Biography

I am an observational astrophysicist. My research interests include the chemical composition of stars in open clusters and in the field, rotation of A stars, peculiar stars, binary stars, synthetic spectra and model atmospheres. I am also interested in the determination of fundamental parameters of F and A stars. I got my PhD from Université de Montpellier II in 2007 where I worked on the Chemical composition of A/F stars in open clusters. From 2008 till 2010 I was a postdoctoral fellow at the University of Barcelona working on the calibration of the Gaia space telescope. I am a member of: the POLLUX team (<http://pollux.graal.univ-montp2.fr/>); The Gaia ESO Survey (node in the Working Group WG 13); The WEAVE science team.
