JOB POSTING REQUEST FORM

- Develop advanced knowledge in supply chain and logistics to provide adequate advice to customers.
- Manage client relations by providing technical support, suggesting functional enhancements and delivering other customer services.
- Develop positive working relationships with clients and internal support resources.
- Recognize and suggest potential customizations and operational development for client's current business operations.
- Build integration to 3rd party systems and devices.
- Complete system installations as required.
- Conduct Technical trainings to SNS customers. **Prerequisites**
- Bachelor's degree in computer science, Engineering or related field.
- Very high ethics and strong values.
- Excellent written and verbal communication skills.
- Ability to communicate effectively in English.
- Ability to travel up to 50% yearly.
- When installing and traveling to client site, most work is done in a warehouse. At this time, general mobility with capability to climb, crawl and maneuver in restrictive areas may be necessary.
- Ability to work alone and in team/cooperative development efforts.
- Willingness to work overtime.

Technical Prerequisites

- Knowledge of Java, C++, .Net and SQL (Oracle or SQL Server) in a UNIX or Windows environment.
- Knowledge of UNIX or Windows operating systems.
- Experience in software solutions and life cycle.
- Knowledge of Supply Chain Systems such WMS or TMS is a major plus.
