (1.3); 3 cr. Provides a student with supervised work experience within his/her concentration. Specific duties during the internship will be determined by the department and the institution supervisor. Prerequisite: Junior or Senior standing.

PSL 411 Stress Causes, Consequences and Management (3.0); 3 cr. Introduces the concept of stress in a bio-psycho-social approach. The impact of stress on the immune system are also covered including the psycho-neuro-immunology, stress outcomes, and coping. Prerequisite: PSL 201.

PSL 413 History and Systems of Psychology (3.0); 3 cr. Surveys the major schools of psychology; introducing the major psychologists and approaches within the field to give students an understanding of how psychology developed into a science. Prerequisite: PSL 201.
PSL 415 Intelligence Testing (3.0); 3 cr. Allows the student to gain knowledge of the skills needed in administering, scoring and interpreting intelligence tests. Test focus will be on WAIS for adults, WAIS for children, and the Stanford Binet. Prerequisites: STA 202, PSL 211, PSL 317.

PSL 417 Personality Assessment (3.0); 3 cr. Allows the students to gain knowledge of the skills needed to use the various instruments in assessing personality. Emphasis is on research and methodological steps in evaluating an individual’s personality. Prerequisites: STA 202, PSL 217, PSL 319.

PSL 424 Community Psychology (3.0); 3 cr. Concentrates on the interaction between individual and environment. Emphasis is placed on various models of intervention as they relate to both individual and community needs. Topics include poverty, prejudice, diversity, change, personal space, crowding, territoriality, and social stress. Prerequisites: PSL 215, PSL 322.

PSL 481 Undergraduate Seminar in Psychology (3.0); 3 cr. This course focuses on selected topics in psychology, varying from year to year depending on student, community and curriculum needs and on availability of professionals in relation to selected topics. Senior Standing.

PSL 484 Practicum II: Clinical (1.3); 3 cr. Provides students with supervised work experience within their concentration. Specific duties during the internship will be determined by the department and the institution supervisor. Prerequisite: Junior or Senior standing.

PSL 491 Special Topics in Psychology (3.0); 3 cr. This course is designed to be given to a student either independently or in a group setting. Topic reading and research is supervised by a faculty member. Prerequisites: STA 202, PSL 321, Senior standing.
The Degree of Bachelor of Arts in Education - Basic Education with Teaching Diploma

Mission
The mission of the B.A. in Education - BASIC EDUCATION is to train students lead a productive career in their chosen concentration area, by educating them in the fundamental concepts of education.

Program Educational Objectives
The graduates of the program should be able to:
- Lead a productive career in their chosen concentration area;
- Apply their learned skills to analyze current issues in education and propose means of addressing them;
- Contribute to the improvement of the education practices and methodologies;
- Work with educational professionals in organizations and government offices that deal with various educational issues.

Program Learning Outcomes
Upon graduation, students should be able to:
- Identify the foundations and basic elements of educational theory;
- Recognize and address issues related to student learning;
- Distinguish between the various learning styles for effective teaching;
- Apply managerial and pedagogical skills in class sessions;
- Demonstrate skills in working with students of varying abilities and special needs;
- Plan culturally diverse learning activities.

The B.A. in Education - Basic Education focuses on preparing school teachers for Grade 1 to 9 to confront the issues of basic education. The official decree for this degree recognizes two separate degrees: a B.A. - Basic Education (99 credits) and a Teaching Diploma (21 credits).

Option I: For students who plan on a teaching career in Education - Basic Education (120 credits)

Graduation Requirements (120 credits)

Students must complete a total of 120 credits with a minimum overall GPA of 2.0/4.0 and a minimum average of 2.4/4.0 in the core and major requirements.

Liberal Arts Core Curriculum 30 cr.

Core Requirements 54 cr.
EDU 201, EDU 213, EDU 301, EDU 303, EDU 311, EDU 313, EDU 340,
EDU 343, EDU 350, EDU 360, EDU 361, EDU 362, EDU 401, EDU 420,
EDU 430, EDU 460, EDU 470, ENL 311.

Major Requirements 18 cr.
EDU 330.
Track 1 (English and Social Studies):
EDU 351, EDU 354, EDU 431, EDU 434, EDU 480, EDU 481, EDU 484.

Track 2 (Mathematics and Sciences):
EDU 352, EDU 353, EDU 432, EDU 433, EDU 480, EDU 482, EDU 483.

**Major Electives**
9 cr.

Three courses from a pool:
EDU 322, EDU 342, EDU 344, EDU 412, EDU 413, EDU 422, ENL 322,
MUE 335, MUE 446.

**Free Electives**
9 cr.

**Option II: For students who wish to acquire a B.A. in Education - Basic Education without a Teaching Diploma (99 credits)**

**Graduation Requirements (99 credits)**

Students must complete a total of 99 credits with a minimum overall GPA of 2.0/4.0 and a minimum average of 2.4/4.0 in the core and major requirements.

**Liberal Arts Core Curriculum**
30 cr.

**Core Requirements**
33 cr.
EDU 201, EDU 301, EDU 303, EDU 311, EDU 313, EDU 340, EDU 343,
EDU 350, EDU 361, EDU 362, EDU 430.

**Major Requirements**
18 cr.
EDU 330.
Track 1 (English and Social Studies):
EDU 351, EDU 354, EDU 431, EDU 434, EDU 480, EDU 481, EDU 484.
Track 2 (Mathematics and Sciences):
EDU 352, EDU 353, EDU 432, EDU 433, EDU 480, EDU 482, EDU 483.

**Major Electives**
9 cr.
Three courses from a pool:
EDU 321, EDU 322, EDU 344, EDU 412, EDU 422, ENL 322.

**Free Electives**
9 cr.

**Option III: For students who have obtained the 99-credit B.A. in Education - Basic Education and wish to acquire a Teaching Diploma (21 credits)**

**Courses**
21 cr.
EDU 213, EDU 311, EDU 360, EDU 401, EDU 420, EDU 460, EDU 470.
Undergraduate courses: Education

EDU 101 Education for life (3.0); 3 cr. As an introductory course in education, students will discuss and write about aims of education, curriculum development, learning and teaching, and assessment. Topics will also consider cultural, historical, and philosophical dimensions. Activities aim to promote critical thinking, reflection, and dialogue. For Freshman students only.

EDU 201 Introduction to Education (3.0); 3 cr. Introduces the history and philosophy of education, structure and components of the school, and the role of the teacher.

EDU 202 Introduction to Education (2.0); 2 cr. Introduces the history and philosophy of education, structure, and components of the school, and the role of the teacher. (In Arabic)

EDU 212 Sociological Perspectives on Schools (3.0); 3 cr. Aims to give students a thorough understanding of pupils and current procedures in the classroom. Corequisite: EDU 201.

EDU 213 Human Growth and Development (3.0); 3 cr. Introduces students to the field of developmental psychology and its influence on education. Corequisite: EDU 201.

EDU 203 Lebanese Arabic Sign Language I (3.0); 3 cr. Introduces the student to basic Lebanese Arabic sign language communication. The history of sign language will be covered as well as the important aspects of hearing impaired culture. Students will learn basic sign vocabulary, finger spelling, and numbers. Fluency in spoken Arabic language is required.

EDU 214 Youth in Contemporary Society (3.0); 3 cr. Aims at developing an awareness of the Lebanese adolescent society by focusing on psychological and social development of the adolescent. Corequisite: EDU 201.

EDU 301 Introduction to Arts Education (3.0); 3 cr. Involves both a practical and a theoretical approach to dance, music and visual art in the community. Corequisite: EDU 201.

EDU 302 Introduction to the Education of the Mentally Disabled (3.0); 3 cr. Involves the diagnosis, classification, learning potential, and general characteristics of the disabled child. Corequisite: EDU 201.

EDU 303 Introduction to the Education of Students with Learning Disabilities (3.0); 3 cr. This course introduces the student to the indicators of learning disabilities and the means of diagnosing children with learning disabilities. Methods of teaching students with learning disabilities will be practiced. Strategies to include students with disabilities in mainstream elementary classrooms will also be examined. Observation of inclusive classrooms will be required. Corequisite: EDU 201.

EDU 311 Children’s Literature (3.0); 3 cr. Introduces criteria for selection of children’s literature, children’s reading interests and preparation of materials. Corequisite: EDU 201.

EDU 313 Psychology of Education: Learning (3.0); 3 cr. Learning and its relation to growth and development. Surveys the theories of learning and their pedagogical implications. Corequisite: EDU 201.

EDU 314 Educational Psychology (3.0); 3 cr. Examines the interrelationship between education and psychology, presents the theoretical and practical perspectives of teaching, and compares the Western to the Arab theories and views. (In Arabic)

EDU 315 Literary Criticism (3.0); 3 cr. Introduces a wide variety of literary disciplines
and methods and applies these disciplines to selected ancient and modern texts. (In Arabic)

EDU 322 Education of Talented and Gifted Students (3.0); 3 cr. Offers theoretical background and practical concerns for educating exceptionally able students. Corequisite: EDU 313.

EDU 323 Behavioral Problems of Exceptional Students (3.0); 3 cr. Introduces teaching methods appropriate to the needs of students with emotional and behavioral problems. Corequisite: EDU 313.

EDU 324 Counseling in Special Education (3.0); 3 cr. Presents approaches to working with exceptional individuals and their parents in the school, home and community. Corequisite: EDU 313.

EDU 325 The Needs of the Disabled (3.0); 3 cr. Is designed to develop awareness of the educational needs of the disabled and the competencies to meet those needs. Corequisite: EDU 313.

EDU 330 Curriculum Development and Evaluation: Elementary (3.0); 3 cr. Examines basic elements and foundations of a curriculum. Emphasis is on the elementary level. Corequisite: EDU 313.

EDU 331 Curriculum Development and Evaluation: Secondary (3.0); 3 cr. Same as EDU 330 but emphasizes the secondary level. Corequisite: EDU 313.

EDU 332 Curriculum Development and Evaluation: Early Childhood (3.0); 3 cr. Same as EDU 330 but emphasizes early childhood. Corequisite: EDU 313.

EDU 333 Curriculum Development and Evaluation: the Disabled (3.0); 3 cr. Same as EDU 330 but emphasizes students with learning disabilities. Corequisite: EDU 313.

EDU 340 Teaching Reading Skills (3.0); 3 cr. This course focuses on the current philosophies and teaching approaches used to teach reading in the elementary school. Phonemic awareness, phonics instruction, vocabulary development, fluency and comprehension will be emphasized as they are considered critical elements in the development of literacy. Students will also explore the methods of teaching reading of English to students from a bi-lingual or tri-lingual background. Corequisite: EDU 201.

EDU 341 Reading Skills for the Gifted (3.0); 3 cr. Focuses on the special reading skills of gifted students. Current programs and teaching approaches are critically examined. Corequisite: EDU 313.

EDU 342 Instructional Strategies for the Disabled (3.0); 3 cr. Provides techniques for teaching the disabled, such as basic stimulus control, positioning, eating, toileting, etc. Corequisite: EDU 313.

EDU 343 Classroom Management (3.0); 3 cr. Examines the role of the teacher in a classroom situation: teacher-student interaction and variations in class activities. Corequisite: EDU 201.

EDU 344 School Libraries (3.0); 3 cr. Introduces library skills and provides students with ideas related to the structuring and enrichment of library material. Corequisite: EDU 201.

EDU 345 Methods of Teaching Arabic Language and Literature (3.0); 3 cr. Examines the most recent methods of teaching Arabic. Aims to develop the teachers abilities to motivate and inspire students. (In Arabic)

EDU 350 Methods of Teaching: Elementary (3.0); 3 cr. Provides principles and techniques of language, arithmetic, and science teaching in the elementary classes. Corequisite: EDU 313.

EDU 351 Methods of Teaching English as Foreign Language (3.0); 3 cr. Same
as EDU 350 but focuses on the teaching of the four language skills at various learning stages. *Corequisite:* EDU 313.

**EDU 352 Methods of Teaching Mathematics (3.0); 3 cr.** Examines methods of teaching mathematics: educational objectives, mathematical logic and teaching aids. *Corequisite:* EDU 313.

**EDU 353 Methods of Teaching Science (3.0); 3 cr.** Examines methods of teaching science: educational objectives, basic concepts, lab skills and teaching aids. *Corequisite:* EDU 313.

**EDU 354 Methods of Teaching Social Studies (3.0); 3 cr.** Deals with different approaches to teaching history, geography and civics. *Corequisite:* EDU 313.

**EDU 355 Methods of Teaching: Early Childhood (3.0); 3 cr.** Methods and materials for the young child’s learning: the use of manipulative and multi-sensory materials. *Corequisite:* EDU 313.

**EDU 356 Methods of Teaching: the Handicapped (3.0); 3 cr.** Methods for handicapped students: curriculum needs, teaching techniques and behavior management. *Corequisite:* EDU 313.

**EDU 357 Methodology of Teaching: Learning Disabilities (3.0); 3 cr.** Introduces dimensions of learning disabilities: identification, characteristics, development, habilitation. *Corequisite:* EDU 313.

**EDU 358 Education for Peace (3.0); 3 cr.** The main focus of the course will be a study of the educator’s responsibility in educating for peace and in appropriately integrating peace components into Lebanese schools’ curricula. Students will identify the premises and components into Lebanese schools’ curricula. Students will identify the premises and challenges of peace education programs, especially within the Lebanese culture.

**EDU 359 Curriculum Design (2.0); 2 cr.** Examines basic elements and foundations of the curriculum of Arabic language and literature in K-12 classes. (In Arabic)

**EDU 360 Instructional Technology (3.0); 3 cr.** The practical application of audio-visual materials, the operation and maintenance of equipment, and the construction of aids.

**EDU 361 Applications of Computers in Teaching (3.0); 3 cr.** The implications of computer application in the classroom. Students will learn software evaluation skills.

**EDU 362 Education and the Lebanese Law (3.0); 3 cr.** Studies the various laws in the Lebanese Constitution that determine the educational process in Lebanon.

**EDU 366 Instructional Technology (3.0); 3 cr.** The practical application of audio-visual materials, the operation and maintenance of equipment, and the construction of aids.

**EDU 367 Learning and Human Interaction (3.0); 3 cr.** Examines gender and communication and the relationship of gender to self-disclosure, self assertion, listening and empathy.

**EDU 368 Early Childhood General Health, Nutrition and Safety (3.0); 3 cr.** Investigates effective techniques for dealing with health, safety and nutrition in early childhood education.
EDU 414 Writing Styles and Textual Analysis (3.0); 3 cr. Surveys a variety of writing styles. It aims to develop the students’ ability to write and analyze texts based on content and style. (In Arabic)

EDU 420 Crisis Intervention (3.0); 3 cr. Examines the crisis intervention services in community health, mental health, substances misuse, and child welfare.

EDU 421 Children at Risk (3.0); 3 cr. Identifies potential risks to which children may be exposed. Also shows how the teacher, school and community can cooperate with child to foster a positive sense of worth and ability.

EDU 422 Learning and Behavioral Difficulties (3.0); 3 cr. Presents adaptive teaching/learning procedures. Also prescribes instructional strategies and techniques.

EDU 430 Tests, Measurement and Evaluation: Elementary (3.0); 3 cr. Critically examines the basic principles and techniques of testing and evaluation on the elementary level. Corequisite: EDU 350.

EDU 431 Tests, Measurement and Evaluation in English (3.0); 3 cr. A critical examination of the basic principles and techniques of testing and evaluation in English. Corequisite: EDU 351.

EDU 432 Tests, Measurement and Evaluation in Mathematics (3.0); 3 cr. Same as EDU 431 but relates to the testing of mathematics. Corequisite: EDU 352.

EDU 433 Tests, Measurement and Evaluation in Science (3.0); 3 cr. Same as EDU 431 but relates to the testing of science subjects. Corequisite: EDU 353.

EDU 434 Tests, Measurement and Evaluation in Social Studies (3.0); 3 cr. Same as EDU 431 but relates to the testing of social studies. Corequisite: EDU 354.

EDU 438 Tests, Measurement and Evaluation in Arabic (3.0); 3 cr. Same as EDU 431 but relates to the testing of Arabic language.

EDU 450 Law and the Disabled (3.0); 3 cr. Discusses relevant laws pertaining to the disabled.

EDU 451 Clinical Assessment in the School (3.0); 3 cr. Studies the nature of psychological tests, standardization procedures, and types of scales and scores.

EDU 460 Elementary Teaching Practicum I (1.2); 3 cr. Guided and supervised practice in the application of elementary level teaching methods. Part I. Corequisite: EDU 430.

EDU 461 English Teaching Practicum I (1.2); 3 cr. Same as EDU 460 but involves the teaching of English. Part I. Corequisite: EDU 431.

EDU 462 Mathematics Teaching Practicum I (1.2); 3 cr. Same as EDU 460 but involves the teaching of mathematics. Part I. Corequisite: EDU 432.

EDU 463 Science Teaching Practicum I (1.2); 3 cr. Same as EDU 460 but involves the teaching of science subjects. Part I. Corequisite: EDU 433.

EDU 464 Social Studies Teaching Practicum I (1.2); 3 cr. Same as EDU 460 but involves the teaching of social studies. Part I. Corequisite: EDU 434.

EDU 465 Early Childhood Teaching Practicum I (1.2); 3 cr. Same as EDU 460 but deals with teaching on the early childhood level. Part I. Corequisite: EDU 430.

EDU 466 Teaching of the Disabled Practicum I (1.2); 3 cr. Same as EDU 460 but deals with the teaching of the handicapped. Part I. Corequisite: EDU 356.
EDU 468 Arabic Teaching Practicum I (1.2); 3 cr. Same as EDU 460 but involves the teaching of the Arabic language.

EDU 470 Elementary Teaching Practicum II (1.2); 3 cr. Similar to EDU 460. Part II. Corequisite: EDU 460.

EDU 471 English Teaching Practicum II (1.2); 3 cr. Similar to EDU 461. Part II. Corequisite: EDU 461.

EDU 472 Mathematics Teaching Practicum II (1.2); 3 cr. Similar to EDU 462. Part II. Corequisite: EDU 462.

EDU 473 Science Teaching Practicum II (1.2); 3 cr. Similar to EDU 463. Part II. Corequisite: EDU 463.

EDU 474 Social Studies Teaching Practicum II (1.2); 3 cr. Similar to EDU 464. Part II. Corequisite: EDU 464.

EDU 475 Early Childhood Teaching Practicum II (1.2); 3 cr. Similar to EDU 465. Part II. Corequisite: EDU 465.

EDU 476 Teaching of the Disabled Practicum II (1.2); 3 cr. Similar to EDU 466. Part II. Corequisite: EDU 466.

EDU 477 Practicum in Teaching Arabic (3.0); 3 cr. Aims to develop students’ ability not only to develop lesson plans but also to follow them across all school levels. (In Arabic)

EDU 478 Arabic Teaching Practicum II (1.2); 3 cr. Similar to EDU 468 Part II. Corequisite: EDU 468.

EDU 480 Elementary Teaching Internship (1.0); 1 cr. The student will choose a pedagogical issue, discuss its treatment/application in schools and present a written report.

EDU 481 English Teaching Internship (1.0); 1 cr. Same as EDU 480 but with emphasis on the teaching of English as a foreign language.

EDU 482 Mathematics Teaching Internship (1.0); 1 cr. Same as EDU 480 but with emphasis on the teaching of mathematics.

EDU 483 Science Teaching Internship (1.0); 1 cr. Same as EDU 480 but with emphasis on the teaching of science subjects.

EDU 484 Social Studies Teaching Internship (1.0); 1 cr. Same as EDU 480 but with emphasis on the teaching of social studies.

EDU 485 Early Childhood Teaching Internship (1.0); 1 cr. Same as EDU 480 but with emphasis on early childhood.

EDU 486 Teaching of the Disabled Internship (1.0); 1 cr. Same as EDU 480 but with emphasis on the teaching of the handicapped.

EDU 487 Counseling and Guidance Internship (1.0); 1 cr. Same as EDU 480 but with emphasis on counseling and guidance.

EDU 488 Arabic Teaching Internship (3.0); 3 cr. Same as EDU 480 but with emphasis on the teaching of Arabic.
The Degree of Bachelor of Arts in Physical Education and Sport

Mission
The mission of the B.A. in Physical Education & Sport is to prepare students to pursue a career as teachers, coaches, or trainers by increasing their theoretical knowledge, developing their practical skills in various sports activities.

Program Educational Objectives
The graduates of the program should be able to:

• Lead a productive career in physical education and sports;
• Apply the theoretical and practical skills learned to the different sports curricula;
• Participate in the development of a Lebanese sports culture.

Program Learning Outcomes
Upon graduation, students should be able to:

• Define the basic theoretical subjects of physical education and sports;
• Demonstrate evidence of expertise in various sports activities, including sports required in international baccalaureate programs;
• Employ a problem based approach to motor performance and motor learning;
• Utilize basic research skills in the field of sports science;
• Apply skills and knowledge in the areas of first aid, CPR and personal safety;
• Develop a sense of community service;
• Analyze the application of scientific mechanisms to the field of sports;
• Relate the application of social, economic, political, and psychological domains to the field of sports.

The B.A. in Physical Education and Sport is designed to meet the needs of those who plan on pursuing careers as teachers, coaches, or trainers. Students majoring in Physical Education and Sport must also study for their Teaching Diploma (TD) in Physical Education. The B.A. in Physical Education will increase students’ theoretical knowledge, develop students’ practical skills in various sports activities, including sports required in international baccalaureate programs, instill a commitment to health and fitness, and prepare students to practice their skills and compete in the job market.

• Students must either pass PES 321 before taking major elective courses or register concurrently in PES 321 and other major elective courses;
• Courses are part lecture and part activity.

Graduation Requirements
To graduate, students must successfully complete a total of 120 credits with a minimum overall GPA of 2.0/4.0 and a minimum average of 2.4/4.0 in the core and major requirements.

Degree Requirements
(120 credits: Major courses 99 cr. and TD 21 cr.)

Liberal Arts Core Curriculum 30 cr.

Core Requirements 33 cr.
PES 204, PES 205, PES 250, PES 301, PES 321, PES 354, PES 358, PES 420, PES 421, PES 422, PES 426, PES 462, PES 492.
Major Electives
6 courses from the following pool:
PES 326, PES 327, PES 328, PES 329, PES 330, PES 331, PES 332, PES 347.

10 courses from the following pool:

Free Electives
4 cr.

Teaching Diploma
21 cr.

Minor in Physical Education and Sport (15 credits)

The minor in Physical Education and Sport offers students a basic understanding of major concepts in PES through classroom and field courses. PES is a domain which brings together sport science courses as well as courses whose objective it is to encourage physical fitness and wellness in others.

Curriculum Requirements
Students enrolled in the Physical Education minor must complete 15 credits of PES courses as follows:

**PES 204** Foundations of Physical Education (3.0); 3 cr.
PES 321 Physical Exercise (2.0); 2 cr.

**One 3-credit course**
PES 301 Anatomical Kinesiology (3.0); 3 cr.
**OR**
PES 358 Physiology of Exercise (3.0); 3 cr.

**One 3-credit course**
PES 421 Coaching (3.0); 3 cr.
**OR**
PES 422 Biomechanics (3.0); 3 cr.

**One individual sports course from the following pool of courses (2.0); 2 cr.**
PES 333 Swimming I, PES 322 Dancing, PES 335 Track and Field I, PES 336 Track and Field II, PES 337 Track and Field III, PES 329 Tennis, PES 330 Badminton, PES 331 Table Tennis, PES 332 Weight-lifting, PES 338 Combat Sports I, PES 339 Combat Sports II, PES 340 Gymnastics I.

**One team sports course from the following pool of courses (2.0); 2 cr.**
PES 326 Basketball, PES 327 Volleyball, PES 328 Football, PES 347 Handball.
Undergraduate Courses: Physical Education and Sport

PES 204 Foundations of Physical Education (3.0); 3 cr. This course examines the historical, philosophical, and sociological foundations of sport and serves as an introduction to the physical education, exercise and sport-related fields. The course will also incorporate contemporary trends and issues. This course should be taken during the first academic year.

PES 205 Physical Therapy and Athletic Injuries (3.0); 3 cr. The student will learn a wide variety of rehabilitation and physical therapy techniques in relation to injuries associated with sports activities, their prevention and care. The material will also cover basic first aid and CPR.

PES 250 Motor Development & Motor Learning (3.0); 3 cr. This course explores specific principles of learning and the control of movement and motor skills. Students will also study the neurophysiological activation of muscles, reflexes, etc. during movement.

PES 301 Anatomical Kinesiology (3.0); 3 cr. An understanding of human anatomy and basic mechanical principles related to efficient movement.

PES 310 Karate (1.0); 1 cr. Basic skills, refereeing, training - theory and practice.

PES 311 Basketball (1.0); 1 cr. Basic skills, rules, refereeing, training - theory and practice.

PES 312 Volleyball (1.0); 1 cr. Basic skills, refereeing, training - theory and practice.

PES 313 Football (1.0); 1 cr. Basic skills, refereeing, training - theory and practice.

PES 314 Handball (1.0); 1 cr. Basic skills, refereeing, training - theory and practice.

PES 315 Tennis (1.0); 1 cr. Basic skills, refereeing, training - theory and practice.

PES 316 Racquet Sports (1.0); 1 cr. (squash, table-tennis, badminton) basic skills, rules, refereeing, training - theory and practice.

PES 317 Tae-Kwon-Do (1.0); 1 cr. Basic skills, refereeing, training - theory and practice.

PES 318 Swimming (2.0); 2 cr. Basic swimming strokes, diving, and swimming competitions.

PES 319 Judo (1.0); 1 cr. Basic skills, refereeing, training - theory and practice.

PES 320 Water-Polo (1.0); 1 cr. Basic skills, refereeing, training - theory and practice.

PES 321 Physical Exercise (2.0); 2 cr. (Aerobics, stretching, etc.) basic skills, rules, training - theory and practice.

PES 322 Dancing (2.0); 2 cr. Beginning skills in dance techniques - classical and modern.

PES 323 Weight-lifting (1.0); 1 cr. Basic skills, rules, refereeing, training - theory and practice.

PES 324 Track and Field (2.0); 2 cr. Basic skills, refereeing, training - theory and practice.

PES 325 Gymnastics (1.0); 1 cr. Fundamentals of various types of gymnastics for men and women (classical and rhythmic).

PES 326 Basketball (2.0); 2 cr. This course is designed primarily for physical education majors. Emphasis is placed on the development of fundamental skills and acquisition of techniques of teaching basketball, the rules, and refereeing. Prerequisite: PES 321.

PES 327 Volleyball (2.0); 2 cr. This course is designed primarily for physical
education majors. Emphasis is placed on the development of fundamental skills and acquisition of techniques of teaching volleyball, the rules, and refereeing. Prerequisite: PES 321.

**PES 328 Football (2.0); 2 cr.** This course is designed primarily for physical education majors. Emphasis is placed on the development of fundamental skills and acquisition of techniques of teaching football, the rules, and refereeing. Prerequisite: PES 321.

**PES 329 Tennis (2.0); 2 cr.** This course is designed primarily for physical education majors. Emphasis is placed on the development of fundamental skills and acquisition of techniques of teaching tennis, the rules, and refereeing. Prerequisite: PES 321.

**PES 330 Badminton (2.0); 2 cr.** This course is designed primarily for physical education majors. Emphasis is placed on the development of fundamental skills and acquisition of techniques of teaching badminton, the rules, and refereeing. Prerequisite: PES 321.

**PES 331 Table Tennis (2.0); 2 cr.** This course is designed primarily for physical education majors. Emphasis is placed on the development of fundamental skills and acquisition of techniques of teaching table tennis, the rules, and refereeing. Prerequisite: PES 321.

**PES 332 Weight-Lifting (2.0); 2 cr.** This course is designed primarily for physical education majors. Emphasis is placed on the development of fundamental skills and acquisition of techniques of teaching weight-lifting and the rules. Prerequisite: PES 321.

**PES 333 Swimming I (2.0); 2 cr.** This course is designed primarily for physical education majors. Emphasis is placed on the development of fundamental skills and acquisition of techniques of teaching the different strokes (freestyle, backstroke, crawl), the rules, and refereeing. Prerequisite: PES 321.

**PES 334 Swimming II (2.0); 2 cr.** This course is designed primarily for physical education majors. Emphasis is placed on the development of fundamental skills and acquisition of techniques of teaching the different strokes (breaststroke, butterfly), the rules, and refereeing. Prerequisites: PES 321, PES 333.

**PES 335 Track and Field I (2.0); 2 cr.** This course is designed primarily for physical education majors. Emphasis is placed on the development of fundamental skills and acquisition of techniques of teaching running (sprint, 100m, 200m, endurance, etc.), the rules, and refereeing. Prerequisite: PES 321.

**PES 336 Track and Field II (2.0); 2 cr.** This course is designed primarily for physical education majors. Emphasis is placed on the development of fundamental skills and acquisition of techniques of teaching jumping (long jump, high jump, etc.), the rules, and refereeing. Prerequisite: PES 321.

**PES 337 Track and Field III (2.0); 2 cr.** This course is designed primarily for physical education majors. Emphasis is placed on the development of fundamental skills and acquisition of techniques of teaching throwing (discus, shot-put, javelin, etc.), the rules, and refereeing. Prerequisite: PES 321.

**PES 338 Combat Sports I (2.0); 2 cr.** This course is designed primarily for physical education majors. Emphasis is placed on the development of fundamental skills and acquisition of techniques of teaching combat sports (Striking: Tae-Kwon-Do, Karate, etc.), the rules, and refereeing. Prerequisite: PES 321.
PES 339 Combat Sports II (2.0); 2 cr. This course is designed primarily for physical education majors. Emphasis is placed on the development of fundamental skills and acquisition of techniques of teaching combat sports (Grappling: Wrestling, Judo, etc.), the rules, and refereeing. Prerequisite: PES 321.

PES 340 Gymnastics I (2.0); 2 cr. This course is designed primarily for physical education majors. Emphasis is placed on the development of fundamental skills and acquisition of techniques of teaching gymnastics (floor techniques), the rules, and refereeing. Prerequisite: PES 321.

PES 341 Gymnastics II (2.0); 2 cr. This course is designed primarily for physical education majors. Emphasis is placed on the development of fundamental skills and acquisition of techniques of teaching gymnastics (apparatus techniques), the rules, and refereeing. Prerequisites: PES 321, PES 340.

PES 342 Winter Sports (2.0); 2 cr. Emphasis is placed on the development of fundamental skills and acquisition of techniques of teaching skiing and snowboarding. This is an accelerated course that will take place during the winter season over the course of a specific number of trips to ski resorts for intensive practical sessions. Priority is given to Physical Education majors. Prerequisite: PES 321.

PES 343 Pilates and Yoga (2.0); 2 cr. This course is designed primarily for physical education majors. Emphasis is placed on the development of the fundamental skills of Pilates and Yoga and the techniques of teaching them. Pilates will focus on increasing breathing capacity and improving postural alignment through simultaneous stretching and strengthening movements. Hatha Yoga is a vigorous cardiovascular workout which increases strength, flexibility, balance, conditioning, and endurance.

PES 344 Cardio Fitness and Toning (2.0); 2 cr. This course is designed primarily for physical education majors. Emphasis is placed on the development of fundamental skills in cardiovascular workouts and acquisition of techniques of teaching. The course combines aerobic activities with muscle toning strength movements. Instruction will include the safe and effective use of fitness apparatus including, bench step, physio balls, resistance bands and hand weights.

PES 345 Chess (1.0); 1 cr. This course is designed to help students engage in cognitive processing mechanisms, and accordingly develop competence in the logical thinking needed to play chess.

PES 346 Lifeguard Training (2.0); 2 cr. This course introduces and develops skills and knowledge necessary to prepare individuals for lifeguard responsibilities. It teaches students to prevent, recognize, and respond to aquatic-related emergencies. Teaching methodology includes lectures, demonstrations, and instructional video with hands-on training and practice. Prerequisite: Students must pass a swimming test.

PES 347 Handball (2.0); 2 cr. This course will provide the basic skills of team handball including fundamental strategies and rules. The course is also designed to provide physical education students with teaching skills and methods necessary for the instruction of handball. For Physical Education majors. Prerequisite: PES 321.

PES 348 Basic Life Support and First Aid (2.0); 2 cr. This course trains students in Basic Life Support skills and first aid care according to International Red Cross standards. It combines lectures and demonstrations with hands-on training and practice. Focus will be on bone fractures, joint dislocations, ligament sprains, muscle strain, major wounds, burns, basic airway management, bleeding control, and spinal dislocation.
PES 354 Athletic Fitness Training (3.0); 3 cr. This comprehensive course is designed to provide the student with the knowledge and skills needed to develop fitness programs for competitive athletes in different sports. The course focuses on advanced topics in training the aerobic and anaerobic systems, developing strength and power, planning and periodization, in addition to topics in sports nutrition and exercise physiology.

PES 355 Methods in PE (3.0); 3 cr. Planning, strategies, techniques, and methods of teaching PE.

PES 358 Physiology of Exercise (3.0); 3 cr. Physiological changes that occur as a result of exercise and work.

PES 420 Theory of Fitness Coaching (3.0); 3 cr. This course incorporates the basic components of fitness and wellness in order to better understand human health and well-being. Students will learn to design, implement and evaluate personal fitness and wellness programs. Topics covered will include incorporating exercise into every lifestyle including youth, the elderly, expecting mothers. In addition, nutrition, weight management and stress management will be studied. The latest fitness and wellness research will also be analyzed and interpreted. Prerequisite: PES 358.

PES 421 Coaching (3.0); 3 cr. Leadership, supervision, democracy and behavior in sports; also methods of coaching.

PES 422 Biomechanics (3.0); 3 cr. Improved teaching/coaching through biomechanical and anatomical analyses of sports and related activities.

PES 424 Therapeutic Use of Exercise (3.0); 3 cr. How to use exercise in physical therapy.

PES 426 Adapted Physical Fitness (3.0); 3 cr. Designed to promote knowledge and understanding of the needs and abilities of the special student in addition to the procedures and responsibilities of physical education for the special student. Emphasis will be placed on the development of methods to competently modify physical activities to suit students with various individual needs. Corequisite: PES 358.

PES 430 Evaluation of PE (3.0); 3 cr. Nature and use of a variety of tests - practical application and interpretation of results.

PES 461 Teaching Practicum Elementary (3.0); 3 cr. Application of PE and Sport methods in elementary schools.

PES 462 Teaching Practicum Secondary (1.2); 3 cr. Application of Physical education and sport methods in secondary schools. Aims at preparing candidates to address the requirements, needs, and issues in the physical education of secondary school pupils. The course will provide hands-on experience, observed and evaluated by the course instructor. Prerequisite: PES 461.

PES 492 Internship (1.0); 1 cr. Supervised, practical experience in teaching physical education activities or with approved professionals in select athletic training settings. Student must submit final report. Prerequisite: Senior standing and department chair approval.
The Degree of Master of Arts in Psychology - Educational Psychology

Mission
The mission of the M.A. in Psychology - Educational Psychology is to prepare students for post graduate work. The program aims to apply psychological principles to the teaching/learning process. It also prepares graduates to analyze psychological effects of methods, resources, organization and non-school experience on the educational process.

Program Educational Objectives
The program will prepare students to:
- Pursue higher studies towards a doctoral degree;
- Carry out research in educational psychology to further their professional career;
- Pursue a career in institutions that deal with educational psychology;
- Further develop their professional status through the use of their learned skills in analytical and creative thinking, research, and the use of technology - based assessment;
- Contribute to promoting educational psychology practices and strategies in their respective institutions.

Program Learning Outcomes
Upon graduation, students should be able to:
- Enroll in post-graduate programs;
- Implement Educational Psychology principles in their workplace;
- Contribute to educational research;
- Analyze the issues in current educational psychology practices;
- Demonstrate commitment to professional ethical conduct;
- Measure student learning through appropriate assessment.

Master’s degree in Educational Psychology: A program that focuses on the application of psychology to the study of the behavior of individuals in the roles of teacher and learner, the nature and effects of learning environments, and the psychological effects of methods, resources, organization and non-school experience on the educational process. It includes instruction in learning theory, human growth and development, research methods, and psychological evaluation.

Students accepted in the program must fulfill the 36 credit-hours required or the 30 credit-hours course work in addition to a 6 credit-hours thesis. The GPA must not be less than a “B” grade or 3.00/4.00. Students, in case of failure in one of the courses, are given one chance to repeat the course work. A second failure will result in the expulsion of the student from the program. Following registration a three year-time limit is given to the students to complete his/her degree. Students are not allowed to repeat more than two courses.
**Admission Requirements**
The minimum requirements for admission to the M.A. program in Educational Psychology are:

- A Bachelor’s degree in psychology or its equivalent from an accredited university; a Bachelor degree in any other major will be evaluated separately;
- A cumulative undergraduate GPA of a minimum GPA 2.75, provided students satisfy the general admission requirements for graduate studies at NDU;
- A personal statement of background, goals and values;
- Three professional recommendations from instructors of the student’s B.A. program;
- A personal interview at the discretion of the department.

**Transfer**
Credits from accredited universities can be transferable according to the following conditions:

- Acceptance by the Admission Office at NDU;
- Any course with a grade below 80, i.e. “B” is not transferable. This is in line with the NDU grading policy;
- Only nine credit-hours are granted to the new student provided that the transferable course/s is/are transferred from an accredited university and correspond/s to the NDU course requirements.

**Degree Requirements (36 credits)**

Graduate Courses: Psychology

PSL 601 Professional Counseling Skills (3.0); 3 cr. The course provides practical experience in developing basic clinical skills, such as effective inquiry, empathic listening, helping responses, and interpretation. Emphasis on matching therapist style with client characteristics; students are trained to work with clients of diverse backgrounds and in different settings.

PSL 602 Assessment and Psychometric Methods (3.0); 3 cr. The course reviews the fundamentals of testing and assessment skills in administering and interpreting standardized tests in the areas of personality assessment and intelligence testing. Special emphasis will be on Rorschach, TAT, MMPI, WAIS-III, WISC-IIIIR and Kauffman ABC.

PSL 609 Research Method and Designs (3.0); 3 cr. With the goal of gaining competence in critical evaluation of published research; this course will provide training in the application of research techniques to problems in psychology and human services. Quantitative and Qualitative research design, conducting, reporting and analyzing assessment and program evaluation.

PSL 610 Developmental Psychology (3.0); 3 cr. The course studies the human lifespan development; a foundation for understanding principles and concepts of physical, cognitive, personality, emotional and social development from conception through death. It also introduces developmental disabilities.

PSL 622 Theory of Learning and Cognitive Processes (3.0); 3 cr. The course explores theoretical areas of learning and cognition, including cognitive psychology, memory, information processing, attention, problem solving, learning strategies and reinforcing as well as the design of classroom learning situation.

PSL 631 Psychoeducational Assessment (3.0); 3 cr. The course focuses on administrating, scoring and interpreting standardized instruments and tests to assess cognitive abilities, learning behaviors, emotional disturbances, social maladaptive and sensory motor functioning of school-age children with emphasis on psychoeducational diagnosis.

PSL 642 Practicum I (3.0); 3 cr. Educational Psychology (to be approved by the advisor).

PSL 662 Consultation, Intervention and Prevention (3.0); 3 cr. The course builds a framework for educational psychologists to address the concepts, processes and issues related to the practice of school-based consultation as an intervention technique of educational psychologists.

PSL 682 Seminar in Educational Psychology (3.0); 3 cr. This course is a forum for student to put together knowledge and ideas across the subdisciplines of psychology and an impetus for expansion of thinking. It includes but not limited to: Socio-developmental: issues relating to education, topics include; role theory, attitude theory formation and change, transitions from home to school, Elementary/Secondary, High School/University to work. Instructional Psychology: it includes designing, implementing and evaluating learning strategies and programs from preschool to high school. Instructional Decision Making: focuses on direct and indirect approaches to interact and help students, teachers and families to reduce behavioral and academic problems. Assists students with developmental disabilities. Contemporary Educational Problems and Motivation. Developing Human Potentials: techniques that emphasize human relation skills, self-image, values, and stress management.

PSL 692 Practicum II (3.0); 3 cr. Educational Psychology (to be approved by the advisor).

PSL 695 Practicum III (3.0); 3 cr. Educational Psychology (to be approved by the advisor).

PSL 699 Thesis (6.0); 6 cr. (to be approved by the advisor).
The Degree of Master of Arts in Education

Mission
The mission of the M.A. in Education is to prepare students for post graduate work. The program aims to present graduates with a knowledge-base in school leadership, technology of education, or special needs.

Program Educational Objectives
The program will prepare students to:
• Pursue higher studies towards a doctoral degree;
• Carry out research in their fields and/or concentration areas to further their professional career;
• Pursue a career in upper-level positions in organizations and government offices that deal with education and educational issues;
• Further develop their professional status through the use of their learned skills in analytical and creative thinking, research, and the use of technology in pedagogy;
• Evaluate proposed strategies in the field of education and pedagogy.

Program Learning Outcomes
Upon graduation, students should be able to:
• Enroll in post-graduate programs;
• Implement the contemporary theories of education to their careers;
• Contribute to educational research;
• Demonstrate advanced understanding of learning theory and methodologies;
• Analyze the issues in current education practices in Lebanon and the region;
• Demonstrate commitment to professional ethical conduct.

Admission Requirements
Candidates are expected to have completed the degree of Bachelor of Education, Bachelor of Arts in Education, or Bachelor of Arts with a Teaching Diploma from an accredited university. Candidates holding the degree of Bachelor of Arts or Sciences in a related field from an accredited university will be considered on an individual basis, pending the decision of the Department concerning special admission conditions.

Graduation Requirements
To satisfy the requirements for the degree of Master of Arts in Education, the student must complete a total of 33 credits with an overall average of 3.0/4.0, inclusive of a thesis.

Degree Requirements (33 credits)

Major Requirements 15 cr.
Complete the following required courses:
EDU 610, EDU 611, EDU 622, EDU 699.

Electives 9 cr.
Three out of the following courses:
EDU 612, EDU 614, EDU 621, EDU 623, EDU 624.
Concentration Areas: 9 cr.

1. Special Education: The Special Education concentration prepares educators to work with students with special needs. The program emphasizes interaction between students, teacher, and school administrations.

Three from the following courses:
EDU 641, EDU 642, EDU 643, EDU 644.

2. School Management and Educational Leadership: Educators who wish to pursue a career in school administration will be exposed to best practice in policy making, leadership skills, law, and methodology.

Three from the following courses:
EDU 651, EDU 652, EDU 653, EDU 654.

3. Educational Technology: Educators interested in applying modern technology to the classroom will benefit from this concentration. Courses focus on practical application of technology to enhance student learning.

Three from the following courses:
EDU 661, EDU 662, EDU 663, EDU 664.
Graduate Courses: Education

EDU 610 Educational Research Methods (3.0); 3 cr. This course presents key concepts and issues in statistics and their use in educational research, including descriptive and inferential research. Both qualitative and quantitative research methodologies will be explored in relation to improving educational programming. Particular emphasis will be placed on developing skills in applying research to educational decision-making, including conducting needs assessment and analyzing, interpreting, and communicating educational data.

EDU 611 Educational Models and Curriculum Design (3.0); 3 cr. This course introduces procedures and plans which incorporate social, political, economic, intellectual, and other values in determining what to include in a curriculum. It also examines the question concerning the nature and history of the “curriculum” concept by looking at both the content and pedagogy of important curriculums employed in the Ancient and Medieval worlds.

EDU 612 Ethics and Politics in Education (3.0); 3 cr. This course addresses the inevitable tension that exists in education between the realm of politics and the realm of ethics. It examines concepts of power and communication especially as these relate to pressure groups and advisory bodies. The course seeks to overcome this tension by helping students to understand how it is possible to both ethical and politically astute at the same time. Corequisite: EDU 610.

EDU 614 Technology and Education (3.0); 3 cr. This course emphasizes the impact of technology on the total school environment. Students critically analyze the role of technology in instruction and develop strategies for infusing technological resources into the curriculum and the classroom, to improve the teaching-learning process. Corequisite: EDU 610.

EDU 621 Advanced Educational Psychology (3.0); 3 cr. This course presents an in-depth study in advanced psychological theories of learning and the relationship between the theories and instructional strategies. Corequisite: EDU 610.

EDU 622 Comparative Education (3.0); 3 cr. This course analyses educational systems as related to values and cultures; compares the Lebanese educational system to other Arab, European, and American systems.

EDU 623 Advanced Educational Measurement (3.0); 3 cr. This course provides an advanced theoretical and practical training in techniques of test construction, evaluation and standardization, validation, reliability, item analysis, norm setting, criterion referencing, selection and interpretation of standardized tests. Corequisite: EDU 610.

EDU 624 Advanced Methodology (3.0); 3 cr. This course presents an in-depth analysis of current methods and techniques of instruction. Corequisite: EDU 610.

EDU 641 Special Education: Issues and Trends (3.0); 3 cr. This course attempts to define both the concept and practice of “special education” by examining its history and evolution in education. It analyzes the contemporary issues and trends in special education and critically examines many of the major “special education” categories.

EDU 642 Special Education: Assessment and Treatment (3.0); 3 cr. This course focuses on traditional and contemporary methods of assessment and treatment as related to the standard categories of “special education”.

EDU 643 Motivation in Special Education (3.0); 3 cr. This course
examines motivational strategies that help to improve self-image, and that enhance learning and the desire to achieve. Examines motivational strategies regarding self-image, achievement, and the learning process.

**EDU 644 The Special Student and The Regular Classroom (3.0); 3 cr.** This course studies ways of providing foundations for educational partnerships between regular and special educators/students. Examines some of the most recent and innovative methods used to meet the needs of special students.

**EDU 651 Leadership for School Improvement (3.0); 3 cr.** This course defines leadership skills and abilities and develops the dynamics of team functioning, decision-making, problem-solving, communicating, and self-improvement.

**EDU 652 Instructional Management and its Evaluation (3.0); 3 cr.** This course studies the management and evaluation of instruction; emphasizes the use of systemic management and evaluation models by teachers.

**EDU 653 Administrative Leadership Skills (3.0); 3 cr.** This course studies the theory of leadership in the different contexts of public and private schools.

**EDU 654 School Business Management and Facilities (3.0); 3 cr.** This course presents guiding principles for developing financial programs. Studies sources of revenue and the management of school funds and facilities.

**EDU 661 Technology-Oriented Instructional Materials (3.0); 3 cr.** This course examines the production of instructional materials using technology as a tool. It uses basic and advanced techniques, materials and mechanics to accomplish such production.

**EDU 662 Issues and Implications of Telecommunications in Education (3.0); 3 cr.** This course focuses on creating virtual entities, developing a sense of community using online tools, the developing communication infrastructure. Looks into how new technologies affect pupils in the school, the home, and the future job market. Studies the computer as a communication tool, whether online or offline, and looks into the advantages and disadvantages of utilizing this tool in the modern classroom.

**EDU 663 Developing Multimedia Productions (3.0); 3 cr.** This course presents elements of instructional design and storyboarding techniques to translate instruction into various types of multimedia presentation. Improves skills, knowledge, and creativity used in video production. Assists students to plan, write, produce, and edit for educational and informational productions. Students discuss the potential, limitations, and techniques for effectively using the television, radio, distance learning, telecommunications, and interactive video.

**EDU 664 Information Retrieval Through Technology (3.0); 3 cr.** This course develops search strategies and uses information retrieval technology to access sources. Focuses on developing media center retrieval systems.

**EDU 681 Seminar in Teaching Reading (3.0); 3 cr.** Recent trends and research in teaching reading to L2 learners are treated. *Prerequisite:* ENL 623.

**EDU 682 Seminar in Teaching Writing and Composition (3.0); 3 cr.** Recent trends and research in teaching writing to L2 learners. *Prerequisite:* ENL 623.

**EDU 683 Seminar in Teaching Literature (3.0); 3 cr.** Recent trends and research in teaching literature to L2 learners. *Prerequisite:* ENL 623.
EDU 684 Seminar in Teaching ESP Courses (3.0); 3 cr. Recent trends and research in teaching English for professional learner purposes to L2 learners. *Prerequisite:* ENL 623.

EDU 699 Thesis (6.0); 6 cr. This course researches an issue directly related to the field of concentration with a fieldwork study.
The Degree of Bachelor of Arts in Advertising and Marketing

Mission
The mission of the advertising sequence is to prepare students for careers in account handling, media planning and management, and creative roles in advertising agencies, in-house advertising, and in the media. The program also incorporates principles of marketing, consumer behavior, promotional strategy, and other pertinent courses.

Program Educational Objectives
The program will prepare students to:
• Lead a productive career in various areas of the advertising and marketing industry;
• Apply their linguistic, analytical, communication and creative skills to the further development of the advertising industry in Lebanon and the region;
• Become lifelong learners and find success in their chosen field;
• Act ethically as advertising and marketing professionals;
• Pursue graduate studies in advertising and marketing research.

Program Learning Outcomes
Upon graduation, students should be able to:
• Understand the main principles and concepts of the advertising and marketing field;
• Develop full advertising and marketing plans and campaigns that meet client needs and market requirements;
• Prepare and deliver oral presentations and written reports (including the advertising brief and pitch) pertinent to the advertising and marketing field;
• Practice advertising and marketing in accordance within the ethical, moral and industry codes within the local, international and global markets;
• Design a professional portfolio including work with a number of local advertising firms;
• Evaluate the power and effectiveness of communication technologies and its ability to function as agents of social change.

Graduation Requirements
Students pursuing this major must complete a total of 102 credit hours with a minimum cumulative GPA of 2.3/4.0 in their core and major courses. These 102 credits are divided as follows:
Degree Requirements (102 credits)

Liberal Arts Core Curriculum 30cr.
- COA courses listed in the Cultural Studies and Social Sciences category do not satisfy GER requirements for Mass Communication students. These courses must only be taken as core or major courses;
- Mass Communication students may satisfy their Philosophy requirement by taking COA 360 Media Ethics;
- Mass Communication students may satisfy 3 credits of their Citizenship requirements by taking COA 350 Current Issues;
- Mass Communication students must take STA 202 to fulfill the 3 of the 6-credits requirement in Science and Technology.

Core Requirements 19 cr.
ADM 466, COA 201, COA 230, COA 252, COA 359, COA 362, PDP 201.

Major Requirements 40 cr.
ADM 216, ADM 341, ADM 352, ADM 453, ADM 481, ADM 490, COA 270, COA 275, COA 316, COA 475, FDP 201, FDP 214, MRK 201, MRK 311, MRK 321.

Students must choose 9 credits from the following pool: 9 cr.
ADM 351, ADM 450, ADM 468, ADM 469, BAD 201, COA 223, COA 311, COA 315, COA 350, COA 352, COA 360, COA 365, COA 367, COA 368, COA 499, JOU 210, JOU 310, JOU 323, JOU 340, JOU 341, JOU 450, JOU 460, JOU 461, JOU 465, MRK 313, MRK 433, STA 206.

Free Electives 4 cr.
The NDU Minor in Advertising and Marketing is comprised of 18 credits. Any student may elect to do a Minor in this area provided that he/she is in good academic standing that is if he or she has a GPA of 2.0/4 and above. A student can only count up to six credits which he/she may have taken from the list of the required courses for this “Minor” prior to electing a “Minor” in Advertising and Marketing. Minors must be declared at least one year before expected graduation date.

Undergraduate Courses: Advertising

ADM 216 Principles of Advertising (3.0); 3 cr. The course introduces first year advertising students to the field of advertising and its relationship to and role in the field of marketing. Students discover basic advertising principles and the characteristics of mass and interactive media including television, newspapers, magazines, outdoor, radio, direct response, and social media as advertising vehicles. The course also examines advertising agency structures and teaches students in-depth ad analysis. Corequisite: ENL 105.

ADM 341 Media Planning (3.0); 3 cr. The course provides an introduction to strategic media planning in line with the latest trends and practices in the industry. Students assess the strengths and limitations of different communication channels to devise a comprehensive media plan in accordance with budget, personnel and strategic goal requirements. Students use software related to media planning and conduct industry related research on agencies involved in planning, buying and selling media. Prerequisite: ADM 216.

ADM 351 E-Commerce (3.0); 3 cr. The focus of this course is on today’s electronic market environment. Students are to develop proficiencies in interactive business and communication technologies and must have access to an e-mail account.

ADM 352 Creativity and Copywriting (3.0); 3 cr. The course introduces the concepts and approaches related to creativity and copywriting in the field of advertising. Students practice the basic techniques of advertising headline and body copy through integrating their input in the design and execution of print, electronic and outdoor advertising. Regular peer evaluations and in-class ad analyses help boost creativity and perspective. Prerequisite: ADM 216. Corequisite: FDP 214.

ADM 450 Consumer Activation Programs (3.0); 3 cr. This course describes new and innovative ways of advertising to the consumer. Terms like shopper marketing, brand activation, advergaming, and branded content are becoming an essential part of the programs advertisers are creating for consumers in order to activate marketing communication in alternative media forms different from regular TV, radio, or press. Prerequisite: ADM 352.

ADM 453 Global Advertising (3.0); 3 cr. This course analyzes the history, development and current status of international advertising based on the cultural, economic, political and linguistic characteristics of the countries studied. Students are required to develop an innovative project with an international dimension. Importance of diversity to global advertising is stressed. Prerequisite: ADM 341. Corequisites: ADM 352, COA 362.

ADM 466 Seminar Series in Advertising (1.0); 1 cr. The course is comprised of a series of lectures, seminars and workshops on topics related to the field of Advertising and Marketing. The lectures are organized by the department and may be given by academics or experts in the field. Pass or Fail grade only. Prerequisite: Junior standing.

ADM 468 Selected Topics in Advertising 1 (3.0); 3 cr. The course introduces senior students to pertinent topics, not addressed in the Advertising and Marketing curriculum. It gives the students the chance to delve deeper into relevant advertising trends and happenings. Prerequisites: COA 201, ADM 216, MRK 201.

ADM 469 Selected Topics in Advertising 2 (3.0); 3 cr. The course allows for the exploration of a topic not covered by the curriculum, but is related to faculty or students interests. The course may be
suggested by the students, the faculty or the department. **Prerequisites:** COA 201, ADM 216, MRK 201.

**ADM 481 Internship in Advertising (1.0); 1 cr.** The course offers students the opportunity to apply what they have learned in their academic program to the real world industry of advertising and/or marketing. The experience helps students develop professional confidence and understand work place requirements in a supervised work setting. **Corequisite:** ADM 453.

**ADM 490 Senior Study in Advertising (3.0); 3 cr.** The course involves the conceptualization of a successful advertising campaign for an actual client. Students are expected to integrate their understanding of theory and practice to research, plan and create the campaign which includes selecting media, maintaining cost efficiencies and setting a media schedule. Students are required to present their campaign and pass a mandatory exit exam. **Prerequisite:** COA 362. **Corequisite:** ADM 453; senior standing and a grade of “C” or above is required.
The Degree of Bachelor of Arts in Communication Arts - Journalism and Electronic Media Emphasis

Mission
The mission of the Journalism program is to prepare students to become reporters in various print and media outlets. Students will also augment their journalistic skills with a variety of Public relations courses that will broaden their communication skills and improve their career opportunities in different organizational and professional settings. Students will practice and refine their writing, reporting, and other journalistic skills.

Program Educational Objectives
The program will prepare students to:

• Lead a productive career in journalism, public relations, and electronic media;
• Employ the journalistic and communication skills acquired in the form of print, broadcast, and digital media in both Arabic and English;
• Apply strong professional competence to serve in journalistic tasks, in the press, radio, television and net media;
• Act ethically as media professionals;
• Pursue graduate studies in journalism, public relations and electronic media research.

Program Learning Outcomes
Upon graduation, students should be able to:

• Identify the theoretical and conceptual foundations of the field of journalism and the manner through which such foundation is applied to practice in the field;
• Illustrate ideas, thoughts, news, reports, and other journalistic work in clear, correct, vivid, accurate, and meaningful language;
• Categorize information and gathered material by providing meaning to them and explaining their relevance and consequences to the recipients;
• Become lifelong learners in the field;
• Demonstrate genuine creativity in writing and reporting styles;
• Acquire and practice written and oral communication skills for print, broadcast and online media;
• Critically analyze and interpret journalistic situations encountered during their daily work.

Graduation Requirements
Once admitted to the program, students are required to develop competence in both Arabic and English. They must also complete an internship at one of the media outlets in the Lebanese market. Students pursuing this major must complete a total of 102 credit hours with a minimum cumulative GPA of 2.3 / 4.0 in their major requirements. These 102 credits are divided as follows:
Degree Requirements (102 credits)

**Liberal Arts Core Curriculum**
- COA courses listed in the Cultural Studies and Social Sciences category do not satisfy GER requirements for Mass Communication students. These courses must only be taken as core or major courses;
- Mass Communication students may satisfy their Philosophy requirement by taking COA 360 Media Ethics;
- Mass Communication students may satisfy 3 credits of their Citizenship requirements by taking COA 350 Current Issues;
- Mass Communication students must take STA 202 to fulfill the 3 of 6-credits requirement in Science and Technology.

**Core Requirements:**
COA 201, COA 230, COA 252, COA 359, COA 362, JOU 466, PDP 201.

**Major Requirements:**
ARB 302, COA 270, COA 275, COA 415, COA 425, JOU 210, JOU 310, JOU 323, JOU 350, JOU 370, JOU 371, JOU 450, JOU 480, JOU 490.

**Students must select 12 credits from the following pool:**

**Free Electives:**
Minor in Journalism (18 cr.)

The NDU Minor in Journalism is comprised of 18 credits. Any student may elect to do a Minor in this area provided that he/she is in good academic standing that is if he or she has a GPA of 2.0/4 and above. A student can only count up to six credits which he/she may have taken from the list of the required courses for this “Minor” prior to electing a “Minor” in Journalism. Minors must be declared at least one year before expected graduation date.

**Required courses:**
- JOU 210 Mass Media Language 3 cr.
- JOU 310 News Writing and Reporting 3 cr.
- JOU 323 Web journalism 3 cr.
- JOU 371 The Newsroom 3 cr.

**Choose 6 credits from the following:**
- COA 360 Media Ethics 3 cr.
- COA 365 Talk Shows 3 cr.
- COA 366 Diction and Presentation 3 cr.
- JOU 350 Investigative Journalism 3 cr.
- JOU 450 Specialized Journalism 3 cr.
- JOU 451 Specialized Journalism in Fashion and Life Style 3 cr.
- JOU 452 Specialized Journalism in Arts, Music and Culture 3 cr.
- JOU 453 Specialized Journalism in Sports 3 cr.
- JOU 454 Sp. Jou. in Political Admin. and Foreign Affairs 3 cr.
- JOU 455 Specialized Journalism in Business and Economics 3 cr.
- JOU 456 Specialized Jou. in Human Rights and Ethics 3 cr.

Minor in Public Relations (18 cr.)

The NDU Minor in Public Relations is comprised of 18 credits. Any student may elect to do a Minor in this area provided that he/she is in good academic standing that is if he or she has a GPA of 2.0/4 and above. A student can only count up to six credits which he/she may have taken from the list of the required courses for this “Minor” prior to electing a “Minor” in Public Relations. Minors must be declared at least one year before expected graduation date.

**Required Courses**
- COA 252 Principles of Public Relations 3 cr.
- JOU 340 Public Relations Techniques 3 cr.
- JOU 460 Case Studies in Public Relations 3 cr.

**Choose 9 credits from the following:**
- COA 360 Media Ethics 3 cr.
- JOU 323 Web journalism 3 cr.
- JOU 341 Public Relations Planning and Events Management 3 cr.
- JOU 450 Specialized Journalism 3 cr.
- JOU 465 Public Relations and Image Consultancy 3 cr.
- JOU 461 Public Relations and Protocol 3 cr.
**Undergraduate Courses: Communication Arts**  
**Journalism Emphasis**

**JOU 210** Mass Media Language (3.0); 3 cr. This course focuses on journalistic writing in Arabic; it introduces students to various basic writing forms for the mass media. The course area of emphasis is on writing basic news stories, and press releases while focusing on accurate grammatical structure, spelling, and sentence style. Corequisite: ARB 212 or ARB 231.

**JOU 310** News Writing and Reporting I (3.0); 3 cr. The course builds on principles practiced in JOU 210. Emphasis is laid on the process of information gathering, reporting and writing for the mass media. The course stresses the elements of news, leads, and styles of advanced news stories. Students practice interviewing techniques. Prerequisite: JOU 210.

**JOU 320** Copy Editing and Headline Writing. (3.0); 3 cr. This course focuses on the headline writing and editing news in order to produce clear, accurate, and vivid copy. Prerequisite: JOU 310.

**JOU 323** Web Journalism (3.0); 3 cr. This multimedia course examines the emerging forms of information delivered by computer and related convergence of print and broadcast media. Students will practice the latest digital revolution, how to use the technology and how the interactive engagement between journalists and citizens has transformed the business. Blogging, podcasting, video, audio slideshow, social media, web writing and citizen journalism will be examined and practiced. Prerequisite: JOU 210.

**JOU 325** Photojournalism (3.0); 3 cr. Students will explore the photographer’s role on an editorial team, how storytelling with pictures works, the task of using cameras in addition to the latest digital software. Ethical, legal, and technical aspects of photos will be also discussed. Prerequisite: PDP 201.

**JOU 340** Public Relations Techniques (3.0); 3 cr. This course is designed to introduce students to different public relations techniques, tactics, applications and tools to identify and reach specific audiences through various media. Students will focus on analyzing and producing print, including news releases, pitch letters, biographies, proposals, crisis communications, oral messages in addition to other tools to create a public relations kit. Students will also be requested to carry out public relations events following the professional principles in the field. Prerequisite: COA 252.

**JOU 341** Public Relations Planning and Event Management (3.0); 3 cr. The course acquaints students with key public relations skills and event management techniques while providing them with proper exposure to all facets of planning, executing, and analyzing corporate events in-line with corporate goals and objectives. Students are supposed to examine each phase of a successful event and to focus on project management skills needed to research, design, plan, market, co-ordinate, and evaluate events. Special emphasis is placed on the critical role public relations plays throughout the management process. Students are expected to learn the tactics, tools and insights required to create winning events that are successfully publicized. Prerequisite: COA 252.

**JOU 350** Investigative Journalism (3.0); 3 cr. This course focuses on the different investigative reporting techniques in addition to the use of the scientific methods to connect events with accurate fact-checking, detection of secrets, and the
use of public records. Students will examine various tradition of investigative reporting, they will experience advanced course tools and hands-on experiences. They will also practice working as individuals or teams on writing their investigative projects. **Prerequisite:** JOU 210.

**JOU 369 Special Topics in Journalism. (3.0); 3 cr.** The course is a seminar that covers the latest topics affecting mass media, emerging technologies, the changing face of communications, in addition to the ethical practice in the field. It also focuses on variable content issues in order to understand the diverse perception of media. Topics may include: Sports Reporting; Foreign Correspondence; the Impact of Social Media, Environmental Issues… etc

**JOU 370 Newspaper Production (1.0); 1 cr.** Students shall produce a campus publication in which they incorporate their acquired journalistic skills. They will get hands-on experience in writing, editing, and laying out features and photos. **Corequisite:** JOU 310.

**JOU 371 The Newsroom (3.0); 3 cr.** This course introduces students to the different newsroom responsibilities including preparing newscasts and expanding their skills in newsroom management. **Prerequisite:** COA 275.

**JOU 450 Specialized Journalism (3.0); 3 cr.** This course covers different areas of journalism, such as foreign affairs, sports, arts, lifestyle, environment, business, human rights, and others. **Prerequisite:** JOU 310.

**JOU 451 Fashion and Lifestyle Journalism (3.0); 3 cr.** This course covers journalism skills in writing for fashion and lifestyle; it involves covering related events and understanding the craft of fashion design, design schools and a brief idea about history of fashion. **Prerequisite:** JOU 450.

**JOU 452 Arts, Music, Literature and Culture Journalism (3.0); 3 cr.** This course offers an overview of major schools and genres of arts, theatre, music, architecture, etc. from the perspective of a journalist. It also provides students with proper training in order to cover artistic and cultural events such as musical concerts, plays, films, and art exhibitions among others. **Prerequisite:** JOU 450.

**JOU 453 Sports Journalism (3.0); 3 cr.** This course covers journalism skills in writing for sports; it involves understanding game rules regulations, different types of sports, and nature of sport events including covering sport events for TV and printed media. **Prerequisite:** JOU 450.

**JOU 454 Political Administration and Foreign Affairs Journalism (3.0); 3 cr.** This course is meant to familiarize students with the administrative structure of the Lebanese political administration and with the way it functions, with decision making procedures in the Lebanese parliament, the cabinet, the presidential palace and all ministries; it also introduces students to diplomatic protocols, traditions, and conventions. **Prerequisite:** JOU 450.

**JOU 455 Business and Economics Journalism (3.0); 3 cr.** This course provides journalism students with a genuine understanding of the worlds of business and economics. Students are expected to practice business reporting and to learn how to decipher financial statements and analyze business statistics in addition to understanding the exchange market. **Prerequisite:** JOU 450.

**JOU 456 Human Rights and Ethics Journalism (3.0); 3 cr.** This course helps journalism students to identify media accuracy while reporting on human rights. It also identifies the positive and the negative influence of journalism practices on the audiences. **Prerequisite:** JOU 450.
JOU 460 Case Studies in Public Relations (3.0); 3 cr. This course provides students with hands-on experience, and skill-based performance through the process of evaluating and analyzing the principles of PR campaigns in real-life situations. Students will examine strategies and design their own case studies based on the course materials while taking into consideration diversity, planning programs, and ethical issues. Prerequisite: COA 252.

JOU 461 Public Relations and Protocol (3.0); 3 cr. The course introduces advanced public relations students to the array of rules, conventions and expectations that professional practitioners should master to interact in high level business settings. It acquaints students with the key aspects of protocol that include the written and unwritten rules of etiquette and cultural norms. This course also provides an overview of how to support business objectives of an organization both in public and private sectors. Moreover, it emphasizes protocol in diplomatic affairs and how public relations tie in with political figures to deliver messages in the world of diplomacy. Prerequisite: COA 252.

JOU 465 Public Relations and Image Consultancy (3.0); 3 cr. The course acquaints students with the concept of image consultancy and its tools, while emphasizing the use of these tools in influencing the public perception of corporations, individuals and organizations. It also provides students with the opportunity to review, discuss and examine the professional environment and Public Relations’ role in achieving business objectives of organizations. It finally introduces students to the techniques and mechanics that are used to master the delivery of winning campaigns to influence public opinion. Prerequisite: COA 252.

JOU 466 Seminar Series in Journalism (1.0); 1 cr. This course is composed of a series of lectures, seminars, and workshops modules related to journalism and electronic media organized by the department. The course is taught in English and in Arabic. Pass/Fail grade only. Prerequisite: Junior standing.

JOU 480 Journalism Internship (1.0); 1 cr. This course provides an essential professional training in a reputable media outlet under the supervision of a faculty advisor or an instructor. Weekly diaries, papers and a written portfolio are required. Prerequisite: Senior standing.

JOU 490 Senior Study (3.0); 3 cr. This course is designed to support students during the planning and execution of the final senior project presentation and the written thesis that examines in depth an area in print journalism. Students will show their work progress during the semester. Oral presentation of the project is required and graded. Prerequisite: COA 362, senior standing. In order to complete this class for graduation a grade of “C” and above is required.
The Degree of Bachelor of Arts in Communication Arts - Radio and Television Emphasis

Mission
The mission of the Radio and Television program is to prepare students for opportunities in electronic media production, programming and “on-air” broadcasting, scriptwriting, directing, and film techniques. In addition to a variety of courses in social sciences, English, and other GER courses, the program stresses the skills that will help prepare Radio and Television students in their careers. Introductory and advanced instruction in audio and video techniques are supported by hands-on experiences in our well-equipped studio.

Program Educational Objectives
The program will prepare students to:
- Lead a productive career in the various areas of the field;
- Apply the theoretical, practical, and technical skills in radio, television and film in the industries;
- Employ creative talents and innovative skills in their chosen field;
- Act ethically as media professionals;
- Pursue graduate studies in radio, television and film research.

Program Learning Outcomes
Upon graduation, students should be able to:
- Demonstrate knowledge of television and film creation and production as a craft and as a collaborative process;
- Analyze and interpret audio-visual content through the perspectives of various theoretical frameworks;
- Use written, oral and visual communication skills to communicate information and ideas;
- Acquire in-depth knowledge of the world film industry;
- Recognize how media can be used as a tool to promote public engagement in current issues;
- Produce media productions including directing, cinematography, editing, lighting and sound;
- Evaluate the power and effectiveness of communication technologies and its ability to function as agents of social change.

Graduation Requirements
Students pursuing this major must complete a total of 103 credit hours with a minimum cumulative GPA of 2.3 / 4.0 in their major requirements. The program culminates in a senior project that incorporates the skills acquired during the years spent at NDU. A “C” grade and above on this project is required for graduation. The 103 credits are divided as follows:

Degree Requirements (103 credits)

Liberal Arts Core Curriculum 30 cr.
- COA courses listed in the Cultural Studies and Social Sciences category do not satisfy GER requirements for Mass Communication students. These courses must only be taken as core or major courses;
• Mass Communication students may satisfy their Philosophy requirement by taking COA 360 Media Ethics;
• Mass Communication students may satisfy 3 credits of their Citizenship requirements by taking COA 350 Current Issues;
• Mass Communication students must take STA 202 to fulfill the 3 of the 6-credits requirement in Science and Technology.

**Core Requirements**
COA 201, COA 359, COA 362.

**Major Requirements**
COA 225, COA 226, COA 272, COA 273, COA 275, COA 276, COA 310, COA 311, COA 312, COA 315, COA 325, COA 330, COA 430, COA 480, COA 490.

Students must choose one group of the following concentration areas:

**Scriptwriting and Directing:** COA 435, COA 445, COA 455, COA 457
**Audio and Sound Production:** COA 436, COA 446, COA 456, COA 466
**Film and Video Techniques:** COA 437, COA 447, COA 455, COA 457
**Electronic News:** COA 415, COA 425, COA 426.

Students must choose 12 credits from the following pool:
ADM 216, COA 203, COA 204, COA 210, COA 213, COA 215, COA 216, COA 223, COA 252, COA 313, COA 320, COA 350, COA 355, COA 360, COA 365, COA 366, COA 367, COA 369, COA 370, COA 413, COA 416, COA 417, COA 475, COA 476, COA 499, CSC 202, CSC 277, CSC 343, FDP 201, FDP 214, JOU 210, JOU 310, JOU 340, JOU 460, MUS 211, MUS 221, MUS 331, MUS 475, PDP 201.

**Free Electives**
3 cr.
Minor in Radio and Television (17 cr.)

The NDU Minor in Radio and Television is comprised of 17 credits. Any student with a good academic standing that is if he/she has a G.P.A of 2.0/4 and above may enroll in this minor. He or she may only count six credits which he/she may have taken from the list of the R/TV Minor requirements while pursuing another major. Minors must be declared at least one year before expected graduation date.

COA 201 Mass Media Essentials (3.0); 3 cr. The course focuses on the study of various types of mass and interactive media and how they function in modern society. It surveys the historical, economic, and regulatory bases of the media along with their social implications. Corequisite: ENL 105.

COA 203 Make up and Color (0.2); 1 cr. The course introduces students to the basic principles of makeup for stage and film. The topics explored include the basics of color theory, use of makeup products and effects of camera on makeup. It offers students the opportunity to apply makeup principles to multiple character profiles and situations.

COA 204 Set Design (0.2); 1 cr. This course offers an introduction to the basic techniques of set design for theater and television. Students learn and explore firsthand how to translate and interpret a script into a visual package for production. Class projects engage students in a variety of design requirements allowing them to work on set architecture, space arrangement and dramatic design elements.

COA 205 Archive Organization (1.0); 1 cr. This course acquaints students with the principles, history and research around the representation of archival materials. They learn how to effectively make use of archived traditional and digital resources in a library setting.

COA 210 Stage Acting (3.0); 3 cr. The course exposes students to the basics in acting techniques including voice, movement, and transitions through exercises that develop concentration, imagination and listening. Students participate in theater games and diverse performance pieces to implement the skills learned.

COA 213 History of Film (3.0); 3 cr. The course provides an overview of the history of motion pictures through looking at their artistic, technological and industrial development. It introduces students to the formation and development of influential film movements emphasizing the aesthetic and thematic qualities that emerged from these movements.

COA 215 History of the Theater (3.0); 3 cr. The course traces the history of the western theater from its origins till the 20th century. It discusses the formation, development, aesthetic and thematic qualities of major theater movements, schools and genres. The course also introduces students to leading theater artists and provides a brief overview of Asian and oriental theater.

COA 216 Sacred Drama: Gods, Muses, and the Storyteller (3.0); 3 cr. What is the role, if not the duty, of the storyteller, especially when the storyteller is visited by a Muse or supernatural visitor and aided in the artistic adventure? This course answers the question with examples from poetry, theater, film, dance, and art, with a study of the influence of mythology on the performing arts and on arts in general.

COA 223 Speech Communication (3.0); 3 cr. The course explores the basic principles and concepts of oral communication in a variety of speaking formats. It develops student competence in speech content formation and delivery through focusing on language, style, voice, audience analysis, reasoning and communication strategy. The course also explores the effective use of visual aids in complementing speech communication. Prerequisite: COA 201.

COA 225 Lighting I (2.0); 2 cr. The course introduces students to the theoretical and practical use of lighting in television studio productions including drama, talk shows
and news. Students learn how to analyze and enhance dramatic nuances through the creation of appropriate lighting setups. Corequisite: COA 272.

COA 226 Lighting II (1.2); 2 cr. The course builds upon the skills acquired in Lighting I to use lighting in a number of mediums. It emphasizes cool lighting and outdoor lighting for video and film camera. Students are encouraged to explore concepts such as character movement lighting, dramatic lighting, and scene interpretation through lighting. Prerequisite: COA 225.

COA 230 Information Gathering and Analysis (3.0); 3 cr. This course helps students to improve their information literacy, and their basic information gathering and analysis skills using various navigation techniques and tools (search engines, databases…). Prerequisite: COA 201.

COA 252 Principles of Public Relations (3.0); 3 cr. This course covers the history, principles and practices of public relations with emphasis on publicity, public opinion and program planning. Corequisite: COA 201.

COA 270 Studio Workshop I (1.0); 1 cr. The course introduces students to the functions and operations of radio and television equipment. Students will get hands-on experience through operating the equipment and developing enhanced familiarity with cameras and digital technology. Essential for subsequent R/TV courses.

COA 272 Workshop in Audio and Video (2.0); 2 cr. The course provides students with practical training on analog and digital equipment in the radio and television industry. Its range of activities spans image and sound techniques, in addition to the functions and operations of radio and television.

COA 273 Workshop in Audio, Video and Film (2.0); 2 cr. The course builds upon the material and skills acquired in COA 272. It trains students in advanced skills in sound, camera, and editing equipment. Students will work with 16mm film and 35mm camera and will practice fundamental techniques used in shooting and developing films. Prerequisite: COA 272.

COA 275 Editing I (2.0); 2 cr. Students acquire the basic skills needed for working on a variety of editing systems, linear and non-linear. Topics covered in the course include basic setup, adjusting and customizing preferences and various editing and trimming techniques.

COA 276 Editing II (2.0); 2 cr. Continuation of COA 275. This course provides students with an overview of off-line and on-line video editing, music editing (an ability to apply music choices in creating soundtrack), editing theory, paper editing, working with editors, and possible post production pathways. It will also introduce students to the potential of digital technologies in the creation of television programs, the production of graphics, digital special effects, and the uses of high-end compositing systems. Prerequisite: COA 275.

COA 310 Scriptwriting (3.0); 3 cr. Students will study film terms and formats, work with treatment, scenario and shooting scripts, analyze film and television clips, shorts, tapes, and full-length films with emphasis on understanding the writer’s perspective. Numerous writing assignments and exercises will be assigned with the intent of developing a student’s ability to write for a visual medium. Students must write a script of a short film or video.

COA 311 Radio Programming (3.0); 3 cr. This course focuses on radio as a medium and industry. It introduces students to radio programming concepts and audio production techniques using studio equipment. Students will practice by producing and executing different radio shows.

COA 312 TV Production Techniques (3.0); 3 cr. This course introduces students to multi-camera studio production and location video recording. They will explore directing
techniques, operation of studio and control room, conceptualization, basic scriptwriting, audio board operations, and lighting in a studio setting. Prerequisite: COA 275.

**COA 315 World Cinema Survey (3.0); 3 cr.** This course will explore the world of cinema including American (north and Latin), European, Asian, African, Middle Eastern, and Lebanese cinema. Focus will be on the construction of a variety of film forms and styles, including the classic Hollywood style, experimental films, new wave, and global cinemas.

**COA 316 TV Production Techniques for Advertising (3.0); 3 cr.** This course introduces advertising and marketing students to the tools, techniques, and production skills essential to conceive, design, edit, and produce real-life television commercials and radio spots in a studio setting. Students will be involved in hands-on practice executing original storyboards. Oral presentations are required. Corequisite: COA 270.

**COA 320 The Film Director (3.0); 3 cr.** This course introduces the work of the director from thescriptwriting to the staging process, including pre-production, production, and postproduction. It also covers work with actors, and managerial responsibilities. Prerequisite: COA 275.

**COA 325 Directing and Acting Skills (3.0); 3 cr.** This course focuses on acting and directing actors in addition to the director-actor interaction, with focus on different methods and styles of acting, in relationship to the script and the characters. It includes building of a character, creating a role, and performing for live audience and in front of a camera. Corequisite: COA 310.

**COA 330 Documentary and Non-Theatrical Film (3.0); 3 cr.** This course centers on the study of the history, theory, craft and current practices within the genre of documentary filmmaking. Topics include investigating current theoretical debates surrounding documentary filmmaking by exploring a variety of styles, forms and conventions through both a film studies and production component. Students will produce a short documentary by the end of the semester. Corequisite: COA 312.

**COA 350 Current Issues (3.0); 3 cr.** In this course students will be introduced to local, regional, and international events and issues that are affecting the world today. The role and responsibility of the world citizen will be emphasized as the class conducts research on, develops understanding of, and examines the coverage given by the media, to various issues. Class discussions and presentations of various political, economic, and social issues constitute a sizable bulk of the course’s material. Topics may include: Globalization, Environmental concerns, Terrorism, Nuclear Proliferation, World hunger, drugs, the relationship between developing countries and developed countries.

**COA 352 Media Law and Responsibility (3.0); 3 cr.** This course offers a study of different types of censorship and their relationship to moral codes, religions, politics, laws, and society. It also gives an overview of media law in Lebanon.

**COA 359 Mass Media and Society (3.0); 3 cr.** This course explores the interactive relationship between media and society. It enhances students’ media literacy to help them decode messages critically. Issues discussed include: Impact of media messages; stereotyping; Media and Religion; Rock Music, and impact of Advertising among others. Prerequisite: COA 201.

**COA 360 Media Ethics (3.0); 3 cr.** This course provides students with a theoretical foundation to deal with ethical issues pertaining to the media such as dubious methods in news gathering, conflict of interests, invasion of privacy, shocking pictures, and intellectual dishonesty, among others.

**COA 362 Mass Communication Research (3.0); 3 cr.** Students will
become familiar with research design, data collection and analysis as applied in the various quantitative and qualitative research methods including some means of measurement. Students will also practice conducting a focus group session and interpreting the results. They will write and conduct a questionnaire. A well-documented research paper incorporating the principles of the course is required. It may not be taken concurrently with ADM 490, COA 490 and JOU 490. Corequisite: STA 202.

COA 365 Talk Shows (3.0); 3 cr. This course trains students for host, and execute a TV program that deals with various issues in front of a live audience.

COA 366 Diction and Presentation (3.0); 3 cr. Arabic and English. In this course students will learn how to speak for different types of programs. They will do exercises on pronunciation in Arabic and English, and they will learn the phonetics of both languages.

COA 367 Foreign Correspondence (3.0); 3 cr. This course studies the role of the foreign correspondent in news gathering. Is also examines the history of foreign correspondence, techniques, roles, and other tips. Prerequisite: COA 201.

COA 368 International Communication (3.0); 3 cr. This course overviews the mass media systems of the world with a concentration on the flow of information, and role of media in the development of the Third World. Prerequisite: COA 201.

COA 369 Selected Topics I (3.0); 3 cr. This course explores rotating themes in audio, video, film production to be proposed by students or instructors, and approved by the department prior to commencing work. Other non-technical topics may be offered.

COA 415 Broadcast News Operations (3.0); 3 cr. This course covers gathering, preparation, and presentation of a generic broadcast news product. It trains students in the process of directing news in all its phases such as equipment operation and crew management (camera operators, anchors, VTR operator, prompter, character generator, etc.). Prerequisites: COA 270, COA 275.

COA 416 Film Analysis and Aesthetics (3.0); 3 cr. The course focuses on structure, composition, design, and effects through frame-by-frame examination of motion pictures. This course stresses a particular director (Godard, Hitchcock, Altman, Losey, Bergman...), period, or style (film noir, suspense....) and studies how meaning is structured and perceived in the screen image. It includes close examination of the ways scholars, critics, and filmmakers have explained and discussed the materials used to make movies and how these materials may be used to construct films and produce meaning. The experiences of the viewer, critic, and community are discussed in this course in addition to the role of aestheticians and theorists.

COA 417 Comparative Cinema (3.0); 3 cr. This course compares trends, genres, and directors of various nations. It investigates several genres: the documentary, science-fiction, dramatic, comic, political, and romantic films. The course covers early animation and special effects, serials, avant-garde, surrealism, “poetic realism,” fantasy, etc.

COA 425 Writing and Reporting for the Electronic Media (3.0); 3 cr. This course examines the principles and practices of news-writing and reporting for the electronic media. It covers the major forms of writing, news styles, news gathering, and news evaluation. Prerequisite: COA 275.
COA 426 Electronic News Gathering (3.0); 3 cr. This course aims to familiarize students with shooting, editing and producing techniques for the electronic news media. Lecture and lab course provides students with experience as producers and directors for news programs. It also includes an overview of ENG equipment as well as EFP (Electronic Field Production) techniques and equipment and digital video production on location. Prerequisite: COA 312.

COA 430 TV Drama (3.0); 3 cr. This course involves both the theory and the practical elements needed to shoot, direct, and edit a TV dramatic production. Students shoot before a live audience. Final project requires a complete TV drama beginning with the original script to the final tape. Prerequisite: COA 310.

COA 435 Writing for TV and Film (3.0); 3 cr. This course provides students with an advanced study into the art of investigating, structuring, and writing original screenplays. Students will research and develop authentic characters, as well as how to generate a solid story plot devices using professional screenplay style. Different film genres and story techniques will also be explored, in addition to the process of literary adaptation of plays, novels, or short stories and transforming them into a feature-length film. Prerequisite: COA 310.

COA 437 Lighting for Film (3.0); 3 cr. This course focuses on operations with camera, lighting, and grip equipment as they apply to different film forms (narrative, documentary, experimental), genres, and styles. In-class and outside class group assigned filming exercises. Film screenings and field trips to complement class lectures, demonstrations, and discussions. Prerequisite: COA 226.

COA 445 Directing Actors for Camera (3.0); 3 cr. This course prepares students to become directing actors through exploration of equipment used in media performance: blue screen acting, ear prompting, teleprompting, and microphone applications in voice performance and voice over. It is based on exploration and skill-building of techniques used in performance before the camera including but not limited to advanced character development, make-up techniques, and special problems in character preparation for feature film. Prerequisite: COA 325.

COA 446 Theory of Sound (3.0); 3 cr. This course focuses on sound theory, sound as media, and the relationship between sound and image. These topics will be examined through reading and writing assignments, screenings and listening sessions, in-class presentations, recording assignments. Concepts of different theorists in sound will be introduced to students. Workshops on sound recording and sound editing may be held during the second half of the semester based on the technical requirements of student projects. This class encourages a critical, creative approach to the medium, non-traditional solutions, and awareness of the history of sound technology and media production. Prerequisites: COA 311, senior standing.

COA 447 Lighting Design and Techniques (3.0); 3 cr. This course covers lighting design for stage and video design, organization, graphic representation of lighting for stage, video and film production. It is based on laboratory work on actual stage presentations, video productions, and film shoots. Venues include performing arts stages, video studios, and sound stages along with shooting on location. Prerequisite: COA 226.

COA 455 Directing Techniques and Aesthetics (3.0); 3 cr. This course trains the students to deal with the techniques and aesthetics of the screen craft in order to create an artistic identity and understand the job of the director through all the production process. Prerequisites: COA 310, COA 312.

COA 456 Sound Design and Postproduction (3.0); 3 cr. This course is
a comprehensive technical examination of the role of sound as an emotional motivator and major storytelling component in both fiction and nonfiction films. The content covers location and sound recording, track building, mix preparation, music editing and scoring, and the spectrum of postproduction technologies. The course mainly introduces current digital innovations in the field and in postproduction, and provides a workshop for solving ongoing editing and track-building problems. Corequisite: COA 446.

COA 457 Cinematography (3.0); 3 cr. The main focus in this course is on cinematographic techniques for film and video. Students will analyze cinematographic styles, including qualities of camera movement and composition, lenses, and lighting as expressive tools. They will equally explore aesthetics, techniques, and responsibilities of the cinematographer. Students will get hands-on experience shooting scenes with film and video cameras, lighting, and grip equipment. Prerequisite: COA 226.

COA 466 Sound for Animation (3.0); 3 cr. This course covers the principles of sound track design to accompany the unique properties of the animated image. It also focuses on techniques of musical synchronization and lip-synched character.

COA 475 Computer Graphics and Video Animation (3.0); 3 cr. This course is designed to further the students skills in applying computer graphics in developing video animation projects. It also includes the use of computer animation as applied to a variety of art media. The course incorporates principles of movement and timing, lighting, cinematography, and multi-plane dimensionality as applicable to computer and traditional drawn animation and drawn representation of telephoto or wide-angle lens perspective and depth of field.

COA 476 Compositing (3.0); 3 cr. This course explores basic and intermediate aspects of compositing, animating, and creating special effects and motion graphics with compositing software. Students practice effects, enhance the look of existing footage, and create entire animations from inception through practical application and use of compositing software in the commercial world.

COA 480 Internship for Radio, TV, and Film (1.0); 1 cr. The course is a practical supervised off-campus work experience that relates to the student’s career objectives. Prerequisite: Senior Standing.

COA 490 Senior Study (3.0); 3 cr. The course provides a comprehensive overview of the phases and procedures that go into film production; Students are required to produce and present a short film, which may vary depending on their area of concentration. Prerequisite: COA 362, senior standing. The passing grade is “C” grade or above.

COA 499 Independent Study (3.0); 3 cr. This course offers advanced topics in communication chosen to meet individual student needs and interests, supervised by assigned instructors. Prerequisite: Senior standing or permission by the head of the department.
The Degree of Master of Arts in Media Studies

Mission
The mission of the M.A. program in Media Studies is to prepare its graduates to become lifelong commentators, media text makers, and media interpreters in a globalized world. It provides students with conceptual and analytical tools and practical experience to pursue careers in communication, to further academic enhancement at the doctoral level, and to help those already working in those fields upgrade their knowledge in their chosen area of study.

Program Educational Objectives
The program will prepare students to:
- Pursue higher studies towards a doctoral degree;
- Acquire in-depth knowledge and research skills in the workplace;
- Contribute to the growth and ethical development of the field in Lebanon and the region.

Program Learning Outcomes
Upon graduation, students should be able to:
- Communicate ideas for effective media production;
- Synthesize diverse perspectives in order to contribute to an ethical media environment;
- Apply appropriate research methodologies to produce scholarly work;
- Employ effective communication strategies in the production and consumption of traditional and digital media.

Admission Requirements
The program admits students holding Bachelor degrees in any of the areas listed above as well as those holding degrees in other majors. Students from non related majors must take and pass a number of preparatory courses which the department deems necessary to pursue a Master of Arts in Media Studies. A student must obtain at least a “B” grade in any remedial course.
Candidates should have a GPA of 3.0. Applicants with a GPA between 2.8 and 3.0 may be admitted on a probationary basis. They must achieve a GPA of 3.0 in their first semester in order to continue in the program. Candidates must also submit three letters of recommendation, an updated C.V., and a personal statement explaining their educational goals and reasons for selecting this area of study. Other university graduate admission requirements may apply as specified in the catalog.

Graduation Requirements
All students must take a total of 15 credits in the general field of Mass Communication in addition to 12 credit hours in the concentration area, the remaining six credits will be selected from a pool of courses offered by the program. Students must write a 6-credit thesis to bring the total to 39 hours required for graduation. Students must maintain an overall GPA of 3.0/4.0 for the 39 credits required to graduate. Students must repeat any course on which they earned a “C-” grade or less.
**Degree Requirements (39 credits)**

**Core Courses**  
COA 610, COA 613, COA 652, COA 680, COA 681.  
15 cr.

**Major Requirements - Advertising**  
**Student must choose 12 credits from the following courses:**  
ADM 620, ADM 621, ADM 635, ADM 650, ADM 651, ADM 681.  
12 cr.

**Major Requirements - Television Management and Production**  
**Student must choose 12 credits from the following courses:**  
COA 620, COA 630, COA 635, COA 650, COA 655, COA 685.  
12 cr.

**Major Requirements - Electronic Journalism and Public Relations**  
**Student must choose 12 credits from the following courses:**  
COA 655, JOU 610, JOU 621, JOU 630, JOU 631, JOU 635, JOU 640.  
12 cr.

**Major Pool Electives**  
**Student must choose 6 credits from the following courses:**  
ADM 651, ADM 681, COA 631, COA 660, COA 682, COA 685, JOU 631, JOU 680.  
6 cr.

**Thesis Requirements:**  
COA 690  Thesis I  
3 cr.  
COA 691  Thesis II  
3 cr.

Television Management and Production students may choose to replace COA 690 and COA 691 with:  
COA 692  Film  
6 cr.
Graduate Courses: Media Studies

ADM 620 Advertising and Marketing Management (3.0); 3 cr. The course examines the general array of agency personnel and studies the functions of each department including the duties and responsibilities of key decision-makers in the agency.

ADM 621 Seminar in Integrated Marketing Communication (3.0); 3 cr. The course applies the theories of integrated communication tools such as marketing, advertising, public relations, e-commerce, and others. It also looks at IMC’s usage, management, and limitations.

ADM 635 Advanced Advertising Campaigns (3.0); 3 cr. The course provides students with an in-depth understanding of the principles and practices that businesses use for their marketing communication strategies including advertising using traditional and new media. It introduces students to advanced research, strategy formation, client presentation, and execution of an advertising campaign for a national client. The purpose is to come up with breakthrough advertising strategies that provide companies with a competitive advantage in the marketplace.

ADM 650 Advanced Media Planning (3.0); 3 cr. The course provides students with advanced studies in media planning concepts and strategies. It trains students how to use media as a competitive business tool through the integration of related theories from marketing and communication in media planning. Students become acquainted with multiple up-to-date media buying strategies, horizontal and vertical media planning, and media buying software.

ADM 651 Advanced Creative Strategy in Advertising (3.0); 3 cr. The course familiarizes students with the theoretical foundations and conceptual techniques of creative strategies in advertising and marketing communications. Students practice the research processes required to formulate idea-based solutions to advertising and marketing problems. Students explore, formulate, and evaluate creative strategies for various print and digital media used by advertisers.

ADM 681 Seminar in Advertising and Society (3.0); 3 cr. The course critically examines the role of advertising and its effects on the individual and society within the larger social, cultural, political, economic, and global contexts. Advertising is investigated as a central component in the capitalist economy and a cultural driving force that affects and is affected by norms and attitudes. Advertising campaigns and their implications in the modern world are explored as sites for the negotiation and construction of identity, nationality, faith, belongingness, gender, and ethnicity.

COA 510 Communication Concepts and Practices (3.0); 3 cr. The course provides prospective master’s students from other disciplines with an overview of the basic communication concepts in the fields of journalism, public relations and advertising. Students get acquainted with key communication terms and practices involved in the fields of study such as campaigning, reporting, and copywriting and branding, as well as research methods.

COA 512 Topics in Broadcasting and Digital Media (3.0); 3 cr. This course provides prospective Master’s students coming from other disciplines with an overview of concepts in the fields of broadcasting and digital media. Students will become acquainted with key production techniques, aesthetics, theories and practices.

COA 610 Theories of Mass Communication (3.0); 3 cr. This course stresses theory in relation to the form, effects, production, and content of mass media. The theories covered in the course help guide
student’s comprehension and inquiry into the role that mass media play in society. Each theory covered offers a number of assumptions about the media, society, and the individual, while describing how these elements interact and shape each other. The course provides students with theoretical foundations that would guide research and comprehension of new theoretical contributions and future developments in theory.

**COA 613 Semiotics of Images (3.0); 3 cr.**
The course introduces students to semiotic tools that would enable them to analyze and understand visual culture texts, pictures, and multimodal texts. It will draw on historical and contemporary examples from new media, television, film, and other forms of visual communication. (The objective is to critically analyze and interpret visual phenomena with an understanding of the underlying cultural and political power structures.)

**COA 620 Comparative Broadcasting (3.0); 3 cr.** This course focuses on the study of global electronic media systems. The objective of this course is to analyze rules governing the regulations and the flow of programming between nations. The course also examines the construction of new satellites and transmission systems.

**COA 630 Broadcast Station Management (3.0); 3 cr.** This course explores and analyzes the problems of management, programming, sales, promotion, and marketing. Emphasis is on the study of management issues such as decision-making, news evaluation, budgeting in both commercial and non-commercial broadcast media.

**COA 631 Media and Politics: (3.0); 3 cr.** This course examines the power of mass media on the political sphere, especially in democratic societies, and the interplay of influence between the two. The role of media consultants in such processes is examined.

**COA 635 Television and Promotional Strategies (3.0); 3 cr.** This course focuses on the design and development of promotional strategies for television. It covers areas in television promotion including program format, genres, production processes, scheduling, rating systems, and program development processes. It also covers the historical and conceptual development of broadcast advertising while dealing with the implications of new media.

**COA 650 Advanced Television Production (3.0); 3 cr.** This course fosters the skills needed to plan and produce television programs. It focuses on initial research writing process, aesthetic decisions, and final production. Throughout this process students are expected to develop and produce several programs for television.

**COA 652 Advanced Research Methods in Mass Communication (3.0); 3 cr.** This course focuses on the study of communication content and messages’ forms in addition to their impact on the audience. It emphasizes research methods, data gathering, sampling, and the application of those methods in mass communication and advertising. Corequisite: COA 610.

**COA 655 Documentary Films (3.0); 3 cr.** The course presents an advanced exploration of documentary cinema, its structure, forms, cinematographic language, aesthetics, and schools. It involves the analysis of documentary productions and their impact. Prerequisite: COA 610.

**COA 660 Independent Study (3.0); 3 cr.** This course takes into consideration the instructor’s specialization and the student’s interest and requires the completion of a research paper.

**COA 680 Seminar in Mass Communication Law and Ethics (3.0); 3 cr.** This course studies the legal and ethical controls of media such as government’s regulations and industry laws. Codes of ethics and traditional societal or self-imposed guidelines that govern the performance
of the media are discussed. This course incorporates the implications of religious morals, specifically those of the Catholic Church, on the legal and ethical functions of the mass media.

COA 681 Seminar in Cross-Cultural Communication (3.0); 3 cr. This course focuses on the study of how culture, identity, values, and beliefs shape the creation and perception of communication messages at the local, national, and international level. Topics include identity, perceptions of masculinity and femininity, ethnocentrism and the “Other,” colonialism and cross-cultural encounters, language, power, and globalization.

COA 682 Seminar on the Lebanese Media (3.0); 3 cr. This course explores the Lebanese media and includes topics such as history, economics, and current practices and trends. The seminar also examines how the Lebanese culture is shaping and is being reshaped by the Lebanese media.

COA 685 Entrepreneurship in Media (3.0); 3 cr. This course familiarizes students with the fundamentals of entrepreneurship and the evolving business models for media. It also emphasizes the transformations in the new media landscape. Students are expected to create a business plan for a media start-up.

COA 690 Thesis I (3.0); 3 cr. Students must present a written thesis proposal that includes a statement of the topic, a review of literature, a presentation of the theoretical foundations, and a statement of the nature of the data collection, procedures, and analysis. Students must complete 21 major credit hours prior to registering for this course. To pass this course, students must defend their thesis proposal. Prerequisites: COA 610, COA 652.

COA 691 Thesis II (3.0); 3 cr. This course is the logical extension of thesis 1. At this stage, students work on their data gathering and analysis, finalize the writing, and formatting of the study. Prerequisite: COA 690.

COA 692 Film (6.0); 6 cr. Students must produce and direct a thesis film on a significant topic upon consultation with the advisor. The film must be accompanied by written requirements defending all the filmic elements use. Students must complete 21 major credit hours prior to registering for this course. Prerequisites: COA 601, COA 652 and COA 655.

JOU 610 Newsroom Management (3.0); 3 cr. This course covers the internal management of media outlets operation, practice, status of personnel, budgeting, and effects of technological developments on organization and strategies.

JOU 621 Editorial Operation (3.0); 3 cr. This course focuses on discussion of the decision-making process in the newsroom. Various elements influencing the day-to-day operation of the print media are covered; students also examine the role of owners and gatekeepers. Corequisite: JOU 610.

JOU 630 PR Programs and Campaigns (3.0); 3 cr. This course focuses on planning operation of PR programs prepared for various organizations. It also includes analysis and discussion of real-life situations and real-life problems in addition to a construction of events which might take place.

JOU 631 International Public Relations (3.0); 3 cr. The course highlights the role of public relations in the new age of global marketing and communication. The topics include: global campaigns, international corporate PR, and cyberspace PR, while examining social media tactics and strategies.

JOU 635 Issue Anticipation and Crisis Management (3.0); 3 cr. This course will provide students with the skills to foresee potential problems; locate solutions, and react adequately. It also prepares them to apply highly sophisticated communication strategies to crisis management.
JOU 640 Online Journalism (3.0); 3 cr. This course focuses on promoting the best practices in online journalism covering both multimedia and online storytelling. Journalism students will acquire hands-on experience in the production of many content types of digital media.

JOU 680 Seminar in Selected Topics (3.0); 3 cr. This course is a research seminar which focuses on various topics such as freedom of the press, media and gender roles, media and religion, and other topics.
MINOR IN PHILOSOPHY
The NDU minor in Philosophy is comprised of 18 credits. Any student may elect to get a minor in this area provided that he/she is in good academic standing, i.e. securing a minimum GPA of 2.0/4. A student selecting this minor may only count up to six credits which he/she may have taken from the list of required courses for this “Minor” in Philosophy. Minors must be declared at least one year before expected graduation date.

Program Educational Objectives
- Understanding the human quest for truth, and the different ways humans engaged in this quest;
- Showing how philosophy is the foundation of human quest for knowledge - whether theoretical or practical;
- Gaining familiarity with the World’s major philosophical traditions;
- Developing the ability to assess arguments using logic, critical thinking and argumentative methods;
- Gaining knowledge of various philosophical and cultural traditions;
- Enabling students to express philosophical ideas through both written and oral forms;
- Encouraging students to respect -and interact with - diversity for it is the only proper attitude leading to a genuine dialogue.

Courses required:
- Students enrolled in the Philosophy minor must complete 18 credits:
  - PHL 232  Ancient World Philosophy 3 cr.
  - PHL 211  Logic and the Scientific Method 3 cr.
  - PHL 311  Ethics and the Modern World 3 cr.
  - PHL 333  Medieval World Philosophy 3 cr.
  - PHL 334  Modern & contemporary World Philosophy 3 cr.
  - PHL 411  Philosophical Themes 3 cr.

1GRE course
Minor in Sociology
The NDU minor in sociology is comprised of 15 credits. Any student may elect to get a minor in this area provided that he/she is in good academic standing, i.e. securing a minimum GPA of 2.0/4. A student selecting this minor may only count up to six credits which he/she may have taken from the list of required courses for this “Minor” in Sociology. Minors must be declared at least one year before expected graduation date.

Program Educational Objectives
- to help students understand and appreciate the kinds of questions sociologists ask and the kind of explanations they offer;
- to familiarize students with some of the major issues, problems, and findings in sociology;
- to introduce students to interpretative and critical skills needed for the sound study of sociological phenomena;
- to improve cognitive and communication skills; exercises and regular assignments are intended to enhance students’ abilities to read, analyze, discuss, and write skillfully;
- to approach challenges faced by groups with a sociological perspective, through research, need assessment, design and application of training programs, such as team building, group dynamics, conflict resolution, etc.

Course Required
- Students enrolled in the Sociology minor must complete 15 credits:
  SOL 201 Introduction to Sociology 3 cr.
  SOL 316 Society and Women 3 cr.
  SOL 322 Family: Sociological Perspectives 3 cr.
  SOL 323 Society and Role of Intercultural Communications 3 cr.
  SOL 415 Society, Sexuality, and education 3 cr.
Undergraduate Courses: Philosophy

**PHL 101 Introduction to Philosophy (3.0); 3 cr.** This course is meant to help Freshmen students develop a genuine thinking process, and highlight the exceptional and unmatched value philosophy reveals about the mere fact of being human. Accordingly, Freshmen students are shown the relevance of philosophy to every person in every field and are guided on how to develop critical thinking.

**PHL 111 Introduction to Ethics (3.0); 3 cr.** This is a philosophy course that introduces Freshmen students to ethical (moral) thinking, and to what constitutes a moral agent. This course aims at analyzing the considerations that may count as reasons for and against the moral judgments students make. Selected texts on relevant topics treated by different scholars are addressed as illustrations.

**PHL 211 Logic and the Scientific Method (3.0); 3 cr.** This course introduces students to what may be called traditional logic. Emphasis is placed on the “Greek” philosophical tradition. Accordingly, there is a focus on Aristotle’s Organon and its influence on the corresponding important medieval traditions in Europe. Prerequisite: ENL 213.

**PHL 232 Ancient World Philosophy (3.0); 3 cr.** This course introduces Philosophy as the discipline that seeks to find answers to fundamental questions raised by every human, such as ‘what is reality,’ ‘what is knowledge,’ ‘how is it possible to know’, and ‘what is the best way to live’. While showing the distinctive- yet relational- nature of philosophy, with regard to science, art and religion, this course offers basic previews of major landmarks, namely Far East traditions, such as Buddhism, Daoism, Confucianism, and Hinduism, pre-Socratic thinkers - such as Thales, Pythagoras, Parmenides and Heraclitus, classical Greek philosophers - i.e. Socrates, Plato, Aristotle, and the Hellenistic schools of Stoicism, Skepticism and Epicureanism. Prerequisite: ENL 213.

**PHL 311 Ethics and the Modern World (3.0); 3 cr.** This course offers a general analysis of early approaches to ethics in ancient and classical religious cultures, and focuses on the different modern schools of ethics. It also familiarizes students with basic moral codes defining concepts of goodness, right, and obligation, and gives them an overview of the ways these concepts operate. Prerequisite: ENL 213.

**PHL 333 Medieval World Philosophy (3.0); 3 cr.** This course covers more than a millennium of philosophical thought, mostly marked by Christianity’s encounter with, and integration of classical Greek philosophy. Medieval World Philosophy includes African and Far East thinkers, all of whom offering different dimensions in their interpretations of the human’s encounter with reality, dimensions such as metaphysics, ethics, logic and philosophy of mind. The distinctive nature of each dimension opens before students new horizons in their quest for the truth. Prerequisite: ENL 213.

**PHL 334 Modern and contemporary World Philosophy (3.0); 3 cr.** This course offers a study of the central philosophical themes addressed in the modern/contemporary period from different angles: epistemological, metaphysical, moral, and mystical among others. The main themes of the course are related to the nature of mind and body, the way our consciousness apprehends the external world, the existence of God, rationality and non-rationality, and the quest for freedom. Students are exposed to the ways these themes are addressed by thinkers such as Descartes, Kant, Hegel, J.P Sartre, Gabriel Marcel, Mahatma Gandhi, Debendranath Tagore and others. Inspired by all these thinkers, students are invited to find their own way of experiencing the world, in their journey searching for meaning and truth. Prerequisite: ENL 213.
**PHL 351 Lebanese Philosophy (3.0); 3 cr.** This course addresses the Lebanese philosophical attempts from their early Phoenician roots, through the present stage. More emphasis is placed on the philosophers of the modern and contemporary periods. This course is taught in Arabic. **Prerequisite:** ARB 211 or ARB 212 or ARB 231.

**PHL 411 Philosophical Themes (3.0); 3 cr.** This course guides students into a thorough discussion of central themes in philosophy, as addressed by scholars from across the philosophical tradition. Such themes may be: God and human freedom, love and its effects on life; death and how to deal with it; the nature of suffering, and its effects on our lives; and empathy and its effects on our well-being in times of suffering. All these - and other themes- are treated in the light of the quest for happiness, which ultimately leads to joy, another central theme in Philosophy. Different theories on the mentioned themes are meant to help students enter more deeply into these perennial questions. **Prerequisite:** ENL 213.

---

**Undergraduate Courses: Religion**

**REG 101 Introduction to Religion (3.0); 3 cr.** This course offers an elementary comprehensive approach to the characteristics of religions that have influenced history: The major concept(s) of what man is; the essential need man has for religion; the meaning, function, and objective(s) of religion; the different approaches to salvation; religion’s basic constituents; the different concepts of God in relation to man and to the universe; the different forms of communication between man and God(s)... and finally the ever rising focal importance of religion, and therefore of God, in human life. For Freshmen students. **Prerequisite:** ENL 213.

**REG 212 Religion and Social Issues (3.0); 3 cr.** This course introduces the contributions of the three major monotheistic religions to reach a better understanding of the relationship human beings have with the universe: God, Human Being and Nature. The mainstream beliefs of the three religions will be examined through an overview of major issues relevant to the religions studied. **Prerequisite:** ENL 213.

**REG 213 Catholicism (3.0); 3 cr.** This course presents the basic teachings of the Catholic Church and attempts to show how they can be understood and lived by today’s youth: God through the creeds; the Church in its historic developments; the Sacraments which help the faithful to practice their faith; Prayers; Saints; and the position of the Catholic Church on important controversial issues. **Prerequisite:** ENL 213.

**REG 215 World Religions (3.0); 3 cr.** This course explores the variety of ways people have articulated their connections with the Sacred. Major religious traditions are addressed, namely, Christianity, Judaism, Islam, Hinduism, Buddhism, Confucianism, and Taoism. Frequent references are also made to ancient religious cultures such as the Mesopotamian, Persian, and Egyptian. **Prerequisite:** ENL 213.

**REG 313 The Maronites: Faith and Cultural Heritage (3.0); 3 cr.** This course is an introduction to the Maronite cultural heritage. It addresses Maronite theology and spirituality in the context of secular, social, and ecclesiastical history, from ancient through contemporary times. A particular emphasis is placed on the question of Maronite identity, while highlighting contributions of the Maronite faith and cultural heritage to the development of the region. **Prerequisite:** ENL 213.

**REG 314 Marriage and Family in the Catholic Church (3.0); 3 cr.** This course examines traditional and contemporary
views of marriage and family in the light of the Catholic tradition. It also presents the Catholic teaching on marriage and the family. A particular emphasis is placed on theological and ritual Syriac-Maronite contributions. Prerequisite: ENL 213.

---

**Undergraduate Courses: Sociology**

**SOL 101 Essentials of Sociology (3.0); 3 cr.** Is designed to introduce Freshmen students to different sociological perspectives through key sociological issues such as social class, race, gender, sexuality, religion, crime, and the media. It also investigates the causes and consequences of human behavior and offers an insight into the relationship between society and the individual.

**SOL 201 Introduction to Sociology (3.0); 3 cr.** This course provides an overview of Sociology as a secular discipline that explores social, religious, political, and economic issues in terms of social institutions, social forces, and group interactions. By so doing, this course explores different structures and combinations of social forces that influence the individual’s social behavior, and render him better qualified to become an active citizen of the world. Prerequisite: ENL 213.

**SOL 301 Introduction to Cultural Anthropology (3.0); 3 cr.** This course offers an overview of human cultures, their beliefs, practices, values, ideas, technologies, economies and other domains of social and cognitive organization. It also provides a comparative framework for viewing cultural institutions and social roles in traditional and complex societies. Prerequisite: ENL 213.

**SOL 313 Family Violence (3.0); 3 cr.** The course sheds light on the different types of family violence and the factors behind them. It also presents Family violence as not limited to violence against the wife and/or child, but violence committed by any family member, and suffered by any other family member - and sometimes by the rest of the family. The ultimate objectives from all this is to prevent such violence from taking place, or to look for proper solutions for it. Prerequisite: ENL 213.

**SOL 316 Society and Women (3.0); 3 cr.** This course explores significant contributions achieved by women - in addition to those in the family - in education, politics, the workplace, and others fields. The course also focuses on the negative effects on women that may be caused by popular cultures, religion, sexuality, the economy, the family, health care, and government policies, among others. Special focus is placed, on race and ethnicity, religion and social class, and on different forms of gender inequality. Prerequisite: ENL 213.

**SOL 322 Family: Sociological Perspectives (3.0); 3 cr.** This course covers a broad understanding of the family in a multi-cultural society; it also offers an analysis of family communication patterns in a series of public and private settings. The course reflects the foundations of a solid family structure. Students are involved in real case studies emphasizing different universal models of family structures. Moreover, students are exposed to different family types and their resulting effects on culture, religion, education and economy. Prerequisite: ENL 213.

**SOL 323 Society and Role of Global Intercultural Communication (3.0); 3 cr.** This course is designed to give students an overview of various issues pertaining to communication across cultures, nationally and internationally. “Global Intercultural Communication” addresses diversity amongst different ethnicities and prepares students from different backgrounds to avoid
miscommunication and to interact in a global community using effective communication skills. *Prerequisite:* ENL 213.

**SOL 415 Society, Sexuality, and Education (3.0); 3 cr.** This course is an exploration of the sociological study of sex, gender, and sexuality. The central themes of the course will be the social processes that influence our gender and sexual identities, and the connections between gender, sexuality, and inequality. Special attention is given to basic characteristics of adolescent sexuality vis-a-vis a wide diversity of sexual attitudes and behaviors in general, and vis-a-vis the Arab world in particular. *Prerequisite:* ENL 213.

FACULTY OF LAW AND POLITICAL SCIENCE

FACULTY PROFILE
The Faculty of Law and Political Science was founded and licensed in 2000 as a Faculty of Political Science, Public Administration and Diplomacy that emerged from the Faculty of Humanities around the core degree program of International Affairs and Diplomacy.

The rapid evolution of the new Faculty was the outcome of a dedicated collaborative effort of the expert faculty members and administrators who launched a persistent campaign of courses development and programs design. This process was guided by the mission and values that the Faculty has adopted for itself, by the needs of the society/market, and by the pioneering role of NDU that is needed in the region especially in the current critical times and that gave it a genuine advantage over competitors. The outcome of this effort presents itself in the 13 different programs and emphasis that the Faculty currently offers.

A major achievement was accomplished in 2013 with the introduction of the first fully licensed Bachelor of Lebanese Law that is taught in English and Arabic, upon which the Faculty was transformed into the Faculty of Law and Political Science. Other recent curricular development included the introduction in 2011 of an MA level emphasis in Human Rights (also a first in Lebanon) under the major of Political Science along with two new minors in Strategic Studies and Gender Studies. The Faculty implements continuous curricular review and innovations towards developing new courses and programs that serve the needs of prospective students and the mission of the Faculty.

The Faculty of Law and Political Science consists of two Departments:
- Department of Law;
- Department of Government and International Relations.

The Faculty of Law and Political Science offers programs leading to the degrees of:
- Bachelor of Law;
- Bachelor of Arts in International Affairs and Diplomacy;
- Master of Arts in International Affairs and Diplomacy;
- Master of Arts in International Affairs and Diplomacy - International Law Emphasis;
- Bachelor of Arts in Political Science;
- Bachelor of Arts in Political Science - American Studies;

MISSION, VISION AND VALUES

Mission
The mission of the Faculty of Law and Political Science is to provide quality education that helps build in our students the characteristics of high intellect, moral integrity, enlightened citizenship, human solidarity, and responsible leadership in the public and private sectors. We serve our community by enhancing awareness about rule of law, human rights, the common good, sustainable development, peace education and other basic precepts of democratic governance; and by connecting it to the rest of the world through educational networks of cooperation and original applied research.

Vision
The Faculty of Law and Political Science envisions itself as a leading national and regional platform of intellectual and scholarly discourse on issues of government, politics, international relations, and human organization. We consistently strive to provide our students and community with the most evolved education by introducing new courses and programs that cover new and expanding disciplines. The aim is to enrich the minds of our students with the most developed analytical and critical thinking approaches that transform them into leaders in the service of the community and essential interlocutors in the cultural/civilizational dialogue.

Values
True to the Maronite Catholic traditions of NDU, FLPS is dedicated to serve as a beacon of enlightenment in the continuous search for truth and better life. In this pursuit, we are guided by a value system founded on:

- Academic excellence;
- Integrity;
- Individual initiative;
- Intellectual freedom;
- Responsible citizenship and accountable leadership;
- Human solidarity;
- Conflict transformation and peace building;
- Diversity, dialogue, and cooperation;
- Subsidiarity;
- Catholic Social Theory.
ACADEMIC DEPARTMENTS AND DEGREE PROGRAMS
Bachelor Degrees

Admission Requirements:
Compliance with the general rules and regulations applied by NDU in the general Catalogue.

Graduation Requirements:
Students seeking the degree of Bachelor of Law must complete a total of 140 credits, with an overall average of at least 2.0/4.0, and a minimum average of 2.0/4.0 in the major requirements. Students seeking the degree of all other Bachelor of Arts must complete a total of 105 credits with an overall average of at least 2.0/4.0 and a minimum average of 2.3/4.0 in the major requirements.

Residency Requirements:
1. Residency Requirements for Bachelor of Law:
   A minimum of 8 semesters (4 years) beginning with the Baccalaureate II or it’s equivalence and a maximum of 16 semesters (8 years).

2. Residency Requirements for all other Bachelor of Arts:
   A minimum of six semesters (3 years) and a maximum of twelve semesters (6 years).
DEPARTMENT OF LAW

Professor: Bou Saber, Maan
Assistant Professor: Mansour, Yara

The Degree of Bachelor of Law
In its academic endeavor to fulfill its mission and as essential part of the implementation of its share of the NDU Mission in building “enlightened citizenship” for a civil society and “world of truth, justice, love and freedom,” under the rule of law, the Faculty developed the program of the Lebanese Bachelor of Law that answers the need for a better education of Law.

The new program accredited by the Lebanese Ministry of Education and High Education adds the English language component and the American educational approach to law studies. It maintains excellence in the coverage of the State required materials and augments them with a wealth of additional courses dealing with contemporary and futuristic topics, and using the most advanced teaching methodologies and techniques. Our graduating jurists will enrich the profession with new expertise and perceptions, acquired with the highest international standards of academic excellence, enhancing their service capabilities to the community and the employability with local, regional and international firms, properly connecting Lebanon and its institutions to the globalized markets, laws and systems.

However, this curriculum and this degree do not allow the students to join any Bar Association in any foreign country unless after fulfilling the requirement set forth by each country.

Mission
Acknowledging the Rule of Law as the core premise for societal civility and development, the program aims at providing students with the most evolved education of all legal systems: Romano-Germanic, Civil Law, Common Law, Islamic Law, and all branches of Law: public, private, Comparative, domestic, and international Law. It also aims at graduating successful jurists who emerge as professional and societal leaders in pursuit of justice; committing themselves to ethical service of clients and the public, defending Human Rights and stand out as the ultimate vanguards of proper Citizenship and the Rule of Law.

Program Educational Objectives
the Bachelor of Law program aims to:
• Prepare students to pass the licensure exam;
• Equip students with adequate theoretical and research background to follow graduate studies in the fields of LAW;
• Provide students with skills to integrate technology and learned professional techniques into practice;
• Install leadership and efficient management qualities in graduates;
• Integrate ethical principles and lifelong learning in future professional practice;
• Integrate ethical principles and lifelong learning in future professional practice;
• Develop an understanding of LAW in both Arabic and English language.

Program Learning Outcomes
Upon graduation from the Law Program, students shall be able to:
• Demonstrate an understanding of all legal systems (Romano-Germanic, Common Law, and Islamic Law);
• Demonstrate an understanding of domestic and international Law;
• Demonstrate an understanding of comparative Law;
• Demonstrate an understanding of private and public Law;
• Develop an understanding of banking, commercial, financial, and investment Law;
• Develop art of oral argument;
• Develop an understanding of different Lebanese Laws: civil law, commercial law, criminal law, procedure law, banking law, personal status law, intellectual property law, labour law, arbitration law, contract law, tort law, administrative law, real estate law, international criminal law, constitutional law, civil liberties and human rights, maritime and air law, obligations law, public and private international law;
• Stipulate contracts, legal consultations, legal research, judgments and arbitration awards;
• Develop an understanding of Law in both Arabic and English language.

Professional life
The study of the program, the resulting skills acquisition and readiness of students prepare them for a professional life by enabling them to:
• Join the Beirut or Tripoli Bar Association in Lebanon;
• Join the Institute of Judicial Studies in Lebanon;
• Apply to become a public notary;
• Apply to any public or private job-whether administrative, advisory, or diplomatic;
• Work in the trade sector and the private investment sector in both Lebanon and abroad;
• Work as a legal advisor in both Lebanon and abroad;
• Work as a university professor in both Lebanon and abroad;
• Work in official national, international, or non-governmental organizations (NGOs);
• Continue to study the Law in both Lebanon and abroad at higher levels of study (L.L.M., J.D., PhD).

Degree Requirements (140 credits)

Liberal Arts Curriculum  12 cr.

Liberal Arts Curriculum for the Law degree are 12 credits divided according to the below pools:

(3) credits of the following pool
ARB 211: Appreciation for Arabic Literature
ARB 212: Advanced Arabic Grammar
ARB 224: Arabic Literature and Human Thought
ARB 231: Technical Arabic
ARB 306: The Modern Arabic Novel & Short Story
ARB 310: Arabic Theater

(6) credits of the following pool
ENL 213: Sophomore English Rhetoric
ENL 223: Communication Arts
ENL 230: English in the Workplace
(3) credits of the following pool
REG 213: Catholicism
REG 212: Religion and Social Issues
REG 314: Marriage and Family in the Catholic Church
REG 313: The Maronites: Faith and Cultural Heritage

LAW 201 Civil Law I: Introduction to Law I - Theory of Law (3.0); 3 cr. Civil Law is the basis of legal science. It is the only course taught for eight semesters, which allows students to obtain a Bachelor of Laws degree. The General Theory of Law is taught during the first semester. Course topics include the concept and characteristics of legal rules; division of legal rules (the branches of law); sources of legal rules; interpretation and construction of legal rules; application of legal rules (the judicial authority, application in the time and space); and legal systems (Romano-Germanic Law, Common Law, Islamic Law, Asiatic Law, etc.).

This lecture is supported by a workshop that helps the students to understand the course.

Language of Instruction: Arabic (legal terms, however, are also given in English and French).

LAW 202 Civil Law II: Introduction to Law II - Theory of Right (3.0); 3 cr. Civil Law is the basis of legal science. It is the only course taught for eight semesters, which allows students to obtain a Bachelor of Laws degree. The General Theory of Rights is taught during the second semester. The syllabus comprises the following topics:

• Definition of Rights;
• Types of Rights (political/civic rights - non-political rights: human rights; private rights: family rights, personal rights, chattels real, intellectual property);
• Elements of Rights (person - object - protection);
• Sources of Rights (juristic fact - juristic act).

Prerequisite: LAW 201.

This lecture is supported by a workshop that helps the students to understand the course.

Language of Instruction: Arabic (legal terms, however, are also given in English and French).

LAW 203 Civil Law III: Obligations and Contracts - Sources (4.0); 4 cr. The Law of Obligations and Contracts is one branch of Private Law under the Civil Law legal system. It is the body of rules that organizes and regulates the rights and duties, arising between persons within society. This course aims to provide students with an understanding of the basic principles of Obligation and Contract Law in Civil Law. The course examines the concepts employed by the law for creating and enforcing obligations, including all sources of obligations (law, contracts, quasi-contracts, delicts, quasi-delicts) or contracts (law, contract, tort, unjust enrichment, obligation by unilateral will or unilateral promise).

By the end of this course, students should be able to:

• Differentiate between the different kinds of Obligations and Contracts in Private Law;
• Identify the essential principles of obligation and contract in each branch, as derived from leading cases;
• Explain the rules relating to the formation of contracts and certain further requirements, which must be satisfied to make contracts legally enforceable;
• Explain the contents of a contract and the rules governing the validity of terms, which exclude or restrict liability; and
• Explain how the principles of Obligations and Contracts reflect special and economic objectives.

Prerequisites: LAW 201, LAW 202.

This lecture is supported by a workshop that helps the students to understand the course.

Language of Instruction: Arabic (legal terms, however, are also given in English and French).

LAW 204 General Constitutional Law I (3.0); 3 cr. This course examines the general constitutional theories of the state and the political system; the different types of State; the nature of constitutions, as well as the relationship between the legislature, executive, and judiciary; the constitutional values, principles, rights, and civil liberties, in light of the long tradition of diverse
philosophical and theoretical perspectives.

Language of Instruction: Arabic (legal terms, however, are also given in English and French).

LAW 205 Special Constitutional Law II (3.0); 3 cr. This course examines the formation, structure, and basic principles of Lebanese Constitutional Law, and will provide a comparative perspective on the Lebanese Constitution by looking at case law and institutions from other countries, including the U.S.A, U.K., France, Germany, the European Union, and United Arab Emirates (UAE).

Topics will include amendment mechanisms; secession; judicial review; separation of powers; federalism; fundamental rights; equality; comparative procedure; property rights and economic liberties; entitlements to government aid; and guarantees of democracy.

Language of Instruction: Arabic (legal terms, however, are also given in English and French).

LAW 206 General and Lebanese Administrative Law I (4.0); 4 cr. This course is designed to introduce to students the major actions undertaken by legal administrative institutions. It aims to improve students’ knowledge of administrative procedures and acts taken by the public administration. It will explain in depth the legal position of public administration with respect to an individual’s legal position; and will improve the analytical skills of students in understanding the legal decisions/acts of the administration and their consequences on society, as well as on individual persons. The course will also shed light on the responsibility of public administration and its evolution through time in Lebanon and in France. Finally, the course aims to provide a basis from which students will be able to work with the procedures needed for an administrative revision before the different administrative courts.

It explores the following topics: Unilateral administrative acts, administrative contracts, administrative litigation, and administrative revisions.

Language of Instruction: Arabic (legal terms, however, are also given in English and French).

LAW 207 Civil Procedure Law I (3.0); 3 cr. This course surveys the principles, standards, and rules that govern how civil litigation proceeds, with a focus on Lebanese courts. It covers the fundamental and recurrent problems in civil actions, such as:

- General theory and conditions of admissibility of a law suit;
- Due process, including the notice and opportunity to be heard that must be given to litigants in the Lebanese legal system;
- Jurisdiction, including the scope of authority that Lebanese courts have over disputes and litigants; and
- The stages of litigation.

Language of Instruction: Arabic (legal terms, however, are also given in English and French).

LAW 208 General Criminal Law (4.0); 4 cr. This course considers the basic themes of Substantive Criminal Law, usually including the following topics: Sources; scope and definitions of Criminal Law; principles of criminal responsibility; the significance of act (acts and omissions, the voluntary act requirement); intention, recklessness and indifference; strict and absolute liability; objective and attribute liability; causation and result; justification and excuse with particular attention to the doctrines of necessity; intoxication; insanity; diminished capacity and automatism; aims and practice of punishment; and the relationship between doctrines and the various justifications for imposition of punishment.

Language of Instruction: Arabic (legal terms, however, are also given in English and French).

LAW 250 Romano-Germanic Legal System (3.0); 3 cr. The Romano-Germanic Legal System (Civil Law or Civilian Law) is a legal system originating in Europe, intellectualized with the framework of late Roman law, and
whose most prevalent feature is that its core principles are codified into a referable system, which serves as the primary source of law. This can be contrasted with Common Law Systems whose intellectual framework comes from judge-made decisional law, which gives precedential authority to prior court decisions on the principle that it is unfair to treat similar facts differently on different occasions (doctrine of judicial precedent). Historically, the Romano-Germanic legal system is the group of legal ideas and systems ultimately derived from the Code of Justinian, but heavily overlayed by Germanic, Canonical, Feudal, and Local Practices, as well as doctrinal strains such as natural laws, codification, and legislative positivism. Conceptually, the Romano-Germanic legal system proceeds from abstractions, formulates general principles, and distinguishes substantive rules from procedural rules. It holds case law to be secondary and subordinate to statutory law. The marked feature of Romano-Germanic Systems is that they use Codes with brief text that tends to avoid factually specific scenarios. Code articles deal in generalities and thus, stand at odds with statutory schemes which are often very long and very detailed. The Romano-Germanic Legal System is the most widespread system of law in the world, in force in various forms in about 150 countries.

Language of Instruction: English (legal terms, however, are also given in Arabic and French).

LAW 251 Legal Methodology (3.0); 3 cr. This course seeks to provide students who are commencing their studies in Law with the key discipline and specific skills required to study and eventually practice Civil and Common Law successfully. Students will work individually and in groups on a range of research, information retrieval, and intellectual techniques central to legal study. Beginning with the study of case law and the methods for developing, applying legal principles, and doctrine. The course continues to examine the interpretation and analysis of legal documents while teaching the fundamental skills of effective legal writing. The final assessment will combine all of these skills to assist the students to prepare a legal brief on a specified area of law, to recognize the sources of Civil and Common Law, to read and understand primary and secondary legal sources, to understand the doctrine of precedent, to locate and collect relevant materials for legal research, and to construct an argument in response to a legal problem question.

Language of Instruction: Arabic (legal terms, however, are also given in English and French).

LAW 252 International Political Economy (3.0); 3 cr. The world economic system is now highly integrated, as reflected in the increased cross-border flows of capital and goods and in the activity of institutions like the World Trade Organization (WTO). In such a world, domestic political and economic dynamics have global implications, while international events also have far reaching effects domestically. This course serves as a basic introduction to the scientific study of International Political Economy (IPE), an interdisciplinary field that focuses on the interplay between economics and politics. The underlying theme in the study of IPE is that economics and politics are intrinsically linked, that economic choices and preferences affect political decisions and vice-versa. With that fundamental understanding, the course begins by examining the various schools and theoretical approaches for analyzing the relationship between economics and politics. The rest of the course enlists these different approaches to address a variety of topics and issues related to the IPE, from the internationalization of production and the challenges of financial liberalization to international development and the effects of globalization and the transformation of the state.

Language of Instruction: English (legal terms, however, are also given in Arabic and French).

LAW 253 Introduction to Common Law (3.0); 3 cr. The course provides students with a historical, procedural, substantial, and practical understanding of the characteristics, functions, and principles of Common Law. It theoretically reviews Public and Private Common Law. A practical
understanding of the laws is established through acquiring and applying the process of legal reasoning to Common Law case studies. The course also provides an overview of the economic analysis of Law and the ethical dimension of Law.

Language of Instruction: English.

LAW 254 European Union Law (3.0); 3 cr. The law of the European Union Law is largely based on the Treaty on European Union and the Treaty on the functioning of the European Union, and legislation made under the Treaties by the Council, Parliament, and the Commission.

The course deals with the following:

- The institutions of the EU, including the jurisdiction of the Court of Justice and General Court;
- The essential features of the EU LAW, and its incorporation into national law;
- The principles of free movement of persons and services within the EU;
- The rules governing the free movement of goods within the EU; and
- European Business Law.

Language of Instruction: English (legal terms, however, are also given in Arabic and French).

LAW 260 French Civil Code (2.0); 2 cr. Napoleon in his later life considered the Civil Code to be the most significant of his achievements. The Code represented a comprehensive reformation and codification of the French civil laws. Under the “ancient regime,” more than 400 codes of laws were in place in various parts of France, with Common Law dominating in the north and Roman Law in the south. The French Revolution overturned many of these laws. In addition, the revolutionary governments had enacted more than 14,000 pieces of legislation. Five attempts were made to codify the new laws of France, during the periods of the National Convention and the Directory. Through the efforts of Napoleon, the drafting of the new Civil Code in an expert commission, in which Jean-Etienne Marie Portalis took a leading role, took place in the second half of 1801. Napoleon attended in person 36 of the commission’s 87 meetings. Although the draft was completed at the end of 1801, the Code was not published until March 21, 1804. The Civil Code represents a typically Napoleonic mix of liberalism and conservatism, although most of the basic revolutionary gains (equality before the law, freedom of religion, and the abolition of feudalism) were consolidated within its laws. Property rights, including the rights of the purchasers of the biens nationaux were made absolute.

The Napoleonic Code was to be promulgated, with modifications, throughout the Empire. The Civil Code has served as the model for the codes of law of more than twenty nations throughout the world.

This course will provide a systematic study of the French Civil Code. The course will start with a historical overview of the Code, and then focus on the legal concepts developed by the Code:

- Preliminary Title: The publication, effect, and application of the laws in general;
- Book 1: Persons;
- Book 2: Property and the different modifications of property;
- Book 3: Different modes of acquiring property; and
- Book 4: Personal and Real Guarantees.

Language of Instruction: French (legal terms, however, are also given in Arabic and English).

LAW 261 Civil Liberties and Human Rights (2.0); 2 cr. This course provides a comprehensive grounding in all aspects of Human Rights and Civil Liberties: International humanitarian issues, refugee rights and laws, disaster and emergency relief, apartheid and racial discrimination, drug abuse, judicial activism, and global and regional perspectives of human rights.
The subjects include:
- Conceptual and theoretical understanding of Human Rights and Civil Liberties;
- Systems, organizations, and instruments of Human Rights and Civil Liberties;
- Contemporary Human Rights situations and issues;
- Specialization course, such as:
  - Activism and roles of NGOs, Amnesty International, and the Red Cross, as well as Rights of the Child and Human Rights;
  - Women and Human Rights, Religion and Human Rights, Population and Human Rights;
  - Violation specific themes in Human Rights: Torture, custodial violence and disappearances; pretrial detention, undertrials and prisoners; Human Rights and police; Human Rights during emergency;
  - Refugee specific themes in Human Rights: Refugee laws; refugee protections; refugee status and humanitarian assistance; refugee problems in Lebanon; and

Language of Instruction: English (legal terms, however, are also given in Arabic and French).

**LAW 262 Law and Terrorism (2.0); 2 cr.**
This course will provide a systematic study of the legal definition and responses to terrorism. The course will discuss the causes and consequences of international and domestic terrorism, and explore the responses of International Law and certain national legal systems to the practices of terrorism.

The course will start with a historical overview of practices that could be identified as terrorist in nature, such as assassinations, piracy, kidnapping, and banditry. It will then focus on terrorism, as a theoretical concept, and the efforts to formulate legal definitions of terrorism in International Law. In this context, the course will analyze the discourses on the right to self-determination, both in domestic and international contexts. Part of this inquiry will focus on the history and theory of political crimes, and whether such crimes are distinguishable from common criminal acts.

A significant part of understanding the idea of political crimes will be to discuss the theories of the economic and social reasons for terrorism, and what some have called the “pathologies of terrorism” of the psychology of terrorism. The course will also study the arguments for and against the idea of state terrorism (the idea that states can commit the crime of terrorism by economic or military warfare). The second half of the course will focus on international and national responses to terrorism. In examining the international responses to terrorism, the course will analyze several international instruments, such as the hijacking convention and the convention for the protection of diplomats, which seek to combat specific acts of terrorism. Also studied will be the liability of states for state-sponsored terrorism and rights of victims to compensation.

Language of Instruction: English (legal terms, however, are also given in Arabic and French).

**LAW 263 Islamic Law (2.0); 2 cr.**
This course introduces students to the field of Islamic Law. It is designed to give students a firm grounding in the principles, concepts, and terminology of Islamic Law. Islamic Law is one of the oldest and most significant systems of Law in the contemporary age. The course will focus on the history, theory, and the role of Islamic Law in the contemporary age. The course will be divided into two main parts: The first will deal with Islamic Law in the classical context while the second will examine the role
of Islamic Law in the contemporary age. This course will begin by considering the question: “Why study Islamic Law?” It will then proceed to the history and theory of the Islamic Legal System with special emphasis on the development of the various schools of thought in Islamic Law. The course will place Islamic Law in a comparative context and investigate whether the methodologies, processes, and purposes of Islamic Jurisprudence are fundamentally different from other major world legal systems. The second half of the course will survey Islamic Commercial, Criminal, and Family Laws, and their influence on the modern age. Furthermore, Islamic Public International Law, Human Rights, and Islamic Law will be examined.

Language of Instruction: Arabic (legal terms, however, are also given in English and French).

LAW 264 Environmental Law (2.0); 2 cr. This course examines Lebanese and Comparative Environmental Law and serves as a useful introduction both to the particular complexities of Environmental Law and to the skills necessary in mastering any complex area of regulation. The first part of the court considers the character of environmental disputes, the problems inherent in fashioning legal rules for their resolution, and the history of the emergence of modern comparative Environmental Law. The second part of the course reviews several specific Lebanese and comparative environmental statues. All the statues serve as illustrations of the different regulatory approaches to environmental problems: “command and control,” information disclosure, and market-based instruments.

Language of Instruction: English (legal terms, however, are also given in Arabic and French).

LAW 265 Canon Law (2.0); 2 cr. The purpose of this course is to introduce students to ecclesiastical law through a systematic presentation and study of the code of Canon Law on the purpose, nature, content, history, and consequences of what ecclesiastical law achieves in the life of the Church. The course surveys the norms of the Code of Canon Law in the areas of general norms, the rights of obligations of the Christian faithful, Church structures, and the teaching and sanctifying offices of the Church, temporal goods, sanctions and procedural law. This course is focused on the nexus between law and ministry, the relationship between theologies of the Church and the expression of these theologies within the law itself.

Language of Instruction: English (legal terms, however, are also given in Arabic and French).

LAW 301 Civil Law IV: Obligations and Contracts - Regime (3.0); 3 cr. The Law of Obligations and Contracts is one branch of Private Law under the Civil Law legal system. It is the body of rules that organizes and regulates the rights and duties, arising between persons within society. The course examines the legal regime of Obligations and Contracts. It will provide a study of the classification of Obligations and Contracts. Specific terms and conditions will be examined, especially matters affecting the legal regime of Obligations and Contracts, discharge of contracts, illegality, remedies, third-party rights, execution of contracts, indirect action, revocatory action, vicarious liability action. Prerequisite: Law 203.

Language of Instruction: Arabic (legal terms, however, are also given in English and French).

This lecture is supported by a workshop that helps the students to understand the course.

LAW 302 Civil Law V: Special Contracts I (3.0); 3 cr. This course will endeavor to provide students with an understanding of the following contracts:
- F.I.D.I.C;
- B.O.T;
- Transaction;
- Compromise;
- Aleatory contracts;
- Know how;
- Leasing;
- Factoring; and
- Franchise.

Prerequisites: LAW 203, LAW 301
Language of Instruction: English (legal terms, however, are also given in Arabic and French).

LAW 303 Civil Law VI: Special Contracts II (4.0); 4 cr. The course is designed to introduce students to the key concepts and theories of Special Contracts. The course explores the following topics: Introduction to special contracts; comparison between nominate and innominate contracts; domestic and international sales agreement; lease; agency; contracting agreement. Prerequisites: LAW 203, LAW 301.

Language of Instruction: Arabic (legal terms, however, are also given in English and French).

This lecture is supported by a workshop that helps the students to understand the course.

LAW 304 Commercial Law I: Commercial Acts, Traders, Goodwill (3.0); 3 cr. This course is designed to introduce to students the key concepts and theories of Commercial Law. The course explores the following topics: Specificity of Commercial Law; sources of Commercial Law; commercial acts (distinction between civil acts and commercial acts - objective commercial acts - subjective commercial acts - commercial acts by their form - mixed commercial acts); traders (quality of trader - statute of trader - legal obligations of trader); goodwill (generalities - elements - legal nature - contracts concerning goodwill: Sale, pledge, lease, management, contribution (allowance) in kind.

Language of Instruction: Arabic (legal terms, however, are also given in English and French).

This lecture is supported by a workshop that helps the students to understand the course.

LAW 305 Commercial Law II: Corporate Law (4.0); 4 cr. This course will provide students with an understanding of the following topics:

- Introduction to Corporate Law (terminology: legal nature of the commercial company; different kinds of commercial companies; regulation of commercial companies);
- General theory of commercial companies;
- Partnership;
- Private company;
- Limited liability company;
- Jointly-owned company;
- Joint-stock company;
- Company limited by shares;
- Limited partnerships company;
- Company with variable company;
- Close-ended company; and
- Holding company; offshore company.

Language of Instruction: Arabic (legal terms, however, are also given in English and French).

This course will identify and compare the Lebanese Administrative System to its homologue, the French, as well as the different systems adopted by different regimes.

This course explores the following topics: Introduction to public administrative law; administrative rights and legalities; principle of legality; discretionary authority; exceptional circumstances; governmental acts; administrative court’s jurisdiction over administrative decisions; theory of error; structure of the public administration; executive authority, president, prime minister, ministers, council of ministers; central administration; centralized system; non-exclusivity concept; decentralization (political and administrative),
history and sources of Lebanese administration, administrative organizations, and administrative courts; municipalities.

Prerequisite: LAW 206.

Language of Instruction: Arabic (legal terms, however, are also given in English and French).

This lecture is supported by a workshop that helps the students to understand the course.

LAW 307 Civil Procedure Law II (3.0); 3 cr. This course covers:
• The stages of litigation;
• The opportunities and challenges of litigation, involving multiple disputants;
• The general theory of judgments;
• The general theory of remedy at law; and
• Law of evidence, including the rules and doctrines regulating the presentation of factual proof in Lebanese law.

Prerequisite: LAW 207.

Language of Instruction: Arabic (legal terms, however, are also given in English and French).

LAW 308 Special Criminal Law (3.0); 3 cr. The course examines the following infractions against the:
• Internal and international public safety;
• General and judicial (forced) administration; Religion;
• Family, persons (life, civic liberty, and honor);
• Goods (robbery, swindle, breach of trust, fraudulent bankruptcy, counterfeiting); and
• Intellectual property.

Prerequisite: LAW 208.

Language of Instruction: Arabic (legal terms, however, are also given in English and French).

LAW 309 Public International Law (4.0); 4 cr. This course introduces students to the legal rules and institutions that govern the international political system. The course provides a formal introduction to International Law and emphasizes the relationships between law and politics in the behavior of states, institutions, and individuals in International Law. International Law is both more relevant and more interesting today than ever before. This course examines how International Law is created, how it operates, and what effect it has on these and other issues in contemporary international relations. The first part of the course examines the nature, sources, and methods of International Law, the relationship between International Law and Domestic Law, the determination of international responsibility and the revolution of international disputes, and the bases of national jurisdiction over international conduct, the key institutional actors, the relationship between International Law and international systems. In the second part of the course students will have the opportunity to study select substantive fields of International Law, including the rise of force and the laws of war, human rights, international criminal law, and international trade law. Where relevant, the course will follow current events.

Language of Instruction: English (legal terms, however, are also given in Arabic and French).

LAW 310 Criminal Procedure Law (3.0); 3 cr. The course examines the following topics:
• Public prosecution and civil action;
• Judicial investigation;
• Investigating jurisdictions;
• Inquiries and identity checks;
• Trial courts (organization - competence - procedure);
• Judgment and remedy at law;
• Specific procedure;
• International judicial co-operation;
• Extradition;
• Protection of witnesses; and
• Execution procedures.

Prerequisites: LAW 208, LAW 308.

Language of Instruction: Arabic (legal terms, however, are also given in English and French).

LAW 311 Public Function: (1.0); 1cr. The course on Public Function studies the regulations of all public officers working for the public sector, in addition to those whose remuneration is
related to the public funds. This is referred to the study of the following themes: the categories of public officers; the bodies: the employment frameworks, occupations and ranks; the career: access to the public function (recruitment, training and initial education, tenure), career development (remuneration, posts, continuing education, evaluation, advancement and promotion); leaving the public function; the public officer’s rights and guarantees; the public officer’s obligations; the officer’s retirement.

**Language of Instruction:** Arabic (legal terms, however, are also given in English and French).

**LAW 350 Personal Status (3.0); 3 cr.** This course covers personal status laws and regulations of the various Lebanese religious groups recognized officially by the Lebanese Constitution. The course examines the following topics:
- Marriage;
- Betrothal;
- Divorce;
- Limited divorce (a mensa et thoro separation);
- Filiations;
- Minority;
- Guardianship (wardship);
- Alimony; and
- Personal status courts, (organization, procedure, judgments).

**Language of Instruction:** Arabic (legal terms, however, are also given in English and French).

**LAW 351 Legal Terminology (3.0); 3 cr.** This course in Legal Terminology is a basic guide to common legal terms in Arabic, English, and French. Different terms may have different meanings based on the specific legal system and a specific area of law on the context in which they are being used. The course is a comprehensive source of those different meanings and use for thousand of today’s most common legal terms, concepts, definitions, events, movements, and cases.

**Language of Instruction:** Arabic, English, and French.

**LAW 352 Measures of Execution (3.0); 3 cr.** This course examines the following topics:
- Concept of enforceable judgment;
- Concept of writ of execution;
- Distress;
- Enforcement of award;
- Granting recognition to a foreign judgment; and
- Granting recognition to a domestic and international arbitration award.

**Prerequisites:** LAW 207, LAW 307.

**Language of Instruction:** Arabic (legal terms, however, are also given in English and French).

**LAW 353 Intellectual Property Law and WTO (3.0); 3 cr.** This course covers all the main forms of intellectual property: Principally, copyright, trade mark and unfair competition, and patent, but will also touch on geographical indications and trade secrets. It explores the theoretical foundations of and justification for the different rights as well as their application in a number of settings. Intellectual property industries now make up a sizable proportion of the global economy. And the most contested issues in Intellectual Property Law are closely connected to developments throughout the arts and technology, as well as to evolutions in marketing and popular culture. Because the content of Intellectual Property Law is increasingly framed by international obligations and evolves with some regard to developments in other countries, the course also has an international and comparative dimension, and examines WTO rules.

**Language of Instruction:** English (legal terms, however, are also given in Arabic and French).

**LAW 360 Contract in Common law (2.0); 2 cr.** The law relating to contracts is one of the pillars of the Common Law System. An understanding of the basic elements of Contract Law is thus a critical prerequisite for the study of a number of later subjects, including Corporate Law, Commercial Transactions, and International Arbitration. This course aims to provide students with an understanding of the basic principles
of Contract Law in Common Law, which applies to nearly all contracts. In fulfilling this aim, the course focuses primarily on a study of relevant case law and statute law. The course covers the elements of contract negotiations, contract formation, and contract drafting. Specific terms and conditions will be examined, especially matters affecting consent to a contract, discharge of contracts, illegality, remedies, and third-party rights. The objectives of the course include:

- To provide students with an understanding of basic principles of Contract Law in Common Law; and
- To develop in students an ability to analyze fact situations and correctly identify the relevant principles of Contract Law in Common Law that are applicable to the resolution of problems raised by particular factual situations.

Language of Instruction: English (legal terms, however, are also given in Arabic and French).

LAW 361 Tort in Common Law (2.0); 2 cr.
This course explores the basic principles governing private lawsuits for damages for wrongs that are non-contractual, including consideration of the concepts of strict liability, liability based on fault, intentional and negligent interference with personal and property interests and defenses thereto, recoverable damages and related problems. The course concerns the civil causes of action and remedies for interference with one person, property, or intangible interests. This course will examine the doctrines of both intentional and unintentional torts, including assault, battery, trespass, false imprisonment, conversion and intentional infliction of emotional distress, negligence, and strict liability. By contrasting the different theories of liability, especially negligence and strict liability, the course will explore differing views of the basic purpose of the tort system and analyze the consequences of different rule structures in preventing accidents and compensating victims.

Language of Instruction: English (legal terms, however, are also given in Arabic and French).

LAW 362 Property, Equity, and Trust in Common Law (2.0); 2 cr.
This course explores the foundations of the institutions of Property, Equity, and Trust. It combines conceptual and functional analysis of doctrine with more abstract theoretical enquiry.

The chief aim of the course is to provide students with a sound understanding of the fundamental principles of Land Law and the role that equitable doctrine plays in molding and developing Property Law. Students will be expected to come to grips with key common law principles, examine and appreciate the role of equitable doctrine, and understand the legislative framework and its application where applicable. The course explores:

- The Boundaries of property (conceptual and functional analysis of property);
- The Justifying Property (mainstream and novel defenses and critiques of property);
- The Trust (the distance contribution of trust and fiduciary institutions in blurring the lines between proprietary and personal claims; trust systems in Common Law and civilian jurisdictions); and
- The Equity (origins of Equity, native title, contracts for sale of land, part performance, legal interests, appropriate application of a range of equitable doctrines to particular scenarios and the availability of different remedies).

Language of Instruction: English (legal terms, however, are also given in Arabic and French).

LAW 363 French Jurisdictions and Competence Rules (2.0); 2 cr.
This course examines the French Judiciary System. It explains the competence, the organization, and the functioning of the following jurisdictions: Court of cassation, court of appeal, court of first instance, simple judge, specialized non-criminal courts, commercial court, judge of labor disputes, and jurisdiction of social security, judge of expropriation, judge of lease disputes, juvenile court, and criminal courts.

Language of Instruction: French (legal terms, however, are also given in English and Arabic).
LAW 364 Law and Medicine (2.0); 2 cr.
Medical Law is the branch of Law, which concerns the prerogatives and responsibilities of medical professionals and the rights of the patient. The main branches of Medical Law are the law on confidentiality, negligence, and torts in relation to medical treatment (most notably medical malpractice), and Criminal Law in the field of medical practice and treatment. Because Ethics and Medical Practice is a growing field, students in this course will explore issues in Medical Ethics and Law are ripped from the headlines and fall under the broad umbrella of “reproduction.”

Topics include:
• Forced sterilization;
• High-tech baby-making;
• Embryos and divorce;
• Age limits on access to assisted reproductive technology;
• Abortion;
• Civil liberties during pregnancy;
• Conflict in the neonatal intensive care unit;
• Defining parenthood donation; and
• Selling or buying organs for transplantation.

The course will also evaluate the ways that the individual choice norm has been extended to or withheld from individuals who have lost competence or who (because of mental impairment) had never been or (because they were infants or fetuses) had not yet become competent to decide for themselves. The course will further explore how the institutions of law and medicine have sought to approach and, when possible, resolve the dilemmas.

Course materials will include: Articles from newspapers, magazines, medical journals, and law reviews; excerpts from books, casebooks, and court cases.

Language of Instruction: English (legal terms, however, are also given in Arabic and French).

LAW 365 Philosophy of Law (2.0); 2 cr.
This course will explore a cluster of issues, concerning concepts, conceptual grasp, and incomplete and incorrect understanding of concepts. The class will range across philosophy of mind and language, metaethics, philosophy of law, and other areas. The course will also provide a systematic study of the “rule of law.” One of the most enduring questions in legal theory is the extent to which legal arguments is, can be, or should be “rational.” Some vigorously maintain that it can and should be rational (even when in particular instances it is not). Others are deeply skeptical about claims to legal rationality. Often this debate is framed as a dispute about whether the “rule of law” is a realizable, viable, valuable ideal for lawyers, judges, and citizens. This course will explore those closely related ideas of legal rationality and the rule of law. To investigate these abstract themes in concrete detail, the course will examine the characteristic types of Romano-Germanic and Anglo-American legal argument and legal interpretation: Deductive inference (often used in legal interpretation); inductive inference (often used in reasoning about evidence); analogical inference (often used in reasoning from precedent); and “inference to the best explanation” (used in both reasoning about evidence and in reasoning about how to characterize a fact pattern from a legal standpoint). Readings will be from relevant areas in philosophy, judicial opinions, and jurisprudence.

Language of Instruction: English (legal terms, however, are also given in Arabic and French).

LAW 366 Negotiation and Mediation Workshop (2.0); 2 cr. This workshop, by combining theory and practice, aims to improve both the participants’ understanding of negotiation and mediation, and their effectiveness as negotiators and mediators. Drawing on work from a variety of research perspectives, the readings and lectures will provide students with a framework for analyzing negotiations and tools and concepts useful in negotiating more effectively. Participants will spend much of their time in a series of negotiation exercises and simulations, where as negotiators, mediators, and critical observers, they will become more aware of their own behavior as negotiators and mediators, and learn to analyze what works, what does not work, and why.
**Language of Instruction:** English (legal terms, however, are also given in Arabic and French).

**LAW 367 Comparative Consumer Protection Law (2.0); 2 cr.** The law of consumer protection governs every purchase you make, every advertisement you see, every student loan in your expanding portfolio. It may be the single most relevant body of law to your own experience and your everyday life. And yet, somehow you have not learned in law school whether it would be better to buy that casebook with a credit card or a debit card, or whether it is legal for a telemarketer to call and offer you a new low rate on a warranty for your car, or what it is you were supposed to ask before you signed that loan application. This course will explore the theoretical underpinnings of Consumer Protection Law as it has developed over the past century and as it operates (or fails to operate) today. The course will examine constitutional issues governing Consumer Protection Law. It will provide an introduction to the substantive law of predatory lending, debt collection, and products warranties. It will explore the application of Consumer Protection Law to emerging technologies.

**Language of Instruction:** English (legal terms, however, are also given in Arabic and French).

**LAW 368 International Economic Public Law (2.0); 2 cr.** This course provides a comprehensive grounding in all aspects (domestic, comparative, and international) of sources and guiding principles of the Economic Public Law, and examines the structures and modalities of the intervention of the public sector in the economy: Planning, regulation and control of the competition, direct public interventions (public enterprise, privatization, public aid), and the public-private partnership (PPP).

**Language of Instruction:** English (legal terms, however, are also given in Arabic and French).

**LAW 369 Legal Writing (2.0); 2 cr.** Legal Writing is an intensive writing lab that builds on the skills you acquired in your legal courses, using varied assignments from transactional, litigation, and legislative practice. In a supportive collaboration classroom environment, you will learn about drafting statutes, contracts, complaints, answers, motions and nice motions, orders, interrogatories, general correspondence and opinion letters. You will also re-examine, and take to a higher level, aspects of the types of writing you did in your legal courses. For example, you will work on objective issue statements and persuasive questions presented, objective and persuasive fact statements, and the large-scale organization of the discussion sections of research memos and the argument sections of briefs.

This course is a bridge between the other legal courses, because it teaches the skills necessary to analyze legal issues in any area of law. Specifically, the course should help you on the following skills:

- Analyzing and conceptualizing legal issues;
- Organizing strategies;
- Structuring legal arguments and documents;
- Using core writing techniques, including clarity, cohesion, and concision;
- Writing strong introductions and conclusions;
- Mastering objective vs. persuasive techniques;
- Using new editing techniques; and
- Sharpening efficient writing and editing skills, using timed assignments.

**Language of Instruction:** English and Arabic.

**LAW 370 Information and Communications Technologies (2.0); 2 cr.** The integration of Information and Communications Technologies (ICT) in our daily activities enables businesses and individuals to inform, communicate, and engage in transactions. This opens up a wide spectrum of opportunities and a variety of legal and regulatory issues. The course examines the relationship between ICT and Law in three principle areas:
• ICT Law: The first area develops the different ICT generations (data processing, multimedia, internet, social media, mobile, etc.).
• Lebanese ICT laws.
• International ICT laws (Europe, U.S.A., and others): The second and the third areas examine ICT laws at a national and international level. The following topics will be covered:
  - Digital rights, privacy, and security (right to data protection, how data processing should be regulated in the information society, etc.);
  - Intellectual property;
  - Media and electronic communications regulation (regulation of media and communications, content regulation of print media, broadcasting, and problems relating the convergence of media and communications);
  - Media Law (legal regulation of mass media publication, principally the press, the broadcast media and institutionalized internet publication, etc.);
  - Internet Law;
  - Electronic Commerce Law (jurisdiction, payment systems, interfacing ICT Law and Commercial Law, etc.); and
  - Electronic Government Law.

Language of Instruction: English (legal terms, however, are also given in Arabic and French).

LAW 371 Mergers and Acquisitions Law (2.0); 2 cr. A merger or large acquisition is often the most significant event in the life of a firm and can have dramatic consequences for all the constituencies of a firm – from shareholders, directors, and managers to employees, customers, and communities. Lawyers and the Law play critical roles in how mergers and acquisitions are evaluated, structured, and implemented. This course introduces students to Contract, Corporate, and Securities Law issues relevant to mergers and acquisitions of large companies, both public and private. It also touches on the basics of antitrust procedure relevant to a lawyer working on such transactions. The approach is practical rather than theoretical and the focus is on Law, not finance. English (legal terms, however, are also given in Arabic and French).

LAW 401 Civil Law VII: Chattels Real, Real and Personal Guarantees, Land Register (4.0); 4 cr. This course studies the following topics:
  - Landed estate;
  - Real property right;
  - Altasarrouf right;
  - Easement rights;
  - Usufruct (freehold) right;
  - Al-waqf (religious endowment);
  - Land lease;
  - Personal guarantee; real guarantee (real estate mortgage - lien); and
  - Land register (definition - constitution and organization - delimitation and census - effects of registration).

Prerequisites: LAW 203, LAW 301.

Language of Instruction: Arabic (legal terms, however, are also given in English and French). This lecture is supported by a workshop that helps the students to understand the course.

LAW 402 Civil Law VIII: Inheritance, Will, and Donation (3.0); 3 cr. This course examines the following topics in the various Lebanese religious groups recognized by the Constitution:
  • Inheritance: Opening of a succession, maturity of a succession, degrees (ranks) of heirs, capacity to inherit, regulations of absent, forms of a succession (intestate succession, estate in escheat, succession bestowed by will, succession accepted with beneficio in ventarii), disposal of an estate, executor (administrator), settlement of a succession;
  • Will: Reading of a will, testamentary capacity, disposable portion, legatee, forms (authentic will, holograph will, nuncupative will, joint venture will), executor of a will;
  • Donation: Validity, animus donandi, promise of donation, forms (donation
mortis causa, specific legs, general legacy, concealed donation, donation through an intermediary, manual donation, donation-partition), defeasance of donation.

Prerequisites: LAW 203, LAW 301.

Language of Instruction: Arabic (legal terms, however, are also given in English and French).

LAW 403 Commercial Law III: Commercial Contracts, Negotiable Instruments (3.0); 3 cr.
The course explains the following topics:

- **Commercial contracts**: (commercial security, commercial agency, brokerage agreement);
- **Negotiable Instruments**:
  Bill of Exchange and Promissory
  Note: (mentions, forms, provision, endorsement, acceptance, backing, maturity, intervention, multiples copies, distortion, period of limitation); and
  Check: (creation, form, mentions, transfer, endorsement, crossed check, multiple copies, period of limitation, criminal legal provisions).

Language of Instruction: English (legal terms, however, are also given in Arabic and French).

LAW 404 Commercial Law IV: Bankruptcy (2.0); 2 cr. This course endeavors to provide students with an understanding of the bankruptcy laws, including the Law of Corporate Reorganization. Topics include:

- The procedure and the judgment of bankruptcy;
- The appointment of the liquidator;
- The period of suspicion;
- The concordat preventive, rights of creditors in bankruptcy;
- The individual’s right to discharge;
- The treatment of executory contracts, bankruptcy planning; and
- The procedure of “to be put into receivership.”

Language of Instruction: Arabic (legal terms, however, are also given in English and French).

LAW 405 Private International Law I: Conflict of Laws (3.0); 3 cr. The course examines the following topics:

- Definition, nature, and scope of Private International Law, its relation to International Law;
- General historical development of the doctrines of Private International Law; and
- The conflict of laws theory: Rules of conflict, classification and qualification, public policy, falsity before the law, rules of the foreign law.

Language of Instruction: English (legal terms, however, are also given in Arabic and French).

LAW 406 Private International Law II: Conflict of Jurisdictions, Nationality, Foreigners’ Regulations (3.0); 3 cr. The course examines the following topics:

- The conflict of jurisdictions: International judicial competence, effects of foreign judgments - grant of exequatur to a foreign judgments;
- **Nationality**: Acquisition and loss of nationality, restoration of nationality, naturalization;
- Foreigners’ regulations.

Prerequisites: LAW 405.

Language of Instruction: English (legal terms, however, are also given in Arabic and French).

LAW 450 Money, Banking Law, and Islamic Finance (3.0); 3 cr. The course examines the following topics:

- Explanation of banking regulations: Regulations of the Central Bank, commercial banks, and the financial and depositary institutions;
- Explanation bank transactions and money market operations;
- Description of the different payment systems;
- Explanation of the securities regulation:
  - To reduce the level of risk to which bank creditors are exposed (i.e. to protect depositors);
  - To reduce the risk of disruption, resulting from adverse trading conditions for banks causing multiple or major bank failures; and
  - To reduce the risk of banks being used...
for criminal purposes, e.g. laundering the proceeds of crime and especially laundering money.

- Explanation of the bank regulators supervision, examination, and enforcement tools;
- An Explanation of the banking secrecy laws in Lebanon and abroad; and
- Explanation of the Islamic banking system (or Shari’a compliant finance): Principles, advisory councils and consultants, financial accounting standard, Islamic financial transactions.

**Language of Instruction:** English (legal terms, however, are also given in Arabic and French).

**LAW 451 Labor Law and Social Security (3.0); 3 cr.** This course will focus on the statutory, judicial, and administrative law, governing the individual Employment Law and the collective organization of workers and the interaction between such collective organizations and employers. The course will introduce students to the basics of traditional Labor Law and will explore how Labor Law is evolving both to innovate forms of labor management relations and to changes in the composition of the Lebanese labor force. The class will consider the legal status of privately negotiated processes for organizing and recognizing unions, state, and local approaches to Labor Law innovation, and new forms of workplace organization. This course will explore the intersection of Labor and Immigration Law, union participation in the political process, emerging forms of worker organization, and security of tenure. The course will study the regulations of Social Security in Lebanon and abroad.

**Language of Instruction:** English (legal terms, however, are also given in Arabic and French).

**LAW 452 Lebanese Finance and Taxation Law (2.0); 2 cr.** Taxation pervades every area of life, including property, family, employment, and business affairs. Tax Law is well suited to interdisciplinary study, intersecting as it does with economics and politics. It also offers rich opportunities for the study of many areas of law, given that tax factors have frequently influenced development of legal concepts and principles. In turn, tax laws are shaped by concepts of property, commercial, corporate, and employment law - approaches to drafting and interpretation of legislation. This course introduces students to selected issues in the law of taxation, chosen to illuminate fundamental concepts and to link to other parts of the undergraduate law course. The focus is on Tax Law, but the technical issues are examined by focusing on themes and principles, and by placing the law within its political and economic context to create an understanding of the requirements of a tax system and the difficulties encountered in designing, legislating for, and administering such a system.

**Language of Instruction:** Arabic (legal and technical terms, however, are also given in English and French).

**LAW 453 Air and Maritime Law (3.0); 3 cr.** Air Law: This course provides a general introduction to the Air Law approach and applies some basic concepts of the Civil and Common Law traditions to the field of Air Law. The main topics covered include:

- The nature of the contract of carriage;
- Aircraft manufacturer’s liability;
- State liability for negligent certification of aircraft;
- Air traffic controllers liability;
- Liability for damage caused by aircraft on the ground; and
- Contentious and non-contentious work with respect to airliners, aircraft owners, and carriers.

The course examines the unification of Private International Air Law through the adoption of international conventions. In particular, it reviews the liability of the air carrier toward passengers and shippers under the Warsaw Convention System and under the Montreal Convention of 1999. This course also examines the basic framework of several other conventions, notably the 1952 Rome Convention on surface damage caused by aircraft, and the two conventions adopted by the
ICAO in 2009 to replace the Rome Convention (the Unlawful Interference Convention and the Ground Damage Convention). Jurisdictional and choice of law issues in relation to matters not covered by international agreement, notably manufacturers’ liability, will be reviewed.

**Maritime Law:** This course covers principles, rules, norms, and sources of Maritime Law, including:
- Acquisition, ownership, registration, and related sale/purchase agreements of all kinds of ships, container carriers, feeder vessels, and modern wreck;
- Master and crew; the operation of skip, including statutory requirements; navigation and collisions; salvage; towage;
- Pilotage;
- Oil pollution liability; and
- Charter party dispute; contentions work with respect to damages to goods, wrecks, oil spills, marine insurance, contentious and non-contentious work with P&I clubs.

**Language of Instruction:** English (legal terms, however, are also given in Arabic and French).

**LAW 454 Arbitration Law (3.0); 3 cr.**
In recent years, the use of arbitration as a means of resolving domestic and international disputes has grown enormously in popularity. Arbitration is used for all kinds of disputes: From purely business-related disputes, which cross borders, and mixed disputes between foreign investors and hot states to disputes between sovereign states. There is a discrete body of Domestic and International Law devoted to arbitration issues, and there are a number of specialist arbitration institutions. This course provides a rigorous study to the field of International Arbitration, which has become the default means of international commercial disputes. The course will deal with the internationalist elements of the subject matter, but will also examine international commercial arbitration from a Lebanese and comparative perspective. Students can expect to review both Lebanese and foreign commentaries, statutes, and case-study method on the subject.

The course will comprise the following main topics:
- Introduction to domestic and International Commercial Arbitration;
- Arbitrability;
- The arbitral tribunal;
- Conduct of arbitral proceedings (place of arbitration, preliminary steps, written submissions, evidence, hearings and proceedings thereafter; fast track arbitration);
- The role of council, the parties, witnesses, and others in arbitration;
- Applicable laws to the arbitration procedure, to the substance, and to the agreement to arbitrate;
- Role of national courts in International Commercial Arbitration;
- Arbitral award/challenges to award/recognition and enforcement;
- New developments and a comparison of arbitration legislation around the world: and
- Investment arbitration; Arbitration and States.

**Language of Instruction:** English (legal terms, however, are also given in Arabic and French).

This lecture is supported by a workshop that helps the students to understand the course.

**LAW 460 Risk and Insurance Law (2.0); 2 cr.** A study of risk and the risk management process begins the course. Types of applications to risk management include commercial risk, personal risk, and public risk. Each kind of insurance product is described fully and analyzed within the current marketplace. The course provides in-depth analysis of the processing, investing and evaluation of risk management. This course will also provide students with an understanding of:
- How insurance works, what types of risks are suitable for private insurance and what risk a characteristics are “uninsurable”;
- How to read and interpret an insurance policy;
- Fundamentals principles and characteristics of property and casualty
insurance;
- What is a liability insurer’s “duty to defend”;
- What is a “reservation of rights” and what are its consequences to insurer and to insured; and
- Multiple theories of insurer extra contractual liability (aka “Bad Faith” Law).

Language of Instruction: English (legal terms, however, are also given in Arabic and French).

LAW 461 Economic Analysis of Law (2.0); 2 cr. What effects does Law have? Do individuals drive more cautiously, clear ice from sidewalks more diligently, and commit fewer crimes because of the threat of legal sanctions? Do corporations pollute less, market safer products, and obey contracts to avoid suit? And given the effect of legal rules, which are socially best? Such questions about the influence and desirability of laws have been investigated by legal scholars and economists in a rigorous and systematic manner since the 1970s. Their approach, labeled “economic,” is widely considered to be intellectually important and to have revolutionized thinking about the Law. This course will provide an in-depth analysis of the major building blocks of our legal system – Tort Law, Property Law, Contract Law, Criminal Law, and the legal process. The course will also address welfare economic versus moral conceptions of the social good. The course is aimed at a general audience of students. A non-economic background is required to take this course.

Language of Instruction: English (legal terms, however, are also given in Arabic and French).

LAW 462 Criminology and Prison Law (2.0); 2 cr. Why are criminal laws made? Why are they broken? How do we, and how should we, react to the breaking of criminal laws? These three questions are the stuff of criminology. They also occupy a central and controversial place in public and political debates about the condition and future of contemporary liberal democratic societies. This course provides students with the chance to study them in depth. Criminology offers students an opportunity to study crime and the ways in which it is dealt with by the criminal justice and penal systems. It enables students to explore the nature of crime and its control by examining the issues at stake using the resources of legal, penal, and social theory. It also offers students the chance to think about crime as a social phenomenon and to explore, using criminological research and analysis, how criminal justice and penal systems operate in practice. These courses focus also on the law and policy of incarceration, the “back end” of the criminal justice system. The central questions are: As a legal matter, what obligation does the state have toward those it incarcerates? And given legal limits, how should we run the prisons?

Topics to be covered include:
- The history of prisoners’ rights litigation;
- The scope of prisoners’ constitutional rights; and
- The prison disciplinary process; conditions of confinement; medical care; and problems of prison rape and overcrowding.

Language of Instruction: English (legal terms, however, are also given in Arabic and French).

LAW 463 International Criminal Law (2.0); 2 cr. After a brief survey of the history of International Criminal Law and the development of international criminal courts, the course will examine the problem of sources and goals of international criminal justice. Alternative responses to mass atrocities will be explored. Genocide, crime against humanity, war crimes and the crime of aggression will then be examined in some details. Next, the attention of the course will focus on the departures of international criminal procedure and evidence from forms of justice prevailing in national law enforcement systems. The course will end with an analysis of special difficulties encountered by international criminal courts.

Prerequisites: LAW 208, LAW 308.

Language of Instruction: English (legal terms, however, are also given in Arabic and French).
LAW 464 International Humanitarian Law (IHL) (2.0); 2 cr. This course explores the development and operation of International Humanitarian Law (IHL), which is the body of Public International Law that regulates conduct during armed conflict. Although IHL is the expression most widely used, the same body of law is often, and more correctly, referred to as Law of Armed Conflict (LOAC), and occasionally referred to as Law of War or as Jus in Bello. International Humanitarian Law is the body of law that regulates armed conflict. It seeks to limit the effects of armed conflict by regulating the means and methods of warfare and by protecting persons who are not or are no longer participating in the hostilities. IHL has long been a part of Public International Law, but has only been subject to treaty since the end of the 19th century. Traditionally, conventional IHL has been divided into the Law of the Hague (concerned with methods and means of warfare) and the Law of Geneva (concerned with protection of victims of war). While most IHL treaties were designed to regulate armed conflict between states (international armed conflict), the trend in 21st century warfare has been toward internal armed conflicts that often involve the armed of when the Geneva Conventions and their Additional Protocols were created. As a result, a significant portion of the course will be devoted to examining the challenges of post-20th century armed conflict. IHL is related to other fields of Public International Law, in particular to International Criminal Law and to International Human Rights Law. The precise boundaries between these fields are a subject of continuing debate. The course will consider the modern dynamic of these bodies of law, and more importantly, examine how they may affect future military operations.

Language of Instruction: English (legal terms, however, are also given in Arabic and French).

LAW 465 Corporate Governance Law (2.0); 2 cr. This course will address corporate governance from an organizational and institutional point of view: It will illustrate how corporate governance has evolved over time and will cover both theory and relevant practices. In terms of content, the course will:

- Highlight the main issues of corporate governance (e.g., the business structure of the firm; institutional investors’ role in the private and public corporation; the relationships between the owners, the board, and firm management; and the relationships between the company and its major stakeholders);
- Provide concrete examples of “good” and “bad” corporate governance; outline key principles of corporate governance; present the main tools for assessing corporate governance practices; and
- Discuss the relevant theories underlying corporate governance practices (e.g., theories of organizations, institutions, governance, organizational behavior, leadership, new institutional economics, power, and agency).

Prerequisites: LAW 305.

Language of Instruction: English (legal terms, however, are also given in Arabic and French).

LAW 466 Constitutional Justice (2.0); 2 cr. This course addresses the birth and development of Constitutional Justice in the world. The course examines the different systems of Constitutional Justice in Lebanon, France, the U.S.A, U.K., etc., the Constitutional Council and its organization, the conditions for applications and forms of redress before the Constitutional Council, the Council’s decision, the reference material: The constitutional bloc, organic laws, and principles of constitutional value.

Language of Instruction: Arabic (legal terms, however, are also given in English and French).

LAW 467 Administrative Justice (2.0); 2 cr. The aim of this course is to present Administrative Justice, its particularities and the regime applicable to the different methods of recourse against administrative decision. The course will be divided into four parts:

- The organization of administrative tribunals, the different types of tribunals and their jurisdiction.
• The principal characteristics of Administrative Justice: The principle of separation of powers and the characteristics of administrative procedure.
• The different forms of redress and the regime of each form.
• The procedural requirements for submitting an application (the initial decision by the administration, the deadlines, the forms of appellate review, etc.).

Prerequisites: LAW 206, LAW 306.

Language of Instruction: Arabic (legal terms, however, are also given in English and French).

LAW 468 Oil and Gas (2.0); 2 cr. The course provides a comprehensive grounding in all aspects of the oil and gas industry. After a broad overview of the distribution of petroleum resources and the organizations that constitute the industry, it introduces the techniques used to detect and assess the commercial viability of deposits. Next, it looks at the extraction process and the technologies used to process, store, transport and refine oil and gas. Finally, it explores the processes of selling, trading and marketing gas and petroleum products, before finishing with a survey of environmental and geopolitical risks and opportunities, and an assessment of the industry’s future.

Language of Instruction: English (legal terms, however, are also given in Arabic and French).

LAW 469 Corporate Insolvency Law (2.0); 2 cr. The course begins with an overview of the functions of insolvency procedures. It then examines, in the context of winding-up, the relationship between Insolvency Law and the general law of property, contract, obligation, and the extent to which Insolvency Law interferes with rights accrued under the general law, and examines the rationality of the legal principles underlying the rules relating to the treatment of claims and the distribution of assists in winding up. The course then turns to consider procedures that are capable of securing the continuation of viable businesses, often referred to as corporate rescue. The most significant of these is the administration procedure, but administrative receivership, which it is gradually replacing, is also still of some practical importance. They raise interesting and complex questions about the allocation of decision-making power, and the mechanisms for ensuring the accountability of decision-makers. More informal procedures, in particular schemes of arrangement, are also considered. Company Law also has a role to play in relation to insolvent companies, raising in particular such questions as the liability of a parent for the debts of its subsidiary and the responsibilities of directors under general law and under insolvency legislation.

Prerequisites: LAW 305, LAW 404.

Language of Instruction: English (legal terms, however, are also given in Arabic and French).

LAW 470 Water Law (2.0); 2 cr. Water Law presents a mix of Lebanese and Comparative regulatory regimes over a resource that is scarce yet ubiquitous and, of course, essential to life. This course will consider different rights regimes for water, including prior appropriation, riparian rights, and groundwater rights. It will also look at how the public trust doctrine and environmental protection can affect those water rights. The course will compare the view of water as a human right.

Although the course considers Water Law at a national level, the objective will be not just to learn how water is regulated, but also to develop an understanding of the benefits and flaws of the various rights regimes in order to predict how water should be regulated as it becomes an increasingly scarce resource.

Language of Instruction: English (legal terms, however, are also given in Arabic and French).

LAW 495 Thesis: Graduation Project Guidelines; 0 cr. Students in the fourth
year of the program shall write a thesis. The guidelines are the following:

- The student shall choose an advisor and select in coordination with the advisor a topic for research;
- The student shall choose the language of the thesis: English, Arabic, or French;
- It is the responsibility of the student to prepare a clear proposal on the selected topic;
- Select in coordination with the advisor two readers to be members of the committee;
- The advisor shall submit the names of committee members to the Dean of the Faculty;
- The student shall work closely with the advisor securing his/her approval for every chapter written before passing it to the readers;
- Once the advisor and the readers have reviewed the thesis, the advisor shall inform in writing the Dean of the Faculty about the time and place scheduled for the defense. This defense shall be open for all those interested to attend;
- Students must secure a final clearance from the Library, concerning the thesis format;
- Students must provide five duly signed copies of the thesis: one to the University Library, one to every member of his/her Committee, and one to the Faculty Library.
DEPARTMENT OF GOVERNMENT AND INTERNATIONAL RELATIONS

Professors: Nehme, Michel; Ghais, Chahine; Labaki, George
Associate Professors: Al Hindy, Elie; Salem, Naim; Sensenig, Eugene
Assistant Professors: Ghsoub, Dany; Hourani, Guitta

Admission Requirements
Compliance with the general rules and regulations applied by NDU in the general Catalogue.

Graduation Requirements
Students seeking the degree of Bachelor of Arts in the DGIR must complete a total of 105 credits for all majors with an overall average of at least 2.0/4.0 and a minimum average of 2.3/4.0 in the major requirements.

Master’s Degrees

Program Guidelines
The MA degrees in the DGIR require each 36 credit hours, including a thesis. Courses are offered primarily in the late afternoon to allow students to pursue part-time employment or internship, if they so choose. The graduate programs usually require a minimum of four semesters of study depending on the full-time or part-time status of the student.

Admission Requirements
In addition to the University graduate admission requirements, applicants should have a B.A. in Political Science, or Public Administration, or International Affairs and Diplomacy, International Law, or other related fields.

Successful passing of the EET Entrance Exam with a minimum score of 600 is required (p. 66 general catalogue), students’ undergraduate GPA of 3.0 minimum, work experience, letters of recommendation, motivation for a career and leadership are all taken into consideration. The Faculty may require the GRE exam for non-NDU students, and the following prerequisite courses may be required of non-major applicants.

- MA in Political Science:
  IAF 211, POS 201, POS 210 or equivalent by petition.
- MA in Public Administration:
  PAD 201, POS 201, POS 210 or equivalent by petition.
- MA in International Affairs and Diplomacy:
  IAF 211, IAF 321, POS 201 or equivalent by petition.
- MA in International Affairs and Diplomacy - International Law Emphasis:
  IAF 211, IAF 401, POS 442

Graduation Requirements:
Students seeking the degree of MA in GIR must meet the University graduation requirements and complete one of the following two options with a G.P.A. of at least
3.0/4.0: 36 credits of course work in addition to a comprehensive written and oral examination; or Successful completion of 30 credits course work and six credits thesis.

The Department of Government and International Relations offers programs leading to the following degrees:

- Bachelor of Arts in International Affairs and Diplomacy;
- Master of Arts in International Affairs and Diplomacy;
- Master of Arts in International Affairs, International Law Emphasis;
- Bachelor of Arts in Political Science;
- Bachelor of Arts in Political Science - American Studies;
- Bachelor of Arts in Political Science - Euro-Mediterranean Studies;
- Bachelor of Arts in Political Science - NGOs Emphasis;
- Master of Arts in Political Science
- Master of Arts in Political Science - NGOs Emphasis;
- Master of Arts in Political Science - Human Rights Emphasis;
- Bachelor of Arts in Public Administration;
- Master of Arts in Public Administration.
The Degree of Bachelor of Arts in International Affairs and Diplomacy

Mission
The mission of the B.A. program in International Affairs and Diplomacy is to provide students with a broad well-rounded education in the areas of international relations, diplomacy, international organizations, Lebanese government and politics, regional politics, basic international law, basic international political economy, and peace and security. The goal, thus, is to equip students with the higher educational skills, which will enable them to fulfill their career objectives and provide society with skilled graduates to meet diplomatic Foreign Service and a variety of other public and private sector needs.

Program Educational Objectives
The BA program of International Affairs and Diplomacy is designed to provide students with broad knowledge in the field. Graduates are prepared to work in several career areas. These include the Lebanese Government, notably the Ministry of Foreign Affairs; international and regional organizations such as the United Nations and its various agencies, multinational corporations, banking institutions, educational institutions, and, among others, media enterprises and the like.

Program Learning Outcomes
Students who successfully complete the B.A. in International Affairs and Diplomacy will:
- Be able to demonstrate a clear grasp of the basic IR theories that allow them to understand international relations and the factors shaping the behavior of states and non-state actors in the international system;
- Recognize the critical role of diplomats and diplomacy in international affairs
- Accumulate a good understanding of international organizations and be able to pursue careers with such organizations;
- Compile the necessary skills to pursue careers in diplomacy and the diplomatic service, and;
- Develop a broad understanding of the array of political, economic, strategic, and cultural factors that shape international politics.

Degree Requirements (105 credits)

**Liberal Arts Curriculum**
30 cr.

The LAC courses are divided into (6) categories:
Categories I, II, III, and IV have determined number of credits (9, 3, 3, 3 credits) respectively, equivalent to 18 credits, and Categories V and VI have 6 credits each.

**Major Requirements**
45 cr.
IAF 211, IAF 231, IAF 301, IAF 321, IAF 322, IAF 401, IAF 402, IAF 407, IAF 409, IAF 490, PAD 201, POS 210, POS 350, POS 353, POS 382.

**Electives in GIR (21 cr.)**
24 cr.

**Free Electives**
6 cr.

**Minor in IAF (18 cr.)**
Required: IAF 211, IAF 231, IAF 321.
Electives: 9 credits from IAF courses.
Undergraduate Courses: International Affairs and Diplomacy

IAF 211 Introduction to International Relations (3.0); 3 cr. An examination of the nature and evolution of the major concepts that shape international relations: the balance of power, the role of states in the international system, international law, and the elements of foreign policy. Prerequisite: ENL 107.

IAF 231 World Political Geography (3.0); 3 cr. A general survey of states in the world that focuses on politically relevant geographic information: location, size, population, principal cities, major resources.

IAF 239 Elements of Globalization (3.0); 3 cr. This course analyzes the multitude of factors that have increasingly been leading to the phenomenon of globalization in the international system: political, economic, technological, communication, cultural, organizational, financial, legal, and structural/political among others. The course focuses on case studies in the various dimensions of globalization worldwide, and on directed individual and group research.

IAF 301 Modern Political Ideologies (3.0); 3 cr. An introduction to the most influential political ideas in the modern world since the mid-nineteenth century. The focus is on the ideologies that have been influential and effective in the international system. Prerequisite: ENL 107.

IAF 303 Feminism in International Relations (3.0); 3 cr. This course provides an overview of feminist political and international relations theory. It explores the questions surrounding the construction of gender, the complexity and multiplicity in the different positions in gender constructions, and how feminist agency and knowledge creation can exist in masculine dominated spaces.

IAF 305 Gender, Security, and Human Rights (3.0); 3 cr. This course is at the juncture between international relations, peace studies, security studies, human rights and gender studies. The primary objective of this course is to review the theories on security, the feminist perspectives on security, and feminist theory of international politics. This course will cover gender based violence in the context of public and private spaces and in periods of war and peace. Furthermore, the course will examine the role of both state and non-state actors in the perpetuation of violence against women during conflict. Finally, the course will review the role of the women’s movement in the development of gender security agenda in the international system and human rights.

IAF 321 Diplomacy: Theory and Practice (3.0); 3 cr. An examination of the principles and practice of diplomacy, international relations, and an analysis of the structures, functions, and procedures of diplomatic and consular services, including diplomatic privileges, immunities, and recruitment of diplomatic and consular personnel. Prerequisite: IAF 211 or consent of instructor.

IAF 322 Lebanese Diplomacy (3.0); 3 cr. Covers the legal and practical evolution of the Lebanese diplomatic corps and focuses on the framework within which Lebanese diplomacy operates, the direction(s) which it generally takes regionally and internationally, and the approaches and strategies followed. (Arabic/English).

IAF 331 Geopolitics (3.0); 3 cr. The course provides an analysis of the reciprocal effects of geography and political organization on the geopolitical positions of states, in the international system, including size and location demography, national resources, spatial strategies and maritime power. Other topics include: theories of geopolitics, the impact of nationalism on geopolitics, political geography, and the interrelations among geopolitics and international relations. Prerequisite: IAF 231 or consent of instructor.
IAF 332 Introduction to Strategic Studies (3.0); 3 cr. This course introduces students to the field of strategy; the basic concepts and issues of strategy, deterrence, defense, and arms control, an overview of defense policies, programs, and problems. Students will learn how to relate International Relations and Political Science theory to Strategy. Furthermore, students will be able to understand how political military leaders develop policies during times of war and peace. Strategy is a byproduct of geopolitics. Currently, International Relations, as well as Political Science are both directly related to the field of Strategy.

IAF 333 Terrorism (3.0); 3 cr. This course studies terrorism in modern times, its definition, its history, its roots and its geographical spread. Other topics include: The political, religious, social, cultural, economic, and ideological causes of terrorism as well as international cooperation in the fight against terrorism. The course is supplemented by a number of case studies including the September 11 terrorist attack and other examples selected from various countries.

IAF 340 International Political Economy (3.0); 3 cr. Studies the contemporary issues in international political economy approaches, global welfare, international debts, equality, ecology.

IAF 401 Public International Law (3.0); 3 cr. A study of the sources of Public International Law and its application in interstate relations.

IAF 402 Human Rights in International Politics (3.0); 3 cr. This course covers the conceptual bases of the fundamental rights of the human being. It focuses on international principles, conventions, and treaties signed by governments on the question of human rights at the international, regional and national levels, and the ways and means through which violations of human rights may be documented and countered.

IAF 404 Laws of Disruption (3.0); 3 cr. Examination of the various natural, economic, scientific and technological factors which trouble the status-quo of states thus pushing them to develop different political strategies to meet the changes in the world order. Topics include global warming, advancement of technology and cyber space, nuclear development and natural disasters.

IAF 407 International and Regional Organizations (3.0); 3 cr. An examination of the structures, functions, and agencies of the United Nations and other regional international organizations, and their role in the international system. Prerequisite: IAF 211 or consent of instructor.

IAF 409 Foreign Policy Making of the Major Powers (3.0); 3 cr. An analysis of the making and objectives of the foreign policy of the major states in the international system in the context of globalization, the new world order, European integration, and other regional factors. Prerequisite: IAF 211 or consent of instructor.

IAF 411 Conflict Management and Resolution (3.0); 3 cr. This course examines the causes of conflict, its management and neutral resolution. It prepares the student to define the nature of conflict, understand its causes and ramifications, study ways to manage and limit its scope, and then search for solutions. Prerequisite: IAF 211 or consent of instructor.

IAF 453 Euro-Mediterranean Partnership (3.0); 3 cr. A study of the historical and Evolving relationships between Europe and the Middle East, and the factors of trade, resources, security, and geo-strategic consideration which influence these relationships.

IAF 471 Modern Europe and the European Union (3.0); 3 cr. A study of the European Union and its economic, political, social, financial, and legal institutions. Attention is given to the impact of the
European integration process in Europe and beyond. *Prerequisite:* IAF 211 or consent of instructor.

**IAF 488 Current Issues in International Affairs and Diplomacy (3.0); 3 cr.** A seminar highlighting topic areas and theoretical approaches of particular interest to the study of international affairs and diplomacy as a profession. This course will deal with both the critical thinking and practice in a specific area. The content and focus of the course will be altered from semester to semester in order to remain up to date with technical experience and scholarly discourse in the field.

**IAF 490 Senior Study (3.0); 3 cr.** Special topics in International Affairs and Diplomacy.
The Degree of Master of Arts in International Affairs and Diplomacy

Mission
The mission of the MA in International Affairs and Diplomacy is to provide advanced university training in the broad academic field of international affairs and diplomacy and to graduate highly specialized students and equip them with theoretical and practical training that will professionally prepare them for a multitude of career options, locally, regionally, and internationally. Further, the MA degree aims at graduating researchers who are able to pursue doctoral studies.

Program Educational Objectives
The MA program of International Affairs and Diplomacy is designed to provide students with in-depth knowledge in international affairs and diplomacy, national Foreign Service, and contemporary political and economic issues. It offers a variety of courses in international relations, comparative government, international organizations, international law, and draws on some courses in economics and business.

Program Learning Outcomes
Candidates who successfully complete the MA in International Affairs and Diplomacy will:

• Be able to engage in in-depth analysis of international relations and the advanced IR theories that explain those relations and help analyze their directions and effects;
• Be able to demonstrate skills as specialists or researchers in careers of national or international domains;
• Demonstrate the ability to go on for advanced doctoral studies in wide areas of concentrations in international affairs or diplomacy;
• Be able to pursue careers with a variety of international organizations.

Degree Requirements (36 credits)

Core Requirements 9 cr.
IAF 601, PAD 604, POS 681.

Major-Related Electives 15 cr.
Choose 5 courses from
IAF 602, IAF 604, IAF 605, IAF 609, IAF 615, IAF 621, IAF 631, IAF 632, IAF 633, IAF 641, IAF 645, IAF 651, POS 611, POS 661.

Free Electives 6 cr.
Choose any 2 courses from GIR.

Completion Options 6 cr.
Option I: Thesis (IAF 699)
Option II: 2 Major-Related courses & a comprehensive written & oral exam
Graduate Courses: International Affairs and Diplomacy

IAF 601 International Relations; Theory and Practice (3.0); 3 cr. The seminar surveys major theories of international relations and evaluates their utility for understanding international politics. It emphasizes: (1) The broad trends and theoretical frameworks which shape relations among states, both at the international and regional levels; (2) The implications of the power factors on the external and domestic policies of states; and (3) The factors leading to international cooperation and confrontation and their implications.

IAF 602 Economics of International Politics (3.0); 3 cr. The course investigates the relationship between economic and political processes in the international system, and the institutions involved in conducting these processes. Major theoretical understandings of international political economy are examined along with specific issues in the field. These issues include: International trade, trade and developing nations, transnational corporations, multinational investment, and the World Trade Organization.

IAF 604 Human Rights in International Politics (3.0); 3 cr. This seminar focuses on the role played by the UN and other intergovernmental organizations in protecting, promoting, and advancing these rights. Special emphasis is placed on problems of human rights violations worldwide, on international conventions, and the role of human rights organizations internationally.

IAF 605 International Organizations and Specialized Agencies (3.0); 3 cr. This seminar focuses on the role played by the UN and other intergovernmental organizations in international affairs. Special emphasis is placed on the operations of the specialized agencies (IMF, World Bank), the determinants of their policies, and the impact of these policies internationally.

IAF 609 Ethnic Conflict and Conflict Resolution (3.0); 3 cr. The seminar focuses on the theories and methods of conflict resolution, the relevant literature in the field, and the importance of conflict resolution mechanisms and modalities in international politics. These theories and modalities are applied to various intra- and interstate conflicts in the international system, some of which are focused upon as case studies in the seminar.

IAF 611 Globalization (3.0); 3 cr. Analyzes the multitude of factors that have increasingly been leading to the phenomenon of globalization in the international system: political, economic, technological, communication, cultural, organizational, financial, legal, and structural/political. The seminar focuses on case studies in the various dimensions of globalization worldwide, and on directed individual and group research.

IAF 615 Statesmanship and Diplomacy (3.0); 3 cr. Deals with the role of leaders and diplomats in protecting and promoting countries’ interests and in influencing international politics, and addresses the factors that may guide or constrain statesmen in conducting foreign policy.

IAF617Democracy and Democratization in the International System (3.0); 3 cr. Covers the recent trends towards democratization and the factors which promote or hinder democracy internationally. The seminar covers the theories of democracy and their evolution since the late eighteenth century, the development and expansion of democracy in various parts of the world or the constraints limiting its spread in others, as well as the implications of these questions on peoples, states, and international relations.

IAF 619 Nationalism and the politics of identity (3.0); 3 cr. Studies the different and complex factors shaping identity and
national formations of groups and states, and explores how issues of ethnic and national identities have shaped world politics, and how subnationalism, supranationalism, and/or internationalism are reshaping it. Covers recent research and literature in the field concerning questions of identity in the international system and their effects on national integration and/or disintegration.

IAF 621 Contemporary International Issues (3.0); 3 cr. Provides an overview of the contemporary issues in international affairs that have political, strategic, and socio-economic significance in interstate relations. These issues range from ideological conflicts to technology and politics, warfare and politics, violence and terrorism, and nuclear proliferation.

IAF 623 The European Integration: Its impact (3.0); 3 cr. Analysis of the institutional structures of the European Union. Emphasis is on the economic and political effects of the integration process on Europe and beyond.

IAF 631 U.S. Foreign Policy Making (3.0); 3 cr. The seminar explores the United States’ foreign policy-making from an institutional perspective. It focuses on Congress, the Presidency, and the relevant executive agencies. Attention is given to U.S. policy toward the Middle East.

IAF 632 Diplomacy (3.0); 3 cr. The focus in this seminar is on the role of diplomacy in interstate relations and how diplomacy can facilitate interaction among governments and nations and help to achieve national goals. It emphasizes the basics of diplomatic negotiations and bargaining along with the etiquettes of diplomatic and political relations.

IAF 633 Comparative Foreign Policy (3.0); 3 cr. The focus in this course is on how foreign policy is made in the context of a state’s declared objectives. A primary attention is directed to the foreign policy-making of the major states in the international system and the various processes used to accomplish political goals. Ideologies, national interest, and the type of political system are focused upon insofar as they shape a state’s foreign policy direction.

IAF 635 Terrorism in the international System (3.0); 3 cr. Generically defined as violence targeting indiscriminately civilians and civil communities and milieus at the national or international levels, terrorism, in recent decades, has become a concern of global scale. The seminar analyses the factors causing the spread of this phenomenon and the measures or policies applied, or that may be applied, to deal with such threats.

IAF 641 Public International Law (3.0); 3 cr. A graduate seminar that deals with the sources and development of international law, with a special attention given to current trends and problems. A critical evaluation of contemporary problems of world legal order is provided, covering issues related to global resources regimes, war, social and economic and trade laws.

IAF 645 Political Risk Analysis (3.0); 3 cr. This course aims at investigating current international events and highlighting their potential negative impacts in the political, economic, social, and business arenas. Students will be given case studies in the detection and analysis of risk indicators and their probable consequences.

IAF 649 International Energy and Environmental issues (3.0); 3 cr. A study of energy questions globally from the perspectives of economic developmental needs, on the one hand, and environmental considerations and concerns, on the other. The seminar surveys the evolution of energy usage internationally and assesses the use of different sources of energy over time, the efficiency of these various sources, and their effects on development, the environment, and human society.

IAF 660 Special Topics in International Affairs (3.0); 3 cr. The seminar deals with current issues in international affairs that have
political, strategic, or economic significance at the global or regional levels. The questions to be studied in this seminar are based on current international developments and are chosen according to the specialty of the professor directing the course.

**IAF 665 Current Issues in Human Rights and Global Justice (3.0); 3 cr.** The first part of this course focuses on the dramatic changes in the creation and enforcement of international human rights law that have taken place since World War II. Notwithstanding serious challenges from a variety of sources, no government in the world publicly dissents from the acceptance of support for human rights. Students will examine the existing international human rights regime and explore the impact of the UN charter, the Universal Declaration, and various multilateral and regional human rights treaties and regimes on the behavior of nations today. Using cases from the M.E., Europe, US and international courts, the course will the focus on ethical issues in human rights. Topics will include political repression, informed consent, and human rights. Law can be used to promote human rights.

**IAF 699 Thesis; 6 cr.** The thesis involves the application of research methods to a significant topic of current relevance to the spheres of international affairs and diplomacy. The project involves the incorporation of the student’s hypotheses, methods of testing, test results and conclusion in a sound, written report available to later researchers.
The Degree of Master of Arts in International Affairs and Diplomacy - International Law Emphasis

Program Educational Objectives
In an increasingly interactive world influenced by state and non-state actors in which governments, peoples, and large varieties of organizations and multinational corporations interact on a daily basis through an enormity of contracts, regulations, laws and procedures, it has become necessary that higher educational institutions stress in their academic curricula the importance of International Law. This concentration in International Law helps students understand the basic different legal systems applied in international relations and the role of International Law in International Affairs.

Program Learning Outcomes
Candidates who successfully complete the MA in International Affairs and Diplomacy - International Law Concentration will:

- Combine and apply advanced knowledge in international affairs with a specialization in international law that gives them added career value;
- Illustrate acquired knowledge that will be of special interest to IGOs, NGOs, international banks, and a whole range of MNCs operating on the international stage;
- Assemble effective skills in understanding international legal theories and policies and applying those theories and policies in professional practice;
- Be able to demonstrate an ability to understand international technical legal terms and write reports and research applying appropriate professional legal terminologies.

Graduate Courses: International Law

INL 620 International and Comparative Patent Law (3.0); 3 cr. A study of patent reform issues including domestic patent reform legislation and ongoing harmonization treaty discussions under WIPO; review of selected topics with comparative study from the viewpoint of Japan, the United States, and Europe.

INL 622 International Environmental Law (3.0); 3 cr. Studies of the treaty negotiation process, role of international institutions in developing and implementing environmental agreements, relationship between environmental law and international issues, developing countries’ perspectives on environmental law. Issues covered include climate change, export of hazardous waste, deforestation and biodiversity, Antarctica, and environmental concerns in war, human rights, and development financing.

INL 624 International Business Transactions (3.0); 3 cr. U.S. law and practice relating to characteristic forms of international transactions, including the transnational sale of goods (the law governing the documentary sale, various forms of letters of credit, commercial terms and insurance); the export of technology through franchising, distributorship, and licensing contracts; and the export of capital through the establishment, operation, and withdrawal of foreign direct investment. The impact of relevant international organizations and/or emerging substantive international commercial law (e.g., the United Nations convention on Contracts for the International Sale of Goods). Specialized problems in the negotiation and structure of international transactions.

INL 626 International Trade Law (3.0); 3 cr. Study of domestic and international laws and institutions governing foreign trade. Legal aspects of U.S. participation in the World Trade Organization, NAFTA, and other international forums, laws regulating customs and tariffs, most-favored nation treatment, subsidies, dumping, unfair trade practices, and disruptive imports under the escape clause. Specialized problems in regulating exports under the Export Administration Act, boycotts, corrupt practices, and restrictive business practices may be covered.

INL 628 International Litigation (3.0); 3 cr. Study of the history, forms, progress, problems, and future of interstate, third party dispute resolution. Examination of basic issues and principles of public international litigation and arbitration between governments and between a government and a private entity. Investigation of the guiding principles and essential elements of conducting litigation in the arena of public international law and with state parties through in-depth examination of leading cases before the International Court of Justice. Problems of mixed and interstate arbitration, both ad hoc and institutional.

INL 630 Immigration Law (3.0); 3 cr. Theory and application of the Immigration and Nationality Act and 8 Code of Federal Regulations. Examination of practice before the Executive Office of Immigration Review, Immigration and Naturalization Service, Department of State and Department of Labor. Removal, political asylum, adjustment of status, naturalization, and other issues. Focus on family-and employment-based immigration practice. Examination of the procedural aspects of obtaining lawful permanent resident status in the U.S. through the family and/or employment preferences categories, as well as the process for obtaining non-immigrant admission.

INL 632 Refugee and Asylum Law Seminar (3.0); 3 cr. Selected topics from the areas of international law pertaining to the protection of refugees and domestic law of political asylum.

INL 634 International Banking (3.0); 3 cr. Study of the legal aspects of international
banking and finance, including international laws and regulations concerning the structure and transactions of international banks and institutions. Topics include the institutional, legal and regulatory framework for international commercial banking and development finance; the emerging rules regarding international trade in financial services; international supervision of banking activities and regulation of banking transactions; contractual instruments for international financial transactions; and international debt and development crisis.

**INL 638 International Law of Human Rights (3.0); 3 cr.** An overview of international and regional human rights instruments and institutions, focusing on the manner in which the U.N., Middle Eastern, European, Inter-American, African and Asian human rights systems seek to protect individual and group rights. Examination of the problems these systems have encountered in discharging their mandate and exploration of ways to strengthen international and regional governmental and non-governmental efforts in the human rights field.

**INL 642 Law of the Sea (3.0); 3 cr.** International law related to the use of ocean space. Development of international law concerning internal waters, territorial sea, contiguous zone, high seas, continental shelf-fisheries, exclusive economic zone, maritime boundaries, marine environment, marine scientific research, deep seabed and settlement of disputes. Current legal and policy issues associated with these areas.

**INL 644 International Law of Territory (3.0); 3 cr.** Basic principles of the international law of territory, including the definition of territory, the forms it may take, its relationship to states and other subjects of international law, how territory is acquired, how it is lost and how it is transferred, how it is delimited and demarcated, how the title to territory is affected by historical and demographic factors, and traditional and contemporary principles and mechanisms for resolution of territorial disputes. Consideration of the modification of these principles since World War II and their possible application to several intense post-Cold War territorial disputes.

**INL 646 Law of War (3.0); 3 cr.** Examines the origins of the law of war, the 1949 Geneva Conventions for the Protection of War Victims, the Geneva Protocols of 1977, the 1980 Geneva Conventional Weapons Convention, other treaties and customary international law relating to means and methods of warfare, the role of the International Committee of the Red Cross, war crimes and enforcement mechanisms, and current problems in the regulation of hostilities.

**INL 648 International Criminal Law (3.0); 3 cr.** Study of selected issues attending the application of criminal law across international boundaries. Topics may include war crimes, terrorism, narcotics trafficking, money laundering, business fraud, extradition, and the recognition of foreign penal judgments.

**INL 650 International Arbitration (3.0); 3 cr.** Survey of arbitration and related mechanisms of dispute resolution in the international legal system that arise out of commercial, financial, and governmental transactions. Analysis of the arbitration agreement, the process of arbitration, and the enforcement of arbitrate awards as well as the common principles governing the disposition of claims. Review of the various arbitrate tribunals and their rules.

**INL 652 International Negotiations (3.0); 3 cr.** The art and science of international negotiations from a practitioner's perspective: analysis of the roles of the legislative and executive branches; examination of the inter- and intra-agency processes, including pre-, during, and post-negotiation, impact of external influences; and arms control negotiations, and practical exercises in negotiations.

**INL 699 Thesis; 6 cr.** The thesis involves The application of research methods to a significant Topic of current relevance to the spheres of international law.
The Degree of Bachelor of Arts in Political Science

Mission
The mission of the Bachelor’s degree in Political Science is to build the characteristics of high intellect, moral integrity, enlightened citizenship, human solidarity, and responsible leadership by providing a balance of practical, theoretical, and applied course work in the concerned areas of study to students.

Program Educational Objectives
The BA program in Political Science is designed to provide students with a full awareness of the discipline of Political Science. The major program will equip students with knowledge of the structures, institutions, and processes that make up the practice of domestic, regional, and global politics. The core curriculum is developed in a way to stimulate critical analysis and evaluation of the political conditions and cases examined. The department equips the students with the necessary oral and written skills that will afford them a smooth and solid transition into the graduate studies as well as professional preparation in areas which include: the public sector, Foreign Service, international and regional organizations, multi-national corporations, banking institutions, media and other enterprises.

Program Learning Outcomes
Students who successfully complete the BA in Political Science will be able to:

• Demonstrate critical mastery of the technical and formal material required for entry into the workforce;
• Demonstrate a strong command of the major political science theories and concepts;
• Analyze critically and respond to the social, political, and economic needs of the state;
• Discuss critically the current issues in the field of political science in written and oral form;
• Write analytical research papers on political science topics.

Degree Requirements (105 credits)

Liberal Arts Curriculum 30 cr.

The LAC courses are divided into (6) categories:
Categories I, II, III, and IV have determined number of credits (9, 3, 3, 3 credits) respectively, equivalent to 18 credits, and Categories V and VI have 6 credits each.

Major Requirements 45 cr.
IAF 211, IAF 301, IAF 401, IAF 407, IAF 409, PAD 201, PAD 241, PAD 302, POS 210, POS 345, POS 350, POS 353, POS 382, POS 442, POS 490.

Electives in GIR 24 cr.

Free Electives 6 cr.

Minor in Political Science (18 cr.)
Required: POS 210, POS 350, IAF 211.
Electives: 9 credits from POS courses.
The Degree of Bachelor of Arts in Political Science - NGOs Emphasis

Program Educational Objectives
Non-governmental organizations (NGOs) play an important role in creating an open and viable democratic society. This rapidly expanding sector faces the challenges posed by the transition economy and society. We see the Degree Program of training in NGO management and civil society to be a most adequate option for developing a stratum of professional managers in this sector in Lebanon and the Arab World. This program is designed to provide students with broad knowledge in the field of International and Civil Society Organizations and specifically NGOs. Graduates will be prepared to work in several career areas, specifically in independent international, regional and local organizations and those that operate under the umbrella of the United Nations and its various agencies.

Program Learning Outcomes
Students who successfully complete the program will be able to:
• Implement the conceptual knowledge on NGO management as a science and profession;
• Demonstrate the operational skills and fundamental practical and theoretical knowledge required by the NGO community;
• Demonstrate a command of the role of civil society in creating an enabling environment for development Cooperation across civil society organizations, government institutions, multi-lateral and bilateral back-donors;
• Establish networks with multinational corporations, and, among others, media enterprises in their work on development.

Liberal Arts Curriculum 30 cr.

The LAC courses are divided into (6) categories:
Categories I, II, III, and IV have determined number of credits (9, 3, 3, 3 credits) respectively, equivalent to 18 credits, and Categories V and VI have 6 credits each.

Major Requirements 48 cr.
IAF 211, IAF 402, IAF 407, NGO 201, NGO 203, NGO 305, NGO 306, NGO 404, NGO 493, PAD 201, PAD 302, POS 213, POS 240, POS 350, POS 382, POS 442.

Electives in GIR 21 cr.

Free Electives 6 cr.
The Degree of Bachelor of Arts in Political Science - American Studies

Program Educational Objectives
The program introduces students to the field of Political Science in general, and concentrates on American Studies. In addition to the general Political Science courses, students take courses which include: American History, American Constitutional Law, Government and Politics of the US, American Political Parties and Pressure Groups, and American culture. The major program will equip students with professional preparation in the respective areas to include: Public sector, Foreign Service, international and regional organizations, multi-national corporations, banking institutions, media and other enterprises.

Program Learning Outcomes
Students who successfully complete the program will be able to:

- Demonstrate command in the history and politics of American institutional and cultural structures and processes;
- Identify the domestic and global role of the United States in social, political, and economic development;
- Produce academic research papers and reports in the area of American Studies;
- Identify the major theories explored in American Politics.

Degree Requirements (105 credits)

Minors in the Department of Government and International Relations

This program introduces students to the study of political systems in the Middle East, highlighting the Arab states of the region, but also focusing on Cyprus, Iran, Israel, and Turkey. Along with general required Political Science courses, students will take specialized courses on the dialogue of civilizations, human rights - with an emphasis on the Middle East and NGOs in the region - and comparative public administration. The Government and Politics series of courses - including the non-Arab countries of the - will be tailored around the needs of students interested in working in the MENA region within an international and cross-cultural context. This program will equip students with the knowledge and skills needed to work with international and regional governmental organizations, international corporations, research and advocacy based NGOs and regional and international media outlets. It will also help them bridge the gap between the economies and political systems of Europe and the Middle East and take advantage of the expanding trade relationships within the greater Mediterranean market.

The Minor in Middle Eastern Studies would be of particular benefit to students in the following majors and fields of study:

- Primarily in Arabic Literature, Political Science, Public Administration, International Affairs and Diplomacy, Business Administration, Energy Economics, International Business Management, Education, Communication Arts, Advertising and Marketing, Graphic Design;
- Peripherally in Sociology, Religion and Philosophy.

Minor in Peace and Conflict Studies (18 credits)

Academic and professional programs in Peace and Conflict Studies have considerably grown in number over the last decades to prepare students to become professional conflict resolvers. These programs are key in giving students the necessary skills and credentials to: Enroll in a Masters program in conflict resolution; work as crisis management experts, activists, mediators, etc.; widen one’s horizons; Become active members in peace and justice related organizations and contribute to the many existing peace and conflict journals In addition to helping widen their students’ academic horizons and increase their employment opportunities, universities in Lebanon have the social responsibility of introducing their students to peace and justice concepts and skills. Lebanon remains a conflict zone with few grassroots initiatives aimed at managing its disputes. The absence of grassroots inventiveness is the consequence of a shortage in conflict resolution trainings and programs. The youth’s powerlessness in the face of conflict leads it to despair and increase its dependency on the ruling class and/or migrate. NDU is committed to engage in building a qualified peace taskforce and to take the lead in shaping Lebanon’s future conflict resolvers.

The minor brings varied disciplines into dialogue and collaboration enabling a comprehensive and original understanding with which to address the topics of peace and war. A minor that brings established fields of study together through course requirements would also bring students into dialogue.

The Minor in Peace and Conflict Studies would be of particular benefit to students in the following majors and fields of study:

- Primarily in Education, Sociology, Economics, Politics, Psychology, Religion, Philosophy, and other social sciences.

Minor in Strategic Studies (18 credits)

Strategic studies deals with the attempts of sovereign states, and other international players (e.g. UN, EU, NATO) to deal with the contemporary issues challenging their political and economic interests. It enables students to combine their knowledge of politics with a review of the international environment in which it takes place. This interdisciplinary academic field of study is dedicated to the relationship between the political process, geography, the allocation of natural resources, economic development, and military power. The curriculum also includes the role of diplomacy and threats in the preparation and use of force. Specific topics include the emergence and resurgence of major regional powers such as China, India, and Russia, the changing role of the US as the world’s remaining superpower, political Islam, and the military, economic, political developments in crisis regions in Africa, the Middle East, Central and Southern Asia.

Introducing a Minor in Strategic Studies at NDU will allow students to widen their knowledge across the faculties in a comprehensive way. Issues related to economics, politics, international relations, resources and technology will thus gain different dimensions in the minds of the students, who would then be able to apply their knowledge in the world around them.

The Minor in Strategic Studies would be of particular benefit to students in the following majors and fields of study:

- Primarily in Political Science, Public Administration, International Affairs and Diplomacy, Business Administration, Energy Economics, International Business Management, Advertising, Sociology and Marketing;
- Peripherally in Natural Sciences, Psychology, and Economics.

**Minor in Gender Studies (18 Credits)**

Gender Studies is a growing field of studies that cuts across most disciplines. Gender Studies analyses the social construction of the roles of females and males in society and its impact on individuals, communities, societies, states, and the international system. The importance and significance of having a focus on gender in international affairs, political science, education, sociology, nutrition, and medicine has been highlighted in most university institutions globally. The significance of integrating gender understanding and analysis in the Middle East is vital to understand contemporary events and their effects on development of citizenship, peace, and security. NDU’s Handbook references gender in its identity statement, admission policy, and in various faculty values statements. With this in mind the Faculty of Law and Political Science has put together a Gender Studies Minor to explore the impact of gender on policy making, global governance, and social engagement.

The Minor in Gender Studies is an interdisciplinary minor that would be of particular benefit to students in the following majors and fields of study:

- Primarily in Education, Sociology, Literature, Psychology, Political Science, International Affairs, Public Administration, Communication Arts;
- Peripherally in Natural sciences, Religion, Philosophy, Advertising and Marketing, Business Management.

9 cr.
Undergraduate Courses: American Studies

AMS 305 Cultural Pluralism in America (3.0); 3 cr. Survey of the development of American Society focusing on the role of Afro Americans, concepts of cultural pluralism, racism and inter-group relations explored within a comparative historical framework.

AMS 316 American History (3.0); 3 cr. Studies the various stages in the American history, colonial England, Independence, Confederacy and Federacy, the Civil War, WWI, the New Deal, WWII and after.

AMS 408 American Foreign Policy (3.0); 3 cr. The process of formulating US foreign policy, with emphasis on the Department of State and the Foreign Services. Analyzes the major problems of American policy in action.

AMS 481 American Constitutional Law (3.0); 3 cr. The development of constitutional doctrine concerning public power that has resulted from US supreme court cases and decisions.

Undergraduate Courses: Euro-Mediterranean Studies

EMS 303 Modern European Thought (3.0); 3 cr. Overview of the history of ideas in Europe beginning with the Renaissance and covering the liberal age, authoritarian ideologies, and contemporary liberal democracy.

EMS 371 European Civic Politics (3.0); 3 cr. Focuses on the role of civic society in influencing governmental institutions and shaping the political, economic, and social settings. Particular attention is given to parties and citizens’ groups.

EMS 373 Politics and Culture of Germany (3.0); 3 cr. This course will provide an introduction to German politics and culture, students will study the origins of Germany as a state, from unification in the 19th century – through the two World War – to reunification in 1990. Emphasis will be placed on the social, cultural, geopolitical and economic roots of the German political system and its current role within the European Union.

EMS 391 European Politics (3.0); 3 cr. A survey of the new Europe, from Dublin to Moscow, in relation to its political history and future prospects. Geography, economic issues, and military matters are stressed along with the European cultural and sub-cultural identities.

EMS 490 Senior Study: Special Topics in Euro-Mediterranean Studies (3.0); 3 cr.

Undergraduate Courses: History

HIT 101 Contemporary History of Lebanon (3.0); 3 cr. Covers Lebanon’s contemporary history. Political, economic and social developments are stressed.

HIT 211 History of Lebanon and the Middle East (3.0); 3 cr. Deals with the Middle East since the beginning of the Ottoman domination till the present. Prerequisite: ENL 107.
**Undergraduate Courses: NGOs**

**NGO 201 Introduction to NGOs and Civil Society (3.0); 3 cr.** An introduction to NGOs and Civil Society Organizations, their scope, size, structure and funding base. A special emphasis on their contribution to poverty alleviation/reduction, sustainable societies and the progress of social welfare. *Prerequisite:* ENL 107.

**NGO 202 Introduction to Development Theory (3.0); 3 cr.** An introduction to key concepts and current paradigms related to development, poverty alleviation/reduction, international cooperation and relief.

**NGO 203 Introduction to NGO Management (3.0); 3 cr.** An overview of the main areas related to NGO Management such as the context in which the Third Sector is operating, the organizational set-up of NGOs, the relations and programs, projects and other related activities. The main focus will be on development management. *Prerequisite:* ENL 107.

**NGO 204 Civil Society in the MENA-region (3.0); 3 cr.** An analysis of the interaction and networking that take place between NGOs, the State and Non-formal Social Actors in the Middle East, North Africa-region (MENA). A special focus on the typologies of CSO active in the region and the examination of current data from the Arab World.

**NGO 205 Legal Framework of NGOs (3.0); 3 cr.** This course will study the laws applied to NGOs, the procedure of their legal registration, restrictions in their activities, in Lebanon and other MENA-countries, and will also compare these laws with the legal framework of NGOs in Western countries.

**NGO 301 Introduction to Organization Development (3.0); 3 cr.** An examination of current models for organizational assessment and change related to Civil Society Organizations and how different OD-interventions and tools can be applied within the Third Sector. *Prerequisite:* IAF 211 or consent of instructor.

**NGO 304 Project Management for NGOs (3.0); 3 cr.** An introduction to how NGOs prepare, design, fund, manage, implement, monitor and report projects mainly in the development sector. Project-tools on Project Cycle Management (PCM) as well as the Logical Framework Approach (LFA) will be introduced.

**NGO 305 Civil Society and Globalization (3.0); 3 cr.** A study which enables the understanding, analysis and interpretation of the key concepts of globalization and the related current external factors and challenges affecting Civil Society and NGOs.

**NGO 306 NGOs and Development (3.0); 3 cr.** A study of the changing role of NGOs in the development process. A special emphasis on how the focus have changed from short-term relief & welfare to a more sustainable and community based approach.

**NGO 401 Civil Society and Advocacy (3.0); 3 cr.** An introduction to main concepts, definitions and challenges to advocacy in the Third Sector. This course covers how NGOs are building up their advocacy strategies, what kind of tools that are being applied and how the main stake-holders will be involved in the process.

**NGO 402 Disaster Response and Humanitarian Assistance (3.0); 3 cr.** An introduction to the Humanitarian Charter and Minimum Standards in Disaster Response. These standards cover areas in water supply, nutrition, food aid, shelter & site planning and health services and have been adopted by all major agencies involved in Humanitarian Assistance.

**NGO 403 Social Policy (3.0); 3 cr.** An
overview on how social policy is being shaped and elaborated in Welfare States and countries with emerging Civil Societies in the MENA-region. A special emphasis on networking between the State and NGOs on how to assure basic social rights.

**NGO 404 International Development Cooperation (3.0); 3 cr.** An overview of the strategic framework involving Multilateral and Bilateral agencies, International and Local NGOs and their partnerships, alliances and relations in the MENA-context. The course will also treat the current and past paradigms in Development Cooperation.

**NGO 406 Gender and Development (3.0); 3 cr.** This course will treat gender inequality and its correlation with poverty which results in acute failure of human capabilities. The women’s empowerment deficit in the Arab World will be examined and analysed through the Arab Human Development Reports as well as the strategies to overcome the current obstacles.

**NGO 410 Volunteer Management in NGOs (3.0); 3 cr.** Volunteers are the heart of many NGOs and, like employees, need recruitment, reward, incentives, contracts, termination and committees. This course will study the good practices and ethical issues around management of volunteers in NGOs and community work. *Prerequisite: NGO 302.*

**NGO 490 Special Topics (3.0); 3 cr.** Special topics in NGO Management.

**NGO 493 (3.0); 3 cr.** Internship in an NGO, UN agency or social institution.
Undergraduate Courses: Political Science

POS 101 Principles of Politics and Government (3.0); 3 cr. Introduces the basic political philosophies and governmental processes, and the relationships between rights, liberties, and responsibilities of individuals and governments.

POS 201 Introduction to Political Science (3.0); 3 cr. Covers the basic concepts in political science. Prerequisite: ENL 107.

POS 209 Citizenship (3.0); 3 cr. This course introduces students to the concept of citizenship and the relationship between the individual and the state. Participants learn to recognize the rights and duties of the individual, thus reinforcing their capacity for critical thinking and active engagement in public affairs.

POS 210 Government and Politics of Lebanon (3.0); 3 cr. An introduction to the various characteristics and factors that have shaped the Lebanese political system in the first and Second Republics. Special focus will be on democracy and national values, the political processes and national institutions, mainly the Parliament, the Executive/ Administrative Branch, and the Judicial System. Attention will be given to studying the national Construction along with the separation of powers and administrative centralization and decentralization policies.

POS 212 Political History of the Near East Until World War I (3.0); 3 cr. A survey of political history and culture of the Mediterranean civilizations.

POS 213 Introduction to Gender Studies (3.0); 3 cr. This course examines how gender plays a pervasive role in structuring social life. It emphasizes how the social constructs of ethnicity, class, gender, colonial legacy, and cultural identity intersect to legitimize the power and privilege of women and men internationally, with a special focus on the Middle East. Topics include the debate between nature versus nurture, intersections of race, class, gender, and social institutions such as family, education, work, and cultural hegemony.

POS 215 Religion and State (3.0); 3 cr. This course introduces the student to the relationship between religion and politics and the impact of religion on the major dimensions of politics in today world. Religion as defined in the course refers to the social, ideological and economic beliefs associated with various religious communities. This course will focus on the different religious views upon life in society, including economic and political issues and how these different and sometimes opposing views can lead to political strife.

POS 225: Politics of Catholic Social Theory (3.0); 3 cr. This course introduces students to the origins, application, and debate surrounding the social teachings and policies of the Catholic Church over the last 150 years. It deals with the basic texts and Papal Encyclicals – starting with Rerum Novarum in 1891, and other documents included in the Compendium of Social Doctrine as well as Catholic social movements throughout world, thus highlighting the Church’s position on major issues related to politics, good governance, and social affairs. Topics include: peace, social justice, corporate social responsibility (CSR), environmental protection, and the role of the family in a globalized society.

POS 240 Law and Society (3.0); 3 cr. Nature, purposes and sanctions of law sources of law private and public law. Common and civil law, courts and administration of justice. This course is a prerequisite to all law courses. Prerequisite: ENL 107.

POS 304 Government and Politics of Israel (3.0); 3 cr. This course provides an overview of the political system of Israel,
highlighting its ideological, economic, social and cultural variables. It will introduce students to the historical, geopolitical and ideological foundations of the Israeli state, the nature of its institutions and their particular embeddedness in the Arab world, focusing on Lebanon and the Eastern Mediterranean in general.

**POS 308 Human Rights in the Middle East (3.0); 3 cr.** Survey of the fundamental political, social and cultural rights of the human being in the MENA region; the course focuses on the principles, conventions, treaties and laws ratified by governments on the international, regional and national levels and the ways through which violations of human rights are documented and countered. Emphasis will be placed on the interplay between the human rights traditions of the West and those on the MENA region.

**POS 315 Conflict Analysis and Intervention: a Multitrack Approach (3.0); 3 cr.** Conflicts are complicated processes. Choosing an appropriate conflict intervention mechanism is largely dependent on the type of conflict under study. Learning the skills to analyze disputes is required to select the most accurate intervention mechanism.

**POS 317 Political Parties, Public Opinion, Pressure Groups (3.0); 3 cr.** Analysis of pressure politics and political behavior. Impact of parties and pressure group on the governmental efficiency and the public good. Evaluation of public opinions impact on governmental decisions.

**POS 319 Democracy and Human Rights (3.0); 3 cr.** This primary aim of this course is to teach students to think critically about the political and cultural dimensions of democracy and human rights. The course focuses on different strategies of democracy and their relationship with human rights, the origins and maintenance of democracy in the modern world, and the process of democratization and its impact on the state stability and on global protection of human rights.

**POS 320 Media and Politics (3.0); 3 cr.** A study of the ways in which the mass media influence politics and vice versa. The course explores the role that media play in providing information for citizens in the different political systems. Other topics includes: the role of mass media in campaigns and elections, the ways in which media influence public opinion, how the media influence the political process, and political attitudes and behaviors.

**POS 323 Minority Politics (3.0); 3 cr.** An examination of the social, cultural and economic factors which affect the political choices of minorities. Analysis of minorities political rights and actions.

**POS 331 Judicial Politics (3.0); 3 cr.** Examination of the principal actors in the legal system: police, lawyers, judges, and citizens. About half of the course is devoted to the study of judicial behavior in the courts and political and personal influences on judicial behavior.

**POS 337 Dialogue Among Civilizations (3.0); 3 cr.** This course introduces the concepts of tolerance and dialogue and demonstrates how they are the prerequisites for peaceful coexistence. It also emphasizes that terrorism represents the very embodiment of intolerance, thus raising awareness for the need for core values within the national and international communities. Moreover, makes students aware that in our globalizing and increasingly inter-connected world, diverse cultures can provide a needed source of stability and continuity. The challenge is to balance this need against the risk of cultural stagnation. This course assumes that there is no simple solution. Students must always understand that cultures are living, evolving entities, not lifeless artifacts.
POS 345 Ethics and Leadership (3.0); 3 cr. An examination of the nature of the relation between authority and moral duty in light of the long tradition of civil and religious statutes.

POS 350 Comparative Governments and Politics (3.0); 3 cr. A study of the basic approaches to comparative politics. Constitutional comparisons among the political systems of the United States, Great Britain, France, China, and Japan are highlighted.

POS 353 Governments of the Middle East (3.0); 3 cr. A comparative study of the governmental systems and political processes of Middle Eastern countries.

POS 382 Empirical Research Methods (3.0); 3 cr. An exposition of the scientific methods for conducting research, collecting and analyzing data, formulating hypotheses and propositions, and developing well-organized reports. Prerequisite: ENL 213.

POS 403 Arab-Israeli Conflict (3.0); 3 cr. A study of the Arab-Israeli conflict and its effects on the legal, economic, and political patterns of the region and the international community.

POS 405 Religion and Politics in the Middle East (3.0); 3 cr. An exploration of the social, cultural, economic, and developmental roles of religion in the Middle East including the challenges, opportunities and threats that Jewish, Christian and Islamic faith-based political parties and movements are facing in the current context. Emphasis will be placed on the role of religion as a potential force for development, the role of faith-based civil society organizations and the political links to the Mediterranean region and the MENA as a whole.

POS 406 Cultural Pluralism in the Middle East (3.0); 3 cr. Survey of the development of Middle Eastern society focusing on the role of linguistic and confessional minorities, concepts of diversity, ethnic oppression and inter-group relations explored within a comparative historical context. Emphasis will be placed on current theoretical discourse on hybridity, diversity and the roles played by globalization, migration and cyberspace in the region.

POS 408 Gender and the Law (3.0); 3 cr. This course explores the way activism around gender issues has developed into international policies and laws in an attempt to advance gender equality. The course takes a closer look at the implications of such and the political effects of international gender equality policies and laws. It surveys movement, legal and organizational strategies, and explores gender politics in currently salient issue areas ranging from violence and peacemaking to development and international economic restructuring. At the local context this course will cover the major issues concerning gender in Lebanese law.

POS 415 Diasporas: Conflict and Peacebuilding (3.0); 3 cr. This class introduces students to the impact of diasporas on international relations in the 21st century. Students will look at diasporas as communities whose impact needs to be understood in the host country, in the homeland and on the actual diaspora community simultaneously. Because of the ability of migration studies to intersect with development studies, international security and peacebuilding, this course will adopt an interdisciplinary approach to the study of diasporic interactions.

POS 424 Political Economy of the Middle East (3.0); 3 cr. Studies the major economies of the Middle East and the political-administrative systems shaping these economies. The issues addressed include: the major economic centers in the Middle East, concentration of wealth and poverty, redistributive justice and the
international factors shaping Middle Eastern politics and economics. Emphasis will be placed on theories dealing with the role of the state in shaping economic development and the difficulties faced when implementing policy decisions.

**POS 425 Understanding and Creating Social Change (3.0); 3 cr.** This course identifies the causes and patterns of change and explores the origins and types of movements leading social change. Students will be exposed to change agents and change strategies and will learn how to develop a strategic advocacy plan. They will identify proponents and opponents of change and devise a tactic that ensures enough support for the transformation to be sustainable.

**POS 442 Constitutional Law (3.0); 3 cr.** A study of the precepts and provisions of the Lebanese constitution and its contributions to policy, governance, and democracy.

**POS 479 Government and Politics of the United States (3.0); 3 cr.** A study of the constitution of the American government and the determinants of the political process.

**POS 482 Internship (3.0); 3 cr.** A supervised on-the-job working experience in International Affairs, Public Administration, or Political Science. The internship will be done in cooperation with recognised international and national institutions in the private or public sector. Interns will have the opportunity to develop new skills by working under the direction and supervision of an experienced practitioner. A minimum of 120 hours of internship is required. A detailed report is to be submitted as a record of the work accomplished. Prerequisite: Senior standing.

**POS 488 Current Issues in Political Science (3.0); 3 cr.** A seminar highlighting topic areas and theoretical approaches of particular interest to political science as a profession. This course will deal with both the critical thinking and practice in a specific area. The content and focus of the course will be altered from semester to semester in order to remain up to date with technical experience and scholarly discourse in the field.

**POS 490 Senior Study - Special Topics in Political Science (3.0); 3 cr.**
The Department of Government and International Relations offers graduate work leading to the Master of Art in Political Science. This Master’s program is aimed at those students planning or embarking upon a career in public service and in related fields.

**Mission**
The mission of the Master’s Degree in Political Science is to build on the attributes of high intellect, moral integrity, enlightened citizenship, human solidarity, and responsible leadership to provide students with a theoretical and professional foundation for their careers. Rooted specifically in the Maronite Catholic traditions of NDU, graduates will be able to carry out independent and critical original research, work in applied fields such as government, civil society, the media, or private enterprise, and link their scholarly training to the improvement of conditions in society as a whole within a global context.

**Program Educational Objectives**
The Department of Political Science offers graduate work leading to the Master of Art in Political Science. This Master’s program is aimed at those students planning or embarking upon a career in public service and in related fields.

**Program Learning Outcomes**
Students who successfully complete the program will be able to:
- Carry out original research in the field of political science and present publishable papers on the topic;
- Analyze and critique the implementation of international research methods in the MENA region and develop adequate approaches compatible to their field of study;
- Provide analysis to prospective employers in need of expertise in the MENA region.

**Degree Requirements (36 credits)**

**Core Requirements** 9 cr.
IAF 601, PAD 604, POS 681.

**Major Electives** 15 cr.
IAF 604, IAF 605, IAF 615, IAF 633, IAF 641, IAF 645, PAD 618, PAD 627, PAD 652, PAD 654, POS 611, POS 619, POS 651, POS 659.

**Free Electives** 6 cr.

**Completion Options** 6 cr.
Option II: Major-Related courses & comprehensive written and oral exam.
The Degree of Master of Arts in Political Science - Human Rights Emphasis

Program Educational Objectives
The MA in Political Science - Human Rights Concentration inspired by the mission of the University is designed to build on development objectives in the area of forming individuals from Lebanon and the region to acquire the knowledge and tools necessary to become actors of change in their respective societies. Within this context of mainstreaming and networking HR, the master’s degree in the field will greatly facilitate its ongoing teaching, service, and research activities. This program will enable its graduates to not only interface with HR studies in the MENA region, but will also help establish a bridge to the latest international discourses and theories.

Program Learning Outcomes
Students who successfully complete the program will be able to:
- Demonstrate a thorough knowledge of all the international human rights conventions;
- Engage in critical analysis of the politics of human rights;
- Actively participate in developing a national action plan for human rights development in several issue areas;
- Write proposals for funding and research development in any area related to human rights.

The Degree of Master of Arts in Political Science - NGOs Emphasis

**Program Educational Objectives**
This program is designed to provide students with in-depth knowledge in the field of International and Civil Society Organizations and specifically NGOs and NPOs. The Master’s program is aimed at those students planning or embarking upon a career in independent international, regional and local organizations and those that operate under the umbrella of the United Nations and its various agencies, as well as other major development actors in the MENA-region and Arab World, and beyond.

**Program Learning Outcomes**
Students who successfully complete the program will be able to:
- Build on previous experience and expertise in the field of law and demonstrate academic analytical skills with respect to legal practices in the MENA region;
- Carry out original research in the field of legal studies and present publishable papers on the topic;
- Demonstrate practical and professional skills needed for theoretical and applied research with respect to the legal system in the MENA region;
- Coherently and convincingly critique international methods used to study legal processes in the MENA region and provide alternative research approaches.

Graduate Courses: NGOs

NGO 601 Development Theory and Practice. (3.0); 3 cr. This course deals with topics and issues related to the current development challenges in the MENA-region in the context of the global order. Case studies of NGOs that are active in different areas will be selected as well as different examples of sustainable projects and programs.

NGO 602 Changing Role of Civil Society Organizations in the MENA-region (3.0); 3 cr. The focus of this course is on the changing role of Civil Society Organizations in the MENA-region based on existing and emerging NGO-networks. The concept of Civil Society is being examined and challenged.

NGO 603 NGO Management (3.0); 3 cr. A comprehensive overview on issues like good governance and accountability, empowerment, partnership, measuring performance & results as well as the contexts in which NGOs are operating. Issues like advocacy and service-delivery will be examined as well as the existing paradigms in development management.

NGO 604 Organization Development (3.0); 3 cr. This course will examine existing theoretical models around Organization Behavior in the Civil Society Sector. Organizational Assessment & Change, OD-interventions, Organizational Culture, Leadership, and principles and practices for Organizational Learning are other main components of the course.

NGO 605 Civil Society, NGOs, Networking and Advocacy (3.0); 3 cr. An examination of how NGOs are networking and campaigning for human rights and core social issues with the State, the public opinion, the private sector and decision-makers on different levels.

NGO 606 Civil Society, Welfare State and Social Policy (3.0); 3 cr. This course will critically analyze how social policy is being shaped and social services delivered by State, Private and NGO Actors in changing political and social contexts both globally and in the MENA-region.

NGO 611 Advanced Course in Project Management for NGOs (3.0); 3 cr. A comprehensive view with case studies on how NGOs prepare, design, fund, manage, implement, monitor and report projects mainly in the development sector.

NGO 613 Monitoring and Evaluation (3.0); 3 cr. A comprehensive overview how development projects are being monitored and evaluated by the main stakeholders. Other central topics include quantitative and qualitative methods on how to collect, store and analyze data and information as well as how do design the M/E-process as an integral part of the project management system. Prerequisite: NGO 611.

NGO 615 Strategic Planning for NGOs (3.0); 3 cr. This course will treat how NGOs can become more proactive, efficient, focused and committed in their service delivery. The main focus will be to assess current strengths, weaknesses, opportunities and threats and elaborate a strategic framework with the vision & mission statements, guiding values & principles and appropriate plans, programs and projects.

NGO 621 Advanced course on Gender and Development (3.0); 3 cr. This course will examine and analyze gender inequality and its correlation with poverty which results in acute failure of human capabilities. The capability approach with its systematization and theoritization, based on current case studies, is also a central part of the course.
NGO 623 Advanced Course on Religion and Development (3.0); 3 cr. This course will analyze the social and developmental roles of secular and religious NGOs in the Middle East and beyond. The main focus will be on the praxis and the action carried out by Faith Based organizations and Religious Charities.

NGO 626 Disaster Response and Emergency Preparedness (3.0); 3 cr. This course will study several cases of relief operations regarding man-made and humanitarian disasters utilizing the Humanitarian Charter and Minimum Standards in Disaster Response.

NGO 627 Corporate Social Responsibility in the MENA-region (CSR) (3.0); 3 cr. This course will analyze current models of CSR and how the principles can be applied in the Arab World and beyond. Some real life examples will be studied. Related concepts on Corporate Accountability, Governance & Citizenship as well as Social Responsibility & Ethical Investments, will be examined.

NGO 629 Fundraising Strategies and Proposal Writing for NGOs (3.0); 3 cr. This course will examine how NGOs can look for and approach potential donors and specifically how to prepare a written project proposal with all its components. Prerequisite: NGO 611.

NGO 690 Special Topics (3.0); 3 cr. Special topics in NGO Management.

NGO 693 (3.0); 3 cr. Internship in an NGO, UN agency or social institution.
Graduate Courses: Political Science

POS 601 Contemporary Political Theory (3.0); 3 cr. Analyzes the dominant and recent trends in political science theory, political philosophy, and Western political thought. It focuses on the major theories and theorists, Western and non-Western, whose writings have influenced the academic field and research institutions, and who have made their impact on the understanding and practice of politics.

POS 602 Introduction to Human Rights Standards (3.0); 3 cr. The primary aim of this course is to introduce students who have no knowledge of human rights to the basic concepts and principles of human rights and the theoretical debates that surround them. The course focuses on the origins and sources of human rights and how they developed throughout history to become internationally recognized standards. The course also introduces students to the importance and impact of human rights standards in domestic politics and international relations, in the maintenance of democracy and state stability in the modern world.

POS 603 Comparative Legislatures and Legislative Processes (3.0); 3 cr. Analyzes the structures, procedures and norms governing the legislature: making laws, elections, representation, and relations with other branches of government. It focuses on the functions and role of legislatures in general and covers legislatures of select major and non-major states in the international system and the characteristics which make them efficient and influential in the cases of some, or render them ineffective or marginal in the cases of others.

POS 605 Political Parties (3.0); 3 cr. Studies the structures, activities, and role of political parties in government and society. Emphasis is on the positive role of the party in developing the citizen, the political process, and political stability of states, and the factors which make parties effective and relevant. It distinguishes between two broad categories of parties: ideological parties and issue-oriented parties.

POS 607 Civil Liberties (3.0); 3 cr. Examines the development of constitutional law with regard to civil liberties and the protection of all citizens, including women and children, minorities, and ethnic, linguistic, and religious groups. The functions and roles of the courts to protect civil liberties represent one focus of the seminar, while the role of civic groups to promote them represents another. The course is supplemented by the study of case studies related to civil liberties issues.

POS 608 International Treaty Systems of Human Rights (3.0); 3 cr. The course explores the development of the international treaties covering different aspects of human rights through the United Nations, the European Union, and other regional organizations. It introduces the students to the bodies related to these treaties, their importance, functioning, and relevant mechanisms; giving students basic knowledge on how to make use of these bodies to help protect, promote, and implement basic human rights values.

POS 609 Security and Conflict Resolution (3.0); 3 cr. Reviews changing patterns of war and security since the early twentieth century. Introduces students to a wide variety of literature and cases. A special focus is on methods, techniques and the management of conflicts. Different approaches are analyzed: management of conflicts bilaterally between states, multilaterally through international or regional organizations, and through the roles of the good offices of diplomats or personalities of international stature.

POS 611 The Middle East in International Politics (3.0); 3 cr. The
seminar examines the place of the Middle Eastern countries in the world system and the roles played by outside powers in the Middle East.

**POS 613 Politics and the media (3.0); 3 cr.** Role of the media in shaping local and international politics and in influencing agenda setting nationally and internationally. Emphasis is on the role of the various media at the local, national, and inter-state settings, and on ethical conduct, professional norms, general organization, patterns of ownership, and the use of propaganda for various purposes.

**POS 614 Civil and Political Rights (3.0); 3 cr.** This seminar provides students with a detailed review of current civil and political rights. The review will cover the theoretical debates around the rights and practical challenges in their application in general, and Arab and Lebanese contexts in particular.

**POS 615 Economic, Social and Cultural Rights (3.0); 3 cr.** This seminar provides students with a detailed review of all the economic, social and cultural rights. The review will cover the theoretical debates around the rights and practical challenges in their application in general, and Arab and Lebanese contexts in particular.

**POS 616 Rights of Vulnerable Groups (3.0); 3 cr.** This seminar explores the different treaties created to cover the rights of vulnerable groups including women, children, minorities, indigenous peoples, migrant workers, refugees, and the disabled. The seminar explores the reasons for which those treaties were added to the basic original general human rights treaties and the benefits their application can give to a society, notably their added value for the development processes of individual countries. **Prerequisite:** POS 608.

**POS 619 Political Communication (3.0); 3 cr.** Diffusion of persuasive political communications through standard and created media. Examination of campaign techniques (i.e., research on issues and themes, electorate polling, thematic media approaches, campaign strategies) in management and administration.

**POS 632 Human Rights in the MENA Region (3.0); 3 cr.** This seminar views human rights in a regional context and evaluates the history, the current situation, and the future prospects for human rights in the MENA region. It explores the structural problems and challenges that the advancement of human rights is facing and introduces successful experience and good practice that have achieved change and made a difference in their respective societies.

**POS 649 Human Rights in Religious Thought (3.0); 3 cr.** Due to the lately increased importance of religion in international politics and to its longstanding importance in societies, politics and conflicts of the MENA region, this seminar provides a review of the different religions’ positions and views on human rights. Added focus will be provided for the three monotheistic religions that are the main players and have the most influence in MENA politics. The seminar will also explore the possible conflicts between human rights and religious teachings and survey conciliatory approaches. **Prerequisite:** POS 602.

**POS 651 Contemporary Middle East Governments and Political Processes (3.0); 3 cr.** A comparative study of the governmental systems and political processes of the contemporary Middle Eastern countries and their role in world affairs. Topics include elites and political systems, democratization vs. fundamentalization, internal and external conflicts and their impact on nation-building, and constitutional law in the Arab states.

**POS 658 Information Technology and Human Rights (3.0); 3 cr.** Technological developments in the field of information and communication (ICT) have had a tremendous
impact on the field of human rights. This course will emphasize the significance of these changes with respect to freedom of expression, access to information, and protection against undue intrusion in the private sphere. It will also highlight the impact of ICT on protection of cultural rights and innovations in the economic and social fields, including economic opportunities for marginalized groups and regions. 

Prerequisite: POS 602.

POS 681 Research Methods (3.0); 3 cr. The course introduces students to the scientific methods for conducting research, collecting data, analyzing these data, formulating hypotheses and propositions, and developing these propositions into coherent, well-organized reports.

POS 689 Internship in Human Rights (3.0); 3 cr. This course provides a supervised on-the-job working experience in human rights. The internship will be done in cooperation with recognized international and national institutions and organizations from the public and private sector. Interns will have the opportunity to develop new skills by working under the direction and supervision of an experienced practitioner. A minimum of 120 hours of internship is required. A detailed report is to be submitted as a record of the work accomplished.

POS 698 Thesis in Human Rights (6.0); 6 cr. The thesis involves the application of research methods to a significant topic of current relevance to the spheres of human rights. It requires the incorporation of the student’s hypotheses, methods of testing, test results, and conclusion in a sound, rigorous, and scholarly report.

POS 699 Thesis in Political Science (6.0); 6 cr. The thesis involves the application of research methods to a significant topic of current relevance to the spheres of Political Science. It requires the incorporation of the student’s hypotheses, methods of testing, test results and conclusion in a sound report available to later researchers.
The Degree of Bachelor of Arts in Public Administration

Mission
The mission of the B.A. program in Public Administration is to teach students the discipline of public administration. The program is designed to provide students an opportunity to gain an in-depth knowledge of the public sector, its organization, operations, structures, and processes of government. Students are given high quality training in order to become more effective participants in a democratic society as managers, policy analysts, public policy makers, and responsible citizens. Students receive instruction in such subjects as public management, budget preparation, techniques, public policy, ethics, and sustainable development. Graduates in public administration are prepared for careers in government at the national and international levels, as well as employment in nonprofit organizations.

Program Educational Objectives
The program is designed to equip students with comprehensive awareness of the discipline of Public Administration. The major courses will provide students with in-depth knowledge of the field, and will afford them a smooth and solid transition into the graduate studies as well as professional preparation in the following areas: public sector in various ministries of government, budgeting and the budget process, Foreign Service, international and regional organizations, multi-national corporations, banking institutions, and other enterprises.

Program Learning Outcomes
Students graduating in the BA of Public Administration will be able to:
- Demonstrate appropriate analytical and research skills in the study of public administration;
- Identify relevant legal and political actors in the public policy process and study their roles;
- Identify the ethical component of public policy;
- Communicate in written and oral form to convey their knowledge and skills;
- Succeed in getting jobs and pursuing careers in the Lebanese public sector and NGOs.

Degree Requirements (105 credits)

Liberal Arts Curriculum 30 cr.

The LAC courses are divided into (6) categories:
Categories I, II, III, and IV have determined number of credits (9, 3, 3, 3 credits) respectively, equivalent to 18 credits, and Categories V and VI have 6 credits each.

Major Requirements 45 cr.
IAF 401, PAD 201, PAD 241, PAD 302, PAD 312, PAD 332, PAD 421, PAD 422, PAD 461, PAD 462, PAD 490, POS 210, POS 345, POS 382, POS 442.

Electives in GIR 24 cr.

Free Electives 6 cr.

Minor in Public Administration (18 cr.)
Required: PAD 201, PAD 302, PAD 332.
Electives: 9 credits from PAD courses.
Undergraduate Courses: Public Administration

PAD 201 Introduction to Public Administration (3.0); 3 cr. Role of the Administration in the Political process with an examination of the basic concepts of Bureaucracy. This course is a prerequisite to all PAD courses. Prerequisite or Corequisite: ENL 107.

PAD 241 Administrative Law (3.0); 3 cr. (Arabic/English) Studies law governing the organization, powers, and contracts procedures of the executive and administrative establishments.

PAD 302 Elements of Public Policy (3.0); 3 cr. Studies consumer protection, natural resources, environmental protection in relation to science and technology.

PAD 312 Regulatory Politics (3.0); 3 cr. Studies the development and implementation of governmental policies regulating business activities, consumer and labor.

PAD 332 Administration Behavior and Organization Theory (3.0); 3 cr. Examines the consideration of theories seeking to explain administrative behavior, evidence for and against those theories as applied to governments.

PAD 421 Fiscal and Budgetary Policy of Lebanon (3.0); 3 cr. A study of the budgetary process from a legal and economic perspective. Topics include, among others, the public debt, taxation, and financial policy.

PAD 422 Political Administration Development (3.0); 3 cr. Illustrates topics such as: Politics of social changes, comparative urbanization, political administrative development caused by various legal, social, religious and political factors.

PAD 461 Comparative Public Administration (3.0); 3 cr. Comparative public administration and theory. Bureaucracies and their input on the political development process.

PAD 462 Public Management (3.0); 3 cr. Analysis of advanced public management techniques. Problems of implementing techniques: Case study and research.

PAD 490 Senior Study - Special Topics in Public Administration (3.0); 3 cr. Special topics in Public Administration.
The Department of Government and International Relations offers graduate work leading
to the Master of Arts in Public Administration.

Mission
The mission of the MA in Public administration is committed to teaching students the
different theories and concepts of public administration, and to contribute to finding
solutions to public sector challenges by providing a practice-oriented and research-based
training. Furthermore, the program will prepare future graduate for careers in the public
sector and NGOs locally and internationally.

Program Educational Objectives
The Master’s Degree in Public Administration is designed to provide both advanced
theoretical and advanced training for students interested in careers in governmental,
non-profit, and international organizations. The major draws form a broad range of topics
relevant to the public sector. Instruction includes: the roles, development, and principles
of public administration; public policy formulation, implementation and evaluation, public
management, the relations between public administrations and legislators, the budgetary
process, administrative law, public sector personnel management, and professional
ethics. The Master’s program in public administration makes it possible for graduates to
realize advanced educational objectives and to achieve their ambitions to become future
community leaders involved in public policy and public management.

Program Learning Outcomes
Students graduating in the MA of Public Administration will be able to:
• Demonstrate a good understanding of contemporary trends and issues in Public
  Administration;
• Apply research methods and techniques, both quantitative and qualitative;
• Evaluate the management and the financing process of the public sector;
• Analyze the process of developing, approving, implementing, and evaluating public
  policies;
• Demonstrate their ability to judge and apply the ethical dimensions of the public service.

Choose any 2 courses from GIR.  
6 cr.

Completion Options  
Option I: Thesis 6 cr. (PAD 699).  
Option II: Major-Related courses & a comprehensive written and oral exam.  
6 cr.
Graduate Courses: Public Administration

PAD 602 Theories of Organization and the Public Sector (3.0); 3 cr. Examination of theoretical frameworks for studying public and private bureaucracies, with emphasis on ideologies, values, behavioral patterns and concepts of organization.

PAD 604 Public Administration (3.0); 3 cr. Theory and practice of program evaluation and evaluative research. Exploration of scope and limitations of current practice in evaluation, considering economic, political, social and administrative.

PAD 605 Privatization: Theory and Application (3.0); 3 cr. This course addresses privatization as one of the fastest expanding economic phenomena in market economies, particularly in the developing economies of the Third World. It studies the rationale and significance of privatization in different socio-economic sectors and the various theories on privatization, their applications as well as the future of privatization. The course is supplemented with case studies on different forms of privatization.

PAD 612 Comparative Development and Administration (3.0); 3 cr. Analysis of bureaucratic structures and function in Lebanon; industrialized and less developed countries, primarily at national level.

PAD 613 Planning, Program Analysis and Evaluation (3.0); 3 cr. Covers the elements of public planning, analysis and evaluation of public policies and strategies in the context of declared governmental and social policies as well as public needs and welfare. This course aims at studying models and programs for assessing and evaluating public policies in relation to the administrative and economic and social performance of the public sector.

PAD 618 Public Budgeting (3.0); 3 cr. Theory and techniques of budgeting in governmental fiscal relations and the political processes that relate to decision making within the governmental organization.

PAD 627 Political Development and Social Change (3.0); 3 cr. It examines social change in the light of the political structures governing a state. The focus is on various developmental models used to affect or explain social change and on the social environment that may either propel or constrain change.

PAD 629 Public Sector Labor Relations (3.0); 3 cr. Nature of labor relations processes and practices at all levels. Attention to the political variables that distinguish public sector from private sector labor relations.

PAD 632 Administrative Law (3.0); 3 cr. The law governing public administration. Attention to legal reasoning, liability, due process, informalism, and public access. The apparatus of administration.

PAD 652 Organization Leadership (3.0); 3 cr. This course provides an in-depth examination of the leadership function within the work organization. Essential skills of effective leaders are diagnosed with respect to: Goal setting, written and oral presentation, behavioral flexibility. The behavioral dimension and impact of various skills are emphasized to explain the necessary leadership role of both technical and non-technical personnel in the work organization.

PAD 653 Comparative Public Policy (3.0); 3 cr. Comparative analysis of policy formation; process of social and economic policy decision making in selected industrial societies; interaction of institutions, ideas, and power in decisions concerning social welfare, economic planning, and related policy areas.
PAD 654 Bureaucracy and Public Management (3.0); 3 cr. Familiarity with the Lebanese government. Nature of bureaucracy in modern government with emphasis on Lebanon. Explanation of why government agencies behave as they do. Focus on real and imagined problems with bureaucratic rule, evaluation of commonly proposed solutions for these problems. Example from schools, armies, welfare bureaus, regulatory agencies and intelligence service among others.

PAD 699 Thesis or Project, in Public Administration (6.0); 6 cr. The thesis involves the application of research methods to a significant topic of current relevance to the spheres of Public Administration. The project involves the incorporation of the student’s hypotheses, methods of testing, test results and conclusion in a sound, written report available to later researchers.

FACULTY OF NATURAL AND APPLIED SCIENCES

MISSION, VISION AND VALUES

Mission
Consistent with the mission statement of NDU, the Faculty of Natural and Applied Sciences (FNAS) addresses itself to meet the needs of undergraduate and graduate students in the scientific disciplines and improve the scientific literacy of NDU students. The FNAS is committed to develop and disseminate scientific and technological knowledge through quality teaching, research, and outreach activities. The FNAS guides students to be ethical, innovative, lifelong learners, and leaders in their professions and communities.

Vision
The Faculty of Natural and Applied Sciences will be a reputable locus of educational and intellectual excellence in the exact sciences, fostering creative learning systems, building a solid research tradition, sustaining an environment that supports the education of the whole person, and promoting a culture of joyful quest of the ultimate truth (Gaudium de Veritate) about man and nature.

Values
The Faculty of Natural and Applied Sciences shares the following values that reflect its culture and priorities and are inspired by the core values to which the whole NDU community is dedicated:

- Academic Excellence: Whether in education or in research, we seek academic excellence as a landmark of our curricula, believing in a fruitful connection between good research and creative classroom instruction;
- Lifelong Learning: We are committed to inculcate lifelong learning and the concept of continuous self-development;
- Intellectual Freedom: We respect the right of all to pursue knowledge freely, scholarly, ethically, and critically;
- Integrity: We believe in equity and honesty and aspire to incorporate these values in every aspect of our personal and academic lives;
- Dialogue: We encourage constant dialogue between officers, faculty and students, and are under obligation to listen to the concerns and critiques of our students;
- Accountability: We accept the responsibility of being accountable for our actions, and are dedicated to a transparent and efficient use of resources;
- Service: We value the virtue of service as a golden path towards becoming true leaders and as the fullest expression of our humanity;
- Diversity: We value the diversity of religious, ethnic and cultural backgrounds among our students, our faculty and our staff within the vision and framework set by the apostolic constitution “Ex Corde Ecclesiae” on Catholic universities (August 15, 1990);
- Faith: We believe that faith in God, who manifested His love to the entire human family in Jesus Christ, shapes our profound commitment to serve the University and the community.
FACULTY PROFILE
Although the FNAS was established since the official inception of NDU in the academic year 1987-1988, it was only in 1991-1992 that our Faculty started legally, with licensed diplomas, by offering two majors: a BS in Computer Science and a BS in Mathematics (Date of the legal licensing for both: 16/5/1991). Each major was affiliated to a separate department; the Department of Computer Science (DCS) and the department of mathematics (DM), respectively. The next step was taken in 1993 with the licensing of two additional majors: a BS in Actuarial Science (03/06/1993) as part of the DM and a BS in Biology (25/11/1993). As of the academic year 1995-1996, the department of sciences (DS) was established and housed the biology major, as well as the freshman science program, which existed as of October 1997. The department of mathematics was renamed the department of mathematics and statistics (DMS), after housing all university statistic courses as of 1995-1996. The next move was the introduction of a BS in Environmental Science (DS; 23/01/1997). Around the Fall semester of the academic year 2000-2001, five new majors were obtained in a row: a BS in Physics (DS; 24/01/2000), and four majors licensed on the same date (24/03/2000): a BS in Applied Statistics (DMS), a BS in Geographic Information Systems (DCS), a BS in Business Computing (DCS), and a BS in Medical Lab Technology (DS). Then, the DS was enriched with two new majors: a BS in Nutrition & Dietetics (01/10/2004), and a BS in Chemistry (15/04/2005). An important step was taken in 1994 with the introduction of the first Masters program in the FNAS: the MS in Computer Science (DCS; 14/01/1994). In 2001, the second Masters program in the FNAS was licensed: It was the MS in Mathematics (DMS; 30/11/2001). In Fall 2010, the BS degree in Physics and its related physics and astronomy courses were transferred from the DS, to the newly created the department of physics and astronomy, and in the same semester this department launched a joint masters degree in astrophysics in collaboration with Université Saint-Joseph de Beyrouth (USJ). In Fall 2011, two additional masters degrees were officially approved; the MS in Financial Mathematics (13/6/2011) and the MS in Biology (13/6/2011). And as a result of the launching of the Faculty of Nursing and Health Sciences at NDU on October 1st, 2008 (officially licensed on 05/09/2008), both the BS in Nutrition & Dietetics and the BS in Medical Lab Technology were transferred to the new Faculty as of its starting date.

ACADEMIC DEPARTMENTS AND DEGREE PROGRAMS
The FNAS consists of the following departments:
- Department of Computer Science
- Department of Mathematics and Statistics
- Department of Physics & Astronomy
- Department of Sciences

The Undergraduate Program
Each undergraduate program offered at the FNAS is composed of three components:
- Liberal Arts Curriculum (LAC)
- Core and Major Requirements
- Free Elective Requirements

Undergraduate Degrees
The Department of Computer Science offers undergraduate programs leading to the degrees of:
- BS in Business Computing (94 credits)
• BS in Business Computing (concentration: Management Information Systems) (94 credits)
• BS in Computer Science (94 credits)
• BS in Computer Science (concentration: Information Technology) (94 credits)
• BS in Computer Science (concentration: Computer Graphic & Animation) (94 credits)
• BS in Geographic Information Systems (91 credits)

The Department of Mathematics and Statistics offers undergraduate programs leading to the degrees of:
  • BS in Actuarial Sciences (94 credits)
  • BS in Mathematics (94 credits)

The Department of Physics and Astronomy offers an undergraduate program leading to the degree of:
  • BS in Physics (95 credits)

The Department of Sciences offers undergraduate programs leading to the degrees of:
  • BS in Biology (92 credits)
  • BS in Chemistry (92 credits)
  • BS in Environmental Science (92 credits)

The Department of Sciences also offers a Freshman Science program. This program leads to a certificate that is equivalent to the official Lebanese Baccalaureate Part II (Scientific Strands).

Minors
As of the academic year 2008 - 2009, the FNAS launched five minors in:
  • Actuarial Sciences - Department of Mathematics & Statistics
  • Applied Statistics - Department of Mathematics & Statistics
  • Mathematics - Department of Mathematics & Statistics
  • Biology - Department of Sciences
  • Geographic Information Science - Department of Computer Science
  • Physics - Department of Physics & Astronomy

Graduate Programs and Degrees
The FNAS offers graduate programs that lead to the degrees of:
  • MS in Astrophysics (Joint degree with USJ)
  • MS in Biology
  • Master of Science (MS) in Computer Science.
  • MS in Financial Mathematics.
  • MS in Mathematics
POLICIES AND PROCEDURES
Admission Requirements
For admission requirements to the degree of B.S., refer to the section under the title of “Undergraduate Admission” of this Catalog.

Graduation Requirements
To receive the degree of B.S. from the FNAS, a student must fulfill all requirements of the degree program, complete all required courses with an cumulative overall GPA of at least 2.0/4.0 and a minimum GPA of 2.0/4.0 in both the core and major requirements, and clear all accounts with the University. Candidates for degrees are reminded that grades of “I” assigned during the last semester to courses required for graduation will result in delaying their graduation.

FNAS Degree Programs at a Glance
The following table encapsulates, in alphabetical order, all programs of study offered by the FNAS along with the corresponding total number of credits required:

LIBERAL ARTS CURRICULUM (LAC)
The LAC are distributed as follows:

**Category I. English and Arabic Communication 9 cr.**

A. English Communication 6 cr.
   ENL 213: Sophomore Rhetoric 3 cr.

And
ENL 223: Communication Arts 3 cr.

Or
ENL 230: English in the Workplace 3 cr.

B. Arabic Communication (One from the following pool) 3 cr.
   ARB 211: Appreciation of Arabic Literature
   ARB 212: Advanced Arabic Grammar
   ARB 224: Arabic Literature and Human Thought
   ARB 231: Technical Arabic
   ARB 306: The Modern Arabic Novel and Short Story
   ARB 310: Arabic Theater

**Category II. Religion 3 cr.**

REG 212: Religion and Social Issues
REG 213: Catholicism
REG 215: World Religions
REG 313: The Maronites: Faith and Cultural Heritage
REG 314: Marriage and Family in the Catholic Church

**Category III. Ethics 3 cr.**

CSC 203: Information Age and Ethics
   (for students in the Computer Science and Math departments)
ENS 205: Environment, Society and Ethics
   (for students in the Science and Physics departments)

**Category IV. Citizenship 3 cr.**

FQM 200: Food Security and Sustainability
POS 201: Introduction to Political Science
POS 209: Citizenship
POS 210: Government and Politics of Lebanon
POS 240: Law and Society
POS 319: Democracy and Human Rights

**Category V. Cultural Studies and Social Sciences (3 credits)**

ARP 215 Cultural Themes in Lebanese Architecture
BAD 201 Fundamentals of Management
COA 315 World Cinema Survey
COA 350 Current Issues
CSC 206 Games and Society
ECN 211 Principles of Microeconomics
ECN 212 PRINCIPLES OF Macroeconomics
ENG 210 Introduction to Engineering Economy
ENG 220 Engineering Innovation
FAP 215 Art and Culture
HIT 211 History of Lebanon
LIR 214 Introduction to Literary Genres
LIR 217 American Literature to the End of the 19th Century
LIR 305 Novel to the End of the 19th Century
MRK 201 Fundamentals of Marketing
MUS 210 Music Appreciation
NTR 215 Foods and Nutrition of World Cultures
PHL 211 Logic and the Scientific Method
PHL 232 Ancient World Philosophy
PHL 333 Medieval World Philosophy
PHL 334 Modern and Contemporary World Philosophy
POS 225 Politics of Catholic Social Theory
PSL 201 Introduction to Psychology
SOL 201 Introduction to Sociology
SOL 316 Society and Women
SOL 322 Family: Sociological Perspectives
SOL 323 Society and Role of Global Intercultural Communication
TTM 201 Introduction to Tourism & Hospitality
TTM 326 Domestic Travel and Tourism Development

Category VI. Applied and Life Sciences (6 credits)
A. Applied Science
   CSC 201 Computers and Their Use
   CSC 202 Computers for Visual Arts
   GIS 211 Principles of Geographical Information Sciences
   MIS 201 Management Information Systems
   MAT 202 Mathematics for Arts

B. Life and Natural Sciences
   AST 201 Discovering Astronomy
   BIO 201 Your Body in Action
   CHM 211 Principles of Chemistry
   ENS 201 Introduction to Environmental Science
   ENS 202 The Environment and Sustainable Development
   HEA 201 Health Awareness
   HEA 204 Contemporary Health Issues
   NTR 201 Basic Human Nutrition

Students majoring in Computer Science are required to take the following:
   • 3 credits from the Subcategory A
   • 3 credits from the pool (BIO 201, CHM 211, AST 201) (as Science Requirements)

Students majoring in Biology, Chemistry and Environmental Sciences are not allowed to take
CHM 211 as a LAC course.
Mission
The mission of the Department of Computer Science is to offer high-quality education in the computing fields and an environment conducive to research for both students and faculty. Our programs provide graduate and undergraduate students with theoretical and applied knowledge, and adopt a liberal arts education approach that promotes lifelong learning and ethical growth. The Department is dedicated to maintaining its current innovative programs and establishing new ones to uphold its status as an important national and regional center for discovering and applying new knowledge and technologies.

Bachelor of Science in Computer Science

Mission
The mission of the Computer Science program is to educate students in the principles and practices of computer science preparing them for a lifetime of learning and careers in software design and development, computing systems technology and research.

Program Educational Objectives
• To prepare CS graduates to become effective team members or team leaders in the design and development of large computer and software systems;
• To prepare CS graduates for successful professional careers in roles including, but not limited to: programmers, systems engineers, project leaders, administration, design and development;
• To equip CS graduates with the scientific and engineering methodologies for analysis and problem solving; preparing them for advanced study and research in computer science and related disciplines;
• To prepare graduates with the communication and interpersonal skills to become effective team-oriented problem solvers as well as effective communicators with technical and non-technical stakeholders;
• To prepare graduates to identify and analyze legal, ethical and social concerns associated with the computing fields.

Program Learning Outcomes
Upon graduation, the student shall have:
• An ability to apply knowledge of computing and mathematics appropriate to the discipline;
• An ability to analyze a problem, and identify and define the computing
requirements appropriate to its solution;
- An ability to design, implement, and evaluate a computer-based system, process, component, or program to meet desired needs;
- An ability to function effectively on teams to accomplish a common goal;
- An understanding of professional, ethical, legal, security and social issues and responsibilities;
- An ability to communicate effectively with a range of audiences;
- An ability to analyze the local and global impact of computing on individuals, organizations and society;
- Recognition of the need for and an ability to engage in continuing professional development;
- An ability to use current techniques, skills, and tools necessary for computing practice;
- An ability to apply mathematical foundations, algorithmic principles, and computer science theory in the modeling and design of computer-based systems in a way that demonstrates comprehension of the tradeoffs involved in the design choices;
- An ability to apply design and development principles in the construction of software systems of varying complexity.

**Degree Requirements (94 credits)**

**Liberal Arts Curriculum (LAC)**

* The passing grade of CSC 212 and CSC 213 is C−.
Mission
The mission of the Computer Science-Information Technology program is to educate students in the principles and practices of computer science preparing them for a lifetime of learning and careers in software design and development, computing systems technology and research.

Program Educational Objectives
• To prepare IT graduates with the knowledge and skills necessary to be effective professional contributors or leaders in the design, administration and management of information technology systems;
• To prepare graduates for professional careers in IT roles including, but not limited to: managers, systems analysts, system designers, webmasters, project and quality assurance leaders;
• To prepare graduates with the knowledge and skills to conduct advanced studies and research in IT related disciplines;
• To equip graduates with the communication and interpersonal skills to become effective team-oriented problem solvers as well as effective communicators with technical and non-technical stakeholders;
• To prepare graduates to identify and analyze legal, ethical and social concerns associated with the IT fields.

Program Learning Outcomes
All graduating IT majors shall:
• An ability to apply knowledge of computing and mathematics appropriate to the discipline;
• An ability to analyze a problem, and identify and define the computing requirements appropriate to its solution;
• An ability to design, implement, and evaluate a computer-based system, process, component, or program to meet desired needs;
• An ability to function effectively on teams to accomplish a common goal;
• An understanding of professional, ethical, legal, security and social issues and responsibilities;
• An ability to communicate effectively with a range of audiences;
• An ability to analyze the local and global impact of computing on individuals, organizations and society;
• Recognition of the need for and an ability to engage in continuing professional development;
• An ability to use current techniques, skills, and tools necessary for computing practice;
• An ability to use and apply current technical concepts and practices in the core information technologies;
• An ability to identify and analyze user needs and take them into account in the selection, creation, evaluation and administration of computer-based systems;
• An ability to effectively integrate IT-based solutions into the user environment;
• An understanding of best practices and standards and their application;
• An ability to assist in the creation of an effective project plan.
Information Technology (IT) Concentration

Degree Requirements (94 credits)

Liberal Arts Curriculum (LAC) 27 cr.

Core Requirements 21 cr.
*CSC 212, *CSC 213, (CSC 219 or CSC 222), CSC 313, MAT 211, MAT 215, STA 210.

Major Requirements 40 cr.
CSC 218, CSC 226, CSC 305, CSC 312, CSC 316, CSC 385, CSC 414, CSC 425, CSC 446, CSC 463, CSC 480, CSC 490.

Choose two courses from the following list: 6 cr.
CSC 301, CSC 306, CSC 318, CSC 323, CSC 325, CSC 387, CSC 388, CSC 412, CSC 417, CSC 422, CSC 423, CSC 432, CSC 456, CSC 485, MAT 325, MAT 339.

Free Electives 6 cr.

* The passing grade of CSC 212 and CSC 213 is C−.
Mission
The mission of the Computer Science (CGA) program is to educate students in the principles and practices of computer science preparing them for a lifetime of learning and careers in software design and development, computing systems technology and research.

Program Educational Objectives
- To prepare CGA graduates to effectively use technical, conceptual and critical abilities, and appropriate technology tools;
- To prepare CGA graduates for successful professional careers in roles including, but not limited to: modelers, animators, producers, and technical or art directors in all areas of animation and virtual environment production;
- To prepare CGA graduates with the basic principles of software engineering, the mathematical and computing concepts behind computer graphics, hardware concepts for computer graphics, creative visualization, modeling and animation;
- To equip CGA graduates with the scientific and engineering methodologies for analysis and problem solving; preparing them for advanced study and research in computer graphics and animation, and related disciplines;
- To prepare CGA graduates with the communication and interpersonal skills to function as effective members of collaborative multi-disciplinary teams in the production process;
- To prepare CGA graduates to identify and analyze legal, ethical and social concerns associated with the creative process.

Program Learning Outcomes
All graduating CGA majors shall:
- Demonstrate their knowledge of discrete and continuous mathematics and their ability to apply logic and mathematical proof techniques to computer graphics and games problems;
- Demonstrate programming competence using a modern programming language;
- Demonstrate their knowledge of the production process pipeline appropriate to the field of computer graphics and animation;
- Show awareness of human perception of graphic media, color theory and visual communication methods;
- Demonstrate their knowledge of the principles and practices of 2D and 3D graphics including modeling, texturing, shading and animation;
- Demonstrate their knowledge of the principles and practices of video production, editing and special effects;
- Demonstrate competence in using relevant software tools to create and manipulate graphic images, animations, computer games and 3D models in multiple formats;
- Design web-based interactive media suitable for gaming industries, information, advertising and others;
- Demonstrate their knowledge of image processing, related concepts and algorithms;
- Recognize the need for, and demonstrate an ability to engage in, continuing professional development;
• Demonstrate their ability to communicate effectively with a range of audiences and to function effectively on multidisciplinary teams in the production process;
• Demonstrate their understanding of professional, ethical, legal and social issues and responsibilities;
• Demonstrate their ability to engage in a graduate program in computer graphics and animation and related fields.

Bachelor of Science in Business Computing

Mission
The mission of the Business Computing Program is to educate students in the principles and practices of computing with focus on business knowledge and applications. Our program prepares students for careers and graduate studies in Business or IT related fields.

Program Educational Objectives
- To prepare BC graduates with the knowledge and skills necessary to be effective professional contributors or leaders in the design, administration and management of information technology systems and databases;
- To prepare BC graduates for professional careers in roles including, but not limited to: project managers, systems analysts, applications developers, webmasters, database administration and quality assurance;
- To provide BC graduates with the communication and interpersonal skills to become effective team-oriented problem solvers as well as effective communicators with non-technical stakeholders;
- To prepare BC graduates with the knowledge and skills to conduct advanced studies and research in software applications, information storage and retrieval, data mining, business administration and management;
- To prepare BC graduates to identify and analyze legal, ethical and social concerns associated with the computing and business fields.

Program Learning Outcomes
All graduating BC majors shall:
- Demonstrate a good practical background in computing, mathematics and statistics with a focus on business knowledge and applications;
- Demonstrate proficiency in the principles of the software development lifecycle, using a range of problem-solving, programming, and software engineering techniques;
- Demonstrate proficiency in the design and development of web applications;
- Demonstrate programming competence using a modern programming language;
- Demonstrate good knowledge of computer networking concepts;
- Demonstrate a good practical background in accounting and economics;
- Demonstrate good analysis, design and implementation skills of information systems;
- Demonstrate proficiency in database management system and show experience creating database solutions;
- Recognize the need for, and demonstrate an ability to engage in, continuing professional development;
- Demonstrate their ability to communicate effectively with a range of audiences and to function effectively on multidisciplinary teams to accomplish a common goal;
- Demonstrate their understanding of professional, ethical, legal and security issues and responsibilities;
- Demonstrate their ability to engage in a graduate program in Business or IT related fields.
Degree Requirements (94 Credits)

Liberal Arts Curriculum (LAC) 27 cr.

Core Requirements 27 cr.
CSC 216, CSC 217, CSC 226, CSC 480, ACO 201, ECN 211, MAT 205, MAT 214, STA 206, STA 207.

Major Requirements 34 cr.
CSC 301, CSC 305, CSC 306, CSC 417, CSC 446, CSC 480, CSC 490, ECN 212, MIS 345, MIS 431.

Choose two courses from the following list 6 cr.
CSC 218, CSC 219, CSC 231, CSC 301, CSC 316, CSC 318, CSC 323, CSC 385, CSC 387, CSC 388, CSC 423, CSC 426, CSC 456, CSC 485, MIS 333, MIS 434, MIS 442.

Free Electives 6 cr.
Mission
The mission of the Management Information Systems (MIS) Program is to educate students in the principles and practices of computing with focus on business knowledge and applications. Our program prepares students for careers and graduate studies in Business or IT related fields.

Program Educational Objectives
• To provide MIS graduates with the knowledge and skills necessary to be effective professional contributors or leaders in the design, administration and management of computer based information systems;
• To prepare MIS graduates for professional careers in roles including, but not limited to: directors of information systems functions, project managers, systems analysts, and data management;
• To provide MIS graduates with the knowledge and skills to conduct advanced studies and research in disciplines for business administration, knowledge management, decision support systems and related fields;
• To equip MIS graduates with the communication skills to function effectively in diverse groups and operate in an increasingly connected world;
• To prepare MIS graduates to identify and analyze legal, ethical and social concerns associated with the computing and business fields.

Program Learning Outcomes
All graduating MIS majors shall:
• Demonstrate a competence in the analysis and design of information systems and understand what is involved in systems implementation;
• Demonstrate a competence in applying project management methods, techniques and tools to help organizations meet their objectives;
• Demonstrate their ability to work in multidisciplinary teams to design, develop, and manage complex IS projects from initial information gathering through final project implementation;
• Demonstrate good programming skills in a modern programming language, which will enable students to develop business programs and prototypes such as e-business and dynamic web site;
• Demonstrate good knowledge of the role and management of telecommunications networks in organizations;
• Demonstrate practical knowledge of modern database management system and show experience building database solutions;
• Exhibit good business communication and interpersonal skills and demonstrate an ability to professionally communicate with a range of audiences;
• Recognize the need for, and demonstrate an ability to engage in, continuing professional development;
• Demonstrate their understanding of professional, ethical, legal and security issues and responsibilities;
• Demonstrate their ability to engage in a graduate program in Business or IT related fields.
Management Information Systems (MIS) Concentration

Degree Requirements (94 credits)

Liberal Arts Curriculum (LAC) 27 cr.

Core Requirements 27 cr.
ACO 201, BAD 201, BAD 425, BAD 429, BAD 453, CSC 216, CSC 226, MRK 201, STA 206.

Major Requirements 34 cr.
CSC 301, CSC 305, CSC 306, MIS 333, MIS 345, MIS 431, MIS 434, MIS 442, CSC 480, CSC 490.

Choose two courses from the following list:
CSC 217, CSC 316, CSC 385, CSC 387, CSC 388, CSC 417, CSC 425, CSC 446, CSC 456, CSC 485.

Free Electives 6 cr.
CSC 100 Introduction to Practical Computing (3.0); 3 cr. This course is offered to students who want to enrich their knowledge and skills in Information Technology and computing. It is designed so that students build problem solving and critical thinking skills related to Computer Science. It is intended to engage learners in the creative aspect through animation, web development, digital media, office, and programming. Through both its content and structure, the course aims to appeal to a broad audience of students, whether expecting to major in computer science related tracks or to discovering the challenges and capabilities of this discipline.

CSC 201 Computers and Their Use (3.0); 3 cr. This course exposes students to a broad view of computer science by examining computer fundamentals, the system unit, input/output and storage, system and application software, the Internet and the WWW, networks, computer ethics, and security. In addition, the course aims to provide students with skills in managing data, word processing, electronic spreadsheets and presentations, web browsing, and e-learning.

CSC 202 Computers for Visual Arts (3.0); 3 cr. This course introduces the basic concepts of computer graphics and prepares students to the use of the state-of-the-art software packages for their projects. Students will experience working in groups, learn about project ethics and write formal reports for visual based projects. The technical part covers various perspectives of the visual art work such as 2D image manipulation, editing tools, 2D animation, compositing and video editing.

CSC 203 Information Age and Ethics (3.0); 3 cr. This course introduces the theory and practice of computer ethics. It presents issues such as social networking, government surveillance, and intellectual property from different points of view. It allows students to understand how ethical theory can be applied to make ethical decisions concerning different computing issues.

CSC 204 Programming Logic (3.0); 3 cr. This is a language independent course that focuses on programming logic. Students learn to develop essential tools for problem solving such as hierarchy charts, pseudocode, and flowcharts. It places special emphasis on concepts such as visual, event-driven, and object-oriented programming. The course serves as a strong and thorough preparation for a sequence of up to date computer programming courses.

CSC 205 Adventures in Computational Thinking (3.0); 3 cr. The aim of this course is to introduce programming concepts in an appealing and fun way. Even though it places special emphasis on concepts such as structured programming, algorithms and recursion, students will learn to translate ideas into running programs using very simple programming languages.

CSC 206 Games and Society (3.0); 3 cr. In this course, students study the positive and negative effects of video games on society, and the art and logic involved with the creation of the games. It includes research and discussions about games from a social perspective. The course also introduces some fundamentals of game design and exposure to building simple computer games.

CSC 212 Program Design and Data Abstraction I (3.0); 3 cr. This course is an introduction to the fundamentals of computer programming and basic software design. Topics include: Programming logic, design and implementation, problem decomposition, top-down problem solving. Program implementation is done using C++ structures such as data types, input and output, calculations, selections, repetitions, functions, arrays, and pointers.
Maintenance skills like program testing and debugging are also covered.

**CSC 213 Program Design and Data Abstraction II (3.0); 3 cr.** This course introduces software design and implementation from an object-oriented perspective using the C++ programming language. Topics include data abstraction, encapsulation, information hiding, software reusability, composition, inheritance, polymorphism, operator overloading, templates, exception handling and file processing. *Prerequisite:* CSC 212.

**CSC 216 Computer Programming I (3.0); 3 cr.** This course is the first in a sequence of computer programming courses using Visual Basic. The purpose of this course is to introduce the fundamentals of programming in Visual Basic. NET including problem solving using computers, form and control properties, variables, assignment statements, arithmetic, control structures, arrays, functions, subs, and object-oriented, event-driven programming (OOED).

**CSC 217 Computer Programming II (3.0); 3 cr.** This course focuses on intermediate level topics in a programming language. Topics include arrays; simple I/O including text file I/O; object-oriented design; definition of classes including fields, methods, and constructors; subclasses, inheritance, and method overriding; privacy and visibility of class members; abstract base classes; using collection classes; and query language LINQ for eliciting and updating data from data stores such as arrays, collections, files, and databases. *Prerequisite:* CSC 216 or MIS 216.

**CSC 218 Principles of Communication Systems (3.0); 3 cr.** This course provides an introduction to data communications principles and computer networks. The course covers the fundamentals of signaling, basic transmission concepts, transmission media, analog and digital transmission, data encoding and modulation; Shannon channel capacity, in addition to the TCP/IP layering model. *Prerequisite:* none.

**CSC 219 Digital Computer Fundamentals (3.0); 3 cr.** Fundamentals of logic design, the design of switching circuits using small and medium scale integrated devices. Flip flops, counters, decoders, multiplexes, and registers. *Prerequisite:* none.

**CSC 222 Computer Organization and Assembly Language (3.0); 3 cr.** Machine level architecture, functional units, memory, debugging, input/output structures, storage systems, instruction sets, machine cycle, assemblers, macroassemblers and microprocessors.

**CSC 226 Introduction to Database (3.0); 3 cr.** This course introduces the fundamental concepts for designing, using, and implementing database systems. Students will appreciate the importance of databases, and why they are important resources that must be well managed and understood. *Prerequisite:* CSC 201 or equivalence.

**CSC 231 Multimedia Applications (3.0); 3 cr.** This course provides an introduction to digital multimedia applications. It covers essential concepts in this area, and their application using multimedia production tools. The students mainly learn how to develop simple computer games and interactive media. *Prerequisite:* CSC 213.

**CSC 270 Computer Aided Engineering Design (0.2); 1 cr.** Introduction to computer aided drawing. Applications of existing CAD software to engineering problems.

**CSC 273 Workshop in Computer Aided Architectural Design (3.0); 3 cr.** Aims at applying CAD concepts in developing architectural projects.

**CSC 277 Software Packages for Computer Graphics I (3.0); 3 cr.** This course introduces 3D studio Max. Modeling tools, Shaders and Textures, Lighting, Rendering and Animation. *Prerequisite:* None.
CSC 278 Software Packages for Computer Graphics II (3.0); 3 cr.
Introduction to Graphics and Animation through the use of the Autodesk Maya package and through the discussion of the underlying concepts. Includes in-class, hands-on practice and lab time to develop beginning models and animations. Use of Autodesk Maya Workflow to make a first 3D animation. Prerequisite: No pre-requisite.

CSC 279 Software Packages for Computer Graphics III (3.0); 3 cr. This course is mostly training on 3rd party software or plugins for major applications in the market (Autodesk 3D studio max, Autodesk Maya...). Prerequisite: CSC 277.

CSC 301 Management Information Systems (3.0); 3 cr. This course is an introduction to the fundamentals of information technologies and to the strategic opportunities and challenges presented by these technologies. The topics covered in this course are related to data management such as databases, data warehousing, data analysis, and data mining. In addition modern information systems infrastructure is introduced mainly related to telecommunication networks and technology, cloud, and information systems security. Prerequisite: CSC 216 or CSC 212.

CSC 305 System Analysis and Design (3.0); 3 cr. This course is intended to provide a comprehensive coverage of traditional structured analysis, object-oriented concepts, and agile methods approach of systems analysis and design. Design techniques (Process modeling, Data modelling, and Object Oriented modeling) will be introduced in addition to Project management techniques. Prerequisite: CSC 226 or its equivalence.

CSC 306 Web Design (3.0); 3 cr. This course covers web design basics at the user interface level. The course takes the students stage-by-stage through the design of specific sites, ranging from personal sites to creating and managing a corporate intranet. Topics include HTML, CSS, JavaScript, JQuery, Bootstrap, UI/UX, Browser Compatibility, Search Engine Optimization and Social Media Optimization. Prerequisite: CSC 217 or CSC 213.

CSC 311 Theory of Computation (3.0); 3 cr. This course explores the limits of computation through the use of different models of computation: finite automata, pushdown automata and Turing machine. Undecidability is explained and the set of undecidable problems is explored using reductions. The related topics of regular expressions, closure properties, pumping lemma, and context-free grammars are covered. An introduction to computational complexity is also given. Prerequisites: CSC 313, MAT 211.

CSC 312 Computer Architecture (3.0); 3 cr. This course is concerned with the structure and behavior of the various functional modules of a digital computer and the reasoning behind their interaction to provide the processing needs of the user. It covers general feature of MIPS instruction set, Arithmetic floating point operations, performance evaluation using Amdahl's law, pipelining, data and branch hazards, and memory. It also introduces parallel computing architecture in a cloud environment and graphic processing unit (GPU) architecture. Prerequisite: CSC 219 or EEN 220.

CSC 313 Data Structures (3.0); 3 cr. A detailed coverage of standard data structures with an emphasis on complexity analysis. Topics include: Asymptotic analysis, linked lists, stacks, queues, trees and balanced trees, hashing, priority queues and heaps, sorting. Standard graph algorithms such as DFS, BFS, shortest paths and minimum spanning trees are also covered. Prerequisite: CSC 213.

CSC 314 Programming Languages (3.0); 3 cr. A comparative study of programming languages: syntax, semanticist and implementation. Students will also have to learn and gain working familiarity with the ANSI Standard C programming language. Prerequisite: CSC 212.
CSC 316 Computers Security and Their Data (3.0); 3 cr. This course covers the main concepts of computer security specially, the ones concerned with the latest technology. Encryption (symmetric & asymmetric), and the most important protocols using encryption are introduced. Also, program security, operating system security, database security, network security, mobile security and web security are introduced. Prerequisite: CSC 217 or CSC 213.

CSC 318 Geographic Information Systems (3.0); 3 cr. The objective of this course is to introduce students to Geographic Information System as a system and a science, and to its related sciences and technologies. Also, it’s considered an entry course for students pursuing a minor and major degree in GIS. Prerequisite: None.

CSC 323 Object Oriented Design (3.0); 3 cr. This course emphasizes the object-oriented paradigm. It covers programming, modelling, and design concepts, which are essential for producing high-quality software. The students learn how to devise simple object-oriented software applications, for solving real-world problems. Prerequisite: CSC 213 or CSC 217.

CSC 325 Analysis of Algorithms (3.0); 3 cr. This course is about the design and analysis of algorithms. The student learns some basic mathematical tools that allow him to give an estimate of the running time of an algorithm without actually implementing it. We mainly describe three programming strategies that help us solve a problem more efficiently: greedy, divide-and-conquer, and dynamic programming. Several important problems that are interesting from a practical and theoretical point of views will be analyzed, including some of the very well-known NP-complete problems. Prerequisite: CSC 313.

CSC 343 Character Animation (3.0); 3 cr. The main purpose of Character Animation is to acquaint students with basic modeling and Animation of a 3d Character. The course will cover modeling, Texturing, Rigging and Animation of a 3d Character. Prerequisite: CSC 277.

CSC 371 Workshop in Advanced Programming (0.2); 1 cr. Language laboratory with projects requiring the proper choice of data structures, control structures, and tools of software based on solid theoretical computing concepts. Laboratory 2 hours per week, tutorial 1 hour per week.

CSC 372 Mathematical Software Packages (1.1); 1 cr. This course is an introduction to computer programming using MATLAB. Topics include: arithmetic operations, data types, input and output, array operations, solving linear systems of equations, script files, 2D and 3D plots, and programming concepts such as selection, repetition and functions. Prerequisite: Sophomore Standing.

CSC 375 Computer Modeling and Simulation (3.0); 3 cr. This course concentrates on the motion of animated objects. It covers the creation of mathematical models that represent an object’s motion, and their application for simulating movement by using computing programming. The students learn essential techniques for producing 3D models, and using them in simulation tools. Prerequisite: CSC 213 and CSC 231.

CSC 376 Applied Security lab (0.2); 1 cr. This course applies the theoretical concepts of encryption by building or using some security packages. It studies and compares different security features of the current commercial anti-virus and anti-intrusion software, operating systems, database management systems, firewalls and risk analysis packages. Prerequisite: CSC 316.

CSC 385 Internet Computing (3.0); 3 cr. The topics covered in the course include Introduction to Internet programming at the backend. This includes HTML, MySQL,
Apache, PHP, Object Oriented PHP and modern MVC frameworks. Prerequisite: CSC 213 or CSC 217.

**CSC 387 Advanced programming using Java (3.0); 3 cr.** From C++ to Java, interfaces, inner classes, I/O system. Creating Windows & Applets, Multiple Threads, Java Database Connectivity (JDBC), Java Networking: Client/Server Architecture, Servlet and Java Server Page (JSP). Prerequisite: CSC 213.

**CSC 388 Mobile Application Development (3.0); 3 cr.** This course explores mobile application development using current mobile development languages. It gives an overview of the various frontend (client-side) methods to develop a mobile application. It also includes the necessary backend (server-side) development to achieve a minimal communication needed for an application to connect to a remote server in order to send and receive data. Prerequisite: CSC 213 or CSC 217.

**CSC 412 Introduction to Computer Graphics (3.0); 3 cr.** Video basics, raster scan graphics, Bresenham algorithm, viewports, geometric forms and models, polygon filling and antialiasing, halftoning, convex boundaries, interior and exterior clipping, hidden lines and hidden surfaces. Prerequisite: CSC 213 or CSC 320.

**CSC 414 Applied Operating Systems (3.0); 3 cr.** This course introduces the fundamental concepts in modern operating systems, such as processes and threads, scheduling, concurrency, memory management, file systems, access control. Contemporary operating systems are used to illustrate these concepts. Prerequisite: CSC 312.

**CSC 415 Introduction to Operating Systems (3.0); 3 cr.** Topics include operating system concepts, system calls, interprocess communication, race condition, mutual exclusion with/without busy waiting, semaphores; monitors; the problem of deadlock; process scheduling; memory management, file systems; security; I/O. Prerequisite: CSC 312.

**CSC 417 Advanced Programming Technologies (3.0); 3 cr.** This course guides students to use top-notch programming technologies to develop applications that process data in text, binary, and XML files and encrypt them; consume ADO.NET objects with databases in MS Access, MS Server or Oracle; consume ASP.NET objects to build web applications; and use mobile objects to develop mobile applications. Prerequisite: CSC 213 or CSC 217.

**CSC 422 Introduction to Image Processing (3.0); 3 cr.** This course introduces the basic theories and technologies of digital image processing. Topics include discrete representation of images, intensity transformations for image enhancement, spatial domain linear filtering, two-dimensional discrete Fourier transform and frequency domain filtering, nonlinear image filtering, edge detection, image segmentation, and image compression. Prerequisite: CSC 213 or CSC 220.

**CSC 423 Software Engineering (3.0); 3 cr.** This course provides an overview of software engineering. A number of topics are explored to demonstrate different stages of the software development lifecycle. The students learn to appreciate the importance of applying a systematic, disciplined, and quantifiable approach to all aspects of software production. Prerequisite: CSC 213 or CSC 217.

**CSC 425 Data Communications and Computer Networks (3.0); 3 cr.** This course gives the student the necessary background to understand existing communication systems and enable him/her the design and the analysis of computer networks. Covered topics are: LANs, wireless technologies, packet switching, routing technologies, ISO reference model, Internet Protocols (IP, ARP/RARP, DHCP,
ICMP, IGMP, TCP, UDP), throughput and delay calculation. Prerequisites: CSC 218 or CSC 312 or MIS 345 or EEN 323.

CSC 426 Principles of Database Systems (3.0); 3 cr. This course covers fundamental concepts related to database design and implementation. The students learn how to produce database design models, and then develop them into a working database by using a database management system. They also learn how to implement queries for working with a database’s data and structure. Prerequisite: CSC 213 or CSC 217.

CSC 430 Computer Graphics and Animation (3.0); 3 cr. This advanced graphics class focuses on the programming techniques involved in computer animation. Algorithms and approaches for both character animation and physically based animation will be covered. Particular subjects may include skeletons, skinning, inverse kinematics, particle systems, rigid bodies, and other techniques. A good understanding of linear algebra and computer graphics is essential. Prerequisite: CSC412, Introduction to Computer Graphics.

CSC 431 Compiler Design (3.0); 3 cr. Principles and practices in the design of programming language compilers. Topics: lexical analysis, parsing theory (LL, LR, and LALR parsing), symbol tables, type checking, common representations for arrays, runtime conventions for procedure calls, storage allocation for variables, and generation of code. Students construct two compilers as the programming projects: the first is a simple predictive parser and the second is a rather large project using Lex and Yacc. Prerequisite: CSC 311.

CSC 432 Introduction to Artificial Intelligence (3.0); 3 cr. This is an introductory course to the field of modern artificial intelligence, where the main unifying theme is the idea of an intelligent agent. The course introduces several search methods for solving different problems, and explores particular subfields of AI. Specific topics include: search, game playing, constraint satisfaction, logic, machine learning, and probabilistic reasoning. Prerequisite: CSC 213.

CSC 433 Applied Artificial Intelligence (3.0); 3 cr. The aim of this course is to introduce Game-related Artificial Intelligence fundamental concepts: Intelligent agents, Heuristic Search, Planning, Uncertainty and Decisions Making (Fuzzy Logic), Learning (Genetic Algorithms). Prerequisite: CSC 213.

CSC 435 Operating Systems and Networks (3.0); 3 cr. This course is intended as a general overview of operating systems and networks. In the beginning of the first part an introduction to Unix and the Unix shell is given. We will also cover some elements of computer organization. Then the overall structure and functionality of an operating system is discussed without going in too much technical detail. The second part of the course treats networking concepts especially as related to TCP/IP and the internet. The focus of the second part will be mostly on the IT manager perspective. Prerequisite: Junior Standing.

CSC 443 Computer Games Design (3.0); 3 cr. This course covers fundamental concepts in computer game design. The students learn how to design multi-level computer games, and then develop them using a programming language and a game engine. They also acquire an understanding of artificial intelligence, game mechanics, simulation, and game physics. Prerequisite: CSC 343.

CSC 446 Applied Database Systems (3.0); 3 cr. This course covers a wide variety of fundamental database topics including: database architecture, design, real-world implementation, and security and administration issues. The students learn how to build complex database objects: abstract data types, functions, procedures, sequences, triggers and views using a database management system. Prerequisite: CSC 226 or CSC 426.
CSC 456 Data Mining (3.0); 3 cr. This course addresses Data Warehousing and provides the students with a strong understanding of the fundamental Data Mining methodologies. The course covers topics such as data types and data preprocessing, Data Warehousing and OLAP, classification techniques, association analysis and clustering analysis. Prerequisite: CSC 426 or CSC 446.

CSC 463 Advanced Software Development (3.0); 3 cr. This course is for students who want to learn Visual C# programming to develop .NET Framework applications using advanced technologies. Visual C# is employed to program using object-oriented and event-driven approaches to construct console, windows, and web applications that are robust, user-friendly, and effective. Prerequisite: CSC 213 or CSC 217.

CSC 475 Network Programming Lab (0.2); 1 cr. Applied networking and distributed computing in Java. Networking with sockets. TCP/IP, Multicast, HTTP, RMI, Finger, and ping clients and servers. Multiprotocol chat systems & whiteboards. Prerequisite: CSC 425.

CSC 476 Database Programming lab (0.2); 1 cr. This course applies the theoretical concepts of database design using a specific application on a commercial database management system. The general concepts of this DBMS including transaction handling, optimization, recovery, and security are checked and compared with other commercial DBMS. Prerequisite: CSC 426 or CSC 446.

CSC 480 Internship (1.0); 1 cr. This assigned work at an industrial establishment allows students to integrate theory and practice by working in a supervised setting, with supervision done both by a faculty member and a company administrator. A final presentation and a report are required. The minimum duration of the internship is either 2 months on full-time basis, or 4 months on part-time basis. Prerequisite: Senior Standing.

CSC 485 Seminar (3.0); 3 cr. This course is designed to provide students an opportunity to study some topics in computer science that have not been included in the curriculum. Prerequisite: Junior Standing.

CSC 490 Senior Study (3.0); 3 cr. This capstone project allows the student to research, design, and implement prototype software supervised by a faculty member. A written document and an oral presentation are required at the end of the semester emphasizing on the design, on any related ethical issues, and on the impact on society. Prerequisite: CSC 480.
Undergraduate Courses: Management Information Systems

MIS 201 Management Information Systems (3.0); 3 cr. This course is designed to expose students, regardless of their field of study, to the major principles of Management Information Systems (MIS). It will help students to understand the role of information technology in the digital economy and to succeed in its emergence. Prerequisite/Corequisite: None.

MIS 216 Computer Programming for Business (3.0); 3 cr. Introduction to developing business application programs using a visual programming language as a tool. Programming fundamentals, effective GUI styles, access to databases will be taught using a lecture/lab combination during which students will experience hands-on programming. Prerequisite/Corequisite: None.

MIS 333 Business Intelligence (3.0); 3 cr. This course examines computer-based information systems which support decision makers: Decision Support Systems (DSS), GDSS, Data Warehouses, Expert Systems, and Executive Information Systems. Students will explore the development, implementation, and application of these systems and how these systems can be applied to current business problems. Prerequisite: CSC 226 or CSC 426.

MIS 345 Data Security and Network Administration (3.0); 3 cr. This course gives an in-depth examination of topics in the management of information technology security including security management, business continuity & disaster recovery, data communication protocols and networking standards. Students will understand the different information communication technologies (ICT) that underlie the Internet and Mobile technology. Prerequisite: MIS 310 or CSC 301.

MIS 431 Enterprise Computing Systems (3.0); 3 cr. The course looks at the organizational, strategic and implementation issues surrounding the use of enterprise-wide information systems organizations. It exposes students to the benefits of using enterprise systems to transform organizations from functional to process arrangements with emphasis on creating satisfaction for the customer. Prerequisite: Junior Standing.

MIS 434 Project Management for Information System (3.0); 3 cr. This course presents an integrated view of the concepts, skills, tools, strategies and techniques involved in the management of information systems projects. Project formulation, including development of scope, design options, integration with other projects and project development plans will be applied. Prerequisite: MIS 420 or CSC 305.

MIS 442 Knowledge Management (3.0); 3 cr. This course focuses on the critical role of managing knowledge in organizations today. It shows how KM technologies work to strengthen the effectiveness of an organization and how KM perspective is contributing to the understanding of management in a knowledge society under high-level of uncertainty and complexity. Topics include knowledge creation and transfer, tacit and explicit knowledge, KM strategy preparation, and CRM & SCM projects creation using KM. Prerequisite: Junior Standing.
Mission
The mission of the Geographic Information System program is to educate students in the principles and practices of computing with focus on geospatial knowledge and applications. Our program prepares students for graduate school and careers in geospatial or IT related fields.

Program Educational Objectives
• To prepare GIS graduates to effectively use their geospatial knowledge as a research tool, a decision-making tool, data analysis tool, and/or as a planning tool in large varieties of disciplines;
• To prepare GIS graduates for professional careers in GIS and remote sensing in roles including, but not limited to: application development, data production and data analysis;
• To equip GIS graduates with the knowledge and skills to conduct advanced studies and research in remote sensing, environmental studies, geomatics and related disciplines;
• To prepare GIS graduates with the communication and interpersonal skills to function and communicate effectively individually and within multidisciplinary teams;
• To prepare graduates to identify and analyze legal, ethical and social concerns associated with the GIS fields.

Program Learning Outcomes
All graduating GIS majors shall:
• Demonstrate a good practical background in computing, mathematics and statistics with a focus on geospatial knowledge and applications;
• Demonstrate strong knowledge of the fundamental theories and concepts upon which the GIS technology is built;
• Demonstrate problematic solving skills through spatial thinking and analysis.
• Produce cartographic maps;
• Demonstrate proficiency in remote sensing and show competence in performing related analysis;
• Demonstrate programming competence using modern programming languages;
• Demonstrate good knowledge of computer networking concepts and show a good practical experience in the usage of technology within the GIS environment;
• Demonstrate proficiency in database management system and show experience creating geographic databases;
• Design and implement a substantial GIS project;
• Recognize the need for, and demonstrate an ability to engage in, continuing professional development;
• Demonstrate their ability to communicate effectively with a range of audiences and to function effectively on multidisciplinary teams to accomplish a common goal;
• Demonstrate their understanding of professional, ethical, legal and social issues and responsibilities;
• Demonstrate their ability to engage in a graduate program in remote sensing, environmental studies, geomatics and related disciplines.
Degree Requirements (91 credits)

Liberal Arts Curriculum (LAC)  
27 cr.

Students majoring in Geographic Information Systems are not allowed to count GIS courses within the pool of required LAC courses.

Core Requirements  
28 cr.

Choose two courses from the following list:
CSC 218, CSC 219, CSC 231, CSC 273, CSC 301, CSC 305, CSC 306, CSC 316,
CSC 323, CSC 385, CSC 387, CSC 388, CSC 423, CSC 456, CSC 463, CSC 485,
GIS 411, MIS 333, MIS 434, MIS 442.

Major Requirements  
30 cr.

ARP 454, CSC 446, GIS 211 or CSC 318, GIS 311, GIS 321, GIS 331, GIS 352,
GIS 441, GIS 452, GIS 490.

Free Electives  
6 cr.
Minor in Geographic Information Systems (15 credits)

The main goal behind starting a minor in Geographic Information Science is to provide students from different backgrounds with the capacity to apply GIS in their area of knowledge and to enhance their skills in a rapidly expanding market of computer-based technology.

Geographic Information Systems includes Geographic Information Systems, Global Positioning Systems and Remote Sensing:
- A Geographic Information Systems (GIS) is a computer-based tool for mapping and analyzing things that exist, and events that happen on earth. GIS technology is a special case of information systems where database consists of features, activities, or events that are definable in space as points, lines, or areas;
- Global Positioning System (GPS) is a satellite system that allows users to collect precise geographic data for use in mapping;
- Remote sensing refers to any technique whereby information about objects and the environment is obtained from a distance with the aid of aircrafts and satellites.

The multidisciplinary nature of the geographic information systems allows students from any field of study—i.e. whose majors include engineering, natural and applied sciences, business, management, marketing, public administration, social sciences, political science, architecture, education, and others to declare this minor.

Admission Requirements
General requirements for admission to this minor are those of the University policy on Undergraduate Academic Minors. No additional requirements are needed.

Pool of Courses
CSC 318 or GIS 211, GIS 311, GIS 331 or GIS 352, GIS 331 or GIS 441, GIS 321 or GIS 452.

Graduation Requirements and Suggested Schedule
To satisfy the graduation requirements of a minor in Geographic Information Systems, a student must pass five courses from the pool of courses as follows:
- First semester (2 courses; 6 credits): CSC 318 or GIS 211, GIS 352;
- Second semester (2 courses; 6 credits): GIS 311, GIS 441;
- Third semester (1 course; 3 credits): GIS 321 or GIS 452 or GIS 411.

“D” is the passing grade for each course, and the minor should be completed with a GPA of 2.0.
Undergraduate Courses: Geographic Information Systems

**GIS 211 Principles of Geographical Information Sciences (3.0); 3 cr.** An introduction to Geographical Information System, data structure and information, topology, attributes and database organization, map basics and cartographic representations, and Remote Sensing & GPS.

**GIS 311 Desktop GIS (3.0); 3 cr.** This course focuses on the design and implementation of geo-database and the integration and management of geographic data. *Prerequisite: GIS 211 or CSC 318.*

**GIS 321 Spatial analysis and Modeling (3.0); 3 cr.** This course covers the different technique in spatial analysis and modeling. Its main objective is to teach students how to solve problematic related to geographic data and extract the necessary information from given data. It focuses mainly on the following topics: vector analysis, geoprocessing, network analysis, spatial analysis, 3D analysis and hydrological analysis. *Prerequisite: GIS 211.*

**GIS 331 Implementations of GIS (3.0); 3 cr.** This course focuses on automating geoprocessing, spatial analysis, and mapping generation in the ArcGIS environment using Python script and ArcPy library. *Prerequisite: CSC 217 and GIS 311.*

**GIS 341 Digital Mapping and Cartography (3.0); 3 cr.** This course introduces the concepts and theory of digital mapping, along with basics of image interpretation and data collection. Also this course covers the elements of general and thematic cartography, layout design, and map projection. *Prerequisite: GIS 311.*

**GIS 411 Geodetic Science and Satellite Positioning (3.0); 3 cr.** This course introduces the concept and theory of satellite-bases positioning and its integration with GIS for field data collection and GIS mobile solutions. *Prerequisite: GIS 211 or CSC 318.*

**GIS 441 Cartography, Geodesy and GPS (3.0); 3 cr.** This course introduces the nature of cartography, basic geodesy, map projections, scaling, referencing and coordinate systems, cartographic perception and design. It also describes Global Positioning System (GPS), map data collection and design.

**GIS 452 Advanced Remote Sensing (3.0); 3 cr.** This course focuses on hands on applications of Remote Sensing data collection, data preparation and processing, image distortion, radiometric and geometric corrections, image enhancement and classification, image mosaicking, space triangulation, and digital representation of relief stereoscopy. *Prerequisite: GIS 352.*

**GIS 490 Senior Project (3.0); 3 cr.** Assigned project supervised by a faculty member. The grade will be based on project evaluation and individual oral presentation. *Prerequisite: Senior Standing.*
Master of Science in Computer Science

Mission
The mission of the MS program in Computer Science is to provide students with the knowledge and skills to become successful practitioners and leaders in the computing fields, and to prepare them for further higher education in computer science.

Program Educational Objectives
The Computer Science department seeks to provide MS students graduates with:
- Advanced knowledge in the Computing fields which include theoretical foundations and fundamentals of systems and software;
- A breadth of knowledge to establish a foundation for PhD studies in Computer Science and related fields;
- Required knowledge and skills to assume responsible positions in industry and government at the research, planning, and development levels.

Program Learning Outcomes
All graduating MS-CS majors shall:
- Demonstrate their competence in the Computing fields which include fundamentals of systems and software;
- Demonstrate a breadth of knowledge in a variety of application areas in Computer Science, including databases, networks, software engineering, information security and multimedia;
- Demonstrate their competence in the analysis, design, development and testing of software systems and computer systems;
- Recognize the need for, and demonstrate an ability to engage in, continuing professional development;
- Demonstrate their ability to communicate effectively with a range of audiences and to show leadership qualities;
- Demonstrate their understanding of professional, ethical, legal and security issues and responsibilities;
- Demonstrate their ability to engage in a PhD program in Computer Science and show their readiness for research and development in industry;
- Demonstrate an in-depth knowledge of a sub-area of Computer Science and be able to further the frontier of knowledge in that field;
- Develop abilities for effective communication as researchers and educators.

Admission Requirements
In addition to the University graduate admission requirements, students holding a BS in computer science with a cumulative GPA of at least 3.0 or the equivalent will be accepted, while those with a cumulative GPA of 2.7-2.99 or the equivalent will be conditionally accepted. The conditional acceptance will be removed when the student receives a minimum of a “B” average for the 6 credits taken during his/her first semester. Students from other majors may be also given conditional admission pending completion of some supplementary courses over and above the 30 credits required for the MS in computer science, as specified by the faculty graduate committee, with a minimum of a “B” average. These supplementary credits do not count towards the 30 cr. required for the MS degree. Normally, a maximum of nine transfer credits from previous graduate work completed at another accredited institution of higher education may be transferred upon the discretion of the faculty graduate committee.
Graduation Requirements
To satisfy the requirements for the degree of M.S. in Computer Science, the student must complete a total of 30 credits with an overall average of at least 3.0/4.0.

Degree Requirements (30 credits)

1- Complete the following four required courses: 12 cr.
MAT 661, CSC 616, CSC 623, CSC 626.

2- Complete two elective courses from the following pool 6 cr.
CSC 611, CSC 622, CSC 632, CSC 645, CSC 647, CSC 670, CSC 685, MAT 662, STA 614.

3- Complete two elective courses from the following pool 6 cr.
CSC 603, CSC 605, CSC 615, CSC 625, CSC 631, CSC 636, CSC 650, CSC 670, CSC 685.

4- Complete the MS thesis requirements 6 cr.
CSC 691 and CSC 692.

Regulations concerning the “Thesis courses” of the Master of Science in Computer Science
Thesis
Students in the degree of M.S. in Computer Science may consecutively register for the thesis courses CSC 691 & CSC 692 only after successfully completing at least 18 credits with a cumulative GPA of at least 3.0/4.0 and after receiving the approval of both the department chairperson and the thesis advisor.

Work Duration
The thesis work is expected to be successfully completed within a time duration of two semesters.

Jury
Immediately after receiving a note of completion from the thesis advisor and three copies of the thesis from the student, the department chairperson shall appoint the oral defense jury and its chairperson. It shall consist of the thesis advisor and two full-time faculty members. The department chairperson shall distribute to each member of the jury one copy of the thesis.

Oral Defense Schedule
The oral defense for the thesis shall take place within two weeks from the jury appointment.

Final Grade
Each jury member shall evaluate the student thesis work, then the jury shall thoroughly examine the student during the oral defense and consequently assign the proper grade by a majority vote. In case of a tie, the committee chairperson shall have the casting vote.
Thesis Copies Distribution
The student shall submit four bound copies, two soft bound copies and two unbound copies of the approved final copy of the thesis to the jury chairperson for signatures and distribution to the student, thesis advisor, department, faculty, and the remaining members of the jury. The two unbound copies shall be sent to the university library.
CSC 603 Objected-Oriented Applications (3.0); 3 cr. Emphasizes the use of Object-Oriented Architectures and Components in order to build business to business and business to client applications. The multi-tier architecture will be studied in depth through Enterprise Java Beans (EJB) specifications. The development environment is Jbuilder 4 of Borland.

CSC 605 System Analysis and Design (3.0); 3 cr. Emphasizes the design aspects of systems development, including logical and physical design, implementation, testing and operation. State-of the art system development process, methods and tools are presented.

CSC 606 Operating Systems and Security (3.0); 3 cr. This is a hands-on system vulnerabilities like stack and heap overflows, return to libc attacks etc… Attack counter measures such as stack guard and address space randomization are discussed. The students are expected to write their own exploits in addition to applying known exploits in a controlled linux/x86 environment. Viruses and worms are covered along with defenses like disinfection, integrity checking and sandboxing.

CSC 611 Advanced Theory of Computation (3.0); 3 cr. Topics include: primitive recursive functions, Church thesis, recursive and recursively enumerable sets, time and space complexity measures, the classes P and NP-completeness, and hierarchy of complexity.

CSC 612 Advanced Computer Graphics (3.0); 3 cr. Topics include: mathematical techniques for curve and surfaces; color systems; fractals hidden lines and hidden shad up; surface mapping and ray tracing; techniques of animation.

CSC 613 Computer Vision and its Applications (3.0); 3 cr. Focuses on computer techniques for understanding and interpreting visual data, physics of vision, boundary detection of objects, region growing, analysis of texture and motion, and analysis on objects in scenes.

CSC 614 Modeling and Simulation in OOP (3.0); 3 cr. Encapsulation, use of inheritance (including multiple inheritance), collections and iterators, run-time typing, identification, exception handling. Some aspects of distributed and parallel object-oriented systems.

CSC 615 Advanced Computer Architecture (3.0); 3 cr. Early systems, parallelism and parallel processing, vector processors, array processors, associative processors, VLIW architecture, memory and I/O subsystems, networking. Case Study: RISC architecture.

CSC 616 Advanced Database Systems (3.0); 3 cr. This course covers topics related to distributed databases design (bottom up, and top down), in addition to the internal operation of a relational database (query optimization, concurrency, and recovery) in both centralized and distributed environments. It also covers rising topics in the field of databases (web, cloud, noSQL, NewSQL).

CSC 621 Advanced Compiler Design (3.0); 3 cr. The course will cover some of the core-topics, already studied in CSC 431 (or in some equivalent course at another university), but with more details and rigor. Some of the topics are: lexical analysis, parsing theory (LL, LR, and LALR parsing), symbol tables, type checking, common representations for arrays, runtime conventions for procedure calls, storage allocation for variables, generation of code, and code optimization.
CSC 622 Advanced Analysis of Algorithms (3.0); 3 cr. The course will cover some of the core-topics, already studied in CSC 325 (or in some equivalent course at another university), but with more details and rigor. In addition, we will present a selection of advanced topics, mainly the theory of NP-completeness and algorithms for parallel computers.

CSC 623 Advanced Software Engineering (3.0); 3 cr. This course covers a number of advanced software engineering topics, which span different stages of the software development lifecycle, from requirements elicitation and analysis to maintenance. The students are also exposed to the research being carried out in this discipline by exploring papers that are relevant to the covered topics.

CSC 625 Advanced Operating Systems (3.0); 3 cr. This course discusses advanced topics in operating systems with Special emphasis on distributed computing, and the services provided by distributed operating systems. Important topics include naming, security, remote procedure call, networks, concurrency, transactions, parallel computing, shared memory, message passing, and scale.

CSC 626 Computer Communications and Networks (3.0); 3 cr. This course covers advanced concepts in computer networks. Specifically, we will study main protocols of the TCP/IP stack, Mobile IP, DNS, etc. The course also covers some fundamental concepts in intra- and inter-domain routing and introduces relevant routing Internet protocols. In addition, selected topics in networking that are considered as hot topics today such as Cloud computing, 3G/4G.

CSC 631 Multimedia Systems (3.0); 3 cr. This course provides the background needed for the design and development of computer-based systems that combine text, still images, sound, animation, and full motion video. The course will examine design methodologies used in planning these systems, and authoring languages used to create such systems.

CSC 632 Artificial Intelligence (3.0); 3 cr. Principles of problem solving and planning and machine learning systems. Introduction to current State-of-the-art expert systems and expert systems tools.

CSC 633 Digital Image Processing (3.0); 3 cr. Image perception, sampling, quantization techniques, transforms, enhancement techniques, like noise reduction, blurring, sharpening, edge detection, and contrast enhancing, image restoration and analysis.

CSC 636 Computer Security (3.0); 3 cr. This is a graduate course on computer security. The emphasis is on formal model and the foundations of computer security. Topics include: access control and protection models. Security, confidentiality and integrity policies are also discussed and representative models like Bell-LaPadula, Biba and Chinese wall are chosen as examples. Information flow, auditing and vulnerability analysis are also covered.

CSC 645 Neural Networks for Computing (3.0); 3 cr. Introduction to neural networks algorithms, adaptive behavior, associative learning. Applications to cognitive information processing and control and signal processing.

CSC 647 Decision Support Systems (3.0); 3 cr. Decision Support Systems (DSS) help users in solving problems and in reaching a decision based on available data, knowledge bases, and decision models. This course will expose students to theoretical DSS concepts, and to practical issues. Topics include: DSS analysis, modeling, and development; data warehousing, mining and OLAP; knowledge management and inference techniques.
CSC 650 Advanced Human-Computer Interaction (3.0); 3 cr. This course covers various Human-Computer Interaction (HCI) topics such as designing user interfaces (UIs), conducting empirical studies to evaluate UI designs, and engineering adaptive model-driven interactive software systems. The students are also exposed to the HCI literature, by exploring papers that are relevant to the covered topics.

CSC 670 Selected Topics in Computer Science (3.0); 3 cr. Topics of current interest in computer science.

CSC 685 Readings in Computer Science (3.0); 3 cr. Designed primarily for those students wishing to study a particular area in computer science under the supervision of a faculty member.

CSC 690 Master Thesis in Computer Science (6.0); 6 cr. The research for the master thesis must show the student’s proficiency in approved topics in computer science.

CSC 691 Master Thesis in Computer Science I (3.0); 3 cr. The research for the master thesis must show the student’s proficiency in approved topics in computer science.

CSC 692 Master Thesis in Computer Science II (3.0); 3 cr. Continuation of CSC 691.

GIS 611 GIS and Remote Sensing (3.0); 3 cr. This course provides an introduction to Geographic Information System (GIS) and Remote Sensing (RS) techniques and their applications in urban planning. It emphasizes the spatial interactions between humans and the biophysical environment through providing students an understanding of GIS and RS fundamentals.
DEPARTMENT OF MATHEMATICS AND STATISTICS

Professor: Eid, George M.

Associate Professors: Ghalayini, Bassem; Haddad, John; Jajou, Amer F.; Keirouz, Malhab; Maalouf, Ramez; Maroun, Mariette; Ziad, Rached; Saliba, Holem

Assistant Professors: Abou Jaoude, Abdo; Hage, Rémi; Malkoun, Joseph; Merhej, Jessica; Nakad, Roger; Sabiini, Guitta

Senior Lecturers: Freiji Bou Nassif, Claudia; Hajjar Muça, Theresa; Saadé, Ban

Mission
The main mission of the Department of Mathematics and Statistics is to provide high quality instruction at both the undergraduate and graduate levels. The Department offers a number of degree programs and a range of courses that enable students to pursue graduate degrees or to work in jobs that require a high degree of mathematical skills. Moreover, the Department is committed to enhancing and developing its research output and to supporting other professional activities.

Programs of Study
The Department offers programs in Mathematics and Actuarial Sciences leading to the degrees of:

• BS in Mathematics (90 credits)
• BS in Actuarial Sciences (94 credits)
• MS in Mathematics (33 credits)
• MS in Financial Mathematics (33 credits)

The Department also offers the following minors:

• Minor in Actuarial Sciences (18 credits)
• Minor in Mathematics (15 credits)
The Undergraduate Program
Our undergraduate program is designed to prepare students for graduate studies in Mathematics and in mathematics related fields such as Applied Mathematics, statistics, Actuarial Sciences and Financial engineering. The program main potential employers are organizations concerned with risk such as Insurance companies, banks, actuarial consultancy and statistical agencies.

Bachelor of Science in Actuarial Sciences

Mission
The mission of the Bachelor of Actuarial Science program at NDU is:

• To produce graduates who can contribute significantly to the financial security of individuals and corporations through proper training on how to identify, quantify, assess and manage risk;
• To provide students with a curriculum aligned in content and rigor with the learning outcomes of the Society of Actuaries. Such program prepares our graduates to successfully write at least three of the preliminary exams of the SOA, leading towards professional designations from international actuarial societies;
• To provide students with the theoretical background needed to qualify them to pursue graduate level education in Actuarial Science or related fields.

Program Educational Objectives
Graduates of the Bachelor Degree in Actuarial Science will be able to:

• Practice as professional risk analysts who provide solutions for financial and business problems involving uncertain future events;
• Sit for some of the professional actuarial exams of the Society of Actuaries (SOA), Casualty Actuarial Society (CAS) or Institute of Actuaries (IoA) as partial fulfillment of the requirement of actuarial designations such as ASA (Associate in the SOA), ACAS (Associate in the CAS) or FIA (Fellow of IoA);
• Secure themselves acceptance in graduate level education in Actuarial Science or related field;
• Exhibit compliance with the code of professional and ethical conduct promulgated by the above mentioned international actuarial societies.

Program Learning Outcomes
Upon completion of a Bachelor Degree in Actuarial Sciences, students will be able to:

• Demonstrate fundamental knowledge of applied mathematics in the areas of Calculus, Linear Algebra, Differential Equations and Statistics;
• Demonstrate their understanding of Economics, Accounting, Finance and Statistics courses that have been approved for Validation by Educational Experience (VEE) by the Society of Actuaries for the topics of Economics, Applied Statistics and Corporate Finance;
• Demonstrate their understanding of NDU courses covering the learning objectives of the following professional actuarial examinations: Probability (P), Financial Mathematics (FM) and Actuarial Models-Life Contingency (MLC);
• Demonstrate the ability to apply actuarial concepts to problems related to financial security planning such as pension funding, pricing and reserving for life and
casualty insurance;
• Demonstrate the ability to apply actuarial modeling through the use of computer programming routines within spreadsheets;
• Appreciate the meaning of belonging to a professional organization, the ethical and technical qualifications needed to become and remain a member of the actuarial profession.

Students enrolled in the B.S. degree will be prepared to take a series of examinations in actuarial science leading to ASA and ACAS designation under the American Society of Actuaries (ASA) and Casualty Actuarial Society (ACAS). They also would benefit from VEE (Validation by Educational Experience) approved credits for Economics, applied statistics and corporate finance required for the attainment of the above mentioned designation.

Admission Requirements
For admission requirements to the degree of B.S. in Actuarial Sciences, refer to the section entitled “Undergraduate Admission” of this catalog.

Graduation Requirements
To receive the degree of B.S. in Actuarial Sciences, a student must fulfill all requirements of the degree program, complete all required courses, accumulate a total of 94 credits with an overall GPA of at least 2.0/4.0 and a minimum GPA of 2.0/4.0 in both the core and major requirements, and clear all accounts with the University. Candidates for degrees are reminded that grades of “I” assigned during the last semester to courses required for graduation will result in delaying of graduation.

Degree Requirements (94 credits)
Liberal Arts Curriculum (LAC) 27 cr.

Students majoring in Actuarial Sciences are not allowed to count ACS courses within the pool of required LAC courses.

Core Requirements 33 cr.
ACO 201, ACO 202, ECN 211, ECN 212, MAT 206, MAT 213, MAT 215, MAT 224, MAT 235, CSC 212 or CSC 216, STA 312.

Major Requirements 28 cr.
ACS 300, ACS 310, ACS 314, ACS 324, ACS 330, ACS 424, ACS 450, MAT 325, STA 315, STA 370.

Free Electives 6 cr.

Recommended BAF 311 and BAF 312
Minor in Actuarial Sciences (18 credits)

This minor introduces students to the mathematical foundation of risk assessments under an insurance context. It suits students majoring in Business, Computer Science, Mathematics, or Engineering interested in developing their understanding of future risk evaluation.

Admission Requirements
General requirements for admission to this minor are those of the University policy on Undergraduate Academic Minors. No additional requirements are needed.

Pool of Courses
ACS 310, ACS 314, ACS 324, MAT 205 or MAT 206, MAT 213, MAT 325 or MAT 326, STA 207 or STA 210.

Graduation Requirements and Suggested Schedule
To satisfy the graduation requirements of a minor in actuarial sciences, a student must pass six courses from the pool of courses listed above.

Students with a deficient background in mathematics can exclude ACS 324, while students with a sufficient background in mathematics can take the 3 ACS courses and 3 other math courses from the pool.

“D” is the passing grade for each course, and the minor should be completed with a minimum GPA of 2.0.
ACS 300 Actuarial Problem Solving (1.0); 1 cr. This course is designed specifically to help students prepare to sit for the Society of Actuaries Exam P/1. Problems from previous actuarial exams and other relevant sources are tackled in class focusing on techniques and shortcuts used to enhance problem solving skills under time pressure. Corequisite: MAT 325 or MAT 326.

ACS 310 General Insurance (3.0); 3 cr. This is a general non mathematical introduction to the major functions of insurance companies starting from their “raison d’etre” and ending with an explanation of the different coverage offered under Personal Insurance; Topics include: Types of Risk and Risk Management Methods; Objectives of Risk Management; Risk Pooling and Risk reduction through Pooling and Insurance Institutions; Cost of Risk Pooling (Insurer Insolvency, Insurer Operations and Reinsurance); Insurance Pricing (Determinants of Premium, Investment Income and Loadings); Experience Rating (Full and Partial Credibility); Estimation of outstanding claim provisions, delays in claim reporting and settlement; Chain Ladder method with and without inflation; Estimation of Incurred but not yet reported Claims (IBNR); Demand of Insurance by Individuals and by Businesses; Types of Personal Insurance(Automobile, Homeowners and life insurance and annuities) explaining for each the exposed to risk population, the pricing and underwriting cycle. Prerequisite: MAT 325 or MAT 326 or STA 207.

ACS 314 Actuarial Mathematics I (3.0); 3 cr. Introduces the basis of actuarial Mathematics. Topics include Risk Aversion and the different Utility functions; Survival distribution for future lifetime as well as curtate future lifetime random variable; Force of Mortality and its relation to the survival function; Life tables and their use in calculating probabilities of survival; Expectation of future lifetime (Complete and Curtate); Assumptions regarding Fractional ages; Special Laws of Mortality (Gompertz, Makeham, etc); Ultimate Life tables; Life Insurance payable at the moment of death (continuous) or at the end of year of death (discrete); Term Insurance; Deferred Insurance and Endowment Insurance; Varying Benefit Insurance (Increasing/Decreasing); Relation between expected present value of a benefit paid at the moment of death and that payable at the end of the year of death. Prerequisites: MAT 325 or MAT 326, MAT 206 or MAT 205.

ACS 324 Actuarial Mathematics II (3.0); 3 cr. This course assesses Life Annuities (paid in advance, in arrears or Continuous) for a whole life, term or deferred period. Annuities with Level or Varying payments done annually or mthly; Net Premium Determination through the equation of Equivalence for fully continuous , discrete and monthly payments; Apportionable premiums; Accumulation type Benefits; Net Premium Reserves (fully continuous, Discrete and semi-continuous) Prospective and Retrospective Reserves; Reserves at fractional durations; Differential Equations for fully continuous reserves. Prerequisite: ACS 314.

ACS 330 Insurance Law and Regulations (3.0); 3 cr. Elements of business law as it applies to insurance; government and social policy as it relates to general insurance; automobile insurance and assigned risk plans.

ACS 424 Pension Fund Mathematics (3.0); 3 cr. Valuation theory for pension plans; Description of benefit, Benefit calculations; Funding. Accrued Benefit Method, Projected Cost Method, Aggregate method; Introduction to gains and losses. Prerequisite: ACS 324.
ACS 450 Investment and Asset Management (3.0); 3 cr. Financial securities and markets Efficient portfolios and efficient frontiers, The single index model; Utility analysis, The standard capital asset pricing model; Efficient markets, Interest rate theory; Options and Futures. Prerequisite: MAT 325 or MAT 326.

ACS 460 Multi-life and Multi-Decrement Models (3.0); 3 cr. The joint life and last-survivor status; Insurance and annuity benefits, simple contingent functions; Insurance models including expenses; Types of expenses; Net premium and reserves. Multiple decrement models; Multiple and Associate single decrement tables; Net single Premium. Prerequisite: ACS 324.
Undergraduate Courses: Statistics

STA 101 Basic Statistics (3.0); 3 cr. This is an introductory course designed to introduce students to basic statistical techniques in order to analyze and interpret results such as mean, mode, median, standard deviation etc. The topics covered include: frequency distributions, graphing, measures of central tendency and dispersion, and probability law.

STA 202 Statistics for Humanities (3.0); 3 cr. This course is designed to introduce students of the humanities to the most important basic statistical techniques used in their field of research, and to the SPSS software package. The course material covers data collection, organization and graphing; describing distributions: scores, central tendency, and variation; sampling and probability distributions; estimation and hypothesis testing; chi-square test; correlation; analysis of variance. The associated computer lab sessions allow the students to apply the methods learned to data sets and interpret findings.

STA 203 Biostatistics (3.0); 3 cr. Converse the fundamental principles of statistics as they apply to biological problems, including statistical inference, analysis of variance, and correlation regression. A software package will be used. Prerequisite: Sophomore Standing.

STA 206 Applied Statistics for Business and Economics I (3.0); 3 cr. Descriptive statistics; measures of central tendency and dispersion; introduction to probability; conditional probability; independence; random variables; discrete probability distributions. A statistical software package will be used. Prerequisite: Sophomore Standing.

STA 207 Applied Statistics for Business and Economics II (3.0); 3 cr. Sampling distributions; inferences about a population mean, proportion and variances; experimental design; analysis of variance and covariance; linear regression and correlation. A statistical software package will be used. Prerequisite: STA 206.

STA 210 Statistics for Business and Economics (3.0); 3 cr. Descriptive statistics; measures of central tendency and dispersion, probability laws; random variables, sampling distributions; estimation; hypothesis testing simple linear regression; analysis of variance and chi-square. A statistical software package will be used. Prerequisite: Sophomore Standing.

STA 212 Introductory Time Series Analysis (3.0); 3 cr. Introduces the basic concepts of regression analysis starting with two variable models then proceeds to three variable and multi-variable regression models. Thorough discussion of: The assumptions underlying linear regression models; Diagnostic tests, and correction methods for heteroscedasticity, multicollinearity and serial correlations. The second part of the course introduces deterministic and stochastic time series models and discusses: Basic smoothing and extrapolation techniques; Autocorrelation Function (ACF) and Partial Autocorrelation Function (PACF) for the different models; Stationarity, nonstationarity and Invertibility conditions; Model specification, Parameter estimation and forecasting for the different stationary time series models AR (p), MA (q), ARMA (p, q), and the homogenous non-stationary models of order d ARIMA. Prerequisite: STA 315 or MAT 326.

STA 215 Mathematical Statistics (3.0); 3 cr. Sampling; estimation; hypothesis testing; t-distribution; chi-square distribution; F-distribution; linear regression and correlation. Analysis of variance and covariance; multiple regression. Prerequisite: MAT 325.

STA 312 Introductory Time Series Analysis (3.0); 3 cr. This course introduces the basic probabilistic methods of stochastic processes. Topics include: Markov Chains; Exponential distribution and Poisson Process; Continuous – time Markov Chains; Renewal Theory and its application; Brownian Motion and Stationary Processes. Prerequisite: MAT 325.
Graduate Courses: Statistics

**STA 500 Applied Statistics for Business and Economics (3.0); 3 cr.** The course covers the following main topics: Introduction to Statistics and Probability, discrete and continuous random variables; Sampling distribution; Testing hypothesis and estimation; Analysis of variance; Simple and multiple regression; And time-series analysis. The course also applies these concepts and Techniques to actual real world business and economic situations.

**STA 614 Advanced Statistical Methods for Business Decisions (3.0); 3 cr.** This course develops an analytical approach to risk in management decisions. Topics include decision analysis; correlation and multiple regression; discriminant; judgment; canonical; cluster and factor analysis.

**STA 654 Methods of Multivariate Analysis (3.0); 3 cr.** Least Square and multiple regression analysis; Canonical correlation Principle component analysis, Hotelling’s T² procedures; Multivariate analysis of variance; Discriminant analysis; Cluster analysis. **Prerequisite:** STA 315.

**STA 663 Time Series Analysis (3.0); 3 cr.** Stationary models and autocorrelation function; Estimation and elimination of trend and seasonal components; Stationary processes, ARMA processes, estimation of mean, forecasting stationary time series; ARIMA models, forecasting ARIMA models, seasonal ARIMA models, applications using real and simulated data.

**STA 664 Methods of Statistical Inference (3.0); 3 cr.** Functions of random variables, t-distribution, chi-square distribution, F-distribution. Stochastic convergence: convergence in probability; Convergence in distribution. Central limit theorem, properties of estimators, finding estimators, Rao-Blackwell theorem Cramer-Rao inequality, confidence interval estimation, one and two populations, hypothesis testing theory, Neyman-Pearson lemma, Bayesian methods, prior and posterior distributions, applications. This course covers the material needed for CT3 (Probability and Mathematical Statistics).
Bachelor of Science in Mathematics

The department of Mathematics and Statistics offers a program leading to the degree of Bachelor of Science in Mathematics.

Mission

The mission of the Notre Dame University-Louaize program for a Bachelor of Science in Mathematics is to provide high quality instruction to students, to expose them to a significant range of mathematical disciplines and to build up their reasoning and analytical skills in order to enable them:

- To pursue teaching at the high school level;
- To secure employment in positions that require analytical ability;
- To pursue graduate study in Mathematics or related fields.

Program Educational Objectives

The main objectives of the program of the Bachelor of Science in Mathematics are:

- To prepare students for successful professional careers in mathematics or other related areas;
- To equip students with skills relevant to the practice of mathematics, among which are independent and critical thinking and problem solving techniques;
- To build up the students’ oral and written mathematical communication skills which enable them to present their ideas efficiently;
- To equip students with academic and analytical skills needed to pursue higher education in mathematics or other related disciplines;
- To promote collaborative work among students to help them function effectively in a professional workplace or in a graduate program.

Program Learning Outcomes

Students who successfully complete the requirements for the degree of Bachelor of Science in Mathematics will be able:

- To demonstrate proficiency in basic knowledge in a broad range of mathematical areas.
- To apply acquired mathematical concepts and techniques to analyze and solve problems.
- To read, understand and write mathematical proofs.
- To function as team players.
- Identify the interdependency of different areas of mathematics, as well as connections between mathematics and other disciplines.
- Explain and communicate mathematical principles and ideas with clarity and logic, both written and verbally, demonstrating communication skills to be used in any future career.
- Use mathematical tools to solve larger real world problems.

Admission Requirements

For admission requirements to the degree of B.S. in Mathematics, refer to the section entitled “Undergraduate Admission” of this catalog.

Graduation Requirements

To receive the degree of BS in Mathematics, a student must fulfill all requirements of his/her degree program, complete all required courses, accumulate a total of 90 credits with
an overall grade point average (GPA) of at least 2.0/4.0 and a minimum GPA of 2.0/4.0 in both the core and major requirements, and clear all accounts with the university. Candidates for degrees are reminded that grades of “I” assigned during the last semester to courses required for graduation will result in delaying of graduation

### Degree Requirements (90 credits)

**Liberal Arts Curriculum (LAC)**  
27 cr.

*Students majoring in Mathematics are not allowed to count MAT courses within the pool of required LAC courses.*

**Core Requirements**  
21 cr.  
CSC 212, MAT 213, MAT 215, MAT 224, MAT 235, MAT 303, PHS 212.

**Major Requirements**  
36 cr.  
Required major courses: 30 credits  
MAT 315, MAT 325, MAT 333, MAT 335, MAT 339, MAT 411, MAT 412, MAT 413, MAT 421, MAT 423.

Elective major courses: 6 credits to be chosen from the following courses:  
MAT 305, MAT 400, MAT 430, MAT 431, MAT 460, STA 315, STA 370.

**Free Electives**  
6 cr.

Six credits with the approval of the advisor.
Minor in Mathematics (15 credits)

This minor is intended primarily for students in fields of study that require strong mathematical skills such as Engineering, Computer Science, and Physics. Dependent on the choice of courses, the student can, for instance, enhance his understanding in the areas of real and complex analysis, algebra, and/or numerical analysis.

Admission Requirements
General requirements for admission to this minor are those of the University policy on Undergraduate Academic Minors. A minor in Mathematics may not include more than two courses (6 credits) which are counted in the student’s “Major Requirements” category.

Pool of Courses
MAT 215, MAT 224, MAT 235, MAT 305, MAT 324, MAT 326 or MAT 325, MAT 333, MAT 335, MAT 339, MAT 411, MAT 412, MAT 418.

Graduation Requirements and Suggested Schedule
To satisfy the requirements of a minor in mathematics, a student must pass five courses from the pool of courses as follows:

- First semester (2 courses; 6 credits)
  MAT 224, MAT 215 or MAT 235;
- Second semester (2 courses; 6 credits)
  Choose two courses from the pool: MAT 325 or MAT 326, MAT 305, MAT 324 or MAT 333, MAT 335, MAT 339;
- Third semester (1 course; 3 credits)
  Choose one course from the pool: MAT 411, MAT 412, MAT 418.

“D” is the passing grade for each course, and the minor should be completed with a GPA of 2.0.
Undergraduate Courses: Mathematics

**MAT 101 Pre-Calculus (3.0); 3 cr.**
Integer exponents, scientific notation, measurements, polynomials equations, factoring, rational equations; complex numbers; quadratic equations and inequalities, roots and radicals, rational exponents; radical equations. *Prerequisite:* Sophomore Standing.

**MAT 105 Principles of Calculus (3.0); 3 cr.**

**MAT 111 Calculus and Analytic Geometry I (3.0); 3 cr.**
Functions and graphs, Rate of change, graphing, limit and continuity. Derivatives; differentiation rules. Applications of derivatives; maximum, minimum, the mean value theorem, L'Hôpital's rule. *Prerequisite:* Placement or Freshman Standing.

**MAT 112 Calculus and Analytic Geometry II (3.0); 3 cr.** Integration; applications of definite integrals; areas, volumes, length, moments. Transcendental functions; Inverse functions and their derivatives, hyperbolic functions and their derivatives. Techniques of integration. *Prerequisite:* MAT 111 or Placement.

**MAT 202 Mathematics for Arts (3.0); 3 cr.**
Principles of coordinate geometry; symmetry of motion; rigid motions; reflections; rotations; translation; glide reflections; classifying patterns; symmetry of scale and fractals. *Prerequisite:* Sophomore Standing.

**MAT 204 Mathematics for Business and Economics I (3.0); 3 cr.**
This course is designed to introduce topics in calculus and matrix analysis with applications to business, management, economics and social science. *Prerequisite:* Sophomore Standing.

**MAT 205 Mathematics for Business and Economics II (3.0); 3 cr.**

**MAT 206 Financial Mathematics (3.0); 3 cr.**
This course describes the fundamental concepts of financial mathematics and how there values are applied in calculating the present and accumulated values of various streams of cash flows as a basis for future use in: reserving, valuation, pricing, asset/liability management, investment income, capital budgeting and valuing contingent cash flows. Also the course introduces financial instruments such as derivatives and the concept of no-arbitrage. *Prerequisite:* Sophomore Standing.

**MAT 211 Discrete Mathematics (3.0); 3 cr.**
Arithmetic in different bases; set theory; relations and functions; mathematical reasoning and induction; counting techniques; permutations and combinations; logic; Boolean algebra; and lattice theory. *Prerequisite:* Sophomore Standing.

**MAT 213 Calculus III (3.0); 3 cr.**

**MAT 214 Applied Linear Algebra (3.0); 3 cr.**
An introduction to basic ideas and
techniques of Linear Algebra for sophomore students. The course covers Linear systems Matrices, Determinants, Eigen values and Eigen vectors. Each of these topics is followed by one or more applications. 

Prerequisite: Sophomore Standing.

MAT 215 Linear Algebra I (3.0); 3 cr.
Linear systems and matrices and their applications; determinants; vector spaces; subspaces, basis and dimension, rank and nullity. Eigenvalues and eigenvectors; linear transformations and their algebraic properties. 

Prerequisite: Sophomore Standing.

MAT 224 Calculus IV (3.0); 3 cr. 
Cylinders and quadric surfaces. Functions of several variables: limits, continuity, partial derivatives, Chain Rule, directional derivatives, gradients, tangent planes, differentials, extreme values, and Lagrange multipliers. Multiple integrals: areas and volumes, triple integrals in rectangular, cylindrical and spherical coordinates. Integration in vector fields, Green's Theorem in the plane, Stoke's Theorem, the Divergence Theorem. 

Prerequisite: MAT 213.

MAT 227 Mathematics for Computer Games and Animation (3.0); 3 cr. 
This course provides a conceptual understanding of the mathematics that forms the underlying basis of 3D graphics and games. It includes a focused review of different mathematical topics in calculus, algebra and numerical methods that are required in the design of game engines and 3D graphics. This course provides not only theoretical mathematical background, but also many examples and exercises on how these concepts are used to affect how a game looks and plays. 

Prerequisite: MAT 215.

Prerequisite: MAT 213.

MAT 303 Mathematical Logic and Set Theory (3.0); 3 cr.
Axiomatic theory of sets; the axiom of choice; prepositional logic; quantification theory; formal construction of the sets N; Z; Q; R; and C. Cardinal numbers and their arithmetic; ordinal numbers and transfinite induction.

MAT 305 Number Theory (3.0); 3 cr. 
Foundations of arithmetic; properties of integers and prime numbers; unique factorization; congruence; Diophantine equations; theorems of Fermat; Euler; and Wilson; quadratic reciprocity. 

Prerequisite: MAT 303.

MAT 315 Linear Algebra II (3.0); 3 cr. 

Prerequisite: MAT 215.

MAT 324 Mathematics for Engineering (3.0); 3 cr. 
Functions of a complex variable, Cauchy-Riemann equations; integration in the complex plane; series and residues, evaluation of real integrals. 

Prerequisite: MAT 224.

MAT 325 Elements of Probability (3.0); 3 cr. 
Probability of events; axioms of probability; conditioning and independence; random variable and expectations; discrete and continuous distributions; moment generating functions; the Central Limit Theorem. 

Corequisite: MAT 224.

MAT 326 Probability and Statistics For Engineers (3.0); 3 cr. 
Concepts of probability, random variables, mathematical expectation, variance, confidence intervals. Estimation, testing of statistical hypotheses, regression and correlation, analysis of variance. 

Corequisite: MAT 224.

MAT 333 Complex Variables (3.0); 3 cr. 
Analytic functions; derivatives; Cauchy-Reimann equations; complex integration;
Cauchy integral theorem; power series; Laurent series; residue theorem; conformal mapping; Cauchy-Christoffel transformation.  
Prerequisite: MAT 224.

MAT 335 Partial Differential Equations (3.0); 3 cr. Second order linear partial differential equations - heat, wave and Laplace’s equations; Fourier series; separation of variables; Fourier Integral; Fourier and Laplace transforms; Dirichlet and Neumann problems for different domains; first order equations; characteristic method; systems of equations. Prerequisites: MAT 224, MAT 235.

MAT 336 Numerical Methods for Finance (3.0); 3 cr. Basics of financial theory; basics of numerical analysis; numerical integration, deterministic and Monte-Carlo methods; finite difference methods for partial differential equations.

MAT 337 Foundations of Geometry (3.0); 3 cr. Introduces the axiomatic method, Euclidean and non-Euclidean geometries; historical developments in geometry. This course is primarily designed for students interested in mathematics education. Prerequisites: MAT 215, MAT 224.

MAT 339 Numerical Analysis (3.0); 3 cr. Error analysis; roots for non-linear equations; polynomial interpolation; approximation of functions by polynomials; numerical differentiation and integration. Prerequisites: MAT 213 and a Computer Programming Language.

MAT 400 Elementary Differential Geometry (3.0); 3 cr. The main purpose of this course is the study of curves and surfaces in three-dimensional Euclidean space: Tangent space, vector fields, Gauss map, geodesics, curvature, minimal surfaces, the Gauss-Bonnet Theorem, and an introduction to smooth manifolds. Prerequisite: MAT 224.

MAT 411 Algebra I (3.0); 3 cr. Groups; permutation groups; finite abelian groups; the Sylow theorems and their applications. Prerequisite: Senior standing.

MAT 412 Topology I (3.0); 3 cr. This course covers review of set theory and logic, metric spaces, topological spaces, connectedness and compactness. Prerequisite: Senior Standing.

MAT 413 Advanced Calculus I (3.0); 3 cr. The topological properties of the real number system; uniform continuity; Weierstrass approximation theorem; Riemann-Stieltjes integral; uniform convergence; improper integrals with a parameter; the Beta and Gamma functions. Corequisites: MAT 412 and Senior Standing.

MAT 418 Numerical Linear Algebra (3.0); 3 cr. The course presents mathematical algorithms and analysis to solve linear systems of equations and matrix eigenvalue problems. Matrix norms and analysis. Direct and iterative methods: including factorization methods, singular value decomposition, Jacobi and Gauss-Seidel iteration, power methods, QR algorithm. Operation counts, condition numbers and error analysis. Prerequisites: MAT 215, MAT 224, and a Programming language.

MAT 421 Algebra II (3.0); 3 cr. Rings; ideals; quotient rings; Euclidean rings; polynomial rings; field extensions; automorphism of fields; separable and normal extensions; finite fields; Galois theory. Prerequisites: MAT 411 and senior standing.

MAT 423 Advanced Calculus II (3.0); 3 cr. Jacobian’s of transformations; functional dependence; transformations of multiple integrals; extremal problems of functions of several variables; integrals over curves and surfaces; differential forms; independence of path; exact differential forms. Prerequisite: MAT 413.

MAT 430 Topology II (3.0); 3 cr. This course is a continuation of Topology I, it
introduces countability and separation axioms, completely regular spaces, complete metric spaces, the fundamental groups and covering spaces. \textit{Prerequisite:} MAT 412.

\textbf{MAT 431 Vector Spaces and Modules (3.0); 3 cr.} Vector spaces and modules; homomorphisms; groups, rings, and modules of matrices; exact sequences; direct sum decompositions; dual spaces; canonical forms; multilinear algebra. \textit{Prerequisite:} MAT 411.

\textbf{MAT 460 Special Topics in Mathematics (3.0); 3 cr.} Students study selected contemporary topics in Mathematics. \textit{Prerequisite:} Specified when Offered.
The Graduate Programs

The Department of Mathematics and Statistics offers (i) a Master of Science degree in Mathematics, (ii) a Master of Science degree in Financial Mathematics and (iii) a Master of Science degree in Actuarial Sciences.

The Degree of Master of Science in Mathematics

The purpose of the MS program in Mathematics is to prepare students for continued advanced study of mathematics, college teaching, or certain jobs requiring an in-depth understanding of mathematics.

Mission

The mission of the NDU program for a Master of Science in Mathematics is to provide high quality instruction to students, to expose them to a significant range of advanced mathematical disciplines and to build up their reasoning and analytical skills in order to enable them to:

- pursue teaching at the high school or college level;
- secure employment in positions which require analytical ability;
- achieve the experience necessary to do research in Mathematics;
- pursue PhD programs in Mathematics or related fields.

Program Educational Objectives

The main objectives of the program of the Master of Science in Mathematics are:

- To prepare students for successful professional careers in mathematics or other related areas;
- To equip students with skills relevant to the practice of advanced mathematics, among which are independent and critical thinking and problem solving techniques;
- To build up the students’ oral and written mathematical communication skills which enable them to present their ideas efficiently;
- To equip students with academic and analytical skills needed to pursue PhD programs in mathematics or other related disciplines;
- To promote collaborative work among students to help them function effectively in a professional workplace or in a graduate program.

Program Learning Outcomes

The Master of Science in Mathematics at NDU aims to prepare scientists and professionals that master a deep knowledge of the theoretical principles that form the basis of mathematical sciences. Among the common learning outcomes:

- Theoretical and practical knowledge of advanced general concepts, of the inductive method of logical-deductive reasoning and of principles and techniques of fundamentals of mathematics;
- Students will demonstrate the ability to write mathematics well, consistent with the written tradition of the discipline. Also, they will be able to communicate mathematical ideas effectively by completing a thesis;
- In-depth knowledge of fundamental concepts of mathematics as applied to science and other areas of mathematics and to interconnect the role of pure and applied mathematics;
- The ability to reason mathematically by constructing mathematical significant proofs and careful arguments. Also, Students will be able to work with large
autonomy, make conjectures, solve problems, and test the accuracy of their work;

- An overview of the area of scientific research and development concerned and in-depth knowledge of at least one area in the field of fundamental mathematics so that the international research literature can be understood.

**Admission Requirements**

In addition to the University graduate admission requirements, students holding a BS in mathematics with a cumulative GPA of at least 3.0 or the equivalent will be accepted, while those with a cumulative GPA of 2.7-2.99 or the equivalent will be conditionally accepted. The conditional acceptance will be removed when the student receives a minimum of a “B” average for the 6 credits taken during his/her first semester. Students from other relevant majors may be also given conditional admission pending completion of some supplementary courses over and above the 33 credits required for the MS in mathematics, as specified by the faculty graduate committee, with a minimum of a “B” average. These supplementary credits do not count towards the 33 cr. required for the MS degree. Normally, a maximum of nine transfer credits from previous graduate work completed at another accredited institution of higher education may be transferred upon the discretion of the faculty graduate committee.

**Graduation Requirements**

To satisfy the requirements for the degree of Master of Science in Mathematics, the student must complete a total of 33 credits with an overall average of at least 3.0/4.0.

**Degree Requirements (33 credits)**

**Core and Major Requirements (18 credits):**

MAT 621 Algebra I 3 cr.
MAT 623 Real Analysis 3 cr.
MAT 625 General Topology 3 cr.
MAT 634 Complex Analysis 3 cr.
MAT 664 Functional Analysis 3 cr.
MAT 665 Advanced Linear Algebra 3 cr.

**Elective Requirements (9 credits from the following pool):**

MAT 632 Algebra II 3 cr.
MAT 635 Harmonic Analysis & Potential Theory 3 cr.
MAT 636 Algebraic Topology 3 cr.
MAT 642 Theory of Partial Differential Equations 3 cr.
MAT 641 Theory of Ordinary Differential Equation 3 cr.
MAT 645 Theory of Integral Equations 3 cr.
MAT 657 Commutative Algebra 3 cr.
MAT 659 Category Theory & Homological Algebra 3 cr.
MAT 661 Computational Mathematics I 3 cr.
MAT 667 Numerical Analysis I 3 cr.
MAT 668 Numerical Analysis II 3 cr.
MAT 671 Differential Geometry 3 cr.
MAT 673 Differential Topology 3 cr.
MAT 675 Special Functions 3 cr.
MAT 683 Directed Reading 3 cr.
MAT 685 Selected Topics in Mathematics 3 cr.
Thesis Requirements (6 credits):

MAT 691  Master Thesis in Mathematics I  3 cr.
MAT 692  Master Thesis in Mathematics II  3 cr.
Graduate Courses: Mathematics

MAT 621 Algebra I (3.0); 3 cr. Free Abelian groups; finitely generated Abelian groups; the action of a group on a set; the Sylow theorems; nilpotent and solvable groups. Rings and localization; polynomial rings and factorization. Prerequisite: Graduate Standing.

MAT 623 Real Analysis (3.0); 3 cr. Measure spaces; Borel and Lebesgue measure; abstract integration and differentiation; integration on product spaces; functions of bounded variations; $L^p$ spaces. Prerequisite: Graduate Standing.

MAT 625 General Topology (3.0); 3 cr. Topological spaces; the metric topology; connected spaces; compact spaces; Homotopy of paths; the Fundamental groups; Cospaces; essential and inessential maps. Prerequisite: Graduate Standing.

MAT 634 Complex Analysis (3.0); 3 cr. Power series representation; conformal mappings; zeros of holomorphic functions; analytic continuation; normal families; HP spaces. Prerequisite: MAT 623.

MAT 636 Algebraic Topology (3.0); 3 cr. Singular homology theory; attaching spaces with maps; the Eilenberg - Steenrod axioms; products; manifolds and Poincaré duality; fixed point theory. Prerequisite: MAT 625.

MAT 661 Computational Mathematics I (3.0); 3 cr. Matrix norm; residual vector; condition number; perturbation analysis; operations count; sparse matrices; LU-decomposition diagonally dominant matrices; iterative techniques for linear systems; and eigenvalues and eigenvectors. Prerequisite: Graduate Standing.

MAT 662 Computational Mathematics II (3.0); 3 cr. QR-decomposition; over determined linear systems; least-square solutions; the generalized inverse A+; positive-definite matrices; Cholesky’s decomposition; the singular value decomposition; Given’s and Householder’s algorithms. Prerequisite: MAT 661.

MAT 665 Advanced Linear Algebra (3.0); 3 cr. Spectral decomposition, simultaneously diagonalizable matrices, generalized eigenvectors, triangulization, Jordan canonical forms.

MAT 670 Measure and Probability (3.0); 3 cr. The course introduces the student to the basic of measure theory, Lebesgue integration, probability spaces, random variables, sequences of random variables, almost sure convergence, weak convergence, conditioning on a sigma-field, martingales and martingales inequalities, and limiting distributions of random variables.

MAT 671 Differential Geometry (3.0); 3 cr. Smooth manifolds, smooth maps, the inverse function theorem, vector fields on manifold, vector bundles, cotangent bundle, submersions, submanifolds, Lie groups, tensor fields on manifold, differential forms, and integration on manifolds. Prerequisite: Graduate Standing.

MAT 673 Differential Topology (3.0); 3 cr. Manifolds and maps, manifolds with boundary, transversality, vectors bundles and tabular neighborhoods, degrees of maps, intersection numbers and the Euler characteristics, Lefschetz fixed-point theorem, Borsuk-Ulam theorem, and Morse theory. Prerequisites: MAT 625, MAT 671.

MAT 675 Special Functions (3.0); 3 cr. Special functions in mathematics:
Hypergeometric, Bessel, Beta, Gamma functions, Orthogonal Polynomials (Chebyshev, Hermite, Laguerre) and the like, with applications to other fields.

MAT 681 Master Project (3.0); 3 cr. A substantial project in a topic in mathematics under the supervision and the approval of a faculty member.

MAT 683 Directed Reading (3.0); 3 cr. A topic in mathematics of interest will be studied under the supervision of a faculty member - evaluated as a tutorial course.

MAT 685 Selected Topics in Mathematics (3.0); 3 cr. Contemporary topics in Mathematics selected by the instructor.

MAT 6891 Master Thesis in Mathematics I; 3 cr. The research for the master thesis must show the student’s proficiency in approved topics in mathematics. Prerequisite: Advisor Consent.

MAT 692 Master Thesis in Mathematics II; 3 cr. Continuation of MAT 691. Prerequisites: MAT 691 and Advisor Consent.
The Degree of Master of Science in Financial Mathematics

The purpose of the MS program in Financial Mathematics is to prepare students for an in-depth application of Mathematics and Probability in decision-making processes as a financial analyst or brokerage consultant.

Mission
A Master of Science degree in Financial Mathematics prepares students to work effectively in a wide spectrum of financial service industries such as investment firms, commercial banks, brokerage houses, consulting firms, and other related corporations; helps students to synthesize a highly technical branch of mathematics and measure theoretic probability with practical applications that affect everybody's life; emphasizes problem-solving skills that dramatically increase the graduate value to an employer; and prepares students to pursue PhD programs in Financial Mathematics or related fields.

Program Educational Objectives
The main objectives of the program of the Master of Science in Financial Mathematics are:

• To prepare students for successful professional careers in Financial Mathematics or other related areas;
• To equip students with skills relevant to the practice of advanced Financial Mathematics, among which are independent and critical thinking and problem solving techniques;
• To build up the students’ oral and written Financial Mathematical communication skills which enable them to present their ideas efficiently;
• To equip students with academic and analytical skills needed to pursue PhD programs in Financial Mathematics or other related disciplines;
• To promote collaborative work among students to help them function effectively in a professional workplace or in a graduate program.

Program Learning Outcomes
The Master of Science in Financial Mathematics of NDU aims to prepare graduate students to apply mathematical ideas to financial models, based on fundamental analytical principles. It also aims to prepare students to become financial decision-makers. Among the learning outcomes are:

• Theoretical and practical knowledge of advanced principles and techniques of stochastic and probabilistic methods in mathematics;
• In depth knowledge of fundamental concepts of mathematics as applied to Financial Mathematics and risk analysis;
• An overview of the area of scientific research and development in Financial Mathematics, and in depth knowledge of at least one area in this field of applied mathematics, as is demonstrated through a written thesis;
• The ability to reason mathematically by constructing proofs and logical arguments. Also, students will be able to work with autonomy, make conjectures, construct financial models, solve problems, and test the accuracy of their work;
• The ability to write and effectively communicate mathematical ideas as will also be demonstrated by the thesis.
Admission Requirements
In addition to the University graduate admission requirements, students holding a BS in mathematics with a cumulative GPA of at least 3.0 or the equivalent will be accepted, while those with a cumulative GPA of 2.7-2.99 or the equivalent will be conditionally accepted. The conditional acceptance will be removed when the student receives a minimum of a “B” average for the 6 credits taken during his/her first semester. Students from other relevant majors may be also given conditional admission pending completion of some supplementary courses over and above the 33 credits required for the MS in financial mathematics, as specified by the faculty graduate committee, with a minimum of a “B” average. These supplementary credits do not count towards the 33 cr. required for the MS degree. Normally, a maximum of nine transfer credits from previous graduate work completed at another accredited institution of higher education may be transferred upon the discretion of the faculty graduate committee.

Graduation Requirements
To satisfy the requirements for the degree of Master of Science in Financial Mathematics, the student must complete a total of 33 credits with an overall average of at least 3.0/4.0.

Degree Requirements (33 credits)

Core and Major Requirements (18 credits):
- MAT 670 Measure and Probability 3 cr.
- STA 663 Time Series Analysis 3 cr.
- STA 664 Methods of Statistical Inference 3 cr.
- FMA 640 Advanced Financial Mathematics 3 cr.
- FMA 645 Computational Financial Mathematics 3 cr.
- FMA 650 Stochastic Calculus 3 cr.

Elective Requirements (9 credits from the following pool):
- BAF 602 Managerial Finance 3 cr.
- BAF 606 Asset Pricing 3 cr.
- BAF 610 Derivatives 3 cr.
- FMA 665 Risk Theory 3 cr.
- FMA 670 Optimization Methods 3 cr.
- FMA 675 Discrete-Time Financial Modelling 3 cr.
- FMA 677 Continuous-Time Financial Modelling 3 cr.
- FMA 683 Directed Reading 3 cr.
- FMA 685 Selected Topics in Financial Mathematics 3 cr.

Thesis Requirements (6 credits):
- FMA 691 Master Thesis I 3 cr.
- FMA 692 Master Thesis II 3 cr.
Graduate Courses: Financial Mathematics

FMA 640 Advanced Financial Mathematics (3.0); 3 cr. One-period models, multi period models, risk-neutral pricing of derivative securities, Brownian motion, Ito’s formula and SDE’s, asset models, arbitrage and hedging, interest rate models, actuarial applications. Prerequisite: MAT 670.

FMA 645 Computational Financial Mathematics (3.0); 3 cr. Symbolic and numerical solutions of ODE’s, solving Black-Scholes PDE symbolically, generalized Black-Scholes formulas, implied volatility, obstacle problems, steady state obstacle problems, fast numerical solutions of obstacle problems for Dupire PDE, Optimal portfolio rules, optimal portfolio hedging under general asset price dynamics. Prerequisites: MAT 670, FMA 640.

FMA 650 Stochastic Calculus (3.0); 3 cr. Review of probability and random variables, conditional expectation, martingales in discrete time, stopping times, Optional stopping time theorem, stochastic processes in continuous time, Brownian motion, Ito stochastic integral, stochastic differential and Ito formula, stochastic differential equations (SDE’s). Corequisite: MAT 670.

FMA 665 Risk Theory (3.0); 3 cr. Convolutions, risk models, martingales, point processes, fixed-time ruin probability, finite- and infinite-time ruin probabilities, discrete risk models. Corequisite: MAT 670.

FMA 670 Optimization Methods (3.0); 3 cr. General optimization problems, compactness, convexity, convex hulls, probability distribution spaces, moment spaces, linear programs, integral optimization, moment problems by dual method, loaded premium problems, ruin problems. Prerequisite: MAT 670.

FMA 675 Discrete-Time Financial Modelling (3.0); 3 cr. This course introduces the most common financial contracts that are traded on exchanges between the financial institutions and their clients. It discusses Arbitrage pricing within the framework on one period model; Valuation and hedging of European and American options; The Cox-Ross-Rubinstein Model; Arbitrage free discrete time models of spot and futures markets; Fundamental Theorems of Asset Pricing for a finite model of security market. Prerequisites: MAT 670, FMA 640.

FMA 677 Continuous-Time Financial Modelling (3.0); 3 cr. This course discusses the continuous time modelling under deterministic interest rates. Black-Scholes model and its variants; Continuously rebalanced portfolio and the existence and uniqueness of a martingale probability measure; Study of volatility: historical, implied, risk-neutral marginal distributions and local volatility models; Call and put options; rational exercise time; early exercise premium and optimal exercise boundaries; Cross currency derivatives; currency forward contracts and options and options on a foreign stock. Prerequisites: MAT 670, FMA 640.

FMA 683 Directed Reading (3.0); 3 cr. A topic of interest in financial mathematics will be studied under the supervision of a faculty member - Evaluated as tutorial.

FMA 685 Selected Topics in Financial Mathematics (3.0); 3 cr. The content of this course is to be arranged by the faculty member in charge of giving it. Prerequisite: FMA 640.

FMA 691 Master Thesis I (3.0); 3 cr. The research for the master thesis must demonstrate the student’s proficiency in financial mathematics. Prerequisite: Advisor consent.

FMA 692 Master Thesis II (3.0); 3 cr. A continuation of FMA 691. Prerequisite: MAT 691.
Regulations concerning the “Thesis courses” of (i) the Master of Science in Mathematics, and (ii) the Master of Science in Financial Mathematics

**Thesis**
(i) Students in the degree of M.S. Mathematics may consecutively register for the thesis courses MAT 691 & MAT 692, and
(ii) Students in the degree of M.S. Financial Mathematics may consecutively register for the thesis courses FMA 691 and FMA 692

Only after successfully completing at least 18 credits with a cumulative GPA of at least 3.0/4.0 and after receiving the approval of both the department chairperson and the thesis advisor.

**Work Duration**
The thesis work is expected to be successfully completed within a duration of two semesters.

**Jury**
Immediately after receiving a note of completion from the thesis advisor and three soft-bound copies of the thesis from the student, the department chairperson shall appoint the oral defense jury and its chairperson. It shall consist of the thesis advisor and two full-time faculty members. The department chairperson shall distribute to each member of the jury one copy of the thesis.

**Oral Defense Schedule**
The oral defense for the thesis shall take place within two weeks from the jury appointment.

**Final Grade**
Each jury member shall evaluate the student thesis work, then the jury shall thoroughly examine the student during the oral defense and consequently assign the proper grade by a majority vote. In case of a tie, the committee chairperson shall have the casting vote.

**Thesis Copies Distribution**
After passing the defense, the student shall submit to the chairperson’s office two unbound copies and six hard-bound copies of the approved thesis for jury signatures. The chairperson shall send the two signed unbound copies to the University library, and shall deliver the six signed hard-bound copies to the student, jury members, department, and faculty.
DEPARTMENT OF PHYSICS AND ASTRONOMY

Associate Professors:  El Hage, Youssef Kamal; Gebran, Marwan; Hajjar, Roger; Sabra, Bassem; Zgheib, Charbel

Assistant Professor:  Nehme, Cyrine

Senior Lab Instructor:  Zoghbi, Catherine

Program of Study
The Department of Physics & Astronomy offers the following degree programs:
  • BS in Physics (95 credits)
  • MS in Astrophysics (36 credits) (Joint degree with USJ)

The Department offers the following minor for the first time:
  • Minor in Physics (16 credits)

The Department of Physics and Astronomy also offers a variety of undergraduate service courses in astronomy and physics. These courses are meant to serve academic programs offered by other Faculties of the University.

Mission
Consistent with the missions of NDU and its Faculty of Natural and Applied Sciences, the Department of Physics and Astronomy (DPA) aims at giving physics majors a well-rounded education that will prepare them for graduate studies and a career in research, industry, or education. The DPA is particularly committed to developing astronomy in Lebanon and the Arab region through quality teaching and innovative programs in research and public outreach.
Undergraduate Program

Bachelor of Science in Physics
Physics is the discovery of the inner fundamental unity of the natural world, from the whole universe to the insides of the smallest nucleus. It is the science that studies the basic laws of nature that produce the wealth of phenomena observed in everyday life.

Holders of a B.S. in Physics can pursue a career in teaching or follow graduate studies. Other options include, among others, working in hospitals as medical physicists or in industry for running quality control labs or devising numerical simulations.

Mission
Consistent with the missions of Notre Dame University-Louaize, its Faculty of Natural and Applied Sciences, and its Department of Physics & Astronomy (DPA), the B.S. in Physics degree program at the DPA aims at giving physics majors a well-rounded education that will prepare them for graduate studies and a career in research, industry, or education.

Program Educational Objectives
Within three to five years after obtaining a B.S. in Physics from the Department of Physics & Astronomy at Notre Dame University-Louaize, our typical graduate will be expected to achieve one or more of the following:

• Go on to graduate studies and succeed in producing new knowledge as demonstrated in publications;
• Be a successful physics school teacher as demonstrated in promotions and/or caliber of school he/she is working at;
• Be successful in industry as demonstrated in promotions, and/or caliber of companies he/she works for.

Program Learning Outcomes
By the end of the program, students should

• Demonstrate proficiency of a given body of knowledge and skills in physics, and be well prepared for professional careers and/or graduate study;
• Develop and demonstrate high-level cognitive thinking skills including critical thinking, problem-solving skills, and integrative thinking;
• Be effective communicators in their field of knowledge (write reports, present findings to peers, and explain physics to the general public).
• Demonstrate ethical values such as integrity and responsibility for the common good.
Degree Requirements (95 credits)

Liberal Arts Curriculum (LAC) 27 cr.

_Students majoring in Physics do not take credit for PHS & AST courses within the pool of required LAC courses._

Core Requirements 29 cr.
MAT 213, MAT 215, MAT 224, MAT 235, PHS 206, PHS 212, PHS 213, PHS 275, PHS 276, EEN 205, CSC 212.

Major Requirements 33 cr.
PHS301, PHS 303, PHS 351 (or MAT 335), PHS 373, PHS 374, PHS 415, PHS 417, PHS 435, PHS 497, AST 210.

Two courses of the following (headings are suggestions):
Astrophysics courses: AST 320, 321, 370. Students opting for two of these courses are encouraged to take the third as a free elective.

Hydrodynamics courses: MEN 320, MEN 321. Students opting for these two courses are encouraged to take MEN 550 (Computational Methods in Thermal and Fluid Mechanics) as a free elective.

Semiconductors courses: EEN 206, PHS 405. Students opting for these two courses will be encouraged to take EEN 416 (Semiconductor devices) as a free elective.

Nuclear & Particle Physics courses: PHS 315, PHS 403.

Other: PHS 460.

Free Electives 6 cr.
**Minor in Physics (16 credits)**

The Minor in Physics aims at giving students who are literate in mathematics a basic background enabling them to approach any applied or advanced topic in physics. It makes them eligible for graduate work in physics without the need for remedial courses or a disadvantage vis-à-vis physics majors. More specifically, the Minor in Physics will:

- Prepare students to work on advanced topics in Physics;
- Give a math major an edge when pursuing a teaching career in sciences and mathematics;
- Give the engineer more problem-solving techniques, crucial for his/her career.

The Minor proposed is aimed at scientifically minded students who already possess the necessary mathematical skills to tackle advanced physics courses. It will be most attractive for engineering and math students.

**Admission Requirements**

General requirements for admission to this minor are those of the University policy on Undergraduate Academic Minors. No additional requirements are needed.

**Pool of Courses**

PHS 213, PHS 303, PHS 415, PHS 417*, PHS 435

**Graduation Requirements and Suggested Schedule**

To satisfy the graduation requirements of a minor in Physics, a student must pass all five courses from the pool of courses above. Students are not exempted from the prerequisites of these courses. The level of mathematics required in PHS 303 and above is MAT 335. A suggested schedule is as follows:

- First semester (1 course; 3 credits): PHS 213**
- Second semester (2 courses; 6 credits): PHS 303, PHS 417
- Third semester (2 courses; 7 credits): PHS 415, PHS 435

"D" is the passing grade for each course, and the minor should be completed with a GPA of 2.0.

---

* EEN 330 taken at the Departments of Electrical and Computer and Communication Engineering is equivalent to PHS 417. Students from these majors may ask to replace PHS 417 with EEN 330.

** This course is part of the undergraduate majors in Electrical and Computer and Communication Engineering, and Mathematics.
PHS 101 General Physics I (3.0); 3 cr. A basic course covering: vectors, Newton’s laws of motion, particle kinematics and dynamics, work, energy, linear and angular momentum, rotational motion, rigid body, equilibrium and Statistics. Prerequisite: Freshman Standing.

PHS 102 General Physics II (0.2); 1 cr. A basic course covering electric fields and electrical potential; DC-circuits; magnetic fields; capacitance and inductance; AC-circuits and electromagnetic waves. Prerequisite: Freshman Standing.

PHS 171 General Physics I Laboratory (0.2); 1 cr. Laboratory course illustrating the principles and experiments taught in General Physics I. Corequisite: PHS 101.

PHS 172 General Physics II Laboratory (0.2); 1 cr. Laboratory course illustrating the principles and experiments taught in General Physics II. Corequisite: PHS 102.

PHS 203 General Physics III (3.0); 3 cr. A course covering waves and corpuscles, sound, acoustics, reflection and refraction of light; interference and diffraction; polarization, spectrometry, and laser optics. Prerequisite: Sophomore Standing.

PHS 207 Development of Science and Technology (3.0); 3 cr. The principal periods in the development of the scientific thought. The contribution of individuals like Aristotle, Ptolemy, Copernicus, Galileo, Newton, Darwin, Mendel, and Einstein. Prerequisite: Sophomore Standing.

PHS 208 Physics for Life Sciences I (3.0); 3 cr. This course covers mechanics, relativity, hydrostatics, hydrodynamics, thermodynamics, and the physics of waves, with special emphasis on biological applications. Prerequisite: Sophomore Standing.

PHS 209 Physics for Life Sciences II (3.0); 3 cr. This course covers electricity and magnetism, modern physics: early quantum theory with emphasis on atomic and molecular applications, spectroscopy, nuclear physics, statistical mechanics, with special emphasis on biological and medical applications. Prerequisite: Sophomore Standing.

PHS 212 Electricity and Magnetism (3.0); 3 cr. Electrostatics: field, potential and dielectric. DC circuits and laws. Magnetic field, Ampere’s and Faraday’s laws, induction. AC circuits. Qualitative discussion of Maxwell’s equations. Corequisite: MAT 224.

PHS 271 Electricity and Magnetism Laboratory (0.2); 1 cr. Selected experiments in electricity and magnetism. Emphasis is placed on statistical treatment of data and error estimation. Corequisite: PHS 212.
PHS 272 Modern Physics Laboratory (0.2); 1 cr. Selected experiments in modern physics. Emphasis is placed on statistical treatment of data and error estimation. Corequisite: PHS 213.

PHS 273 Experimental Physics for Mechanical Engineers (0.2); 1 cr. Selected experiments in mechanics, energy & thermodynamics, vibrations and acoustics, and electricity & magnetism. Prerequisite: PHS 203. Corequisite: PHS 212.

PHS 275 Experimental Physics I (0.2); 1 cr. The first of a sequence of two sophomore physics labs. It includes selected experiments in classical mechanics, electricity and magnetism, and modern physics such as collisions, vibrations and waves, electric and magnetic field measurements, emission line spectroscopy, etc. Students learn about error analysis, software packages for data visualization and data analysis such as Excel, Matlab, and lab report writing. Corequisite: PHS 206.

PHS 276 Experimental Physics II (0.2); 1 cr. A continuation of PHS 275 with additional experiments and topics. Prerequisite: PHS 275.

PHS 278 Physics for Life Sciences I Lab (0.2); 1 cr. Lab to accompany PHS 208. Experiments are performed in Mechanics, Hydrodynamics, Heat transfer and Waves. Corequisite: PHS 208.

PHY 279 Physics for Life Sciences II Lab (0.2); 1 cr. Lab to accompany PHS 209. Experiments in Electricity and Magnetism: Hall Effect, Circuits, Helmholtz Coil, and Modern Physics: Blackbody Radiation, Spectroscopy... Corequisite: PHS 209.

PHS 301 Optics (3.0); 3 cr. Topics covered: wave optics and properties of light including interference, Fraunhofer and Fresnel diffraction, polarization and double refraction. Introduction to lasers and holography. Prerequisites: PHS 206, PHS 212.

PHS 303 Analytical Mechanics (3.0); 3 cr. Particle kinematics and dynamics, central force problem, motion in non-inertial frames of reference, kinematics and dynamics of rigid bodies, Lagrangian mechanics, small oscillations, and relativistic momentum and energy. Corequisite: PHS 351 or MAT 335.

PHS 315 Nuclear Physics (3.0); 3 cr. General nuclear properties, radioactivity, nucleon-nucleon interaction, scattering, nuclear models, and nuclear reactions. Prerequisite: PHS 213.

PHS 351 Mathematical Methods for Physics (3.0); 3 cr. Topics include partial differential equations, Fourier series and transforms, wavelets, special functions, orthogonal functions, Greene’s function, integral equations. Prerequisites: MAT 215, MAT 224, MAT 235.

PHS 373 Experimental Physics III (0.2); 1 cr. The first of a sequence of two junior physics labs with more advanced experiments that may include forced oscillations and resonance, the Hall effect, diffraction, Zeeman effect, etc. Emphasis will continue on data and error analysis and report writing. Prerequisite: Junior Standing.

PHS 374 Experimental Physics IV (0.2); 1 cr. The second of a sequence of two junior physics labs with more advanced experiments that will include long experiments on measurements of fundamental constants and other advanced topics. This lab will serve as a preparation for the Senior Project. Prerequisite: PHS 373.

PHS 403 Elementary Particle Physics (3.0); 3 cr. Survey of elementary particles: leptons, hadrons, and quarks. Invariance principles and conservation laws. Detectors and accelerators. Phenomenological study of interactions. Prerequisite: PHS 435.

PHS 405 Solid State Physics (3.0); 3 cr. Topics include crystal structure, the band theory, the free-electron and Fermi-Dirac
theory, and the physical properties of semiconductors and metals. **Prerequisite:** PHS 415.

**PHS 415 Thermal and Statistical Physics (3.0); 3 cr.** Topics include: entropy and probability, energy and temperature, the three laws of thermodynamics, Maxwell-Boltzmann, Bose-Einstein and Fermi-Dirac statistics, equation of state for simple systems, and elementary theory of phase transitions. **Prerequisite:** Senior Standing.

**PHS 417 Electromagnetic Theory (3.0); 3 cr.** Maxwell equations with applications to physical problems. Topics include: electrostatics, magnetostatics, Laplace and Poisson equations, dielectric and magnetic materials, electromagnetic waves and radiation, and special theory of relativity. **Prerequisites:** PHS 212, PHS 351 or MAT 335.

**PHS 435 Quantum Mechanics (4.0); 4 cr.** “Modern” quantum Mechanics. Hilbert space, operators, eigenvalues and eigenfunctions. Matrix formulation of quantum mechanics. Time-independent and time dependent perturbation theories. Scattering theory and interaction of radiation with matter. **Prerequisites:** PHS 213, PHS 303.

**PHS 460 Selected Topics in Physics (3.0); 3 cr.** Advanced topics selected from the different disciplines of physics. **Prerequisite:** Senior Standing.

**PHS 497 Senior Project; 3 cr.** A selected project in one of the different fields of physics. The project is expected to be an introduction to research through the involvement in an actual project carried by faculty members. **Prerequisites:** Senior standing and consent of the instructor.
AST 101 - Introduction to the Solar System and Exoplanets (3.0); 3 cr. The course gives an up-to-date description of the solar system: the eight planets, Kuiper Belt Objects, asteroids and comets. The latest discoveries in planetary science will be seamlessly woven into the course. The course also covers the search for exoplanets and what they tell us about planetary systems in the Universe. It also discusses the topic of life in the Universe.

AST 201 Discovering Astronomy (3.0); 3 cr. A non-calculus based introduction to astronomy. It explores the wonders of the universe using observations from space and from the ground. It covers the solar system, stars and their evolution (black holes, white dwarfs...), galaxies and cosmology (the Big-Bang...). The course will include an observing night to discover the night sky, readings, and some elementary observations. Not open to physics students.

AST 210 Introduction to Astronomy and Astrophysics (3.0); 3 cr. This introductory astrophysics course is designed for students majoring in physics. The course will include an introduction to the night sky and coordinate systems, magnitudes, and telescope types. The course will also introduce students to stellar astrophysics, the solar system, and galaxies. Corequisite: PHS 213.

AST 320 Astrophysics I: Stars (3.0); 3 cr. This course will specifically concentrate on stellar astrophysics. The course will discuss stellar structure and nuclear astrophysics, stellar atmospheres and radiative transfer, star formation processes, and evolution of stars beyond the main sequence (pulsations, AGBs, white dwarfs, neutron stars, supernovae). Prerequisite: AST 210.

AST 321 Astrophysics II: Galaxies (3.0); 3 cr. This course deals with the nature and properties of galaxies and provides an introduction to cosmology. The course will cover the Milky Way, and properties of spiral, elliptical, and irregular galaxies. The course will also cover the basic elements of cosmology and the birth and evolution of the Universe as a whole. Prerequisite: AST 210.

AST 370 Observational Astronomy (0.9); 3 cr. An introduction to the major observational techniques used in astrophysics and their corresponding instrumentation, based on practical observational projects. This course will also include a discussion of telescope optics. Prerequisite: AST 210.
Graduate Program

The graduate program in Astrophysics is a joint degree program with Université Saint-Joseph de Beyrouth (USJ). The program follows only the Thesis Option and is designed to prepare students for doctoral studies in Astrophysics, allow students to acquire, through research, the competencies requested by the job market, and to graduate competent physicists who are capable of integrating astronomy and astrophysics within the physics curricula in schools.

The Degree of Master of Science in Astrophysics

Mission
Consistent with the missions of Notre Dame University-Louaize, its Faculty of Natural & Applied Sciences, and its Department of Physics & Astronomy (DPA), the M.S. in Astrophysics degree program at the DPA aims at giving its graduate student a solid education in observational astrophysics that will prepare them for PhD studies and a leading career in research, industry, or education.

Program Educational Objectives
Within three to five years after obtaining a M.S. in Astrophysics from the Department of Physics & Astronomy at Notre Dame University-Louaize, our typical graduate will be expected to achieve one or more of the following:

• Go on to PhD studies and succeed in producing new knowledge as demonstrated in publications;
• Be a successful physics school teacher as demonstrated in promotions and/or caliber of school he/she is working at;
• Be a successful educator (management/administration) as demonstrated in promotions and/or caliber of school he/she is working at;
• Be successful in industry as demonstrated in promotions, leadership, and/or caliber of companies he/she works for.

Program Learning Outcomes
By the end of the program, students should

• Demonstrate mastery of a given body of knowledge and skills in astrophysics, and be well prepared for professional careers and/or PhD work.
• Develop and articulate new questions in his/her field.
• Be able to present and publish research findings in professional venues.
• Demonstrate acknowledged ethical values in his/her field of research.

Admission Requirements
Admission rests on the study of the candidate's file followed by an interview with a joint committee from both Faculties of Sciences composed of the two Deans, the two department chairs concerned, the Masters Program supervisors, and instructors delegated by the two Faculties. To be eligible for admission, students shall satisfy the following criteria:

• They shall have a minimum GPA of 2.7/4.0 according to the American grading system applied at NDU, or a minimum weighted mean point average of 60/100 according to the system applied at USJ;
• They shall be able to follow lectures in both English and French.
Graduation Requirements
To satisfy the requirements for the degree of M.S. in Astrophysics, the student must complete a total of 36 credits with an overall average of at least 3.0/4.0, with a minimum grade of 79/100 on his/her Master thesis (9 credits). The thesis is based on original research conducted by the student.

Degree Requirements (Thesis Option) (36 credits)

1- Complete the following nine required courses 19 cr.
AST 601, AST 602, AST 603, AST 604, AST 631, AST 635, AST 670.

2- Complete four of the following courses 8 cr.
AST 612, AST 613, AST 614, AST 620, AST 621, AST 622, AST 623.

3- Complete the MS thesis requirements 9 cr.
AST 690.
Graduate Courses: Astrophysics

AST 601 Stellar Astrophysics (3.0); 3 cr. Stellar parameters and classification; Structure and evolution; Energy production and transport in stellar interiors; compact objects; binary systems.

AST 602 Radiative Processes (3.0); 3 cr. Photoionization; line formation and broadening; LTE and non-LTE radiation transfer; Polarization processes; Non-thermal processes (synchrotron, Compton...); Application to different regions and regimes (HII, AGNs, Atmospheres, CS shells...).

AST 603 Astrophysics of Galaxies (3.0); 3 cr. Anatomy of the Milky Way: disk, bulge, globular clusters, ISM, rotation curve, spiral structure; Hubble tuning fork, spirals, ellipticals, irregulars; Formation and evolution; Active galaxies. Prerequisite: AST 601.

AST 604 Instruments and Techniques in Astrophysics (3.0); 3 cr. Software and numerical methods in Astronomy; Telescope optics, aberrations and characterization, various designs used: Newtonian, Cassegrain, Schmidt, Ritchey-Chretien, etc; Optics of instrumentation: spectrograph, polarimeter, spectropolarimeter, etc; elements of optical design and instrumentation.

AST 612 Interstellar Medium (2.0); 2 cr. Interstellar Medium (ISM) in the Milky Way; HII regions; photoionisation equilibrium in the ISM; Interstellar Dust; ISM distribution and phases; Absorption and emission in the ISM... Prerequisite: AST 602.

AST 613 Active Galaxies (2.0); 2 cr. Historical overview of the discovery of active galaxies and the enigma of the power source and its nature; The black hole paradigm; accretion physics; AGN types; Emission processes in AGNs; Unification models. Prerequisite: AST 602. Corequisite: AST 603.

AST 614 Site Evaluation and Atmospheric Optics (2.0); 2 cr. Effects of the atmosphere on astronomical observations; Seeing; Opacity; Turbulence; Measurement techniques of the different parameters of interest to astronomy.

AST 620 Variable Phenomena in Astrophysics (2.0); 2 cr. Photometric and Spectroscopic variability of individual stars; Binaries and variable phenomena; Long term variability of AGNs, Blazars, and BL Lac; Other variable and transient phenomena such as supernovae. Prerequisites: AST 601, AST 603, AST 613

AST 621 Nuclear Astrophysics (2.0); 2 cr. Elements in the universe; Stellar and primordial nucleosynthesis; Hydrogen burning sequences; r and s processes; Post hydrogen-burning reactions; neutron stars. Prerequisite: AST 601.

AST 622 Circumstellar Environments (2.0); 2 cr. Study of the material surrounding stars at their different phases of evolution; Disks and outflows in pre-main sequence; main sequence and post-main sequence phases; Composition, dynamics and geometries of circumstellar matter; Relation to mass loss; Formation of planets. Prerequisites: AST 601, AST 602, AST 612

AST 623 Cosmology (2.0); 2 cr. Newtonian Cosmology; Introduction to General Relativity; Big Bang; Inflation; Primordial nucleosynthesis; CMB; Large-Scale structure; Dark matter and dark Energy. Prerequisite: AST 603.

AST 631 Seminar (1.0); 1 cr. Reading, presentation, and discussion of papers in various fields of astrophysics.
AST 635 Selected Topics in Astrophysics (3.0); 3 cr. Topics of interest in contemporary astrophysics.

AST 670 Observational Astrophysics (1.6); 3 cr. Magnitudes & photometric systems; Coordinates and time; Telescope optics; CCD observation & reduction techniques; Spectroscopy; Polarimetry.

AST 690 thesis (9.0); 9 cr. Research Project and thesis.
DEPARTMENT OF SCIENCES

Associate Professors: Hage, Tanos G.; Kabrita Bou Serhal, Colette; Khalaf Keirouz, Layla; Rahmé, Kamil; Tannous, Marie

Assistant Professors: Aad, Pauline; Badr, Layla; Dib, Robert; El Khoury, Diala; Ghanem, Esther; Maalouf, Rita; Mouawad, Charbel; Tauk, Lara

Senior Lab Instructors: El Ghossein Maalouf, Nada; El Hage El Amm, Rita;

Lab Instructors: Moussa, Layale; Sawan, Simona

Laboratory Assistants: Saliba Tabet, Elizabeth; Torosyan, Frida

Department Mission
The Department of Sciences (DS) offers coherent and well-designed program curricula to provide in depth-knowledge to students interested in the biological, chemical and closely-related sciences. It is committed to furnish quality education through an inherent assortment of major courses. The DS also emphasizes moral integrity and ethics as to prepare competent, fully-rounded students who can be leaders in their respective field of study.

Programs of Study
The Department of Sciences offers a Freshman Science program and an undergraduate program leading to the degrees of:

- BS in Biology (92 credits)
- BS in Environmental Science (92 credits)
- BS in Chemistry (92 credits)
- MS in Biology (36 credits)
- MS in Industrial Chemistry (36 credits)

In addition, the Department of Sciences offers a Minor in Biology (17 credits).

The Department of Sciences also offers a variety of undergraduate service courses in biology, chemistry and geology. These courses are meant to serve academic programs offered by other Faculties of the University.

Freshman Science Program
The Freshman Science program consists of a minimum of 30 credits. This program is equivalent to the official Lebanese Baccalaureate Part II (Scientific Strands). It normally requires a minimum period of 2 semesters. The Freshman Science Program includes courses from the following areas:

Humanities and Social Sciences 9 cr.  
(a minimum of 3crs. in each area)
Mathematics (MAT 111 & MAT 112). 6 cr.

Natural Sciences* 9 cr.

Free Electives 6 cr.

*Suggestions: Students planning to go into Computer Science, Engineering, Mathematics, or Physics may choose to take PHS 101, 102, and CHM 101. Students planning to go into Biology, Chemistry, Environmental Sciences, Medical Lab Technology, Nutrition, or Nursing may choose to take BIO 101, CHM 101, and CHM 102.

For more details on this program, refer to the subsection “Freshman Program” within the section “LAC, Freshman Program and Degrees.”
Bachelor of Science in Biology

Mission
The Biology program at NDU is coherently designed to provide undergraduates with a rich scope in biology to prepare potential scientists to be competent in their field. It also equips its students with the educational background that enables them to join graduate and medical schools. Furthermore, the program expands the knowledge in the life sciences to non-majors by highlighting the impact of biology on daily life and society.

Program Educational Objectives
• Prepare fully-rounded and scholarly proactive biology graduates;
• Instruct students on how to interpret and build on recent research findings;
• Assist students in developing competency by implementing critical and integrative thinking, problem-solving and communication skills;
• Promote professional development and community service;
• Reinforce values such as ethics, integrity, responsibility, and service.

Program Learning Outcomes
Students should be able to,
• explain fundamental concepts in the different basic areas of biology;
• identify the interrelatedness of information delivered by the required major courses as applied in their field of study;
• evaluate the importance of non-biology courses inherent to the program, such as chemistry and physics, in biological applications;
• acquire practical experience and build a team spirit through laboratory group work;
• write legitimate scientific reports which require literature search, selection of relevant papers, interpretation of scientific data, and synthesis of a coherent scientific review;
• criticize scientific findings and evaluate relevant scientific information/arguments;
• analyze scientific data and use graphic techniques by using the appropriate statistical tools;
• discuss and convey scientific information through seminars and class presentations;
• demonstrate literacy in non-biology areas, such as computer, philosophy, and social studies;
• depict the impact of the biological sciences on society and technology.

Degree Requirements (92 credits)

Liberal Arts Curriculum (LAC) 27 cr.

Core Requirements 36 cr.
BIO 211, BIO 212, BIO 220, BIO 227, CHM 211, CHM 221, CHM 222, CHM 272, PHS 208, PHS 209, PHS 278, PHS 279, STA 203.

Major Requirements 26 cr.
BIO 324, BIO 335, BIO 485.

Choose two biology courses 4 credits each.
Choose three biology courses 3 credits each, excluding: BIO 201, BIO 202 and BIO 203.

**Free Electives**
It is advisable that students (especially pre-med) take CHM 215. 3 cr.
Minor in Biology (17 credits)

The Minor in Biology offers students a basic understanding of majors concepts in biology through classroom and laboratory courses. Biology is a dynamic scientific field in view of the many discoveries and their impact on society, such as the human genome project and the development of the world’s first “synthetic cell”. By enrolling in the Minor in Biology, students will have a well-rounded education that will complement their major field of study and will improve their competitiveness in the job market. This minor will be most attractive to students in the medical and health sciences.

Curriculum requirements
Students enrolled in the Minor in Biology must complete 17 credits of biology courses as follows:

The following two courses (8 credits)
- BIO 211 General Biology I, 4 cr.
- BIO 212 General Biology II, 4 cr.

Three courses (9 credits) selected from two pools of courses as follows:

Any one course (3 credits) from the following pool:
- BIO 215 Human Physiology, 3 cr.
- BIO 220 Genetics, 3 cr.

Any two courses (6 credits) from the following pool:
- BIO 322 Virology
- BIO 314 Ecology
- BIO 316 Economic Botany
- BIO 420 Neurobiology and Behavior

Graduation requirements
The overall GPA should be a minimum of 2.0.
Undergraduate Courses: Biology

BIO 101 Introduction to Biology (3.0); 3 cr. An introduction to the fundamental principles of biology. Covers chemical basis of life, structure and function of cells and tissues, basic genetic concepts, as well as structure and function of human body systems. Prerequisite: Freshman Standing.

BIO 171 Introduction to Biology Laboratory (0.2); 1cr. Laboratory course illustrating the concepts and theory taught in Introduction to Biology.

BIO 201 Your Body in Action (3.0); 3 cr. A balanced introduction to how the human body works and the integrated action of the various systems. Basic concepts in physiology are blended into clinical and technological applications to make learning more appealing and interactive. Special topics connecting to wellness and aging are also considered.

BIO 203 Discover Biology (3.0); 3 cr. A general introductory course that covers the basic principles and concepts of Biology with current applications. Not open for Biology students.

BIO 204 Environmental Biology (3.0); 3 cr. This course is intended to expose engineers and scientists to the concepts and terminology that are relevant to the broad range of biological disciplines. The first part of the course discusses general introductory topics in biology. The second part emphasizes topics related to environmental applications, namely, sanitary microbiology, ecology and toxicology.

BIO 207 Biochemistry for Nursing (3.0); 3 cr. This course is a general overview of the basic concepts in biochemistry. It reviews the essentials of general and organic chemistry, discusses the main biochemical pathways in the cell and emphasizes the relevance of the concepts to clinical disorders.

BIO 211 General Biology I (3.2); 4 cr. This course introduces major concepts of biology including the organization of life on all levels; metabolism and energy transactions involved in life processes; the transfer of information and the diversity and classification of organisms. Prerequisite: Sophomore Standing.

BIO 212 General Biology II (3.2); 4 cr. It covers the study of structure and life processes in plants and animals. Prerequisite: BIO 211.

BIO 214 Human Anatomy (3.0); 3 cr. General human anatomy, emphasizing human scales, proportions, articulation, and factors influencing movements. Prerequisite: BIO 211.

BIO 215 Human Physiology (3.0); 3 cr. A study of the fundamental principles and mechanisms that govern body functions in humans. Prerequisite: BIO 211.

BIO 216 Microbiology and Immunology for Nursing (3.0); 3 cr. A study of the essentials of basic and clinical microbiology and immunology that includes immunology, bacteriology, virology, physiology and mycology. Prerequisite: BIO 207.

BIO 217 Pathophysiology (3.2); 4 cr. The content of this course refers to three major areas based on the health-illness continuum: control of normal body function, alteration in body function, and failure in any system or part of body function. Prerequisite: BIO 215.

BIO 218 Histology (3.0); 3 cr. An introduction to the microscopic structure of tissues and organs, with particular emphasis on the interrelation between structure and function. Prerequisite: BIO 211.

BIO 219 Pathophysiology for Nursing (2.0); 2 cr. This course offers an integrated
approach to biological alterations that affect human equilibrium. The content of this course refers to three major areas based on the health – illness continuum: control of normal body function, alteration in body function, and failure in any system or part of body function. Prerequisite: BIO 215 or NHS 205.

**BIO 220 Genetics (3.0); 3 cr.** Mendelian genetics and extensions of Mendelian analysis; population and quantitative genetics; molecular genetics: DNA structure and replication, organization of DNA in chromosomes, gene and chromosomal mutations, gene expression and its regulation, recombinant DNA technology. Prerequisite: BIO 211.

**BIO 222 Immunology (3.0); 3 cr.** Detailed description of the components of the immune system: their development, differentiation & functioning during an immune response; immune response to pathogens, tumors & grafts; immunopathologies; basic immunological techniques. Prerequisite: BIO 211.

**BIO 226 Evolution (3.0); 3 cr.** Study of processes that bring about evolutionary changes in organisms, evolutionary trends, patterns of adaptations, and principal factors that influence the patterns of speciation. Prerequisite: BIO 220.

**BIO 227 Introductory Biochemistry (3.0); 3 cr.** An introduction to the structure-function relationships of biomolecules, enzymes, metabolic reactions and biochemical energetic of living cells. Prerequisites: BIO 211, CHM 221 or CHM 213.

**BIO 228 Parasitology (3.0); 3 cr.** Provides a general overview on the classification, morphology, development & physiology of human and animal parasites. Prerequisite: BIO 212.

**BIO 314 Ecology (3.0); 3 cr.** Principles of ecosystems; the interaction of organisms and their environment. Food web, energy flow and nutrient cycling in ecosystems. Factors which affect the distribution and abundance of species: Wildlife resources and extinction. Prerequisite: BIO 215, also listed as ENS 303.

**BIO 316 Economic Botany (3.0); 3 cr.** The course provides an introduction to the study of botany and the economic uses of plants in industry, production of food and medicine. Prerequisite: BIO 212.

**BIO 320 Microbiology (3.2); 4 cr.** Covers structures, isolation, classification and metabolic diversity of microorganisms. Prerequisite: BIO 220 or BIO 227.

**BIO 322 Virology (3.0); 3 cr.** Provides a general overview on the classification, biophysical and biochemical characteristics of bacterial, plant and animal viruses. Prerequisite: BIO 212.

**BIO 324 Plant Physiology (3.2); 4 cr.** Basic principles of plant physiology; the physiological processes of green plants and the effect of the environment on these processes. Prerequisites: BIO 212, BIO 227.

**BIO 325 Marine Biology (3.2); 4 cr.** Covers biology of marine life, with emphasis on the roles that marine plants and animals assume in their environmental situations, & the structural and physiological adaptations necessary to fulfill those roles. Prerequisite: BIO 212.

**BIO 332 Developmental Biology (3.2); 4 cr.** The course sheds light on the major events and processes that accompany animal development- from the fusion of two cells to the creation of a more complex multicellular organism. The molecular mechanisms underlying such developmental processes are considered. The impacts of special environmental and pharmacological agents on animal development are also emphasized. Prerequisite: BIO 212.
BIO 334 Molecular Biology (3.0); 3 cr. Provides an understanding of the molecular basis of biological phenomena with emphasis on the fundamental processes common to all organisms: enzyme catalysis, DNA, RNA and protein synthesis, and mechanism of gene expression. Includes a description of common molecular biology techniques for gene study and manipulation. Prerequisites: BIO 220, BIO 227.

BIO 335 Cell Biology (3.2); 4 cr. Provides students with a basic understanding of the structure and function of the eukaryotic cell. Prerequisite: BIO 227.

BIO 336 Basic Biotechnology (3.0); 3 cr. Covers broadly the development of the field of biotechnology: methods and applications. Covers topics such as principles of recombinant DNA technology and its applications to studies of animals, plants, medicine, forensics and human genome project. Prerequisite: BIO 227.

BIO 337 Biochemical Methods (3.0); 3 cr. Introduction to basic methods used in studies of enzymes, proteins, nucleic acids and their interactions. Different methods of extraction, purification, analysis and production of biomolecules are discussed in general but also by means of some precise examples. Prerequisite: BIO 227.

BIO 340 Metabolic Endocrinology (3.0); 3 cr. A comprehensive study of the general principles of endocrinology with emphasis on intermediate metabolism and heritable endocrine disorders. Prerequisite: BIO 215.

BIO 400 Bioinformatics (3.2); 4 cr. An introduction to computer analysis of macromolecular structure information. This course describes how to access, process and interpret structural information regarding biological macromolecules as a guide to experiments in Biology. Prerequisites: BIO 220, BIO 227, senior standing.

BIO 411 Plant Taxonomy (3.2); 4 cr. An introductory study of identification, naming and classification as well as the history of systematics and the role of evolution in systematics. Laboratory emphasis is on knowledge of the major families of vascular plants and on the collection and identification of local vascular plants. Of particular importance is gaining an understanding of the philosophical bases in taxonomy and the relevance of this field to other areas of biology. Prerequisite: BIO 212.

BIO 412 Plant Propagation (3.2); 4 cr. Principles, practices and techniques in sexual and asexual propagation of horticultural plants, in which seed technology, and seed propagation, rooting and propagation by cutting, grafting and budding systems, layering and propagation by specialized plant structures, biotechnology and tissue culture systems for micropropagation are discussed. Prerequisite: BIO 212.

BIO 413 Plant Tissue Culture and Biotechnology (3.2); 4 cr. Principles and techniques for the in vitro culture, propagation, and genetic manipulation of plant cells. Prerequisite: BIO 212.

BIO 420 Neurobiology and Behavior (3.0); 3 cr. The course aims at highlighting the basic neural mechanisms which underlie all animal behavior, including the high cognitive processes such as learning and memory. The different types of neural circuits and nerve cell cross-talks in both invertebrates and vertebrates are considered. Prerequisite: BIO 212.

BIO 424 Conservation Biology (3.0); 3 cr. The application of biological principles to issues in the conservation biology will be examined within a context that integrates biology, land management, protection and development. Prerequisite: BIO 314, also listed as ENS 424.
BIO 451 Environmental Biotechnology (3.0); 3 cr. The use of biotechnology as it relates to various environmental technologies: biodegradation, remediation, biodegradable materials, energy saving process and chemical production from renewable resources. Prerequisites: BIO 211, BIO 212, also listed as ENS 451.

BIO 460 Selected Topics in Biology (3.0); 3 cr. Students study recent and current biological issues and topics in the area of specific competence of the course instructor (or groups of instructors). Prerequisites: Consent of advisors.

BIO 485 Seminar; 1 cr. Students work on selected papers from recent biological journals. Under the supervision of an advisor. Prerequisite: Senior Standing.

BIO 495 Research in Biology; 1, 2 or 3 cr. An independent research project in an area of biology under the direction of a faculty mentor. Corequisite: BIO 485.
Master of Science in Biology

The Department of Sciences offers a Master of Science (M.S.) degree in Biology with thesis work. The purpose of this graduate program is to provide students with in-depth knowledge in advanced topics in Biology. Students are trained to be independent thinkers who are able to identify specific research problems in biology and investigate them. The thesis option provides the necessary background to pursue further research in biology and is more applicable for students planning to enroll in a PhD program.

Mission
The MS Biology Program at NDU is designed to provide graduates with in-depth knowledge in advanced topics in biology. The curriculum, through course and thesis requirements, trains students to be independent thinkers who are able to identify specific research problems in biology and investigate them.

Program Educational Objectives
• Prepare students for better careers in biology by extending their knowledge, skills and experience;
• Train students to be independent and critical thinkers, capable of solving basic problems in biology by employing appropriate experimental methodology and design;
• Develop students’ communication skills and leadership abilities;
• Accentuate the value of biology in our society.

Program Learning Outcomes
Students should be able to,
• explain fundamental concepts in the different basic areas of biology;
• design a study, follow the proper experimental procedures, and apply the appropriate laboratory techniques to investigate scientific problems;
• troubleshoot experimental procedures;
• analyze critically primary scientific literature; apply the appropriate statistical tools for data analysis;
• write scientific papers which require literature search, selection of relevant papers, interpretation of scientific data, and synthesis of a coherent scientific review;
• communicate effectively scientific ideas and findings in written and oral formats.

Admission Requirements
In addition to the University graduate admission requirements, students holding a BS in biology with a cumulative GPA of at least 3.0 or the equivalent will be accepted, while those with a cumulative GPA of 2.7-2.99 or the equivalent will be conditionally accepted. The conditional acceptance will be removed when the student receives a minimum of a “B” average for the 6 credits taken during his/her first semester. Students from other relevant majors may be also given conditional admission pending completion of some supplementary courses over and above the 36 credits required for the MS in Biology, as specified by the faculty graduate committee, with a minimum of a “B” average. These supplementary credits do not count towards the 36 cr. required for the MS degree. Normally, a maximum of nine transfer credits from previous graduate work completed at another accredited institution of higher education may be transferred upon the discretion of the faculty graduate committee.
Graduation Requirements
To satisfy the requirements for the degree of M.S. in Biology, the student must complete a total of 36 credits, including 6 credits of thesis work, with an overall average of at least 3.0/4.0.

Based on the selection of elective courses in the major, students can choose between two orientations: Molecular Biology or Ecology/Organismal Biology. The selected elective courses should be approved by the advisor.

Thesis work provides the necessary background and research experience to students planning to pursue a PhD and indulge in scientific research activity.

Degree Requirements (36 credits)

1- Complete the following required major courses: 15 cr.
   BIO 603, BIO 605, BIO 608 or BIO 636, BIO 610 or BIO 628, BIO 670, BIO 671.

2- Complete 9 credits of electives in the major from the following list of courses: 9 cr.
   BIO 609, BIO 611, BIO 613, BIO 617, BIO 619, BIO 620, BIO 625, BIO 626, BIO 630, BIO 631, BIO 635, BIO 637, BIO 638, BIO 641, BIO 645, BIO 646, BIO 650, BIO 660.

3- Complete 6 credits of free electives (not selected in the above course list categories). 6 cr.

4- Complete the MS thesis requirements. 6 cr.
   BIO 691.
Regulations concerning the thesis work of the Master of Science in Biology

Thesis
Students in the degree of M.S. in Biology may register for the thesis course BIO 691 only after successfully completing at least 19 credits with a accumulative GPA of at least 3.0/4.0 and after receiving the approval of both the department chairperson and the thesis advisor.

Work Duration
The thesis work is expected to be successfully completed within a time duration of two semesters.

Jury
Immediately after receiving a note of completion from the thesis advisor and three copies of the thesis from the student, the department chairperson shall appoint the oral defense jury and its chairperson. It shall consist of the thesis advisor and two full-time faculty members. The department chairperson shall distribute to each member of the jury one copy of the thesis.

Oral Defense Schedule
The oral defense for the thesis shall take place within two weeks from the jury appointment.

Final Grade
Each jury member shall evaluate the student thesis work, then the jury shall thoroughly examine the student during the oral defense and consequently assign the proper grade by a majority vote. In case of a tie, the committee chairperson shall have the casting vote.

Thesis Copies Distribution
The student shall submit four bound copies, two soft bound copies and two unbound copies of the approved final copy of the thesis to the jury chairperson for signatures and distribution to the student, thesis advisor, department, faculty, and the remaining members of the jury. The two unbound copies shall be sent to the university library.
**Graduate Courses: Biology**

**BIO 603 Quantitative Methods in Biology (2.3); 3 cr.** This course introduces biology students to statistical analysis, data acquisition, hypothesis testing, and computer applications in biological research.

**BIO 605 Research Methods in Biology (1.5); 3 cr.** This core course is designed to introduce students to conduct scientific research. Under the supervision of an instructor, students select a research project through which they learn about literature review including the access and use of print and electronic resources, proposal writing, research methods, experimental design and analysis in addition to scientific writing. At the discretion of the instructor this project can be extended in taking an additional tutorial course. This may serve as the nucleus of research for students thesis.

**BIO 608 Advanced Biochemistry (3.3); 4 cr.** This course covers the reaction bioenergetics and metabolic pathways of biomolecules. It also provides an in-depth knowledge of the function, structure, and mode of action of binding proteins and enzymes.

**BIO 609 Advanced Molecular Biology (3.0); 3 cr.** This course deals with the structure, function, and regulation of the gene. It covers the regulation mechanisms of gene transcription, RNA stability and translation, gene mapping and recombinant DNA technology. **Prerequisite:** Consent of advisor.

**BIO 610 Advanced Cell Biology (3.0); 3 cr.** The course will focus in depth on topics of current research interest in the field of cell biology. Students will gain an understanding of the nature of cell biology research by means of a detailed discussion of primary literature (original research papers): experimental design, methods, results obtained, interpretation of results and implications for further studies.

**BIO 611 Cancer Biology (3.0); 3 cr.** This course provides students with an understanding of the molecular and cellular basis of cancer. Topics include: cell growth and cell death, oncogenes and tumor-suppressor genes, cell cycle regulation, tumor development, invasion and metastasis, and treatment of cancer.

**BIO 613 Research Methods in Proteins Science (1.6); 3 cr.** A laboratory-based course that encompasses the theory and applications of distinctive, research-oriented experiments in protein biochemistry. It covers the methods used in proteins extraction, fractionation, purification, quantification, analysis, characterization, sequencing, and modification.

**BIO 617 Reproductive Biology (3.0); 3 cr.** The course sheds light on the mammalian hypothalamo-pituitary-gonadal axis and its role in reproduction. It discusses the anatomy and hormonal control of the male and female reproductive systems at different developmental stages, and the mechanisms of fertilization and implantation. The endocrinology of pregnancy is also considered.

**BIO 619 Plant Secondary Metabolites (3.0); 3 cr.** This course surveys the field of plant natural products that are known as secondary metabolites. It covers the structure and biosynthesis of the main classes of plant secondary metabolites. In addition, the uses of secondary metabolites will be discussed.

**BIO 620 Plant Genomics and Biotechnology (3.0); 3 cr.** This course explores the modern techniques employed in plant genome modification: cloning and sequencing of nucleic acids, gene isolation and mapping, genetic transformation, and germplasm collection. The relevance of plant
biotechnology to the different sectors of the economy will be discussed. *Prerequisite:* Consent of advisor.

**BIO 625 Biological Clocks (3.0); 3 cr.** The course provides basic knowledge about biological rhythms and their survival value in various organisms, with special focus on mammals. It provides insight into the mechanisms underlying entrainment to environmental stimuli. Functional significance of the circadian pacemaker in relation to some diseases is also considered.

**BIO 626 Developmental Neurobiology (3.0); 3 cr.** The course provides comprehensive knowledge about development of the vertebrate nervous system, both central and peripheral. It discusses the factors affecting neuroblast migration, differentiation, identification of target tissues and establishment and maintenance of synapses. Neurogenesis of selected brain regions is also considered. *Prerequisite:* Consent of advisor.

**BIO 628 Advanced Human Physiology (3.0); 3 cr.** The course provides a thorough coverage of the functions of various body systems, whereby physiological mechanisms at various levels of organization (molecular, cellular, tissue and organ system levels) are considered. It also emphasizes the functional integration among the different organ systems and some clinical correlations.

**BIO 630 Microbial Biotechnology (2.3); 3 cr.** This course is designed to introduce students to industrial, medical and environmental biotechnology. It covers food microbiology, microbial bioconversions, industrial microorganisms, and production of enzymes, vitamins, antibiotics, and valuable metabolites. *Prerequisite:* Consent of advisor.

**BIO 631 Applied Techniques in Molecular Biology (0.4); 2 cr.** The course trains students in the basic principles and techniques of molecular biology. Major techniques include cloning, DNA purification, bacterial transformation, electroporation of mammalian cells, restriction analysis, nucleic acid hybridization, southern blotting, and RT-PCR.

**BIO 635 Population and Community Ecology (3.0); 3 cr.** This course explores population dynamics, distribution and community structure. Emphasis will be placed on population growth and regulation, community stability and diversity, ecological succession, populations’ interactions, and coevolution. *Prerequisite:* Consent of advisor.

**BIO 636 Plant Ecology (3.3); 4 cr.** Biotic and abiotic factors controlling plant distribution and plant communities with special emphasis on the Mediterranean biome. Field trips are required in order to emphasize examples from Lebanon.

**BIO 637 Insect-Plant Interactions (3.0); 3 cr.** This course covers the ecology and evolution of insect-plant relationships: plant defense, adaptations to herbivorous insects, pollination biology and applications to managed ecosystems.

**BIO 638 Invasive Alien Species (3.0); 3 cr.** The biology and the impact of invasive alien species on natural ecosystems are discussed. Special emphasis will be placed on invasive alien plants in the Mediterranean biome. *Prerequisite:* Consent of advisor.

**BIO 641 Cell Culture Techniques (2.3); 3 cr.** This course is designed to teach students the skills of mammalian cell culture, including: maintenance and manipulation of cells from various lines under sterile conditions, cell cloning, somatic cell hybridization and cryopreservation of cells.

**BIO 645 Principles of Pharmacology (3.0); 3 cr.** A study of pharmacokinetics and pharmacodynamics of drugs in relationship to dose and time. The principles of drug
action and interaction in different systems of the body will be discussed through representative substances.

**BIO 646 Signal Transduction (3.0); 3 cr.** The course covers the fundamental biochemical mechanisms involved in cellular signal transduction and regulation. Topics include receptors, secondary messengers, protein kinase function, nuclear transport, protein translocation, intercellular signaling mechanisms.

**BIO 650 Cellular and Molecular Immunology (2.3); 3 cr.** This course is a detailed study of the cellular and molecular components of the immune system: their production, structure, function and manipulation. It also includes major immunological techniques (e.g. ELISA, monoclonal antibody production, immunohistochemistry, western blot, affinity chromatography...), which are also used in other biological sciences. *Prerequisite:* Consent of advisor.

**BIO 660 Selected Topics in Biology; 1, 2, 3, or 4 cr.** Oral presentations and in-depth discussions of selected topics in the area of specific competence of the course instructor (or groups of instructors). Course content will emphasize recent advances in the specific topic area. *Prerequisite:* Consent of advisor.

**BIO 670 Seminar I; 1 cr.** Oral presentations and discussions by students on selected topics in Biology in an area of special interest.

**BIO 671 Seminar II; 1 cr.** Oral presentations and discussions by students on selected topics in Biology in an area of special interest.

**BIO 680 Tutorial I; 2 cr.** Individual study or research on a specially selected topic in Biology directed by a faculty member. *Prerequisite:* Graduate standing and consent of the instructor.

**BIO 681 Tutorial II; 3 cr.** Individual study or research on a specially selected topic in Biology directed by a faculty member. *Prerequisite:* Graduate standing and consent of the instructor.

**BIO 691 Master Thesis; 6 cr.**
Bachelor of Science in Chemistry

Mission
The Chemistry program at NDU is committed to provide students with high quality education in preparation for professional and graduate chemistry-related careers. To achieve its mission of academic excellence, the program integrates a judiciously-designed comprehensive curriculum and a research module for a sound academic, professional, and personal development of students.

Program Educational Objectives
• Provide students with theoretical and experimental knowledge across the major disciplines of chemistry: organic, physical, inorganic, and analytical;
• Supply students with a working knowledge of chemical instrumentation, laboratory techniques, and information technology skills to design and conduct chemistry projects;
• Endow students with a working knowledge on chemical literature and research, as well as effective written and oral presentation;
• Prepare students for their future careers by promoting communication skills, critical thinking, and ethical standards.

Program Learning Outcomes
• Prove a strong basis in the fundamentals and applications of chemical theories;
• Effectively communicate experimental results and research topics, both orally and in writing;
• Design and conduct chemical experiments, interpret scientific data, and explore new areas of chemical research;
• Employ instrumental methods, quantitative analysis, statistical tools, and computer software in chemical analysis;
• Demonstrate critical thinking and problem solving abilities in scientific investigations;
• Know the proper procedures and regulations for safe handling of chemicals;
• Apply good ethics in their work and value the importance of sharing tasks within teamwork.

Degree Requirements (92 credits)

General Chemistry

Liberal Arts Curriculum (LAC) 27 cr.

Students majoring in Chemistry are not allowed to count CHM courses within the pool of required LAC courses.

Core Requirements 25 cr.
CHM 211, CHM 215, CHM 221, CHM 222, CHM 272, MAT 213, MAT 224, PHS 212, PHS 271.

Major Requirements 34 cr.
CHM 321, CHM 322, CHM 326, CHM 327, CHM 335, CHM 372, CHM 440, CHM 490.
Choose three Chemistry courses, 3 credits each. These courses should be at the 300 level and above.

**Free Electives**

6 cr.
Undergraduate Courses: Chemistry

CHM 101 General Chemistry I (3.0); 3 cr. An introductory course about the atomic theory, chemical bonding and periodicity, stoichiometry; the state of matter, gases and solutions.

CHM 102 General Chemistry II (3.0); 3 cr. Cover chemical equilibrium, acids and bases, electrochemistry, an overview of the groups in the periodic table, and an introduction to organic chemistry and nuclear chemistry. Prerequisite: CHM 101.

CHM 171 General Chemistry I Laboratory (0.2); 1 cr. Selected experiments in general chemistry I. Corequisite: CHM 101.

CHM 201 Chemistry in Everyday Life (3.0); 3 cr. This course emphasizes the importance of chemistry in our everyday life. It provides students with a practical understanding of substances such as fuel, plastics, detergents, and drugs. This helps them to adopt sustainable practices and healthier lifestyles.

CHM 202 Chemistry of Art (3.0); 3 cr. This chemistry course is directed to students with no prior knowledge in chemistry. It explores the intersection of chemistry with arts. The Basic principles of chemistry are applied to topics of colors, paints, paper, fibers, clay, glass, and metals. Art conservation and restoration, in addition to chemical hazards in art, are also covered.

CHM 205 Basic Chemistry (3.0); 3 cr. This course provides a contemporary introduction to the basic principles in chemistry. It covers the principles of elements, atoms, and molecules, their physical changes, chemical reactivity, and electronic structure. It develops an understanding of bonding and structure, in addition to naming various compounds. Applications concerning quantitative composition of compounds, stoichiometric calculations, limiting reagent, and reaction yield are practiced in this course. The different states of matter are covered with the emphasis on the gas laws and the kinetic molecular theory of gases, and the colligative properties in the liquid state. Finally, acids and bases, titration, and buffers are discussed in the context of chemical equilibrium.

CHM 211 Principles of Chemistry (3.0); 3 cr. Deals with chemical nomenclature, stoichiometry, Lewis structure and VSEPR model, intermolecular forces, hybridization, acid-base and solubility equilibria, thermochemistry, thermodynamics, kinetics, redox reactions. The course is designed for sciences and engineering students.

CHM 213 Basic Organic Chemistry (3.0); 3 cr. This course provides a brief overview to basic principles in Organic Chemistry including the nomenclature, structure, synthesis and reaction of the main function groups of organic compounds. Prerequisite: CHM 205 or CHM 211.

CHM 215 Quantitative Analysis (3.3); 4 cr. This course deals with the theoretical and practical aspects of chemical analysis. It covers the principles of chemical equilibrium and its application on gravimetric and titremetric methods of analysis in addition to the fundamental principles of spectorscopy. Statistical evaluation of the accuracy and precision of experimental data is discussed. Prerequisite: CHM 205 or CHM 211.

CHM 221 Organic Chemistry I (3.0); 3 cr. Introduction to the basic principles and concepts of organic chemistry with an emphasis on the relation between structure and properties, chemistry of hydrocarbons and stereochromy. Corequisite: CHM 211.

CHM 222 Organic Chemistry II (3.0); 3 cr. A study of substitution and elimination
reactions and of the chemistry of aromatic compounds, alcohols, ethers, epoxides, aldehydes and ketones, carboxylic acids and derivatives, amines and carbohydrates. **Prerequisite:** CHM 221.

**CHM 270 Basic Chemistry Lab (0.2); 1 cr.** This laboratory course familiarizes students with laboratory techniques and equipment common to chemistry laboratories and reinforces the concepts learned in CHM 205 Basic Chemistry.

**CHM 271 Principles of Chemistry Laboratory (0.2); 1 cr.** Introduction to laboratory techniques, selected experiments in chemical analysis. **Corequisite:** CHM 211.

**CHM 272 Organic Chemistry Laboratory (1.2); 2 cr.** The aim of this course is to familiarize students with the main techniques encountered in organic chemistry lab such as extraction, recrystallization, simple and fractional distillation, thin layer and column chromatography, identification of functional groups, conduct chemical reactions. Emphasis is placed on the theory of these techniques. **Corequisite:** CHM 222.

**CHM 273 Organic Chemistry Laboratory (0.2); 1 cr.** This course is designed for nutrition students and introduces the methods of separation and purification including extraction, recrystallization, simple and fractional distillation and thin layer chromatography. Identification of functional groups and chemical reactions will be also included. **Corequisite:** CHM 213.

**CHM 321 Physical Chemistry I (3.0); 3 cr.** This course covers fundamental principles of chemical dynamics and chemical thermodynamics. A theoretical study of the macroscopic behavior and microscopic structure of matter using mathematical models; kinetic theory of gases, rate laws, mechanism, collision theory, activated complex theory; the three laws of thermodynamics and their application to chemical systems; thermodynamics of chemical reactions, thermodynamics of solutions, thermodynamics of phase transformation, chemical equilibrium. **Prerequisite:** CHM 211.

**CHM 322 Physical chemistry II (3.3); 4 cr.** This course deals with Quantum Chemistry and Spectroscopy. Topics covered are Quantum theory, postulates, Schrodinger equation, harmonic oscillator model, hydrogen atom, hydrogenic wave function, Pauli principle, rotational motion, atomic structure, molecular electronic structure, Hückel approximation, hybridization, symmetry, rotational and vibration spectroscopy, electronic spectroscopy of molecules. **Prerequisite:** CHM 321.

**CHM 325 Inorganic Chemistry (3.3); 4 cr.** Covers electronic structure and properties of atoms; structure and bonding of inorganic substances, the unit cell, VSEPR theory, bond energies; periodicity and correlation with the electronic structure, properties of the main-group elements and the d-transition metals; organometallic complexes and their applications in synthesis and catalysis. **Prerequisite:** CHM 211.

**CHM 326 Inorganic Chemistry I (3.3); 4 cr.** Covers atomic structure, chemical bonding (MOT), molecular geometry (VSEPR model), solid state (metals, ionic, covalent molecules), crystal field theory, symmetry and point group, acid-base concepts, e.m.f. diagram and its uses, chemistry of selected main group and transition elements with emphasis on physical properties and their applications in industrial chemistry. **Prerequisite:** CHM 211.

**CHM 327 Inorganic Chemistry II (3.0); 3 cr.** Includes structures, stereochemistry, reaction mechanisms and physical properties with emphasis on transition metal coordination and sigma and pi bonded organometallic compounds and their role in catalysis. Metals in biological system will be covered. **Prerequisite:** CHM 326.
CHM 331 Organic Identification and Structure (1.4); 3 cr. This course studies the theoretical and practical aspects of the separation, purification and identification of organic compounds. The identification of pure compounds and of components of mixtures of organic compounds is accomplished by chemical and spectral methods and/or synthesis of derivatives. It covers the theory of NMR (including two-dimensional proton), infrared and mass spectrometry with emphasis on spectral interpretation skills needed for the elucidation of structure. Prerequisites: CHM 222, CHM 272.

CHM 335 Biological Chemistry (3.0); 3 cr. Topics covered include structures and functions of important biomolecules, methods of structure determination, kinetics of enzyme-catalyzed reactions and enzyme mechanisms. Prerequisite: CHM 222.

CHM 372 Advanced Synthesis Laboratory (0.4); 2 cr. Advanced laboratory methods for the preparation of organic and inorganic molecules; synthetic techniques, purification techniques and multi-step syntheses with the characterization of intermediates and products by IR, NMR and MS. Prerequisites: CHM 326, CHM 222, CHM 272.

CHM 415 Environmental Chemistry I (3.0); 3 cr. Covers the natural chemical processes on Earth and the anthropogenic effects on the environment. The chemical processes occurring in the lithosphere, hydrosphere, and atmosphere are analyzed. The effects of primary and secondary pollutants, their interactions between each other and natural substances, and their propagation in the environment are covered. Prerequisite: Senior Standing.

CHM 416 Environmental Chemistry II (3.0); 3 cr. Covers special chemistry topics relevant to environmental protection and environmental systems such as water, air, and soil. Selected topics include: polluted sites decontamination, wastewater and oil spill treatment, hazardous waste management, chemical sources of renewable energy, and an overview of Green Chemistry. Prerequisite: Senior Standing.

CHM 420 Industrial Chemistry I: Unit Operations (3.0); 3 cr. This course covers the study of unit operations: distillation, liquid-liquid extraction, gas-liquid extraction, gas absorption, filtration, evaporation, centrifugation, drying and leaching operations. The fundamentals of material balances will be introduced. Prerequisite: Senior Standing.

CHM 421 Industrial Chemistry II: Chemical Processes (3.0); 3 cr. This course provides a broad overview of technologies and processes involved in chemical industry. Topics covered: industrial production of organic and inorganic chemicals, fermentation processes, Petroleum refining, Polymer processing, industrial catalysis, product development from bench to pilot plant to full-scale manufacturing, process economics and environmental considerations. Prerequisites: CHM 222, CHM 326.

CHM 425 Modern Methods of Organic Synthesis (3.0); 3 cr. The course presents the most important reaction types as tools for research scientist to use in synthesis. Topics include formation of carbon-carbon bonds, molecular rearrangement, cycloaddition and pericyclic reactions, photochemical and free radical reactions, oxidation and reduction reactions with emphasis on chemo-, regio- and stereoselectivity. General principles of retrosynthetic analysis will be used to design simple synthetic schemes for synthesis of target molecules, including important natural products. Prerequisite: CHM 222.

CHM 427 Pharmaceutical Chemistry (3.0); 3 cr. It explores in depth the synthesis of pharmaceutically important molecules such as antibiotics, cardiovascular, anti-inflammatory, chemotherapeutic agents and more. Special attention is placed on the strategy and tactics in synthesis and reaction mechanisms. Real case
studies of process development of drug substances in pharmaceutical industry will be illustrated to show the problems which may be encountered in scaling up chemical synthesis and the ways these problems may be overcome. *Prerequisite: CHM 425.*

**CHM 428 Drug Design and Action (3.0); 3 cr.** This course will give an overview of how drugs are designed and function to help synthetic chemists improve their understanding of drug chemistry. It covers stages of drug discovery process, drug-target interactions, pharmacological properties in drug design, elucidation of mechanism of action of drugs, description of routes for the delivery of drugs in the human body, chemical aspects of drug metabolism and the concept of pro-drugs. *Prerequisites: CHM 222 and CHM 335 or BIO 227.*

**CHM 430 Polymer Chemistry (3.0); 3 cr.** Covers structure, characterization, synthesis and classification of polymers; mechanical properties; stability; and applications in packaging, insulators and fibers etc. *Prerequisites: CHM 222, CHM 322.*

**CHM 431 Atmospheric Chemistry and Pollution (3.0); 3 cr.** Covers the chemical composition of the earth’s atmosphere and the major factors that control its chemical composition. Emphasizes the effects of the biosphere and the changes induced by human activities. Topics such as climate change, ozone depletion, urban air pollution and acid rain will be developed. *Prerequisite: CHM 322.*

**CHM 432 Chemistry and Processing of Food (3.0); 3 cr.** Provides an overview of the chemical and physical properties of food components and additives. Covers the processing operations of important food classes (beverages, fruits and vegetables, dairy products); major chemical changes taking place during processing and storage of foods; and principal methods of analysis used in the food industry. *Prerequisite: CHM 222.*

**CHM 433 Soil Chemistry and Pollution (3.3); 4 cr.** Covers chemistry of inorganic and organic soil components with emphasis on environmental significance of soil solution-solid phase equilibrium, sorption phenomena, ion exchange processes, reaction kinetics, redox reactions, and acidity and salinity processes. Also covers soil pollution: sources, dispersion, and remediation methods. *Prerequisites: CHM 215, CHM 222, BIO 211.*

**CHM 434 Materials Chemistry (3.0); 3 cr.** This course gives an introduction to materials chemistry and solid state chemistry together with an overview of common synthesis and characterization of materials with emphasis on molecular understanding of their chemical, electrical, optical, mechanical, thermal and magnetic properties. Topics covered include inorganic solids, polymers, nanoscale materials and biological materials with their potential technological applications. *Prerequisites: CHM 222, CHM 322, CHM 325.*

**CHM 440 Instrumental Analysis (3.3); 4 cr.** Covers theory, practice and applications of modern analytical instrumentation: different aspects of instrumental analysis in areas of separation sciences and spectroscopy. Introduces instrumental methods of analysis, including gas and liquid chromatography; atomic, ultraviolet/visible, infrared, and fluorescence spectroscopy; nuclear techniques; and electro-chemical methods. The use and the interpretation of data from these instruments will be practiced in the laboratory. *Prerequisite: CHM 215.*

**CHM 490 Chemistry Project; 1, 2 or 3 cr.** Upon the consent of an advisor the student carries out a research project, gaining deeper skills in problem-solving, performing a literature review, experimental techniques, designing experiments, analyzing data and preparing a final report. *Prerequisite: Senior standing.*
Master of Science in Industrial Chemistry

Mission, Vision and Values
The MS program in Industrial Chemistry at NDU-Louaize aims at preparing highly qualified students in the field. It is designed on the principles of interactive learning and hands-on research proficiency. The program includes a thesis that paves the way for pursuing careers in applied chemistry and/or enrolling in PhD programs.

Program Educational Objectives
- Provide students with a first-rate educational experience in the field of industrial chemistry.
- Prepare students for excellent careers in industrial chemistry by boosting both their scientific and personal expertise.
- Coach students to be independent and critical thinkers, capable of undertaking initiatives and dealing confidently and scientifically with incipient issues pertaining to industrial chemistry.
- Foster the citizenship in students by nurturing their communication skills and ethical standards.

Program Learning Outcomes
Students should be able to:
- build a strong understanding of the fundamentals in chemical theories and their applications in industry.
- plan and carry out experimental research and statistical analysis.
- identify and solve problems in industrial chemical processes.
- apprehend the development, ethics, and environmental issues of chemical industry.
- know the proper procedures and regulations for safe handling and use of chemicals and instrumentation.
- review and assess scientific literature critically.
- communicate their research ideas both orally and in writing.

Admission Requirements
In addition to the university graduate admission requirements, students holding a B.S in Chemistry with a GPA of 2.7-2.99 will be accepted on probation. The probation will be removed if the students receive a minimum of a B average for 6 credits taken during their first semester. Students from other majors may be given provisional admission pending satisfactory completion of prerequisite courses consisting of a maximum of 12 credits of undergraduate chemistry courses, as specified by the Faculty Graduate Committee. The credits earned for these prerequisite courses will not be counted towards the 36 credits required for the M.S. in Industrial Chemistry. Students are expected to be proficient in the English language, otherwise they should pass the University English Entrance Test or its equivalent. Normally a maximum of 9 transfer credits from previous work completed at another accredited institution of higher education is permitted upon the discretion of the Faculty Graduate Committee.

Graduation Requirements
To satisfy the requirements for the degree of M.S. in Industrial Chemistry, the student must complete a total of 36 credits, including 6 credits of thesis work, with an overall average of at least 3.0/4.0.
Thesis work provides the necessary background and research experience to students planning to work in the industrial sector or pursue a PhD and indulge in scientific research.

### Degree Requirements (36 credits)

**Required major courses (15 credits)**

- CHM 602 Chemometrics 3 cr.
- CHM 602 Chemometrics 3 cr.
- CHM 606 Chemistry in the Workplace 1 cr.
- CHM 607 Research Methods in Chemistry 3 cr.
- CHM 609 Industrial Chemical Processes 3 cr.
- CHM 603 Advanced Organic Chemistry 3 cr.
  or
- CHM 608 Advanced Inorganic Chemistry 3 cr.
- CHM 680 Seminar I - Industrial Training 1 cr.
- CHM 681 Seminar II 1 cr.

**Electives in the major (9 credits):**

- **A choice of one course from each of the following pools:**
  - **Processing of Renewable Materia - 3 cr.:**
    - CHM 612 Green chemistry and Sustainable Industrial Technology 3 cr.
    - CHM 615 Food Chemistry and Processing 3 cr.
    - CHM 626 Biomass Processing Chemistry 3 cr.
    - CHM 636 The Industry of Biopolymers 3 cr.
  - **Nanotechnology and New Industrial Materials - 3 cr.:**
    - CHM 604 Kinetics and Catalysis 3 cr.
    - CHM 628 Chips and Sensors: design and application 3 cr.
    - CHM 634 Electrochemistry 3 cr.
    - CHM 635 Surface Chemistry 3 cr.
    - CHM 648 Nanotechnology: The Industrial Revolution 3 cr.
  - **Petroleum and Plastic Chemistry - 3 cr.:**
    - CHM 633 Chemistry of Polymers and Their Applications 3 cr.
    - CHM 641 Petrochemistry 3 cr.
    - CHM 647 Organic Synthesis 3 cr.

- **Elective courses (6 credits):**
  - CHM 670 Tutorial I 2 cr.
  - CHM 671 Tutorial II 3 cr.
  - Other graduate level, 3 cr.-courses related to the field and approved by the Department

- **M.S. thesis (6 credits):**
  - CHM 691 Master Thesis I 3 cr.
  - CHM 692 Master Thesis II 3 cr.

In addition, students must pass a comprehensive written exam which should be conducted after having completed at least 18 credits, including required courses.
**Suggested Program**

**Nanotechnology and New Industrial Materials - 3 cr.:**
- CHM 604  Kinetics and Catalysis 3 cr.
- CHM 628  Chips and Sensors: design and application 3 cr.

**Fall Semester I (10 Credits)**
- CHM 609  Industrial Chemical Processes 3 cr.
- CHM 606  Chemistry in the Workplace 1 cr.
- CHM 607  Research Methods in Chemistry 3 cr.
- CHM 6xx  Major Elective 3 cr.

**Spring Semester I (12 Credits)**
- CHM 603  Advanced Organic Chemistry 3 cr.
  Or
  - 608  Advanced Inorganic Chemistry 3 cr.
- CHM 602  Chemometrics 3 cr.
- CHM 6xx  Major Elective 3 cr.
- CHM 6xx  Elective 3 cr.

**Fall Semester II (7 Credits)**
- CHM 6xx  Major Elective 3 cr.
- CHM 680  Seminar I 1 cr.
- CHM 691  Thesis I 3 cr.

**Spring Semester II (7 Credits)**
- CHM 6xx  Elective 3 cr.
- CHM 681  Seminar II 1 cr.
- CHM 692  Thesis II 3 cr.
Graduate Courses: Chemistry

CHM 602 Chemometrics (3.0); 3 cr.  This course analyzes data generated from instrumentation used in chemistry. It emphasizes on the understanding and practical application of chemometric methods such as principal components analysis (PCA) and partial least squares (PLS) regression, using basic statistics and computational computer programming.

CHM 603 Advanced Organic Chemistry (3.0); 3 cr. The course focuses on the study of thermodynamics, kinetics, and stereochemistry of reaction mechanisms. Topics include nucleophilic substitution, elimination, radical reactions, aromaticity and electrophilic substitution in aromatic rings. In addition, a comprehensive study on non classical carbocations, carbanions, carbenes, and carbanoids is considered.

CHM 604 Kinetics and Catalysis (3.0); 3 cr. This course covers the principles and applications of heterogeneous and homogeneous catalysis. Catalyst synthesis and characterization, adsorption, reaction kinetics, and mass transfer effects are covered. The types of reactions considered include nitrogen fixation, chlorine chemistry, catalysis by transition metal complexes, and catalysis in petroleum refining.

CHM 606 Chemistry in the Workplace (1.1); 1 cr. This course covers the basic theories of management functions: planning, organizing, leading, and controlling. It explores current issues and challenges in chemical industry, such as increasing effectiveness, developing a strong project, stimulating the application of new research findings, and the appropriate use of resources in goal achievement.

CHM 607 Research Methods in Chemistry (3.0); 3 cr. The course introduces students to the methods of conducting a scientific research. Students select a research topic, approved by the instructor, through which he learns the basics, techniques, and methods of research. The course includes strategies to access and use print and electronic resources, literature evaluation, proposal writing, experimental design, data analysis, handling comments and recommendations, and scientific writing.

CHM 608 Advanced Inorganic Chemistry (3.0); 3 cr. This course covers the structure of inorganic compounds, the chemistry of coordination compounds and mechanisms of inorganic reactions. Physical methods of determination of the structure of inorganic molecules are addressed. The fundamental concepts of coordination chemistry are developed. Mechanisms of substitution and oxidation-reduction reactions, metal ion catalysis and photochemistry, with the application of symmetry rules are also addressed.

CHM 609 Industrial Chemical Processes (3.0); 3 cr. This course focuses on industrial processes used in converting raw materials into useful industrial products. The course emphasizes on understanding the relationship between natural resources, chemical transformation and industrial waste generation with insights derived from green chemistry.

CHM 612 Green chemistry and Sustainable Industrial Technology (3.0); 3 cr. This course introduces modern approaches for more sustainable emerging industries by developing environmentally friendly products, minimizing waste, using renewable resources, and maintaining cleaner processes throughout. Students are required to participate in discussions as well as in oral presentations about real-cases in industrial green chemistry in a wise and organized manner.
CHM 615 Food Chemistry and Processing (3.0); 3 cr. This course deals with the chemical and physical composition of food substances and additives as well as the relationship between the chemical nature of food and its rheological and sensory properties. It develops the changes taking place during processing and storage of food as well as the methods of analysis used in the food industry.

CHM 626 Biomass Processing Chemistry (3.0); 3 cr. This course presents an overview of the thermochemical and biochemical conversion of biomass fibers to bioenergy fuel and bioproducts. The course covers the chemistry and treatment of lignocellulosic fibers, their enzymatic hydrolysis and biochemical conversion to value-added products. The sustainability of biomass conversion and their environmental impact are discussed.

CHM 628 Chips and Sensors: design and application (3.0); 3 cr. This course introduces the field of sensors, design and production. Fundamental applications of chemical compounds in industrial products, environmental and agricultural samples, and biological systems are discussed.

CHM 633 Chemistry of Polymers and Their Applications (3.0); 3 cr. This course explores the preparative methods, characterization techniques and application of well-defined polymers in material science, drug delivery and biomedical applications. Physical behavior in solution, thermodynamics, mechanical properties, and statistics of polymers are explored.

CHM 634 Electrochemistry (3.0); 3 cr. This course addresses the fundamentals and applications of electrochemistry. It provides an overview of electrode processes and potentials, thermodynamics of cells, and kinetics of electrode reactions. It discusses electroanalytical and physical electrochemical techniques including potential step methods, potential sweep methods, and hydrodynamic methods.

CHM 635 Surface Chemistry (3.0); 3 cr. This course emphasizes on fundamental concepts of surface chemistry. Considerations of thermodynamics, kinetics, surface structure, electronic structure, catalysis and reactivity are explored using examples from the current literature.

CHM 636 The Industry of Biopolymers (3.0); 3 cr. The course provides a comprehensive review of the major classes of biopolymers and their everyday life applications ranging from packaging materials to specialty products in medicine. The course discusses the chemistry, molecular structures, high-order structures, sources, and disposal of polymers from renewable resources such as proteins, polysaccharides, and vegetable oils. It also highlights polymers from naturally created analogues.

CHM 641 Petrochemistry (3.0); 3 cr. This course addresses the origin and processing of crude oil, the physical and chemical properties of refined oil, and petrochemicals and their applications. It also covers the market and consumption of petroleum products worldwide.

CHM 647 Organic Synthesis (3.0); 3 cr. The course involves an extensive survey on molecular structure and application of new synthetic strategies in designing organic material from both mechanistic and synthetic viewpoints. Students learn how to plan the synthesis of complex molecules, the use of protecting groups, as well as reduction, oxidation and alkylation reactions in modern organic chemistry.

CHM 648 Nanotechnology: The Industrial Revolution (3.0); 3 cr. This course covers fundamental concepts of a wide array of nanomaterials, such as carbon nanotubes, nanostructured metal and metal oxides /ceramics/ composites, nanowires, quantum dots, nanoclays, functional hybrid
nanoparticles, and bio-related and magnetic nanomaterials. Advanced optical and electronic characterization techniques, and their usefulness in various industries are described.

**CHM 670 Tutorial I; 2 cr.** Individual study on a specially selected topic in chemistry directed by a faculty member. *Prerequisite:* graduate standing and consent of the instructor.

**CHM 671 Tutorial II; 3 cr.** Individual study on a specially selected topic in chemistry directed by a faculty member. Prerequisite: graduate standing and consent of the instructor.

**CHM 673 Analytical Chemistry Laboratory (0.3); 1 cr.** This laboratory provides hands-on experience on techniques such as atomic absorption, liquid chromatography, gas chromatography/mass spectrometry, gas chromatography/nitrogen phosphorus detector and electron capture detector, electrochemistry, Fourier transform infrared spectroscopy. The remainder of the term is devoted to special projects in which students apply what they have learned to solve chemical problems in the laboratory.

**CHM 680 Seminar I - Industrial Training; 1 cr.** Practical training in industry is required for all students in order to have them gain knowledge and hand-on-experience of various industrial processes.

**CHM 681 Seminar II; 1 cr.** Oral presentations and discussions by students on selected topics in chemistry in an area of special interest.

**CHM 691 Master Thesis I; 3 cr.**

**CHM 692 Master Thesis II; 3 cr.**
Mission
The mission of the Environmental Sciences program at NDU is to provide high quality education through rigorous interdisciplinary approach. The program emphasizes the study of interactions between environmental processes and human behavior, in addition to environmental problem solving.

Program Educational Objectives
• Provide students with theoretical knowledge about basic sciences including biology, chemistry, physics and statistics; as well as environmental sciences various topics including pollution, health, resources conservation and management, regulations and risk assessment;
• Assist students in developing analytical skills including analysis of environmental problems, data collection and analysis and modeling of human environment systems knowledge;
• Offers a multidisciplinary learning environment promoting high-level cognitive thinking skills including critical thinking, problem-solving skills, and integrative thinking;
• Strengthen integrity, responsibility, compassion and service.

Program Learning Outcomes
• Show clear understanding of the relationships between environmental processes and human behavior; as well as local, regional and global perspectives of environmental problems and their solutions;
• Demonstrate the understanding of key concepts about the environment through creative interdisciplinary approach;
• Prove strong analytical ability with an understanding of theoretical and applied knowledge; as well as communication and leadership skills;
• Design environmental assessment studies, plan for environmental policies and strategies and implement natural resources management plans;
• Respect and care for the environment by cultivating high moral and ethical standards and by playing an active role in their community.

Degree Requirements (92 Credits)

Liberal Arts Curriculum (LAC) 27 cr.

Core Requirements 38 cr.
BIO 211, BIO 212, CHM 215, CHM 221, CHM 222, CHM 272, CSC 318, ENS 303, ENS 321, GEO 201, GEO 311, STA 203.

Major Requirements 21 cr.
ENS 201, ENS 322, ENS 323, ENS 430, ENS 450, ENS 490.

and also one freely chosen 3 credits Environmental Science course (preferably ENS 471).

Free Electives 6 cr.
ENS 201 Introduction to Environmental Science (3.0); 3 cr. Introduction to the basic environmental global problems facing the Earth with emphasis on pollution and the use of energy resources. Prerequisite: Sophomore Standing.

ENS 202 The Environment and Sustainable Development (3.0); 3 cr. Introduction to the principles and goals of sustainable development. Special focus is given to population growth, food production, energy consumption, environmental protection and natural resources management, as well as the emerging technological applications and their impacts. In addition, multiple case studies present the efforts/practices of international organizations, regional cooperations and local institutions in sustainable development, conversation and conflicts resolution.

ENS 205 Environment, Society and Ethics (3.0); 3 cr. Introduction to the environmental goods and services. Impacts of population growth and economic development on the environment, the evolution of societies, community organizations and the quality of life are presented. Special focus is given to the value types and existing moral relationships between human beings and their environment, environmental ethics views, their evolution and effects on the environment and wildlife protection. Sustainability principles and the impacts of international policies, environmental management worldviews and legally binding agreements on natural resources, societies and the world’s economic balance are emphasized.

ENS 206 Ecotourism (3.0); 3 cr. Principles, characteristics and organization. Sustainability based on environmental protection, conservation and beneficial community and social interests. International experience, domestic ecotourism: description and geography. Field trips to the major nature reserves and sites of natural beauty in Lebanon.

ENS 303 Ecology (3.0); 3 cr. Principles of ecosystems; the interaction of organisms & their environment. Food web, energy flow & nutrient cycling in ecosystems. Factors which affect the distribution & abundance of species: Wildlife resources & extinction. Prerequisite: BIO 212. Also listed as BIO 314.

ENS 312 Environmental Health (3.0); 3 cr. Provides general understanding of how environmental factors are involved in the transmission of communicable diseases. Health hazards resulting from exposure to chemical and physical factors in the environment are emphasized as well.

ENS 321 Soil Pollution (3.0); 3 cr. Soil formation, soil chemistry. Soil erosion, weathering, salinity, soil rehabilitation. Soil contamination from environmental contaminants: Their fixation/mobility. Dispersion in the environment. Soil remediation methods.

ENS 322 Water Pollution (3.0); 3 cr. Natural water quality. Contaminant Hydrogeology: Chemical and physical contaminants. Marine Pollution. Problems arising from water treatment and resource use.

ENS 323 Air Pollution (3.0); 3 cr. Composition of the atmosphere. Climate and weather. Global atmospheric changes. Indoor and outdoor air pollution. Air pollution control processes, air pollutants dispersion modeling. Prerequisite: ENS 201.

ENS 332 Plants and Pollution (3.0); 3 cr. Biomes on Earth. Loss of biodiversity and desertification. Preventive measures. Forest resources and conservation. Interaction between plants and pollution, plant pollutant uptake and physiological responses. Prerequisite: BIO 212.
ENS 420 Energy Resources (3.0); 3 cr. Fossil fuels energy resources. Mineral resources. Alternative energy resources. Technological hazards and environmental impacts including political, economic and social consequences of their exploitation.

ENS 422 Pollution of Marine Environment, (3.0); 3 cr. Introduction to the marine ecosystems, sources and types of pollutants, environmental degradation and its impact. Marine pollution management. International legislation for the conservation of marine environment.

ENS 423 Water and Wastewater Quality and Treatment (3.0); 3 cr. Water and wastewater treatment processes. Consequent health impacts. Water and wastewater control techniques. Water protection.

ENS 424 Conservation Biology (3.0); 3 cr. The application of biological principles to issues in the conservation biology will be examined within a context that integrates biology, land management, protection and development. Prerequisite: ENS 203. Also listed as BIO 424.

ENS 425 Forest Resource Conservation (3.0); 3 cr. Ecological, social and economic principles applied in the management of forest and wildland resources, forests, range, water, fish and game. Evaluation of alternate management plans: introduction to integrative planning: The interactions of water, wood, wildlife, range fisheries, and recreation resources. Prerequisite: BIO 212.

ENS 430 Solid Waste Management (3.0); 3 cr. Solid waste management and disposal. Treatment processes: Recycling, composting, landfilling. Introduction to hazardous/toxic waste.

ENS 431 Industrial Waste Management (3.0); 3 cr. Industrial waste: sources, types, quality, quantity and impact assessment. Treatment processes and detoxification. Disposal.

ENS 440 Environmental Natural Hazards (3.0); 3 cr. Seismic hazards; volcanoes; Atmospheric hazards; floods and Hydrologic hazards; landslides and rockfalls; design with nature; human interaction with the environment; risk maps; case studies.

ENS 441 Mitigation Measures and Policies (3.0); 3 cr. Rehabilitation concepts; mitigation procedures, design, and methodology; application to quarries, landfills, coastal erosion, landslides, floods.

ENS 445 Environmental Law and Regulations (3.0); 3 cr. Overview of National and international environmental law and Regulations, enforcement and liability; regulatory agencies and working bodies.

ENS 450 Environmental Impact Assessments (3.0); 3 cr. The assessment of a project environmental limitations, precautions, mitigation, legal measures and the various methodologies of technical investigation, monitoring and assessment. ENS 451 Environmental Biotechnology (3.0); 3 cr. The use of biotechnology as it relates to various environmental technologies: biodegradation, remediation, biodegradable materials, energy saving process and chemical production from renewable resources. Prerequisites: BIO 211, BIO 212. Aslo listed as BIO 451.

ENS 471 Field and Laboratory Work (1.2); 3 cr. Investigation of polluted sites and risk assessments. Environmental field work. Sampling methods. Laboratory analysis.

ENS 475 Selected Topics in Environmental Science (3.0); 3 cr. Students study recent and current environmental issues and topics in the area of specific competence of the course instructor (or groups of instructors). Prerequisite: Consent of advisor.

ENS 485 Seminar; 2 cr. Students work on selected papers from recent biological, earth and environmental science journals. Under
the supervision of an advisor. Prerequisite: Senior Standing.

**ENS 490 Senior Project (3.0); 3 cr.** After consultation with the Department, students run an environmental research project (case study) that will be presented as a seminar.

**ENS 495 Research in Environmental Science; 1, 2 or 3 cr.** An independent research project in an area of environmental science under the direction of a faculty mentor. Prerequisite: Senior standing and consent of the instructor.
Undergraduate Courses: Geology

**GEO 101 Environmental Geology (3.0); 3 cr.** An introductory course of the study of the earth covering: how the earth works, the major geologic processes as earthquakes and volcanoes, how they influence human activities and the geologic aspect of environmental pollution. *Prerequisite:* Freshman Standing.

**GEO 202 Geology for Architects (2.0); 2 cr.** Minerals and Rocks, Earthquakes, Interpreting and Reading Topographical and Geological Maps, Geology of Lebanon, Laboratory Application and Field Trips.

**GEO 203 Planet Earth (3.0); 3 cr.** Basic principles of the Earth’s composition: Structure and age, the Earth’s processes: Earthquakes and volcanoes, the Earth’s materials: Minerals, rocks, soils and groundwater. Applications from the major geological aspects in Lebanon. *Prerequisite:* Sophomore Standing.

**GEO 311 Hydrogeology (3.0); 3 cr.** Hydrologic cycle; meteorology; groundwater resources and uses; groundwater movement, natural and artificial discharge. Groundwater erosion and deposition. Lebanon’s water resources.

**GEO 312 Engineering Geology (3.0); 3 cr.** Weather and soil-forming Processes: Application of engineering geology in foundations design; properties of rock substance and rock mass; Tunnels; Mass-Wasting Process; Ground Water in Engineering Geology; Fluvial Processes; Dams; Land subsidence; coastal engineering geology; Earthquakes; Case Studies. *Prerequisite:* GEO 201.

FACULTY OF NURSING AND HEALTH SCIENCES (FNHS)

Professor: Farhat, Antoine

Associate Professors: Doumit, Jacqueline; Jaalouk, Doris

Assistant Professors: Aoun, Antoine; Bou Mitri, Christelle; Bou Mosleh, Jocelyne; El Hayek, Jessy; Youssef, Lara

Lecturers: Abou Jaoude, Maya; El Gerges, Najwa; Obeid, Cecile

Lab Instructor: Merhi, Samar

MISSION, VISION AND VALUES

Mission
The Faculty of Nursing and Health Sciences (FNHS) provides student-centered and quality education in an environment that fosters academic integrity, social justice, and personal responsibility. The FNHS prepares students to become morally reflective health care scholars who provide leadership in evidence-based practice to promote well-being and disease prevention among individuals and communities. Through integrated programs of excellence in education, research, and service, FNHS contributes to the enhancement of the public’s health in Lebanon and the region by training future health professionals from diverse backgrounds, conducting quality and significant research, and using newly generated knowledge to drive effective public health practice and policy. The faculty’s curricula offer students comprehensive knowledge and clinical experience through supervised practice programs that enable them to assess, plan, implement and evaluate an adequate therapeutic regimen for clients in different healthcare settings.

HISTORICAL OVERVIEW

NDU submitted its application to the Ministry of Education and Higher Education (MEHE) for the establishment of a Faculty of Nursing along with a Health Sciences component during the academic year 2006-07. Specific requirements, such as the installation and the equipment of clinical Nursing labs on campus, contract agreements with accredited hospitals, qualified administrators and faculty members in Nursing, were met during the Fall 2007-2008 and, accordingly the Faculty of Nursing and Health Sciences (FNHS) was recognized by MEHE in March 2008 and officially licensed on September 5, 2008. The Bachelor of Science in Nutrition and Dietetics, and in Medical Laboratory Technology, previously managed by the Department of Science at the Faculty of Natural and Applied Sciences, were moved to the FNHS starting the academic year 2008-09. In July 2013, FNHS had the MS in Human Nutrition licensed and the program started in Fall 2013-14. In July 2014, the BS in Food safety and Quality Management was licensed and it started in Fall 2015-16.

The Faculty of Nursing and Health Sciences offers the following degree programs:

- B.S. in Food Safety and Quality Management 93 cr.
- B.S. in Medical Laboratory Technology 103 cr.
- Bachelor in Nursing 105 cr.
- B.S. in Nutrition and Dietetics 95 cr.
- MS in Human Nutrition 35 cr.
• MS in Food Safety and Quality Management 36 cr.

In addition, the Faculty of Nursing and Health Sciences offers:
• Dietetics Internship Certificate Program 6 cr.
• Minor in Nutrition 15 cr.
• Minor in Food Safety and Quality Management 15 cr.

UNDERGRADUATE DEGREE PROGRAMS

Admission Requirements
For admission requirements to undergraduate degree programs offered by the Faculty of Nursing and Health Sciences refer to the section under the title of “Undergraduate Admission” of this Catalog.

Graduation Requirements
To graduate, a student must fulfill all requirements of the undergraduate degree program, with an overall GPA of at least 2.0/4.0, and a minimum GPA of 2.3/4.0 in both the core and major requirements, and clear all accounts with the University. Candidates for degrees are reminded that grades of “I” assigned during the last semester to courses required for graduation will result in delaying of graduation.
Bachelor of Science in Food Safety and Quality Management

Degree Requirements (93 credits)

Mission
The mission of the Bachelor program in Food Safety and Quality Management (FSQM) is to generate knowledgeable graduates capable of contributing to the supply of safe and wholesome foods. The program will provide a solid foundation in FSQM and supervised trainings to ensure that students will become competent and qualified food safety and quality professionals enabling them to efficiently manage the delivery of safe food in the Lebanese community from farm to fork. This is in the scope of the urgent need of this community for FSQM improvement.

Program Educational Objectives
The objectives of the B.S. in FSQM program are to:

a - Equip students with adequate theoretical and practical knowledge on quality and food safety management systems
b - Translate learned theories into practice through extensive supervised trainings and hands-on experience
c - Provide students with knowledge on national and international food safety standards, laws and regulations
d - Prepare the students to work as managers/leaders in different food-related work environments
e - Foster the acquisition of leadership, managerial and teamwork skills required in success in different professional settings.
f - Integrate ethical principles and lifelong learning in future professional practice.

Program Learning Outcomes
Upon completion of the B.S. program in FSQM, graduates will be able to:

1 - Implement preventive food safety systems such as HACCP, and ISO 22000 in a particular food service establishment or a food industry using risk-based thinking. (POb d W, POb e H, POb a H);
2 - Assess the different managerial functions and processes and how they relate to customer satisfaction and continuous improvement. (POb b H, POb d H, POb e H);
3 - Interpret and apply the national and international food-related laws and regulations as well as different labeling requirements. (POb c H);
4 - Demonstrate managerial and leadership skills that allow them to contribute to an efficient and positive food culture. (POb d H, POb e H);
5 - Analyze and assess physical, chemical and biological risks present in a food establishment. (POb b H);
6 - List the advantages and disadvantages of various food processing and preservation techniques and evaluate their impact on nutrient retention (POb b H);
7 - Translate professionalism and ethics during implementation and operation of the quality management system. (POb f H, POb d W);
8 - Understand the physical properties of food and the different reasons behind its deterioration. (POb a H, POb b H);
9 - Conduct scientific research on a selected food safety or quality-related current topic and present challenges and findings in relation to a practical setup. (POb a H, POb c W, POb f H);
10 - Evaluate various local food industries and food service establishments though field trips and on-site observations. (POb e H, POb b H, POb a W).

Liberal Arts Curriculum 27 cr.

Category I. English and Arabic Communication 9 cr.
A. English Communication 6 cr.
   ENL 213 Sophomore Rhetoric 3 cr.

And
   ENL 230 English in the Workplace 3 cr.

Or
   ENL 223 Communication Arts 3 cr.

B. Arabic Communication (One from the following pool) 3 cr.
   ARB 211 Appreciation of Arabic Literature
   ARB 212 Applied Arabic Grammar
   ARB 224 Arabic Literature and Human Thought
   ARB 231 Technical Arabic
   ARB 306 The Modern Arabic Novel and Short Story
   ARB 310 Arabic Theatre

Category II. Religion 3 cr.
   REG 212 Religion and Social Issues
   REG 213 Catholicism
   REG 215 World Religions
   REG 313 Maronite Faith and Cultural Heritage
   REG 314 Marriage and Family in the Catholic Church

Category III. Ethics 3 cr.
   BAD 431 Business Ethics

Category IV. Citizenship 3 cr.
   POS 201 Introduction to Political Science
   POS 209 Citizenship
   POS 210 Government and Politics of Lebanon
   POS 319 Democracy and Human Rights
   POS 240 Law and Society
   FQM 200 Food Security and Sustainability

Category V. Cultural Studies and Social Science 6 cr.

Faculty Contributions
A. Cultural Studies
   PHL 211 Logic and the Scientific Method
   PHL 232 Ancient World Philosophy
   PHL 333 Medieval World Philosophy
   PHL 334 Modern and Contemporary World Philosophy
   LIR 214 Introduction to Literary Genres
   LIR 217 American Literature to the End of the 19th Century
LIR 305  Novel to the End of the 19th Century
ARP 215  Cultural Themes in Lebanese Architecture
FAP 215  Art and Culture
MUS 210  Music Appreciation
HIT 211  History of Lebanon
POS 225  Politics of Catholic Social Theory
TTM 326  Domestic Travel and Tourism Development
TTM 201  Introduction to Tourism & Hospitality Management
NTR 215  Foods and Nutrition of World Cultures
COA 315  World Cinema Survey
COA 350  Current Issues

B. Social Science
BAD 201  Fundamentals of Management

**Category VI. Applied and Life Sciences**  
3 cr.

**Faculty Contributions**

**A. Applied Science**

Minor in Food Safety and Quality Management (15 credits)

The Minor in Food Safety & Quality Management aims to provide prospective students with the knowledge and skills needed to understand food hazard and their potential risks, their sources, risk analysis and management processes and strategies used to assure the quality and safety of food products.

The Minor in Food Safety & Quality Management is generally open to students majoring in Biology, Chemistry, Nursing or Medical Lab Technology, Nutrition and Hotel Management students.

Admission requirements
For admission requirements for the Minor in Food Safety & Quality Management, refer to the section entitled “General Rules and Regulations for Minors at NDU” of this catalog.

Graduation requirements
To satisfy the requirements of a Minor in Food Safety & Quality Management, a student must complete the following courses:

- FQM 322;
- FQM 420;
- FQM 422;
- FQM 427;
- BAD 429.

“D” is the passing grade for each course, and the minor should be completed with an overall GPA of at least 2.0/4.0.
Food Safety and Quality Management: Undergraduate Courses

FQM 200 Food Security and Sustainability This course covers the basic principles of natural resources management and food security within a global perspective. Food security and social responsibility from the Green Revolution to the current urge for sustainability at all levels, intensive and extensive agricultural systems, research innovation and pertinent global and national trends are discussed.

FQM 280 Training in Food Establishments I (0.3); 1 cr. Involves students in supervised training in one of the food service institutions or food industries. Prerequisite: Sophomore standing.

FQM 322 Food Quality Management I (3.0); 3 cr. This course covers the basic principles of quality control, quality assurance, food chain security, and quality and safety management in food service establishments and industries with emphasis on preventive approaches such as HACCP, ISO 22000, Good Manufacturing Practices (GMPs) as well as risk management.

FQM 324 Technology of Food Products (3.0); 3 cr. Covers the changes in basic constituents of foods (carbohydrates, lipids, proteins, vitamins, minerals, food enzymes, and water) resulting from processing and preparation. It also focuses on the principles of food spoilage and food preservation, and the manufacturing of traditional Lebanese food products. Prerequisite: NTR 320.

FQM 380 Training in Food Establishments II (0.3); 1 cr. Involves students in supervised advanced training in one of the food service institutions or food industries. Prerequisites: NTR 425 and junior standing.

FQM 420 Food Quality Management II (3.0); 3 cr. The course introduces students to the importance of moving towards total quality management (TQM) thinking in food service establishments and food industries. It emphasizes the importance of the systems approach, customer satisfaction and continual improvement through data collection and analysis (PDCA cycle: plan-do-check-act). It introduces quality management programs such as ISO 9001 and Six Sigma. In addition, this course provides students with tools on how to write standard operating procedures (SOP) and conduct internal audits. Prerequisite: FQM 322.

FQM 422 Food Toxins and Contaminants (3.0); 3 cr. General principles of food toxicology with emphasis on toxic constituents in plant, animal, marine, and fungal origin, contaminants and food processing induced toxins.

FQM 423 Principles of food product development (2.0 cr) ; 2 cr. To learn the chemical and physical properties of food ingredients in order to apply them in the product development process, from idea generation to marketing. Prerequisites: NTR 320 and NTR 325.

FQM 427 Food Laws and Regulations (3.0); 3 cr. This course covers the importance and development of food legislation, food standards, codes of practice and specification (codex alimentarius), formulation of legal food standards (national and international) as well as labeling requirements. It also teaches students how to interpret the content of regulations and use them to support the professional needs in the food industry. Prerequisite: Senior standing.

FQM 470 Methods and techniques to assess food quality (0.2 cr); 2 cr. This course will cover a number of chemical reactions occurring in food during its deterioration and the chemical changes happening during, production and
processing. The focus will be made on the chemical reactions as well as on the techniques and methods used to measure those changes. **Prerequisites:** NTR 320 and NTR 325.

**FQM 475 Food Processing Laboratory (0.3); 1 cr.** This course gives the student an exposure to various local food industries and food service establishments involved in the food chain. Reports of findings and observations are due after each field trip. **Prerequisite:** NTR 320. **Corequisite:** NTR 425.

**FQM 480 Selected Topics in Food Safety and Quality Management (1.0); 1 cr.** Allows students to give a presentation related to the food safety and quality management and to receive peer feedback. A mock job interview will be included and sample papers will be provided for the resume and reflection assignments. In addition, guest speakers will be invited. **Prerequisite:** Senior standing.

**FQM 496 Project in Food Safety and Quality Management; 3 cr.** Emphasizes current research in food safety and quality management. **Prerequisites:** Senior standing and consent of instructor.
Bachelor of Science in Medical Laboratory Technology

Degree Requirements (103 credits)

Mission
The mission of the MLT program is to prepare highly competent medical laboratory technologists who will become leaders in the profession of MLT. The program provides qualified students with both the theoretical knowledge and clinical experience in various areas of clinical laboratory science. Students are trained to perform clinical laboratory tests, evaluate and report accurate test data/results used by physicians to properly diagnose and treat patients. Principles of quality assurance, laboratory safety assurance and provision of timely and cost-effective services are emphasized. Graduates of the program shall be able to demonstrate high ethical and moral standards, professional responsibility, and the desire for learning throughout their careers.

Program Educational Objectives
The objectives of the Medical Laboratory Technology (MLT) program are to:
- a - Provide students with comprehensive theoretical knowledge of clinical laboratory sciences and practical experience;
- b - Develop in students’ career entry-level competencies in clinical laboratory testing, quality assurance, and professional ethical practice;
- c - Provide students with the background adequate to follow graduate studies or specialization in an area of clinical laboratory sciences;
- d - Cultivate the development of leadership, communication skills, and lifelong learning.

Program Learning Outcomes
Upon graduation from the MLT program, students shall be able to:
1 - Define the basics and principles of clinical chemistry, general microbiology, clinical hematology, histopathology, blood banking, cytogenetics and molecular laboratory sciences.  \((POb \ a \ H \ and \ POb \ c \ H)\);
2 - Establish proper procedures, for collecting, processing, and analyzing biological specimens and other substances.  \((POb \ a \ H, \ POb \ b \ H \ and \ POb \ c \ H)\);
3 - Perform microscopic examination and analytical tests of cells, tissues, blood, body fluids, and other materials.  \((POb \ a \ H, \ POb \ b \ H \ and \ POb \ c \ H)\);
4 - Employ problem solving and sound critical thinking skills to recognize and confirm abnormal laboratory results.  \((POb \ a \ H \ and \ POb \ b \ W)\);
5 - Exercise the principles of management, safety and quality assurance programs.  \((POb \ b \ H)\);
6 - Demonstrate effective communication, interpersonal skills, professional conduct, and the desire for continuing education.  \((POb \ b \ H, \ POb \ c \ H \ and \ POb \ d \ H)\).

Medical Laboratory Technology: Undergraduate Courses

MLT 311 Clinical Chemistry I (2.0); 2 cr.
Concepts of clinical chemistry, mechanisms of diseases and the correlation of laboratory data with those diseases. Clinical interpretation of normal and abnormal values. Prerequisite: CHM 205 or CHM 211.

MLT 314 General Microbiology (3.2); 4 cr. Covers structure, morphology, nutritional requirements, metabolism, and growth of microorganisms, culture techniques, microbial diseases, assays, and introduction to microbial genetics. Prerequisite: BIO 211. Also listed as BIO 320.

MLT 318 Hematophysiology (3.0); 3 cr.
Covers general hematology, including development and functions of red blood cells, white blood cells, and platelets, coagulation, manual techniques and modern automation. Prerequisite: BIO 211.

MLT 320 Clinical Parasitology (3.0); 3 cr.
Covers parasitic infections of humans of clinical importance, and their diagnostic laboratory techniques. Prerequisite: BIO 211.

MLT 321 Clinical Mycology (1.0); 1 cr.
Covers fungal infections of humans of clinical importance, mode of infection, methods of identification, and susceptibility testing of fungi. Prerequisite: BIO 211.

MLT 322 Clinical Chemistry II (2.0); 2 cr.
Continuation of MLT 311. Prerequisite: MLT 311.

MLT 325 Clinical Bacteriology (2.0); 2 cr.
Covers bacterial infections of humans of clinical importance, mode of infection, identification methods, and antibiotic susceptibility testing. Prerequisite: MLT 314.

MLT 327 Clinical Virology (1.0); 1 cr.
Covers viral infections of humans of clinical importance, mode of infection, methods of identification, and their diagnostic laboratory techniques. Prerequisite: MLT 314.

MLT 329 Hematopathology (2.0); 2 cr.
Covers blood cells (erythrocytes, leukocytes, and platelets) disorders, and coagulation disorders. Prerequisite: MLT 318.

MLT 330 Clinical Histopathology and Cytology Techniques (2.0); 2 cr. Series of lectures in cell biology and normal histology of various human tissues. Lectures on techniques of tissue handling, preparation and staining of specimens and smear of cytological material.

MLT 339 Blood Banking and Transfusion Medicine (1.0); 1 cr. Covers basic principles in blood banking and transfusion medicine. Prerequisites: BIO 222, MLT 318.

MLT 340 Serology (2.0); 2 cr. Basic aspects of clinical serology which involves the study of mechanisms, different formats, interfering factors, application and interpretation of commonly used serological tests. Prerequisite: BIO 222.

MLT 400 Introduction to Cytogenetics and Molecular Diagnostics (1.0); 1 cr.
Provides an introduction to the fields of Cytogenetics and molecular diagnostics. Prerequisite: MLT 330.

MLT 410 Practical Training in Clinical Chemistry; 4 cr. 5-week practical training in clinical chemistry.

MLT 420 Practical Training in Clinical Hematology; 4 cr. 5-week practical training in clinical hematology.

MLT 430 Practical Training in Clinical Bacteriology; 4 cr. 5-week practical training in clinical bacteriology.

MLT 440 Practical Training in Clinical Parasitology; 2 cr. 4-week practical training in clinical parasitology.
MLT 450 Practical Training in Serology; 2 cr. 4-week practical training in serology.

MLT 460 Practical Training in Blood Banking and Phlebotomy; 2 cr. 5-week practical training in blood banking and phlebotomy.

MLT 470 Practical Training in Cytogenetics and Molecular Diagnostics; 1 cr. 1-week practical training in cytogenetics & molecular diagnostics techniques.

MLT 480 Practical Training in Pathology; 1 cr. 1-week practical training in pathology.
Bachelor in Nursing (105 Credits)

Mission
The Bachelor in Nursing program is dedicated and committed to graduate competent nurses who respect cultural diversity, adhere to ethical and professional principles, and deliver high-quality nursing care in collaboration with other health care professionals to clients/patients, families in the community and in health care institutions. This is achieved by fostering quality education and embracing advances in the delivery and management of evidence-based health care vis-à-vis developing leadership, lifelong learning and research skills. Graduates of the program are prepared for entry into nursing profession as generalist nurses and are eligible to pursue graduate education in nursing or other health related field.

Program Educational Objectives
The objectives of the Bachelor in Nursing program are to:

a - Provide students with a comprehensive knowledge in biomedical and nursing sciences combined with adequate clinical training in different health care settings;
b - Promote safe and reliable nursing care at the primary, secondary and tertiary levels in terms of health promotion and maintenance, disease prevention and rehabilitation of health of individuals, families and groups within diverse cultural backgrounds;
c - Foster the appreciation and the implementation of nursing professional ethical values (compassion, moral integrity, honesty, accountability, etc.) that guide the nursing practice;
d - Develop critical thinking, problem-solving, management and leadership skills among students;
e - Cultivate student skills in personal and professional development in order to adapt to practice in a changing and complex health care environment;
f - Prepare students for lifelong learning and graduate education in nursing or other health related field;
g - Prepare graduates to pass national certification examinations.

Program Learning Outcomes
Upon graduation from the Nursing Program, our graduates will be able to:

1 - Integrate scientific and evidence-based knowledge in nursing care delivery. (POb a, POb b, POb c, POb d and POb g);
2 - Apply critical thinking and decision making in carrying out the nursing process through the nursing assessment, formulating diagnoses, planning interventions, implementing, and evaluating the outcomes of nursing care. (POb a, POb b, POb d and POb g);
3 - Demonstrate competency, dexterity, and confidence, and incorporate professional ethical and legal values into the practice of nursing. (POb a, POb b, POb c, PObb d, POb e, POb f and POb g);
4 - Communicate effectively with patients, families, communities and members of the healthcare team to achieve optimal outcomes of care. (POb a, POb b, POb c, POb e and POb f);
5 - Provide direct care, health promotion, disease prevention, rehabilitation and health education for individuals/groups/society that respect diversity in patient’s cultural background, religion, age, gender and socioeconomic circumstances. (POb a, POb b, POb c and POb d);
6 - Apply management principles as they relate to the nursing practice and assume a leadership role with clients, peers and health care colleagues. (POb a, POb c and POb d);

7 - Practice nursing with an awareness of changes in the environment affecting the nursing profession and the delivery of care. (POb a, POb b, POb d and POb e);

8 - Apply research methods and principles and collaborate in the implementation of research studies aimed at developing professional nursing practice. (POb a, POb d and POb f);

9 - Demonstrate responsibility, accountability for personal, professional growth and development and lifelong learning. (POb a, POb c, POb e and POb f).

**Free Electives**  
3 cr.  
Students are encouraged to take PES 348 or CSC 201
NUr 201 Fundamentals in Nursing (3.2); 4 cr. This course introduces basic concepts of the nursing profession. It uses the nursing process as the organizing framework. Concepts of health, nursing, client, & environment are integrated throughout. Students are also introduced to concepts and interventions basic to nursing practice. Performance of basic client care skills is emphasized, along with the rationale for health promoting and health restoring nursing interventions.

NUr 202 Nursing Concepts: Theory and Practice (1.0); 1 cr. The course offers an introduction to Nursing theory and practice emphasizing the principles of clinical procedures, the use of medical instruments and the various ways of handling patient care throughout the nursing care delivery.

NUr 203 Introduction to Bioethics (3.0); 3 cr. The course presents the basic principles and guidelines of bioethical issues. Moral problems arising in the delivery of health care are addressed within the ethical context.

NUr 204 Health Assessment across the Life Span (2.0); 2 cr. This course provides the student with the knowledge and skills needed to assess the physical, psychosocial and cultural health status of individuals from infancy to old age in order to identify normal and abnormal findings.

NUr 205 Nurse Patient Relationship (2.0); 2 cr. This course explores aspects of therapeutic communication skills in the nurse - patient relationship. The goal is to achieve a therapeutic professional outcome in the process of health care delivery. Moreover, the course brings insight and behavioral change in the exchange process.

NUr 206 Adult Health Nursing I - Clinical (0.6); 3 cr. Using the nursing process, this course gives the student the opportunity to apply in a clinical setting the concepts and principles stated in NUR301. Corequisite: NUR 301.

NUr 207 Pharmacology for Nursing (2.0); 2 cr. This course focuses on the study of basic concepts in pharmacology and introduces the student to the different
groups of therapeutic drugs used in professional nursing. It also introduces the role and responsibilities of the professional nurse in the administration of medication.

**NUR 308 Community and Public Health Nursing - Theory (2.0); 2 cr.** The course presents the theories and concepts of health care in the community, the different nursing roles in community health, and the various legal, social and environmental issues affecting community health.

**NUR 309 Community Health Nursing - Clinical (0.4); 2 cr.** The course focuses on individual, family and community responses to actual or potential health problems. Health promotion, disease prevention, and care of clients with long-term illness are addressed. The clinical nursing process is used to determine the appropriate intervention in cooperation with team workers. **Corequisite:** NUR 308.

**NUR 310 Legislation for Nursing (2.0); 2 cr.** This course provides an understanding of the legal issues related to the nursing profession, and gives the student awareness and discernment in the process of performance within the health system, especially in Lebanon.

**NUR 311 Adult Health Nursing I - Theory (4.0); 4 cr.** This course develops the knowledge and application of scientific principles in the care of adults presenting medical - surgical problems. It builds on the holistic approach to nursing care of the client through the application of the nursing process.

**NUR 312 Adult Health Nursing I - Clinical (0.12); 4 cr.** Using the nursing process, this course gives the student the opportunity to apply in a clinical setting the concepts and principles stated in NUR 311. **Corequisite:** NUR 311.

**NUR 319 Community and Public Health Nursing - Clinical (0.9); 3 cr.** The course focuses on individual, family and community responses to actual or potential health problems. Health promotion, disease prevention, and care of clients with long-term illness are addressed. The clinical nursing process is used to determine the appropriate intervention in cooperation with team workers. **Corequisite:** NUR 308.

**NUR 320 Legislation in Nursing (1.0); 1 cr.** This course provides an understanding of the legal issues related to the nursing profession, and gives the student awareness and discernment in the process of performance within the health system, especially in Lebanon.

**NUR 323 Adult Health Nursing II - Theory (2.0); 2 cr.** This course is a continuation of NUR 311 with an emphasis on dysfunctions related, among others, to metabolic, endocrine, neurologic, rheumatic and chronic conditions. **Prerequisite:** NUR 311.

**NUR 324 Adult Health Nursing II - Clinical (0.6); 2 cr.** Using the nursing process, this course gives the student the opportunity to implement the concepts stated in NUR 323 in a variety of settings. **Corequisite:** NUR 323.

**NUR 325 Critical Care Nursing - Theory (2.0); 2 cr.** This course emphasizes the care of clients with critical health problems such as cardiovascular and respiratory problems, neurologic disturbances, shock, sepsis, metabolic and endocrine imbalances, altered nutrition, renal failure, emergency and disaster nursing. **Prerequisite:** NUR 311.

**NUR 326 Critical Care Nursing - Clinical (0.6); 2 cr.** This course emphasizes the application of knowledge related to care of clients with critical health problems such as cardiovascular and respiratory problems, neurologic disturbances, shock, sepsis, metabolic and endocrine imbalances, altered nutrition, renal failure, emergency and disaster nursing in clinical settings. **Corequisite:** NUR 325.
NUR 400 E-Health (1.0); 1 cr. This course will introduce students to the field of health informatics. Nursing students will discover their role in implementing patient care in a context of advancing ICT. Students will critically evaluate health information systems and their role in patient safety, safe medication administration, maintenance of patient privacy, data security and efficacy of health care processes.

NUR 402 Obstetric Nursing - Theory (3.0); 3 cr. This course will focus on the nursing care of the woman during the maternity cycle and the care of the newborn, taking into consideration the physical, psychological and emotional needs of the woman during the pregnancy and post partum periods.

NUR 403 Obstetric Nursing - Clinical (0.9); 3 cr. The course emphasizes the implementation of the nursing concepts and process in maternal and neonatal care units. *Corequisite: NUR 402.*

NUR 404 Pediatric Nursing - Theory (3.0); 3 cr. This course presents theories and concepts associated with the response of children to acute and chronic illness. The emphasis is on the child’s growth and development in relation to illness. The impact of developmental variables from infancy to adolescence is integrated throughout the course.

NUR 405 Pediatric Nursing - Clinical (0.9); 3 cr. This course focuses on the application of the theory of pediatric nursing in the clinical process for a variety of settings, using the nursing interventions in the care of the children and their families to help them in coping with acute and chronic health problems. *Corequisite: NUR 404.*

NUR 406 Psychiatric and Mental Health Nursing - Theory (3.0); 3 cr. This course introduces the student to principles and concepts associated with psychiatric and mental health nursing, and to the care of individuals and families with acute and chronic mental health problems.

NUR 407 Psychiatric and Mental Health Nursing - Clinical (0.9); 3 cr. This course focuses on the application of the nursing process regarding the interventions in the clinical setting on patients suffering from acute and long-term mental health problems. Special emphasis is placed on assessing, planning, and establishing a nurse - patient therapeutic relationship in collaboration with the multi-disciplinary health team. *Corequisite: NUR 406.*

NUR 408 Leadership and Management in Nursing - Theory (3.0); 3 cr. The course will focus on the theories, concepts and modalities of leadership and management in nursing. It will assist the student in understanding the professional role of the nurse as a potential leader in various areas of health care.

NUR 409 Leadership and Management in Nursing - Clinical (0.9); 3 cr. The course will allow the student to make the transition from a dependent role as a student to a relatively independent role as a nurse-leader by observing, assisting and practicing the different modalities and skills of leadership and management in a variety of health care settings. *Corequisite: NUR 408.*

NUR 410 Nursing Research (3.0); 3 cr. The course introduces the student to the research scientific process and its application to nursing. Emphasis is placed on the basic research steps towards the assessment and evaluation of the data and the potential use of the findings.

NUR 411 Nursing Practicum I 1 cr. (0.3) This course provides students with opportunities to advance their nursing skills in a select clinical area.
Bachelor of Science in Nutrition and Dietetics

Degree Requirements (95 credits)

Mission
The mission of the NTR program is to prepare competent dietetics practitioners who will contribute to the enhancement of the health of the general population through provision of proper nutritional education and counseling, while demonstrating ethical standards. The program provides students with high quality education and supervised practical experience. In addition students are provided with opportunities for research, community service, and lifelong learning.

Program Educational Objectives
The objectives of the BS program are to:
   a - Prepare students to pass the licensure exam enabling them with qualifications to work in different professional settings;
   b - Equip students with adequate theoretical and research background to follow graduate studies in the fields of nutrition and food science;
   c - Provide students with skills to integrate technology and learned professional techniques into practice;
   d - Acquire leadership and efficient management qualities in graduates;
   e - Integrate ethical principles and lifelong learning in future professional practice.

Program Learning Outcomes
Upon graduation from the Nutrition and Dietetics Program, students shall be able to:

1 - Explain the interaction of the different chemical, biological, and microbiological sciences with nutritional science. (POb a H, POb b W);
2 - Appraise major and minor nutrients in relation to function, food source, deficiencies and toxicity in light of International nutrition guidelines and recommendations (POb a H, POb b W);
3 - Assess health status and plan diets of groups and individuals in health and disease using nutrition computer software and nutritional assessment techniques (POb aH, POb c H);
4 - Interpret evidence-based nutritional resources (POb b H);
5 - Accomplish effective dietetic counseling and thorough follow up of patients in different settings. (POb a H, POb c H, POb e H);
6 - Translate basic concepts of medical nutrition therapy for the different diseases into practical menu planning application and lifestyle changes (POb a H, POb c H);
7 - Demonstrate professionalism, ethics, effective communication and lifelong learning skills (POb e H, POb d W);
8 - Apply the different systems theory of food service management including HACCP and ISO22000 respecting standard regulations (POb a H, POb c H, POb d H);
9 - Conduct a complete nutritional care process for exercising individuals in various conditions (POb a H, POb c H, POb d W);
10 - Accomplish effective community nutrition skills ranging from program planning to evaluation in order to enhance wellness in diverse population groups (POb a H, POb b H, POb d H);
11 - Demonstrate skills in data collection, analysis, statistical evaluation, interpretation and dissemination of results. (POb b H);
12 - Review food processing and preservation technologies and their impact on nutrient retention and food quality. (POb a H, POb b H, POb c H).

Liberal Arts Curriculum 27 cr.

Category I. English and Arabic Communication 9 cr.

G. English Communication 6 cr.
ENL 213 Sophomore Rhetoric 3 cr.

NTR 210, NTR 227, NTR 313, NTR 320, NTR 321, NTR 325, NTR 330, NTR 335, NTR 425, NTR 430, NTR 435, NTR 440, NTR 441, NTR 450, NTR 460, NTR 470, NTR 495.

Free Electives 3 cr.
Students are encouraged to take NUR 307.

Dietetics Internship Certificate Program (6 credits)
The Dietetics Internship Program (DIP) - NTR 580 - is open to holders of BS in Nutrition and Dietetics interested in pursuing post-graduate hospital training primarily for the purpose of fulfilling eligibility criteria to sit for the National Colloquium Examination. The latter is a must for graduates in Nutrition and Dietetics to obtain the license to practice the profession of dietetics in Lebanon. The DIP gives the opportunity to accepted candidates to follow a supervised training for a period of 6 months at an affiliated hospital. Upon successful completion of training, applicants would be issued a certificate.

Minor in Nutrition (15 credits)
The Minor in Nutrition covers the composition of food, specific nutrients’ requirements in the diet, their physiological functions in the body and the consequences of food processing and nutrients deficiency.
The Minor in Nutrition is generally open to students majoring in Nursing, Medical Lab Technology, Biology, Chemistry, Hospitality Management and other business majors, Physical Education, Education, Psychology, and Communication Arts (Radio-TV).

Admission requirements
For admission requirements for the Minor in Nutrition, refer to the section entitled “General Rules and Regulations for Minors at NDU” of this catalog.

Graduation requirements
To satisfy the requirements of a Minor in Nutrition, a student must complete the following courses:
- NTR 201 or NTR 210;
- NHS 205;
- NTR 435;
- Two of the following courses: NTR 313, NTR 330, NTR 335 or NTR 450.

“D” is the passing grade for each course, and the minor should be completed with an overall GPA of at least 2.0/4.0.
NTR 101 Nutrition Concepts and Controversies (3.0); 3 cr. This course introduces students to fundamental concepts and principles of nutrition by exploring current nutritional issues of relevance to their lives. It will also provide students with insight to the evaluation of the nutritional information promoted in the news nowadays. The course will illustrate the six classes of nutrients: carbohydrates, lipids, proteins, vitamins, minerals and water, their basic functions, and their roles in the body.

NTR 201 Basic Human Nutrition (3.0); 3 cr. An introduction to the study of carbohydrates, fats, proteins, vitamins and minerals and their effects on health. An overview of the processes of digestion, absorption and their metabolism. Prerequisites: Sophomore Standing and ENL 105. Not open to students who took NTR 101.

NTR 210 Human Nutrition (3.0); 3 cr. Study of macro- and micro-nutrients and their roles in the body, as well as the nutritional needs of an individual throughout the lifespan. Passing grade for majors: C.

NTR 212 Food Sanitation and Safety (3.0); 3 cr. Food microbiology and food hygiene; causes of food poisoning and food-borne infections; prevention and safety. Prerequisite: NTR 201 or NTR 210.

NTR 215 Foods and Nutrition of World Cultures (3.0); 3 cr. The focus of the course is to enhance the student’s basic understanding of the cultural factors, which influence food intake and nutritional status. Food and diet patterns of various culture groups will be explored through lecture, food preparation, food sampling, and guest speakers.

NTR 227 Nutritional Biochemistry (3.0); 3 cr. General biochemistry, with emphasis on the biochemical functions of nutrients and their metabolism. Prerequisites: BIO 211, NTR 210. Corequisite: CHM 213.

NTR 313 Foodservice Management (3.0); 3 cr. The course focuses on planning and service of safe, nutritionally balanced meals within budgetary margins as well as technical operations in a foodservice system. It includes regulations and standards, and the basics of total quality management in health care and other institutions. Prerequisite: NTR 201 or NTR 210. Passing grade for majors: C.

NTR 320 Food Chemistry (2.0); 2 cr. Covers chemical composition, physical and sensory properties of foods. Focuses on the structural considerations of food components (water in foods, lipids, carbohydrates and proteins), chemicals in foods, browning reactions and flavor of foods. Prerequisite: CHM 213.

NTR 321 Food Microbiology (3.2); 4 cr. A study of microorganisms with emphasis on food spoilage, food poisoning, and the control of pathogenic microorganisms in food. Prerequisite: BIO 211.

NTR 325 Food Analysis (1.2); 2 cr. Introduces the laboratory methods for chemical analysis of nutrients and chemicals in food products. Prerequisites: CHM 205, CHM 270. Corequisite: NTR 320.

NTR 330 Community Nutrition (3.0); 3 cr. Focuses on community nutrition education programs in schools, health centers, government institutions, and mass media. Emphasis on current research in assessing community nutrition program needs as well as program implementation. Prerequisite: NTR 201 or NTR 210. Passing grade for majors: C.

NTR 335 Sports Nutrition (3.0); 3 cr. In-depth coverage of both nutrition and exercise physiology while delivering practical, applied information useful to provide dietary and training guidelines for different kinds of sports. Prerequisites: NTR 210, NHS 205.

NTR 425 Food Processing (2.2); 3 cr. Covers the changes in basic constituents
of foods (carbohydrates, lipids, proteins, vitamins, minerals, food enzymes, and water) resulting from processing and preparation. Focuses on the principles of food spoilage and food preservation, and the different laboratory methods of food processing. **Prerequisite:** NTR 320.

**NTR 430 Advanced Human Nutrition (3.0); 3 cr.** Covers human physiological needs for energy requirements; body needs from food groups such as carbohydrates, proteins and fats; control of nutrient metabolism; and methods of the nutritional assessment. **Prerequisites:** NTR 227, NHS 205. **Passing grade:** C.

**NTR 435 Nutrition in the Life Cycle (3.0); 3 cr.** Covers the basic nutritional needs of people throughout their life cycle (infancy, childhood, adolescence, adulthood and elderly people) and the special nutritional requirements during pregnancy and lactation. **Prerequisites:** NTR 210, NHS 205. **Passing grade for majors:** C.

**NTR 440 Therapeutic Nutrition (3.2); 4 cr.** Covers the nutritional needs of individuals throughout their life cycle and in various diseases. Provides the students with an understanding of how nutritional status is assessed in relation to health and disease at the individual and community levels by covering case studies reports and study modules. **Prerequisite:** NTR 430. **Passing grade:** C.

**NTR 441 Special Topics in Therapeutic Nutrition (2.0); 2 cr.** Outlines medical nutrition therapy of selected metabolic, respiratory and neurological diseases, cancers, and food allergies. Also outlines nutritional care during pregnancy and lactation. **Prerequisite:** NTR 430. **Passing grade:** C.

**NTR 445 Introduction to Dietetics Profession (2.0); 2 cr.** Reviews basic skills needed by the dietician including nutritional care, ethics, role and responsibilities in various employment settings. **Prerequisite:** Senior Standing.

**NTR 450 Dietetics Counseling and Communication (3.2); 4 cr.** Application of the principles of dietetics counseling in hospital and clinical settings. Focuses on the techniques of behavior modification, counseling, and dietary intake evaluation. Emphasis on the team concept of patient care and strategies for promoting change in nutritional education. **Prerequisite:** Senior standing. **Passing grade:** C.

**NTR 452 Dietetics Counseling and Communication (3.0); 3 cr.** Application of the principles of dietetics counseling in hospital and clinical settings. Focuses on the techniques of behavior modification, counseling, and dietary intake evaluation. Emphasis on the team concept of patient care and strategies for promoting change in nutritional education. **Prerequisite:** Advisor’s approval. **Passing grade for majors:** C.

**NTR 470 Dietetics Counseling and Communication Lab (0.2); 1 cr.** Covers anthropometric measures techniques and dietary intake evaluation and computations as well as individualized practical nutritional evaluation and dietary intervention of a selected patient. **Corequisite:** NTR 450.

**NTR 460 Therapeutic Nutrition Practicum (1.3); 2 cr.** Case study evaluation of selected topics in advanced therapeutic nutrition and related current pertinent research. **Prerequisite:** NTR 450. **Corequisite:** NTR 440. **Passing grade:** C.

**NTR 495 Project in Nutrition; 3 cr.** Emphasizes current research in nutrition and dietetics. **Prerequisites:** Senior standing and consent of instructor.

**NTR 580 Dietetics Internship; 6 cr.** Supervised dietetic training for a period of 6 to 9 months at an affiliated hospital. **Prerequisite:** BS in Nutrition & Dietetics.
Undergraduate Faculty Courses

HEA 201 Health Awareness (3.0); 3 cr. Comprehensive prevention-oriented approach to personal health topics: stress management, mental health, physical fitness, nutrition and weight control, human sexuality, communicable and chronic diseases, addictive substances and personal safety.

HEA 204 Contemporary Health Issues (3.0); 3 cr. This course intends to provide students with the latest information on major current health issues and to teach them skills for them to be able to critically evaluate it. It covers selected quality and timely articles on a variety of health topics written by authors with diverse educational backgrounds and expertise. Prerequisite: Sophomore-standing.

NHS 203 Principles of Epidemiology (3.0); 3 cr. An integrated course that introduces the basics in Epidemiology and Biostatistics. Topics include population measures of mortality and morbidity, epidemiological study designs and concepts such as sources of bias, confounding and effect measure modification and ethics in clinical trials and research. Methods of presenting health-related data, probability models and assessment of causal associations and differences are also covered. Special attention is given to the Lebanese context.

NHS 204 Anatomy for Nursing and Allied Health Professions (3.0); 3 cr. Covers gross normal structure of human body organ systems; accompanies “Physiology for Nursing and Allied Health Professions”.

NHS 205 Physiology for Nursing and Allied Health Professions (3.0); 3 cr. Provides an understanding of the basic principles of human body’s functioning under normal healthy conditions necessary for nursing and allied health professions’ students. It outlines principles of physiology along with a survey of various body systems (homeostasis; metabolism; nervous, muscular, cardiovascular, respiratory, gastrointestinal, renal, reproductive and endocrine systems). It serves as a foundation for the clinical topics covered in health sciences programs.
The Degree of Master of Science in Food Safety and Quality Management

Mission
The new Master of Sciences in Food Safety and Quality Management aims to provide graduates with advanced knowledge, skills and hands-on practices necessary for managing food safety and quality from farm to fork. This program is designed for graduates and professionals working or aspiring to work in the food chain as well as government sectors. It prepares graduates to be well equipped individuals ready to become managers and leaders with high ethical standards and lifelong learning skills.

Program Objectives
The objectives of the M.Sc. in FSQM program are to:

- a - Provide information, training and expertise in the design and management of food safety and quality management systems against the backdrop of an increasingly globalized food chain;
- b - Provide graduates with knowledge on national and international food safety and quality standards, laws and regulations;
- c - Acquire the knowledge and skills required for planning, organization, leading and assessing quality in the food chain;
- d - Equip graduates with strong research and technical competencies allowing them to respond to food safety challenges in a practical set-up and/or to pursue further doctoral studies;
- e - Prepare the students to work as managers/leaders in different food related work environments;
- f - Integrate ethical principles, leadership skills as well as lifelong learning in the graduate’s future professional practice.

Program Learning Outcomes
Upon completion of the M.Sc. program in FSQM, graduates will be able to:

1 - Master appropriate methodologies and analytical techniques in the assessment of the food safety and quality, using both current and rapid technologies (POb d W, POb b W, POb a H);
2 - Critically evaluate the Lebanese and complex international legislative framework in which the food chain operates (POb b H, POb d W);
3 - Assess, analyze and manage risks associated with food hazards in a changing and developing environment (POb a H, POb b H, POb e W);
4 - Develop and implement quality assurance procedures in the food chain traceable to national and international standards and requirements (POb c H, POb b H, POb a W);
5 - Evaluate various local food industries and food service establishments though field trips and on-site observations (POb c H, POb e W);
6 - Exhibit effective communication skills and enhanced critical problem-solving through role-play and peer feedback (POb e H);
7 - Employ the process approach in a business setting which incorporates the Plan-Do-Check-Act (PDCA) cycle and risk-based thinking (POb a H, POb d W, POb e W);
8 - Estimate the importance of establishing key performance indicators (KPIs) in quality management as a measurement of continuous improvement (POb b H, POb e H, POb c H);
9 - Critically integrate and apply scientific literature and pertinent research methodology in the assessment and improvement of food safety and quality
management in different food industries and other related settings (POb d H, POb c H, POb e W);

10 - Translate different professional competencies such as leadership, professional ethics, teamwork, written and oral communication as well as lifelong learning into the implementation of the food quality management system (POb e H, POb f H, POb b W);

Graduation Requirements
To satisfy the requirements for the degree of MS in Food Safety and Quality Management, the student must complete a total of 36 credits with an overall average of at least 3.0/4.0. The distribution of credits per option is as follows:

1- **Non-thesis option (Applied MS or Course-work option):**
   a - Required courses: 30 credits
   b - Elective courses: 6 credits

2- **Thesis option:**
   a - Required courses: 24 credits
   b - Elective courses: 6 credits
   c - Thesis: 6 credits

The Thesis option provides the necessary background and research experience; this option is more appropriate for students planning to pursue a PhD. The course-work option is designed to provide a broader background in Food Science and is more appropriate for students planning to join the market place. Additional courses may be taken in nutrition, management and biostatistics.

Degree Requirements (Non-Thesis Option) (36 Credits)

1- Complete the following eleven required courses 30 cr.
   NTR 642, FQM 643, FQM 644, FQM 650, FQM 656, FQM 660, FQM 664, NTR 670, FQM 681, FQM 682, FQM 690, HEA 610

2- Complete 2 courses from the following list of major elective courses 6 cr.
   NTR 620, NTR 641, HEA 601, POM 604, BAD 606

Degree Requirements (Thesis Option) (36 Credits)

1- Complete the following nine required courses 24 cr.
   NTR 642, FQM 643, FQM 644, FQM 650, FQM 656, FQM 660, NTR 670, FQM 681, FQM 682, HEA 610

2- Complete 2 courses from the following list of major elective courses 6 cr.
   NTR 620, NTR 641, HEA 601, POM 604, BAD 606

3- Complete the MS thesis requirements 6 cr.
   FQM 691, FQM 692
Graduate Courses: Food Safety & Quality Management

FQM 643: Risk Assessment of Foods (3.0); 3 cr. This course details the hazard identification, hazard characterization, exposure assessment, and risk characterization in the food industry. Case studies from Lebanon will be presented and emphasis will be placed on executing a risk assessment study in a selected local food industry.

FQM 644: Advanced Food Product Development (3.0); 3 cr. The course integrates knowledge gained in prior courses and provides an opportunity for students to utilize their knowledge in the conceptualization and development of new food product.

FQM 650: Research Methods in Food Safety and Quality Management (3.0); 3 cr. The course details the research techniques adopted in food safety & quality management research with human population groups. Research designs used in animal experimental stations will be covered. Emphasis will be placed on criticism of research designs, sampling techniques, measurement and analysis issues, and validity of results.

FQM 656: Advanced Food Quality Management (3.0); 3 cr. The course details the total quality management principles & their application in ensuring product quality & safety. Development of food safety programs such as HACCP and ISO 22000 & auditing of these will be covered. International & national food regulatory systems along with the development and the scientific basis for food regulations will be examined.

FQM 660: Special Topics (1.0); 1 cr. The course covers directed readings by the instructor of present food safety and quality management knowledge provided by the most recent refereed journal publications.

FQM 664: Applied MS Practicum (0.3) 3 cr. The student will be placed in a food industry practicum setting following which a comprehensive written report shall be submitted.

FQM 681: Seminar I (0.1); 1 cr. A recent topic in food safety and quality management will be presented by MS students with critical analysis of the methods and data reported in refereed original articles following the approval of the instructor.

FQM 682: Seminar II (0.1); 1 cr. A recent topic in food safety and quality management will be presented by MS students with critical analysis of the methods and data reported in refereed original articles following the approval of the instructor. Prerequisite: FQM 681.

FQM 690: Research Project (0.3); 3 cr. The student prepares a review paper of the literature on a recent topic in food safety and quality management following the approval and continuous supervision of the instructor.

FQM 691: MS Thesis I (0.3); 3 cr. Independent research guided by a supervisor toward completing the requirements of the MS thesis; Research Proposal.

FQM 692: MS Thesis II (0.3); 3 cr. Independent research guided by a supervisor toward completing the requirements of the MS thesis; Thesis Research. Prerequisite: FQM 691.
Mission
The mission of the MS in Human Nutrition is to advance nutrition research and dietetics practice in Lebanon through an intellectually stimulating training, tailored mentorship and advanced course work. The program provides a strong scientific foundation in nutrition, tied with hands-on experience in relevant areas of nutrition research and practice. The program aims at advancing critical thinking and problem solving skills in graduates, which enable them to respond to rising nutrition and health concerns. It strives to promote in students a strong commitment to ethical standards, lifelong learning, multidisciplinary collaboration, effective evidence-and theory-based nutrition care and education to individuals and communities.

Program Educational Objectives
The objectives of the MS in Human Nutrition program are to:

a - Equip graduates with strong research competencies, gained through personalized and enlightened mentorship, required to pursue doctoral studies;

b - Develop life-long learner graduates who are able to deliver optimal individualized nutritional plans and community intervention programs through maintaining up-to-date knowledge and applying research findings in practice;

c - Prepare graduates to progress to advanced level of practice in clinical and community and food service setting through diversified coursework and extensive research training;

d - Acquire critical thinking, leadership, teamwork and communication skills to optimize a graduate’s professional development while upholding high ethical standards;

e - Prepare graduates to be pioneers in responding to emerging nutrition, health and food issues affecting the national and global communities.

Program Learning Outcomes
Upon completion of the program, graduates of the MS in Human Nutrition Program will be able to:

1 - Integrate scientific literature critically and theoretical knowledge in assessment and improvement of the nutritional status of individuals and communities along the food supply chain. (POb b H, POb e H);

2 - Conduct appropriate methodology and analytical techniques, in the context of community nutrition, clinical nutrition and food science settings. (POb a H, POb c H);

3 - Demonstrate culturally oriented communication and counseling competencies, needed in nutrition practice. (POb d H and POb e H);

4 - Acquire professional competencies such as leadership, teamwork, written, oral and communication as well as life-long learning; while upholding high ethical standards. (POb b H, POb c H, POb d H and POb e W);

5 - Develop pertinent research methodology to be applied in the context of community nutrition, clinical nutrition and food science settings. (POb a H and POb c H).
Admission Requirements

- **BS in Nutrition or a related field of study:** If the applicant has a BS in any health science background other than Nutrition, he/she will have to complete 9-12 credits of undergraduate nutrition courses and earn a minimum cumulative GPA of 3.0/4.0 in these courses.

- **Cumulative GPA:** A GPA of 3.0/4.0 is required, but GPA 2.7-2.99 will be conditionally accepted pending completion of 9-12 credits of courses in the areas of identified deficiencies and earning a minimum cumulative GPA of 3.0/4.0 in these courses.

- **English Communication Skills:** Applicants from institutions where English is not the language of instruction will be required to sit for either the NDU English Entrance Test or TOEFL.

- **Interview:** Applicants whose undergraduate degree is not from NDU may be asked for an interview by the Faculty.

Candidates may pursue either a thesis (MS with research) or a non-thesis (Applied MS with considerable course work) program of study. Candidates can do research in the areas of nutrition and psychology, biochemistry, clinical nutrition, sports nutrition, or public health nutrition.

Graduation Requirements

To satisfy the requirements for the degree of MS in Human Nutrition, the student must complete a total of 35 credits with an overall average of at least 3.0/4.0. The distribution of credits per option is as follows:

1- **Non-thesis option (Applied MS or Course-work option):**
   a. Required courses: 26 credits
   b. Elective courses: 9 credits

2- **Thesis option:**
   a. Required courses: 20 credits
   b. Elective courses: 6 credits
   c. Thesis: 9 credits

The Thesis option provides the necessary background and research experience; this option is more appropriate for students planning to pursue a PhD. The course-work option is designed to provide a broader background in Nutrition and is more appropriate for students planning to join the market place. Additional courses may be taken in biology, education, and biostatistics.
Degree Requirements (Non-Thesis Option) (35 credits)

1- Complete the following ten required courses (26 credits): NTR 650, NTR 651, NTR 652, NTR 653, NTR 655, NTR 665, NTR 681, NTR 682, NTR 690, HEA 610.

2- Complete 9 credits from the following list of courses: NTR 620, NTR 630, NTR 633, NTR 635, NTR 641, NTR 642, NTR 660, NTR 670, HEA 601.

3- Pass one written comprehensive examination: The examination shall be conducted after having completed required courses (other than NTR 665 and NTR 690), with an overall average of 3.0/4.0.

Degree Requirements (Thesis Option) (35 credits)

1- Complete the following eight required courses (20 credits): NTR 650, NTR 651, NTR 652, NTR 653, NTR 670, NTR 681, NTR 682, HEA 610.

2- Complete 6 credits from the following list of elective courses: NTR 620, NTR 630, NTR 633, NTR 635, NTR 641, NTR 642, NTR 655, NTR 660, HEA 601.

3- Complete the MS thesis requirements (9 credits): NTR 691, NTR 692, NTR 693.
Graduate Courses: Nutrition

NTR 620 Nutrition Psychology (3.0); 3 cr. The course explores the relationship between nutrition and psychology, and the characteristics of human behavior that affects people dietary patterns. It covers the biological, emotional, cognitive and environmental functions in dietary adherence. Proficient methods of counseling patients and encouraging changes will be emphasized.

NTR 630 Integrated Metabolic Regulation (3.0); 3 cr. The course provides recent knowledge in metabolic regulation in cells and tissues. Emphasis will be placed on relevant endocrine organs and hormones, mechanisms involved in metabolic regulation, integration of macronutrients metabolism, the nervous system involvement in metabolism, diabetes mellitus, lipoproteins metabolism, and energy balance and body weight regulation.

NTR 633 Community and Public Health Nutrition (3.0); 3 cr. This course covers the broad range of community nutrition research, programs and policies in the world and Lebanon. It addresses the nutrition and health issues facing today’s communities in all the different categories of settings. Students will become familiar with nutrition-related community-based research and programs.

NTR 635 Nutrition in Sports (3.0); 3 cr. The physiology of exercise, macronutrient and micronutrient requirements, and fluid needs of athletes engaged in all forms of sports will be presented. The course also covers gender specific requirements, appropriate dietary habits pre/post exercise, and the recent knowledge on the role of potential ergogenic aids.

NTR 641 Herbs, Foods and Phytochemicals (3.0); 3 cr. This course covers the health risks and benefits of herbal medicines and food phytochemicals use. The active ingredients of the different herbs and their mode of action along with the clinical applications will be presented.

NTR 642 Food and Nutritional Toxicology (3.0); 3 cr. This course examines potential chemicals in food known to produce adverse effects on human health. It covers the impact of food containing environmental contaminants or natural toxicants, food additives, chemicals in food packaging and nutrient excesses and malnutrition on nutrient metabolism.

NTR 650 Research Methods in Human Nutrition (3.0); 3 cr. The course details the research techniques adopted in nutrition research with human population groups. Research designs used in animal experimental stations will be covered. Emphasis will be placed on criticism of research designs, sampling techniques, measurement and analysis issues, and validity of results. Prerequisite: HEA 610.

NTR 651 Advanced Macronutrients Nutrition and Metabolism (3.0); 3 cr. Advanced discussion of carbohydrates and dietary fibers, lipids, protein, and alcohol nutrition and metabolism.

NTR 652 Advanced Micronutrients Nutrition and Metabolism (3.0); 3 cr. Advanced discussion of the nutritional, biochemical, and physiological aspects of vitamins and minerals in humans.

NTR 653 Advanced Nutrition throughout the Lifecycle (3.0); 3 cr. In-depth discussion of the recent scientific developments in nutrient requirements and related disorders during the different stages of the human life along with the controversial issues present in the literature. Prerequisite: HEA 651.

NTR 655 Advanced Medical Nutrition Therapy (3.0); 3 cr. This course provides
an in-depth study of the nutrition-related diseases which affect physiological function and the pathological disorders which result in nutritional disease. The emphasis will be on the following areas: endocrinology, metabolism, gastroenterology and hepatobiliary, cardiovascular, and nephrology. Advisor Consent: NTR 651, NTR 652.

NTR 660 Special Topics (3.0); 3 cr. The course covers directed readings by the instructor of present nutritional knowledge provided by the most recent refereed journal publications.

NTR 665 Applied MS Practicum (0.3); 3 cr. The student will be placed in a clinical, community or foodservice practicum setting following which a comprehensive written report shall be submitted.

NTR 670 Techniques in Nutrition Research (1.4); 3 cr. A series of laboratory modules emphasizing quantitative and qualitative methods and experimental analysis used in nutrition research and sensory evaluation of food. The modules entail lab preparations or method applications in field settings, data collection and analysis, and interpretation in a comprehensive written report. Instrumentation and relevant software utilization will be emphasized.

NTR 681 Human Nutrition Seminar I (0.1); 1 cr. A recent topic in nutrition will be presented by MS students with critical analysis of the methods and data reported in refereed original articles following the approval of the instructor.

NTR 682 Human Nutrition Seminar II (0.1); 1 cr. A recent topic in nutrition will be presented by MS students with critical analysis of the methods and data reported in refereed original articles following the approval of the instructor. Prerequisite: NTR 681.

NTR 690 Research Project (0.3); 3 cr. The student prepares a review paper of the literature on a recent topic in nutrition following the approval and continuous supervision of the instructor.

NTR 691 Human Nutrition MS Thesis I (0.3); 3 cr. Independent research guided by a supervisor toward completing the requirements of the MS thesis; Research Proposal.

NTR 692 Human Nutrition MS Thesis II (0.3); 3 cr. Independent research guided by a supervisor toward completing the requirements of the MS thesis; Thesis Research. Prerequisite: NTR 691.

NTR 693 Human Nutrition MS Thesis III (0.3); 3 cr. Independent research guided by a supervisor toward completing the requirements of the MS thesis; Thesis writing up. Prerequisite: NTR 692.
Graduate Courses: Nutrition

**HEA 601 Introduction to Public Health (3.0); 3 cr.** This course provides an introduction to public health. Topics include: scope and core disciplines of public health, core functions and essential services of public health, determinants of health, approaches to health intervention, values and ethics of public health, and current issues in public health.

**HEA 610 Essentials of Epidemiology and Biostatistics (3.0); 3 cr.** This course provides basic principles of epidemiology and bio-statistics. It covers definition of epidemiology, types and sources of epidemiological data, epidemiological study designs, data analysis and methods of statistical inference.
