GAUDIUM DE VERITATE

Ghassan M . Kraidy
Assistant Professor
O: S20.07
T: 09.218950, Ext. 2937
E: gkraidy@ndu.edu.lb

Biography

Ghassan M. Kraidy received his B.E. degree in Computer and Communication Engineering from Notre Dame University, Zouk Mosbeh, Lebanon, in 2001, and the M.Sc. degree in Communication Engineering and the Doctorate degree in Communications and Electronics from the Ecole Nationale Supérieure des Télécommunications (ENST) in Paris, France, in 2003 and 2007, respectively. In October 2007, he joined the Digital Communications Laboratory at the Atomic Energy Commission (CEA-LETI), Grenoble, France, as a research engineer, where he was involved in several French and European research projects on subjects related to error correction algorithms. In January 2009, he joined the Department of Electronics and Telecommunications at the Norwegian University of Science and Technology (NTNU), Trondheim, Norway, where he conducted research on interference-limited wireless systems and wireless sensor networks within Scandinavian and European projects. In October 2010, he joined the Department of Electrical, Computer, and Communication Engineering at Notre Dame University as an Assistant Professor. His research interests are error correcting codes, multiple-antenna systems, and wireless cooperative networks.
