MESSAGE FROM THE PRESIDENT

I am pleased to highlight this year the new academic curricula, either amended or introduced, for our degree programs as of 2008-2009. This is the outcome of a long term review and update along the academic development scheme taking place at our University.

The new general education requirements (GER) program is marked by two basic features: 1) it responds to the liberal arts educational philosophy, and 2) it enlarges the pool of choices within different areas of knowledge at the undergraduate level. New educational and intellectual concerns have been added to the wide spectrum of courses offered under this program. The idea is to give a chance for our students to learn and interact on cultural studies, covering issues related to religion, philosophy, literature, human thought, and art. Under Social studies courses, now cover a new range of topics including democracy and human rights, dialogue of civilizations, history and political science. Similar choices are given under the basic sciences. The new GER program takes into consideration the formation of the student as a whole human being ready to grasp knowledge in its all-round aspects.

Another new academic step forward: this is the first year NDU introduces minors as part of its academic programs. Now every Faculty offers a number of minors for students of other majors interested in a further study parallel or complementary to their major. Minor programs offer additional courses totaling between 12 and 18 credits for interested students. This program aims as well at shaping the whole personality of the student before graduation by offering an opportunity to concentrate on an adjacent sub-major of the student's personal choice.

Finally it is worthwhile mentioning, along these lines that this year NDU took the initiative of launching a Doctorate program in Education in collaboration with Saint Louis University in the U.S.A. The purpose of this academic endeavor is to provide the opportunity to interested students to pursue the doctorate degree in administrative education based on the American system of higher education.

With the abovementioned new academic programs NDU keeps striving for excellence on its long road of continuing growth and development..

Fr. Walid Moussa, S.T.D.
President

UNIVERSITY DIRECTORY 2009-2010

BOARD OF TRUSTEES

Chairperson

Most Reverend Abbot Semaan Abou Abdo,
Superior General of the Maronite Order of the Holy Virgin Mary

Vice-Chairperson

Dr. Georges Abou Jaoudé,
Former Officer-in-Charge of the United Nations and UNDP Resident Representative in Lebanon

 Dr. Farid Younes

Office of Public Relations

Mr. Suheil Matar, *Director General, Public Relations and Information*

Miss Suzanne Saadeh, *Administrative Assistant*

Miss Nada Saad, *Assistant Director*

Press Office

Miss Ghada Moawad, *Press Attaché*

Museum

Mrs. Caline Saadeh-Abi Saad, *Museum Aide*

Placement Office

Miss Nathalie Chelala, *Placement Officer*

Internship Office

Miss Rita Orfali, *Internship Officer*

Alumni Affairs Office

Mr. Simon Abou Jaoude, *Director*

Mrs. Rose Madi, *Administrative Assistant*

Office of Administration

Fr. Roger Chikri, *Director of Administration*

Mrs. Viviane Tarabay Abi Nader, *Administrative Assistant*

Mrs. Colette Errou, *Clerical Assistant*

Mrs. Najat Azar, *Assistant Director for Staff Quality Management*

Mrs. Amale Hajj, *Administrative Archive*

Human Resources Office

Mr. Nabil Saber, *Manager*

Mrs. Pia Saadeh El-Khoury, *Secretary*

Mr. Joseph Azzi, *NDU's Representative to the National Social Security Fund*

Mr. Pierre Ghosn, *NDU's Representative to the Insurance Company*

Maintenance Office

Mr. Gaby Saliba, *Maintenance Supervisor*

Mr. Edward Nakhle, *Maintenance Coordinator*

Mr. Jean Eid, *Maintenance Worker*

Mr. Rizkallah Daccache, *Maintenance Worker*

Mr. Joseph Bou-Nassif, *Maintenance Worker*

Mr. Sleiman Merhij, *Maintenance Worker*

Mr. Micheal Tannous, *Maintenance Worker*

Mr. Charbel Sleiman, *Maintenance Worker*

Purchasing Office

Mr. Charbel Hajj, *Assistant Director of Administration for Purchasing*

Miss Claire Habballah, *Secretary*

Mr. Khattar Hajj, *Office Assistant*

Inventory Control Office

Mr. Charbel Abi-Nakhoul, *Inventory Control Officer*

Mr. Ghassan Khalil, *Inventory Control Coordinator*

Receiving Office

Mr. Charles Abi Nader, *Receiving Officer*

Mr. Joseph Mghames, *Stock Keeper*

Landscaping Office

Fr. Elie Sfeir, *Associate Director of Administration for Landscaping*

Mr. Nemer Ghanem, *Gardener*

Mr. Youssef Antoun, *Gardener*

Mr. Nabil Abi-Zeid, *Gardener*

Mr. Jihad Kazan, *Gardener*

Mr. Salim Ishak El-Saiid, *Gardener*

General Services Office

Miss Amal Ghsoub, *Services Worker*

Miss Josephine Ghsoub, *Services Worker*

Mr. George Tahtah, *Services Worker*

Mrs. Fatima Arafat, *Services Worker*

Mr. Marwan Arafat, *Services Worker*

Classroom Services and General Cleaning Office

Fr. Adib Ghossain, *Associate Director of Administration for Classrooms Services and General Cleaning*

Mrs. Rita Eid-Sawaya, *Secretary*

Mr. Chawki Eid, *Assistant to the Director of Administration for Evening and Classroom Services*

Mr. Naji Tabet, *Office Assistant*

Mr. George Fahed, *Services Worker*

Mr. Naja Abi Nakhoul, *Services Worker*

Mr. Asaad Wheibe, *Services Worker*

Mr. Elie Yammine, *Services Worker*

Mail Office

Mr. Mansour Abi-Aoun, *Mail Clerk, Lead*

Mr. Assaad Jabbour, *Mail Clerk*

Transportation Office

Mr. Hanna Keraoun, *Driver*

Mr. Maroun Mhanna, *Driver*

Mr. Jack El Bayeh, *Driver*

Mr. Jean Zakhia, *Driver*

Mr. Samir Salameh, *Driver*

Telephone Services

Mrs. Mary Al-Achkar, *Information Desk*

Construction Office

Fr. George Darwiche, *Associate Director of Administration for Construction*

Mr. Sami Zoghbi, *University Engineer*

Office of Finance

Fr. Bechara Khoury, *Director of Finance*

Sponsorship Office

Miss Jocelyne Issa, *Sponsorship Coordinator*

Business Office

Mr. Elias Saadeh, *Director*

Mrs. Cynthia Sfeir, *Head Accountant*

Miss Andrée Kahy, *Accountant*

Mrs. Marcelle Kosseify, *Accountant*

Office of the Registrar

Mrs. Lea Eid, *Registrar*

Miss Mirna Nehme, *Associate Registrar*

Miss Roula Hakim, *Assistant to Registrar*

Mrs. Nisrine Merhej, *Academic Record Officer*

Mrs. Dunia Baradhi, *Academic Services Officer*

Mrs. Claudine Fahed, *Registrar's Office Archive*

Office of Admissions

Dr. Viviane Naimy, *Director*

Mr. Farid Haykal, *Assistant Director of Admissions*

Mrs. Pascale Abi Rizk-Khalil, *Admissions Officer*

Mrs. Karine Saadeh, *Admissions Officer*

Mr. Mario Kozaily, *Admissions Assistant*

Mrs. Mirna Waked-Sfeir, *Administrative Assistant*

Mrs. Aline Jabbour, *Office Assistant*

Office of Tests, Measurement & Evaluation

Dr. Viviane Naimy, *Director*

Mrs. Christine Abou Khalil-Gabriel, *Administrative Assistant*

Student Affairs Office

Fr. Salim El-Rajji, *Director*

Dr. Ziad Fahed, *Assistant Director*

Mrs. Reine K.-Gunstone, *Administrative Assistant-Students Life*

Mrs. Joceline Chidiac Jade, *Administrative Assistant*

Financial Aid Office

Mrs. Eliane Harfouche-Khoury, *Financial Aid Officer*

Mrs. Jessica Saba, *Social Worker*

National Social Security Office

Mrs. Sana El-Khoury, *Representative to the National Social Security*

Counseling Services

Dr. Marie Khoury, *Counselor*

Athletic Office

Mr. George Nader, *Head*

Mr. Elias Boutros, *Sports Officer*

Mr. Joseph Matta, *Services Worker*

Activities Office

Miss Karla Sfeir, *Students Activities Coordinator*

Health Services

Dr. Elias Chemaly, *University Physician*

Mrs. Dolly K. Awad, *University Nurse*

Miss Mary Kosseify, *Medical Laboratory Technician*

Community Service Office

Mr. Majed Bou-Hadir, *Community Service Officer*

Facilities Office

Mr. Sayed Ghossain, *Assistant Director for Students Facilities-SAO*

Mrs. Carol Habchi, *Secretary*

Mr. Pierre Khallouf, *Dorms Keeper*

Mrs. Nisrine Souaid, *Front Desk Clerk, Dorms*

Mr. Assaf Assaf, *Night Staff, Dorms*

Mr. George Khatochyan, *Night Staff, Dorms*

Mr. Tony Nakhle, *Front Desk Clerk, Dorms*

Mr. George Mghayar, *Front Desk Clerk, Dorms*

Mr. Alain Sayyah, *Front Desk Clerk, Dorms*

The Library

Mrs. Leslie Alter-Hage, *Director of the University Libraries*

Miss Elite Feghali, *Administrative Assistant*

Miss Itab Chebli, *Library Assistant*

Acquisitions Department

Mrs. Roula Awad-Harb, *Head*

Miss Antoinette Kattoura, *Acquisitions Librarian*

Cataloging Department

Mrs. Charla Chebl-Mhanna, *Head*

Miss Christine Noujeim, *Cataloging Librarian*

Circulation Department

Miss Dany Nasr, *Supervisor*

Mr. Maroun El-Rayess, *Circulation Assistant*

Miss Rita Mehanna, *Circulation Assistant*

Collection Development Department

Miss Domingua Abboud, *Head*

Evening Services Department

Mr. Joseph Mhanna, *Head*

Information Systems Department

Mrs. Samar Kai-Kiwan, *Head*

Mrs. Mireille Kassis-Jarjour, *ILL/DDS Librarian*

Miss Sana Youssef, *Reproduction Clerk*

Physical Processing Department

Miss Cecilia Doumit, *Physical Processing Officer*

Reference Department

Mrs. Mona Barakat-Shehadi, *Head*

Miss Reya Saliba, *Reference Librarian*

Serials Department

Mr. Joseph Mhanna, *Head*

Special Collections

Mr. Sami Salameh, *Head*

Miss Zeina Fahed, *Special Collections Assistant*

Mariam and Youssef Library Security

Mr. Raymond Ghossoub, *Security Officer*

Mr. Toni Wehbé, *Security Officer*

Mr. Assaad Jabbour, *Security Officer, Evening Shift*

Division of Computing Services and e-Learning Center

Mr. Fawzi Baroud, *Director*

Mr. Armen Balian, *Head, Academic Computer Center & Blackboard Administrator*

Mr. Joseph Abi Nassif, *Head, Administrative Computer Center*

Mr. Nazih Khalil, *System Analyst & Programmer*

Mrs. Sylvana Youssef Ghosh, *System Analyst & Programmer*

Mrs. Nathalie El-Kallassy Rechdan, *Application Analyst & Developer*

Mr. Antoine Saber, *Senior Programmer*

Mr. Dany Azzi, *Senior Programmer*

Mrs. Grace Baroud-Khalil, *University Web Coordinator*

Miss Brigitta Kassis-Akiki, *Web Developer*

Miss Sahar Nassar, *Web Designer*

Mr. Bachir Abou-Halloun, *Technical Support Specialist*

Mr. Ziad Azzi, *HelpDesk Supervisor*

Mr. Jad Jadallah, *User Support Specialist*

Mr. Jimmy Antabi, *User Support Specialist*

Mr. Fadi Khalil, *User Support Specialist*

Mr. Azar Bassil, *Help Desk Assistant*

Mr. Charbel Badr, *Help Desk Assistant*

Division of Continuing Education

Mr. Fawzi Baroud, *Director*

Miss Rania Daou, *Accounting Assistant*

Mrs. Carla El-Rajji-Spir, *Marketing & Customer Coordinator*

Mrs. Gisele Mrad-Ghanem, *Secretary*

Mr. Semaan Sfeir, *Gardener*

School of Music

Fr. Khalil Rahme, *Director*

Mrs. Jessy Hjeily-Chammas, *Secretary*

University Choir

Fr. Khalil Rahme, *Director*

Faculty of Architecture, Art and Design

Mr. Habib Melki, *Acting Dean*

Mrs. Janane Younes, *Administrative Assistant*

Mr. Nicolas Haddad, *Faculty Technician*

Mr. Edward Bassil, *Workshop Keeper*

Department of Architecture

Dr. Jean-Pierre El Asmar, *Chairperson*

Mrs. Diane Sarkis, *Secretary*

Department of Design

Mr. Nadim Matta, *Chairperson*

Mrs. Elsie Girgis, *Secretary*

Department of Music and Musicology

Fr. Elias Kesrwani, *Coordinator*

Miss Adelle Dib, *Secretary*

Department of Art

Mr. Nadim Matta, *Chairperson*

Photography Laboratory

Mrs. Liliane Haddad, *Photography Lab. Assistant*

Faculty of Business Administration and Economics

Dr. Elie Yachoui, *Dean*

Mrs. Ghada Cattan, *Administrative Assistant*

Graduate Business Program

Ms. Maya Rashed, *Administrative Assistant*

Department of Accounting, Finance and Economics

Dr. Mohamad Hamadeh, *Chairperson*

Mrs. Kamale Moubarak, *Secretary*

Department of Management and Marketing

Dr. Atef Harb, *Chairperson*

Mrs. Grace Kanaan, *Secretary*

Department of Hospitality and Tourism Management

Mr. Ghassan Beyrouthy, *Chairperson*

Mrs. Dunia Akiki, *Secretary*

Printing Office

Miss Rita Khalil, *Printing Operator*

Faculty of Engineering

Dr. Elias Nassar, *Dean*

Miss Janette Elias, *Administrative Assistant*

Department of Civil and Environmental Engineering

Dr. Jacques Harb, *Chairperson*

Miss Nancy Turc, *Secretary*

Department of Electrical and Computer and Communication Engineering

Dr. Semaan Georges, *Chairperson*

Mrs. Jacqueline Hobaiter, *Secretary*

Department of Mechanical Engineering

Dr. Michel El-Hayek, *Chairperson*

Miss Ghada Khoury, *Secretary*

Engineering Laboratories

Mr. George Breidy, *Laboratory Instructor*

Mr. Wissam Daou, *Laboratory Assistant*

Miss Nisrine El-Turkey, *Laboratory Assistant*

Miss Aline Siranossian, *Laboratory Assistant*

Mr. Maroun Eid, *Laboratory Technician*

Mr. Elie Lahoud, *Laboratory Technician*

Faculty of Humanities

Dr. Carol Kfouri, *Dean*

Mrs. Wassil Chemaly, *Administrative Assistant*

Department of English, Translation and Education

Dr. Mary-Angela Willis, *Chairperson*

Miss Vera Jabbour, *Secretary*

Department of Mass Communication

Dr. Joseph Ajami, *Chairperson*

Miss Alice Eid, *Secretary*

Department of Social and Behavioral Sciences

Dr. Mansour Eid, *Chairperson*

Miss Christine Noufaily, *Secretary*

Audio/Visual Facilities

Mr. Sam Lahoud, *Supervisor*

Mr. Antoine Azar, *Video Associate and Technical Consultant*

Mrs. Zoya Awky, *Commercial Coordinator and Radio Station Manager*

Mr. Anthony Gunstone, *Studio/Audio Associate*

Mrs. Rania Saade-Zeidan, *Administrative Assistant, Audio-Visual Facilities*

Mr. Nicolas Khabbaz, *Project Coordinator*

Mr. Naoum Abi-Adam, *Computer Associate*

Mr. Samer El-Achi, *Studio Assistant and Academic Support*

Miss Najwa Mallah, *Studio Assistant and Academic Support*

Mr. Abdo Bejjani, *Audio-Visual University Services*

Mr. Milo Ghanem, *Audio-Visual University Services*

Mr. Melhem Bou-Chebel, *Audio-Visual University Services*

Mr. Charbel Tarabay, *Events Assistant*

Faculty of Natural and Applied Sciences

Dr. George M. Eid, *Dean*

Department of Computer Science

Dr. Fouad Chedid, *Chairperson*

Mrs. Eliana Yazbeck-Kosseify, *Secretary*

Department of Mathematics and Statistics

Dr. Ramez Maalouf, *Chairperson*

Mrs. Nelly Geara Nakad, *Secretary*

Department of Sciences

Dr. Tanos G. Hage, *Chairperson*

Mrs. Yolla Chalhoub-Abboud, *Secretary*

Actuarial Science & Insurance Program

Mrs. Claudia Freiji-Bou Nassif, *Academic Advisor*

Freshman Science Program

Dr. Doris Jaalouk, *Academic Advisor*

Academic Assistants

Mrs. Rita El-Hage El-Amm

Mrs. Nada El Ghossein-Maalouf

Miss Catherine Zoghbi

Lab Assistant

Mrs. Elizabeth Saliba-Tabet

Faculty of Nursing and Health Sciences

Dr. Antoine Farhat, *Acting Dean*

Mrs. Nathalie Fahed-Mozaya, *Administrative Assistant*

Faculty of Political Science, Public Administration and Diplomacy

Dr. Chahine Ghais, *Dean*

Mrs. Nayla Basbous, *Administrative Assistant*

NDU - North Lebanon Campus

Office of the Director

Fr. Samir Ghsoub, *Director*

Fr. Mounir Fakhry, *University Chaplain*

Dr. George M. Eid, *Academic Advisor to the President for Branches*

Mr. Edgard Merheb Harb, *Assistant Director, Public Relations*

Mrs. Nancy Rizk-Diab, *Administrative Assistant, Office of the Director*

Miss Nicole Ayoub, *Administrative Assistant, Academic Affairs*

Architecture, Art and Design

Mrs. Dina Nashar Baroud, *Coordinator*

Business Administration and Economics

Mr. George Gharzouzi, *Coordinator*

Engineering

Dr. Semaan Gerges, *Coordinator*

Mr. Walid Al Zakhem, *Engineering Laboratory Assistant*

Humanities

Mr. Michael Hajj, *Coordinator*

Natural and Applied Sciences

Dr. Mary Kheir, *Coordinator*

Miss Rana Naynou, *Science Laboratory Assistant*

Nursing & Health Sciences

Dr. Mary Kheir, *Coordinator*

Miss Rana Naynou, *Science Laboratory Assistant*

Office of University Services

Dr. Elias Rizk, *Assistant Director, University Services*

Office of Finance

Mr. Bechara Bechara, *Accountant, Business Office*

Office of the Registrar

Mr. Jean Malkoun, *Registrar's Officer*

Office of Admissions

Mr. Raymond Khoury, *Admissions Officer*

Student Affairs Office

Miss Rita Yaghmour, *SAO Officer*

The Library

Ms. Carina Hawat, *Supervisor*

Mrs. Suzanne Doumit-Saad, *Circulation Assistant*

Computer Center

Mr. Khalil Serhan, *Head*

Miss Rena Ayoub, *Computer Laboratory Assistant*

General Services

Mr. Chalita Harb, *Driver*

Mrs. Jacqueline Fayjaloun, *Services Worker, Cafeteria*

Mr. Miled Daou, *Driver*

Miss Therese Assaf, *Services worker, Cafeteria*

Mr. Youssef Bou Ferraah, *Services Worker, Cafeteria*

NDU - Shouf Campus

Office of the Director

Fr. Boutros Bou-Nassif, *Director*

Dr. George M. Eid, *Academic Advisor to the President for Branches*

Mrs. Nancy Khoury-Jurdy, *Administrative Assistant*

Architecture, Art and Design

Mr. John Kortbawi, *Coordinator*

Mr. Charbel Akl, *Technical and Academic Assistant*

Miss Maya Abou Khzam, *Secretary*

Business Administration and Economics

Mr. Hrair Hovivian, *Coordinator*

Miss Maya Abou Khzam, *Secretary*

Engineering

Dr. Charbel Zgheib, *Coordinator*

Mrs. Siham Antoun Chalhoub, *Secretary*

Mr. Joseph Eid, *CCE Lab Assistant*

Humanities

Mr. Vatche Donerian, *Coordinator*

Miss Maya Abou Khzam, *Secretary*

Natural and Applied Sciences

Dr. Nazir Hawi, *Coordinator*

Mrs. Siham Antoun Chalhoub, *Secretary*

Mrs. Rêve Berberi-Richa, *Biology and Chemistry Lab Assistant*

Office of the Registrar

Mr. Fadi Khoury, *Assistant Registrar*

Mrs. Marina Bou Karroum-Beainy, *Secretary*

Office of Admissions

Mr. Fadi Khoury, *Admissions Officer*

Mrs. Marina Bou Karroum-Beainy, *Secretary*

Student Affairs Office

Br. Abdo Sleiman, *Assistant Director of SAO*

Ms. Denise Nassif, *SAO Officer*

Business Office

Mr. Elie Bou Abdo, *Accountant*

Library

Ms. Claudine Chamoun, *Library Supervisor*

Ms. Isabelle Bittar-Ghanem, *Library Assistant*

Computer Center

Mr. Charbel Saadeh, *Driver*

Mr. Abdo Mghames, *Gardener*

Mr. Dib Haddad, *Gardener*

LIST OF FULL-TIME FACULTY MEMBERS 2009-2010

Professors

- ¹*Assaf, Walid*, Ph.D., 1965, *Nuclear Engineering*, Iowa State University, USA
Chedid, Fouad, Ph.D., 1990, *Computer Science: Parallel & Distributed Computing, Algorithms Theoretical Computer Science.*, Illinois Institute of Technology, USA
²*Eid, Assad*, Doctorate, 1986, *Applied Linguistics and TEFL*, Université Saint-Joseph, Lebanon
²*Eid, George M.*, Ph.D., 1988, *Mathematics*, Polytechnic University, New York, USA
Eid, Mansour, Doctorate, 1985, *Arabic Language and Literature*, Université Saint-Joseph, Lebanon
Hobeika, Louis, Ph.D., 1980, *Economics*, University of Pennsylvania, USA
Kesrouani, Elias (Fr.), Diplôme de Docteur, 1989, *Musicologie*, Sorbonne Paris IV, France
¹*Khoury, Shahwan*, Ph.D., 1965, *Electrical Engineering (Applied Space Science)*, Carnegie Institute of Technology, CMU, USA
²*Nehme, Michel*, Ph.D., 1983, *Political Science*, Rutgers University, New Jersey, USA
²*Oueijan, Naji*, Ph.D., 1985, *English Literature*, Baylor University, USA
²*Rihani, Ameen A.*, Ph.D., 1996, *Bilingual Literature*, Lebanese University, Lebanon
²*Sarru', Boulos*, Ph.D., 1979, *English and American Studies*, Indiana University, USA
²*Yachoui, Elie*, Doctorat d'Etat, 1982, *Economics*, Dauphine, France

Associate Professors

- Abouchedid, Kamal*, Ph.D., 1997, *Education*, Manchester University, UK
Ajami, Joseph, Ph.D., 1987, *Mass Communication*, Ohio University-Athens, USA
Alam, Edward, Ph.D., 1996, *Philosophy*, University of Utah, USA
Asmar, Ghazi, Ph.D., 1998, *Mechanical and Aerospace Engineering*, University of Missouri, USA
²⁻³*El-Hage, Youssef Kamal*, Ph.D., 1990, *Physics*, Technische Universität München, Germany; M.A., 1985, *Philosophy*, Lebanese University, Lebanon
El-Hayek, Michel, Docteur Européen, 1997, *Sciences Appliquées*, Faculté Polytechnique de Mons, Belgium
Elmurr, Sami, Ph.D., 1986, *Electrical Engineering*, Mississippi State University, USA
Fakih, Khalid, Ph.D., 1992, *Journalism*, University of Missouri, USA
Georges, Semaan, Ph.D., 2001, *Electrical Engineering*, Ecole de Technologie Supérieure, Canada
Ghais, Chahine, Ph.D., 1998, *Political Science*, University of Missouri, St. Louis, USA
Haddad, John, Ph.D., 1992, *Statistics*, University of Waterloo, Canada
Haddad, Robert, Master of Fine Arts, 1980, University of Pennsylvania, USA
Hamad, Mustapha, Ph.D., 1995, *Electrical Engineering*, University of South Florida, USA
Hamadeh, Mhamad, Ph.D., 1998, *Economics*, Syracuse University, USA
Harb, Jacques, Ph.D., 1996, *Civil Engineering*, Northeastern University, USA
Jahshan, Paul, Ph.D., 2000, *American Studies*, Nottingham University, UK
Keirouz, Malhab, Ph.D., 1991, *Mathematics*, Purdue University, USA
Kfoury, Carol, Doctorate 1^{ère} Catégorie, 1997, *Philosophie et Sciences Humaines*, Université du Saint-Esprit Kaslik, Lebanon
Khair, Marie, Doctorate, 1996, *Computer Science*, Aristotle University of Thessaloniki, Greece

¹ Professor Emeritus

² Tenure appointment

³ Leave of absence for the academic year 2009 - 2010

Khalaf-Keirouz, Leila, Doctorate, 1995, *Environmental Geology*, Westfälische Wilhelms-Universität, Germany

Labaki, George, Doctorate, 1984, *Law*, Université de Paris-I, Pantheon, Sorbonne, France.

Malek, Amal, Doctorate, 1^{ère} Catégorie, 2000, *Philosophie et Sciences Humaines*, Université du Saint-Esprit Kaslik, Lebanon

³**Mehanna, Rock-Antoine**, Ph.D., 2000, *Business Policy*, Southern University, Baton Rouge, Louisiana, USA

Naimy, Viviane, Doctorate, 2001, *Economics and Finance*, Université de Paris XI, France

Nassar, Elias, Ph.D., 1997, *Electrical Engineering*, The Ohio State University, USA

Sabieh, Christine, Doctorate 1^{ère} Catégorie, 1998, *Philosophie et Sciences Humaines*, Université du Saint-Esprit Kaslik, Lebanon

Salameh, Doumit, Ph.D., 1988, *Philosophy*, St. Louis University, USA

Salem, Naim, Ph.D., 1992, *International Studies*, University of South Carolina, USA

Saliba, Holem, Ph.D., 1997, *Mathematics*, Moscow State University, Russia

Sensenig-Dabbous, Eugene, Doktor Der Philosophie, 1985, *Political Science and German Literature*, Paris-Lodron-Universität, Salzburg, Austria

Yaacoub, Youssef, Ph.D., 1990, *Education*, Loyola University of Chicago, USA

Younes, Farid, Ph.D., 1997, *Aménagement*, Université de Montréal, Québec, Canada

Assistant Professors

Akar, Bassel, Ph.D., 2009, *Education*, Institute of Education, University of London, UK

Akhras, Caroline, Ph.D., 2007, *Doctor of Education*, University of Leicester, UK

Atallah, Jad, Ph.D., 2008, *Electrical & Computer Systems*, Royal Institute of Technology, Sweden

Beyrouthy, Lola, Doctorate, 2002, *Music*, Université du Saint-Esprit Kaslik, Lebanon

Bitar, Nicolas, Ph.D., 2005, *International Finance and Economics*, University of Wisconsin-Milwaukee, USA

Bou-Mosleh, Charbel, Ph.D., 2005, *Mechanical Engineering*, University of Colorado, USA

Bou-Sanayeh, Marwan, Dr.-Ing., 2008, *Electrical Engineering*, University of Duisburg-Essen, Germany

Chakar, Elie, Doctorate, 1994, *Sciences et Techniques du Bâtiment*, Ecole Nationale des Ponts et Chaussées, France

Chidiac, May, Doctorate, 2008, *Information Sciences*, Université Pantheon, Assas, Paris II, France

Darouny, Kamal, M.A., 1986, *Marketing and Advertising*, Sussex College of Technology, UK

Dib, Robert, Doctorate, 1998, *Biochemistry*, Université de Nantes, France

Donerian, Vatche, M.A., 1987, *Theater and TV Directing*, Yerevan State Institute of Dramatic and Fine Arts, Armenia

Doumit Jacqueline, Doctorate, 1996, *Biomedical Engineering*, Université de Saint-Etienne, France

El Asmar, Jean-Pierre, Ph.D., 2008, *Sustainable Built Environment*, De Monfort University, UK

El-Doaihi, Jamil, Ph.D., 1998, *Arabic Literature*, Sydney University, Australia

El-Hindy, Elie, Ph.D., 2009, *Governmental & International Relations*, University of Sydney, Australia

El-Khalidi, Khaldoun, Doctorate, 1996, *Computer Science*, Université de Franche-Comté, France

El-Khoury, Akram (Fr.), Doctorate, 2006, *Canon Law*, Pontificia Universitas Lateranensis-Rome, Italy

El-Meouchy, Rita, Ph.D., 2007, *Education of the English Language*, University Saint-Joseph, Lebanon

El-Mouccary, Chady, Doctorate, 2000, Lab De Génie Electrique de Paris (LGEP), France (NLC)

Fahed, Ziad, Doctorate, 2001, *Théologie Canonique*, Université Catholique de Lyon, France

Farhat, Antoine, Ph.D., 1999, *Nutrition*, McGill University, Canada

Farhat, Hikmat, Ph.D., 1998, *Chemical Physics*, McGill University, Canada

Fayad, Amer, Ph.D., 2003, *Plant Pathology, Physiology, and Weed Science*, Virginia Polytechnic Institute and State University, USA (SC)

Francis, Francis, Ph.D., 2003, University of New South Wales, Australia

Ghalayini, Bassem, Ph.D., 1995, *Applied Mathematics*, University of California-Los Angeles, USA

Gebran, Hisham, Doctorate, 2005, *Mathematics*, Ecole Polytechnique Fédérale de Lausanne, Switzerland (SC)

Guldimann, Colette, Ph.D., 2004, *English*, University of London, UK.

Hage, Tanos G., Ph.D., 1995, *Plant Biochemistry and Molecular Biology*, Pennsylvania State University, USA

Hajjar, Roger, Ph.D., 1997, *Physics and Astronomy*, Université de Montréal, Canada

Hamadi, Hassan, Ph.D., 2005, *Finance*, University of Surrey, UK

Harb, Atef, Ph.D., 1996, *Economics-Operations Research*, Ecole Polytechnique de Montreal, Canada

Hasham, Elham S., Ph.D. 2004, *Educational Leadership, Management and Administration*, Leicester University, United Kingdom.

Hassoun, George, Ph.D., 1996, *Electrical and Electronic Engineering*, University of Adelaide, Australia.

Jaalouk, Doris, Ph.D., 1997, *Cell Biology*, Université de Sherbrooke, Canada

Jajou, Amer F., Ph.D., 1987, *Operations Research*, Univerzita Karlova, Czechoslovakia

Kabrita-Bou Serhal, Colette, Ph.D., 1998, *Circadian Biology*, Northeastern University, Boston, USA

Kanbar, Nancy, Ph.D., 2006, *Environmental Science*, George Mason University, USA

Karam, Clovis, Doctorate, 1984, *Scholastic Philosophy*, Université Catholique de Lyon, France

Kassem, Abdallah, Ph.D., 2005, Ecole Polytechnique de Montreal, Canada

Khalil, Antoine, M.B.A., 1981, *Finance*, Pace University, USA

Khoeiri, Roy, Doctorate, 2003, *Economics*, Université Paris 13, Paris Nord, France

Khoury, Rim, Ph.D., 2009, *International Finance*, Sogang University, South Korea

Kopali, Tony, Doctorate, 2007, *Education*, Université du Saint-Esprit Kaslik, Lebanon

Maalouf, Hoda, Ph.D., 1998, *Communication Engineering*, Imperial College, University of London, England

Maalouf, Ramez, Ph.D., 1994, *Mathematics*, Imperial College, University of London, England

¹**Matar, Suhail**, C.A.P.E.S., 1969, *Arabic Language and Literature*, Lebanese University, Lebanon

Matar-Haddad, Dorine, Ph.D., 2006, *Management*, University of Leicester, UK (NLC)

Mendalek, Nassar, Ph.D., 2003, *Electrical Engineering*, Ecole de Technologie Supérieure, Canada

Metni, Najib, Docteur, 2006, *Automatique et Traitement du Signal et des Images*, Université de Nice-Sophia-Antipolis, France

¹ Tenure appointment

Nassar, Maha, Doctorate, 2009, *Educational Management*, University of Corsica, France
Rached Ziad, Ph.D., 2002, *Mathematics*, Queen's University, Canada
Saaddeh, Hassan, Ph.D., 1999, *Finance*, University of Southern California, Los Angeles, USA
Sabra, Bassem, Ph.D., 2000, *Physics*, Ohio University, USA
Salem, Talal, Docteur, 2007, *Civil Engineering*, Institut National des Sciences Appliquées de Lyon, France
Shallita, Khalil, Doctorate, 2005, *Computer Science*, Paul Sabatier University, France
Tabach, Eddy, Doctorate, 2005, *Civil Engineering*, University des Science et Technique de Lille, France (NLC)
Tannous, Marie, Ph.D., 1998, *Clinical Chemistry*, University of Windsor, Canada (NLC)
Tratrat, Christophe, Doctorate, 1999, *Chemistry*, Université de Paris V, France
 Université du Saint-Esprit Kaslik, Lebanon
Voss, Jesse, Ph.D., 2008, *Architecture*, University of Wisconsin-Milwaukee, USA
Willis, Mary-Angela, Ph.D., 2001, *Francophone Literature*, University of Alabama, USA
Yazigy, Amal, Ph.D., 1992, *Applied Linguistics*, Leicester University, UK
Zgheib, Youssef, Ph.D. 2002, *International Hospitality Management*, University of Strathclyde, Scotland, UK
Zgheib, Charbel, Doctorate, 2005, *Physics of Condensed Matter*, University of Montpellier II, France (SC)

Visiting Faculty Member

Akl, Said, Poet, and Philosopher

Senior Lecturers

Abou-Jawdeh, Simon, D.E.S., 1992, *Clinical Psychology*, Lebanese University, Lebanon
Akkari, Juliet, M.A., 1971, *TEFL*, American University of Beirut, Lebanon
Barakat, Edgard, M.B.A., 1981, *Marketing*, University of Dayton, USA
Baroud, Fawzi, M.S., 1985, *Systems Management*, Florida Institute of Technology, USA
Choueiri, Linda Selwood, Master of Science, 2000, *Supervision & Administration in the Visual Arts*, Parsons School of Design / Bank Street College, USA
El-Hage, Gabriel, M. Urb., 1992, *Urbanism*, Université de Montréal, Québec, Canada
Frayha, Norma, M.B.A., 1982, *Accounting*, American University of Beirut, Lebanon
Gabriel, Nicolas, Diplôme D'Etudes Supérieur, 2000, *Urbanisme*, Université Libanaise, Liban
Hawi, Nazir, M.S., 1991, *Business Management*, Lebanese American University, Lebanon
Hovivian, Hrair, M.S., 1984, *Finance and Economics*, Beirut University College, Lebanon
Karam, Selim, MBA, 1983, University of Detroit, USA
Khoury, Mary, M.A., 1995, *English Language and Literature*, Lebanese University, Lebanon
Melki, Habib, Master of Architecture, 1985, Ball State University, USA
Nakhlé, Vivianne, M.S., 1993, *Business Administration*, Strayer College, Washington D.C.
Saaddeh, Ban, M.S., 1978, *Mathematics*, American University of Beirut, Lebanon
Shaffu, Raja, M.B.A., 1970, *Finance*, American University of Beirut, Lebanon
Wehbe, Boulos (Fr.), M.A., 1981, *Middle Eastern Studies*, American University of Beirut, Lebanon
Zaccour, Danielle, Diplôme d'Etudes Supérieures, 1991 Arts Plastiques, Académie Libanaise des Beaux-Arts, Liban
Zakhour, Kamal, M.B.A., 1982, *Marketing*, University of Pittsburgh, USA

Lecturers

- Assaf Carole**, M.B.A., 1995, *Tourism and Marketing*, Notre Dame University-Louaize, Lebanon
- Assaker, Guy**, M.B.A., 2003, *Hospitality Management*, Cornell University (NY)/ Essec (France); D.E.S.S., 2004, Université Paris I-Panthéon Sorbonne, France
- Bassil, Janet**, M.B.A., 1996, *International Affairs and Diplomacy*, Notre Dame University-Louaize, Lebanon
- Bechara, André**, Master of Arts in Design, 2007, Notre Dame University-Louaize, Lebanon.
- Beyrouthy, Ghassan**, M.B.A., 1999, *Hospitality Management and Tourism*, Notre Dame University-Louaize, Lebanon
- Chibani, Wissam**, M.A., 2001, *TESOL*, Oklahoma City University, Oklahoma, USA
- Daghfal, Graziella**, Master of Arts in Design, 2002, Middlesex University, UK
- El-Hajj, Michael**, M.A., 1997, *English Literature*, Notre Dame University-Louaize, Lebanon (NLC)
- Freiji-Bou-Nassif, Claudia**, M.S., 1991, *Applied Statistics*, Ohio State University, USA; M.S., 1998, *Financial Economics*, University of London
- Ghaleb, George**, MBA, 2002, *Management*, Notre Dame University-Louaize, Lebanon (SC)
- Gharzouzi, George**, MBA, 1984, University of Tulsa, USA (NLC)
- Hajj, Michael**, M.A., 1997, *English Literature*, Notre Dame University-Louaize, Lebanon
- Hajjar-Muça, Theresa**, M.P.H., 1994, *Biostatistics*, American University of Beirut, Lebanon
- Kortbawi, John**, Post-Graduate Diploma, 1977, Advanced Typographic Design, London College of Printing, UK
- Maroun, Bachir**, M.S., 2001, *Computer Science*, Notre Dame University-Louaize, Lebanon (SC)
- Matta, Nadim**, Master of Arts, 1999, *Typographic Studies*, London Institute/London College of Printing, UK
- Menassa, Joyce**, M.S., 1994, *Marketing*, Beirut University College, Lebanon
- Nassif, Nadim**, *Intl. Master in Management, Law and Humanities of Sport*, 2002, De Monfort University, Leicester, U.K.
- Samrani, Diana**, M.A., 1990, *Education*, Andrews University of Michigan, USA
- Soghman-Kiwan, Jacqueline**, MA, 2007, *Graphic Design*, Savvanah College of Art and Design, USA
- Sawma, Victor**, M.S., 2003, *Computer Science*, University of Ottawa, Canada
- Tannous, Heba**, Master of Commerce 1997, *Information Systems*, the University of Queensland, Australia (NLC)

Instructors

- Baroud, Dina**, Master of Architecture, 2007, *Landscape Urbanism*, Notre Dame University-Louaize, Lebanon (NLC)
- Kaassamany, Talie**, M.B.A., 2002, *Finance*, American University of Beirut, Lebanon (SC)
- Karam, Mirna**, M.A., 2005, *Applied Linguistics*, Notre Dame University-Louaize, Lebanon (SC)
- Nasr, Noel**, Master of Arts in Photography, 2006, University of Kent, UK

² Any student enrolled in ENL 105 who scores a B or above will be automatically passed to ENL 213.

SC: Full-time members at Shouf Campus

ACADEMIC CALENDAR 2009-2010

FALL SEMESTER 2009

Sep. 14 -18	M-F	8:00a.m -2:00p.m.	Orientation Sessions for New Students - Attendance Obligatory
*Sep. 21-22	M-T		Al-Fitr: Holiday
Sep. 23-25	W-F	8:00-12:30/1:30-4:00	Registration Period
Sep. 30	W	7:30 a.m.	Classes begin
Oct. 2	F	8:00-12:30/1:30-4:00	Drop and Add (Classes are in session)
Oct. 6	T	8:00-12:30/1:30-4:00	Late Registration (Classes are in session)
Oct. 7	W	12:00 noon	Opening ceremony for the academic year 2009 - 2010
Nov. 22	Sun.		Independence Day: Holiday
Nov. 25	W	4:00 p.m.	Deadline for Spring and Summer 2009 Incomplete Grades
*Nov. 28-29	Sat.-Sun.		Al-Adha: Holiday
Dec. 1-14	T-M	8:00a.m.-4:00 p.m.	Advising Period for Spring 2010
*Dec. 18	F		Hijra New Year: Holiday
Dec. 23	W	3:00 p.m.	Christmas Mass
Dec. 23	W	9:00 p.m.	Christmas vacation begins
*Dec. 27	Sun.		Ashoura: Holiday
Jan. 3	Sun.	9:00 p.m.	Christmas vacation ends
Jan. 4	M	7:30 a.m.	Classes resume
Jan. 4-26	M-T		Application for Work Study Grant & Sibling Grant
Jan. 6	W		Epiphany and Armenian Christmas: Holiday
Jan. 17	Sun.		Saint Anthony's Day: Holiday
Jan. 20	W	4:00 p.m.	Deadline for Officially Withdrawing from a Course
Jan. 21, 22	Th-F		Entrance Examinations for Spring Semester 2010
Jan. 26	T	9:00 p.m.	End of Classes
Jan. 27	W		Reading Day
Jan. 28-Feb. 4	Th-Th	7:45 a.m.-9:00 p.m.	Final Examinations Period
Feb. 2	T		Reading Day
Feb. 9	T		St. Maroun's Day: Holiday

SPRING SEMESTER 2010

Feb. 8	M		Orientation Sessions for New Students - Attendance Obligatory
Feb. 11-12	Th-F	8:00-12:30/ 1:30-4:00	Registration Period
Feb. 16	T	7:30 a.m.	Classes begin
Feb. 18	Th	8:00-12:30/ 1:30-4:00	Drop and Add (Classes are in session)
Feb. 22	T	8:00-12:30/ 1:30-4:00	Late Registration (Classes are in session)
*Feb. 26	F		Prophet's Birthday: Holiday
Mar. 31	W	3:00 p.m.	Easter Mass
Mar. 31	W.	9:00 p.m.	Easter vacation begins (Eastern & Western)
April 5	M	9:00 p.m.	Easter vacation ends
Apr. 6	T	7:30 a.m.	Classes resume
Apr. 9	F		Open Doors Shouf Campus
Apr. 16	F	4:00 p.m.	Deadline for Fall Semester 2009 Incomplete Grades
Apr. 23	F		Open Doors Main Campus
Apr. 23	F		Open Doors NLC Campus
Apr. 26-May 7	M-F		Advising Period for Summer and Fall 2010
Apr. 26-June 7	M-M		Application for Work Study Grant & Sibling Grant
May 1	Sat		Labor Day: Holiday
May 14	F		Founder's Day Main Campus (Classes are not in session)
May 15	Sat.		Founder's Day – Shouf Campus (Classes are not in session)
May 21	F		Founder's Day – NLC Campus (Classes are not in session)
June 1	T	4:00 p.m.	Deadline for Officially Withdrawing from a Course
June 8	T		Reading Day
Jun. 9	W		End of Classes
Jun. 10-18	Th-F	7:45 a.m.-9:00 p.m.	Final Examinations Period
Jun. 16	W		Reading Day

SUMMER SESSION 2010

Jun. 23-24	W-Th	8:00 a.m.-2:00 p.m.	Registration Period
Jun. 28	M	7:30 a.m.	Classes begin
Jun. 29	T	8:00 a.m.-2:00 p.m.	Drop and Add (Classes are in session)
Jun. 30	W	8:00 a.m.-2:00 p.m.	Late Registration (Classes are in session)
Jul. 2-3	F-Sat.		Entrance Examinations for Fall Semester 2010
Jul. 9	F	7:00 p.m.	Commencement: Conferring of Degrees
Aug. 4	W	2:00 p.m.	Deadline for Officially Withdrawing from a Course
Aug. 6	F	2:00 p.m.	End of classes
Aug. 9-10	M-T	7:45 a.m.-9:00 p.m.	Final Examinations Period
Aug. 15	Sun.		Assumption Day: Holiday
Aug. 27-28	F-Sat.		Entrance Examinations for Fall Semester 2010

***Tentative dates**

UNIVERSITY PROFILE

LOCATION AND CLIMATE

The Notre Dame University-Louaize Main campus is located in Zouk Mosbeh, a coastal area 15 km north of Beirut. At an altitude of 100 m, the campus overlooks the beautiful bay of Jounieh. It affords easy access to the economic and social life of a growing urban area. Theaters, elegant shops, coastal resorts, all lie within a short driving distance from the University. Also accessible are the Ouyoun As Siman and Fakra winter tourist areas. The climate of Zouk Mosbeh is moderately cold from December to March and moderately hot from June to September. The Fall and Spring seasons are usually sunny and cool. On the average, there are 300 days of sunshine each year, a fact which allows for a variety of outdoor activities.

The NDU North Lebanon Campus is located on the green hills of Barsa, a quiet village in Koura, at an altitude of 100 m. The campus overlooks both the beautiful bay of El Mina-Tripoli, and the high mountains of Ehden and Bcharré. Moreover, it lies within a 10-15 minutes driving distance from Tripoli, Zgharta, Chekka, and other villages in Koura. The clean and quiet environment and the moderate climate add to the charm and attraction of the campus. The campus lies on a piece of land of 50,000 square meters donated by the village of Barsa. The first building of the Barsa Campus, totaling 10,000 squaremeters of floor space, was completed in June 1999.

The NDU Shouf Campus is housed within the premises of St. Abda Monastery in Deir El-Kamar. The Monastery, a historic place, is being restored not to its former state but to a standard that would will maintain its traditional and aesthetic appeal. (The campus is expected to accommodate a student population of 3000 or so students.). The visible benefits are everywhere in evidence. Today, rows of oak and pine trees surround the campus. The grassy evergreen slopes are well preserved. Visitors can easily admire the scenic beauty of the place. Beyond the University campus, the surrounding vicinity of Deir El-Kamar harmonizes gracefully with the monastery premises. This historic city is located in the central area of the Shouf region. It is 35 km from Beirut and is just over 900 m above sea level. In general, the region enjoys a moderate climate except for the winter months, when the temperature may drop to 7°C or below.

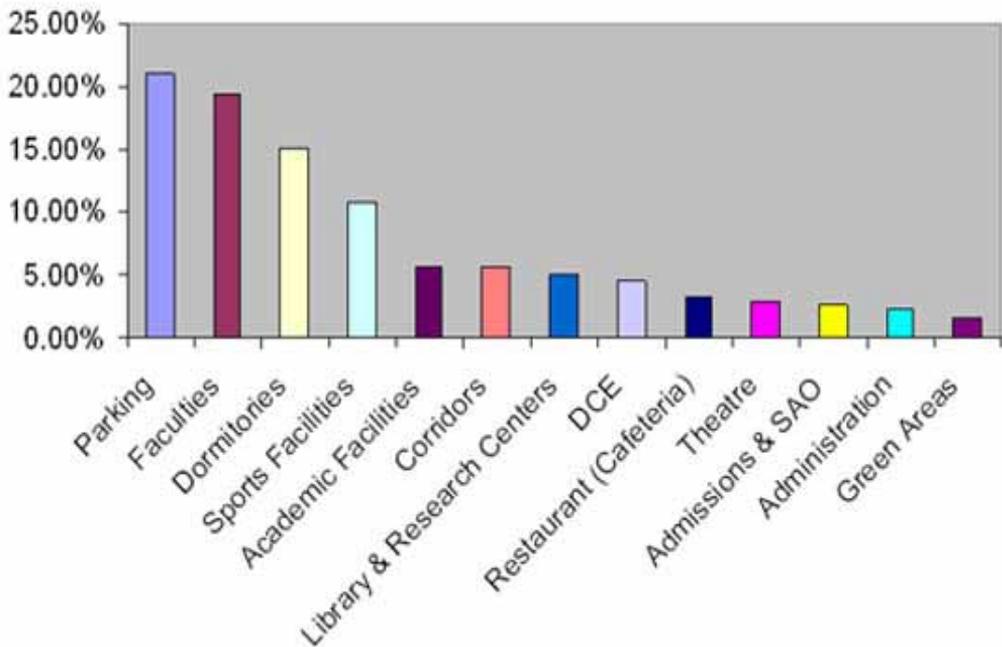

CONSTRUCTION PLAN

From the earliest days of the University, NDU's administration has taken such great care to develop a physical infrastructure that would accommodate rather adequately its major academic needs. The year 2006-2007 witnessed the completion of its construction plan in the Kesrwan region (see Table 1 and Figure 1).

Table 1 Construction Area at the Main Campus

Unit Areas	Extension in M2	Percentage
Parking	18,450	21.04%
Faculties	17,000	19.38%
Dormitories	13,200	15.05%
Sports Facilities	9,500	10.83%
Academic Facilities	5,000	5.70%
Corridors	5,000	5.70%
Library & Research Centers	4,400	5.02%
Division of Continuing Education (DCE)	4,000	4.56%
Restaurant (Cafeteria)	2,900	3.31%
Theatre	2,500	2.85%
Admissions & SAO	2,350	2.68%
Administration	2,000	2.28%
Green Areas	1,400	1.60%
Total	87,700	100%

Figure 1. Percentage Distribution of Construction Area

Today, NDU takes pride in its three campuses which have become an essential part of its identity and which differentiate it from its peer institutions in Lebanon.

IDENTITY, MISSION, VISION & VALUES

Identity

Notre Dame University-Louaize (NDU) is a private, Lebanese non-profit Catholic institution of higher education which adopts the American system of education.

The religious affiliation of the University does not impose any sectarian obligations on faculty members, staff, or students. The cultural and spiritual heritage of the Maronite Order of the Holy Virgin Mary highlights a belief in a unified Lebanon, a belief in education as a means of protection against fanaticism and corruption and a dedication to freedom of thought and expression. The University espouses such values and beliefs irrespective of color, creed, race, or gender and seeks to enhance these values through the liberal education it offers and the career preparation that caters to the real needs of Lebanon and the region.

Mission Statement

As a Catholic institution inspired by the cultural and spiritual heritage of the Maronite Order of the Holy Virgin Mary, Notre Dame University-Louaize (NDU) seeks to provide comprehensive quality education that fosters excellence in scholarship, lifelong learning, enlightened citizenship, human solidarity, moral integrity, and belief in God. In designing its curricula, NDU is committed to the philosophy and standards of the American model of liberal arts education. Conceiving itself as an authentic academic community, NDU promotes diversity, respect for human dignity and rights, and concern for the common good. Its profound aspiration is to prepare its students to be future leaders who can exercise reason upon knowledge and shape a world of truth, justice, love and freedom.

Vision

NDU's vision is to:

Become the choice Catholic University in Lebanon, furnishing students with the finest faculty and comprehensive curriculum in the Maronite tradition.

Provide a highly personalized academic experience to our graduate and undergraduate students.

Integrate a strong, interdisciplinary, liberal arts core with degree-granting programs providing preparation for professional careers and graduate studies.

Excel in selected specialty areas, including signature programs that augment reputation and serve as models for the delivery of educational development at the University.

Foresee the changing needs with time and develop programs and utilize technologies consistent with those needs.

Create and sustain a community in which all aspects of university life are a reflection of its values.

Values

As a Catholic university in the Maronite tradition, NDU is determined to practice those core values that respect humanity and the dignity of the individual, that help students on their life path of learning, and that allow them to discover their talents through cooperation while they look for truth, for individual empowerment and for the enhancement of the world around them. Accordingly, they dedicate themselves to the following core values:

Faith – As a Catholic university, NDU highlights a strong belief in spiritual motivation and education as a vehicle for a better and more just society.

Excellence – In all activities of University life – teaching, scholarship, service etc. – NDU strives to be a center of quality education.

Scholarship – To seek the truth, with a sense of discovery, through informed and rigorous scholarship, will place NDU among the top ranking regional universities.

Freedom – Of thought and expression; NDU commits itself to engage and enhance intellectual inquiry in the pursuit of truth through teaching students how to learn, how to think critically, how to conduct responsible research, and how to access and integrate information in preparation for career development and personal growth.

Integrity – Teaching, scholarship, and student service within the University community is characterized by intellectual honesty and a sense of personal morality.

Service – NDU is committed to serve not only its students, faculty and employees, but also society at large.

Diversity – Empathy, tolerance and respect for all people is essential to any University community. NDU encourages students to understand and appreciate the diversity of cultures which exist locally, nationally, and internationally. It also seeks to promote appreciation of diversity through an understanding of the impact of human beings on their environment.

Learning for Life – In the tradition of a Catholic liberal arts education, NDU commits itself to lifelong learning, encourages personal responsibility, develops spiritual values, and affirms a philosophy of life which actively supports global economic equity, social justice, and human rights.

HISTORICAL OVERVIEW AND HERITAGE

Historical Overview

Notre Dame University-Louaize (NDU) was founded in 1987 by the Maronite Order of the Holy Virgin Mary.

NDU first came into being under the name of Louaize Center for Higher Education (LCHE) in 1978. LCHE was a joint venture between Beirut University College (BUC), now Lebanese American University (LAU) and the Maronite Order of the Holy Virgin Mary.

Later, inspired by a deep apostolic concern and guided by the needs of the community, the Order decided to start a new chapter in its history by founding an independent university. The legal finalization of this project was the promulgation by the President of The Lebanese Republic of the decree number 4116 on August 14, 1987, granting the Order the right to operate an independent university. Thus, Notre Dame University - Louaize was born, the only Catholic university adopting the American education system, not only in Lebanon but also in the entire Middle East. Three years later, in June of 1991, the University awarded its first bachelor degree to seventy-two graduates.

Along the lines set by the Vatican II Council, the Order decided to call on prominent persons from the Lebanese society to oversee the operations of the University. Consequently, a Board of Trustees was established to supervise the academic and administrative operations and to help in the planning and development of the University.

In 1990, NDU established an Off Campus Program in North Lebanon, which in 1999 moved to a new campus located in Barsa, Koura, now known as North Lebanon Campus (NLC). The campus lies on a piece of land of 50,000 square meters donated by the village

of Barsa. The first building of the Barsa Campus, totaling 10,000 square meters of floor space, was completed in June 1999.

In April 1994, NDU established the Faculty of Engineering and Architecture, and on October 5, 1996, the Lebanese Government issued a decree number 9278 granting the official recognition of the programs that lead to the Bachelor of Architecture and the Bachelor of Engineering in Civil Engineering, Computer Engineering, Electrical Engineering, and Mechanical Engineering.

In Spring 2000, NDU established the Faculty of Architecture, Art and Design, and the Faculty of Political Science, Public Administration and Diplomacy. Accordingly, the Faculty of Engineering and Architecture was named the Faculty of Engineering.

After establishing itself as one of the leading universities in Lebanon, NDU's administration, guided by the needs of the Shouf region and neighboring communities, decided to start a new chapter in its history by founding a new campus in Deir El-Kamar within the Shouf district. The proposal was approved by the Board of Trustees in its meeting of March 8, 2001. The Shouf Campus was officially inaugurated on October 26, 2001.

NDU has recently finished the construction of a new campus in the Kesrwan region which can accommodate 7000 students on a piece of land overlooking the Dog River, with a total area of 250,000 square meters (donated by the Order). The total floor space of the campus amounts to 100,000 square-meters. The foundation stone for the new campus was laid on November 19, 1994.

True to its commitment of carrying out its historic mission, NDU's community celebrated the University's 20th Anniversary in 2007. This anniversary has provided a unique opportunity for NDU to reflect on its past and to look forward to the road ahead. In 2008, the Faculty of Nursing and Health Sciences was established.

NDU had a distinguished past, and today it offers an exciting challenge to all who are connected to it.

Heritage

The University's heritage and identity are traceable to roots in the Lebanese Synod which took place in the Monastery of Our Lady of Louaize in 1739, the motherhouse of the Maronite Order of the Holy Virgin Mary and the sponsoring society of NDU.

This Synod encouraged the mission of education within the Christian Maronite ethos that believed in Education for all. Accordingly, the Order began to spread education in Lebanon and established schools in many parts of the country.

Capitalizing on its being Catholic in spirit and Maronite in tradition and focusing on the Synod's mission and directives, Notre Dame University-Louaize (NDU) as such has always sought to play its appropriate role in the Middle East.

As a Catholic university, NDU promotes the dynamic discussion of religious ideas. This dialogue strives to include the myriad voices of the Catholic tradition, past and present, as well as the voices of faculty, staff and students of all backgrounds. Such a Catholic undertaking helps the University community understand and celebrate the differences among the various voices, identify what they have in common and engage them in dialogue with the Catholic tradition.

Also, as a Catholic university, NDU is inspired by the Christian message of love of God and love of neighbor. Its administrators, faculty, staff, and students dedicate themselves to the pursuit of academic excellence in an environment of respect, care, dialogue and justice. In addition, NDU is a community which seeks to develop the love of truth and the desire to integrate and affirm the harmony between faith and reason. The University has synthesized the search for truth by offering curricula rooted in the arts and sciences. This heritage augments the spiritual and intellectual life. Students, at NDU, enjoy an honest, transparent and understanding relation with their professors; a relationship that flourishes and grows within the boundaries of mutual respect. It is this unique environment that helps professors draw out their students' potentials while shedding light on and respecting their individuality and unique talents. This takes place not only in the classroom, computer center, library, laboratories but also in the cafeteria, in recreation facilities and wherever students gather.

Drawing on these traditions, NDU seeks to endorse a Catholic presence through its student services, campus ministry, course curriculum and administration, and continues to dwell on how this Catholic heritage brings meaning to its faculty, staff, students and the entire NDU family.

Presidents of Notre Dame University

Bishop Bechara Rahi	1978-1984
Abbott Antoine Sfeir	1984-1987
Father Boutros Tarabay	1987-1993
Bishop Francois Eid	1993-1999
Father Boutros Tarabay	1999-2005
Father Walid Moussa	2005 – present

Drawing on these traditions, NDU seeks to endorse a Catholic presence through its student services, campus ministry, course curriculum and administration, and continues to dwell on how this Catholic heritage brings meaning to its faculty, staff, students and the entire NDU family.

CAMPUS MINISTRY

NDU believes that the spiritual dimension of human development should grow together with all other areas of interest to the University environment. It seeks to instill in the University community a deep concern for the rights and dignity of the human person, especially the poor and most vulnerable. It promotes religious awareness in students and faculty members.

The Campus Ministry is staffed by five full-time campus ministers who celebrate masses and religious services daily at convenient hours in the University Chapel, and cater for the religious, personal and moral concerns of the University community.

The Spiritual Family is actively engaged in promoting religious awareness. Throughout the year, it organizes several week-end spiritual retreats conducted by student leaders. It also invites lecturers on spiritual issues, initiates gospel discussions and organizes social activities.

ACADEMIC SUPPORT SERVICES

ACADEMIC ADVISORY SERVICES

Coordination of academic advising at NDU is intended to ensure appropriate advising to students. Following admission to the University, students are referred to faculty advisors who assist them in the selection of appropriate courses. The Faculty Advisory Service also helps students take academic decisions based on their abilities, interests and goals, following up their academic progress throughout their university years and helping them, when needed, reconsider their choices of major. Students are encouraged to seek information and assistance from faculty advisors on all matters relating to their educational plans.

THE LIBRARIES

The NDU Libraries consist of the Mariam and Youssef (Main) Library at the Zouk Mosbeh Campus, the NLC Library at the Barsa Campus, the Shouf Library at the Deir el Kamar Campus and the Division of Continuing Education (DCE) Library at the Old Zouk Mosbeh Campus. The NDU Libraries are also responsible for maintaining and developing the research (non-circulating) collections of the Marian Studies Center (MSC) Library and the Lebanese Emigration Research Center (LERC) Library.

Recognizing that the Library is central to fulfilling the mission of the University, the Notre Dame University-Louaize (NDU) Libraries keep up-to date with the latest publications relevant to the major programs of study through purchases and an active local and international gifts and exchange program. The Libraries welcome and encourage donations and institutional exchanges that support the University's academic programs and the scholarly, teaching, and research interests of the NDU community.

The Mariam and Youssef Library provides access to an expanding collection of core reference and circulating materials in print, manuscript, electronic, audio, visual, cartographic, and other appropriate formats. It also provides individual and group study space for more than 300 simultaneous users, an Information Commons with appropriate support and access to information and technology resources, and a classroom for Library instruction. The NLC Library, Shouf Library and DCE Library provide access to a core collection of references, circulating materials, periodicals and electronic resources, in addition to providing space for quiet, individual study.

All NDU Libraries collections, including the MSC and LERC collections, are searchable via WebView, the NDU Libraries web-enabled online public access catalog (OPAC), which is available from NDU's website (<http://www.ndu.edu.lb>).

The NDU Libraries are open to all users, however only NDU faculty, students, staff and alumni are currently granted borrowing privileges. NDU Libraries guests and visitors are allowed to access and use the library's resources within the confines of the library only. NDU Libraries materials may be requested and borrowed from any campus library, regardless of where they are housed.

The NDU Libraries are founding members of the Lebanese Academic Library Consortium (LALC) and the Lebanese Inter-library loan and Document delivery services Consortium (LIDS).

The University possesses a valuable collection of manuscripts and unique folio editions relating to Eastern Christianity and its history, kept at the five-century old Louaize Monastery. The Center for Digitization and Preservation (CDP), established in 2003 and

housed at the Mariam and Youssef Library, has digitized all manuscripts owned by the Maronite Mariamite Order in Lebanon and Rome, Italy, in order to preserve these materials and provide access to this unique collection to scholars around the world. Now the CDP is actively digitizing many other collections owned by other institutions and individuals in Lebanon.

DIVISION OF COMPUTING SERVICES

Vision

The Division of Computing Services is committed to the strategic use of the information technology for the continual improvement of the operation of Notre Dame University.

Goals

We strive to support the essential educational, research and administrative goals of Notre Dame University through the development and delivery of computing and communication services to the university's faculty, students and staff.

Goal for Faculty

Provide stronger links with faculty members in order to promote and facilitate their use of technology to support teaching and learning.

Goal for Students

Ensure that students have the necessary skills to take advantage of Notre Dame University's technology environment.

Goal for Staff

Provide staff members with the necessary technological tools that are current and reliable so they can serve the NDU community effectively.

Equipment and Facilities

The administrative Computer Center is equipped with enterprise servers used for the Registrar, Library and various Business and Administration applications using the latest Data Base technologies.

For academic purposes, SUN and IBM Mini computers, Terminals and X-Stations operating under Unix, are used by Computer Science and Engineering students. A set of servers operating under Unix, control the campus Internet and Intranet networks.

All Faculties have active computers running various platforms such as PC/Windows, PC/Linux, Sun/Solaris, and IBM/AIX. Unix workstations and Windows 2000 operating systems have transparent access to the Servers, and to one another through Network File System and Remote File System access.

The Main Campus Intranet is a fully interconnected, multimedia, multi-protocol infrastructure spanning well over 1 km of area networks and over 800 computers on the network. The new network is a routed, full duplex, fiber based, Gigabyte Ethernet backbone with Gigabyte Ethernet (1000 Mbps) links to all the major buildings. Network connection in offices and rooms are at 100 Mbps switched Ethernet.

A PowerPC and Macintosh network is connected to a variety of peripherals, and are available for Visual Arts students including: color laser printers, scanners and plotters.

Special classrooms are linked to the backbone network via communication lines and have local resources to allow the instructor an indoor on-line demonstration with illustrative materials projected during class hours. Students are required to put into practice the theoretical concepts and gain working knowledge during regular laboratory sessions scheduled individually for each course.

FAAD ACADEMIC SUPPORT FACILITIES

FAAD studios are designed to meet the various needs of Architecture, Art and Design programs. The studios are furnished with professional drafting tables and are appropriately equipped to provide support to all Architecture, Design and Fine Art courses.

MAC Computer Laboratory

Graphic Design and Fashion Design students have access to the up-dated Mac Computer Laboratory and the latest softwares to facilitate their performance.

Photography Laboratory

The photography Laboratory is a place where Architecture, Design, and Art students as well as other disciplines at NDU learn how to capture still images, develop, print, and experiment with the techniques of digital and analog photography. The studios are professionally designed and equipped with the latest technology and darkrooms for experimented analog prints to provide hands-on learning experience and optimal working conditions under the supervision of qualified instructors.

Dorothy Salhab Kazemi - Ceramic Atelier

This Ceramic Atelier is equipped with two kilns and several wheel tables. Students can enjoy manual work with clay (slab, coil building, throwing), and clay enamels powder glazing. The Ceramic Atelier has a terrace with view giving to the pine trees.

Metal and Wood Workshop

The metal and wood workshop has the necessary tools that will help Architecture, Interior Design, Graphic Design and Fashion Design students in the creative process of their works. Its main purpose is to create a tangible approach to the methodologies of teaching between the theoretical and applied.

Smart Rooms

The three smart rooms are fully equipped with computer hardware and softwares, LCD projector, and projection panel.

Architecture Computer Workshop

A computer workshop has been set up for the Architecture and Interior Design students; it is located within the Architecture studios. The workshop is equipped with smart room facilities, including eight computers, an LCD projector and related projection screen. Each computer contains the latest versions of graphic softwares, in addition to Ecotect.

Design Computer Workshop

In close proximity to the studios, one fully equipped computer workshop has been developed, for Graphic Design and Fashion design students. The workshop is equipped with smart room facilities, including 19 G4 Mackintosh computers. Each computer contains the latest versions of graphic softwares.

Fashion Design Studio

Fashion design facilities consists of three studios, one studio with mannequins and large patternmaking tables, adjacent is a sewing studio with professional steam iron and sewing machines. Furthermore, a mackintosh computer workshop is set -up to ensure a professional studio setting of digital illustration and patternmaking skills and hands -on execution. The students also have access to a cat-walk installation and will produce fashion shows of their creations.

WRITING CENTER

The Writing Center is a resource at the disposal of both undergraduate and graduate students to develop their writing skills to that of near-native fluency. The Center is

organized to provide opportunities for students who feel that their written work for their university courses could be improved by offering one on one or small group tutoring in a positive atmosphere. Personnel at the Center believe that all students have the potential to acquire sufficient skills to function in an English language environment. It is located in HA 114.

AUDIO VISUAL FACILITIES

The Audio Visual Facilities (AVF) at NDU is a department that handles all academic and technical Audio-Video matters related to students majoring in communication arts, advertising and music in order for them to execute their projects assisted by their academic instructors and professionals from the field.

The Audio Visual Facilities include:

1. The R/TV Studio
2. The Acting Studio
3. Computer / Music Lab
4. The Theater
5. Issam Fares Conference Hall
6. Pierre Abou Khater Auditorium
7. The Friends Hall
8. The Exhibition Hall
9. The Exam Halls
10. The NDU Choir Recording Unit

All facilities are “high tech” fully equipped and are in the service of students, staff and faculty members.

Besides handling all the students’ matters, this department is responsible for all the activities that occur at NDU: conferences, lectures, exhibitions, public and special events. All those activities are taped and archived.

Smart Rooms

The AVF has four smart rooms that are fully equipped with computer hardware and software, LCD projector, DVD and VHS players and surround sound systems for film screenings.

DVD Library

The DVD Library includes more than 1500 DVD’s, fiction films, documentaries, series and others. All members of the NDU community may check out these films.

ENGINEERING LABORATORIES

Engineering programs are supported by state-of-the-art laboratories that are open to all engineering students. These laboratories and workshops are managed by qualified and dedicated staff.

The Department of Civil and Environmental Engineering offers seven laboratory courses to cover the main topics in the fields of concrete and pavement design, environmental engineering, mechanics of materials, soil mechanics, hydraulics, field surveying and engineering graphics.

The lab equipment is continuously upgraded and updated to ensure that our students are exposed to the most recent and advanced systems. The department also ensures highly accurate and professional testing facilities such as spectrophotometry, strain gauging, triaxial testing, open and closed channel flow measurements, and total station application. Most of the lab facilities are connected to a data acquisition system. In addition, field

equipments are available for in-situ testing, such as soil investigation, groundwater and surface water testing, and concrete quality control. Professional commercial testing as well as community services are also performed on a regular basis in the above areas.

The Electrical, Computer, and Communication Engineering Department has several laboratories which support teaching in the areas of communication systems, electronic circuit design including microprocessors and programmable logic controllers, instrumentation, electric machines, power electronics, control systems, and digital signal processing. The laboratories are also used by students for executing their engineering project designs. The equipment is regularly updated to ensure that students are exposed to the best possible laboratory experience.

State of the art laboratory equipments are being used in the Mechanical Engineering Department for training purposes. The list includes: Large wind tunnel for various aerodynamics testing, Energy testing (solar system, combustion, etc...), Turbomachines testing (centrifugal pumps, fans, Pelton wheel, Francis turbine, etc...), Air-conditioning testing (heating, cooling, refrigeration, etc...), Mechanical vibration testing and Mechanical components and systems.

SCIENCE LABORATORIES

Biology Lab

The biology laboratory is equipped with many facilities, which support teaching and research across the biology curriculum. Disciplines supported include:

- Microbiology: culture and analysis of viral, bacterial and parasitic species.
- Molecular biology: DNA purification, analysis, and manipulation, with preliminary PCR facilities for DNA amplification. Other available equipment, such as an electroporator, promote research studies that require electrotransformation or transfection of cells.
- Cell culture: preparation, culture and cryopreservation of animal cells.
- Plant biology: plant cell culture and analysis.
- Histology: histological assessment and histopathological examination of tissue samples.

Available equipment includes microscopes and photomicrographic systems, biological safety cabinets, incubators, liquid nitrogen containers, diurnal growth chamber, autoclave, centrifuges, ovens, microtome, paraffin histoembedder, electrophoresis and blotting apparatus, thermal cycler (PCR), chromatography systems.

Chemistry Lab

The chemistry laboratory provides a wide variety of facilities to support chemistry students and faculty members' research and teaching. Students are introduced to the fundamental quantitative, organic, and food analysis experimental methods through experiments in:

- Chromatographic analysis of alcohol content in beverages
- Determination of nutrients, vitamins, and minerals in foods
- Properties of enzymes
- Browning reactions in foods
- Spectrophotometric determination of analytes in different sample types
- Water analysis
- Precipitation and complexation titrations

The laboratory is equipped with a modern gas chromatograph, UV-visible spectrophotometers, digestion-distillation unit for nitrogen determination, solvent extraction apparatus, digital densimeter, electronic refractometer, pH meters, ion-selective electrodes, etc.

Physics Lab

The physics lab is a completely networked lab equipped with state of the art equipment allowing students in physics, engineering, and the life sciences to perform many different experiments, most of which have computer controlled data acquisition and analysis as a core component. The laboratory's *smart* design will be brought to full fruition with the networking of all PCs serving the lab into an after hours parallel computer cluster for physics simulation requiring long computations. The physics lab is also equipped with a 35-cm telescope and a complete set of astronomical instruments for teaching and research.

Geology Lab

Geology lab courses are held in the Sciences lab building and are supported by a varied collection of rock forming minerals including silicates, carbonates, sulfates, fluorides and oxides, as well as a core collection of igneous, sedimentary and metamorphic rocks. Additional teaching support is provided by the Stone Wing Museum which houses a rich collection of minerals and archaeological items from Lebanon.

STUDENT AFFAIRS OFFICE

The Student Affairs Office at the University is a service-oriented unit. It provides a number of activities and services to complement the academic work of students and help them actualize their full potential. The office creates healthy physical, social, personal, moral and cultural environments to ensure that students can make the most of their university experience. The SAO office coordinates all other activities involving students on campus.

- Undergraduate Financial Aid
- Clearance - National Social Security Funds
- Health Services
- Student Life Office
- Student facilities Office
- Athletic Services
- Clubs and Societies
- Community Service Office
- Student Union

UNDERGRADUATE FINANCIAL AID

Objectives

It is the philosophy of Notre Dame University that students should not be denied the opportunity of furthering their university education because of limited financial resources. The Student Financial Aid Program was established to meet the goal of this philosophy by providing qualified students with financial aid regardless of color, race, gender, religion, nationality, or political affiliation.

The following is a brief description of the various financial aid programs for undergraduate students.

Work-Study Grants (WSG)

The work-study grant is designed to assist full-time students with proven financial need to cover part of the cost of their education. Students who qualify as assistants are assigned to various departments or offices in the University.

Students will have to set a schedule for their working hours. The schedule should not conflict with their class schedule and should be signed by the Supervisor and the Financial Aid Officer.

The hourly rate for students on WSG is 4.5% of the actual rate per credit of each major. Students may receive up to 40% of his/her tuition fees through WSG.

Students eligible for a WSG will have the added benefit of developing their working skills as well as gaining a deeper sense of personal responsibility and accomplishment.

Eligibility

To be eligible for work-study grant, a student must:

- demonstrate financial need.
- have completed 12 credits at NDU (remedial credits not included).
- have demonstrated academic potential (cumulative GPA, minimum 2.3/4.0)
- be enrolled as a full-time student with a minimum of 12 credits each semester and a minimum of 9 credits during the last semester at NDU. Only Interior and Graphic Design students are eligible for WSG in their last academic year, since they are required to take 10 credits in their last two semesters of enrollment. This must be confirmed by the Chairperson of the Visual Arts Department.

Conditions

Any student who has been granted a WSG will be covered for a full academic year (exclusive of summer session) unless:

- his /her GPA drops below 2.3/4.0 during the first semester.
- he/she receives a scholarship from another institution exceeding 50% of tuition.
- he/she benefits from the sibling grant or the scholarship.
- he/she registers for less than 12 credits during each semester and less than 9 credits during the last semester at NDU.
- he/she does not fulfill the job requirements assigned by the Financial Aid Officer.
- he/she does not abide by the rules and regulations of the assignment.
- it is revealed later that the information submitted is forged.

Procedures

Undergraduate students may apply for financial aid by filling out an application form which can be obtained from the Financial Aid Office.

Upon taking this application, the student should schedule an interview with the Financial Aid Officer and submit the complete form with the appropriate documents before the official deadline. Every semester, dates and deadlines for obtaining and submitting applications will be updated and posted on the Financial Aid bulletin boards and on the NDU Website, and scheduled in the academic year calendar.

WSG applications must be submitted one semester in advance (for a Fall semester WSG, the application must be received by the Financial Aid Office during the previous Spring semester).

Students applying for WSG may receive a home visit from the Financial Aid Officer. After the procedure is completed, the Financial Aid Committee will review each application carefully and give the appropriate decision.

For more information, consult the Financial Aid Officer.

Student Employment

Full-time students proving to have special skills which none of the WSG students possess may be employed for the duration of one semester upon the request of Faculty Deans for academic reasons. The Financial Aid Committee will determine the working hours and the hourly rate.

Grants

a. Grant for Excellence

Students demonstrating excellence in sports, artistic, cultural, and social activities and representing the university in national and international contests could benefit from a grant ranging from 10 to 15% of tuition as determined by the Financial Aid Committee upon the recommendation of the Director of the Student Affairs Office.

To be eligible for a sports grant, the student has to:

- join a sports team at NDU
- complete 12 credits at NDU (remedial credits are not included).
- be enrolled in 12 credits each semester, and in at least 9 credits during the last semester
- maintain a minimum cumulative GPA of 2.00

b. Sibling Grant

A sibling grant is given when two or more brothers and/or sisters are registered at NDU with proven financial need. If eligible, each sibling may benefit from a discount ranging from 10% to 25%, based upon need. Benefiting from the grant depends on the Financial

Aid Committee's decision, which will determine the percentage of reduction to be allocated.

Eligibility

To be eligible for a sibling grant, a student must:

- Be enrolled as full-time student with a minimum of 12 credits except during the last semester before graduation when the number of credits may drop to 9 credits;
- Maintain a minimum cumulative GPA of 2.00.
- Be a sophomore, junior, or senior student (Intensive, Freshman, and Masters students are not eligible)

If one of the siblings does not fulfill the above criteria, the other(s) may benefit if his/her sibling is enrolled in 9 credits minimum for the undergraduate students and in 6 credits minimum for the graduate student. Benefiting from the grant depends on the Financial Aid Committee's decision, which will determine the percentage of reduction to be allocated.

Procedure

Siblings wishing to obtain a reduction on their tuition fees are asked to fill a Financial Aid Application, which is to be studied and approved by the Financial Aid Committee.

The Financial Aid application must be submitted along with the required documents within the period given by the Financial Aid office.

The sibling grant is given for one academic year. The students have to renew their application during the spring semester for the next academic year.

Every semester, dates and deadlines for obtaining and submitting applications will be updated and posted on the Financial Aid bulletin boards and on the NDU website, and scheduled in the academic year calendar.

Undergraduate Scholarship

Eligibility

To be eligible the student must

- have completed 12 credits at NDU (remedial credits are not included).
- have enrolled in 12 credits each semester and in minimum of 9 during the last semester.
- Have demonstrated academic excellence by maintaining a high cumulative GPA (3.40/4.00 and above).

The student shall benefit from the program according to the following scale:

Cumulative GPA from 3.40/4.00 to 3.65/4.00 ----- 25% Scholarship

Cumulative GPA from 3.66/4.00 to 3.79/4.00 ----- 50% Scholarship

Cumulative GPA from 3.80/4.00 to 4.00/4.00 ----- 75% Scholarship

Procedure

If the student fulfills the above criteria, he/she does not have to apply, but will automatically benefit from the discount on his/her tuition fees.

For more information please contact ext.: 2052/2182 or financialaid@ndu.edu.lb

CLEARANCE - NATIONAL SOCIAL SECURITY FUNDS (NSSF)

Returning Students

Returning students under the age of 30 who are sophomores, juniors, seniors, graduate and who

a. benefit from any of those governmental health plans:

- صندوق تعاونية موظفي الدولة
- صندوق تعاضد القضاة
- صندوق تعاضد الهيئة التعليمية في الجامعة اللبنانية
- البلديات
- الصندوق الوطني للضمان الاجتماعي

must:

- fill out Form **B** (تصريح استفادة)
- attach an original statement from the local office they (or their parents) belong to (افادة من مركز التبعية الرسمي), which certifies their benefit.
- attach a photocopy of their Family Status Record (إخراج قيد عائلي) not older than one year.

b. benefit from

انظمة القوى الامنية (الجيش, الامن الداخلي, الأمن العام, امن الدولة, والجمارك)

must:

- fill the Form **B** (تصريح استفادة)
- attach a photocopy of their benefit card; (صورة عن البطاقة الصحية المجددة)
- Attach a photocopy of their Family Status Record (إخراج قيد عائلي) not older than one year.

N.B: procedure is repeated at the beginning of every academic year.

c. have stopped benefiting from a governmental health plan (mentioned above) while at NDU must:

- fill out Form **A₁** (تصريح عن طالب جامعي) and Form **A₂** (تعهد عدم استفادة);
- attach a photocopy of the Family Status Record (إخراج قيد عائلي) not older than one year;
- attach an original statement from the governmental health plan certifying that they are not benefiting; or a photocopy of the benefit card (Military services).

d. do not benefit from any governmental health plan (mentioned above) while at NDU and are enrolled for the second or more consecutive year at NDU must:

- Verify their cleared status through the SIS program prior to payment at the Bank and the registration procedure accomplishment.

Filling out Form C (اعلام عن طالب مسجل) is the responsibility of the Social Security Office – SAO.

Thus, students who are registered at the National Social Security Funds as NDU students and who did not report any change of status, are not required to pass by the SAO. Their coverage by NDU will be automatically renewed for a fee of L.L. 90.000 payable along with their tuition fee at the bank.

However, if any change of status takes place (new work, new National Social Security Funds coverage...) students are required to inform the SAO. Students who did not complete this step are totally held responsible for any problem that might arise due to an incomplete NSSF file.

- Returning students who reach the age of 30 years old are exempted from presenting any official document and have to fill Form **B** (تصريح استفادة);

Students will not be able to register if they do not submit the required documents at the Social Security Office at the SAO.

Students can pick up their appropriate forms from the Social Security Office at the SAO or from the Internet (www.ndu.edu.lb).

New students

New students who:

a. do not benefit from any governmental health plan

must:

- fill out Form **A₁** (تصريح عن طالب جامعي) and Form **A₂** (تعهد عدم استفادة);
- attach a photocopy of the Family Status Record (إخراج قيد عائلي) not older than one year.

b. benefit from any governmental health plan

must:

- fill out Form **B** (تصريح استفادة)
- attach an original statement from the local office they (or their parents) belong to (إفادة من مركز التبعية الرسمي), which certifies the benefit;
- attach a photocopy of the Family Status Record (إخراج قيد عائلي) not older than one year.

New students accepted as **Intensive English or Freshman (Arts, Sciences)** are exempted from NSSF benefit obligations.

After fulfillment of any of these two levels' requirements (Intensive or Freshman) and before registration of their regular courses, students are requested to pass by the Social Security Office – SAO to present documents required for Clearance like any other regular NDU student.

New students accepted as Foreigners (non-Lebanese students) are exempted from NSSF benefit obligations.

New students (transferred) who benefit from the NSSF through the former University for one or more consecutive years must:

- 1- fill out the Form **C** (إعلام عن طالب مسجل);
- 2- attach **Receipts** (per Academic year) or **Administrative Statement** in Arabic from the former University;
- 3- attach a **photocopy** of their Family Status Record (إخراج قيد عائلي) not older than one year;
- 4- attach a **photocopy** of their NSSF card.

New students (transferred) willing to register for the Spring Semester and had NSSF clearance as beneficiary from the previous University for the Fall Semester of the current Academic year must:

- 1- fill out the Form **B** (تصريح استفادة);
- 2- attach a Receipt or Administrative Statement in Arabic from the former University;
- 3- attach a copy of their Family Status Record (إخراج قيد عائلي) not older than one year;
- 4- attach a copy of their NSSF card.

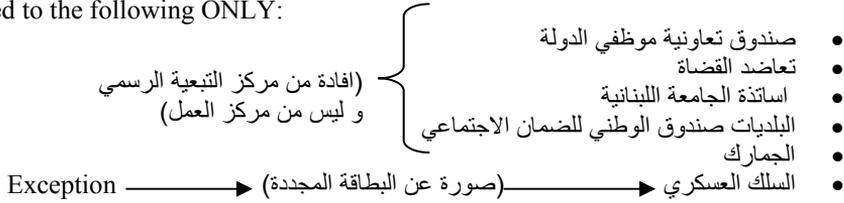

Students can pick up their appropriate Forms from the Social Security Office – SAO or from the Internet (www.ndu.edu.lb).

On forms **A₁, A₂, B, C**, the statement, and the photocopy of the Family Status Record (إخراج قيد عائلي) students must write on the top :

- 1- I.D. number as it appears on the letter of acceptance ;
- 2- major;
- 3- date of birth (D.O.B.) as it appears on the I.D. (الهوية)

The Social Security Fund covers 80% of the medication, radiology and 90% of the hospitalization. Besides, it is a Governmental requirement from every student.

The **governmental health plans** approved by the National Social Security Fund (NSSF) are limited to the following ONLY:

For more information please contact ext.: 2114 or nssf@ndu.edu.lb

HEALTH SERVICES

NDU will provide all NDU students with a variety of health services at the new NDU Infirmary located at the Student Affairs Office in collaboration with “Centre de Biologie Moleculaire et Polyvalente – BMP” in Adonis.

a. The following tests are obligatory for all new students before registration:

- Blood cell count
- Blood grouping
- P.P.D.
- Serology HIV
- Hepatitis B
- Hepatitis C
- Chest X-ray

All these tests will be administered at the NDU Infirmary for a fee of L.L. 165,000, to be paid in advance at Byblos Bank. This fee will also allow students to benefit from other services provided at the Infirmary. Any student who is readmitted to NDU after 2 semesters of absentia will have to undergo this procedure again.

b. In addition to the chest X ray, the NDU Infirmary offers radiology X-ray services for emergency fractures. Students pay 80% of the medical expenses upon receiving the services, which is equivalent to what they claim from the NSSF.

c. The “Centre de Biologie Moleculaire et Polyvalente – BMP” provides technicians to administer the various tests and examinations between 8:00 and 16:00 daily at the NDU Infirmary.

d. NDU reserves the right to request random blood-tests from any student to test for drug use or for any other medical reason.

The University physician is available twice a week from 11:00 to 13:00 at the Infirmary and is on call for any help and for free consultations 24/7 free of charge.

The University nurse is available on a daily basis from 8:00 to 16:00.

Serious cases are sent to the nearest hospital.

All students with medical ailments have to contact the NDU physician for validation within 48 hours of their sickness/injury. No medical excuses will be accepted at NDU unless validated by the NDU physician.

Counseling Services

The wellbeing of individuals is not limited to physical health but includes physical, mental, and emotional health. At NDU, counselors are available to serve and help the entire NDU community (students, faculty, and staff). This service is rendered with care, respect, and confidentiality.

Assistance is available for a variety of concerns which include, but are not limited to, the following:

- overall stress and anxiety
- crisis intervention for individuals facing traumatic stress
- problems related to eating disorders
- concerns related to addiction (drugs, alcohol, etc.)
- personal issues
- relationship problems
- chronic illness
- sadness and depression
- difficulty adjusting to new situations
- grief and bereavement counseling

Find out more about this service at the Infirmary or by contacting ext.: 2049 or infirmary@ndu.edu.lb

Insurance Policy

NDU students who have an accident when practicing any kind of activity inside or outside the university premises are insured up to \$1000. Students should pass by the Infirmary during regular working hours in order to fill out the appropriate form.

If the accident occurs outside working hours, students should go to the Infirmary at a later date to complete the procedure.

This insurance service is in addition to the NSSF coverage.

For more information please contact ext.: 2049 or infirmary@ndu.edu.lb or pass by the Infirmary.

STUDENT LIFE OFFICE

Attendance Policy

Students should attend all classes and laboratory sessions on time. Absences, whether authorized or not, even if below the maximum number (specified below), may alter one's grade substantially. The SAO alone authorizes absences. No absence absolves a student from responsibility regarding the material presented during his/her absence. **The maximum number of absences permitted in classes that meet on MWF is six; the maximum number of absences permitted in classes that meet on TTH and in the summer is four.**

Any student whose absences exceed the maximum limit shall automatically be considered as having failed the course unless the student withdraws.

Students who miss classes or exams should contact the University physician, Dr. Elias Chemaly, within 48 hours of their sickness. The NDU physician should examine each student before deciding whether a medical report should be given or not. The SAO will not issue any excuse without the approval of the NDU physician.

Dr. Elias Chemaly, M.D. (Tel. # 03.725559) is available from 11:00 am until 1:00 pm at the Infirmary, SAO.

International Student Services

The international Student Services provides support for international students at NDU and assistance in whatever they may need. It also helps them to integrate into the NDU community, specifically with other students. International students are urged to pass by the Student Affairs Office upon arrival and on a regular basis.

Lost and Found

The Lost and Found Office is operated from the Student Affairs Office. Articles found are to be turned in to the SAO. Persons looking for lost items may inquire at the office or call ext.: 2045. To claim an item, the person must clearly identify it. To help in recovering lost or stolen items, it is suggested that students put their names on their valuables. Items not claimed after sixty days will be considered abandoned

STUDENT FACILITIES OFFICE

Identification Card (ID)

The NDU Smart ID card identifies the cardholder as a current member of the university community. It is required for all administrators, faculty, staff and currently enrolled students at the University. It must be carried at all times. The ID card is the property of Notre Dame University; it must be presented upon the request of an appropriate University official, and may be revoked at any time by the University.

Cardholders may use the card to access various privileges and services throughout the campus such as parking, dormitories, Library, etc.

Lost or stolen cards must be reported immediately to ID Card Services, SAO ext: 2306 or studentfacilities@ndu.edu.lb

Campus Parking

Parking permits are obtained from Parking Services, SAO at the beginning of every semester. Parking permits must be displayed correctly at all times (lower left side of the windshield). All vehicles are subject to university parking regulations while on campus. Any vehicle parked in violation of parking regulations is subject to being removed and impounded at the owner's expense. The university assumes no responsibility for damage or loss of private property. Students are required to abide by and respect the directions of the NDU security personnel.

Student Housing

Arrangements for on-campus housing are made through the Student Facilities Office at the SAO. To reserve a room, students are asked to pass by the SAO with their parents to visit the dormitories and to be informed about the rules and regulations. Email: studenthousing@ndu.edu.lb

ATHLETIC SERVICES

NDU's athletics programs are designed to offer students the opportunity to fully develop their physical potential and competitive spirit while engaging in a sports activity for fun and for health reasons.

NDU's Sports Office provides a wide range of sports activities including: basketball, volleyball, Judo, Taekwondo, Aikido, physical fitness, body building, tennis, swimming, soccer, handball, rugby, track and field, water-polo, table tennis, chess, etc.

NDU's athletic teams are trained by qualified coaches and participate in local, regional, and overseas tournaments earning recognition for themselves and the University.

A multipurpose gym for martial arts, body building, and dancing will be open soon.

For more information please contact ext.: 2043/2044 or sportdep@ndu.edu.lb

STUDENT ACTIVITIES OFFICE

One way for students to be more involved in life on campus is through participation in extra curricular activities by being active members in clubs and societies. For a club to be recognized, its purpose must be consistent with the stated University By-laws and must have a full-time faculty member as an advisor. The Student Student Activities Office also assists students and clubs in organizing public events on Campus.

The following student clubs and societies have been established for the academic year 2007-2008 to provide recreational and co-curricular activities:

Clubs

- Accounting
- Advertising
- Architecture
- Astronomy
- Biology
- Computer Graphics and Animation
- Computer Science
- Debate
- Discovery
- Economics
- Electroholic
- First Aid
- Genuine
- Hospitality and Tourism
- Architecture
- Astronomy
- Biology
- Computer Graphics and Animation
- Computer Science
- Debate
- Discovery
- Economics
- Electroholic
- First Aid
- Genuine

- Hospitality and Tourism
- International Relations
- Information Technology.NET
- Leaders
- Music
- Naharashabab
- Nutrition and Health
- Sartarabad
- Scouts
- Social
- American Society for heating Refrigerating and Airconditioning Engineers
- American Society of Mechanical Engineers
- Institute of Electrical and Electronic Engineers
- Society of Civil Engineers
- Radio TV / Film
- Skiing

Community Service Office

The goal of the Community Service Office is to encourage the students to get involved in volunteer work in order to benefit the community, mainly through its non-profit institutions.

The CSO aims to help the students in optimizing their potentials and instilling in them a spirit of responsibility and moral awareness.

Through this, the students will be able to transmit their shared experience to their communities, families and country.

Student Union (SU)

The Student Union is the elected body representing students. Its purpose is to speak on behalf of the students, defend their rights within the framework of the University Rules and Regulations in compliance with the SU By-laws, and organize events that cater to the student body at large.

SPONSORED RESEARCH AND DEVELOPMENT

THE OFFICE OF SPONSORED RESEARCH AND DEVELOPMENT

This office coordinates and supervises all activities related to research projects and development endeavors. It issues calls for research proposals for evaluation and follow-up. It carries a plan for book publications covering old manuscripts and contemporary writings in the different disciplines related to the programs offered by the University. It has established the archives of research projects and seminar or conference presentations locally and overseas, prepared by NDU faculty and staff members. The Office coordinates with the following Research Centers, and offices namely:

CENTER FOR APPLIED RESEARCH IN EDUCATION (CARE)

The Center was established on October 1st, 2006. The CARE objectives are: to promote multi-disciplinary research in education; to establish and utilize personal contacts with international academic institutions; to conduct analytical studies on curricula development and policy-making studies in higher educational institutions in Lebanon and Arab countries; to organize academic international conferences in the Arab countries; in order to promote excellence in education.

LEBANESE CENTER FOR SOCIETAL RESEARCH (LCSR)

The University established a center for research, studies and documentation in the framework of a university research policy that aimed at developing the role of scientific research in the treatment of social, economic, political, educational, ethnical and human issues in society and, further, at activating the contribution of spiritual and civil institutions in this treatment.

LEBANESE EMIGRATION RESEARCH CENTER (LERC)

The political, economic and social conditions in Lebanon and the Middle East were direct reasons for increasing the Lebanese Emigration. However, little is known about it and its impact on the Lebanese social, political, economic and cultural structures. Lebanon feels the basic and immediate need for research studies on the subject, where the LERC can play a significant role in collecting information and conducting the necessary and proper research on this vital issue to Lebanon.

THE MARIAN STUDIES CENTER (MSC)

The Center was established by NDU to act as a center for the “International Pontifical Marian Academy” in Lebanon and the Middle East. The Center was officially inaugurated in November 2003, and was baptized as The Marian Studies Center.

WATER, ENERGY AND ENVIRONMENT RESEARCH CENTER (WEERC)

The WEERC aimed at investigating water energy resources, and the state of the environment in Lebanon and the MENA region under its multi-facial aspect. The role of the Center is to develop appropriate strategies and provide training for the proper optimization and integrated management of water and energy use for a prosperous environment.

CENTER FOR DIGITIZATION AND PRESERVATION (CDP)

The Center aims to assist mainly scholars, clergy, and governments in the preserving, imaging, and distribution of ancient writings. It offers important services, such as:

1. the preservation of significant philosophical and theological manuscripts by photography and/or electronic scanning;
2. the digitization and incorporation of selected manuscripts into searchable electronic databases at minimal cost;
3. the translation and publication of selected ancient and medieval texts;
4. the preservation and digitization of any material the University may deem appropriate.

NDU PRESS

NDU Press comprises the following units:

1. Translation Office
2. Design Office
3. Editing Office

Three major steps have been taken by NDU Press to revive book-publishing activities on a professional level:

- all published books, as of October 2000, carry an ISBN number, which ensures recognition for NDU Press in Lebanon, Europe and the USA as a professional university publishing house;
- all books are reviewed with a recommendation to the President before a final decision for publication is made. Specialized scholars are consulted to support such recommendations and decisions;
- an agreement with a distribution agency has been worked out by which all books by NDU Press are distributed to major bookshops in Lebanon and overseas.

AMERICAN FRIENDS OF NDU (AFNDU)

The development responsibilities are to keep strong relationships with the NDU-USA Organization established in February 2001 with three Chapters: Washington DC, Detroit and Connecticut.

The objectives of the *American Friends Association* are:

1. to establish a strong cultural link with graduates, friends, former students, faculty and staff of NDU residing in the USA;
2. to build relationships with the American/Lebanese communities;
3. to establish exchange programs with American Universities and other institutions of higher education;
4. to seek the cooperation of public libraries, university libraries and university press offices for exchanges of publications with NDU;
5. to create direct relations with American Publishers especially for textbook orders and library references;
6. to provide financial assistance.

WASHINGTON DC OFFICE

The University's Office in the USA was founded in 2003 and is located in Washington DC. Its role has been outlined as follows:

1. to promote the educational values and goals of NDU;
2. to assist the AFNDU Organization with their activities;
3. to liaise with alumni, friends, former faculty and staff of NDU;
4. to help recruit faculty members;
5. to help children of American-Lebanese and friends of NDU-Lebanon residing in the US to visit the NDU campus;
6. to help develop cooperative relationships with American institutions of higher education;
7. to assist NDU libraries develop.
8. in coordination with the concerned offices at NDU, to provide administrative services to NDU graduates residing in the US.

UNIVERSITY INTERNATIONAL AFFAIRS OFFICE

This Office initiates contacts and follow-up programs with overseas universities and development agencies related to higher education.

The purpose of these programs is to support cocurricular activities and collaborative projects that lead to innovative institutional partnerships and exchange plans of action.

Memoranda of Cooperation and/or Understanding:

- Assumption University in Bangkok, Thailand
- Brigham Young University, Utah (Digitization of manuscripts)
- Central Connecticut State University, USA
- Centro Libanès, Mexico City
- El-Camino University
- El-Colegio de Mexico, A.C.
- ESC Bordeaux, France
- Italian Cultural Institute in Lebanon
- Madonna University (presidential scholarships for students of both institutions), USA
- Mexican Lebanese Cultural Institute

PUBLIC RELATIONS OFFICE

By definition, "Public relations is the strategic management of relationships between an organization and its diverse publics, through the use of communication, to achieve mutual understanding, realize organizational goals, and serve the public interest."

Fully embracing this definition, the Public Relations Office at Notre Dame University believes that, in today's fast changing conditions, maintaining healthy relations with stakeholders and building networks can be in the interest of all sides. Therefore, the main function of the Public Relations Office is to improve channels of communication and to institute new ways of setting up a two-way flow of information, developing and fostering mutually beneficial relationships between the University and its environment.

Thus, on behalf of Notre Dame University, its campuses and centers, staff and students, the Public Relations Office presents and communicates all programs and policies. It provides and develops communications strategies, consultation, event-planning services university-wide and works proactively with media outlets.

The Public Relations Office works in collaboration with its two Offices in the North Campus and the Shouf Campus, coordinating all activities and social events that take place during the academic year.

The Office represents the University by attending various meetings of the League of Lebanese Universities and other annual meetings of the Association of Arab Universities. In addition, it is also an active member of the Coordination Council for Catholic Universities in Lebanon (CCUCL) and the Association of Collegiate Registrars & Admissions Officers (Arab – ACRAO) for the universities of the Arab countries.

The Public Relations Office has built up strong local media contacts to maintain good relations with its community by organizing a variety of conferences and events aiming at promoting and enhancing the university's image and reputation on the local, regional and international levels. The Office is responsible for informing external audiences by updated announcements about the University news and upcoming events as well as writing and distributing press releases and statements for publication in various reputed magazines and newspapers. The Office is also responsible for preparing and supervising the production of program brochures, material promoting special events (programs, leaflets, posters and invitations) and handbooks.

The Public Relations Office is the link between the University and the local government and legislators. It coordinates with the Ministry of Education and Higher Learning in order to obtain decrees and advanced information of decisions. It also plays a major role in Trust Communications - both internally with staff and externally with public and private sectors. As public image is important to all organizations, the role of public relations office becomes pertinent in crisis situations; in the case of any fallacious news being published about NDU, the Public Relations Office, after consulting with the President's Office, issues necessary clarifications.

PRESS OFFICE

The purpose of the Press Office is to publicize NDU achievements, activities and progress, ensure proper coverage of relevant issues in the local press and publish notices of upcoming events. It also links the press to faculty experts for opinions and analysis, and assists in the production of a variety of publications such as NDU Spirit. The office's press attaché archives press clippings published in the press and posts them on the NDU website.

PLACEMENT OFFICE

The Placement Office is an integral part of the Public Relations Office. It is supervised by the Director General of the Public Relations and entrusted to a placement officer.

This office provides employment opportunities for NDU graduates by acting as a liaison between local and international companies, NDU and NDU graduates and Alumni. It also guides students in their search for jobs and schedules on-campus job interviews.

Moreover, it arranges human potential seminars for prospective employers and organizes an annual Job Fair.

INTERNSHIP OFFICE

The Internship Office provides students with practical experience in their major before graduation. For this purpose, the Internship Office is building a contact database with leading reputable institutions, companies, embassies, banks, etc. in and outside Lebanon.

The internships offered are intended to provide real-life experience that compliment the curriculums taught in the classroom. Personal and professional growth is fostered through the proper balance of guidance, independence and the acceptance of responsibility.

The internship will frequently open the door to future employment and will solidify career plans; and in certain cases, it may prompt students to consider other career options.

MUSEUM

The Stone Wing, inaugurated on March 9, 2005, is also supervised by the Director General of Public Relations. It is entrusted to a curator who receives and guides visitors (students from different schools and universities, staff, deans, and national and international guests of NDU) by informing them about the museum and its various and valuable collections.

The duties of the curator encompass the preservation and conservation of the collections, archiving and cataloguing of new acquisitions, scheduling and coordinating visits, and keeping records of all visitors.

ALUMNI AFFAIRS OFFICE

Graduation from Notre Dame University is NOT the end of the student's affiliation with the University. Instead, it is the beginning of a new phase of the relationship with the University. The Alumni Affairs Office (AAO) is responsible for maintaining the links of alumni with the University.

The **Mission of the Alumni Affairs Office** may be identified as:

- Serve the needs of Alumni.
- Foster close relations between the University and its Alumni.
- Maintain an alumni database system as the mailing list for "NDU Alumni"
- Coordinate with NDU Alumni Association.
- Organize professional, cultural, networking and social activities for NDU Alumni.
- Communicate Alumni views, needs and interests back to the University.
- Expand Alumni participation in publicizing the strengths of NDU to the World at large.

The Alumni Affairs Office serves as a focal point for all alumni activities and communications. The Office then will assist in planning or sponsoring alumni activities such as Campus Tour, Alumni E-newsletter, Alumni Annual Awards, Fundraising, Mentor Program, Class reunions, Alumni Day, Alumni House, Alumni Gala Dinners, ect.

NDU ALUMNI ASSOCIATION

It is an association established in 1992, by a group of graduates who wanted to remain connected to and involved with their alma mater, with the aim of reuniting all graduates of NDU under a common goal: Commitment, Unity and Prosperity to both Notre Dame University and the welfare of its graduates.

Through its cooperation with NDU Alumni Affairs Office, the association seeks to provide alumni with a lasting bond to the University.

DIVISION OF CONTINUING EDUCATION

The Division of Continuing Education provides learning opportunities for individuals who want to develop their knowledge and skills without enrolling in regular academic programs.

The courses given by the DCE are administered in the afternoon, each for a period of six weeks.

The following are the various programs offered by the DCE:

BUSINESS CERTIFICATES

Business Management
Business Marketing
Business Accounting
Banking & Finance
Human Resources Management
Entrepreneurship

COMPUTER CERTIFICATES

Computer Applications & Office System
Computer Engineering & Architectural Production
Desktop Publishing
Website Design
Multimedia Production
TV-Production & Motion Graphics

ENGLISH LANGUAGE

Proficiency in English
English for Bankers
English for Business
Spoken English
Public Speaking

OTHER PROGRAMS

Certification Programs

CMA: Certified Management Accountant
CPA: Certified Public Accountant
CFA: Chartered Financial Accountant

Executive Training Program

LMI: Leadership Management International
AIF: Applied Investment Finance

Arts and Crafts

Drawing and Painting
Lace Embroidery
Cooking and Decoration
Ceramics

University Preparatory Programs

SAT I; SAT II; TOEFL; EET; GMAT

ADMISSIONS OFFICE

Notre Dame University (NDU) is a Lebanese non-profit Catholic institution of higher education that adopts the American system of liberal arts education. NDU stresses the cultural and spiritual heritage of the Maronite Mariamite Order, a pioneer in education as a means of promoting human dignity since its foundation in 1695. The religious affiliation of the University does not entail any sectarian obligation: applicants are granted equal opportunity irrespective of color, religion, gender, creed, disability or national origin. **By promoting its academic and administrative facets and by recruiting students from local, regional and international provenance, the Admissions Office aims at enhancing the universal image of NDU, an institution where all can explore the horizons of positive plurality within a rich human spectrum.** At present, the seven Faculties at NDU are attracting students from over 40 countries worldwide and are catering for the market demands of Lebanon and its surroundings.

UNDERGRADUATE ADMISSION

Applications may be downloaded from the NDU Home Page (www.ndu.edu.lb). Applicants must complete the application form and return it with a non-refundable fee of 100,000 L.L. to the Admissions Office. NDU Examination fees are 150,000L.L.: [75,000L.L. (English); 75,000L.L. (other)].

The following documents must be submitted with each application form:

- A Secondary School Record and a Letter of Conduct from the school principal.
- A Letter of Recommendation from the school principal (or from the university administration, if any).
- A photocopy of the Identity Card or Passport.
- Two recent passport-size photos.
- Certified copies of all official certificates or diplomas.
- Scores of exams taken outside NDU (TOEFL, SAT I and SAT II).

Freshman applicants must additionally submit:

- An official school document attesting that they have completed and passed their High School requirements.
- A written authorization from the Equivalence Committee.
- Scores of both SAT I & SAT II.

Documents must be original. All documents submitted to complete a file become the property of NDU. Whether accepted or rejected, applicants may not claim any of the documents.

Following is a table of the deadlines for submitting applications and the exam dates.

Semester	Application Deadline	Examination Dates
Spring Semester, 2010	November 2-November 30, 2009	January 21 & 22, 2010
Fall Semester, 2010	May 3-June 1, 2010	July 2 & 3, 2010
Fall Semester, 2010	July 1-August 2, 2010	August 27 & 28, 2010

Applicants may check their status on the website. This status, however, is not final until the applicant receives an official letter of admission from the Admissions Office along with all documents for registration. These include the orientation schedule, methods of payment

from the Business Office as well as social security clearance and medical exams from the Student Affairs Office.

FRESHMAN ADMISSION REQUIREMENTS

Non-Lebanese or students who have followed a High School program for at least three years may apply to the Freshman Class. They must hold a Secondary School Certificate (Grade 12) recognized by the Lebanese Ministry of Education. Applicants to the Freshman Class are required to take both the Scholastic Aptitude Tests SAT I & SAT II prior to registration as required by the Lebanese Ministry of Education for the equivalence of the Baccalaureate Part II. These tests will be specified according to either the Freshman Sciences or Arts stream. SAT I includes Verbal Reasoning, Mathematical Reasoning and Writing. SAT II (Arts) includes Math 1C plus two SAT II Subject Tests. SAT II (Sciences) includes Math 2C plus two of the following science subjects (Biology, Chemistry, Physics). The required minimum score for the combined SAT I & SAT II is 2750 for Freshman Arts and 2850 for Freshman Sciences.

In addition to the SAT I & SAT II, all applicants must satisfy an acknowledged level of English proficiency in order to be admitted. Notre Dame University recognizes one of the following instruments to measure this level: EET (English Entrance Test) administered by NDU, or TOEFL (Test of English as Foreign Language) administered by Amideast or the writing section of the SAT I.

Moreover, applicants to the Freshman Class must obtain a written authorization from the Equivalence Committee of the Lebanese Ministry of Education. This document will allow students to pursue their higher education on the basis of a foreign program.

Note: Freshman students must successfully complete at least 30 credits in order to receive an equivalence. Students may not be promoted to a Sophomore (or any other) class before they complete all Freshman requirements.

SOPHOMORE AND FIRST YEAR ADMISSION REQUIREMENTS

Applicants must hold the Lebanese Baccalaureate Part II or its equivalent, as determined by the Lebanese Ministry of Education, in order to be eligible for the Sophomore or First Year Class. The strand of the Lebanese Baccalaureate Part II (General Sciences, Literature and Humanities, Social Sciences and Economics, Life Sciences) must correspond to the requirements of the desired program of study of the respective Faculties at NDU. **Applicants must accumulate a certain score required by these Faculties in order to be admitted in their offered majors. This score is calculated by allocating 55% weight to the school grades (second and third secondary years) and 45% to SAT I (or NDU Entrance Test).**

TRANSFER ADMISSION REQUIREMENTS

Applicants who have completed at least 12 credits at the Sophomore level and/or First Year level outside NDU with a cumulative GPA of at least 2.0/4.0 beyond their secondary school education, and have been accepted by NDU's Admissions Office to register for a full-time load during the Fall or Spring semester, are considered transfer students. Courses earned at other institutions recognized by NDU, graded C or higher, and matching courses offered at NDU, are considered transferable.

Only courses completed at NDU will be computed in the student's GPA. Transfer students to the FAAD (excluding BA in Graphic Design) and FE must complete at least 45 credits at NDU with a cumulative GPA of 2.0/4.0 and meet all other graduation requirements for that degree. Transfer students to the FBAE, FH, FNAS and FPSPAD must complete at least 30

credits at NDU with a cumulative GPA of 2.0/4.0 and meet all other graduation requirements for that degree.

Transfer applicants must submit official transcripts of records as well as a catalog from the previous college or university along with an application for admission to NDU. The conditions for acceptance are specified by the University Admissions Committee, and applicants will be notified of these conditions prior to registration.

ADMISSION REQUIREMENTS FOR INTERNATIONAL STUDENTS

International applicants must complete an application form and submit it to the Admissions Office along with the appropriate documents. The form can be downloaded from NDU home page (www.ndu.edu.lb). International students must fulfill requirements specified by the Admissions Office in accordance with the rules and regulations set by the Ministry of Education.

ADMISSION REQUIREMENTS FOR SPECIAL STUDENTS

Students who are not working toward a degree are considered Special Students. Applicants must complete an application form and submit it to the Admissions Office along with the appropriate documents. Admission requirements for such applicants are the English Entrance Test (EET), if they are from non- English institutions, and the Baccalaureate Part II or its equivalence. The Admissions Committee will study any other special case. Special status is granted for one academic semester. Thereafter, if a student petitions for a 'Regular Student Status', he/she must fulfill all admission requirements, including passing the required entrance exams, before the procedure of his/her admission to the 'Regular Student Status' can be started.

ADMISSION REQUIREMENTS FOR AUDITORS

Students applying as Auditors are not entitled to a degree or credits or grades for the courses that they attend. An application form must be completed and submitted to the Admissions Office along with the appropriate documents. Admission requirements for such applicants are the English Entrance Test (EET) if they are from non- English institutions. In general, applicants must be university level students. If not, their files are considered on an individual basis.

ADMISSION REQUIREMENTS FOR A SECOND DEGREE

Students who already have a university degree can apply for a second degree. The number of credits required for graduation are determined by the concerned Faculty. However, the minimum residency requirements are 30 credits.

ADMISSION REQUIREMENTS FOR TEACHING DIPLOMA/CERTIFICATE

Applicants who hold a Bachelor Degree can apply for the Teaching Diploma in the same area of specialization. Applicants who have the Baccalaureate Part II, or a Bachelor Degree in a different area of specialization, may apply for a Teaching Certificate. Applicants who have been out of school for five years or more are required to fulfil NDU admission requirements.

ADMISSION REQUIREMENTS FOR SUMMER ARABIC PROGRAM

Anyone who is interested in attending the Summer Arabic Program offered by NDU must submit an Undergraduate or Graduate Application Form (to be downloaded from www.ndu.edu.lb under Admissions Office) along with the Application Form as it appears in the Summer Arabic Program brochure. In addition, an official transcript of the most recent academic year is required. The questionnaire of purpose (see the brochure) must be completed and submitted along with a recommendation from an Arabic language teacher (where applicable). A writing sample from an Arabic course, test or homework is also required. The non-refundable application fee is US\$30 (check or money order made to Notre Dame University, Lebanon).

ADMISSION REQUIREMENTS FOR UNIVERSITY EMPLOYEES

Notre Dame University employees who request admission to a program of study must meet the minimum admission requirements of the respective Faculty. Accordingly, entrance tests, interviews and recommendations shall be left to the discretion of the concerned Faculty. However, employees are considered regular applicants and must abide by the University policy. The Director of Admissions will issue a letter of admission to identify the academic status of the applicant.

ENGLISH PROFICIENCY REQUIREMENTS

All applicants must satisfy an acknowledged level of English proficiency in order to be admitted. Notre Dame University recognizes one of the following instruments to measure this level:

EET (English Entrance Test) administered by NDU.

OR

TOEFL (Test of English as Foreign Language) administered by Amideast.

OR

The writing section of the SAT I.

A student has to pass the EET with a minimum score of 650 in order to be admitted without remedial English courses, and a minimum score of 350 in order to be admitted with remedial English courses. Following are the required remedial English courses along with their corresponding EET score ranges.

EET Score Ranges	Accepted/Rejected	Corresponding Remedials
650 and above	Accepted	No remedials (ENL 213)
600-649	Accepted	ENL 110
500-599	Accepted	ENL 105 ² (5credits)
350-499	Accepted	ENL 002 ¹ (12 credits)
0-349	Rejected	

A student must pass the TOEFL with a minimum score of 243 (computer-based), [590-593] (paper-based) or [96-97] (internet-based, or iB), in order to be admitted without remedial English courses, and a minimum score of 180 (computer-based), [507-510] (paper-based) or 64 (internet-based), in order to be admitted with remedial English courses (including intensive).

¹ Students are permitted to take a Math remedial in addition to this course. Any student enrolled in ENL 002 who scores a B or above will be automatically passed to ENL 110

Following are the required remedial English courses along with their corresponding internet-based TOEFL score ranges.

iB-TOEFL Score Ranges	Accepted/Rejected	Corresponding Remedials
96-97	Accepted	No remedials
[(88-89)-(94-95)] ¹	Accepted	ENL 110
[71-(86-87)] ²	Accepted	ENL 105
[64-(69-70)] ³	Accepted	ENL 002
Below 64	Rejected	

FACULTY ADMISSION REQUIREMENTS

Faculty of Architecture, Art and Design (FAAD)

Applicants must pass the Lebanese Baccalaureate Part II (any strand) or its equivalent as identified by the Lebanese Ministry of Education.

The selection depends on the following assessment model:

1. TOEFL, or Writing Section of SAT I, or EET (for NDU English proficiency requirements)
2. SAT I or the NDU Entrance Test
3. Secondary School Grades

School grades (second and third secondary years) are weighted 55% and SAT I (or NDU Entrance Test) 45% for calculating the composite score required by the FAAD in order to admit students in its majors.

Faculty of Business Administration and Economics (FBAE)

Applicants must pass the Lebanese Baccalaureate Part II (any strand) or its equivalent as identified by the Lebanese Ministry of Education.

The selection depends on the following assessment model:

1. TOEFL, or Writing Section of SAT I, or EET (for NDU English proficiency requirements)
2. SAT I or NDU Entrance Test
3. Secondary School Grades

School grades (second and third secondary years) are weighted 55% and SAT I (or NDU Entrance Test) 45% for calculating the composite score required by the FBAE in order to admit students in its majors.

Faculty of Engineering (FE)

Applicants must pass the Lebanese Baccalaureate Part II (General Sciences or Life Sciences) or its equivalent as identified by the Lebanese Ministry of Education.

The selection depends on the following assessment model:

1. TOEFL, or Writing Section of SAT I, or EET (for NDU English proficiency requirements)
2. SAT I or NDU Entrance Test
3. Secondary School Grades

¹ This corresponds to 230-240 range computer-based.

² This corresponds to 197-227 range computer-based.

³ This corresponds to 180-193 range computer-based.

School grades (second and third secondary years) are weighted 55% and SAT I (or NDU Entrance Test) 45% for calculating the composite score required by the FE in order to admit students in its majors.

Faculty of Humanities (FH)

Applicants must pass the Lebanese Baccalaureate Part II (any strand) or its equivalent as identified by the Lebanese Ministry of Education.

The selection depends on the following assessment model:

1. TOEFL, or Writing Section of SAT I, or EET (for NDU English proficiency requirements)
2. SAT I or NDU Entrance Test
3. Secondary School Grades

School grades (second and third secondary years) are weighted 55% and SAT I (or NDU Entrance Test) 45% for calculating the composite score required by the FH in order to admit students in its majors.

Applicants for the degrees of Arts in Arabic Language and Literature are also required to sit for an additional placement test in Arabic. Moreover, applicants to Translation and Interpretership are required to sit for placement tests in Arabic and French.

Faculty of Natural and Applied Sciences (FNAS)

Applicants to the FNAS majors in Biology, Nutrition & Dietetics, Environmental Sciences, Medical Lab Technology and Business Computing must pass the Lebanese Baccalaureate Part II (any strand) or its equivalent as identified by the Lebanese Ministry of Education. Applicants to the remaining majors offered by the FNAS must pass the Lebanese Baccalaureate Part II in one of the strands of General Sciences, Life Sciences or Social Sciences & Economics, or its equivalent as identified by the Lebanese Ministry of Education.

The selection depends on the following assessment model:

1. TOEFL, or Writing Section of SAT I, or EET (for NDU English proficiency requirements)
2. SAT I or NDU Entrance Test
3. Secondary School Grades

School grades (second and third secondary years) are weighted 55% and SAT I (or NDU Entrance Test) 45% for calculating the composite score required by the FNAS in order to admit students in its majors.

Faculty of Nursing and Health Sciences (FNHS)

Applicants to the FNHS must pass the Lebanese Baccalaureate Part II (any strand) or its equivalent as identified by the Lebanese Ministry of Education. The selection depends on the following assessment model:

1. TOEFL, or Writing Section of SAT I, or EET (for NDU English proficiency requirements)
2. SAT I or NDU Entrance Test
3. Secondary School Grades

School grades (second and third secondary years) are weighted 55% and SAT I (or NDU Entrance Test) 45% for calculating the composite score required by the FNHS in order to admit students in its majors.

Faculty of Political Science, Public Administration and Diplomacy (FPSPAD)

Applicants must pass the Lebanese Baccalaureate Part II (any strand) or its equivalent as identified by the Lebanese Ministry of Education. The selection depends on the following assessment model:

1. TOEFL, or Writing Section of SAT I, or EET (for NDU English proficiency requirements)
2. SAT I or NDU Entrance Test
3. Secondary School Grades

School grades (second and third secondary years) are weighted 55% and SAT I (or NDU Entrance Test) 45% for calculating the composite score required by the FPSPAD in order to admit students in its majors.

Remedial Math Courses

In some selected majors, a student may be required to take one remedial course in Mathematics (besides the English remedial course(s); see above) if, upon evaluating his/her application, he/she did not accumulate the minimum composite score required by the Faculty for admission in these majors.

Following are the selected majors along with their corresponding remedial Math courses and the minimum passing grade in each.

Faculty	Majors	Possible Set of Remedial Math Courses	Minimum Passing Grade for Math Remedial Courses
Natural and Applied Sciences	Business Computing, Biology, and Environmental Science	MAT 105	D
Natural and Applied Sciences	Other majors	MAT 113	D
Engineering	All majors	MAT 113	C
Business Administration And Economics	All majors	MAT 105	D
Architecture, Art and Design	Architecture	MAT 113	D
Faculty of Nursing and Health Sciences	Nutrition & Dietetics, Medical Lab Technology	MAT 105	D

GRADUATE ADMISSION

STATEMENT OF PURPOSE

The Graduate Studies Program at NDU aims to promote humanitarian, ethical and spiritual values, to enhance intellectual inquiry and to intensify the awareness of human integrity and solidarity. In addition, the Program seeks to develop the mental, physical and spiritual potential of its student body. NDU also seeks to enhance these values through the liberal education it offers and the career preparation that caters to the real needs of Lebanon and the region.

Admission Procedures

To be eligible for admission to a graduate program, an applicant must hold a Bachelor degree or its equivalent from an accredited institution of higher education preceded by a secondary school certificate recognized by the Lebanese Ministry of Education as equivalent to the Lebanese Baccalaureate Part II.

Admission to a graduate program at NDU is made on a semester basis and follows the same deadlines as specified for Undergraduate Applicants.

Only complete files will be studied.

Applications for Graduate Admission are available in the Admissions Office; they may also be downloaded from the NDU Home Page (www.ndu.edu.lb). The application should include the required documents indicated on the form with a non-refundable fee of 150,000 LL and submitted to the Admissions Office. Admission requirements to graduate study are established and monitored by the concerned departments and faculties.

The Admissions Office will process applications, review credentials and issue letters of notification. The Admissions Office informs applicants in writing as soon as final decision is taken. Applicants may check their admission status on the website; the status is not final until the applicant receives the letter from the Admissions Office.

Required Documents

Applicants whose undergraduate degree is from NDU must submit:

- A graduate application form.
- A copy of the Bachelor degree.
- An official transcript of their undergraduate record.
- Two recent photographs.
- Other reference letters as required by concerned faculties.

Applicants from NDU are not required to take an English Test. Applicants who must sit for the EET at NDU should abide by the Examination Dates as they are specified for Undergraduate Applicants in The Admissions Guide.

Applicants whose undergraduate degree is not from NDU should submit the following documents:

- A graduate application form.
- A copy of the Bachelor degree or its equivalent certified from the Ministry of Higher Education.
- Official transcript(s) of records from the University (ies) attended during the last three years, and the corresponding course descriptions.
- Copy of the secondary school certificate or official equivalence.
- Two recent photographs.
- Two letters of recommendation.

English is the medium of instruction at NDU; applicants for graduate study should be able to demonstrate proficiency in the English language. Applicants from institutions where English is not the language of instruction will be required to sit for either the NDU English Entrance Test (EET) or the Test of English As a Foreign Language (TOEFL); the minimum score must be 600 for the EET and 96-97 for the iBT.

All documents become part of the permanent records of NDU and will not be returned.

Other Requirements

Individual Faculties retain the right to request further requirements for admission to graduate programs such as the Graduate Management Admission Test (GMAT) and the Graduate Record Examination (GRE). Other requirements may include recommendations from employer(s), auditions, interviews, and samples of the student's work or personal statements. These other admission requirements will be stated in the letters of conditional admission authorized by the concerned Faculty.

TYPES OF ADMISSION

Regular Admission

Regular Admission is granted to those applicants who have fulfilled all the undergraduate admission requirements. The minimum required cumulative Grade Point Average (GPA) is 3.0/4.0.

Conditional Admission

Applicants whose cumulative GPA at the undergraduate level ranges between 2.7/4.0 and 2.99/4.0 may be considered for conditional admission; this is determined by the concerned Faculties. Applicants must maintain a level of academic excellence expected of all graduate students and meet the graduate admission requirements. These applicants may be required to take at least 9 credit hours of undergraduate courses in the areas of identified deficiencies, and earn a minimum GPA of 3.0/4.0 in these courses to be eligible to pursue their graduate studies.

Prospective Applicants

Candidates qualify for this category if they apply to a major other than the undergraduate degree from NDU or an equivalent degree from any other recognized institution of higher education with a cumulative GPA of at least 2.7/4.0. The respective Faculty shall study the file of prospective graduate students. They may recommend supplementary undergraduate courses that the applicant must complete with a minimum cumulative GPA of 3.0/4.0 prior to consideration for admission to graduate study. Credits earned for undergraduate courses will not be counted toward the graduation requirements for the relative Masters degree.

Transfer Applicants

Applicants wishing to transfer and complete their graduate study at NDU must meet the graduate admission requirements of NDU. A complete record of all courses completed with course description must be submitted. Concerned Faculties shall evaluate and determine the transferability of academic credits in addition to the applicant's eligibility for graduate-level study at NDU.

Normally, a maximum of 9 transfer credits from previous work completed at another accredited institution of higher education is permitted upon the discretion of the Faculty Evaluation Committee. The course content and quality must correspond to the NDU course description as required for the requested major. The minimum score of each course must be "B" or its equivalent. Transfer credits are not computed in the Cumulative GPA but marked "Transfer".

International Applicants

Transcripts and degrees from foreign institutions require special evaluation and must be certified by the concerned offices. Consequently, prospective international students are advised to submit their application forms, test scores, and all other required documents at least one semester before the beginning of the semester for which they are applying.

Nondegree Applicants

Individuals seeking graduate coursework without the desire of candidacy for an advanced degree may apply and meet all requirements for admission to a graduate program as a non-degree (graduate) student.

READMISSION

Applicants who are issued a letter of acceptance to graduate study and fail to join their respective programs for two successive semesters, must reapply for admission.

ACADEMIC RULES AND REGULATIONS (UNDERGRADUATE)

STUDENT CLASSES

Students attending NDU who are not yet considered as being at the university level are classified as follows:

a.1.	Class	
	Remedial/Intensive	0 credit
a.2.	Class	Number of Credits Completed (on courses of 100 level and below 200 level)
	Freshman	1–30 credits

b. Undergraduate students in the Faculties of FAAD and FE are classified as being in the 1st, 2nd, 3rd, 4th or 5th year class according to the number of credits completed as specified in their respective suggested programs.

c. Undergraduate students in the Faculties of FBAE, FH, FNAS and FPSPAD are classified as follows:

Class	Number of Credits Completed (on courses of 200 level or higher)
Sophomore	31–60 credits
Junior	61–90 credits
Senior	91 and more

FULL-TIME STUDENTS

Full time undergraduate degree students are those who register for at least 12 credits during the Fall or Spring semesters.

PART-TIME STUDENTS

Part time undergraduate degree students are those who register for less than 12 credits during the Fall or Spring semesters. A part-time student does not qualify for financial assistance.

SPECIAL STUDENTS OR NON-DEGREE STUDENTS

Undergraduate students who are taking courses at NDU for credits but not working toward a degree are considered Special Students or Non-Degree Students. Non-degree students shall be accepted on a semester-to-semester basis. Initial applications shall be made through the Office of Admissions and thereafter through the Office of the Registrar. Such students shall meet the academic standards required of degree students and shall neither be permitted to audit courses nor be qualified for any kind of financial aid.

TRANSFER STUDENTS

Only, transfer applications for students at the Sophomore level or above are considered for acceptance. These students must have completed at least 12 credits with a cumulative GPA of 2.0/4.0 beyond their secondary school education. Courses on which students scored C and above will be counted towards their degree, provided they are equivalent in quality to

the courses given at NDU. Nonetheless, only courses taken at NDU will be computed in the GPA.

Transfer students holding a BA/BS/BBA from another institution of Higher Education recognized by the Lebanese Ministry of Education to the Faculties of FNAS, FBAE, FH or FPSPAD are required to complete at least 30 credits at NDU with a cumulative GPA of 2.0/4.0, and must satisfy all other graduation requirements for the degree. At the same time, transfer students to the Faculties of FAAD or FE are required to complete at least 45 credits at NDU with a cumulative GPA of 2.0/4.0 and must satisfy all other graduation requirements for the degree.

Freshman students are considered ineligible for transfer.

AUDITORS

An auditor is an individual who has been admitted to course(s) while satisfying the requirements for admission to this course as deemed appropriate. He/she is required to pay 75% of the course(s) tuition. Once an auditor is registered, he/she cannot change his/her status back to credit. Grades and credits will not be given for auditing course(s) and hence cannot be counted for enrollment certification, and for financial aid purposes.

HOURS OF CLASSES

Usually, classes are held Monday-Friday. However, some classes may be held on Saturday. During semesters, classes start at 8:00 a.m. However, some four-credit courses may start at 7:30 a.m. For summer sessions classes start at 7:30 am.

ATTENDANCE POLICY

Students should attend all classes on time. A pattern of absences, whether authorized or not, may affect a student's grade substantially. Only the Student Affairs Office validates absences. The student is, nonetheless, responsible for the material presented during his/her absence. The maximum number of absences for classes that meet on MWF is six and for those that meet on TTH and in the summer is four, (or two hours per credit course). Any student whose absences exceed the maximum limits shall automatically be unofficially withdrawn from the course, unless he or she withdraws.

EXAMINATIONS AND QUIZZES

All courses normally have written final examinations. Such examinations are not required in seminars, field work, internship programs, studio courses and senior projects, but the instructor concerned may choose to give one.

As to quizzes and progress tests, instructors shall give a minimum of two per course. If, for a legitimate reason acceptable to the instructor of the course, a student misses a quiz, he/she should arrange for a make-up with the instructor of the course within a maximum period of two weeks from the date assigned for that quiz.

Final examinations shall count for a maximum of 40% of the final grade. Those exams should be comprehensive by nature. The remaining 60% account for quizzes, progress projects, tests, term papers and other requirements as specified by the respective department. A minimum of 40% of the course evaluation should be known by students prior to the official withdrawal deadline.

Different sections of the same course must be given a common departmental final examination.

FINAL EXAMINATION MAKE-UP

If a student misses a final examination for a legitimate reason, he/she should make arrangements for a make-up examination with the instructor of the course and the chairperson of the department. If permission is granted, the student shall pay the University a make-up final examination fee of 200,000 L.L. Consequently, the final examination make-up shall be taken no later than the 8th week of the next academic semester if a grade of incomplete “I” is submitted to the registrar. In the case where a change of grade is not received by the Registrar’s Office within the set period, a grade of “F” shall be given for that course.

GRADED FINAL EXAMINATION PAPER

The graded final examination papers of a course offered during a given semester or the summer session must be submitted to the Department Chairperson concerned within 72 hours from the scheduled date of the final examination of that course. These papers must be kept at the department concerned for at least one semester along with a copy of the course syllabus, final examination and its solution.

FINAL GRADES

A course’s final grades should be submitted to the Office of the Registrar 72 hours after the scheduled date of the examination for that course. The grades should first be approved by the Department Chairperson and Faculty Dean.

RECORD BOOK OR BLUE BOOK

The original record/blue book of the courses taught by a faculty member during a given semester or the summer session must be submitted to the concerned Department Chairperson within 72 hours from the latest scheduled date of the final examination of his/her courses. This book shall be kept at the concerned department for at least one academic year, with a copy of it signed by both the concerned faculty member and his/her Department Chairperson shall be submitted to the Office of the concerned Faculty Dean.

TRANSCRIPTS

Upon request, students can obtain an official transcript or a student copy transcript from the Office of the Registrar within two working days. Transcripts cannot be issued to students who have a financial account pending with the University.

CHANGE OF GRADE

Once a student’s grade for a course for which he/she is enrolled during a given semester or the summer session, is approved by the Faculty and processed by the Office of the Registrar, it shall be final in the absence of justified circumstances such as evidence of human error in calculation, recording, visual oversight, or confusion in the names of students or course sections.

Under justifiable circumstances, the student may petition the Faculty Dean concerned for a change of grade within 5 working days from the processing of the final grades of the course by the Office of the Registrar. Only under **force majeure** would a student’s case be considered beyond those five days.

To change a grade, the instructor of the course should fill in and sign an official change-of-grade form, which can be obtained from the Registrar’s Office. All supporting documents including the instructor’s record book should be attached to the form. Once the new grade

is approved by the department's Chairperson, it is forwarded to the Faculty Dean for final action and then resubmitted to the Office of the Registrar.

CHANGE OF PROVISIONAL GRADE

Changes made to the provisional grade I and PR should be done within an allotted period otherwise the Office of the Registrar will directly convert the grades to F. The *I grade* must be changed by the end of the 8th week of the following semester and the *PR grade* must be changed by the end of the following semester.

GRADES FOR REPEATED COURSES

Students must repeat courses for which they got a grade of *F*, *UW* or those courses for which they did not get the required passing grade set by the Department or Faculty concerned, in the case where these courses are required in the major. Students must repeat these courses immediately the next time they are offered. Students may also repeat a course for which they got a grade below *C*.

For a repeated course, only the last grade, whether higher or lower, will be computed into the GPA. The other grades are kept on the student's transcript. A course may be repeated only twice. A student who fails to pass a course for the third time will have to comply with the instructions of the Dean concerned. The letter *R* will be placed on the student's transcript next to the course being repeated.

GRADES UPON CHANGE OF MAJOR

1. Upon approval of change of major, all grades on transferable or non-transferable courses taken by a student in his/her old major/area of concentration remain part of his/her official transcripts. Unlike the transferable grades, the non-transferable ones are not computed in the student's grade-point-average for the new major and are not counted toward the total number of credits required for graduation for the new major. A student cannot ask for a non transferable course to be computed back in his/her G.P.A.
2. The students who benefited from the above rule (#1) cannot return to their old major, and cannot request to have their major changed again to any major which requires a non transferable course grade, which was deleted from his/her G.P.A.

SYSTEM OF GRADES

The University uses the following system of grades. This system consists of letter grades with their corresponding numerical ranges (*i.e.* percentage equivalent, and the 4.0 point maximum).

Grade	Description	Quality Point Value	Percentage Equivalent
A ⁺	Outstanding	4.0	97-100
A	Excellent	4.0	93 - 96
A ⁻	Very Good	3.7	89 - 92
B ⁺	Good	3.3	85 - 88
B	Good	3.0	80 - 84
B ⁻	Good	2.7	77 - 79
C ⁺	Satisfactory	2.3	73 - 76
C	Satisfactory	2.0	70 - 72
C ⁻	Passing	1.7	66 - 69
D ⁺	Passing	1.3	63 - 65

<i>D</i>	Lowest Passing	1.0	60 - 62
<i>F</i>	Failure	0.0	0 - 59
<i>UW</i>	Unofficial Withdrawal	0.0	The grade " <i>UW</i> " is assigned by the instructor when a registered student has never attended a class or has ceased attending and has not submitted an official course withdrawal request to the Office of the Registrar. This grade is computed as an <i>F</i> grade in the grade-point average.
<i>W</i>	Official Withdrawal		The grade " <i>W</i> " indicates withdrawal without academic penalty. This grade is issued by the Office of the Registrar only to students submitting an official course withdrawal form by the scheduled deadline. The grade " <i>W</i> " is not computed in the student's grade-point average and may not be changed to any other grade under any circumstances.
<i>PR</i>	Progress, Re-enroll		The grade " <i>PR</i> " is a provisional grade, and hence it is not computed in the student's grade-point-average. It is used to reflect progress on continuing research efforts for the senior study or the senior research or design project until it is completed. If this provisional grade is unresolved by the end of the following semester, the Office of the Registrar will automatically convert it to the grade of " <i>F</i> " and it will be computed in the student's grade-point-average.
<i>U</i>	Audit		The grade " <i>U</i> " indicates that the individual was an auditor or listener in the course. This does not have any quality point value, and hence it is not computed in the student's grade-point-average. Neither the credits nor a written statement can be given for a class audited, and no instructor is authorized to admit anyone as an auditor to any of his/her classes unless the individual has registered as such.

I Incomplete

The grade “*I*” is a provisional grade, and hence it is not computed in the student’s grade-point average. It indicates that the student has for good and justified reasons not completed all course requirements, but there is a reasonable expectation that he/she will successfully complete it. If this provisional grade is unresolved by the end of the 8th week of the following semester, the Office of the Registrar will automatically convert it to the grade of “*F*”, and will then be computed in the student’s grade-point average. However, students, who are out of attendance in the semester following the one in which the course was taken, have one year to complete the work. Degree candidates should be aware that an “*I*” grade received during the last semester in any of the courses required for graduation will automatically result in the postponement of graduation.

GRADE-POINT AVERAGE

The grade-point-average (GPA) or index is the ratio of the total quality point values divided by the number of the credit hours attempted by the student, as shown below.

Course Number & Designation	Grade Earned	Credit Hours Attempted	Quality Point Values	Total Quality Point Values
ARB 211	<i>B</i> ⁺	3	× 3.3 =	9.9
BAD 425	<i>A</i>	4	× 4 =	16
HUT 305	<i>D</i>	3	× 1 =	3
MAT 215	<i>F</i>	3	× 0 =	0
CSC 200	<i>C</i>	1	× 1.7 =	1.7
		14		30.6

The GPA of the five courses would then be

$$\frac{30.6}{14} \cong 2.19$$

which is equivalent to a grade of *C*. Students are expected to know how to compute their own GPA. Courses with a grade of *W*, *U*, *PR* or *I* are not counted in computing the cumulative GPA. The same applies to all transfer courses. Hence, grades for work done at institutions other than NDU are not included in the GPA. Only courses and credits may be transferred. Thus, the cumulative GPA is an average of all the credit hours attempted by the student at NDU.

ACADEMIC STANDING

There are 4 kinds of academic standing for an undergraduate student at NDU:

Good Academic Standing

An undergraduate sophomore student is deemed in good academic standing if his/her cumulative GPA satisfies any of the following cases:

Cumulative GPA	# of Undergraduate Credits
At least 1.5/4.0	1 cr. – 12 cr.
At least 1.75/4.0	13 cr. – 24 cr.
At least 2.0/4.0	25 cr. or more

Academic Probation

An undergraduate student will be on academic probation if his/her cumulative GPA satisfies any of the following cases:

Cumulative GPA	# of Undergraduate Credits
Less than 1.5/4.0	1 cr. – 12 cr.
Less than 1.75/4.0	13 cr. – 24 cr.
Less than 2.0/4.0	25 cr. or more

Academic Suspension

An undergraduate student placed on academic probation for three consecutive semesters will be placed on academic suspension (i.e. third probation is the suspension) irrespective of whether she/he is registered or not. If the third semester of probation happens to be the first (ie Fall) or second (ie Spring) semester of the academic year, the student is granted one more semester for the removal of suspension.

Students placed on suspension may consider the following options:

1. The student may register, upon the written approval of his/her academic advisor, in a number of courses at other accredited institutions of higher education. The credits for the courses completed with a grade of “C” or better may be transferred, as appropriate, towards the requirements of his/her degree at NDU. The grades and GPA for these courses, however, shall not be transferred.

OR

2. The student may petition the University Academic Standards Committee to reconsider the suspension decision. The Committee will, then, determine the final status of the student in the light of the GPA obtained:
 - o If the Cum. GPA is 1.79 or lower the student will be placed on academic suspension in his/her faculty but may, nonetheless, register in another faculty at NDU following due procedure.
 - o The suspension may be withheld if the Cum GPA is 1.8-1.99. The student is given another chance to obtain good standing.

Academic Dismissal

An undergraduate student is dismissed from the University if he/she fails to maintain good academic standing either during the semester immediately following reinstatement from academic suspension or after the student had been granted permission from the Faculty Dean to have the suspension removed but failed to do so.

If the student's semester GPA is at least 1.5/4.0, 1.7/4.0 or 2.0/4.0, and his cumulative GPA is still below 2.0/4.0, the student is granted another extra semester. If at the end of this semester the student still fails to be in good academic standing (cumulative GPA), he/she will be dismissed.

ACADEMIC RECOGNITION

There are two kinds of academic recognition:

1) Dean's Honor List:

Full time students who obtain a semester GPA of 3.20/4.00 or higher with no incomplete grades, during a given semester are placed on the Dean's List for that semester. These students are invited to attend the Dean's Luncheon held in their honor.

2) Graduation with Distinction:

An undergraduate student with high academic achievement will graduate with:

- *Cum Laude* (Distinction), if the cumulative GPA falls between 3.20/4.0 and 3.49/4.0.
- *Magna Cum Laude* (High Distinction), if the cumulative GPA falls between 3.50/4.0 and 3.79/4.0.
- *Summa Cum Laude* (Highest Distinction), if the cumulative GPA is 3.80/4.0 or above.

Such distinctions appear on the student's transcript and degree. A transfer undergraduate student is only eligible for these distinctions if he/she has completed at least 60 credits at NDU.

ACADEMIC INTEGRITY

Students are expected and encouraged to be honest and to maintain the highest standards of academic integrity in their academic work and assignments at the University. They shall refrain from any academic dishonesty or misconduct including; but not limited to:

- Plagiarism; that is, the presentation of someone else's ideas, words or artistic, scientific, or technical work as one's own creation. Also, paraphrasing, summarizing, as well as direct quotations are considered as plagiarism, if the original source is not properly cited.
- Cheating.
- Assisting in cheating.
- Substituting a student in the taking of an examination.
- Substituting examination booklets.
- Submitting the same work for more than one course and the like.
- Submitting papers written by others.
- Receiving or providing unauthorized help or assistance in any academic work or assignment.
- Intentional violation of program and degree requirements and regulation as established by the University.
- Dishonest reporting of computational, statistical, experimental, research, results, or the like.

Penalties of Academic Dishonesty

Committing any academic dishonesty or misconduct will definitely subject the student(s) to serious academic penalties including; but not limited to:

- Failure in an assignment or a course.
- Suspension from the University for the remainder of the semester. The student will receive from the Registrar, a notice forbidding him/her, for the specified semester to occupy any portion of the University premises, and denying him/her

all University privileges, including class attendance. Suspension becomes effective immediately upon receipt of the notice. There is no refund of fees for the semester in which the action is taken, but any fees paid in advance for a subsequent semester are refunded. Following the expiration of the term of suspension, the student shall be enrolled under probation for one regular semester or Summer session.

- Suspension for additional period. The total duration of the suspension should not exceed one academic year.
- Dismissal from the University. The student will receive from the Registrar a written notice which permanently terminates his/her student status. The same policy will be followed regarding notification and the refund of fees as in the case of suspension.

Reporting Academic Dishonesty

If an instructor has reason to believe that a student has committed an act of academic dishonesty, he/she must inform the student and discuss the circumstances of the matter with him/her. The instructor shall also consult with his/her Chairperson and take the appropriate action. The Chairperson shall inform the student's advisor in writing about the accident and the action taken. The student will receive a copy of that letter. If the Chairperson believes the misconduct deserves suspension or dismissal from the University, he/she should forward the case to the Dean. If the student wants to challenge the action, he/she can appeal by petitioning to the to the University Student Affairs Committee through the Registrar.

CHANGE OF MAJOR

1. Within a Faculty

To be eligible for a change of major within the same faculty, the student must meet the requirements for admission to the new major. He/She must submit a petition for change of major provided by the office of the Registrar. The request for the student's admission is considered by the new department and by the dean concerned. After approval, the petition is sent to the office of the Registrar for implementation.

2. From a Faculty to a Faculty

A student moving into another Faculty within the university is considered as a new student by the new Faculty. The student is required to fill in a petition form for a change of major provided by the Office of the Registrar and signed by the Business Office and by his/her advisor. The form is to be submitted to the Office of the Registrar, which in turn will send the form to the University Admission Committee.

3. By University Action

A student will be asked to change his/her major for any of the following reasons:

- If he/she is on probation and fails at the end of a semester or summer session in two or more of his/her major and/or core courses.
- If he/she fails to pass a major course after having repeated it twice.

DEADLINE FOR SUBMISSION OF CHANGE OF MAJOR

The deadline for submission of the petition for change of major for both categories is:

- The last Friday of December month for the Spring semester.
- The last Friday of June month for the Fall semester.

GRADUATION REQUIREMENTS

Degree Requirements

Students are required to fulfill the following requirements in order to be eligible for a bachelor degree.

- a. Completing all required credits for the degree.
- b. Fulfilling satisfactorily all course requirements for the degree as well as remedial/intensive courses given upon admission.
- c. Refilling all other admission requirements.
- d. Maintaining at least a 2.0/4.0 cumulative GPA for the degree.
- e. Satisfying the residency requirements for the degree.
- f. Maintaining the required minimum cumulative GPA for the major and core courses required for the degree, as specified by the concerned Department.
- g. Maintaining good academic discipline.
- h. Settling all accounts with the University.

These conditions must be met together with the degree requirements in effect during the semester of the student's first registration at NDU. This shall also apply to reinstated students. However, readmitted students must meet the degree requirements in effect during the semester of their readmission, unless their readmission letter states otherwise.

Students who do not have the required cumulative GPA of 2.0/4.0 for the degree and/or the required cumulative GPA for the major and core courses required for the degree, but yet have completed all other requirements, may repeat up to 5 courses, as approved by the Academic Advisor, to meet the required numerical level(s).

Second Degree Requirements

A student with a bachelor degree may register for another degree at NDU after being accepted by the University. Such a student must:

- Satisfy all the requirements for the new degree in accordance with the statements of section I of this policy.
- Have a residency of at least two full semesters.
- Complete at least 30 credits in the new degree over and above the credits already used to satisfy the first degree with a minimum cumulative GPA of 2.0/4.0.

TEACHING DIPLOMA REQUIREMENTS

A holder of the official Lebanese Baccalaureate Part II or its equivalent will be eligible for a Teaching Diploma upon completing satisfactorily at least 18 credits beyond his/her bachelor degree with a cumulative GPA of at least 2.0/4.0.

TEACHING CERTIFICATE REQUIREMENTS

A holder of the official Lebanese Baccalaureate Part II or its equivalent will be eligible for a Teaching Certificate upon completing satisfactorily 18 credits with a cumulative GPA of at least 2.0/4.0.

GRADUATION CHECK LIST

Two semesters prior to graduation, the Office of the Registrar must submit to the concerned Academic Advisors and students a graduation list of potential candidates for graduation for verification. This list must include the following:

- The already completed requirements for the degree
- The requirements, which remain to be completed for graduation
- The cumulative GPA for the degree
- The major courses and the core courses average

Once the checking process is completed, the checked list must be returned to the Office of the Registrar to finalize the tentative graduation list and hence send it back to the Faculty for voting at the end of the student last semester.

CONFERRING OF DEGREES

Degrees are conferred three times a year at the end of the:

- Fall semester
- Spring semester
- Summer session

Students expecting to graduate must apply for graduation at the Office of the Registrar by the following deadlines:

- November 15 for the graduates of the Fall and Spring semesters
- March 15 for the graduates of the Summer session

Any delay in applying may delay graduation. The formal conferring of degrees by the President occurs annually at the Commencement on the second Friday of each July.

Potential Summer graduates can not participate in the ceremony of the conferring of degrees.

RESIDENCY REQUIREMENTS

Residency Requirements for Bachelor of Art, Bachelor of Science, Bachelor of Business Administration and Bachelor of Hotel Management.

There are 2 kinds of Government Regulations for the B.A., B.S., B.B.A., B.H.M. and the like:

1. **Minimum Residency:** A minimum of 8 semesters of residency is required, beginning with the Freshman Class, or 6 semesters, beginning with the Sophomore Class. Two Summer sessions will be considered as equivalent to one regular semester. This period of time must be spent at a recognized and accredited institution of higher education; however, at least 30 credits requirement must be completed at NDU with a cumulative GPA of 2.0/4.0, in addition to all other graduation requirements for the degree.
2. **Maximum Residency:** A maximum of 16 semesters of residency is allowed, beginning with the Freshman Class, and 12 semesters, beginning with the Sophomore Class.

Residency Requirements for Bachelor of Engineering

1. A minimum of 10 semesters and a maximum of 20 semesters.
2. At least the last 45 credits must be completed at NDU, in addition to all other graduation requirements for the degree.

Residency Requirements for Bachelor of Architecture

1. A minimum of 10 semesters and a maximum of 20 semesters.
2. At least the last 45 credits must be completed at NDU, in addition to all other graduation requirements for the degree.

PARTICIPATION IN COMMENCEMENT EXERCISES

The University encourages June graduates to participate in the Commencement exercises. Summer and Fall graduates may participate in the following Commencement exercises provided they notify the Registrar's Office of their intent by mid-June at the latest by submitting the online form.

COURSE DESIGNATION

A. Designation and Belonging

The letters preceding the course number indicate the area or subject of study to which the course belongs. The following is a designation list grouped by Departments and Faculties' affiliations.

Faculty of Architecture, Art and Design

Department of Architecture

ARP	-	Architecture
MLU	-	Landscape Urbanism

Department of Design

IDP	-	Interior Design
GDP	-	Graphic Design
FTP	-	Fashion Design
PDP	-	Photography
MAD	-	Design

Department of Music

MUA	-	Arab Musicology
MUE	-	Music Education
MUJ	-	Jazz Music
MUM	-	Musimedialogy
MUS	-	Musicology

Fine Arts Programs

FAC	-	Arts and Crafts
FAP	-	Studio Arts
FDP	-	Studio Arts
FPA	-	Performing Arts
MAA	-	Fine Arts

Faculty of Business Administration and Economics

Department of Accounting, Finance and Economic

ACO	-	Accounting
BAF	-	Banking and Finance
ECN	-	Economics
ENR	-	Energy Economics
FEN	-	Financial Engineering

Department of Management and Marketing

BAD	-	Business Administration
HCM	-	Health Care Management
MRK	-	Marketing
MGT	-	Human Resource Management
PRM	-	Project and Operations Management

Department of Hospitality and Tourism Management

EPM	-	Management of Event Production
FBM	-	Food and Beverage Management
TTM	-	Hotel Management and Tourism
HSM	-	Hotel Management and Tourism
HTM	-	Hospitality Management
RMC	-	Research Methodology

Faculty of Engineering

Department of Civil and Environmental Engineering

CEN - Civil Engineering

Departments of Electrical and Computer and Communication Engineering

EEN - Electrical Engineering

Department of Mechanical Engineering

MEN - Mechanical Engineering

Faculty of Humanities

Department of English, Translation and Education

CHI - Chinese

EDU - Education

ENL - English

FRC - French

GEM - German

INT - Interpretation

ITL - Italian

LIR - Literature

LTN - Latin

PES - Physical Education and Sports

SPA - Spanish

TRA - Translation

Department of Mass Communication

ADM - Advertising

COA - Communication

JOU - Journalism

Department of Social and Behavioral Sciences

ARB - Arabic

HUT - Human Thought

PHL - Philosophy

PSL - Psychology

REG - Religion

SOL - Sociology

Faculty of Natural and Applied Sciences

Department of Computer Science

CSC - Computer Science

GIS - Geographic Information Systems

Department of Mathematics and Statistics

ACS - Actuarial Science & Insurance

MAT - Mathematics

STA - Statistics

Department of Sciences

AST - Astronomy

BIO - Biology

CHM - Chemistry

ENS - Environmental Science

GEO - Geology

PHS - Physics

Faculty of Nursing and Health Sciences

- NUR - Nursing
- HEA - Health
- MLT - Medical Laboratory Technology
- NTR - Nutrition and Dietetics

Faculty of Political Science, Public Administration and Diplomacy

Department of International Affairs and Diplomacy

- IAF - International Affairs and Diplomacy
- INL - International Law

Department of Public Administration

- CJS - Criminal Law
- PAD - Public Administration

Department of Political Science

- AMS - American Studies
- EMS - Euro-Mediterranean Studies
- CPL - Comparative Law
- HIT - History
- NGO - Non-Governmental Organization
- POS - Political Science

B- Digits of a Course Number

The following digits are used as follows:

First Digit			
		FNAS, FBAE & FH	ENG, RCT, VIA
	0	Non Credit Remedial Courses	Year 0
	1	Freshman Course	Year 1
	2	Sophomore Course	Year 2
	3	Junior Course	Year 3
	4	Senior Course (Undergraduate Only)	Year 4
	5	Courses that are considered preparatory for graduate studies. When passed, their credits should not be counted in the total of credits required for graduation and they should be completed during the first academic year.	Year 5
	6 or higher	Graduate Course	Year 6
Second Digit for Undergraduate and Possibly Graduate Courses			
	0	Basic Level Course	
	1	Elementary Level Course	
	2-4	Intermediate Level Course.	
	5	Advanced Level Course.	
	6	Special Topics or Practicum I	
	7	Laboratory Workshop, or Practicum II	
	8	Seminar or Internship.	
	9	Senior Study; Senior Project, Thesis or Research Project.	
Third Digit: Any digit ranging from 0 to 9.			

C- Course Number, Title and Credits

MAT 215	Linear Algebra I	(3.0)	3 cr.
Official Course Code (Number Abbreviation)	Official Course Title	The first component of the above ordered pair designates the number of lecture hours/week. The second component is the number of laboratory hours/week.	Number of credits (cr) earned if course is successfully completed.

Lecture hours/week is a period of 50 minutes duration.

Credits are based upon the number of 50 minute periods scheduled weekly during one semester or summer session. One credit signifies a minimum of either a 50-minute period of class work, or 2-3 hours of laboratory over a period of 15 weeks or its equivalent.

D- Course Prerequisite and Corequisite

A **prerequisite** is a course which must have been completed before registering for the subject course.

A **corequisite** is a course which must be completed before registering for the subject course, or a course which may be taken concurrently.

UNDERGRADUATE REGISTRATION

ACADEMIC ADVISING

Upon admission and prior to registration, each student shall be assigned an Academic Advisor by his/her Department Chairperson, upon the approval of the Faculty Dean. The Academic Advisor shall:

- a. Advise his/her advisees to observe the basis of admissions as set in his/her letter of acceptance.
- b. Make himself/herself available to his/her advisees during office hours, and when necessary by appointment, throughout the academic year.
- c. Assist his/her advisees to properly fulfill all requirements of the degree enrolled in.
- d. Study and update the files of his/her advisees throughout his/her residency at NDU.
- e. Make his/her advisees aware of and familiar with the University academic rules, regulations and policies.
- f. Explain clearly the:
 - Registration process
 - Course offerings
 - Course substitution
 - Course prerequisite
 - Course selection
 - Full-time / part-time credit load
 - Degree planning

and other related matters. Hence, students are encouraged to consult with their Academic Advisors on a regular basis all throughout their residency at NDU.

REGISTRATION ELIGIBILITY

An undergraduate student will be eligible for registration upon settling all previous pending issues (academic, financial, disciplinary, administrative, etc...) with the University at the concerned offices. Otherwise, he/she cannot proceed any further toward his/her registration.

REGISTRATION

The registration date for undergraduate students is assigned by the Office of the Registrar. To register, a student should

- a. Receive tuition statement from the Business Office.
- b. Pay the appropriate tuition and fees to the allotted bank(s).
- c. Prepare his/ her course schedule
- d. Register for courses; off campus (internet) or on campus (intranet): Advisor or Division of Computing Services

New students should register at the Advisor's Office

REGISTRATION BY ABSTENTIA

An NDU undergraduate student is allowed to register in abstentia (or by proxy) by some legally recognized individuals (*i.e.*, parent, sister, or the like) under justifiable reasons such as illness, being abroad, and the like. Such a student shall be entirely responsible for discrepancies in his/her proxy registration, if any.

LATE REGISTRATION

After the fifth day of classes in either the Fall semester or the Spring semester or the third day of the Summer session the late registration period shall be scheduled and its fees shall be determined. No student may be registered beyond this day for the current semester or the Summer session. During the late registration day, a student shall follow the steps of the registration, as described in section IV of this policy. Further, it shall be understood that students registering during the late registration day shall be responsible for all work assigned from the beginning of the semester or the session. They shall be also subject to the requirements of the attendance policy as of the first day of classes.

CROSS-REGISTRATION

1. An NDU undergraduate student may be allowed to cross-register a course at another institution if:
 - a. The course is not offered at NDU during the semester in which the student is expected to graduate.
 - b. The course in which the student intends to cross-register is equivalent to his/her required course at NDU.
 - c. The course does not conflict with his/her course schedule at NDU.
 - d. The student has the Cross-Registration and Registration Forms signed by his/her Department Chairperson, and Academic Advisor as well as the Office of the Registrar and the Business Office.
 - e. The student returns the appropriate Cross-Registration form(s) to NDU Registrar's Office after officially registering at the other institution.
 - f. The student has to submit an official transcript of records for his/her cross-registered course to the Office of the Registrar at NDU.
2. A non-NDU undergraduate student may be allowed to cross-register a course at NDU upon submission of a written authorization from his/her institution allowing him/her to register for this course at NDU in accordance with NDU undergraduate registration policy.

IMPROPER REGISTRATION

Only officially enrolled students in a class are allowed to attend the class. The instructor of the class should inform any non-officially enrolled student of his/her improper registration and should immediately report it, in writing, to the Office of the Registrar, and should also ask the student to immediately proceed to the Office of the Registrar for a settlement.

CHANGES IN REGISTRATION

Changes in registration become effective and official on the date the approved completed form is submitted to the Office of the Registrar, and accepted and processed, and the financial obligations resulting from these changes are settled with the Business Office.

Adding and/or Dropping Courses

A student may add or drop a course or change a section in his/her registration schedule during the add/drop day only. This can be done by:

1. Dropping or Adding by himself/herself at the Division of Computing Services or in the Advisor's Office.
2. In the Drop/Add period, two modifications are allowed by the student.
3. In case a section is closed, or a student wishes to wave prerequisites/co-requisites and the like, only during Drop/Add period he/she has to fill in a Drop/Add form to secure the concerned Dean's signature.

4. Receive his/her modified tuition statement from the Business Office.

Withdrawal From Courses

a) In accordance with the University Refund Policy, students may officially withdraw from courses without academic penalty by the late registration day. In this case no grades will be inscribed on their record. They may also withdraw any time prior to the 14th week of the Fall or Spring semesters and before the 28th day of the Summer session.. Then a grade of “W” will be inscribed on their records.

b) Withdrawal after the deadline will result in an “F” or “UW” *grade* on the dropped course. No withdrawal is allowed beyond this period unless the student petitions to the Dean concerned, due to urgent reasons. Once the petition is approved, the Registrar will then be instructed by the PVP for Academic Affairs to assign the grade “W” on the dropped course(s). No credit is given for.

Total Number of Withdrawals from a Course

Students are allowed to withdraw from a course twice only.

Attendance after Withdrawing

Once a student has withdrawn from a course, he/she cannot continue to attend or audit this course during *the same* semester.

Student Reinstatement

Upon return, a student with leave of absence shall petition the Office of the Registrar for reinstatement. Those students on probation who have been approved for leave of absence will remain on probation upon reinstatement.

Dropping a Course while on Probation

A student on probation may drop any course during the probation period.

Registration in a Course with an ‘I’ Grade

Students may not register in a course if he/she has an incomplete grade in its prerequisite(s).

STUDENT ACADEMIC LOAD

Full-Time and Part-Time Loads

Registration in at least 12 credits for the Fall or Spring semester constitutes a full-time load for an undergraduate student. Otherwise, it constitutes a part-time load.

Maximum Load for Registration per Semester

The maximum load for registration during the Fall or Spring semester by any undergraduate student is either 16 credits or the number of credits specified in his/her suggested program for that particular semester. However, student on good academic standing can take up to 19 credits per semester provided that this number of credits does not contradict any residency requirements.

Maximum Load for Registration in the Summer Session

The maximum load for registration by any undergraduate student in the Summer session is 9 credits or less as determined by the concerned Faculty.

Maximum Load for Students on Probation

Students who are on probation may register for a maximum of 13 credits per semester of which at least 9 credits for courses that must be repeated, if any.

Maximum Load for Students with Incomplete(s)

Students who have two or more incomplete grades from a previous semester or the Summer session may register for a maximum of 13 credits per semester unless these courses are senior projects or the like.

Maximum Load for Students with Cross-Registration

The combined load for students with both registration at NDU and cross-registration in another institution must not exceed the maximum load stated above.

TUITION AND FEES

Notre Dame University is a non-profit institution. Tuition and fees paid by students represent a small percentage of the full cost of a student's education. The deficit is covered by income from gifts, grants and donations from foundations, alumni and friends of the University. The fees cover applications, membership in National Social Security Fund (NSSF), activities, Yearbook and Student Association, and Insurance. Membership of Lebanese students in the NSSF is mandatory by law. Thus prior to registration, students are urged to follow the instructions given by the Students Affairs Office concerning the clearance for NSSF.

Tuition

Tuition/Credit Hour (Engineering or Architecture)	L.L.	425,000
Tuition /Credit Hour (All Others)	L.L.	360,000
Tuition /Credit Hour (Auditing)	L.L.	75% of credit tuition

Fees

Admission Application	L.L.	100,000
Entrance Examination	L.L.	75,000 per exam
Late Registration	L.L.	100,000
Petition	L.L.	5,000
Change of Major	L.L.	100,000
Make-up Final Examination Fee/Incomplete	L.L.	200,000
Transcript (Official Copy)	L.L.	10,000
Transcript (Student Copy)	L.L.	5,000
Library Fee/Book /Day (Late Returns)	L.L.	1,500
Graduation	L.L.	50,000
Medical Insurance	L.L.	25,000
Academic Fees	L.L.	145,000
Smart ID Card (when applicable)	L.L.	15,000.
NSSF Fees (when applicable)	L.L.	150,000

Because of the rising cost of higher education, universities are facing severe financial problems. NDU reserves the right to change tuition, fees and expenses at any time without prior notice.

A student may not complete registration, graduate or receive any transcripts of records until all dues are paid.

Refund Policy

Contracts with faculty members and provisions for education are made by the University in advance for the entire year. Accordingly, if a student withdraws for justifiable reasons after final registration, refund of tuition will be made according to the following schedule of withdrawals:

- During drop/add period, 75% of the tuition is refunded.
- During the first week of classes, 50% of the tuition is refunded.
- Tuition is not refunded after the first week of classes.
- Refund policy does not apply during summer session. No refund of tuition is made for any withdrawal during summer session.

Financial Support for Re-enrolled courses

Students who re-enroll, for any reason, in any course, shall not benefit from any financial support for the enrolled courses.

UNDERGRADUATE ACADEMIC MINORS

RATIONALE

The Objective of establishing undergraduate academic minors, hereinafter called minors, at NDU is to offer a wide, versatile, and creative spectrum of basic knowledge for students in areas other their major programs of study, an objective that is in line with the American liberal arts model of higher education. Additionally, establishing minor enhances the attractiveness of the departments and Faculties in terms of allowing them to offer relatively quick training or specialization programs to intrested students.

The establishment of undergraduate academic minors is a matter that is totally internal to the university and is outside the scope of governmental licensing and recognition.

The following rules and regulations do not allow students to enroll in the university for the sole purpose of pursuing minor studies.

GENERAL RULES AND REGULATIONS FOR MINORS AT NDU

Number of Credits for Minors

A minor shall consist of 15cr to 18cr. A minor may not include more than two courses (6 credits) which are counted in the student's "Major Requirements" category .

Eligibility for Minors

Only enrolled students at NDU and in junior standing and above can declare minors.

Declaring Minors

A student wishing to declare a minor should do so through an appropriate request form submitted to the concerned department or Faculty offering the minor. Approval by the latter is required prior to registration.

Contract Sheets and Advisors for Minors

Each minor shall have a separate contract sheet specified and supplied by the department or Faculty offering the minor. Students declaring a minor have to follow the corresponding contract sheet with the assistance of an academic advisor, preferably the same person advising the student in his/her major. The student and his advisor are recommended to closely liaise with an advisor from the chosen minor. All academic advisors in the university should be aware of the different minors offered across the university so that they can assist their advisees towards a specific minor.

Pursuing More than One Minor

Students are allowed to satisfy the requirements for a maximum of two minors, provided that they do not pursue more than one minor at a time. Accordingly, declaring an additional minor is conditional to either the successful satisfaction of the requirements of an already declared minor or to the official withdrawal from a current minor.

Withdrawing from Minors

A student is allowed to officially withdraw from a declared minor no more than twice.

Students on Probation

Students on probation cannot declare minors .

Passing Grades and GPA's for Minors

The passing grade for a minor shall be specified by the department or Faculty offering the minor, provided that the acceptable overall GPA for any successfully completed minor is not below 2.

Overall GPA

A student, with or without a declared minor, shall have one and only one overall GPA including every course taken. A separately calculated GPA for the minor shall be considered by the registrar for the sole aim of judging the successful fulfillment of the requirements for that minor.

Minor Courses and Graduate Studies

If any, a student applying for graduate studies is allowed to use earned minor credits as remedial credits upon the approval of the concerned faculty .

Graduation and Minors

A registered student pursuing a minor degree with a declared minor is allowed to graduate when the requirements of the major degree are satisfied, even if the requirements of the minor are not. In this case, the minor can be independently completed and acknowledged after graduation.

Recognition of Minors by the University

The university shall recognize only a *completed* minor, and solely by a specific acknowledgement of the completion of a minor on the student's transcript of records and, upon though student's request, by an official statement from the registrar. The university does not issue any diploma or certificate recognizing the completion of a minor.

Additional Requirements

Within the previously mentioned rules that give the general guidelines for all minors, departments and faculties have the right to state additional requirements for their minors as they deem necessary .

ACADEMIC RULES AND REGULATIONS (GRADUATE)

CROSS-REGISTRATION

Students enrolled at Notre Dame University may take courses at other recognized institutions of higher education.

A student registered at NDU may be permitted to cross-register if:

1. He/She expects to graduate at the end of that particular semester and the said course is not offered at NDU but is a graduation requirement.
2. The course to be taken carries the same content as that offered at NDU.
3. The student's academic advisor sends a written statement to the NDU Admissions and Registrar's Offices who in turn contact their counterparts of the concerned university to confirm the above-mentioned conditions.

Students enrolled at other recognized institutions of higher education may take courses at Notre Dame University.

Students studying at other universities and who wish to take courses at NDU must secure the following to facilitate cross-registration:

1. Written permission by the academic advisor to take specified courses at NDU (if any of the above mentioned conditions apply to the incoming student)
2. The permission of the concerned Faculty at NDU.
3. The above documents are submitted to the NDU Admissions and Registrar's Offices by their counterparts.
4. Finalize registration according to cross-registration procedures at NDU.

AUDITING

Provided that they have satisfied the admission requirements, candidates that are interested in auditing graduate courses will be issued letters of acceptance as auditors.

TUTORIALS

To meet graduation requirements, students may take courses on a tutorial basis. Registration for a tutorial course can only happen after the consent of the concerned professor and the approval of the respective faculty.

COURSE/PROGRAM CHANGES

Any change from one graduate degree to another requires students to reapply and meet the admission requirements of the requested graduate program. Required courses may be substituted upon the recommendation of the student's graduate advisor and the approval of the respective Faculty. A maximum of 9 substitute credits will be considered.

SUPERVISION

Upon admission, students will be assigned an academic advisor who will guide and assist the student in planning a course of study. When applicable, a thesis advisor will be assigned. After consultation with the Faculty Dean, every faculty will set its own guidelines for thesis defense. Candidates are required to give a public presentation. Thereafter, the Thesis Committee will notify the Dean and schedule the final defense.

COURSES AND GRADES

Courses taken as part of a student's graduate study program fall in one of two categories, graduate or remedial, with different grading systems.

Graduate Level Courses

These are normally numbered 600 and above. The minimum passing grade for a graduate course is B. Students in graduate study are required to maintain a cumulative average of at least B in all courses taken for graduate credit. According to the NDU Attendance Policy, a student who is absent without excuse from more than one third of the number of sessions in any one course, or who fails to sit for scheduled examinations, or fails to fulfill required written or oral work, will be given F. Results of tutorial courses, projects, or theses will be reported as Pass (P) or Fail (F).

Remedial Courses

These are usually undergraduate courses, taken to make up for any particular deficiencies. They do not carry graduate credit. The minimum passing grade for a remedial course is B; however, a department or program may set a higher minimum passing grade.

PROBATION AND DISMISSAL

Graduate students may be placed on academic probation by the faculty graduate committee if they:

1. Fail any course taken for graduate credits,
2. Do not maintain a cumulative average of *B*.

Even though an adequate cumulative average is attained, the probation of graduate students may be removed only by action from the appropriate faculty graduate committee if:

1. Students have completed a minimum of 9 credits of graduate level courses within two consecutive semesters after being placed on probation, have passed all courses, and have obtained a cumulative average of *B*. If students fail to meet any of these conditions, they will be dismissed from the program.
2. The department or program in which students are studying recommends the removal of the probation.

The faculty graduate committee may discontinue a student from graduate study if:

1. The probation status is not removed within a period of two semesters,
2. In the opinion of the department or program, and irrespective of the grades obtained, the work of the student is deemed unsatisfactory,
3. The student fails the comprehensive examination twice, or fails the thesis defense twice.

COMPREHENSIVE EXAMINATION

Where applicable, a student must pass a comprehensive examination after completion of most of the course requirements for the degree. The concerned department will schedule the examination. The purpose of the examination is to ascertain the student's knowledge of the field of specialization and related areas. A student who does not pass the comprehensive examination may repeat it only once after a time lapse of at least three months but only with the approval of the concerned graduate committee.

THESIS

In partial fulfillment of the requirements for the master's degree, a student must submit a thesis, when applicable, based on results of original and independent research. Except in

departments or programs in which the medium of instruction is not English, the thesis must be in English.

An abstract not exceeding 350 words must be submitted with the thesis. If the thesis is in a language other than English, the abstract must be written both in that language and in English.

The concerned Department must ensure the availability of a copy of the *Thesis Manual*, which provides instructions on the preparation of theses. Its application is mandatory and theses not conforming to its requirements will not be accepted. For all matters not discussed in the manual, theses must follow the form and style described in the latest edition of K. L. Turabian, *Manual for Writers of Term Papers, Theses and Dissertations* (University of Chicago Press), or any other form specified by the department or program provided this conforms to the manual.

Copies of the thesis, unbound but ready for binding, should be submitted to the members of the thesis committee at least two weeks before the defense. Copies may be obtained by any legible and durable form of reproduction. Additional copies may be required, as specified by the concerned department or program.

Thesis Committee

The master's thesis committee should be composed of at least three members recommended by the department or program and approved by the faculty graduate committee. The proposal of the thesis topic and the selection of the advisor and the members of the thesis committee for candidates for the master's degree should have been approved by the faculty or school graduate committee at least four months before the student defends the thesis. It is advisable that the thesis committee includes one external member. This member may be from an institution other than NDU. All committee members should hold professorial ranks. The thesis committee approves the thesis topic and research program and conducts the thesis defense examination.

Thesis Defense

The thesis defense may be open to the public and must be carried out no later than June 10, October 30, or March 1, for students who wish to graduate at the end of the summer session, the fall, or the spring semester respectively.

Pass or Fail is reported for the combined thesis and thesis defense. If fail is reported, the student may resubmit the thesis and defend it after a period of at least three months. Failure on the second attempt results in discontinuation from graduate work.

Students must be registered for the thesis or at least one course in the session in which they expect to graduate in order to present their defense.

Deposit of the Thesis in the Library

After passing the thesis defense examination, the student is required to deposit at the library two copies of the thesis. A library receipt of these copies must be delivered to the Office of the Registrar before the student is awarded the degree. The student should sign a release form indicating whether or not the library is authorized to supply copies of the thesis to other libraries or individuals. The non-authorization option is valid for a period of two years only, after which copies of the thesis will be supplied on request.

Deadlines

	For Graduation in		
	Fall	Spring	Summer
Deadline for approval of Thesis topic & committee	June 20	Oct. 20	Feb. 1
Deadline for thesis defense	Oct. 30	March 1	June 10
Deadline for deposit of Thesis at library	Nov. 10	March 10	June 20

PROVISIONS FOR THE MASTER DEGREE

In addition to satisfying the general requirements set in the preceding sections, students working towards a master's degree must fulfill the requirements described below:

Course Requirements

Two types of Master degree programs are available:

1. A thesis based on independent research work. Students following this program are required to take a minimum of 24 graduate credit hours; a maximum of 9 credits may be in tutorial courses.
2. A non-thesis program where students are required to take a minimum of 33 graduate credit hours and should follow a course of study approved by the department or program and by the graduate committee of the faculty.

Language Requirements

Aside from English proficiency requirements, there are no special university language requirements for the master's degree. However, individual departments and programs may set their own language requirements either as a general rule or in specific cases. The faculty graduate committee will determine examination procedures.

Residency Requirements

To meet the minimum residency requirements for the master's degree, students must register and be in residence, as graduate students, for at least two semesters, one semester and two summers, or four summers.

All requirements for the master's degree must be completed within a period of four years after admission to graduate study. Students attending summer sessions only must complete all requirements within a period of six summers after admission to graduate study. Extension beyond the maximum period of study requires the approval of the graduate committee of the faculty.

GRADING SYSTEM

The University uses the following grading system for the graduate programs:

Grade	Description	Quality Points/Credits	Interval
A ⁺	Outstanding	4.0	100-97
A	Excellent	4.0	96-93
A-	Skillful	3.7	92-89
B+	Very Good	3.3	88-85
B	Good	3.0	84-81
B-	Reasonably Good	2.7	80-77
C+	Satisfactory	2.3	76-73
C	Passing, but not satisfactory	2.0	72-70
F	Failure	0.0	69-0
UW	Unofficial Withdrawal	0.0	
W	Official Withdrawal		
I	Incomplete		
P	Passing		
R	Repeat		
PR	Progress, re-enroll		
UP	Unsatisfactory Progress		
U	Audit		

I This grade is given by an instructor only when there is reasonable expectation that a student will successfully complete course requirements. If this grade is unresolved by the eighth week of the following semester, the office of the Registrar will automatically convert it to the grade of *F*. Degree candidates should be aware that an *I* grade received during the last semester in any of the courses required for graduation will result in the delay of graduation.

PR This grade is used to indicate progress on research for the Master's thesis or project up to time of completion, when the appropriate letter grade is entered on the transcript.

UP This grade is used to reflect that unsatisfactory progress is being made in a Master's research project or thesis.

W The grade *W* indicates withdrawal without academic penalty. This grade is issued by the Registrar's office to students filling in an official course withdrawal form by the scheduled deadline. The grade *W* is not counted in the grade point average and may not be changed to any other grade under any circumstances.

UW The *UW* is assigned by the instructor when a student has never attended a class or has ceased attending and has not submitted an official course withdrawal to the Office of the Registrar. This grade is counted as an *F* in the grade point average.

U Students have the option of auditing courses instead of receiving credits and grades for them. A *U* will appear on the student's permanent record.

ATTENDANCE POLICY

Classes are held from Monday to Friday. Graduate courses are offered in the afternoon as of 4:00 P.M..

Students are expected to attend all classes and laboratory sessions. Absence, whether excused or not, does not absolve a student from the responsibility for the work done or from conforming to any announcement made during his/her absence.

Instructors are responsible for clearly informing the students in writing of the attendance requirement for each course and the consequences of poor attendance.

For legitimate reasons a student is allowed to be absent for a maximum of 6 hours per three-credit course.

ACADEMIC ADVISOR

Students are responsible for the proper completion of their academic programs. They must be familiar with the rules and regulations of Graduate Studies, as well as the general academic regulations promulgated by individual Faculties and departments. The offices of the deans and department chairpersons, in cooperation with student advisors and faculty members, endeavor to follow each student's academic progress, and students are encouraged to seek counsel whenever there is a need. If advisors are unable to satisfactorily resolve problems, they will refer students as is deemed appropriate and necessary.

ACADEMIC HONESTY POLICY

It is the expressed policy of the University that every aspect of graduate academic life, related in whatever fashion to the University, should be conducted in an absolutely and uncompromisingly honest manner by graduate students.

The University Disciplinary Committee will deal with apparent and alleged breaches of this policy.

ACADEMIC STANDARDS

Continuation in the graduate programs requires satisfactory progress toward a graduate degree. Evidence of such progress includes maintaining a 3.0/4.0 cumulative average throughout the course of graduate study. Furthermore, in order to graduate, a student must have at least a 3.0/4.0 cumulative grade point average.

Failure to obtain a G.P.A. of 3.0/4.0 for the first twelve credit hours will result in notification of probationary status. Any student on probation must remove probation at the end of the following semester provided the student enrolls in at least 6 credits. Failure to meet either of these requirements will result in suspension from the University.

A graduate student will also be suspended if he/she obtains two Fs.

WITHDRAWAL POLICIES

Leave of Absence

Graduate students may request a leave of absence from a program through written appeal to their advisors. The advisor will forward the request along with a recommendation to the Dean of the Faculty who will answer on behalf of the University. A student who does not register for courses for more than one calendar year must reapply for admission to the University and to the graduate degree program.

Withdrawal from courses

After the date of dropping and/or adding courses, students are allowed until the end of the 14th week as of the beginning of a semester to withdraw from courses. W will be inscribed on their records. No withdrawal is allowed beyond this period.

Withdrawal must be made by the deadline set for dropping a course. Late withdrawal may be accepted only in case of illness or circumstances beyond control.

APPLICATION FOR GRADUATION

Students who expect to graduate must complete and submit the Application for Graduation to the Office of the Registrar.

Degrees earned during any semester or summer will be awarded only at the following commencement exercises. Commencement is held once a year.

PARTICIPATION IN COMMENCEMENT EXERCISES

The University requires June graduates to participate in the Commencement exercises. Summer and fall graduates may participate provided they notify the Registrar's Office of their intent by mid-June at the latest by submitting the online form.

SUMMER SESSION

The University may offer the opportunity to pursue graduate studies during the summer. Although graduate-level courses are offered during the summer session, the University does not guarantee that any particular course will be offered. A student may register for a maximum of six credit hours in the summer.

GRADUATE RESEARCH ASSISTANTSHIP POLICY

I. Preamble

In accordance with the mission, vision, core values, and strategic goals of Notre Dame University–Louaize (NDU), the present *Student Research Assistantship Policy* is set to provide NDU students at the graduate level with research opportunities that help them develop critical thinking, scholarly competence, cultural maturity, and professional experience.

II. Definition of a Student Research Assistantship Appointment

A Student Research Assistantship Appointment (SRAA) is a research assignment compensated in the form of remuneration and/or tuition waiver and granted to a graduate student for his/her contribution to research activities related to his/her academic specialty and/or professional development.

III. Types of SRAA

Students who qualify for a SRAA are of two types:

- *Research Assistant*: A Research Assistant is a student who is assigned research work under the supervision of a full-time faculty member from a University Faculty.
- *Research Affiliate*: A Research Affiliate is a student who is assigned research work in one of the University research centers, University libraries, or University technical units.

IV. Duration of a SRAA

- During the Fall or Spring semester, a SRAA is granted for the duration of the semester and is renewable upon need and as long as the eligibility requirements are met.
- During the summer term, a SRAA is granted for the duration of the term and is renewable upon need and as long as the eligibility requirements are met.
- A summer SRAA may exceed the duration of the summer session upon approval by the concerned Faculty Dean of a written request with justification from the research supervising body, taking into consideration the student's academic progress and the anticipated completion date of his/her degree.

V. Eligibility Requirements

The eligibility requirements for a SRAA are the following:

- The applicant is a graduate student with a minimum GPA of 3.2 after completing 6 credits; or with a GPA of 3.5 when admitted to the Graduate Program. Exceptions to this requirement must be approved by the candidate's Department Chairperson and Faculty Dean.
- In the semester/term during which the SRAA is to be effective, the applicant must be enrolled for at least six (6) credit hours and at most nine (9) credit hours during the Fall and Spring semesters, and for at least three (3) credits during the summer term. Exceptions to this requirement must be approved by the applicant's Faculty Dean upon a written request with justification from the research supervising body, taking into consideration the applicant's academic progress and the anticipated completion date of his/her degree.
- The research in which the applicant is involved must be relevant to his/her academic program.

VI. Research Workload

- The workload for a student receiving a SRAA may vary in duration and scope depending on the requirements of the research project. A SRAA, however, shall not exceed 20 hours per week.
- The workload for a student who holds an outside employment, or who benefits from another kind of assistantship, for instance teaching assistantship, shall have a restricted research workload commensurate with his/her other obligations.

VII. Appointment Procedure

- Upon announcement of SRAA availability, applications shall be submitted to the corresponding Faculty Dean by students qualifying as research students, and to the corresponding Director of a Research Center, the Director of the University Libraries, or the head officer of a technical unit, by students qualifying as research affiliates.
- Applications shall be evaluated by the concerned body supervising the research project.
- All applicants, whether appointed or not, shall be notified of the final decision.
- A SRAA form shall be prepared for the selected research student by the supervising research body. The SRAA shall detail the nature and purpose of the research project, its expected duration, the type of the appointment, the workload of the research student, and the amount of his/her remuneration. The SRAA form shall be completed prior to the effective date of appointment and submitted to the concerned Dean for final approval.

- Upon approval, the Dean shall offer to the student, on behalf of the University, a SRAA per official letter for final signature.
- The appointment procedure is completed when the SRAA is signed by the student and ratified by the signature of the President on behalf of the University.

VIII. Reconsideration of a SRAA

- A SRAA may be unilaterally revoked at any time by the supervising research body for a compelling cause, such as the unsatisfactory performance by the student of assigned duties, insubordination, poor academic performance, felony, or for any other cause of similar magnitude.
- If the supervising research body cancels a proposed research project for any reason before the end of its stated duration, the student shall receive full compensation as agreed upon in the SRAA.
- If the research student willingly terminates a SRAA, or if she/he is dismissed for cause before the end of its stated duration, the assistantship shall be cancelled automatically.
- If the research project is completed before the end of the stated duration, the remuneration shall end on the date of completion.

IX. Compensation for a SRAA

- The compensation formalities are processed through the concerned Dean and the Director of Finance for students qualifying as Research Assistants, and through the Vice-President for Sponsored Research & Development and the Director of Finance for students qualifying as Research Affiliates.
- The remuneration of research students is made on a credit-cost basis.
- The compensation for a SRAA may range between 20% and 60% of the cost of the credits.
- The compensation for a SRAA in the form of remuneration shall usually be paid in four equal installments during the Fall and Spring semesters, and in two installments during the summer term.
- The compensation for a SRAA in the form of tuition waiver shall be deducted from the student's tuition.

GRADUATE REGISTRATION

REGISTRATION PROCESS

A registration guide is distributed to every graduate student before the period assigned for registration. Students are advised to read the registration guide and this section of the catalog carefully. Registration involves the following steps:

Payment of Fees

The first step in registration is the payment of fees. Every registrant must pay the fees in full, or make arrangement for payment two weeks before the beginning of registration. Regardless of the manner of payment, every student must clear his/her registration with the Business Office. Outstanding balances must be settled in full before a student is allowed to register. Those who fail to honor the terms of the arrangement of payment of fees will be denied the privilege of future arrangements.

Consultation with Academic Advisors

Each student is assigned an academic advisor. With a proposed semester course schedule, the student proceeds to his/her advisor for consultation and the finalization of the selected courses. Students should consult with their academic advisors in the places assigned them for registration. The selection of courses is initially undertaken by the registrant himself/herself. Registration in absentia or by proxy is not permitted. Continuing students should check the course requirements as prescribed for every major, and compare them with the ones they have already completed. In the light of this comparison, they should check the course offerings for the given semester and then fill in their semester course schedules. New students must make sure that all required documents, particularly those mentioned in the letter of admission, are submitted to the Registrar's Office. They should also have in hand their letters of admission and identity cards or passports to present them to their advisors. Students should follow the steps indicated in the registration guide.

COURSE LOAD

A full-time graduate student must register for twelve credits per semester. Students registered for less than twelve credits per semester are considered part-time graduate students. Graduate students cannot register for more than six credits in the Summer session.

AUDITING

Students may register for courses on an auditing basis. Courses in which a student is so enrolled carry no credit but are listed in the student's transcript as audit. The fee charged by the university shall be 75% of the fee paid by regular students. Student auditors should fulfill the same admission conditions as any other regular student.

DISCLOSURE OF STUDENTS' RECORDS

The University does not disclose information and academic records of any student except with his/her prior consent. Exceptions to this principle are made only in compliance with judicial orders and health or safety emergency.

TUITION AND FEES

Notre Dame University is a non-profit institution. Tuition and fees paid by students represent a small percentage of the full cost of a student's education. The deficit is covered by income from gifts, grants and donations from foundations, alumni and friends of the

University. The fees cover applications, membership in National Social Security Fund (NSSF), activities, Yearbook and Student Association, and Insurance. Membership of Lebanese students in the NSSF is mandatory by law. Thus prior to registration, students are urged to follow the instructions given by the Students Affairs Office concerning the clearance for NSSF.

Tuition

Tuition per Credit Hour	L.L.	500,000
Tuition/Credit Hour (Remedial)	L.L.	430,000
Auditing per Credit Hour per Semester	L.L.	75% of credit tuition

Fees

Admission Application	L.L.	150,000
Entrance Examination (when applicable)	L.L.	75,000
Late Registration	L.L.	100,000
Petition	L.L.	5,000
Change of Major	L.L.	100,000
Make-up Final Examination Fee/Incomplete	L.L.	200,000
Transcript (Official Copy)	L.L.	10,000
Transcript (Student Copy)	L.L.	5,000
Library Fee/Book /Day (Late Returns)	L.L.	1,500
Graduation	L.L.	50,000
Medical Insurance	L.L.	25,000
Academic Fees	L.L.	145,000
Smart ID Card (when applicable)	L.L.	15,000.
NSSF Fees (when applicable)	L.L.	150,000

Because of the rising cost of higher education, universities are facing severe financial problems. NDU reserves the right to change tuition fees and expenses at any time without prior notice.

A student may not complete registration, graduate or receive a transcript of record until all fees are paid.

REFUND POLICY

Contracts with faculty members and provisions for education are made by the University in advance for the entire year. Accordingly, if a student withdraws for justifiable reasons after final registration, refund of tuition fees will be made according to the following schedule of withdrawals:

- During drop/add period, 75% of the tuition is refunded.
- During the first week of classes, 50% of the tuition is refunded.
- Tuition is not refunded after the first week of classes.
- Refund policy does not apply during summer session. No refund of tuition is made for any withdrawal during summer session.

FINANCIAL SUPPORT FOR RE-ENROLLED COURSES

Students who re-enroll, for any reason, in any course, shall not benefit from any financial support for the-enrolled courses .

GER, FRESHMAN PROGRAM AND DEGREES

GENERAL EDUCATION REQUIREMENTS (GER)

A set of 27 – 33 credits in interdisciplinary courses, called General Education Requirements (GER), as a foundation for a liberal arts and basic science education. These GER shall be distributed as follows:

A. Communication Skills in English and Arabic

9 cr.

English (6 cr.)

ENL 213: Sophomore English Rhetoric

And

ENL 223: Communication Arts

Or

ENL 230: English in the Workplace

Arabic (3 cr.) One course from:

ARB 211: Appreciation for Arabic Literature

ARB 212: Advanced Arabic Grammar

ARB 224: Arabic Literature and Human Thought

ARB 231: Technical Arabic

ARB 317: Themes of Modern Arabic Literature in Lebanon (20th century)

B. Philosophy and Religion

6 cr.

Religion (3 cr.)

REG 213: Catholicism

REG 212: Religion and Social Issues

REG 314: Marriage and Family in the Catholic Church

REG 313: The Maronites: Faith and Cultural Heritage

Philosophy + Ethics

PHL 211: Logic and the Scientific Method

PHL 311: Ethics and the Modern World

POS 345: Ethics and Leadership

ENS 205: Environment, Society and Ethics

C. Cultural Studies and Social Sciences

6 cr.

Cultural Studies

HUT 305: Human Thought to 1500

HUT 306: Human Thought from 1500 to the Present

MUS 210: Music Appreciation

FAP 215: Art and Culture

ARP 215: Cultural Themes in Lebanese Ach.

COA 359: Media and Society

COA 315: World Cinema Survey

LIR 214: Introduction to Literary Genres

NTR 215: Foods and Nutrition of World Cultures

Social Sciences

PSL 201: Introduction to Psychology
SOL 201: Introduction to Sociology
SOL 301: Introduction to Anthropology
BAD 201: Fundamentals of Management
ECN 200: Survey of Economics
ECN 211: Principles of Micro Economics
ECN 212: Principles of Macro Economics

D. Citizenship

6 cr.

Two courses from the following pool:

HIT 211: History of Lebanon and the Middle East
POS 201: Introduction to Political Science
POS 210: Government and Politics in Lebanon
POS 240: Law and Society
POS 319: Democracy and Human Rights
POS 337: Dialogue of Civilizations
IAF 301: Modern Political Ideologies

E. Science and Technology

6 cr.

Mathematics/Statistics/Computer Science (3 cr.)

CSC 201: Computer and Their Use
MAT 201: Fundamentals of Mathematics
MAT 202: Mathematics for Arts
MAT 204: Mathematics for Business & Eco. I
MAT 211: Discrete Mathematics
STA 202: Statistics for Humanities
STA 210: Statistics for Business & Eco.

Natural Sciences (3 cr.)

PHS 211: Principles of Physics
PHS 207: Development of Science and Technology
AST 201: Discovering Astronomy
CHM 211: Principles of Chemistry
ENS 201: Introduction to Environmental Science
ENS 202: Environment and Sustainable Development
ENS 206: Ecotourism
BIO 202: Mystery of Life
BIO 203: Discover Biology
HEA 201: Health Awareness
NTR 201: Basic Human Nutrition

F. Study and Learning Skills

0 cr.

FRESHMAN PROGRAM

1. A student entering the Freshman Program at NDU as Freshman is required to complete a minimum of 30 credits. He/She has to follow either the Arts or the Science program.
2. The Freshman Program includes courses from the following areas: (Arts and Science)
 - Humanities and Social Sciences 9crs.
(a minimum of 3crs. in each area)
 - Natural Sciences and Mathematics 6crs.
(a minimum of 3 crs. in Natural Sciences)
 - Freshman students cannot be considered sophomore students unless they have completed 30 crs. of Freshman courses successfully.
 - In exceptional cases, the Equivalency Committee in the Lebanese Ministry of Education will give the permission to the freshman student who misses one course or 5 credits from the freshman requirements, to register in sophomore courses, on condition he/she registers for the missing freshman course and passes it successfully
 - Freshman students cannot register in sophomore courses without having this prior authorization.
 - According to the regulations of the Lebanese Ministry of Education the above mentioned areas include the following subjects:
 - a. Humanities: Languages/Literature/Philosophy/History
 - b. Social Sciences: Psychology-Sociology-Anthropology-Economics-Geography-Business Administration-Management-Political Studies.
 - c. Natural Sciences: Biology-Chemistry-Physics-Geology-Astronomy Nutrition.
 - d. Mathematics
 - e. Computer Science
 - f. Arts: Art-Music-Drama (not to exceed 3 credits)

DEGREES OFFERED

Faculty of Architecture, Art and Design (FAAD)

Bachelor of Architecture	182 credits
** Bachelor of Arts in Interior Design	136 credits
** Bachelor of Arts in Graphic Design.....	102 credits
with the following emphasis: <i>Typography</i>	102 credits
<i>Multimedia</i>	102 credits
<i>Information</i>	102 credits
** Bachelor of Arts in Fashion Design.....	102 credits
Bachelor of Arts in Photography	102 credits
Bachelor of Arts in Fine Arts.....	102 credits
Bachelor of Arts in Performing Arts.....	102 credits
Bachelor of Arts in Decorative Arts & Crafts	102 credits
Bachelor of Arts in Music.....	99 credits
with the following emphasis:	
<i>Musicology</i>	99 credits
<i>Music Education</i>	99 credits
<i>Musimediology</i>	99 credits
<i>Arabic Musicology</i>	99 credits
<i>Jazz Music</i>	99 credits
Master of Architecture in Landscape Urbanism	36 credits
Master of Arts in Design.....	36 credits
Master of Arts in Music.....	36 credits
Master of Arts in Fine Arts.....	36 credits

Faculty of Business Administration and Economics (FBAE)

Bachelor of Business Administration - <i>Accounting</i>	106 credits
Bachelor of Business Administration - <i>Banking & Finance</i>	106 credits
Bachelor of Business Administration - <i>Economics</i>	106 credits
Bachelor of Business Administration - <i>Int'l Business Management</i>	107 credits
Bachelor of Business Administration - <i>Marketing</i>	106 credits
Bachelor of Business Administration	
With the following emphasis:	
<i>Distribution and Logistics Management</i>	106 credits
<i>Energy Economics</i>	106 credits
<i>Financial Engineering</i>	106 credits
<i>Health Care Management</i>	106 credits
<i>Human Resources Management</i>	106 credits
<i>Management</i>	106 credits
** Bachelor of Hotel Management and Tourism.....	
With the following emphasis:	
<i>Food & Beverage</i>	103 credits
<i>Hospitality Management</i>	103 credits
<i>Travel & Tourism Management</i>	103 credits
<i>Management of Event Production</i>	103 credits
** Master of Business Administration (M.B.A.).....	39 credits
Master of Business Administration (M.B.A.).....	
With the following emphasis:	
<i>Economics</i>	39 credits
<i>Finance</i>	39 credits

<i>Hospitality Management</i>	39 credits
<i>Human Resources Management</i>	39 credits
<i>Management & Strategy</i>	39 credits
<i>Marketing</i>	39 credits
<i>Project & Operations Management</i>	39 credits
Master of Science in International Business (MBA-MIB) with Bordeaux Business School	
Faculty of Engineering (FE)	
Bachelor of Engineering in Civil Engineering	150 credits
* * Bachelor of Engineering in Computer Communication Engineering	150 credits
* Bachelor of Engineering in Electrical Engineering	150 credits
Bachelor of Engineering in Mechanical Engineering	150 credits
Faculty of Humanities (FH)	
Bachelor of Arts in Education	
With the following emphasis:	
<i>Early Childhood</i>	105 credits
<i>Learning Disabilities</i>	105 credits
<i>Education of the Handicapped</i>	105 credits
<i>Education of the Gifted</i>	105 credits
<i>School Counseling</i>	105 credits
* * Bachelor of Arts in Communication Arts	
With the following emphasis:	
<i>Radio/TV</i>	106 credits
<i>Journalism</i>	104 credits
* * Bachelor of Arts in Advertising & Marketing	105 credits
* Bachelor of Arts in Psychology	
With the following emphasis:	
<i>Clinical</i>	106 credits
<i>Educational</i>	106 credits
<i>Industrial</i>	106 credits
Bachelor of Arts in English Language.....	102 credits
* * Bachelor of Arts in Translation & Interpretation.....	108 credits
With the following emphasis:	
<i>Translation</i>	108 credits
<i>Interpretation</i>	108credits
Bachelor of Arts in Arabic Language & Literature	103 credits
Bachelor of Arts in Physical Education & Sport	99 credits
* * Teaching Diploma in English	18 credits
* * Teaching Diploma in Mathematics	18 credits
* * Teaching Diploma in Biology	18 credits
* * Teaching Diploma in Physical Education	21 credits
* * Teaching Diploma in Arabic Literature.....	18 credits
* * Teaching Certificate	18 credits
Master of Arts in English Language & Literature	36 credits
With the following emphasis:	
<i>Applied Linguistics and TEFL</i>	36 credits
<i>Literature</i>	36 credits
Master of Arts in Arabic Language & Literature	30 credits
Master of Arts in Translation.....	36 credits
Master of Arts in Media Studies	

With the following emphasis:	
<i>Electronic Media</i>	39 credits
<i>Journalism</i>	39 credits
<i>Advertising</i>	39 credits
Master of Arts in Education	
With the following emphasis:	
<i>School Management and Educational Leadership</i>	33 credits
<i>Special Education</i>	33 credits
<i>Educational Technology</i>	33 credits

Faculty of Natural and Applied Sciences (FNAS)

** Bachelor of Science in Computer Science	104 credits
With the following emphasis:	
* <i>Computer Information Systems</i>	102 credits
* <i>Computer Graphics and Animation</i>	108 credits
* Bachelor of Science in Actuarial Science & Insurance	112 credits
* Bachelor of Science in Mathematics	103 credits
With the following emphasis:	
<i>Pure Mathematics</i>	103 credits
<i>Mathematics Education</i>	103 credits
<i>Computational Mathematics</i>	103 credits
** Bachelor of Science in Biology	102 credits
With the following emphasis:	
** <i>Biotechnology</i>	102 credits
* <i>Environment Biology</i>	102 credits
** Bachelor of Science in Environmental Science	104 credits
Bachelor of Science in Chemistry	98 credits
Bachelor of Science in Applied Statistics	90 credits
** Bachelor of Science in Business Computing	91 credits
Bachelor of Science in Geographic Information Systems	90 credits
* Bachelor of Science in Physics	95 credits
Master of Science in Computer Science	30 credits
With the following emphasis:	
* <i>Computer Information Systems</i>	30 credits
* Master of Science in Mathematics	33 credits
With the following emphasis:	
<i>Pure Mathematics</i>	33 credits
<i>Applied Mathematics</i>	33 credits

Faculty of Nursing and Health Sciences (FNHS)

Bachelor of Science in Medical Laboratory Technology	103 credits
Bachelor of Nursing	105 credits
** Bachelor of Science in Nutrition and Dietetics	94 credits

Faculty of Political Science, Public Administration, and Diplomacy (FPSPAD)

** Bachelor of Arts in Political Science	105 credits
With the following emphasis:	
** <i>NGOs</i>	105 credits
** Bachelor of Arts in Political Science - <i>American Studies</i>	105 credits
** Bachelor of Arts in Political Science - <i>Euro-Mediterranean Studies</i>	105 credits
** Bachelor of Arts in International Affairs & Diplomacy	105 credits
** Bachelor of Arts in Public Administration	105 credits

With the following emphasis:

* <i>Criminal Justice</i>	105 credits
* Master of Arts in Political Science	36 credits

With the following emphasis:

* <i>NGOs</i>	36 credits
* <i>Comparative Law</i>	36 credits
* Master of Arts in International Affairs & Diplomacy	36 credits

With the following emphasis:

* <i>International Law</i>	36 credits
* Master of Arts in Public Administration	36 credits

Note: ** Offered at the North Lebanon Campus and the Shouf Campus.

FACULTY OF ARCHITECTURE, ART AND DESIGN (FAAD)

LIST OF FULL-TIME FACULTY MEMBERS

Professors

Kesrouani, Elias (Fr.), Diplôme de Docteur, 1989, *Musicologie*, Sorbonne Paris IV, France

Associate Professors

Haddad, Robert, Master of Fine Arts, 1980, University of Pennsylvania, USA

Younes, Farid, Ph.D., 1997, *Aménagement*, Université de Montréal, Québec, Canada

Assistant Professor

El Asmar, Jean-Pierre, Ph.D., 2008, *Sustainable Built Environment*, De Monfort University, UK

Beyrouti, Lola, Doctorate, 2002, *Musicology*, Université Saint-Esprit, Kaslik, Lebanon.

Voss, Jesse, Ph D., 2008, *Architecture, Environmental-Behavior Studies*, University of Wisconsin, Milwaukee.

Senior Lecturers

El-Hage, Gabriel, M. Urb, 1992, *Urbanism*, Université de Montréal, Québec, Canada

Gabriel, Nicolas, Diplôme D'Etudes Supérieure Spécialisé, 2000, *Urbanism*, Université Libanaise, Lebanon

Melki, Habib, Master of Architecture, 1985, Ball State University, USA

Selwood-Choueiri, Linda, Master of Science, 2000, *Supervision & Administration in the Visual Arts*, Parsons School of Design / Bank Street College, USA

Zaccour, Danielle, Diplôme d'Etudes Supérieures, 1991, *Arts Plastiques*, Académie Libanaise des Beaux-Arts, Lebanon

Lecturers

Bechara, André, Master of Arts, 2007, *Design*, Notre Dame University-Louaize, Lebanon.

Daghfal, Graziella, Master of Arts, 2002, *Design*, Middlesex University, UK

Kortbawi, John, Post-Graduate Diploma, 1977, *Advanced Typographic Design*, London College of Printing, UK

Matta, Nadim, Master of Arts, 1999, *Typographic Studies*, London Institute/London College of Printing, UK

Soghman, Jacqueline, Master of Arts, 2007, *Graphic Design*, Savannah College of Arts & Design, Savannah, GA

Instructors

Nasr, Noel, Master of Arts, 2006, *Photography*, University of Kent, UK

Baroud, Dina, Master of Architecture, 2007, *Landscape Urbanism*, Notre Dame University-Louaize, Lebanon

Co-Academics

Bteich, Chady, Master of Architecture, 2007, *Landscape Urbanism*, Notre Dame University-Louaize, Lebanon

Majdalani, Roula, Diplome d'Etudes Superieures, 1985, *Arts Plastiques*, Académie Libanaise des Beaux-Arts, Lebanon

Akl, Charbel, B.A., 2005, *Architecture*, Notre Dame University-Louaize, Lebanon (SC)

Staff Members

Younes, Janane, Licence, 1988, *Gestion d'Entreprise*, Université Libanaise, Lebanon, *Administrative Assistant*

Dib, Adelle, Lauréate Technique, 1988, *Secrétaire administrative*, Collège et Lycée Technique de l'Annonciation, Lebanon, *Music Department Secretary*

Girgis, Elsie, B.A., 1999, *Interior Design*, Notre Dame University-Louaize, Lebanon, *Design Department Secretary*

Sarkis, Diane, *Secretariat*, 1976, Computer and Management College, Lebanon, *Architecture Department Secretary*

El-Haddad, Nicolas, *English Language and Computer Science Studies*, 1989, Institut de l'Essor, Sin El Fil, Lebanon, and 1997, American Lebanese Language Center, Sin El Fil, Lebanon, *Faculty Technician*

Haddad, Liliane, Specialization Degree, 1983, *System Analyst*, The Lebanese Establishment for Commercial Sciences, Lebanon, *Photography Lab Assistant*.

Bassil, Edward, *Workshop Assistant*

FACULTY OF ARCHITECTURE, ART AND DESIGN (FAAD)

Acting Dean: *Mr. Habib Melki*

Administrative Assistant: *Mrs. Janane Younes*

HISTORICAL OVERVIEW

In September 1987, NDU started its 'Visual Arts' programs with the Faculty of Humanities. During the years 1995-1998, the only two degrees in Visual Arts; which we offered then; Graphic Design and Interior Design, were redesigned to provide for an international and professional (vocational) education.

Consequently, the number of enrolled students multiplied (from eighty five students in the year 1995 to two hundred seventy five in 1998).

In September 1999, the Faculty of Architecture, Art and Design was founded and ever since then the FAAD has evolved from two different Departments, Visual Arts and Architecture, and from two different Faculties, Humanities and Engineering, into a unique, growing and independent Faculty housing four Departments with their respective and varied undergraduate and graduate majors.

Today, the Faculty awards a variety of degrees along with a range of disciplines at both the undergraduate and graduate levels. Currently, the Faculty handbook lists eleven different titles at the undergraduate level and four at the graduate one. Of these, only seven bachelor degrees and two master degrees have been offered.

As a matter of fact, the FAAD now comprises of four departments with an enrollment of 314 (three hundred fourteen) students composed of:

308 (three hundred eight) undergraduates

6 (six) graduates.

Also, the Faculty has employed 65 (sixty five) faculty members consisting of two groups: full time faculty members, part-time faculty members as well as co-academic and staff members.

Currently the Faculty is equipped with academic resources such as Smart Rooms, Design Studios, Architecture Computer Workshop, Wood/Metal Workshop, Exhibition Room, Conference Room, Projects Store Room, Photography Lab, Dark Rooms, Mackintosh Lab, Textile Lab and Ceramics Lab.

Deans of the Faculty of Architecture, Art and Design

Dr. Nadim Karam 2000-2003

Dr. Shehwan Khoury (Acting Dean) 2003-2004

Dr. Assaad Eid 2004-2007

Mr. Habib Melki (Acting Dean) 2007-present

MISSION, VISION AND VALUES

Mission

The Faculty is committed to the ambitions of students wishing to study Architecture, Art, or Design. It seeks to attract a diverse range of students from Lebanon or the region by providing intellectually challenging and professional programs serving the needs of Lebanon and the region and underpinned by scholarship, research and professional activity.

Vision

The Faculty will strive to be the leading provider of professional programs in the Arts and Design and will deliver outstanding education/training programs and provide opportunities to develop high levels of creative ambitions and technical skills to enable students to play a dynamic professional role in continuing development. Students will learn to challenge conventional wisdom from an informed and constructive position and be encouraged to engage in self-directed approaches to the acquisition of knowledge and understanding. Supporting faculty members' involvement in research, professional practice, development of teaching and learning methodology in order to establish a more scholarly and professional environment.

Values

Educating our students to build their future doesn't solely rely on us providing them with the technical tools and learning material to pursue a career; on the contrary, we pride ourselves in molding individuals who are both professional and responsible.

On-campus interaction between NDU - FAAD faculty, staff and students, is characterized by a mutual respect for long-held traditions as well as openness and acceptance of positive change and constructive criticism. One our main values, is to foster a culturally diverse environment where everyone is treated based on their human values, regardless of religion, race, belief or gender.

We encourage our students' active involvement in environmental educational and social issues and support them in their quest to make a genuine and lasting difference in their surroundings.

Our faith is part of our identity, which is why we rely on open communication and full cooperation to insure that every one's views and beliefs are respected at NDU in general and FAAD specifically. In order to maintain a healthy yet exciting learning environment while shaping principled individuals, we cherish these values as part of our educational identity and thus promote:

- Tolerance of all human beings regardless of background.
- Cooperation between all members of NDU to ensure personal and professional growth.
- Communication of views and beliefs within a positive and responsive environment.
- Diversity and cultural exchange devoid of prejudice and judgment respect of campus integrity; i.e. cleanliness and policies.

FACULTY PROFILE

The overall aim is to provide a comprehensive and flexible range of programs in response to the educational and professional needs of the local community, the region and national and international demand and to secure the opportunity for personal and professional development in any of the following areas: Architecture, art or design. In more specific terms:

- To help individuals develop their creative, intellectual and technical abilities and enhance their expertise to make an informed contribution to the cultural, technological, social and economic needs of society in general.
- To foster fundamental learning and research skills coupled with an understanding of the historical, cultural, social and commercial arena within which those engaged in architecture, arts and design operate.

- To equip individuals for an array of career paths and changes in employment patterns, thus promote ingenuity, adaptability and mobility.
- To enable students at all levels to deal flexibly with varied problems and tasks and technologies.

OBJECTIVES

On completion of their studies, the students are expected to:

- Be articulate, informed graduates who have knowledge and understanding of the arts and design in general and their chosen discipline in particular;
- Demonstrate the ability to think creatively, to conceptualize, plan and apply an inventive approach in resolving formal and technical issues;
- Have acquired a knowledge and understanding of materials, processes and technologies through involvement in theory and practice;
- Have developed the critical skills necessary to analyze and understand the cultural and social context of arts and design practice and an appreciation of cultural diversity;
- Demonstrate interpersonal skills and the ability to work independently or collaboratively within a group;
- Be able to effectively communicate ideas, information and argument in written, oral and visual forms;
- Have an awareness of the needs of the profession, the community and the economy and be responsive to a wide range of social and economic needs;
- Have an understanding of professional responsibility and accountability;
- Have acquired the specialist knowledge to enable effective contribution to commerce, industry or research;
- Maintain a commitment to continuing professional development and lifelong learning.

Departments and Programs

The following departments and programs constitute the Faculty of Architecture, Art and Design:

Department of Architecture
Department of Design
Department of Music
Department of Art

Degrees

The Department of Architecture offers an undergraduate program leading to the degree of:

Bachelor of Architecture (182 credits)
and a graduate program leading to the degree of:
Master of Architecture in Landscape Urbanism (36 credits)

The Department of Design offers undergraduate programs leading to the degrees of:

BA in Graphic Design

- Typography emphasis (102 credits)
- Multimedia emphasis (102 credits)
- Information emphasis (102 credits)

BA in Interior Design (136 credits)
BA in Fashion Design (102 credits)
BA in Photography (102 credits)

And a graduate program leading to the degree of:

Master of Arts in Design (36 credits)

And Minors in the following fields:

Minor in Graphic Design (18 credits)
Minor in Photography (18 credits)

The Department of Music offers undergraduate programs leading to the degree of:

BA in Music and Musicology

- Musicology emphasis (99 credits)
- Music Education emphasis (99 credits)
- Musimedialogy emphasis (99 credits)
- Arabic Musicology emphasis (99 credits)
- Jazz Music emphasis (99 credits)

And a graduate program leading to the degree of:

Master of Arts in Music (36 credits)

The Department of Art offers undergraduate programs leading to the degrees of:

BA in Fine Arts (102 credits)
BA in Performing Arts (102 credits)
BA in Decorative Arts and Crafts (102 credits)
And a graduate program leading to the degree of:
Master of Arts in Fine Arts (36 credits)
and a Minor in Fine Arts (15 credits)

Departmental Admission Requirements:

In addition to the University admission requirements, prospective candidates must complete any remedial course(s) the first year of enrollment. Students who fail to meet these requirements will not be allowed to proceed to their bachelor degree in the Faculty of Architecture, Art and Design.

The Degree of Bachelor of Architecture

Program Description

The BA in Architecture program, offered by the Department of Architecture of the FAAD, aims at:

- Providing the learner with the proper exposure to enhance reflective approach to design and foster students' critical thinking.
- Developing the intellectual and theoretical backgrounds of the students through the study of ancient, modern and contemporary history and theories of architecture.
- Increasing student's awareness with respect to environmental and social issues. This concern mainly focuses on the interrelated influence between the human being, the society, and architecture.
- Contributing in building-up an architectural epistemology.
- Preparing the learner for professional practice and post-graduate studies.

Admission Requirements

In addition to the University admission requirements, prospective candidates must complete all remedial courses, Math and/or English, if any, during their first year at NDU. Students who fail to meet the above requirements will not be allowed to proceed to the degree courses in Architecture and other majors of the Faculty of Architecture, Art & Design.

Graduation Requirements

To obtain the degree of bachelor of architecture, a student must complete a total of 182 credits with an overall grade-point average of at least 2.0/4.0 and a minimum cumulative grade point average of 2.3/4.0 in the Core and Major requirements. In addition, all major courses must be successfully completed with a minimum grade of C-. These 182 credits are divided into:

Prior to enrolling into the ARP 590-Senior Study courses, student will have to fulfil the following requirements:

A minimum of 21 credits of their GER's must be completed prior to taking ARP 590.
 Prerequisites: ARP 438, ARP 552, ARP 556, ARP 557, ARP 562
 Student must have a minimum of 2.3 (C+) GPA in their cumulative major courses.
 Courses CSC 201, MAT 201 and MAT 202 cannot be taken by Architecture students.

Degree Requirements (182 credits)

General Education Requirements	27 cr.
The GER are distributed as follows:	
Communication Skills in English: ENL 213 & ENL 223 or ENL 230	6 cr.
Communication Skills in Arabic, One course from: ARB 211, ARB 212, ARB 224, ARB 231, ARB 317	3 cr.
Religion, One course from: REG 212, REG 213, REG 314, REG 313	3 cr.
Philosophy, One course from: PHL 211, PHL 311, POS 345, ENS 205	3 cr.
Cultural Studies, Two courses from: HUT 305, HUT 306, PSL 201, SOL 201, SOL 301, MUS 210, FAP 215, BAD 201, ECN 200, ARP 215, COA 359, COA 315, NTR 215, ECN 211, ECN 212	6 cr.
Citizenship, one course from: HIT 211, IAF 301, POS 201, POS 210, POS 240, POS 319, POS 337	3 cr.
Science and Technology, one course from : AST 201, BIO 202, BIO 203, CHM 211, ENS 201, ENS 202, ENS 206, HEA 201, MAT 204, MAT 211, NTR 201, PHS 211, STA 202, STA 210, PHS 207 <i>CSC 201, MAT 201, and MAT 202 courses should not be taken by Architecture students</i>	3 cr.
Core Requirements FAP 211, GDP 212	6 cr.
Major Requirements ARP 221, ARP 222, ARP 223, ARP 224, ARP 225, ARP 226, ARP 233, ARP 301, ARP 311, ARP 313, ARP 316, ARP 317, ARP 322, ARP 324, ARP 325, ARP 327, ARP 328, ARP 422, ARP 423, ARP 424, ARP 425, ARP 433, ARP 435, ARP 438, ARP 439, ARP 444, ARP 446, ARP 551, ARP 552, ARP 553, ARP 554, ARP 555, ARP 556, ARP 557, ARP 561, ARP 562, ARP 563, ARP 568, ARP 590, ARP 591, ARP 593 Choose one course from the following Major Electives: ARP 581, ARP 582, ARP 583, ARP 584, ARP 585, ARP 586	143 cr.
Free Electives	6 cr.

Bachelor of Architecture
Suggested Program (182 Credits)

Year I

Fall Semester I (15 Credits)

FAP	211	Drawing I	3 cr.
GDP	212	Design Principles I	3 cr.
ARP	223	Descriptive Geometry	3 cr.
—	—	GER	3 cr.
—	—	GER	3 cr.

Spring Semester I (16 Credits)

ARP	221	Architectural Sketching and Rendering	3 cr.
ARP	222	Principles of Architectural Design	4 cr.
ARP	225	Statics of Architecture	3 cr.
ARP	226	Technical Drawing I	3 cr.
—	—	GER	3 cr.

Summer Session I (8 Credits)

ARP	233	3D Architectural Survey	2 cr.
—	—	GER	3 cr.
—	—	GER	3 cr.

Year II:

Fall Semester II (17 Credits)

ARP	311	Architectural Design I	5 cr.
ARP	301	Technical Drawing II	3 cr.
ARP	313	History of Architecture I	3 cr.
ARP	317	Building Technology I	3 cr.
ARP	316	Strength of Materials	3 cr.

Spring Semester II (17 Credits)

ARP	322	Architectural Design II	5 cr.
ARP	324	History of Architecture II	3 cr.
ARP	328	Building Technology II	3 cr.
ARP	224	Applied Architectural Design I	3 cr.
ARP	327	Structural Analysis	3 cr.

Summer Session II (8 Credits)

ARP	423	Acoustics	2 cr.
—	—	GER	3 cr.
—	—	Free Elective	3 cr.

Year III:

Fall Semester III (18 Credits)

ARP	433	Architectural Design III	6 cr.
ARP	435	History of Architecture III	3 cr.
ARP	438	Reinforced Concrete Design	3 cr.
ARP	551	Construction Detailing Studio I	3 cr.
ARP	325	Applied Architectural Design II	3 cr.

Spring Semester III (17 Credits)

ARP	444	Architectural Design IV	6 cr.
ARP	446	History of Architecture IV	3 cr.
ARP	424	Bio-climatic Architecture	3 cr.
ARP	422	Lighting Design & Electrical Design	2 cr.
ARP	552	Construction Detailing Studio II	3 cr.

Summer Semester III (9 Credits)

—	—	GER	3 cr.
—	—	GER	3 cr.
—	—	Free Elective	3 cr.

Year IV:**Fall Semester IV (18 Credits)**

ARP	555	Architectural Design V	6 cr.
ARP	557	Architectural Theories	3 cr.
ARP	439	Mechanical and sanitary System	3 cr.
ARP	561	Urbanism I	3 cr.
—	—	GER	3 cr.

Spring Semester IV (18 Credits)

ARP	556	Architectural Design VI	6 cr.
ARP	554	Surveying and Field Surveying	3 cr.
ARP	562	Urbanism II	3 cr.
ARP	568	Social Architecture	3 cr.
ARP	563	Building Rules & Regulations	3 cr.

Summer Session IV (4 Credits)

ARP	590	Senior Study	2 cr.
ARP	425	Architectural Practice	2 cr.

Year V:**Fall Semester V (9 Credits)**

ARP	591	Senior Project I	6 cr.
ARP	553	Specifications & Quantity Surveying	3 cr.

Spring Semester V (8 Credits)

ARP	593	Senior Project II	6 cr.
ARP	—	Major Elective	2 cr.

Old/New Courses Equivalent or Substitute

Old Course			New Course (equivalent)		
CSC 273	Computer Aided Architectural D.	3cr.	ARP 224	Applied Architecture Design I	3cr.
CSC 274	Software Package for Architects I	3cr.	ARP 325	Applied Architecture Design II	3cr.
CEN 308	Statics for Architects	3cr.	ARP 225	Statics for Architecture	3cr.
CEN 309	Mechanics of Materials for A.	3cr.	ARP 316	Strength of Materials	3cr.
CEN 419	Structures for Architects	3cr.	ARP 327	Structural Analysis	3cr.
CEN 439	Concrete Design for Architects	3cr.	ARP 438	Reinforced Concrete Design	3cr.
ARP 421	Architectural Model Making	2cr.	ARP 233	3D Architectural Survey	2cr.
FAP 221	Drawing II	3cr.	ARP 221	Architectural Sketching & Rendering	3cr.
GDP 222	Design Principles II	3cr.	ARP 222	Principles of Architectural Design	4cr.
ARP 213	Basic Technical Skills	3 cr.	ARP 226	Technical Drawing I	3cr.
Old Course			New Course (Substitution)		
MAT 213	Calculus 3	3cr.	ARP 568	Social Architecture	3cr.
PHS 203	General Physics	3cr.	ARP 424	Bioclimatic Architecture	3cr.
GEO 202	Geology for Architects	2cr.	ARP 425	Architectural Practice	2cr.

Undergraduate Courses: Architecture

ARP 213 Basic Technical Skills (2.2); 3 cr. Using different art tools, devices and materials. Preparing and presenting a portfolio.

ARP 215 Cultural Themes in Lebanese Architecture (3.0); 3 cr. Initiation to the Lebanese Art and Architecture pointing toward the conceptual determinants and constants omnipresent in the Lebanese Culture. A historical overview showing the morphological development through time.

ARP 221 Architectural Sketching and Rendering (2.2); 3 cr. The aim is to develop abilities in observation of the physical environment in a methodical and analytical manner. The skills are to be obtained through free hand sketching and sketch-measuring using different media. *Prerequisite:* FAP 211.

ARP 222 Principles of Architectural Design (2.2); 4 cr. It is a continuation of GDP 212 with an emphasis on applying three dimensional design principles on architectural settings. The dynamics of motion, light, form, and space are also explored via readings and workshops. Another major topic of this course is the Spatial Analysis of natural and man-made environment and their graphical representation through Bubble diagrams, Site and Area analysis, topography, etc. *Prerequisite:* GDP 212.

ARP 223 Descriptive Geometry (2.2); 3 cr. Study of geometric projections in space. Emphasis on volumetric development, shade and shadow construction.

ARP 224 Applied Architectural Design I (1.4); 3 cr. The application of computer aided design (CAD) concepts in developing and communicating architectural ideas and projects.

ARP 225 Statics for Architecture (3.0); 3 cr. Study of forces, moments and couples; free body diagrams; shear and bending moment diagram; centroids; moments of inertia; problems involving beams, trusses, and frames.

ARP 226 Technical Drawing I (2.2); 3 cr. The course is a studio based course. It aims at the development of students' graphic communication skills. Students will learn 2D as well as 3D techniques of drafting to describe objects of the man made and natural environment. The focus will be on survey of architecture, drafting to scale and rendering

techniques, as well as professional sheet layout. *Prerequisite:* ARP 223

ARP 233 3D Architectural Survey (1.2); 2 cr. The objective of this course is to help students understand deeply and experiment why and how to construct architectural models of different scale and different kinds of materials. Students will plan and do research on the use, detail, budget, and techniques before starting construction.

ARP 301 Technical Drawing II (2.2.); 3 cr. A continuation of Technical Drawing I, with an emphasis on perspective as a powerful visualization tool for the Architect. The course covers the mechanical construction method same as One, Two and, Three vanishing points perspective. It also introduces the study of shadows (different light directions) and reflections in perspective. *Prerequisite:* ARP 226.

ARP 311 Architectural Design I (3.4); 5 cr. This course is the first in a sequential series of design courses. The main purpose of Architectural Design I is to acquaint student with basic Architectural problems, through the analysis of context and precedents. *Prerequisites:* ARP 222, ARP 226.

ARP 313 History of Architecture I (3.0); 3 cr. The main objectives of studying History of Architecture are the studying of the genesis of the aesthetic phenomena with respect to the human needs and understanding the development, the evolution, the impact of different ideologies, the sequence and the innovations in Architecture through history pertaining to the "spirit of time". The History of Architecture I is a survey and analysis of the architectural production of antiquity: Prehistoric Architecture; Architecture of Egypt; Architecture of the Ancient Near East; Architecture of Greece; Architecture of the Hellenistic Kingdoms.

ARP 316 Strength of Materials (3.0); 3 cr. Study of materials' allowable constants; normal stresses due to axial loads and bending moments; shear stresses due to torque and shear; combined stresses; buckling of columns; discussion on real life examples. *Prerequisite:* ARP 225.

ARP 317 Building Technology I (2.2); 3 cr. A technical and cultural preparation, aiming at

assisting the student in resolving technological problems in the design phase and an appropriate use of the different materials in building construction.

ARP 322 Architectural Design II (3.4); 5 cr. A continuation of Architectural Design I. The understanding of environmental and residential design principles will be dealt with. Students are exposed to projects that will deal with tackling the appropriate methods in exploring and evaluating the different aspects of the design field. *Prerequisite:* ARP 311.

ARP 324 History of Architecture II (3.0); 3 cr. Continuation of History of Architecture I, the course covers the development of architecture from the 4th century BC to the 12th century AD. It covers the Architecture of Etruscans, Republican Rome and the Roman Empire; the Early Christian and the Byzantine Empire; the Early Mediaeval and Romanesque and the Architecture of Islam. *Prerequisite:* ARP 313.

ARP 325 Applied Architectural Design II (1.4) 3 cr. The application of 3D studio VIZ creating complex 3D representations, rendering and animation. *Prerequisite:* ARP224.

ARP 327 Structural Analysis (3.0); 3 cr. Analysis of structurally determinate and indeterminate structures; moving load structures, and approximate methods; modeling and analysis of structures; deflection of beams; discussion on real life examples. *Prerequisite:* ARP 316.

ARP 328 Building Technology II (2.2); 3 cr. The course closes with the learning and application of the technologies of building construction, aiming to assist students in the execution project. *Prerequisite:* ARP 317.

ARP 422 Lighting Design and Electrical Systems (1.2); 2 cr. Types of artificial light sources and the human eye. Production, measurement and control of light. Design of lighting systems. Electrical requirements and distribution in buildings and related execution problems. *Prerequisite:* ARP 328.

ARP 423 Acoustics (1.2); 2 cr. Analysis, design and detailing of acoustical factors influencing spaces and building design. *Prerequisite:* ARP 328.

ARP 424 Bio-climatic Architecture (2.2); 3 cr. Understanding of environmental aspects in Architectural Design and the focus on energy

efficiency from the concept to the detailing stages concluded with market investigations that permit the evaluation and use of local materials. *Prerequisite:* ARP 328.

ARP 425 Architectural Practice (1.2); 2 cr. A supervised internship and lectures dealing with: business correspondence, building up the corporate image of the firm, dealing with tender bids and offers, duties, responsibilities, and fees of the different phases of a project. *Prerequisites:* ARP 328, ARP 552.

ARP 433 Architectural Design III (3.6); 6 cr. A continuation of Architectural Design II. This course deals with the contextual peculiarities of an existing structure (a traditional house, an industrial or / and an urban wasteland...etc.). It surveys, analyzes its morphological components, and proposes new destinations. *Prerequisite:* ARP 322.

ARP 435 History of Architecture III (3.0); 3 cr. Continuation of History of Architecture II, from the 12th century to the mid-17th century. It covers the Gothic Architecture and The Renaissance Period. *Prerequisite:* ARP 324.

ARP 438 Reinforced Concrete Design (3.0); 3 cr. Behavior of reinforced concrete; ultimate strength design method; studying the concrete structural elements; design of beams for flexure and shear, one-way and introduction to two-way slabs, footings, and short columns. Analysis methods of concrete frames. Application design project of a multi-storey building. *Prerequisite:* 327.

ARP 439 Mechanical and Sanitary Systems (2.2); 3 cr. The physiological and environmental aspects of heating, ventilation and air conditioning; comfort tables and charts. Estimating heating and cooling loads and the choice of appropriate systems. The choice and design of water distribution and plumbing systems. Problems encountered with such installations on site. *Prerequisite:* ARP 328.

ARP 444 Architectural Design IV (3.6); 6 cr. A continuation of the precedent Architectural Design courses, with an emphasis on the implementation of building codes and regulations on complex architectural settings in urban contexts. The chosen projects shall be more of a residential, public, and administrative nature. *Prerequisite:* ARP 433.

ARP 446 History of Architecture IV (3.0); 3 cr. Continuation of History of Architecture III,

to cover the architecture from the mid-17th century to the mid 19th century. It covers The Baroque and the Rococo architecture. *Prerequisite:* ARP 435.

ARP 551 Construction Detailing Studio I (2.2); 3 cr. This course is meant to acquaint the student with the elaboration of professional construction document of architectural projects, and the adaptation of standard construction details to various architectural contexts. *Prerequisite:* ARP 328.

ARP 552 Construction Detailing Studio II (2.2); 3 cr. A continuation of Construction Detailing Studio I, with an emphasis on detail problem solving. Students are expected to develop further their architectural designs to reach the final stage of construction documents. *Prerequisite:* ARP 551.

ARP 553 Specifications and Quantity Surveying (3.0); 3 cr. Specifications and tender documents writing. The sources and the methods of classification for subsequent use. Practice projects. *Prerequisite:* ARP 552.

ARP 554 Surveying and Field Surveying (2.2); 3 cr. Surveying and instrumentation; introduction to optical, photographic, mathematical, and geometrical principles relevant to photogrammetry and remote sensing; introduction to global positioning system. Field plane surveying; topographic mapping; location survey and route surveying.

ARP 555 Architectural Design V (3.6); 6 cr. Continuation of Design IV dealing with more complex aspects of the built environment. It initiate students to the “scientific” research by admitting only obviousness (evidences) and theories in the different disciplines. *Prerequisite:* ARP 444.

ARP 556 Architectural Design VI (3.6); 6 cr. This course figures out the developing of the critical thinking and analyzing “objectively” of an Environmental Design issue; Sensibilization to the contextual demand of our society; Application of the different architectural paradigm and methodological conceptualization; The concretization into a well developed architectural expression. The Implementation of a realistic contextual site as well as basic determinant constraints (laws, environment, etc.). *Prerequisite:* ARP 555.

ARP 557 Architectural Theories (3.0); 3 cr. Survey of architectural theories as stated by

architects, historians, and architectural critics. The main objectives of this course are to have a global view on the different schools of thought in architecture and to heighten the student’s awareness of the various interpretations of the architectural paradigm as well as to the evolution of theories in architecture; *Prerequisite:* ARP 446.

ARP 561 Urbanism I (3.0); 3 cr. A survey of urban morphology in terms of characteristic phases of development with emphasis on environmental, cultural and economic factors governing urban growth. *Prerequisite:* ARP 444.

ARP 562 Urbanism II (2.2); 3 cr. A survey of different basic approaches to urban and city planning present and past. A comprehensive and critical survey of urban planning in Lebanon. *Prerequisite:* ARP 561.

ARP 563 Building Rules & Regulations (3.0); 3 cr. Professional code of ethics for the practice of the profession. The moral and legal responsibilities of the architect towards the executed project and concerned parties. A survey of construction building codes and a study of the Lebanese construction laws. (taught in Arabic).

ARP 564 Restoration of Monuments (2.2); 3 cr. The purpose of this course is to prepare the students for restoration projects, having professional characteristics, on a building which will be freely chosen by themselves. *Prerequisites:* ARP 226, ARP 435.

ARP 565 Landscape Architecture (2.2); 3 cr. Theory and principles of design and problem solving processes as applied to fundamentals of design form in the landscape. *Prerequisites:* ARP 226, ARP 446.

ARP 566 Basic Industrial Design (2.2); 3 cr. Introduction to the theories, methods and practices of industrial design with primary emphasis on basic visual language and visual encoding practices. *Prerequisite:* ARP 226.

ARP 567 Archaeology (2.2); 3 cr. Studying the cultural heritage and rediscovering human experience since its origin to the present. It focuses on the archaeology of Lebanon: Its history, artifact recording or ethnographic data, composition and description. *Prerequisites:* ARP 226, ARP 435.

ARP 568 Social Architecture (3.0); 3 cr. The course aims at initiating students to the research

in sociology; to give a comprehensive overview of the contribution of the behavioral sciences to architectural theory; to present generalizations on what the built environment affords people and a set of concepts for understanding the relationship between architecture and human behavior. *Prerequisite:* ARP 446.

ARP 569 Project Planning and Management (3.0); 3 cr. This course focuses on providing an overall understanding of the project development. The course tackles: Theoretical frameworks and tools; quantitative methods and process used in analyzing project investment decisions; case studies. Project scope definition, phasing, scheduling, and control method. *Prerequisite:* ARP 552.

ARP 581 Seminar I (2.0); 2 cr. Lectures and conferences held by visiting instructors.

ARP 582 Seminar II (2.0); 2 cr. Lectures and conferences held by visiting instructors.

ARP 583 Design Theory (2.0); 2 cr. Some recent examples include virtual and dynamic environments. The architecture of professional architects housing and modernity, 20th Century Design.

ARP 584 Topics in Oriental Architecture (2.0); 2 cr. Analysis of theoretical, culture and historical determinants as they may be applied to a select array of oriental architects and buildings.

ARP 585 Topics in Japanese Architecture (2.0); 2 cr. Analysis of theoretical, culture and historical determinants as they may be applied to

a select array of Japanese architects and buildings.

ARP 586 Topics in Lebanese Architecture (2.0); 2 cr. Analysis of theoretical, culture and historical determinants as they may be applied to a select array of Lebanese architects and buildings.

ARP 590 Senior Study (2.0); 2 cr. An introduction to the senior design courses that allows students to choose and justify their final senior project. *Prerequisites:* ARP 552, ARP 556, ARP 557, ARP 438, ARP 562.

ARP 591 Senior Project I (4.4); 6 cr. The course involves a research that includes a theoretical and philosophical thought defining the problematicor situational aspect of the theme and the aim; specifying the hypothesis/concepts and justifying the *raison d'être* of the project. In respect to the theoretical thought, the conceptualization and “operationalization” of the hypothesis into concepts, dimensions and indicators, leads to the embryonic aspect of the proposed project. *Prerequisite:* ARP 590.

ARP 593 Senior Project II (3.6); 6cr. This Final senior course proposes a complete and comprehensive development of the project in which the relevance to the thesis presented in Senior Project-I should be demonstrated graphically. A complete set of drawings models, photographs, and recordings must be finalized by the student under the supervision of an advisor and collaborators. *Prerequisite:* ARP 591.

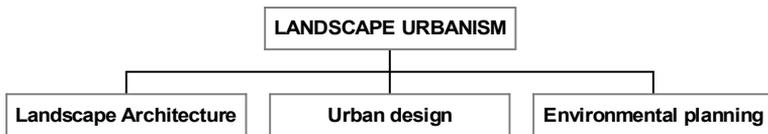

The Degree of Master of Architecture in Landscape Urbanism

Boundaries between environmental design disciplines are getting blurred. Increasingly, landscape architecture is being explored from different perspectives pertaining to art, architecture, urbanism, ecology, and technology. As such, it is perceived as an architectural incorporation of nature, an investigation in regional ecologies, an experimental field for installation artists, or as a means for reinforcing regional and urban identities. Hence, landscape architecture is losing its narrow definition as a professional field concerned with designing gardens and urban open spaces. It is widening its scope to embrace contemporary environmental problems and philosophical debates about the evolving attitudes towards nature, design, cities and their interface.

In response to this inclusive attitude toward the environment, this program opens a new perspective for graduate studies bridging the gap between art, architecture, landscape architecture and urbanism. It provides new graduate students as well as experienced professionals the opportunity to explore and to learn to manage emerging and pressing issues related to environmental conservation and sustainable development. As such the program aims at educating professionals and researchers who are able to respond to the need of ministries, international agencies as well as private developers and consulting offices in devising a culturally-appropriate approach to environmental planning and in formulating landscape and urban design strategies at urban, metropolitan and regional scales. It also encourages aesthetic exploration by individual artists, architects and landscape designers who prefer to follow their own itinerary in professional or research work.

Structure

The course is organized around three areas of concentration: Landscape Architecture, Urban Design, and Environmental Planning. Specific requirements depend on the interest of the student and the recommendations of the advisor of the department:

during the first semester, the student is exposed to the breadth of the program through a series of intensive introductory lecture-workshop courses covering the wide range of theories, methods and issues underlying the three areas of concentration. Starting from the second semester, the student will start focusing on a specialization area that will guide his selection of elective courses as well as his disciplinary focus within the required studio and core courses. The program provides the added flexibility of opting for a design-oriented course of study leading to a professional project thesis or for a research-oriented course of study leading to a written thesis with high analysis content.

Admission Requirements

In addition to the university admission requirements for graduate students, the candidate must submit a portfolio of work for assessment and schedule an interview with MLU course faculty.

In addition, applicants for the graduate program may be granted a maximum of nine transfer credits of graduate studies taken at another accredited institution of higher education provided that the transfer course(s) correspond to the NDU course requirements.

In order to be accepted into the program, the students must take a minimum of 6 credits per semester as a part-time candidate and 9 credits as a full-time candidate.

Students applying with a bachelor degree outside of architecture should fulfill the undergraduate requirements of the university admission policy. Students with a degree from FAAD other than architecture will have to consult with MLU course faculty.

Graduation Requirements

Students seeking the degree of Master of Landscape Urbanism must meet the university graduation requirements and complete 36 credits with a cumulative average of at least 3.0/4.0.

Degree Requirements (36 credits)

Core Courses 30 cr.

MLU 615, MLU 616, MLU 617, MLU 623/MLU 624, MLU 625/MLU 626, MLU635, MLU636, MLU645

Major Electives 6 cr

Master of Landscape Urbanism Suggested Program (36 Credits)

Year I

Fall Semester (9 Credits)

MLU	615	Ecological Foundations of Landscape Urbanism	3cr.
MLU	616	Aesthetic Foundations of Landscape Urbanism	3cr.
MLU	617	Landscape Informatics	3cr.

Spring Semester (9 Credits)

MLU	623	Cultural foundations of Landscape Urbanism	3cr.
		or	
MLU	624	The coastal environment	
MLU	625	Generative landscapes	3cr.
		or	
MLU	626	Policy and implementation in landscape urbanism	
—	—	Major Elective	3cr.

Year II

Fall Semester (9 Credits)

MLU	635	Workshop in Landscape Urbanism	6 cr.
MLU	636	Thesis Seminar	3 cr.

Spring Semester (9 Credits)

MLU	645	Thesis	6 cr.
—	—	Major elective	3 cr.

Graduate Courses: Landscape Urbanism

MLU 615 Ecological foundations of Landscape Urbanism (2.2); 3 cr. Combined lecture-workshop on the principles and practice of ecological design and planning with emphasis on the local and regional context.

MLU 616 Aesthetic foundations of Landscape Urbanism (2.2); 3 cr. Combined lecture-workshop course on the perceptual and spatial structures of landscapes as analytical and design tools.

MLU 617 Landscape informatics (2.2); 3 cr. The use of digital tools for terrain mapping and analysis, as well as landscape modeling and visualization.

MLU 623 Cultural foundations of Landscape Urbanism (2.2); 3 cr. Combined lecture-workshop course on the cultural identity of urban and metropolitan landscapes addressing their formative process and their underlying ideological, socio-economical and spatial dialectics. *Prerequisites:* MLU615, MLU 616

MLU 624 The coastal environment (3.0); 3 cr. The impact of urbanization on the coastal zone in the Mediterranean, regional and local contexts and the dialectics of development and conservation.

MLU 625 Generative landscapes (3.0); 3 cr. Exploration of landscape typologies, natural and man-made, that epitomize the various social and political orders through history.

MLU 626 Policy and implementation in landscape urbanism (3.0); 3 cr. The legislative foundations of environmental design and planning with identification of public and private sector stakeholders and the alternative approaches for policy implementation.

MLU 627 Open space art: from statues to installations (2.2); 3 cr. The historical and contemporary approaches to natural landscapes and public open spaces by artists and environmental designers, and the emerging trends on the international and local levels.

MLU 628 Emerging International Issues in Landscape Urbanism (3.0); 3 cr. A seminar in which international topics of current relevance to practice and critical thinking in environmental planning, urban design and landscape architecture will be explored. The course content will change each semester to maintain currency within the professions.

MLU 629 Emerging regional and national Issues in Landscape Urbanism (3.0); 3 cr. A seminar in which local and regional topics of current relevance to practice and critical thinking in environmental planning, urban design and landscape architecture will be explored. The course content will change each semester to maintain currency within the professions.

MLU 635 Workshop in Landscape Urbanism (2.8); 6 cr. Key development and conservation issues explored through the perspectives of environmental planning, urban design and landscape architecture. *Prerequisites:* MLU615, MLU 616, MLU 617.

MLU 636 Thesis Seminar (2.2); 3 cr. Preparation for final project/research thesis including an initial stage of data gathering and analysis leading to research proposal. *Prerequisite:* MLU 635.

MLU 645 Thesis (4.4); 6 cr. Supervised dissertation work in the form of a professional project or written thesis.

DEPARTMENT OF DESIGN

Chairperson: *Mr. Nadim Matta*

Secretary: *Mrs. Elsie Girgis*

Associate Professor

Haddad, Robert, Master of Fine Arts, 1980, University of Pennsylvania, USA

Senior Lecturers

Selwood-Choueiri, Linda, Master of Science, 2000, *Supervision & Administration in the Visual Arts*, Parsons School of Design / Bank Street College, USA

Zaccour, Danielle, Diplôme d'Etudes Supérieures, 1991, *Arts Plastiques*, Académie Libanaise des Beaux-Arts, Lebanon

Lecturers

Bechara, André, Master of Arts, 2007, *Design*, Notre Dame University-Louaize, Lebanon

Daghfal, Graziella, Master of Arts, 2002, *Design*, Middlesex University, UK

Korthawi, John, Post-Graduate Diploma, 1977, *Advanced Typographic Design*, London College of Printing, UK

Matta, Nadim, Master of Arts, 1999, *Typographic Studies*, London Institute / London College of Printing, UK

Soghman, Jacqueline, Master of Arts, 2007, *Graphic Design*, Savannah College of Arts & Design, Savannah, GA

Instructors

Nasr, Noel, Master of Arts, 2006, *Photography*, University of Kent, UK

Goals

The Department of Design provides an undergraduate degree which stresses the educational needs of a professional designer in a comprehensive and flexible manner.

The Department of Design actively contributes to the university as well as to local, national, and international industries through its scholarly and creative activities, educational programs, and service efforts.

The BA programs offered by the Department of Design will enable students to:

- Communicate as professional designers with clients, audience and industries, utilizing various forms of messages while maintaining personal and professional integrity.
- Critically assess designs through research and reflection while respecting both moral and ethical issues in cultural and social contexts of local, regional or global environments.
- Embrace the dynamic design process that reflects creativity in producing innovative and effective solutions.
- Understand and respond to a client's needs by following a design process which analyzes a problem, proposes a hypothesis and synthesizes relevant findings before designing possible solutions.
- Demonstrate flexibility while applying various theories from historical movements or schools of thought to support the generation of conceptual and contextual solutions.

Degrees

The Department of Design is currently offering four undergraduate degrees:

- Bachelor of Arts in Graphic Design
- Bachelor of Arts in Interior Design
- Bachelor of Arts in Fashion Design
- Bachelor of Arts in Photography

The Department of Design offers a graduate degree:

- Master of Arts in Design

And Minors in

- Photography
- Graphic Design

The Degree of Bachelor of Arts in Graphic Design

Program Description

Graphic Design is a creative and analytical process that integrates Design and technology to communicate ideas and information from a client to an audience. The primary goal of the Graphic Design curriculum is to educate students to become innovators and leaders in print and screen related areas of professional practice.

Furthermore, the Graphic Design program encourages exploration through problem solving methodologies, innovative investigations, and creative research in all forms of communication. The program is dedicated to excellence in teaching, academic and creative research and professional practice.

The BA program aims to educate graphic designers through focusing on creative and intellectual thinking, awareness of individual, social and cultural issues in a global context, the integration of new technology and the concern for ethical implications and the natural environment.

The Bachelor of Arts Degree in Graphic Design is a 3 year full-time program of 102 credits. The students will choose from three concentration areas: Typographic Design, Multimedia Design, or Information Design.

Admission Requirements:

In addition to the University admission requirements, prospective candidates must complete any remedial English course(s) the first year of enrolment. Students who fail to meet the above requirements will not be allowed to proceed to the degree courses in Graphic Design and other majors in the Design Department of the Faculty of Architecture, Art & Design.

Graduation Requirements:

To receive the degree of Bachelor of Arts in Graphic Design, a student must complete a total of 102 credits with an overall grade-point average of at least 2.0/4.0 and a minimum cumulative grade point average of 2.3/4.0 in all Core and Major Courses. All major courses with a grade of less than C- must be repeated. The 102 credits necessary for graduation are divided as follows:

Degree Requirements (102 credits)

General Education Requirements (GER): **30 cr.**

The GER are distributed as follows:

Communication Skills in English: ENL 213 & ENL 223 or ENL 230 6 cr

Communication Skills in Arabic: One course from ARB 211, ARB 212, ARB 224, ARB 231, ARB 317 3 cr.

Religion: One course from REG 212, REG 213, REG 314, REG 313 3 cr.

Philosophy: One course from PHL 211, PHL 311, POS 345, ENS 205 3 cr.

Cultural Studies: Two courses from HUT 305, HUT 306, PSL 201, SOL 201, SOL 301, MUS 210, FAP 215, ARP 215, BAD 201, ECN 200, COA 359, COA 315, NTR 215, ECN 211, ECN 212 6 cr.

Citizenship: One course from HIT 211, IAF 301, POS 201, POS 210, POS 240, POS 319, POS 337 3 cr.

Science and Technology: Two courses from AST 201, BIO 202, BIO 203, CHM 211, ENS 201, ENS 202, ENS 206, CSC 201, HEA 201, MAT 201, MAT 202, MAT 204, MAT 211, NTR 201, PHS 211, STA 202, STA 210, PHS 207 6 cr.

Core Requirements **9 cr.**

FAP 211, GDP 212, FAP 221

Major Requirements **57 cr.**

Common Courses

GDP 217, GDP 222, GDP 223, GDP 227, GDP 315, GDP 321, GDP 322, GDP 323, GDP 317, GDP 324, GDP 412, GDP 413, GDP 415, GDP 423. 42 cr.

Concentration Area Courses

In addition the student will select one of the following concentration areas: 15 cr.

Typographic Design - GDP 371, GDP 372, GDP 473, GDP 474 and GDP 476.

Multimedia Design - GDP 381, GDP 382, GDP 483, GDP 484 and GDP 486.

Information Design - GDP 391, GDP 392, GDP 493, GDP 494 and GDP 496.

Free Electives **6 cr**

In principle, the students will fulfill their concentration requirements during the last three semesters.

- In the course GDP 474 (or GDP 484 or GDP 494), the students will research and submit in writing their Senior Project Proposals which will be assessed by selected faculty members.
- In the final course GDP 476 (or GDP 486 or GDP 496), the students will develop and accomplish their Senior Projects and prepare a presentation in front of a jury composed of faculty members and invited professionals.

Typographic Design Emphasis

Typographic Design is one of the major areas of the interdisciplinary profession of visual communication. Students will develop a critical eye and ability to distinguish different type forms and styles. They will demonstrate proficiency in applying type to express clear and legible communication for different media. They can also respond to the need of creating identities based on type solutions. Students will be qualified to manage a complex design project, and prepare and supervise a final production.

Career Opportunities:

A graduate can work in the field of Graphic Design in advertising agencies, design studios, and production houses as: creative director, typographer, type designer, design publisher, and environmental visual communicator.

Multimedia Design Emphasis

Within the diverse disciplines in Graphic Design, Multimedia Design turns out to be nowadays highly dynamic due to the rapid growth of digitisation in communication. It is paving the way for enormous opportunities for graduate multimedia designers.

Students who choose this concentration will acquire solid analytical, intellectual and technical skills necessary to the development of multimedia design solutions.

This concentration is planned for students who like to research, create and deliver effective communication to a specific audience for TV, movies and Internet, designing websites, interactive communication and motion graphics using type, image, animation, and sound.

Career Opportunities

A Graphic Design student graduating with multimedia concentration has the opportunity to work as creative director, 2-D animator, 3-D animator, storyboard and concept designer, multimedia and web designer for television, production houses, companies for web interfaces and animations, advertising agencies and design studios.

Information Emphasis

“Excellence consists of complex ideas communicated with clarity, precision, and efficiency and that is just as true of the new media as the old” (Edward R. Tufte) information design is an interdisciplinary field that focuses mainly on efficient and objective visual communication. It teaches students to transform data from any source (raw, action or process) into a visual model and present them to the audience in a practical, clear and simplified model.

This concentration area is intended for students who like to process, design, present, and implement message-making through words, text, maps, charts, symbols, pages, signs and screen interface.

Career Opportunities

Students graduating with information design concentration will work as information consultants in various structures and domains such as: Editorial design, screen and web presentation, way finding/travel and transportation (airport, road sign systems). Also students can work closely with industrial designers and companies that require filtering of information to be presented to the public: medical fields, electronic suppliers, big corporations, etc.

Bachelor of Arts in Graphic Design
Typography Emphasis - Suggested Program (102 Credits)

Year I

Fall Semester (15 Credits)

FAP	211	Drawing I	3 cr.

Minor in Graphic Design (18 credits)

The focus is on Typography in Graphic Design, students will develop a critical eye, and demonstrate proficiency in applying type to express clear and legible communication for different media. Students are qualified to manage a design project, and prepare and supervise for final production hereby enabling them to have additional work possibilities.

The Minor can be taken by all except Graphic Design students; only prerequisite is prior knowledge of Photoshop .

The courses are carefully chosen from the major to order for the students to arrive at a sufficient level of skills that allow them to actually produce design projects in print; therefore there are no electives.

In order to challenge the students, two courses with strong conceptual and creative process' are included: GDP 321 Visual Communication and GDP 415 Branding for Graphic Design.

Career opportunities

Students can work in the field Advertising Agencies, Design Studios, and Production Houses, as Visual Communicators.

Minor in Graphic Design Suggested Program (18 Credits)

Semester I

GDP	227	Digital Media I	3cr.
GDP	223	Fundamentals of Typography	3cr.

Semester II

GDP	321	Visual Communication I	3 cr.
GDP	322	Applied Typographic Design	3 cr.

Semester III

GDP	413	Print Management & Production	3 cr.
GDP	415	Branding for Design	3 cr.

Undergraduate Courses: Graphic Design

GDP 212 Design Principles I (2.2); 3 cr. Various design elements are introduced such as line, shape, plane, texture, color, style and composition. The students are encouraged to be creative and develop individual style.

GDP 217 Conceptual Communication in Digital Media (2.2); 3 cr. Students will learn the process of generating creative ideas, and apply principles of design to conceptual communication. In parallel, students are introduced to the fundamental tools to produce vector and raster-based graphics through the use of latest software for graphic production. Projects and assignments will focus on the exploration of concepts, and implementation through digital media. *Corequisite:* GDP 212.

GDP 222 Design Principles II (2.2); 3 cr. Relations between 3-D structure and space are explored analytically and synthetically. Students will investigate a given subject; learn to follow a problem-solving process in order to reach a functional and defendable design solution. *Prerequisite:* GDP 212.

GDP 223 Fundamentals of Typography (2.2); 3 cr. Students will learn how to classify type according to its history and development, type measurements, series of exercises exploring: space, hierarchy, order, kerning, tracking, type size and weight. Furthermore, the students will explore the use of type and space together with the development of grids through the application of design to a variety of formats. *Prerequisite:* GDP 217 or FDP 214.

GDP 227 Digital Media I (2.2); 3 cr. This course is designed to help graphic designers master professional studio techniques including photo-montage, photo retouching and special photographic effects. It also covers the fundamental software tools and techniques to produce publications and prepare the end product for printing process. *Prerequisite:* GDP 217 or FDP 214

GDP 315 Color & Illustration for Graphic Designers (2.2); 3 cr. An introduction to color using traditional tools and materials. The course will cover perceptual understanding of color and the use of color as a communication medium. It will also include the fundamentals in illustration which draws upon use of existing materials, illustration on location, abstract subject matter to assist the student in bringing an idea to life. A

range of media will be introduced such as pencil, paints and pastels. *Prerequisite:* GDP 227.

GDP 317 Digital Media II (2.2); 3 cr. This course concentrates on training design students to produce graphic solutions for online environment. Terminology, theory, structure, html basics and appropriate software tools for web design will be covered enabling the students to design Websites. Students will also be exposed to understand the process of conveying a message in motion and it interacts within the website. *Prerequisite:* GDP 227.

GDP 321 Visual Communication (2.2); 3 cr. Students will learn how to approach conceptual problem solving through the use of visual rhetoric and the science of semiotics. The course will also focus on signs and symbols, ideograms, sequential design, publication, and information design whilst taking into consideration the potential audience. *Prerequisites:* GDP 223, GDP 227

GDP 322 Applied Typographic Design (2.2); 3 cr. Students will explore projects of greater complexity; learn how to analyze substantial data, appreciate the design functions of relating ideas and develop logical structural systems to organize information for legible and clear communication. Students will be able to transform manuscripts into printed publications i.e. book design, newspaper, magazine, and instruction manual. They will have to follow a design process to assess typographical text application, expression, hierarchy, sequential design, layout and page systems including production. *Prerequisite:* GDP 223, GDP 227.

GDP 323 History of Graphic Design & Contemporary Issues (3.0); 3 cr. The course exposes the students to the genesis and development of graphic design in the 20th century. The students investigate the theory and practice of graphic design under the two main philosophies of the 20th century: modernism and postmodernism. The course aims to develop the student's ability to comprehend theoretically and visually the graphic design movements and pioneers as a source of inspiration and reference for their conceptual and innovative process.

GDP 324 Photography for Graphic Designers I (2.2); 3 cr. Students will be exposed to critical thinking and will learn the history of photography including the different photography

movements. Students will learn the principles and use of black and white photography, and its application in documentary photography and Photojournalism. The student will learn the concept of photo editing as it applies to printed matters. *Prerequisite:* GDP 227.

GDP 371 Type Design (2.2); 3 cr. Students will learn the principles of designing fonts ready for print and screen. They transfer the manually developed typeface into true type font using professional software. *Prerequisite:* GDP 317, GDP 322.

GDP 372 Experimental Typography (2.2); 3 cr. This course will provide the opportunity to experiment with type and research various methods and techniques to serve a pragmatic purpose to express ideas using type. Students will also be familiar with various printing process and effects, i.e. letterpress, application of hot metal type as raised image in conjunction with photoengraved plates. *Prerequisite:* GDP 317, GDP 322.

GDP 381 Interactive Design (2.2); 3 cr. The course introduces the student to website history and digital interface, website structures and grids, website management and design principles using type, image, color scheme, hierarchy, sequential design, visual identity, animation and sound. *Prerequisite:* GDP 317, GDP 322.

GDP 382 Motion Graphics (2.2); 3 cr. Students will create visual projects for screen and TV through the understanding and application of type and image. They will learn how to plan movie concept through sketching and storyboarding and will gain knowledge on how to develop graphic sound tracks to be synchronized with motions. They will also learn the principles of generating short movies and the techniques of editing them. Through assigned projects, students are responsible to follow a design process in order to deliver a specific message using motion graphics. *Prerequisite:* GDP 317, GDP 322.

GDP 391 Survey of Information Design (2.2); 3 cr. This course exposes students to the development of information design in the 20th century through various definitions and pioneers. Contemporary designs will be evaluated and analyzed with the aim to form a solid knowledge basis as preparation for future projects. *Prerequisite:* GDP 317, GDP 322.

GDP 392 Informing the Traveler (2.2); 3 cr. This course draws upon a deep knowledge in the

use of signs, symbols, and visual identity systems for cities, centers, institutions, and airports... that are used to inform the traveler. Students will learn how to make international symbols that should remain unbiased and accurate to help the user take an action. Navigation and way finding in space will be a main issue exposed to students during this course. *Prerequisite:* GDP 317, GDP 322.

GDP 412 Packaging (2.2); 3 cr. Packaging is an important factor in retail environments and a key element in marketing strategies. This course focuses on the technical knowledge needed to execute a design, to prepare die-cuts, molds, paper section and boards, colors, quality and quantity. Size consideration, shapes and practicality will also be covered. Field trips are required in this course. *Prerequisite:* GDP 322.

GDP 413 Print Management and Production (2.2); 3 cr. Covers print methods and print techniques including color separation, film preparation, plate processing and the actual production process. It will also include the choice of papers, printing onto various surfaces, paper engineering and management and finishing processes and binding. *Prerequisites:* GDP 321, GDP 322.

GDP 415 Branding for Design (2.2); 3 cr. Students will create the visual corporate identities of products, build the brand marketing strategy, analyze and define the unique selling proposal, and communicate its value. The student s will learn how to make professional presentations including documentation of the process. *Prerequisite:* GDP 321, GDP 322.

GDP 423 Professional Practice & Portfolio Preparation (2.2); 3 cr. Overview of the business aspects of design: Translation of jobs into properly written documents, meetings with clients and presentation of work, design and production processes, understanding the brief, debriefing, coding, encoding, budgets, estimating design, fees, and official contracts. During the semester, students will have to cover hours for the internship. This course also assists students in the development of their professional visual identity and portfolio. *Prerequisite:* GDP 413.

GDP 473 Arabic Type Design (2.2); 3 cr. This course will introduce the students to the history of Arabic typography. Students will learn to identify the different Arabic type styles and their classifications. They will be able to analyze type

anatomy; apply a creative design process to produce Arabic typeface. Design projects are to be assigned using type and image to test, create and verify legibility and functionality of the Arabic font. *Prerequisite:* GDP 372.

GDP 474 Mapping Information (2.2); 3 cr. Students are introduced to ways of analyzing and creating meaning in graphic and typographic design solutions for indoor and outdoor environment. In the context of theory and practice, the students will develop wayfinding systems, semiotics, and information presentation for the public; i.e. exhibition design. It involves integrative communication elements of the following: architectural graphics, time, space, signs, sign systems, colors, type, image, 3D forms, movement and sound. Students will investigate and formulate their senior project proposal. *Prerequisite:* GDP 372.

GDP 475 Design and Culture: Typography (2.2); 3 cr. The global communication requires the designer to be fully informed and exposed to the value of similarities and differences of typographic application of different cultures. The students will understand the underlying differences that may limit or enhance international communications through projects, seminars and workshops.

GDP 476 Senior Studio in Typographic Design (2.2); 3 cr. Students will research, develop and design their individual senior project under instructor guidance. Articles, discussions, seminars and lectures will take place during class sessions in support of the development of the senior projects. The senior project and related process will be presented in front of a professional jury. *Prerequisite:* GDP 474.

GDP 483 Type in Motion (2.2); 3 cr. Students will learn how to communicate effectively using type, image and sound progressively with more and more complex needs for motion graphics. Students will know how to inform while underpinning the media constraints. In parallel, they will learn how to create interface design and promotional broadcasting graphic movies using different software platforms and advanced tools tracking 2D and 3D animations. *Prerequisite:* GDP 382.

GDP 484 3D in Motion (2.2); 3 cr. The students are introduced to the principles of 3D animation; learn how to sketch, illustrate and design characters as well as developing

contemporary design solutions with new approaches of type, image, and characters for screen using appropriate tools and techniques to develop 3D motion graphics for multimedia. Students will investigate and formulate their senior project proposal. *Prerequisite:* GDP 382.

GDP 485 Design and Culture: Multimedia (2.2); 3 cr. The global communication requires the designer to be fully informed and exposed to various cultures way of designing in Multimedia. Students will learn how to write creative scripts and express a positioning, explore their concepts and apply it into the global cultural environment.

GDP 486 Senior Studio in Multimedia Design (2.2); 3 cr. Students will research, develop and design their individual senior project under instructor guidance. Articles, discussions, seminars and lectures will take place during class sessions in support of the development of the senior projects. The senior project and related process will be presented in front of a professional jury. *Prerequisite:* GDP 484.

GDP 493 Information Structure (2.2); 3 cr. In this course students will become aware of issues pertaining to the identification, categorization and structure of raw and complex information from different fields. Projects such as packaging information and annual reports including flows, charts and graphs, will teach students to design and create logical presentation out of chaos to capture the essence of the message. *Prerequisite:* GDP 392.

GDP 494 Illustrating Information (2.2); 3 cr. Students will learn through various techniques (photography, film, and not least from comic strips and technical illustrations in the field of visual communication) the art of designing installation instructions, safety cards, manufacturing processes and manuals, based on the power of images and illustrations for optimal solutions. Students will investigate and formulate their senior project proposal. *Prerequisite:* GDP 392.

GDP 495 Design and Culture: Information (2.2); 3 cr. Students will investigate the way information is handled in various cultures; on screen, websites and interactive interfaces. Computerized and electronic devices are designed to assist the user and make the interaction effortless. The course will draw upon the logic behind any interface such as panels,

cellular phones, and musical devices... focusing on the structure and categorization of content.

GDP 496 Senior Studio in Information Design (2.2); 3 cr. Students will research, develop and design their individual senior project under instructor guidance. Articles, discussions,

seminars and lectures will take place during class sessions in support of the development of the senior projects. The senior project and related process will be presented in front of a professional jury. *Prerequisite:* GDP 392.

The Degree of Bachelor of Arts in Interior Design

Program Description

Our interior design program consists of a sequential undergraduate design studios that form the core of the professional interior design major. Basic architectural and design principles of form-making are the initial focus that soon shift to issues of people and space.

The program helps students develop critical thinking, creative design and evaluation of how interior design meets the needs of people is the essence of our professional curriculum. Within the instructional settings of the upper design studios, our students learn about the dynamic interactions between people and space in the commercial, institutional, hospitality, healthcare and retail facilities. Graduates develop competency in specific interior design subject areas as they learn how to creatively make the world a better place for people. Our program provides opportunities for the students to achieve excellence in the design of interior environments also to engage in research and develop a specialization in a related field and possible topics for advanced studies in furniture design, environmental design, historic preservation, visualization and interior applications for computers, design research and theory as well as design education.

Admission Requirements

In addition to the University admission requirements, prospective candidates must complete any remedial English courses(s) (if required) the first year of enrollement. Students who fail to meet the above requirements will not be allowed to proceed to the degree courses in Interior Design or other majors in the Design Department of the Faculty of Architecture, Art & Design.

Graduation Requirements

To receive the degree of Bachelor of Arts in Interior Design, a student must complete a total of 136 credits with a minimum cumulative grade point average of 2.3/4.0 in all Core and Major Courses. All major courses with a grade of less than C- must be repeated. The 136 credits necessary for graduation are divided as follows:

Degree Requirements (136 credits)

General Education Requirements	30 cr.
The GER are distributed as follows:	
Communication skills in English, ENL 213 & ENL 223 or ENL 230	6 cr.
Communication skills in Arabic, One course from: ARB 211, ARB 212, ARB 224, ARB 231, ARB 317	3 cr.
Religion: One course from: REG 212, REG 213, REG 314, REG 313	3 cr.
Philosophy, One course from: PHL 211, PHL 311, POS 345, ENS 205	3 cr.
Cultural Studies, Two courses from: HUT 305, HUT 306, PSL 201, SOL 201, SOL 301, MUS 210, FAP 215, BAD 201, ECN 200, ARP 215, COA 359, COA 315, NTR 215, ECN 211, ECN 212	6 cr.
Citizenship, one course from: HIT 211, IAF 301, POS 201, POS 210, POS 240, POS 319, POS 337	3 cr.
Science and Technology, two courses from : AST 201, BIO 202, BIO 203, CHM 211, ENS 201, ENS 202, ENS 206, CSC 201, HEA 201, MAT 201, MAT 202, MAT 204, MAT 211, NTR 201, PHS 211, STA 202, STA 210, PHS 207	6 cr.
Core Requirements	6 cr.
FAP 211, GDP 212.	
Major Requirements	97 cr.
IDP 210, IDP 211, IDP 212, IDP 214, IDP 215, IDP 222, IDP 223, IDP 224, IDP 225, IDP 226, IDP 227, IDP 311, IDP 312, IDP 313, IDP 314, IDP 321, IDP 322, IDP 323, IDP 324, IDP 326, IDP 327, IDP 328, IDP 411, IDP 412, IDP 413, IDP 421, IDP 422, IDP 423, IDP 424.	
Free Electives	6 cr

Undergraduate Courses: Interior Design

IDP 210 Basic Skills for Interior Design (2.2); 3 cr. This course helps the student develop the necessary skills and techniques required to communicate visually his interior design ideas effectively and professionally. This course will give the student the ability to draw and sketch, assess, evaluate and understand existing structures, also learn to survey sites and collect data and take them to the drawing board. Topics include: Design briefs and specifications; comprehensive drawing files: presentation techniques, layouts and renderings; technical drawing files: Scaled drawing, plans, elevations, sections, etc. *Corequisite:* FAP 211, IDP 313.

IDP 211 History of Interiors and Furniture I (3.0); 3 cr. A study of ancient architecture, interiors and furniture from the beginning of human civilization to the modern civilization. *Corequisite:* IDP 212.

IDP 212 Fundamentals of Interior I (2.2); 3 cr. Essentials of planning an interior architectural environment in relationship with spatial organization. *Prerequisite:* IDP 210, IDP 215.

IDP 214 Materials and Methods of Construction (2.2); 3 cr. This course combines case studies with lectures, readings and discussions on concepts of design technology. *Corequisite:* IDP 212.

IDP 215 Descriptive Geometry for Int. Design. (2.2); 3 cr. Study of the different interrelated geometric fields and three dimensional forms in the interior environment. Emphasis on the formation of volumetric development, light sources, shades, shadows and their constructions. *Prerequisite:* IDP 210, FAP 211.

IDP 216 Design theories and critical thinking (3.0); 3 cr. This course helps the student review the turning points of historical events and their influences on the design developments and movements. The student will also learn how to carry out investigative research and critical analysis of design when required. The student will also explore how social and political circumstances influence the design process. Topics include: Global design styles, modernism, design through ages.

IDP 222 Fundamentals of Interior II (2.2); 3 cr. Study of structural setting in any

architectural space leading to constraints in the design process. *Prerequisite:* IDP 212.

IDP 223 Drawing for Interior Design (2.2); 3 cr. This is an intense studio course developing free hand drawing skills, scaled perspective appropriate for the presentation of interior design projects. This course also develops a wide range of rendering skills and techniques applicable in traditional and computer media. *Prerequisite:* FAP 211, *Corequisite:* IDP 222.

IDP 224 Colors in Interiors (2.2); 3 cr. This course will teach the student to achieve the right choices of colors in different interior spaces and environments, and they will also learn to develop the opulent designer's eye when required to balance color schemes and combinations. Topics included : Color theories, color psychology, color science, color characteristics and notation. *Corequisite:* IDP 212.

IDP 225 Materials and Finishes (1.4); 3 cr. This course offers an introduction to construction detailing for interiors, focusing on architectural millwork. *Corequisite:* IDP 222.

IDP 226 Textiles for Interiors (2.2); 3 cr. Effects of fibers, yarns, fabrics and finishes on appearance and performance. Study of the construction of textile products used in interiors. *Corequisite:* IDP 222.

IDP 227 Human Factors for Int. Des. (2.2); 3 cr. This course investigates human factors as an essential ingredient in the design process. Physical and psychological human factors will be examined in an attempt to better understand The spatial relationship between humans and their environment. Topics include: Proximics, cognitive mapping, imageability, human sensory and ergonomics. *Corequisite:* IDP 222.

IDP 311 History of Modern Contemporary Interiors (3.0); 3 cr. This course is an overview of the 20th Century art, culture, interior and furniture. *Prerequisite:* IDP 221, *Corequisite:* IDP 312.

IDP 312 Interior Design Project I (2.2); 3 cr. This course covers the creative triggering of the design problem solving process through schematics. It also investigates human factors as an essential ingredient in the design process. *Prerequisite:* IDP 222.

IDP 313 Applied Interior Design I (2.2); 3 cr. This course explores the pragmatics of computer hardware and software as integral tools to contemporary design. *Corequisite:* IDP 210, FAP 211.

IDP 314 Interior Detailing and Construction I (2.2); 3 cr. The course introduces the students to the various material finishes used in interior design. *Corequisite:* IDP 312.

IDP 321 Environmental Graphic Design (2.2); 3 cr. This course studies the presentation of information in the designed environment. *Corequisite:* IDP 322.

IDP 322 Interior Design Project II (2.4); 4 cr. The student is challenged to work on a major construction displaying creativity and ability to remodel this space according to new functions. *Prerequisite:* IDP 312.

IDP 323 Applied Interior Design II (2.2); 3 cr. This course develops a more professional and creative approach to design while broadening the student's technical base. *Prerequisite:* FAP 211.

IDP 324 Interior Detailing and Construction II (2.2); 3 cr. Review, discussion and analysis of interior construction systems used in commercial and institutional structures. *Prerequisite:* IDP 314, *Corequisite:* IDP 322.

IDP 326 Concepts of Historic Preservation (2.2); 3 cr. Projects consist of a search for new remodeling techniques, constructing and preserving historic buildings and monuments. *Corequisite:* IDP 322.

IDP 327 Furniture Design (2.2); 3 cr. This course exposes the student to the design industry starting from the drawing board and ending with a full scale furniture model. The student will learn to implement the step by step hands on model making of furniture pieces that he created, the student will be using the ergonomic knowledge that he learned in the human factors course. Topics included: Ergonomic design for the global industry. Designing for the Industry. Model making, Specimen building and mass production. *Corequisite:* IDP 312.

IDP 328 Lighting Design in Interiors (2.2); 3 cr. This course takes a practical approach to lighting, and the student will learn about the different types of lighting such as ambient, task and decorative. The student will also learn the

fundamentals of lighting design in relation to residential and contract interiors. The subjects tackled in this course will give the student enough knowledge to incorporate lighting in the total interior design scheme. Topics covered: Natural, artificial lighting, quality of light. Technicalities: Switches and wiring. Finally, electrical plans and specifications. *Corequisite:* IDP 322.

IDP 411 Quantity Surveying for Interior Designers (2.2); 3 cr. Emphasis on the principals of construction. *Corequisite:* IDP 412.

IDP 412 Interior Design Studio I (3.6); 6 cr. This course covers all aspects of professional presentation of a complete construction drawing-file to secure accurate executions. *Prerequisite:* IDP 322.

IDP 413 Applied Interior Design III (2.2); 3 cr. This course shows students how to create computer animation and 3-rendered materials within an interior space. *Prerequisite:* IDP 323, *Corequisite:* IDP 412.

IDP 421 Business Practice for Interior Designers (3.0); 3 cr. Focuses on the legal aspects of design and contract documents for interior architecture. *Corequisite:* IDP 422. *Prerequisite:* IDP 411.

IDP 422 Interior Design Studio II (3.6); 6 cr. This course is structured to challenge the student to deal specifically with contract interiors. *Prerequisite:* IDP 412.

IDP 423 Integrated Building Systems (HVAC and Plumbing) (2.2); 3 cr. This course provides a structured opportunity to study and integrate all components of architectural technology into a comprehensive whole. *Corequisite:* IDP 412.

IDP 424 Interior Design Management (3.0); 3 cr. This course exposes the student to the main management principles in interior design with the understanding that this profession is an integral part of the the construction industry. The student will learn the different management techniques and skills that an interior designer needs to practice in his business formation starting with maning his office ending up with a contract and passing by all the processes that require a business like attitude. Finally, the student will learn the design-built team working approach. *Corequisite:* IDP 422.

The Degree of Bachelor of Arts in Fashion Design

Program Description

Lebanon has already established itself in the international fashion design industry and as a result there is a potential for a prosperous local market in need of competent fashion designers. The graduates will be able to produce traditional as well as innovative and contemporary design concepts suitable for the national, regional and international market. The program combines advanced design concepts supported by current technology in order to produce creative and original, individual prototypes for haute couture or industrial production.

Career Opportunities

A fashion design graduate student will be ready to work in the fashion industry as creator of new collections, textile designs, manager, journalist, patternmaker, and various fields of fashion commerce.

Admission Requirements

In addition to the University admission requirements, prospective candidates must complete any remedial English course(s) during their first year of enrollment. Students who fail to meet these requirements will not be allowed to proceed to the Bachelor of Arts in Fashion Design and other majors in the Design Department of the Faculty of Architecture, Art & Design.

Graduation Requirements

To receive the degree of Bachelor of Arts in Fashion Design, a student must complete a total of 102 credits with an overall grade-point average of at least 2.0/4.0 and a minimum cumulative grade point average of 2.3/4.0 in all Core and Major Courses. All major courses with a grade of less than C- must be repeated. The 102 credits necessary for graduation are divided as follows:

Degree Requirements (102 credits)

General Education Requirements (GER): 30 cr.

The GER are distributed as follows:

Communication skills in English, ENL 213 & ENL 223 or ENL 230 6 cr

Communication skills in Arabic, One course from: ARB 211, ARB 212, ARB 224, ARB 231, ARB 317 3 cr.

Religion: One course from REG 212, REG 213, REG 314, REG 313 3 cr.

Philosophy, One course from PHL 211, PHL 311, POS 345, ENS 205 3 cr.

Cultural Studies, Two courses from: HUT 305, HUT 306, PSL 201, SOL 201, SOL 301, MUS 210, FAP 215, BAD 201, ECN 200, ARP 215, COA 359, COA 315, NTR 215, ECN 211, ECN 212 6 cr.

Citizenship, one course from: HIT 211, IAF 301, POS 201, POS 210, POS 240, POS 319, POS 337 3 cr.

Science and Technology, two courses from : AST 201, BIO 202, BIO 203, CHM 211, ENS 201, ENS 202, ENS 206, CSC 201, HEA 201, MAT 201, MAT 202, MAT 204, MAT 211, NTR 201, PHS 211, STA 202, STA 210, PHS 207 6 cr.

Undergraduate Courses: Fashion Design

FTP 212 Fashion Illustration I (2.2); 3cr. Students will learn to develop and illustrate fashion figures and garment details through analysis of the fashion canon, the figure research and the study of lines and proportions; resulting in fashion design sketches and illustrations. The emphasis is on the ability to express ideas visually and in a personal style. *Corequisite:* FAP 211.

FTP 214 Textile Technology (2.2); 3 cr. This course is an overview of the textiles in fashion design including printing techniques. Advanced surface treatments are investigated. Students are encouraged to experiment and apply original designs as inspiration for creation of textiles.

FTP 222 Fashion Illustration II (2.2); 3 cr. The students will explore the different techniques for illustrating fashion, analyzing the structural rhythm and movements of various poses, by combining media and advanced rendering techniques; including software used in the fashion industry; leading to new fashion design creations. *Prerequisite:* FTP 212. **FTP 224 History of Fashion Design (3.0); 3cr.** This course traces the history of fashion tradition from antiquity until 1890, including the ancient civilizations of Egypt, Mesopotamia, Greece, Rome, and continuing with the Renaissance, the French Revolution until the Art Nouveau Period.

FTP 229 Fashion Design I (2.2); 3 cr. The students will learn to develop design fashions, in parallel they will sketch figures and garment details through analysis of photographs and research, resulting in fashion design sketches. The ability to design through creative exploration is an integrated part of the course. Techniques for rendering the characteristics of various fabric textures, weights and patterns will be explored. *Prerequisite:* FTP 212.

FTP 314 Contemporary Issues of Fashion Design (3.0); 3 cr. The students will investigate the relationship between fashion design and the contemporary issues of the 20th and 21st Century, beginning with the Art Nouveau period, the 'between the two Wars' period, the New York era, innovations of the 20th Century to end with the contemporary era. *Prerequisite:* ENL 213.

FTP 315 Fashion Studio I (1.4); 3 cr. Students work on creating their own concepts for designs and finished garments, strengthening their

understanding of cutting, construction and tailoring techniques. *Prerequisites:* FTP 222, GDP 222

FTP 318 Patternmaking I (2.2); 3 cr. Students will study the use of the pattern for various sectors while developing basic concepts as well as original designs according to professional standard through hands-on practice. *Prerequisite:* FTP 229.

FTP 319 Fashion Design II (2.2); 3 cr. The students will continue to develop creative concepts in fashion design illustrations and presentation boards through exposure to softwares used in the fashion industry. This process is explored both manually and digitally. *Prerequisite:* FTP 229.

FTP 326 Fashion Trends and New Concepts (2.2); 3 cr. Students will explore the concepts and trends that add glamour to fashion design, through various resources, such as the "Tendance" of the professional fore-casting services. Students will focus on the details such as accessories in new dimensions and materials; thus enhancing their creative potential. *Prerequisite:* FTP 314.

FTP 325 Fashion Studio II (1.4); 3 cr. Students will develop skills and techniques necessary to produce garments of various sectors, including professional processes and assembly procedures. *Prerequisite:* FTP 315.

FTP 328 Patternmaking II (2.2); 3 cr. The students will learn to create advanced patterns using computer and appropriate software as a tool for production, in order to efficiently reflect and execute their creative and original ideas. *Prerequisite:* FTP 318, *Corequisite:* FTP 325.

FTP 329 Fashion Design III (2.2); 3 cr. Creative thinking in both process and product will encourage the students to create trade sketches and storyboards of their fashion designs. The aim is to develop cohesiveness in a collection based on individual concepts with diverse applications, and to present the designs in fashion portfolios. *Prerequisite:* FTP 319. *Corequisite:* FTP 325.

FTP 413 Culture & Fashion Design (3.0); 3 cr. This course will expose the students to examine the influence of various cultures and research personal visions and concepts in Fashion Design, as part of their senior project

proposal. They will investigate, formulate and present their visions in both written and verbal form including visuals.

FTP 415 Fashion Studio III (1.4); 3 cr. The students will continue to employ industrial standards for tailoring garments, including advanced construction processes and assembly procedures to ensure a high quality garment. *Prerequisite:* FTP 325

FTP 418 Patternmaking III (2.2); 3 cr. The students master the translation of any volume or idea regardless of material or purpose. Students will further construct, in tandem manually and digitally, advanced patternmaking for final execution. *Prerequisites:* FTP 328, FTP 315

FTP 419 Fashion Design IV (2.2); 3 cr. Creative and advanced design methodology will ensure unique and professional development of a collection with personal style and effective communication of sketches, fashion design, storyboards and portfolios for their senior collection. *Prerequisite:* FTP 329.

FTP 423 Professional Practice & Marketing (2.2); 3 cr. The students will be exposed to the professional aspects of Fashion Design:

Management of inventory, decision making, planning, licensing, plus strategies to enhance market strength. The process of learning happens through daily journaling, written reports and a presentation of their internship experience. It is the student's responsibility to find an internship and to notify the instructor for approval. Furthermore, the students will design, prepare and present a professional portfolio of their individual collections including the senior project. *Prerequisites:* FTP 415, FTP 419.

FTP 425 Fashion Studio VI (1.4); 3 cr. Students will apply professional standards to the execution of their senior collection and its process will be presented in front of a jury in order to develop high quality prototypes. *Prerequisite:* FTP 415

FTP 428 Patternmaking IV (2.2); 3 cr. The concepts developed through design and research will inform the patternmaking for a collection as their senior project resulting in professional execution. *Prerequisite:* FTP 418, FTP 415

The Degree of Bachelor of Arts in Photography

Program Description

Photography is by far the most used medium amongst all the creative disciplines. From fine arts, design to multimedia, artistically and commercially, the photograph has proven its strength and ability in delivering various sustainable messages in an innovative and challenging process.

The design department understands photography as a multidisciplinary medium devoted to research and experimentation. The photography program encourages the exploration and development of the individual style in a project based system where initiative, research and analytical thinking underlie each body of work.

The BA in photography offers the students the opportunity to learn photography combined with animation, multimedia, video and other related fields. Students are invited to combine traditional and contemporary methods to create photography, including still and moving images as well as image and text.

Graduates will develop a strong learning while tackling all the areas of the photographic industry enabling them to pursue a promising career in their chosen field of interest.

Career Opportunities

Students graduating with in photography will have the opportunity to work as freelancers covering the creative and artistic needs of the market such as advertising, editorial, fashion and documentary. They can also work as creative directors, image consultants and photojournalists. In parallel to their commercial work, graduates will be capable of setting up their own exhibitions and publish their work.

Degree Requirements (102 credits)

General Education Requirements (GER): 30 cr.

The GER are distributed as follows:

Communication skills in English, ENL 213 & ENL 223 or ENL 230 6 cr

Communication skills in Arabic, One course from: ARB 211, ARB 212, ARB 224, ARB 231, ARB 317 3 cr.

Religion: One course from REG 212, REG 213, REG 314, REG 313 3 cr.

Philosophy, One course from PHL 211, PHL 311, POS 345, ENS 205 3 cr.

Cultural Studies, Two courses from: HUT 305, HUT 306, PSL 201, SOL 201, SOL 301, MUS 210, FAP 215, BAD 201, ECN 200, ARP 215, COA 359, COA 315, NTR 215, ECN 211, ECN 212 6 cr.

Citizenship, one course from: HIT 211, IAF 301, POS 201, POS 210, POS 240, POS 319, POS 337 3 cr.

Science and Technology, two courses from : AST 201, BIO 202, BIO 203, CHM 211, ENS 201, ENS 202, ENS 206, CSC 201, HEA 201, MAT 201, MAT 202, MAT 204, MAT 211, NTR 201, PHS 211, STA 202, STA 210, PHS 207 6 cr.

Minor in Photography (18 credits)

This minor is ideal for students who believe in the alchemy of the still image and its creative and inspiring process. Out of all the visual communication media, photography stands out for its power in freezing time and capturing the essence of the real. Used in every discipline, it manages to travel through the eye to reach the mind and engrave its codes in the heart. New digital technologies and traditional techniques are merged here to offer pioneering creative methods in this challenging field.

Students who choose this minor will acquire solid analytical, intellectual and technical skills necessary for the development of a consistent photographic body of work .

It is the hope that such a Minor can enrich the lives of the students by introducing a creative medium and sufficient skill to produce work.

Career Opportunities

Students can work as freelancers responding to the creative and artistic needs of the market such as advertising, editorial, fashion, and documentary.

Undergraduate Courses: Photography

PDP 201 Basic Photography (2.2); 3 cr. An introduction to the camera, dark room, film and processing. Students will learn about basic techniques of exposure, lighting and laboratory.

PDP 216 Introductory Photography (2.2); 3 cr. Students will develop a strong basis for the creation of the image while exploring digital and analog techniques that will enable them to express their own ideas visually. They will explore several photographic topics and represent them through various concepts and techniques.

PDP 221 Portraiture (2.2); 3 cr. Students will develop individual ideas through an understanding of the photographic portrait, including past and present representation of the self and the other. An interpretation of the facial representations and body language is expressed through analog and digital techniques. *Prerequisite:* PDP 216.

PDP 223 History of photography (2.2); 3 cr. This course gives an overview of the history of photography starting from the pioneers' era in the beginning of the 19th century until mid of the 20th century. It will cover the influence of science and technology in the creation of the image, as well as the challenge between painters and photographers. *Prerequisite:* PDP 216.

PDP 227 Grain to Pixel (2.2); 3 cr. Students will learn how to handle and manipulate digital images for diverse outcomes. They will be introduced to professional software for image retouching, montages, collage and special effects. *Prerequisite:* PDP 216.

PDP 311 Branding in Photography (2.2); 3 cr. Students learn to analyze a brand and target a given audience. They will be exposed to the process of how to deconstruct the commercial image, through the development of a brief; research, concept to image creation. Through photography students will learn to communicate successfully the image identity of a brand. *Prerequisite:* PDP 227.

PDP 312 Glamour and Fashion (2.2); 3 cr. Creativity and originality in the production of the fashion image and the ability to transmit the stylistic concept is an integrated part of this course. Students will learn to manage the team necessary for glamour shooting, whether in the studio, outdoors or during catwalk. *Prerequisite:* PDP 227.

PDP 313 Contemporary Photography (2.2); 3 cr. This course will cover photography from the beginning of the 20th century until present day. It will introduce critical and cultural theories pertaining to the contemporary image, including multimedia and the digital era. *Prerequisite:* PDP 227.

PDP 317 Line to Pixel (2.2); 3 cr. Students will master the manipulation of digital images in a variety of media. They will be introduced to different software in relation to design and publications, enabling the students to produce professional printed matter. *Prerequisite:* PDP 216.

PDP 321 Photojournalism and Documentary (2.2); 3 cr. Students will be aware of the responsibility and integrity of the photographer in capturing the moment and producing striking photographs. They will analyze the photograph in relation to various media while addressing ethical and social issues objectively and grasp a deeper insight of the ambiguity of the message. *Prerequisite:* PDP 317.

PDP 322 Photography and Culture (2.2) 3 cr. Students will investigate the way images are read, used and understood in different cultures in an international scope. They will research, identify and define the different obstacles that may limit or transform the meaning of a photograph in a global context.

PDP 323 Time and Space (2.2); 3 cr. Students will analyze the cultural meaning of a certain space or place and the signs held within its image. The architectural elements and methods for visual investigation will be explored through the quality and quantity of light in conveying different moods. *Prerequisite:* PDP 317.

PDP 327 Web Image (3.0); 3 cr. Students will learn the structure of websites, for clients and for self promotion, that reflect the genre of their work while understanding and analyzing creative website used by professional photographers. *Prerequisite:* PDP 317.

PDP 411 Image and Type (2.2); 3 cr. Students will understand and analyze different typefaces and the relation between a specific image and expressive typefaces, as well as the different messages that type and image can convey. They will experiment with their own photographs and produce design solutions for various publications. *Prerequisites:* PDP 321, PDP 327.

PDP 412 Experimental photography (2.2); 3 cr. This course will offer a survey of the contemporary experimental photography; emphasizing past and present methods. Students will create original and unique images through exploration and application of alternative techniques. *Prerequisite:* PDP 327.

PDP 413 Senior project I (2.2); 3 cr. Students will investigate and formulate their senior project proposal. They will determine subject matter and concepts, after researching and analyzing the disciplines in which their own practice is located. Dissertations will be submitted and approved by a jury of academics and professionals. *Prerequisites:* PDP 327, PDP 411.

PDP 414 Movie production (2.2); 3 cr. This course aims to acquaint the student with multi-camera usage in a studio setting and on location, combining photography and moving image towards movie production. The common language of the contemporary moving and still image is explored through the concept of storyboarding, directing and digital editing techniques. *Prerequisite:* PDP 327.

PDP 415 Photography and Animation (2.2); 3cr. Students will experiment different processes and techniques to produce an animation, including stop-motion using related software. Students will develop concepts and ideas through sketching and storyboarding enabling them to produce animation and synchronized sound tracks. *Prerequisite:* PDP 327.

PDP 416 Photo and printing techniques (2.2); 3cr. This course combines darkroom and digital

techniques. Aesthetic and conceptual problems will be addressed through assignments and critiques. Emphasis is on individual directions and approaches. It includes image combination, processing and printing techniques. *Prerequisites:* PDP 325

PDP 421 Promotion and Publication (2.2); 3cr. Students will be exposed to the process of promoting their own work, through exhibitions, installations, and publications, locally and internationally. They will be responsible to manage and organize professionally all the preparation needed for a successful promotion. *Prerequisite:* PDP 413

PDP 422 Professional practice and portfolio (2.2); 3cr. This course aims to acquaint the student to develop their professional portfolio for self promotion. In parallel students will be exposed to the legal issues related to the copyright of the image and the way to protect their rights as professional photographers. *Prerequisite:* PDP 413.

PDP 423 Senior Project II (2.2); 3cr. Students will develop their set objectives and produce their senior project in photography under instructor guidance. Articles, discussions, seminars, lectures and fieldtrips will take place supporting of the development of the senior projects. The senior project and related process will be presented in front of a professional jury. *Prerequisite:* PDP 415, PDP 413

The Degree of Master of Arts in Design

The Master of Art in Design program is designed for students of Visual Arts and Design who wish to engage in a further period of study as a continuum from their bachelor studies. It is also designed for experienced students who wish to raise their intellectual and professional experience in a field of study, following a period of work in industry or in the professions associated with design.

The post-graduate status of the Master Program derives from the emphasis given to the relationship between theoretical concepts and the practical realization of a problem; theory and practice at an informed and exploratory level.

The post-graduate status also derives from a teaching approach which lays considerable emphasis upon the managerial and professional aspects of project research and development designed to raise the standards of the successful implementation of the subjects in the professional, applied context of society and industry.

Finally, the post-graduate status of the course allows the student to disengage from the daily pursuit of tasks in their field, which are normally carried out under constraints which limit their exploration of the subject in a holistic sense. Instead, the student is enabled to look deeply into the context of their work, the history and theory, the practice and achievement of specialists in this and other countries on an international, global scale.

The impacts of traditional, new and developing technologies are studied. Graduates of the course can keep abreast of current trends by providing themselves with the intellectual network and contacts necessary to remain fully informed throughout their future professional lives; a benefit to themselves, and their employers.

Master students are able to follow their intellectual and creative discoveries to a depth and distance which will give the opportunity to create pilot schemes and projects which can be developed in the true scientific manner of trial and error: Testing, revision and proposals for further development. Thus, building a body of knowledge on their subject provides the basis for further pioneering and exploratory work, creatively and technically.

The program aims:

- To extend and further develop the intellectual, professional and technical skills of graduates and of mid-career practicing designers
- To explore the social and cultural context within which the processes of designing take place
- To support the individual in developing high-level research ability and to explore the interrelationship of theory and practice.

Admission Requirements

The Master of Art in Design is set for students from the several disciplines that are embraced by the term visual arts and designs, who wish to engage in a period of study beyond the bachelor level, and who wish to raise their intellectual and/or professional experience associated with visual arts and/or design.

Students with bachelor degrees from other disciplines are invited into the program after they have fulfilled undergraduate requirements of the university admission policy.

In addition to the university admission requirements for graduate students, the candidate must submit a portfolio of work for assessment and schedule an interview with MA course faculty.

In order to be accepted into the program, the student must take a minimum of 6 credits per semester as a part-time candidate and 9 credits as a full-time candidate.

Transfer

Although transfer is not generalized, some credits from major universities can be transferable upon admission by the Committee. A transferred course must be passed at the grade of 80 according to the NDU grading and University bylaws.

In addition, applicants for the graduate program may be granted a maximum of nine transfer credits of graduate studies taken at another accredited institution of higher education provided that the transfer course(s) correspond to the NDU course requirements.

Graduation Requirements

Students seeking the degree of Master of Design must meet the university graduation requirements and complete 36 credits with a cumulative average of at least 3.0/4.0.

Graduate Courses: Master of Arts in Design

MAD 615 Design Research Methodologies (2.2); 3 cr. A survey of current design thinking and research methodologies to aid the student in the development of projects in response to a critical content framework. The course is intended to offer the student support and direction in the formation of the critical thinking that will inform their written and visual solutions. Includes lectures, readings and discussion of contemporary issues in design in social and cultural contexts.

MAD 616 Contemporary Issues in Design (2.2); 3 cr. A seminar in which topics of current relevance to design practice and critical thinking will be explored and analyzed. The course content will change each semester to remain up to date within the profession.

MAD 617 Design Studio I (2.8); 6cr. Design projects in response to the critical content of Contemporary Issues in Design. Includes the role of designed objects in contemporary culture and the effect on society, including interaction with potential audiences. *Co-requisite* and/or *Prerequisite*: MAD 616.

MAD 625 Design Research Development (2.2); 3 cr. Development of conceptual and analytical skills for the self-initiated design research, which will culminate in a written proposal. *Prerequisite*: MAD 615.

MAD 626 Cultural Issues in Design (2.2); 3 cr. A seminar that will consider the relevance of culture to design particularly in the Lebanese

context. An introduction to recent theories in various disciplines concerning cultural understanding of design. The course content will change each semester to remain up to date within the profession. *Prerequisite*: MAD 616.

MAD 627 Design Studio II (2.8); 6 cr. A visual application of the topics and ideas covered in Cultural Issues in Design. The course is a platform for experimentation and exploration of concepts from the seminars. It focuses on the role of design objects as cultural artifacts and their reflection of social diversity on both designers and audience. It includes creation, reproduction, distribution and reception of messages. *Co-requisite* and/or *Prerequisite*: MAD 626.

MAD 635 Thesis I (2.2); 3 cr. This course will support and assist the student in the development and preparation of their research into a comprehensive written document that will complement the visual work to be undertaken in Thesis II. The two components will interrelate to support the theories, hypothesis and conclusions. *Prerequisite*: MAD 627.

MAD 636 Special Topic (2.2); 3 cr. This course is given by an invited instructor to explore topics of current interest. *Prerequisite*: MAD 627.

MAD 645 Thesis II (4.4); 6 cr. The course provides further guidance during the development of the thesis. The final outcome answers the research study developed in Thesis I. *Prerequisite*: MAD 635.

DEPARTMENT OF MUSIC AND MUSICOLOGY

Secretary: *Miss Adelle Dib*

Professor

Kesrwani, Elias (Fr.), Diplome de Docteur, 1989, *Musicologie*, Sorbone Paris IV, France

Assistant Professor

Beyrouti, Lola, Doctorate, 2002, *Musicology*, Université Saint-Esprit, Kaslik, Lebanon

The Degree of Bachelor of Arts in Music Musicology Emphasis

Program Description

The B.A. program is designed to help students develop competence and expertise in the areas of music history, theory and analysis.

In addition, students will further acquire professional skills in voice and instrument playing.

Admission Requirements

In addition to the University admission requirements, prospective candidates must complete any remedial English course(s) during their first year of enrollment. Students who fail to meet these requirements will not be allowed to proceed to the degree courses in Musicology and other majors in the Departments of the Faculty of Architecture, Art & Design.

Also, prior to admission, applicants will be subject to a practical evaluation, which covers instrument, voice and musical background.

Graduation Requirements

To receive the degree of Bachelor of Arts in Music – Musicology emphasis, a student must complete a total of 99 credits with a minimum cumulative grade point average of 2.3/4.0 in all Core and Major Courses. Any major course with a grade of less than C- must be repeated. The 99 credits necessary for graduation are divided as follows:

Degree Requirements (99 credits)

General Education Requirements (GER): 30 cr.

The GER courses are distributed as follows:

Communication skills in English, ENL 213 & ENL 223 or ENL 230 6 cr.

Communication skills in Arabic, One course from: 3 cr.

ARB 211, ARB 212, ARB 224, ARB 231, ARB 317

Religion: One course from REG 212, REG 213, REG 314, REG 313 3 cr.

Philosophy, One course from: 3 cr.

PHL 211, PHL 311, POS 345, ENS 205

Cultural Studies, Two courses from: 6 cr.

HUT 305, HUT 306, PSL 201, SOL 201, SOL 301, MUS 210, FAP 215, ARP

215, BAD 201, ECN 200, COA 359, COA 315, NTR 215, ECN 211, ECN 212

Citizenship, one course from: 3 cr.

HIT 211, IAF 301, POS 201, POS 210, POS 240, POS 319, POS 337

Science and Technology, two courses from: 6 cr.

AST 201, BIO 202, BIO 203, CHM 211, ENS 201, ENS 202, ENS 206, CSC 201,

HEA 201, MAT 201, MAT 202, MAT 204, MAT 211, NTR 201, PHS 211, STA

202, STA 210, PHS 207

The Degree of Bachelor of Arts in Music Music Education Emphasis

A concentration in music education provides students with qualifications to serve in educational settings.

Admission Requirements

In addition to the University admission requirements, prospective candidates must complete any remedial English course(s), during their first year of enrollment. Students who fail to meet these requirements will not be allowed to proceed to the degree courses in Music Education and other majors in the Departments of the Faculty of Architecture, Art & Design.

Also, prior to admission, applicants will be subject to a practical evaluation, which covers instrument, voice and musical background.

Graduation Requirements

To receive the degree of Bachelor of Arts in Music – Music Education Concentration, a student must complete a total of 99 credits with a minimum cumulative grade point average of 2.3/4.0 in Major and Core Requirements. Any major course with a grade of less than C- must be repeated. The 99 credits necessary for graduation are divided as follows:

Degree Requirements (99 credits)

General Education Requirements (GER): 30 cr.

The GER courses are distributed as follows:

Communication skills in English, ENL 213 & ENL 223 or ENL 230 6 cr.

Communication skills in Arabic, One course from: ARB 211, ARB 212, ARB 224, ARB 231, ARB 317 3 cr.

Undergraduate Courses: Musicology

MUS 201 Music Archeology (3.0); 3 cr. Music instruments and inscriptions of the early time.

MUS 210 Music Appreciation (3.0); 3cr. A brief survey of the music history in various cultures and ages aiming at introducing students to knowing and appreciating the art of music in its different forms, and instruments. The course relies heavily on listening to music through visual aids relating the sound to the instrument.

MUS 211 Applied Music Instrumental or Vocal I (1.0); 1 cr. Private lessons with the teacher on the student's major instrument or voice. *Prerequisite:* Knowledge of 20% of the Latin program or its equivalent.

MUS 214 Introduction to Musicology (3.0); 3 cr. A survey of musicology, its philosophy and objectives, Relating musicology to auxiliary disciplines.

MUS 221 Applied Music Instrumental or Vocal II (1.0); 1 cr. Private lessons with the teacher on the student's major instrument. *Prerequisite:* MUS 211.

MUS 222 Theory of Music I (1.0); 1 cr. Last and general survey of Theory of Music aiming to fill up any lack in theory supposed to be achieved.

MUS 223 Sight Singing and Ear Training I (1.0); 1 cr. Ear training and sight singing exercises in the keys of C major, A minor, F major, D minor, G major, and E minor.

MUS 224 History and Analysis of Western Music: Medieval – Baroque Period (3.0); 3 cr. Survey of composers, pieces, languages and styles of Medieval, Renaissance, and Baroque periods.

MUS 228 History and Analysis of Western Music A: Medieval – Baroque - Classical Period (3.0); 3 cr. Survey of composers, pieces, languages and styles of Medieval, Baroque and Classical periods. The instructor focuses on explaining the basic concept of the Medieval, Baroque and Classical philosophies relating the art of music to other fine arts of the same period. The process of music languages teaching focuses on reading the scores, playing it on instruments and listening to it recorded.

MUS 229 History and Analysis of Western Music B: Romantic – Post Romantic – 20th Century (3.0); 3 cr. Survey of composers,

pieces, languages and styles of Romantic, Post Romantic and 20th Century periods. The instructor focuses on explaining the basic concept of the Romantic, Post Romantic and 20th Century philosophies relating the art of music to other fine arts of the same period. The process of music languages teaching focuses on reading the scores, playing it on instruments and listening to it recorded.

MUS 232 Theory of Music II (1.0); 1 cr. The modes (other than the major and minor modes), chords (up to five tone chords), modulation, phrases and the different kinds of cadences, transposition, ornaments and abbreviations, and the contemporary notation. In brief: open horizon on harmony. *Prerequisite:* MUS 222.

MUS 233 Sight Singing and Ear Training II (1.0); 1 cr. Sight singing and ear training exercises in keys with up to four alterations. Introduction to the eighth and 16th notes and syncopation, and the cut-time time signature. *Prerequisite:* MUS 223.

MUS 234 History and Analysis of Western Music: Classical Period (3.0); 3 cr. Survey of composers, pieces, languages and styles of the Classical period.

MUS 243 Lebanese Music (3.0); 3 cr. Traditional and popular Lebanese music: forms, metrics, modes rhythms and instruments from early time to the 20th century.

MUS 244 Ethnomusicology (3.0); 3 cr. Introduction to music of different cultures and times.

MUS 245 Musical Forms (3.0); 3 cr. Genres, styles, forms, structures of music throughout history.

MUS 324 History and Analysis of Western Music: Romantic and Post-Romantic Period (3.0); 3 cr. Survey of composers, pieces, languages and styles of Romantic, and Post-Romantic periods.

MUS 331 Applied Music Instrumental or Vocal III (1.0); 1 cr. Private lessons with the teacher on the student's major instrument. *Prerequisite:* MUS 221.

MUS 334 History and Analysis of Western Music: 20th Century and Contemporary Music (3.0); 3 cr. Survey of composers, pieces,

and styles of 20th Century and contemporary periods.

MUS 341 Applied Music Instrumental or Vocal IV (1.0); 1 cr. Private lessons with the teacher on the student's major instrument. *Prerequisite:* MUS 331.

MUS 342 Harmony I (1.0); 1 cr. Three tone chords, cadences, and modulation. Harmonizing short pieces and the dominant seventh chords. *Prerequisite:* MUS 232.

MUS 343 Sight Singing, Rhythmic Chanting, and Ear Training III (1.0); 1cr. Sight singing and ear training exercises in keys with up to 6 alterations in the key signature. Introduction to composite measures, and more in depth applications of syncopation. *Prerequisite:* MUS 233

MUS 344 Religious Music (Gregorian, Byzantine, and Syriac) (3.0); 3 cr. Survey of Gregorian, Byzantine, and Aramaic chants and their modes.

MUS 352 Harmony II (1.0); 1 cr. 9th, 11th, and 13th chords, diminished seventh chords, and altered chords. *Prerequisite:* MUS 342.

MUS 353 Sight Singing, Rhythmic Chanting, and Ear Training IV (1.0); 1 cr. Sight singing and ear training exercises in the key of F with advanced rhythms. *Prerequisite:* MUS 343.

MUS 382 Methodology (research methods) of Music (3.0); 3 cr. Introduction to musical sources, principles of research, research styles, citations, and formatting. Art of writing theses and scientific works.

MUS 441 Applied Music Instrumental or Vocal V (1.0); 1 cr. Private lessons with the teacher on the student's major instrument. *Prerequisite:* MUS 341.

MUS 444 Philology of Music (3.0); 3 cr. Musical intelligence, development of musical principles, intervals, and scales. *Prerequisite:* MUS 352.

MUS 451 Applied Music Instrumental or Vocal VI (1.0); 1 cr. Private lessons with the teacher on the student's major instrument: Knowledge of 50% of the Latin program or its equivalent. *Prerequisite:* MUS 441.

MUS 452 Harmony III (1.0); 1 cr. Retardation, pedal points, passing tones, neighboring tones, anticipation, the appoggiatura, and escape notes. *Prerequisite:* MUS 352.

MUS 453 Sight Singing, Rhythmic Chanting, and Ear Training V (1.0); 1 cr. Sight singing and ear training exercises in simple keys with advanced rhythms. *Prerequisite:* MUS 353.

MUS 454 Instrumentation (3.0); 3 cr. Study of instrumentation and arranging different music to different ensembles. *Prerequisite:* MUS 452.

MUS 455 Orchestration (3.0); 3 cr. Art of orchestra composing based on the evolution of instruments and music Schools.

MUS 462 Counterpoint and Fugue (1.0); 1 cr. Writing music for more than one voice in the modal styles of the organum, Motet... to fugue. *Prerequisite:* MUS 352.

MUS 463 Sight Singing, Rhythmic Chanting, and Ear Training VI (1.0); 1 cr. Sight singing and ear training exercises in all tonalities, and the C-clef. *Prerequisite:* MUS 453.

MUS 475 Acoustics of Music (3.0); 3 cr. Principles of sounds. Science of sound and the process of hearing. The study of hall acoustics.

MUS 484 Project I (3.0); 3 cr. Presentation of a research project under the supervision of the teacher. *Prerequisite:* MUS 384.

Undergraduate Courses: Music Education

MUE 335 Music Education (3.0); 3 cr. A survey of the various musical education methods, such as the Orff, Dalcroze, Kodaly, Suzuki and other methods.

MUE 446 Teaching Music at the Elementary Level (3.0); 3 cr. Writing lesson plans appropriate to the elementary level and applying them. Learning teaching methods suitable for the age group (6-11).

MUE 474 Child Theater Music (3.0); 3 cr. This course is divided into two parts: one theoretical and the other practical. This course requires music majoring students to study and apply the learned material to create and develop theatrical events for children in neighbouring schools.

MUE 476 Teaching Music at Secondary Level (3.0); 3 cr. Writing lesson plans appropriate to the secondary level and applying them. Learning teaching methods suitable for the age group (12-17).

MUE 479 Lebanese Folk Educational Music (3.0); 3 cr. This course centers upon a variety of music folk education covering a wide span beginning with the childhood to adulthood. Special emphasis will be on exploring the local folk musical trends and traditions which would drive the educator to focus on local modalities: rhythms and forms.

Undergraduate Courses: Musimedialogy

MUM 347 Computer and Music (3.0); 3 cr. Introduction to different musical notation and MIDI programs.

MUM 350 Audio-Video Workshop (3.0); 3cr. Broadcasting, diffusion, mixers, cameras, editing (Montage from classic to computerized)

MUM 354 Organology of music (3.0); 3 cr. Music Prototype Instruments manufacture and evolution through history: Strings, winds..., ear and vocal cords.

MUM 437 Music Management (3.0); 3 cr. Business aspects of the arts; selecting suitable musical acts for performances, providing the venue, selecting the program, promoting the act, and selling the tickets, rules and P.R. required for musician relation with consumer public and producers. Music Managements studys the procedures and techniques applied to administer and manage areas in the musical industry such as choirs, classes, concerts, production, festivals, musical events, management of talented artists through the public marketing of the final production.

MUM 447 Survey of Art Schools (1.0); 1 cr. A course surveying the Art schools aiming at preparing the Musical Criticism.

MUM 448 Musical Criticism (3.0); 3 cr. Writing musical critiques, reviews, and previews, of musical events.

MUM 457 Radio and Television Music Casting (3.0); 3 cr. Performing critiques, reviews, and previews of musical events, live or taped on the radio or the television. Students are required to maintain 2 free hours, one before and the other after the lecturing time of the course.

MUM 474 Music Law (3.0); 3cr. The course focuses on the national, regional and international laws protecting the rights of composition, production, distribution, and marketing locally and internationally. Students will be acquainted with the various international organizations protecting intellectual property such as SACEM, WTO and others.

Undergraduate Courses: Arabic Musicology

MUA 218 Arabic Prosody (2.0); 2 cr. (علم لأوزان الشعر العربية وإيقاعاتها، موسيقى الشعر (العروض

MUA 222 Arabic Music Theory I (3.0); 3 cr. (Theory, Maqamat, rhythms and forms).

MUA 227 Arabic Music Theory II (3.0); 3 cr. تحاليل معمقة للنظريات الموسيقية العربية: (نظريات الموسيقى العربية، المقامات المركبة والإيقاعات المركبة).
*Prerequisite:*MUA 222

MUA 228 History and Analysis of Western Music A (3.0); 3 cr. The course is a condensation of two courses MUS 224 and MUS 234.

MUA 229 History and Analysis of Western Music B (3.0); 3 cr. The course is a condensation of two courses MUS 324 and MUS 334.

MUA 234 History and Analysis of Arabic Music II (2.0); 2 cr. Al-Kindy - Andalusian music

MUA 254 History of Arabic music I. (3.0); 3 cr. A general survey of the history of of Arabic music from the beginning to the contemporary era.

MUA 318 Qoran Chanting(2.0); 2 cr. (الانشاد القرآني)

MUA 324 History and Analysis of Arabic Music III (3.0); 3cr. Al-Farabi.

MUA 332 Arabic Music Theory III (2.0); 2cr. تحاليل مؤلفات عربية كلاسيكية واستخراج النظريات الموسيقية العربية: المقامات المركبة والإيقاعات المركبة منها .

MUA 334 History and Analysis of Arabic Music IV (2.0); 2 cr. Ibn Sina, Al-Ikhawan Al-Safa, Ibn Rushd.

MUA 343 Oriental Sight Singing 1 (1.0); 1 cr. صولفيج شرقي 1

MUA 353 Oriental Sight Singing 2 (1.0); 1 cr.2 صولفيج شرقي . *Prerequisite:* MUA 343.

MUA 363 Oriental Sight Singing & Ear Training 3 (1.0); 1cr. 3 صولفيج شرقي .
Prerequisite: MUA 353.

MUA 374 Arabic Instrumental Ensemble (2.0); 2cr. This course offers the student the possibility to apply within an ensemble the Arabic Music Instrument he plays or the Arabic Chanting he studied, not withstanding that the difference between playing instrument and singing alone would not provide the student the same knowledge and experience compared to the same application in a group.

MUA 424 History and Analysis of Arabic Music V (2.0); 2cr. Cairo Congress of Arabic Music 1932-1934 Michael Moushaqa and contemporary theorists.

MUA 444 History and Analysis of Arabic Music VI (3.0); 3 cr. Arab Renaissance-Modern Arabic Music.

MUA 463 Oriental Sight Singing & Ear Training 4 (1.0); 1 cr. (4 صولفيج شرقي)
Prerequisite: MUA 363.

MUA 477 Andalusian Music (3.0); 3 cr. الوزن الشعري للموتحاح الأندلسية والموسيقى الناتجة عنه (في الحقبة الأندلسية ؛ ومميزات هذه الموسيقى من حيث النغم والشكل والإيقاع وانتقالها من الأندلس الى المغرب العربي ثم (...الى حلب ومصر

Undergraduate Courses: Jazz Music

MUJ 311 Jazz Sight Singing, Ear Training and Rhythmic Analysis I (1.0); 1cr. The course deals with the basic sight singing so that students would begin to grasp the specificities of elementary level of Jazz melody and rhythm. Practicing by voice and instrument are an integral part of this course.

MUJ 322 Jazz Sight Singing, Ear Training and Rhythmic Analysis II (1.0); 1cr. The course provides students with an intermediate level of learning the specificities of Jazz melody and rhythm based mainly on major and minor. *Prerequisite:* MUJ 311

MUJ 324 History and Analysis of Jazz Music I, (2.0); 2cr. The course provides an historical and analytical overview of the Jazz roots and development. It focuses on the works of the master Jazz composers, starting with Oliver till Hawkins.

MUJ 325 History and Analysis of Jazz Music II, (2.0); 2cr. The course provides an advanced analysis of the works and performance of the Jazz master composers and performers during the thirties.

MUJ 342 Jazz Theory I, (1.0); 1cr. Theory of Jazz Music is divided into two credit courses to be taught in the span of two academic semesters: MUJ 342 and MUJ 352. This course provides in addition to the classical theory of music, the specific foundations of Jazz Theory and harmony. MUJ 342 begins with basic Jazz Theory, the Major Scale and the II-V-I Progression, Chord, Major Scale Harmony, Melodic Minor Scale Harmony, Diminished Scale Harmony, Whole Tone Scale Harmony, to how to practice Scales and Slash Chords. The course will be taken in conjunction with other four semesters courses dealing with Sight Singing and Ear Training.

MUJ 345 Afro-Cuban Music & Percussion (2.0); 2cr. The course explores from a historical perspective the various styles of Afro-Cuban Music and Percussion along its dual relationship to the Jazz language. The percussion instruments are all studied and explored in group setting. Afro-Cuban religious ceremonial rhythms, in addition to drum set applications, are also covered. The course also focuses in depth upon the analysis and knowledge of the inner workings of clove and basic techniques on the major battery of Afro-Cuban percussion (congas,

bongo, timbales) in addition to minor battery (maracas, guiro, shakers, cowbells, etc.).

MUJ 352 Jazz Theory II, (1.0); 1cr. In continuity with Jazz Theory I, this course includes improvisation from Scales to Music, the Bebop Scales, playing "Outside", Pentatonic Scales, the Blues, "Rhythm" changes, melodic construction, choir voicing and voice leading. The course aims at exposing students to other important and related topics to include basic music analysis, the blues, standard Jazz forms and typical chord substitutions. *Prerequisite:* MUJ 342.

MUJ 355 American Ethnic Music (2.0); 2cr. American Ethnic Music role is considered as the basis (raw material) for creation and development of the Jazz music in addition to contributions offered by African and Asian ethnic music. This American music culture has been a faithful mirror of the pluralistic ethnic American socio-cultural composition.

MUJ 356 African & Far-East Ethnic Music (2.0); 2cr. The course studies in depth the basic connecting relations between the African music: melody, modalities and rhythms recognized as the inspirational source of jazz, developed by the Afro-American symbiosis of the people and cultures. The same applies to the Far- Eastern cultural contributions

MUJ 411 Jazz Sight Singing, Ear Training and Rhythmic Analysis III (1.0); 1cr. The course offers the students a higher level of learning the sight singing and ear training of Jazz music applied to accidental and ethnic modalities that Jazz had developed. *Prerequisite:* MUJ 322.

MUJ 422 Jazz Sight Singing, Ear Training and Rhythmic Analysis IV (1.0); 1cr. This is an advanced level in learning sight singing and ear training of Jazz music. It focuses on reaching and analyzing complex melodies and rhythms. *Prerequisite:* MUJ 411.

MUJ 434 History and Analysis of Jazz Music III, (2.0); 2cr. The course focuses on the development of the Jazz music during the fifties and sixties with special emphasis on the works of the masters of this period.

MUJ 435 History and Analysis of Jazz Music IV, (2.0); 2cr. Students will be exposed to the

evolution of the Jazz language, styles and forms as presently performed.

MUJ 464 Gospel Chorus (2.0); 2cr. The course is designed for all students interested in singing gospel music: styles, ranging from traditional to contemporary schools. A special emphasis will be on phrasing, stamina and singing techniques.

MUJ 474 Jazz Ensemble I (1.0); 1 cr. The course offers the students the opportunity to prepare him/herself, accompanied by the instructor, to master, and qualify as a competent member of the Jazz ensemble. The course encompasses the elementary forms of the big band, swing,...

MUJ 475 Jazz Ensemble II (1.0); 1cr. This course is an advanced level of Jazz ensemble. The main objective centers upon giving the student the necessary experience from playing in a band and spending longer time into applying the practical side of learning. It develops sight reading skills and creativity in the student so that he/she might be able to perform arrangements and compositions as well as playing in bands. (Students who register for this course should

understand that each teaching hour tends from two to three hours in practice).

MUJ 485 Jazz Arranging I (2.0); 2cr. The course provides the student with the basic techniques and methods to arrange existing Jazz melodies for small groups.

MUJ 486 Jazz Arranging II (2.0); 2cr. In this advanced level the student will master the techniques regarding voicing, instrument sonorities, capabilities and other extended forms. It focuses on large group. *Prerequisite:* MUJ 485.

MUJ 494 Advanced Re-harmonization I (2.0); 2cr. This course provides the students with an overview of the variety of techniques for re-harmonization. *Prerequisite:* Theory of Music II or equivalent.

MUJ 495 Advanced Re-harmonization II (2.0); 2cr. The course will focus in-depth on materials stressing the pedal point and the creation of chromatic voicing to enable students develop a personalized relationship with the harmony. *Prerequisite:* MUJ 494

The Degree of Master of Arts in Music

Graduate study in musicology covers approaches such as historical and ethnomusicological investigation as well as hermeneutics, semiotics and criticism. Students are expected to become familiar with a wide range of areas: methods, philosophies and techniques of historical research methods for analysis of music and ethnomusicological research.

Students enrolled in the program are expected to familiarize themselves with the current state of musicological research and thinking through independent study as well as in consultation with faculty members. Students are also expected to take an active part in the working musicological community at large, through participation in regional, national, and international meetings and concomitant informal contacts with students and faculty at other institutions.

The program aims:

- To develop and sharpen the skills each student needs to realize his or her future specialization intentions;
- To expand each student's conception of what is possible in construing music performance or research through speculation and experimentation;
- To develop a larger and sharper sense of the context in which the students work, and on which it depends by continued study and research.

Admission Requirements

Applicants will normally hold a bachelor degree in music or an equivalent qualification. They need to submit an extended piece of writing on a musical subject in order to provide evidence of writing skills and intellectual ability appropriate for musicological study at master's level. An English test is required except for students majoring in Arabic music. Selection is based on information submitted by the applicant, and by interview when necessary.

Transfer

Although transfer is not generalized, some credits from major universities can be transferable upon admission by the Committee. A transferred course must be passed at the grade of 80 according to the NDU grading and University bylaws.

In addition, applicants for the graduate program may be granted a maximum of nine transfer credits of graduate studies taken at another accredited institution of higher education provided that the transfer course(s) correspond to the NDU course requirements.

Graduation Requirements

To receive the degree of Master of Arts in Music, a student must complete a total of 36 credits with a minimum cumulative grade point average of 3.0/4.0 in all Major Courses.

Structure and Time-table

The program is delivered over four semesters. All students, whether full- or part-time, initially complete the program requirements, and attend the research method course. Classes are normally timetabled in the afternoons.

The program moves from general methodological concerns towards greater specialisations.

1. Research methodology.
2. Academic study. All students are required to take courses in Musical Thought, languages and aesthetics.
3. Dissertation. Here students embark on a programme of independent study, supervised by a dissertation advisor.

MUS	699	Thesis	6 cr.

Graduate Courses: Music

MUS 615 Methodology of Research (3.0); 3cr.

The students learn the art of writing the MA thesis. In this course, students will use a variety of methods, skills and sources including but not limited to qualitative and quantities information, i.e. documentation techniques. Students will need to focus on the application side of methodological techniques and international theory displaying the ability to analyze, discover and evaluate and using the actual archives, musicological tools and technology and other source or reference material.

MUS 616 Seminar in Musicology I (3.0); 3cr.

Original work in areas of current musicological significance will be presented to and reviewed by the seminar as the occasion arises. Emphasis is given to student projects, but work in progress by any member of the seminar may be discussed or a topic of particular controversy examined.

MUS 617 Seminar in Musicology II (3.0); 3cr.

Student chose a free subject related to his/her one musical interest that he may specialize in for his/her PhD.

MUS 625 Seminar in Ethnomusicology I (3.0); 3cr.

Research Methods in Ethnomusicology: Musical Ethnography, an introduction to the theories and methods of ethnomusicological fieldwork, including changing conceptions of the research site, ethical concerns, interview techniques, the ethnography of musical performance, and data analysis and interpretation. Individual research project required.

MUS 626 Seminar in Ethnomusicology II (3.0); 3cr.

Ethnomusicology: *Theory and Structure of oriental or occidental Classical Music*. Students analyze rhythmic and melodic structures of musical genres and forms, examine relative explanatory tools and assess alternate theories of Music material.

MUS 627 Art Criticism (3.0); 3cr. This course studies the methods used by various schools of art criticism throughout history with special emphasis on helping the students to see how technology and the diversity of languages in

modernity have influenced contemporary methods of art criticism.

MUS 636 Aesthetic Philosophy (3.0); 3cr.

This course investigates the fundamental nature or soul of art and aesthetic experience. Students explore and scrutinize the artistic theories and aesthetic principles that are presupposed in both Western and Eastern art. This course provides students with both a personal appreciation of aesthetics, as well as a basic ability to apply this appreciation to art criticism.

MUS 637 Modern Music: 1900 – 1960 (3.0); 3cr.

A survey of major works from occidental music, spanning the first six decades of the 20th century. Divided into three periods: 1900 to World War I; WWI to WWII; and 1945 to the early 1960s. The following composers receive greatest attention: Schoenberg, Berg, Webern, Ravel, Stravinsky, Prokofiev, Shostakovich, Ives, Britten, Messiaen, Stockhausen, and Carter. By studying the great masters of modern music, the student would learn how to discern their creations in order to produce and apply his/her own particular musical language using new elements of his/her own cultural content.

MUS 638 Serial Music (3.0); 3cr.

A critical examination primarily of twelve-tone serialism. Particular emphasis is given to the relations embodied in the twelve-tone set and its transformations, associated invariants, combinatorial, derivation, and aggregate structure, with reference to representative compositional realizations. The dimensions and the levels of structure that do not necessarily manifest set relations are also examined.

MUS 639 The Music Industry (3.0); 3cr.

The course will assist the student to invent and invest in music. It prepares the student for a more fruitful interaction with the present techniques and music technology by managing the world of sound from the microphone to the commercial music items.

MUS 699 Thesis (6.0); 6cr.

A dissertation of around 15,000 words on an agreed subject is required.

DEPARTMENT OF ART

The Department offers degree programs at both the undergraduate and the graduate levels:

- BA in Fine Arts (102 credits)
- BA in Performing Arts (102 credits)
- BA in Decorative Arts and Crafts (102 credits)
- Master of Arts in Fine Arts (36 credits)

The Degree of Bachelor of Arts in Fine Arts

This degree is designed to offer the student a possibility to engage critically with the contemporary Lebanese art culture. It is fundamentally a cross disciplinary pedagogical program which aims at developing in the student, and consequently in the context of a transformed art scene, a desire to reformulate the arts relation with the public sphere. It is a program, which elaborates the tradition of the studio process of art making by equally emphasizing art historical and theoretical studies.

The Bachelor of Arts Degree in Fine Arts spans 3 years of full-time studies. The program totals 102 credits. The Fine Arts program is divided into three full-time phases each of one academic year, (sophomore, junior and senior), commencing each September and concluding each July.

Admission Requirements

In addition to the University admission requirements, prospective candidates must complete all major courses with a 2.3/4.0 grade or above. In addition all major courses with a grade of less than C- must be repeated. All remedial courses, must be completed prior to entering the major courses. Students who fail to meet the above requirements will not be allowed to proceed to the degree courses in Fine Arts and other majors in the Departments of the Faculty of Architecture, Art & Design.

Students, who are computer illiterate, are encouraged to take CSC 201 within their GER or free elective courses before starting their major requirements.

Graduation Requirements

To receive the degree of Bachelor of Arts in Fine Arts, a student must complete a total of 102 credits with a minimum cumulative grade point average of 2.3/4.0 in all Core and Major Courses. Any major course with a grade of less than C- must be repeated. The 102 credits necessary for graduation are divided as follows:

Degree Requirements: Fine Arts (102 credits)

General Education Requirements (GER): 30 cr.

The GER are distributed as follows:

Communication skills in English, ENL 213 & ENL 223 or ENL 230 6 cr

Communication skills in Arabic, One course from: 3 cr.

ARB 211, ARB 212, ARB 224, ARB 231, ARB 317

Religion: One course from REG 212, REG 213, REG 314, REG 313 3 cr.

Philosophy, One course from PHL 211, PHL 311, POS 345, ENS 205 3 cr.

Cultural Studies, Two courses from: HUT 305, HUT 306, PSL 201, SOL 201, 6 cr.

The Degree of Bachelor of Arts in Performing Arts

The program is designed to open opportunities for students who wish to major in performing arts. The degree is a combination of interdisciplinary areas, such as acting and directing, dance and choreography as well as music.

Admission Requirements

In addition to the University admission requirements, prospective candidates must complete the Foundation Studies with a 2.3/4.0 grade or above. In addition all major courses with a grade of less than C- must be repeated. All remedial courses, Math and/or English must be completed prior to entering the major courses. Students who fail to meet the above requirements will not be allowed to proceed to the degree courses in Performing Arts and other majors in the Departments of the Faculty of Architecture, Art & Design.

Students, who are computer illiterate, are encouraged to take CSC 201 within their GER or free elective courses before starting their major requirements.

Graduation Requirements

To receive the degree of Bachelor of Arts in Performing Arts, a student must complete a total of 102 credits with a minimum cumulative grade point average of 2.3/4.0 in all major courses. Any core and major course with a grade of less than C- must be repeated. The 102 credits necessary for graduation are divided as follows:

Degree Requirements: Performing Arts (102 credits)

General Education Requirements (GER): 30 cr.

The GER are distributed as follows:

The Degree of Bachelor of Arts in Decorative Arts and Crafts

The Bachelor of Arts in Arts and Crafts combines: Arts, Crafts, Ceramics, Jewelry, Metal Working, Leather Working with textile design for fiber arts so as to express the individuals' aesthetic capabilities.

Students learn both traditional and innovative techniques, working in two and three dimensions, with an emphasis on creative approaches to design, use of media including computer applications and technical information.

Ceramics, jewelry, metal working and leather work will be studied and practiced in a workshop environment involving traditional methods and new technologies. Courses in weaving cover four-harness and multi-harness structures, open weaves, dyed and painted warps, tapestry, computer aided techniques and others which allow the properties of color, fiber and texture to interact.

In surface design courses, students will learn processes such as silk-screen printing, resist dyeing, block-printing and design technologies where patterns are designed on paper and computer.

A variety of non-loom methods will be experienced such as hand-made paper, knotting, basketry, and others.

Projects assigned may include creations such as rugs, wall pieces, installations, garments, or sample designs; ceramics, jewelry; metal worked products and leather goods.

Graduates may design for industry, while others start their own business or build an exhibition portfolio as a Fine Artist within their chosen field of arts and crafts.

Admission Requirements

In addition to the University admission requirements, prospective candidates must complete the Foundation Studies with a 2.3/4.0 grade or above. In addition all major courses with a grade of less than C- must be repeated (see separate Foundation Studies description). All remedial courses, Math and/or English must be completed prior to entering the major courses. Students who fail to meet the above requirements will not be allowed to proceed to the degree courses in Arts & Crafts and other majors in the Departments of the Faculty of Architecture, Art & Design.

Students, who are computer illiterate, are encouraged to take CSC 201 within their GER or free elective courses before starting their major requirements.

Graduation Requirements

To receive the degree of Bachelor of Arts in Arts & Crafts, a student must complete a total of 102 credits with a minimum cumulative grade point average of 2.3/4.0 in all Core and Major Courses. Minor in Fine Arts (15 credits)

The Studio Arts Minor is meant for students from various majors who intend to acquire artistic skills, enrich self creativity and expand their knowledge of contemporary aesthetic issues.

This program also helps in developing, a proactive rather than reactive mentality, and this, due to enhanced creativity.

The faculty of Architecture, Art and Design offers a flexible minor that allows students to concentrate either on a single artistic discipline such as painting, sculpture, digital media and photography covering a wide range of disciplines mainly meant as a general incentive towards artistic culture.

Option A: General Minor in Fine Art (15 cr.)

Introductory courses

FAP	211	Drawing I	3 cr.
GDP	212	Design Principles I	3 cr.

Upper level courses:

To choose three courses from the following:

FAP	311	Painting I	3 cr.
FAP	313	Sculpture I	3 cr.
FAP	224	Digital Art I	3 cr.
PDP	216	Introductory Photography	3 cr.
FAP	315	Printmaking I	3 cr.

Option B: Emphasis in Painting (15 cr.)

Introductory courses

FAP	211	Drawing I	3 cr.
GDP	212	Design Principles I	3 cr.

Upper level courses:

FAP	311	Painting I	3 cr.
FAP	321	Painting II	3 cr.
FAP	413	Independent Painting Studio I	3 cr.

Option C: Emphasis in Sculpture (15 cr.)

Introductory courses

FAP	211	Drawing I	3 cr.
GDP	212	Design Principles I	3 cr.

Upper level courses:

FAP	313	Sculpture I	3 cr.
FAP	323	Sculpture II	3 cr.
FAP	414	Independent Sculpture Studio I	3 cr.

Option D: Emphasis in Digital Art (15 cr)

Introductory courses

FAP	211	Drawing I	3 cr.
GDP	212	Design Principles I	3 cr.

Upper level courses:

FAP	224	Digital Art I	3 cr.
FAP	314	Digital Art II	3 cr.
FAP	411	Multimedia & Image Development I	3 cr.

Option E: Emphasis in Photography (15cr)

Introductory courses

FAP	211	Drawing I	3 cr.
GDP	212	Design Principles I	3 cr.
GDP	216	Introductory Photography	3 cr.

Upper level courses:

PDP	325	Photography in the Arts	3 cr.
PDP	416	Photography and Printing Techniques	3 cr.

Undergraduate Courses: Fine Arts

FAP 101 Introduction to Music and Art (3.0); 3 cr. Introduces students to techniques and representative works in the music and arts of various periods.

FAP 201 Intro to Painting (2.2); 3 cr. Introduces the student to different materials of painting, construction, composition and paint handling.

FAP 202 Intro to Sculpture (2.2); 3 cr. A course designed to introduce the student to 3-dimensional forms. Emphasis will be on the concept of modeling, carving, casting and constructing as well as developing new modes of expression.

FAP 203 Intro to Ceramics (2.2); 3 cr. This course will allow the students to build forms from clay using basic handbuilding techniques and the potter's wheel.

FAP 204 Intro to Printmaking (2.2); 3 cr. Students experiment with classical and contemporary methods for creating multiple originals.

FAP 205 Intro to Textiles (2.2); 3 cr. Introduction to weaving and surface design. Basic elements of color, texture, and structure.

FAP 211 Drawing I (2.2); 3 cr. Eye and hand coordination are developed through the use of different drawing techniques.

FAP 214 Performing Arts and Music (2.2); 3 cr. Designed to enhance student's creativity in discovering the fields of theater, dance and music.

FAP 215 Art & Culture (1.2); 3 cr. The course focuses on how artworks reflect the culture, the societies and the times. Students will learn to see, analyze and understand the works of art in relation to the relevant context. This course will be organized thematically and will explore modern issues from historical, cultural and social perspectives.

FAP 221 Drawing II (2.2); 3 cr. Drawing is encouraged through observation and application. The human figure is considered in relation to the environment. *Prerequisite:* FAP 211.

FAP 224 Digital Art I (2.2); 3cr. An introductory course offering technical instruction in operating different software's on computers such as Photoshop, illustrator and Indesign. The

emphasis is on exploring conceptual and technical approaches specific to digital media arts.

FAP 225 Conceptual Communication (1.2) 2 cr. A course based on "visual thinking" exercises for the development of the students' ideas and visual expressions.

FAP 311 Painting I (2.2); 3 cr. This is a beginning course dealing with different painting techniques.

FAP 312 Drawing III (2.2); 3 cr. This course consists of a complete study of the human anatomy (skeletal & muscular system) .It is designed to improve the sense of observation, proportion, structure while drawing the figure in different movement considering its different expressions. *Prerequisite* FAP 221.

FAP 313 Sculpture I (2.2); 3 cr. The course is designed to introduce the three dimensions form as well as expose the various sculptural techniques of modeling, carving, casting, mold making. Emphasis will be on clay modeling and Plaster. Traditional & conceptual approach to sculpture will be addressed.

FAP 314 Conceptual Visual Thinking I (1.2); 2 cr. This course challenge the students' capacity to conceptualize ideas related to contemporary art and presented by the instructor. The student will be using a variety of materials in order to communicate and develop his or her concept.

FAP 315 History of Art (3.0); 3 cr. This course is an exposure to a discussion of the major concepts and developments in the classical period in the history of art.

FAP 321 Painting II (2.2); 3 cr. This is an advanced course in painting techniques using modern and contemporary approaches. An investigation of new material techniques using different painting surfaces. *Prerequisite:* FAP 311.

FAP 322 Drawing IV (2.2); 3 cr. This course is designed to explore various approaches and techniques through sketching. It consists of a quick and rough representation of an object, a scene, an activity etc... The goal of this course is to develop and explore individual expression. *Prerequisite:* FAP 312.

FAP 323 Sculpture II (2.2); 3 cr. This course is a continuation of Sculpture I with more advanced projects. New materials and techniques will be introduced and more individual freedom in choosing the media will be given, which will enhance personal vision and develop individual expression. Prerequisite: FAP 313.

FAP 324 Conceptual Visual Thinking II (1.2); 2 cr. This course challenges the students' capacity to conceptualize ideas related to contemporary culture and presented by the instructor. The student will be using a variety of materials in order to communicate and develop his or her concept. *Prerequisite:* FAP 314.

FAP 325 History of Modern Art (3.0); 3 cr. This course is an exposure to a discussion of the major concepts and developments in the modern contemporary history of art.

FAP 411 Multi-Media & Image Development I (Painters/Sculptors) (2.2); 3 cr. This is the course where student can choose to work with different techniques from video and computer art to realistic painting and sculpture. This multi-media approach is geared towards the development of a personal vocabulary as well as acquisition of the needed skills. *Prerequisites:* FAP 321 & FAP 323.

FAP 412 Print Media (2.2); 3 cr. General introduction to printmaking techniques such as intaglio: etching, relief, etc... *Prerequisites:* FAP 321 & FAP 323.

FAP 413 Digital Media I for the Fine Artist (1.2); 2 cr. Students are exposed to different softwares pertaining to fine arts. *Prerequisites:* FAP 321 & FAP 323.

FAP 414 Studio Work I (0.2); 1 cr. Third year students will have access to a small but permanent and private space, where they would spend at least 3 hours per week developing their research and work. A faculty member will meet privately with each student to discuss and critique the developed work. Independent studio work is where the student gets a preview of what

it feels to work independently in a studio, not guided by a classroom project or a teacher. This is the place to acquire self-motivation while guided for one year by an encouraging faculty member. *Prerequisites:* FAP 321 and FAP 323.

FAP 415 Conceptual Visual Thinking III (1.2); 2 cr. This course challenges the students' capacity to conceptualize ideas related to contemporary issues and presented by the instructor. The student will be using a variety of materials in order to communicate and develop his or her concept. *Prerequisite:* FAP 324.

FAP 421 Multi-Media & Image Development II (Painters/Sculptors) (2.2) 3 cr. Advanced level of the multi-media approach studied in FAP 411 and is geared towards the development of a personal vocabulary. Prerequisite: FAP 411.

FAP 422 Installation Art (2.2); 3 cr. This course attempts to synthesize several intersecting problematics from the practices of painting, sculpture, architecture, theater and theories dealing with the issues of 'spectatorship'. These issues are studied both within the parameters of an interior space and on the site of a public space. *Prerequisite:* FAP 411.

FAP 423 Digital Media II for the Fine Artist (1.2); 2 cr. This course builds on the technical skills acquired during the previous course. *Prerequisite:* FAP 413.

FAP 424 Studio Work II (1.4); 1 cr. This course is a continuation of the previous course FAP 414. *Prerequisite:* FAP 414.

FDP 201 Basic Design (2.2); 3 cr. Introduces students to basics of visual expression and organization. *Prerequisite:* Sophomore Standing.

FDP 214 Design for Advertising (2.2); 3 cr. This course is designed for the communication art students. It emphasizes both the functional and the aesthetic aspects of design. *Prerequisite:* FDP 201.

FDP 490 Senior Study (2.2); 3 cr. Research in any special topic dealing with history of architecture, furniture, antiques, textiles or costume design. *Prerequisite:* Senior Standing.

Undergraduate Courses: Performing Arts

FPA 311 Acting I (2.2); 3 cr. English/ Arabic. The course explores movement for the actor and establishes basic physical warm-up techniques that serve the student throughout his or her studies. Includes the actor's exploration of stage space, and building character, through improvisation and text work.

FPA 312 Make-up, Costume and Set Design (2.2); 3 cr. An exploration of the collaborative process of designing for the live theatre. (1) Basic techniques of make-up for the stage including corrective make-up, and fantasy make-up. (2) Basic techniques of costume design for the stage including research, patterning, setting, constructing and fitting costumes. (3) Basic techniques of set design for the stage. Emphasis on the analysis of the dramatic text, research and the use of imagery to support the dramatic intent of a particular production, class project will engage students in using a variety of medium to explore how architecture, the arrangement of space, and the elements of design are used dramatically.

FPA 314 Movement I (1.2); 2 cr. This course is a physically demanding exploration of the role of the body as a main tool of performance. Training student in making connections with their bodies as a mean of assimilating and reacting to external/ internal stimuli without allowing the mind faculties and/or normative social behavior to mask the process.

FPA 315 Voice and Text I (1.2); 2 cr. English/ Arabic. The course consists of breathing and vocal exercises that aim at developing the actor's capacity of vocal expression.

FPA 316 Resident Workshop (0.2); 1 cr. English/ Arabic. Workshop with visiting theatre professionals which may include stage directors, designers, choreographers, and professional performers. This workshop leads to student's performances based on workshops, and supervised by the visiting practitioner and co-instructor.

FPA 321 Acting II (2.2); 3 cr. English/ Arabic. A continuation of Acting I with specific periods of theatrical and dramatic history explored; for instance, Greek and Roman theatre, Period Drama, Spanish Golden Age, Arabic Modern and others. *Prerequisite:* FPA 311.

FPA 322 Light, Sound, and Multi-Media (2.2); 3 cr. This course will consider design and

technology in theatre. It will entail three distinctive parts: (1) Light Design: an exploration of the process of seeing, basic theories of color, and the psychological and physical characteristics of light. This part of the course considers the role of light as a flexible, expressive art medium. (2) Sound Design: the use of sound as a medium of design for the theatre; research and creation of sound score, recording and engineering techniques, live effects and projects in live and studio sound production. (3) Digital multimedia as an option of stage design. Students will be exposed to a variety of media and to techniques such as video, computer animation, and projection. Students will learn how to incorporate such elements within the other elements of stage design through research and projects. *Prerequisite:* FPA 311.

FPA 323 Text Analysis (2.0); 2 cr. Through an exploration of various plays from different periods, the course aims at equipping the students with the necessary tools of analyzing, and interpreting texts. *Prerequisite:* FPA 311.

FPA 324 Movement II (1.2); 2 cr. A continuation of Movement I. *Prerequisite:* FPA 314.

FPA 325 Voice & Text II (2.2); 3 cr. A continuation of Voice and Text I. *Prerequisite:* FPA 315.

FPA 326 Theatre in Performance (2.2); 3 cr. English/Arabic This course entails a collaborative process that leads to a production, which will represent the department in festivals. A part from the registered students, the course is open to students from across the program, as well as, to the community. *Prerequisite:* FPA 311.

FPA 411 Acting III (2.2); 3 cr. English/ Arabic. A continuation of Acting II with a survey and workshops on different schools of acting; for instance, Stanislavski, Brecht, Boal, Grotowski, Mnouchkine. *Prerequisite:* FPA 321.

FPA 412 Creative Dramatics (1.2); 2 cr. English/ Arabic A study of the principles and methods of developing original dramatization with children. Observation of children 's classes in creative dramatics is included. *Prerequisite:* FPA 321.

FPA 413 Fields of Performances I (1.2); 1 cr. English/ Arabic. This course offers the students the opportunity to be exposed to fields of performances such as: children theatre, puppetry, mime, musical, "Attitudologie", story telling, stage combat, dance, circus and others.

FPA 414 Directing I (2.2); 3 cr. English/ Arabic. Methods, theories, exercise, and practice in directing and presenting theatrical and non-theatrical texts. Special attention will be given to dramaturgy, and composition in space and time. *Prerequisite:* FPA 321.

FPA 421 Directing II (2.2); 3 cr. English/Arabic. A continuation of "Directing I" on a more advanced level. *Prerequisite:* FPA 414.

FPA 422 Senior Study (2.2); 3 cr. English/ Arabic. Individual study directed by the instructor in a selected area of study. *Prerequisite:* FPA 411.

FPA 423 Fields of Performance II (1.2); 1 cr. English/ Arabic. Same structure as "Fields of Performances I". Different fields will be explored. *Prerequisite:* FPA 411.

FPA 424 Playwriting Workshop (2.2); 3 cr. English/ Arabic. Focus is on creativity in the writing of theatrical texts. Students will engage in analytical exercises in which they will learn to build characters, construct plot and develop point of view. *Prerequisite:* FPA 411.

FTA 313 History of Theatre (2.0); 2 cr.The development of the theatre from its beginning till present.

Undergraduate Courses: Decorative Arts and Crafts

FAC 311 Arts and Crafts I (2.2); 3 cr. An introduction to the surface design of decorative arts and crafts, including fabric dyes, material and techniques used in traditional and non-traditional methods of surface design for ceramics, jewelry, metal-working, leather work, and fiber arts. Japanese, African, Indonesian techniques for tie-dye, batik, paste resist and hand painting on fabric are also studied. Projects emphasize development of personal expression as well as technical proficiency.

FAC 313 Technique I (1.2); 2 cr. This is an overview of traditional and contemporary methods of form making using a variety of materials. Projects explore both technical and conceptual possibilities in two and three-dimensional constructions, and the development of images and ideas.

FAC 316 Studio Art I (1.2); 2 cr. This course addresses all aspects of commercial design production, including different rendering techniques, production standards and terminology, and professional practices for rendering the presentation of designs for crafts, ceramics, jewelry, metal working, leather work, and constructed fiber arts. Students develop a work methodology to design flat patterns from conceptual evolution to final presentation. The development of professional portfolios are encouraged. Students may start using computer aided design.

FAC 321 Arts & Crafts II (2.2); 3 cr. This course focuses on the development of the creative and technical skills necessary to produce a variety of design; including, tooling leather work, embossing and engraving metal surfaces, applying decoration to ceramics, and printing fabrics. Various medias are explored. Students are encouraged to be experimental and inventive in their approach to using the various surfaces available to the decorative arts and crafts. *Prerequisite:* FAC 311.

FAC 323 Technique II (1.2); 2 cr. This course exposes students to the use of the computer as a design tool. Students draw and alter images on the computer as well as develop design units for execution. A number of applications for the computer-generated designs are investigated, including the production of photo-ready positives for portfolio presentation. *Prerequisite:* FAC 313.

FAC 324 Studio Art II (1.2); 2 cr. This is a studio course in which all the student's works as well as the many areas of professional practice in the field are directed towards a specific career goal. Some of the topics covered are artists statements, curriculum vitae, portfolio preparation, cover letter and contracts. Professionalism in presentation and documentation is emphasized. Students also investigate marketing and merchandising techniques. *Prerequisite:* FAC 316.

FAC 411 Arts & Crafts III (2.2); 3 cr. Students develop skills necessary to translate single graphic images into interconnecting repetitive patterns suitable for use in all commercial and hand-crafted media. *Prerequisite:* FAC 321.

FAC 412 Multi-Media & Personal Development I (2.2); 3 cr. Students research information and artists, which are important to their personal development. With faculty assistance, students define and develop a body of work for the whole semester. An active journal related to the work is required. Mid-semester critiques and final review are also required. *Prerequisite:* FAC 321.

FAC 414 Studio Work I (1.4); 1 cr. Third year students will have access to a small but permanent and private space, where they would spend at least 3 hours per week developing their research and work. A faculty member will meet privately with each student to discuss and critique the development work. Independent studio work is where the student gets a preview of what it feels to work independently in a studio, not guided by a classroom project or a teacher. This is the place to acquire self-motivation while guided for one year by an encouraging faculty member. *Prerequisite:* FAC 321.

FAC 415 History of Arts & Crafts (3.0); 3 cr. An exploration of the beginnings of arts, crafts, weaving, and, textile printing and their evolution through the Middle ages to the present. This study becomes a source for many individual studio projects.

FAC 421 Arts & Crafts IV (2.2); 3 cr. Traditional and non-traditional techniques are used to develop conceptual and functional ideas. *Prerequisite:* FAC 411.

FAC 422 Multi-Media & Personal Development II (2.2); 3 cr. Students work with faculty to develop a personal body of work that represents depth and breadth of exploration and a maturing sense of aesthetic direction and self-expression. Group and individual discussions emphasize the development of critical vocabulary along with advanced technical exploration. Students plan and prepare setting up and displaying of their major works. A Journal must be kept along with schedules of exhibition details and plans. *Prerequisite:* FAC 412.

FAC 424 Studio Work II (0.2); 1 cr. This course is a continuation of the previous course FAC 414. *Prerequisite:* FAC 414.

FAC 425 Internship (0.2); 1 cr. Practical training within a professional environment. *Prerequisite:* FAC 411.

The Degree of Master of Arts in Fine Arts (MA)

The NDU Master of Art in Fine Art is set to prepare graduates who can significantly influence and lead the development of the art professions in Lebanon thus contributing to the country's global position and status. Also, this program is designed to help those students who are willing to develop an interdisciplinary approach to their work within a theoretically informed context and who wish to explore new arenas of practice.

The program offers the opportunity for involvement across the disciplines of design, painting, sculpture, printmaking, photography and computer based fine art.

On the other hand, the Master of Art in Fine Art allows the students to disengage from the daily pursuit of tasks in their fields that are normally carried out under constraints, and which may limit their exploration of the subject in a holistic sense. Instead, the student is able to look in depth into the history, theory, practice and achievements of art on local, national and international levels.

Students follow a number of common courses which focus on the activity of theory and practice at an informed and exploratory level; and, managerial and professional aspects of project research and development.

Groups of students engage in several activities which enable them to produce a significant body of work, including major projects carried out with the support of industry or sponsors, and will demonstrate their mastery of their assignments, self initiated work, disciplines and technology; demonstrating their ability to initiate and manage their own work program and the work of others involved in the production of their ultimate assignments.

The MA in Fine Art program seeks to prepare graduates for professional involvement in art practice and related activities.

This MA course also aims to provide a stimulating environment for personal development, to highly motivated, committed and talented graduates from a range of Fine Art disciplines.

Candidate's Profile

The Master of Art in Fine Art program is designed for students from the many disciplines that are embraced by the term visual art and / or fine arts, who wish to engage in a period of study beyond the bachelor level, and who wish to raise their intellectual and/or professional experience associated with arts.

Students with bachelor degrees from other disciplines are invited into the program after they have fulfilled undergraduate requirements of the university admission policy.

Admission Requirements

In addition to the university admission requirements for graduate students, the candidate must submit a portfolio of work for assessment and schedule an interview with the MA course advisor.

Transfer

Applicants for the graduate program may be granted a maximum of nine transfer credits of graduate studies taken at another accredited institution of higher education provided that the transfer course(s) correspond to the NDU course requirements.

Graduation Requirements

Students seeking the degree of Master of Art must meet the university graduation requirements and complete 36 credits with a cumulative average of at least 3.0/4.0.

**Degree Requirements Thesis Option
(36 credits)**

Major Requirements (GER): **36 cr.**
MAA 615, MAA 616, MAA 617, MAA 625, MAA 626, MAA 627, MAA 635,
MAA 636, MAA 645

**Master of Arts in Fine Arts
Suggested Program (36 Credits)**

Year I

Fall Semester (6 - 12 Credits)

MAA 615	Art Research Methodologies	3 cr.
MAA 616	Contemporary Issues in Art	3 cr.
MAA 617	Art Studio I	6 cr.

Spring Semester (6 -12 Credits)

MAA 625	Art Research Development	3 cr.
MAA 626	Cultural Issues in Art	3 cr.
MAA 627	Art Studio II	6 cr.

Year II

Fall Semester (6 credits)

MAA 635	Thesis I	3 cr.
MAA 636	Special Topic	3 cr.

Fall Semester (6 Credits)

MAA 645	Thesis II	6 cr.
---------	-----------	-------

Graduate Courses: Fine Arts

MAA 615 Art Research Methodologies (2.2); 3 cr. A survey of current art thinking and research methodologies to aid the student in the development of projects in response to a critical content framework. The course is intended to offer the student support and direction in the formation of the critical thinking that will inform their written and visual solutions. Includes lectures, readings and discussion of contemporary issues in art in social and cultural contexts.

MAA 616 Contemporary Issues in Art (2.2); 3 cr. A seminar in which topics of current relevance to art practice and critical thinking will be explored and analyzed. The course content will change each semester to remain up to date within the profession.

MAA 617 Art Studio I (2.8); 6 cr. Art projects in response to the critical content of Contemporary Issues in Arts. Includes the role of artistic objects in contemporary culture and the effect on society, including interaction with potential audiences. *Co-requisite and/or Prerequisite:* MAA 616.

MAA 625 Art Research Development (2.2); 3 cr. Development of conceptual and analytical skills for the self-initiated art research which will culminate in a written proposal. *Prerequisite:* MAA 615.

MAA 626 Cultural Issues in Art (2.2); 3 cr. A seminar that will consider the relevance of culture to art particularly in the Lebanese

context. An introduction to recent theories in various disciplines concerning cultural understanding of art. The course content will change each semester to remain up to date within the profession. *Prerequisite:* MAA 616.

MAA 627 Art Studio II (2.8); 6 cr. A visual application of the topics and ideas covered in Cultural Issues in Art. The course will be a platform for experimentation and exploration of concepts from the seminars. Focuses on the role of art objects as cultural artifacts and their reflection of social diversity on both artists and audiences. Includes creation, reproduction, distribution and reception of messages. *Co-requisite and/or Prerequisite:* MAA 626.

MAA 635 Thesis I (2.2); 3 cr. This course will support and assist the student in the development and preparation of their research into a comprehensive written document that will complement the work to be undertaken in Thesis II. The two components will interrelate to support the theories, hypothesis and conclusions. *Prerequisite:* MAA 627.

MAA 636 Special Topic (2.2); 3 cr. This course is given by an invited instructor to explore topics of current interest. *Prerequisite:* MAA 627.

MAA 645 Thesis II (4.4); 6 cr. The course will provide further guidance during the development of the thesis. The final outcome answers the research study developed in Thesis I. *Prerequisite:* MAA 635.

FACULTY OF BUSINESS ADMINISTRATION AND ECONOMICS

LIST OF FULL-TIME FACULTY MEMBERS

Professors

Yachoui, Elie, Doctorat d'Etat, 1982, *Economics*, Dauphine, France
Hobeika, Louis, Ph.D., 1980, *Economics*, University of Pennsylvania, USA

Associate Professors

Hamadeh, Mhamad, Ph.D., 1998, *Economics*, Syracuse University, USA
Mehanna, Rock-Antoine, Ph.D., 2000, *Business Policy*, Southern University, Baton Rouge, Louisiana, USA
Naimy, Viviane, Ph.D., 2001, *Economics and Finance*, Université de Paris XI, France

Assistant Professors

Akhras, Caroline, Ph.D., 2007, *Doctor of Education*, University of Leicester, UK
Bitar, Nicolas, Ph.D., 2005, *International Finance and Economics*, University of Wisconsin-Milwaukee, USA
Khoury, Rim, Ph.D., 2009, *International Finance*, Sogang University, Korea
Hamadi, Hassan, Ph.D., 2005, *Finance*, University of Surrey, UK
Harb, Atef, Ph.D., 1996, *Economics-Operations Research*, Ecole Polytechnique de Montreal, Canada
Hasham, Elham S., Ph.D. 2004, *Educational Leadership, Management and Administration*, Leicester University, United Kingdom.
Kanbar, Nancy, Ph.D, 2006, *Environmental Science & Public Policy*, George Mason University
Khalil, Antoine, M.B.A., 1981, *Finance*, Pace University, USA
Khoueiri, Roy, Doctorate, 2003, *Economics*, Université Paris 13, Paris Nord, France
Matar-Haddad, Dorine, Ph.D., 2006, *Management*, University of Leicester, UK (NLC)
Saadeh, Hassan, Ph.D., 1999, *Finance*, University of Southern California, Los Angeles, USA
Zgheib, Youssef, Ph.D. 2002, *International Hospitality Management*, University of Strathclyde, Scotland, UK

Senior Lecturers

Barakat, Edgard, M.B.A., 1981, *Marketing*, University of Dayton, USA
Frayha, Norma, M.B.A., 1982, *Accounting*, American University of Beirut, Lebanon
Hovivian, Hrair, M.S., 1984, *Finance and Economics*, Beirut University College, Lebanon
Karam, Selim, MBA, 1983, University of Detroit, USA
Shaffu, Raja, M.B.A., 1970, *Finance*, American University of Beirut, Lebanon
Zakhour, Kamal, M.B.A., 1982, *Marketing*, University of Pittsburgh, USA
Nakhlé, Vivianne, M.S., 1993, *Business Administration*, Strayer College, Washington D.C.

Lecturer

Assaf Carole, M.B.A., 1995, *Tourism and Marketing*, Notre Dame University-Louaize, Lebanon
Assaker, Guy, M.B.A., 2003, Cornell University (NY)/Essec (France); DESS, 2004, Université Paris I-Pantheon Sorbonne, France

FACULTY OF BUSINESS ADMINISTRATION AND ECONOMICS

Dean: *Dr. Elie Yachoui*

Administrative Assistant: *Mrs. Ghada Cattan*

HISTORICAL OVERVIEW

In 1987, the first meeting of the Executive council established the School of Business Administration and appointed Mr. Antoine Khalil as the first Dean. The name was changed from School of Business Administration to the Faculty of Business Administration in 1994 and to the Faculty of Business Administration and Economics in 1996.

The MBA program started in 1993 and the MBA-MIB program was launched in 2004 in collaboration with Bordeaux University, France (courses taught in English). The student enrollment included 78 students in 1987, and today, it reached 2428 students.

The Faculty of Business Administration and Economics is young compared to its competitors, but it has accomplished a phenomenal achievement in its short history. It has received praise from employers for its rigorous academic work.

Deans of the Faculty of Business Administration and Economics

Mr. Antoine Khalil 1987-1989

Dr. Roy Khoueiry 1989-1992

Dr. Raymond Mallat 1992-1994

Dr. Hratch Hadjetian 1994-2001

Dr. Antoine Karam 2001-2003

Dr. Elie Yachoui 2003-present

MISSION, VISION AND VALUES

Mission

Our mission is to prepare students to become ethical business professionals and leaders with high moral values and with a deep knowledge of the global business environment. The Faculty also prepares its students to pursue their graduate education, in Lebanon and abroad. It places emphasis on developing its curricula and teaching methods to meet the standards of academic rigor and career orientation.

Vision

The vision of the Faculty of Business Administration and Economics is to be one of the leading business schools in the Middle East known for excellence in learning and for the ability to develop the academic, leadership and entrepreneurial capabilities for our students. The Faculty aims to provide our students with the educational experiences in an environment of technological sophistication and strong conceptual and practical orientations. The Faculty will emphasize the atmosphere that responds to the needs of our diverse student backgrounds.

Values

Consistent with those of the University, the FBAE is inspired by the following values:

- We are always driven by positive forces
- We are concerned by the public good
- We have full ability to act
- We are in continuous search for knowledge and spiritual values

- Students are our young partners
- We believe in a perpetual renewal of our academic life
- We help realizing talents and potential
- Hurdles make us stronger over time
- We accept differences and look for diversity
- We act to deserve international recognition
- We believe in the multiplication effect of teamwork.

FACULTY PROFILE

The primary objectives of the Faculty are:

- To serve the community by providing programs of study that are professionally oriented, comprehensive, relevant to today's business world, and of high standard.
- To prepare well-rounded business graduates who are equipped with analytical, quantitative, managerial and human skills to make sound and responsible decisions.
- To develop business graduates who are aware of the connection between business-management decisions and political, social, economic, legal, ethical, technological and environmental factors.
- To develop business graduates who are able to identify management and organizational problems, isolate critical factors, generate feasible alternatives and, after critical thinking and analysis, come up with the most appropriate solution.

Summary Of Degree Programs Offered

The Faculty of Business Administration and Economics consists of:

- Department of Accounting, Finance and Economics
- Department of Management and Marketing
- Department of Hotel Management and Tourism

The Department of Accounting, Finance and Economics offers programs leading to the degrees of Bachelor of Business Administration with emphasis on:

- Accounting areas: Accounting Information Systems, General Accounting, Management Accounting and Control, Auditing.
- Finance areas: Investment management, Corporate Finance, Real Estate, banking, Personal Financial Planning, General Finance.
- Economics

The Department of Management and Marketing offers programs leading to the degree of Bachelor of Business Administration (B.B.A.) and the degrees of Bachelor of Business Administration with concentrations on:

- Management
- International Business Management
- Marketing

The Bachelor's degree is a three-year and two-summer program of full-time study.

The Department of Management and Marketing also offers a program leading to the degree of Master of Business Administration (M.B.A.).

The Master's degree follows a two-year full-time program or its equivalent in part-time work.

The Department of Hotel Management and Tourism offers a program leading to the degree of Bachelor of Hotel Management and Tourism. This degree is a three-year and two-summer program of full-time study.

Undergraduate Degrees

Admission Procedures and Requirements

For admission procedures and requirements to the undergraduate degree programs offered by the Faculty of Business Administration and Economics, see the appropriate page numbers in this catalog.

Registration Procedure

For registration procedure for newly admitted and old students, late registration, course load, withdrawal from courses, and change of courses, see the appropriate page numbers in this catalog.

Undergraduate Degree Curricula

I. Bachelor of Business Administration (B.B.A.)

All candidates for the degrees offered by the Department of Accounting, Finance and Economics and the Department of Management and Marketing must satisfy the following curricula:

A- General Education Requirements

It is strongly believed that graduating business students should have a well-rounded education irrespective of their area of study. For this reason all candidates for a Bachelor's degree must complete a set of courses chosen from a wide range of academic disciplines: religion, English, environmental science, Arabic, computer science, psychology, sociology, history, and political science. The purpose of these courses is to provide basic skills which are essential to success, to clear communication orally and in writing, and to the breadth and depth of education.

B- Required Common Core courses

All candidates for the B.B.A. degree, irrespective of their area of concentration, must complete the following required common courses. These courses are designed to provide business students with basic management skills - quantitative, behavioral, and technical - which every manager should possess in order to meet the demanding requirements of modern business organizations and to be able to face new challenges. The courses are:

ACO	201	Principles of Accounting I ¹
ACO	202	Principles of Accounting II ¹
ACO	311	Managerial Accounting ²
BAD	201	Fundamentals of Management
BAD	311	Business Law
BAD	323	Software Tools for Bus. Application
BAD	453	e-Business
BAF	311	Principles of Financial Management I ¹
ECN	211	Principles of Microeconomics ¹
ECN	212	Principles or Macroeconomics ¹
ECN	333	Managerial Economics
MRK	201	Fundamentals of Marketing

¹ Minimum passing grade is C.

² Not required from majors in the Marketing and Management Department. Instead, it is substituted with BAD 433.

STA	206	Applied Statistics for Bus. and Eco. I
STA	207	Applied Statistics for Bus. and Eco. II
MAT	205	Math for Business and Economics II

C- Major Requirements

Those B.B.A. candidates should complete certain concentration courses specified by their respective departments. Together with the common required courses, these courses provide some depth in one particular area of business. For the courses required for each concentration, see the concerned degree requirements.

D- Free Electives

Business students have the opportunity to choose six credits offered by any Faculty to satisfy their non-business interests, diversify their background, and even be of additional business knowledge.

Internship Program

Internship provides an opportunity for business majors to test and utilize theories learned in the classroom. It gives valuable on-the-job experience, and facilitates finding employment. The internship should be related to the students' majors, and should consist of a specific project. Seniors are placed in the offices of cooperating firms under the supervision of staff of the firm. The student earns 1 credit. To earn this credit, the intern should work for at least 350 hours. He/she should keep a record for hours worked signed by his/her direct supervisor. He/she should present periodic reports and at the end of the internship, he/she should write a 10-page report on the internship, verified by the authorized supervisor. It is preferable to have the internship in the summer.

Additional details are available with the internship advisors.

II. Bachelor of Hotel Management and Tourism

All candidates to the degree of Bachelor of Hotel Management and Tourism must satisfy the following curricula:

A- General Education Requirements (30 cr.)

The general education requirements are the same as for the Bachelor of Business Administration, in as long as they contribute to widen the candidate's professional, societal and personal perspectives.

The following list shows the General Education Requirements (GER) for all students in the Faculty of Business Administration and Economics entering Fall 2008 and thereafter.

I. Communication Skills 9 cr.

English (6 cr.)

ENL 213: Sophomore English Rhetoric

And

 SOL 201: Intro to Sociology
 SOL 301: Introduction to Anthropology
 *BAD 201: Fundamentals of Management
 *ECN 200: Survey of Economics
 *ECN 211: Principles of Microeconomics
 *ECN 212: Principles of Macroeconomics
- IV. Citizenship** **3 cr.**
Choose one course (3 cr) of the following:
 HIT 211: History of Lebanon & the Middle East
 POS 201: Introduction to Political Science
 POS 210: Government and Politics in Lebanon
 POS 240: Law and Society
 IAF 301: Modern Political Ideologies
 COA 350: Current Issues
 POS 319: Democracy and Human Rights
 POS 337: Dialogue of Civilizations
- V. Science and Technology** **6 cr.**
Choose one course of the following
Mathematics/ Statistics/Computer Science (3cr.)
 CSC 201: Computer and their use
 MAT 201: Fundamentals of Mathematics
 MAT 204: Mathematics for Business and Economics I
Natural Sciences (3cr.)
 PHS 211: Principles of Physics

* Not for Business students

PHS 207: Development of Science and Technology
AST 201: Discovering Astronomy
CHM 211: Principles of Chemistry
ENS 201: Introduction to Environmental Science
ENS 202: Environment and Sustainable Development
ENS 206: Ecotourism
BIO 202: Mystery of Life
BIO 203: Discover Biology
HEA 201: Health Awareness
NTR 201: Basic Human Nutrition

B- Major Requirements

All candidates for the Bachelor of Hotel Management and Tourism degree have to complete a 17 3-credit courses as specified by the Department, 2 courses of Lab application, and an Internship to be preferably taken during the summer vacation. These courses provide the core Business, and Hospitality and Tourism operational skills needed prior to choosing a field of concentration.

C- Concentration Requirements

Consists of six 3-credit courses and 1 Internship depending on the chosen concentration and the candidates preferred sub-specialization. These courses are to equip students with advance knowledge in their future professional field.

D- Electives

In addition to the major requirements, candidates need to fulfill 3 credits as free electives according to their personal interests.

Academic Rules and Regulations

For complete and detailed information regarding academic rules and regulations for the undergraduate degree programs, students should refer to the appropriate page numbers in this catalog. The following additions and amendments pertain to the Faculty of Business Administration and Economics.

Repeating Courses

A student in the Faculty of Business Administration and Economics cannot register for a core or major course more than three times. At the third attempt, if the student still fails to get a passing grade, he/she should shift to another major or Faculty.

Academic Probation

A student in the Faculty of Business Administration and Economics will be placed on academic probation if at the end of a semester his/her overall GPA falls below 2.0/4.0.

Dropping a Major

A student in the Faculty of Business Administration and Economics who is on probation and fails at the end of a semester or summer session in two or more core and/or major courses, will be asked to change his/her major. Also, a student will be asked to change his/her major or Faculty if his/her GPA in the core and major courses drop below 2.0/4.0 for two consecutive semesters, provided he/she has completed 15 credits in the core and major courses.

Readmission

A business student who was asked to change his/her major or his/her Faculty of study due to poor performance in his/her major will not be readmitted in the same major or in the Faculty.

Change of Major

A change of major to the Faculty of Business Administration and Economics may be approved if the student meets the admission requirements and academic standards established by the Faculty. The student should follow the latest program of the new major.

Incomplete Grade

This grade is used only when the student, for reasons beyond his/her control, is unable to finish the work of the course, and there is reasonable expectation that he/she will successfully complete course requirements. If this grade is not resolved by the end of the eighth week of the following semester, the Registrar's Office will convert the "I" to "F". Granting "I" needs the prior approval of the Dean of the Faculty.

Graduate Degree – Master of Business Administration (MBA)

The graduate program of the Faculty of Business Administration and Economics was established in 1992. It was revised last in June 2004 to be effective for the Fall semester 2004. The program is designed to provide advanced business and management studies for students who have shown distinct academic ability and for practicing managers who aim at higher achievement in their present position.

The objectives of the program are:

- To provide advanced knowledge and skills in management and the capability to apply them;
- To develop the graduates' capacity for independent study and continued professional growth;
- To form graduates who are able to think logically and critically, and are able to apply analytical tools to decision making.
- To form graduates who can adapt to rapidly changing business and technological environments and are able to make flexible adjustments;
- To develop in graduates the desire for continued self-improvement.

Students may attend on a full-time or part-time basis. All the courses are offered after 4:30 p.m. to allow the student to complete the program on a part-time basis. The program is a two-year full-time course of study or its equivalent in part-time work.

Instructional methods include regular lectures, seminars, case studies, field work, and lectures by guest speakers.

Although the graduate program is designed as a terminal degree program, the graduates are well prepared to pursue higher degrees in business and finance.

Admission Procedure

For admission procedures to the graduate degree program offered by the Faculty of Business Administration and Economics, see the appropriate page numbers in this catalog.

Admission Requirements

MBA applicants are accepted based on their undergraduate GPA, work experience, and/or seminars or special business courses taken if applicable.

The MBA remedial courses are:

- ACO 500 Fundamentals of Financial Accounting
- BAD 500 Fundamentals of Management
- BAF 500 Fundamentals of Financial Management
- ECN 500 Fundamentals of Micro and Macro Economics
- HTM 500 Fundamentals of Hospitality Management and Tourism
- STA 500 Applied Statistics for Business and Economics

BBA holders with GPA above 3.0/4.0

- Applicants are admitted.

BBA holders with GPA between 2.7/4.0 and 2.99/4.0

- Applicants are admitted on probation, which means that after completing 12 credits the student should obtain a minimum cumulative GPA of 3.0/4.0, otherwise he/she will be dismissed from the program.
- Applicants may be required to take up to three remedial course(s) in which the student got a grade of C or below during his/her undergraduate studies. The student should obtain a minimum cumulative GPA of 3.0/4.0 on the remedial courses before he/she can pursue the MBA studies.

None BBA holders with GPA above 3.0/4.0

- Applicants are admitted with Remedial course(s). The student should obtain a minimum cumulative GPA of 3.0/4.0 on the remedial courses before he/she can pursue the MBA studies

None BBA holders with GPA between 2.7/4.0 and 2.99/4.0

- Applicants are admitted on probation, which means that after completing 12 credits the student should obtain a minimum cumulative GPA of 3.0/4.0, otherwise he/she will be dismissed from the program.
- Applicants should be assigned Remedial course(s). The student should obtain a minimum cumulative GPA of 3.0/4.0 on the remedial courses before he/she can pursue the MBA studies.

BBA and none BBA holders with GPA between 2.3/4.0 and 2.69/4.0

- Applicants are allowed to enroll as special student.
- The student will be given a minimum of 4 remedial courses. The student should pass the remedial courses with a minimum cumulative GPA of 3.0/4.0, otherwise he/she will not be accepted to the MBA program.
 - If accepted, the student should obtain a minimum cumulative GPA of 3.0/4.0 upon completing 12 credits, otherwise he/she will be dismissed from the program.
- Minimum professional work experience in the business field is a plus.
- Reputation of the university of origin.

The GMAT, Graduate Management Admission Test, should be taken prior to completing 18 credits. No Petitions are required prior to the 18 credits. Petitions may be submitted, studied and accepted on exceptional cases after completing 18 credits for one last additional semester.

***Applicants from institutions where English is not the language of instruction, a minimum of 600 in the English Entrance Test.**

Registration Procedure

For registration procedure to the graduate program, see corresponding pages in this catalog.

Graduate Degrees

Starting with Fall 2004, candidates for the MBA degree can pursue an MBA with a concentration in the following areas: Finance, Economics, Marketing, Management and Strategy, Hotel Management and Tourism, Human Resources Management, Project and Operations Management and International Management. For the non-thesis option, the student should complete 36 semester hours of regular course work plus a 3-credit research project. For the thesis option, the student should complete 33 semester hours of regular course work plus a six-credit thesis.

The details of the graduate degree curricula are given below.

Academic Rules and Regulations

For complete and detailed information regarding academic rules and regulations of the graduate degree programs, students should refer to corresponding pages in this catalog. The following additions and amendments pertain to the Faculty of Business Administration and Economics.

It is the responsibility of the graduate student to read and observe the academic rules and regulations set by the University and the Faculty. Ignorance of a rule or a regulation is not a justification for not applying that rule.

Course Load

The maximum course load for a full-time student is 12 credits per semester and for a part-time student 6 credits.

Academic Advisor

Each graduate student shall be assigned an academic advisor to assist him/her in the preparation of the plan of study and in selecting a supervisor for his/her thesis. However, it is the student's ultimate responsibility to insure that all graduation requirements are met.

Repeating Graduate Courses

A graduate course may be repeated only once. In the calculation of the student's cumulative GPA, only the higher grade is considered.

Dismissal from the Graduate Program

A graduate student will be dismissed from the program for one of the following reasons:

- Failure to remove probation at the end of the semester that follows the placement on probation.
- Getting two “F”s or three grades below “B”.
- Failing the research project or the thesis defense twice.

DEPARTMENT OF ACCOUNTING, FINANCE AND ECONOMICS

Designing a professional BBA program at the Department of Finance, Accounting, Finance and Economics (DAFE)

It is somewhat difficult to suggest a typical three years and a half program in Business, because each student's program should be specifically tailored to his or her needs and interest. This revised program in the DAFE lends itself easily to a certain degree of specialization, as is the recent trend with an increasing number of American Universities. Students considering graduate work in business, computer, law or engineering will find the training received in any of the different BBA degrees in the department to be quite valuable.

In Accounting, Finance, and Economics, the Department offers major Business/Economics elective courses for students who want to deepen and sharpen the focus of their major. In addition, students can pursue their course / job interest by working with their respective advisors on choosing faculty elective courses in the following areas: General Finance, Investment, Corporate Finance, Banking, Real Estate Finance, Financial Planning, Accounting Information Systems, General Accounting, Management Accounting and Control, Auditing, and Economics.

Graduate schools of business are now primarily looking for students' background that focuses on both writing and quantitative skills. Thus an appropriate business program would balance liberal arts and business contents, and the judicious use of mathematical concepts, methods, and techniques. The DAFE business curriculum provides such a program.

Not all courses listed in the suggested program below will necessarily be offered in any given semester, or year. New courses will be gradually offered when appropriate and when the human resources needs are secured.

In the required common courses, a new course, E-Business, is now added, a course which is a must for any business curriculum in these days. Also two Math courses for Business and Economics have been added because, as experience has shown, many of our incoming students are ill-prepared in Math.

Graduation Requirements

Students seeking the degree of Bachelor of Business Administration – Finance, Accounting, Economics, Financial Engineering or Energy Economics Concentrations must complete a total of 106 credits with an overall average of at least 2.0/4.0 and a minimum average of 2.3/4.0 in the common core and major requirements. These 106 credits are divided into: General Education Requirements, Common Core Requirements, Major Requirements, Faculty Electives, Free Electives. In addition, the passing grade for Principles of Accounting I and II, Principles of Microeconomics and Macroeconomics, and Principles of Financial Management I, is "C". The passing grade for remedial Math courses is "C". Students are strongly advised to plan in advance their courses for the entire program.

Admissions Requirements

Applicants must pass the Lebanese Baccalaureate Part II (Any Strand) or its equivalent as identified by the Lebanese Ministry of Education. They are required to sit for an English Entrance Test (EET) or TOEFL. Mathematics Entrance Exam Test is required from all High School students. Upon the Entrance Exam results accepted students may be assigned MAT 001 and / or MAT 100 and / or MAT 105 by the Admissions Committee in light of their scores on the Math entrance exam.

The Degree of Bachelor of Business Administration (BBA)

Objectives

The purpose of the Bachelor of Business Administration BBA is to provide students with the skills necessary to meet the Business demands of the future in a variety of organizational settings. Specifically, a graduate of this major should be able to:

- Develop initial thinking, analytical, problem solving, and decision making skills.
- Develop human relation skills and successfully apply those skills to a variety of business situations.
- Evaluate and use professional literature.
- Understand the international arena and its place in current business environment.
- Know the components of continuous business process improvement.
- Increase individual knowledge and understanding of self and other in the work environment.
- Develop the ability to plan, organize, direct and control within an organizational environment.
- Understand how modern business functions.
- Develop specific business skills (e.g. Economics, Accounting, Finance, etc...) critical to effective and efficient management.

General Description

A degree in Bachelor of Business Administration in the Department of Accounting, Finance and Economics requires 106 credit hours. No minor or second major is required. A common body of knowledge is required of all students majoring in the Department of Accounting, Finance and Economics. Students are required to supplement the required courses with a number of Business and non-business elective courses. By carefully selecting these elective courses, students may develop a program of study that fits with their interests and career preparation needs. In order to maximize the benefits of their program, students are strongly encouraged to work closely with their assigned advisor in developing their program of study.

If students are unsure of career goals, as a Business Administration student you will have an opportunity to take a variety of business courses to see what type of work might appeal to you most.

Career Opportunities

The career opportunities for Finance, Accounting and Economics majors are varied and challenging. The program of study prepares graduates for decision – making positions in both the public and private sectors. So many graduates accept positions within the banking industry, including local and international commercial banks and governmental agencies. The majority of these opportunities require indepth knowledge of finance and a solid foundation in analytical and communication skills. Graduates have also found career opportunities with major corporations and private enterprises here in Lebanon and specially in the Gulf countries. Below are just a few of the careers from which students may choose:

Finance

- Corporate Financial Manager
- Commercial Bank Officer
- Financial Planner
- Management Consultant
- Financial Analyst
- Investment Manager
- Bank Examiner

- Credit Analyst
- Loan Officer
- Real Estate Appraiser and Broker
- Estate Management Officer
- Real Estate Developer
- Real Estate Consultant
- Stockbroker
- Mortgage lending
- Insurance: sales representative
- Securities: sales representative
- Investment counselors

Accounting

- Corporate Accountant
- Public Accountant
- Tax Accountant
- Auditor
- Accountant Consultant
- Tax Reporter and Planner
- Accounting System Designers
- Accounting System Auditors
- Industrial Accountants

Economics

- Economics Department of Large Corporations
- Government and Government Agencies; Departments of treasury, agriculture and labor
- Career in Financial Institutions
- Career in Research and Consulting Firms
- Career in the Central Bank as bank examiner and the Public Sector inside and outside Lebanon such as Foreign Service

Energy Economics

- Governments
- Utilities
- Energy companies
- Consulting firms
- Organizations concerned with energy

Financial Engineering

- Financial Market as dealers
- Foreign Exchange Firms
- Financial Risk Analysis and Management
- Stock-Brokering
- Training Management
- Portfolio Management
- Mergers and Acquisitions
- Investment Analysis
- Central Banking
- Banking
- Financial Product Development
- Insurance Companies

- Diversified Financial Services Companies

Activities

Faculty members at the Department of Accounting, Finance and Economics believe it is important to expose you to a variety of practical and theoretical aspects of business, then give you an opportunity to apply your newly gained knowledge in business situations.

For that reason, the Department along with the Student Affairs Office, sponsor student organizations. In addition the Department uses faculty help to place students in internships, and invites visiting executives and scholars to campus.

Being involved in organizations will allow students to plan, budget and share responsibilities for projects and events. You can learn to manage meetings, deal with conflict, motivate peers of different personalities, express opinions and follow through to the last detail. Student organizations also provide the opportunity to start networking with business professionals and to meet students with similar interests.

As students progress in their studies, they will participate in an internship. Internships give students an opportunity to apply classroom knowledge in a variety of part-time, business – related jobs. Students might be placed in an entry – level position in a bank, corporation or insurance company. Following graduation, some students find full-time positions with the companies that sponsor their internships.

The Degree of Bachelor of Business Administration – *Banking and Finance*

The major in Banking and Finance is designed to develop an understanding of the financial aspects of the contemporary economy, the operations of financial institutions and markets, and the financial management of business operations. The major develops analytical skills in the planning, management and control of financial resources to achieve the financial goals of the organization. Central to this task is the evaluation of the risk and return consequences of finance decisions. The major financial decisions studied are selection of assets, (equipment, buildings, inventories, securities, etc,...) and among financing alternatives (selling stock, borrowing from a bank, issuing bonds, etc...)

Banking and Finance majors will become familiar with computer applications in finance, and will know how to access and utilize financial information; they are increasingly taking and passing the Chartered Financial Analysts (CFA) examination and the Certified Financial Planner (CFP) examination. The program in Finance and related fields provide the practical and theoretical background needed to succeed in the dynamic and fascinating world of domestic and international finance.

BAF 312, BAF 315, BAF 321, BAF 433, BAF 438, BAF 450, BAF 481

Choose two (2) Faculty Elective Courses from the following:

BAF 317, BAF 319, BAF 325, BAF 352, BAF 421, BAF 452, BAF 444, BAF 461, BAF 485, ACS 310, ECN 313, ACO 411, BAD 425, ECN 431, ECN 435.

Free Electives **6 cr.**

Students are free to choose any six (6) credits offered by the university.

Note: In rare cases graduating students may petition to substitute one business course for another, if the required business course is not offered in any one semester.

The Finance major highlights six (6) areas where students, along with their respective advisors, can develop their business elective courses in a way to meet their potential job / career requirements. The following six areas are:

- Investments Management (*IM*)
- Corporate Finance (*CF*)
- Real Estate Finance (*REF*)
- Banking (*B*)
- Personal Financial Planning (*PFP*)
- General Finance (*GF*)

All Banking & Finance majors must complete an Internship course which provides field experience prior to graduation.

Investment Management (IM) has been revolutionized by rapid advances in computerization. Modern investment theory of portfolio selection, asset pricing models, pricing of options and other derivative securities, and views on the efficiency of security markets have contributed to major improvements in investment management practice.

Other Finance majors can choose the elective courses to meet the requirements of career such as *Corporate Finance (CF)* Corporate financial officers oversee the efficient allocation of funds within enterprises and borrow funds on the most favorable terms possible through banks, corporate commercial papers, bonds, or new stock issue. Corporate financial managers examine corporate policies toward dividends, debt leverage, and agency conflicts between firm stakeholders.

The *Real Estate (RE)* courses deal with the acquisition, ownership and management of real assets such as shopping centers, office buildings, industrial parks, and housing. Majors acquire broad, multidisciplinary background designed to make them effective in controlling assets with significant wealth. Knowledge of financial management is initial to the success of any real estate activity – brokerage, development, property management or mortgage lending. Throughout the various areas of real estate and finance, there exists a natural interrelationship between the two disciplines. The Real Estate major prepares students for a broad range of international careers in consulting, trust and estate management, appraisal, brokerage, real estate development and government.

The banking industry has undergone massive transformations due to competition from non-bank financial institutions. The *Banking (B)* area of interest is established to provide the Banking community with timely Research and source of new employees who recognize the specialized needs of financial institutions and the banking industry.

NDU banking courses provide students with the necessary qualifications and preparation to meet the industry new demands. NDU students, with their knowledge of more than one language, are ideally qualified for employment in international banking. Banking and Finance graduates assume increasingly responsible positions over time and move up the management ranks.

Financial services are one of the most rapidly growing and dynamic fields in finance. It includes Banking, Securities, Insurance and Personal Financial Planning. *Personal Financial Planning (PFP)* is a new service industry which has sprung from its insurance, securities and banking roots to become an important link between a variety of individuals and businesses and the broad spectrum of finance information. Students interested in working directly with people to organize their finances and plan for their financial futures should consider a major in Personal Financial Planning. Students need to know about all areas of business and finance and they must be able to deal with quantitative measures and information, as well as understand sophisticated theoretical concepts.

In the *General Finance (GF)* field, students can choose courses among several courses. By carefully selecting these courses, students may develop a program of study that fits with their interests and career preparation needs. In order to maximize the benefit of their programs, students are strongly encouraged to work closely with their assigned advisor in developing their program of study.

Minor in Finance (15 credits)

A Minor in Finance will provide students with a broad understanding of the principles and practices needed to make financial decisions in corporations. The student who graduates with a minor in Finance will be able to:

- Master the current methods for analyzing, interpreting, and reporting financial information
- Estimate short-and-long terms financing needs
- Prepare and analyze capital budgeting projects
- Describe the different dimensions of international finance and trade
- Think critically, analyze information, and solve problems related to complex financial crises
- Use computers and financial software for financial analysis and presentation

Students are required to use the following table:

Suggested Program:

First semester

ACO 201: Principles of Accounting I

Second semester

BAF 311: Principles of Financial Management I

Third semester

BAF 312: Principles of Financial Management II

Fourth semester

Two minor elective courses

Undergraduate Courses: Banking and Finance

BAF 311 Principles of Financial Management I (3.0); 3 cr. An introduction to the role of the financial manager and to the techniques for obtaining and using funds to maximize the value of the firm. Topics covered include: discounted cash-flow analysis; valuation methods; risk and rates of return; financial analysis and forecasting; financial planning and control; working-capital policy; cash and marketable securities management. The passing grade for this course is "C". *Prerequisites:* ACO 202, STA 206.

BAF 312 Principles of Financial Management II (3.0); 3 cr. This course is the continuation of BAF 311. Topics covered include: capital budgeting techniques; project cash flows and risk; the cost of capital, capital structure and leverage; dividend policy; common stock financing; long term debt; short-term financing; inventory and credit management. *Prerequisite:* BAF 311.

BAF 315 Financial Institutions and Markets (3.0); 3 cr. An introduction to the objectives and roles of various financial institutions and markets. Topics covered include: various financial intermediaries and their function in the economy; determination of interest rate levels; financial markets; financial claims; distribution channels for financial products; performance analysis and foreign exchange. *Prerequisite:* BAF 311.

BAF 317 Personal Financial Planning: Concepts and Principles (3.0); 3 cr. Designed to serve the personal finance needs of students regardless of their major fields. Practical applications in personal and family financial problems planning, including credit money management, buying, borrowing, banking, insurance, savings, investments, taxation, estate planning and home ownership. Discusses the method integrating these disciplines into an overall financial plan tailored to individual needs. *Prerequisite:* BAF 311, Junior Standing.

BAF 319 Estate Planning Techniques (3.0); 3 cr. This course, which is complementary to Personal Financial Planning, concentrates on taxation and estate planning. These concepts are applied to special situations and techniques are described for minimizing taxes and achievement of client objectives. Planning for retirement plan distributions also is explored. Tax system is described covering both estate and gift taxes.

Further management of property and its disposition is described with use of such tools as of wills and wills substitute such as life insurance. This course also reviews various business structuring and the special issues associated with creation, retention or disposition of a business interest in a family's financial planning. *Prerequisite:* BAF 317.

BAF 321 Fundamentals of Investments (3.0); 3 cr. Principles and practices involved in the field of investment. Topics covered include: sources and determination of holding period; determination of security prices; capital asset pricing models; portfolio selection problems; investment companies. *Prerequisites:* BAF 312, STA 207.

BAF 325 Real Estate Principles (3.0); 3cr. Deals generally with urban real estate with emphasis on principles and practices of the real estate business. The course will include discussion of markets and methods of financing real property. An investment strategy will be developed. The real estate market in Lebanon will be emphasized. *Prerequisite:* BAF 312.

BAF 352 Commercial and Investment Banking (3.0); 3 cr. This course is designed to equip students with principles and tools which allow them to tackle realistic risk management problems associated with financial institutions. Another objective is to provide students with an understanding of the fundamental principles and concepts that underlie the Investment Banking process including market making, underwriting, and syndication. Also this course will examine recent trends in regulations and product innovation by both commercial and investment banks. This includes origination, underwriting, and distribution of new securities to the public. In addition formulation of objectives and policies of banks are discussed, including management of assets & liabilities, sources and uses of funds, administration of reports and loans and evaluation of bank performance. *Prerequisites:* BAF 312, BAF 315.

BAF 421 Advanced Investment Finance (3.0); 3 cr. An advanced level treatment of current theory and practice relating to contingent securities, speculative markets and portfolio management issues. Emphasis on recent innovations and developments in financial markets, including options, futures and portfolio insurance, etc... *Prerequisite:* BAF 321.

BAF 433 International Business Finance (3.0); 3 cr. Discussion of the environment and problems facing a financial manager in a multinational enterprise. Topics covered include: balance of payments; foreign exchange markets; transactions and operating exposure; financing of international trade; international financial markets; risk evaluation in foreign direct investments; international banking. *Prerequisites:* BAF 311, ECN 212.

BAF 438 Credit Analysis and Commercial Lending (3.0); 3 cr. Focuses on how organization of the commercial lending business contributes to bank profitability; covers the commercial lending process from the initial loan request through collection. Topics include loan interviewing and credit investigation, credit analysis, structuring and negotiation, documentation and closing, problem loans, and follow-up. Also examination of analytical techniques to assume the role of credit officer. *Prerequisite:* BAF 315 & BAF 321.

BAF 444 International Banking (3.0); 3 cr. Internationalization of banks to meet the global financial needs of multinational activities. Theory and practice of international banking; subjects include current international monetary and financial environment and typical problems of international banking from a management perspective. Interaction with international financial markets and financial centers. *Prerequisite:* BAF 312.

BAF 450 Futures and Options (3.0); 3 cr. Provides an introduction to financial futures such as currency futures, swaps and interest rate futures. Explore the markets on which they are traded. Also analyzes pricing of options and other derivative securities. Includes the leverage and risk aspects of options. *Prerequisite:* BAF 321.

BAF 452 Financial Modeling (3.0); 3 cr. This course is wrap-up of financial, statistical and computational concepts and techniques needed in the field of Financial Engineering and Computational Finance. Topics include: Introduction to Financial programming in VB, overview of statistical techniques used in Finance (Regression, Time Series, Sampling, Data Analysis), and overview of financial concepts, such as financial price simulation, and cash flow maps. *Prerequisites:* BAD 323, BAF 321.

BAF 461 Special Topics in Finance (1.0 - 3.0); 1-3 cr. Various topics in Finance are considered. They will vary depending upon recent developments in the field and upon the research interests of the instructor. The topics to be included are announced at the time of the course offerings, offered only when faculty are available and sufficient student interest exists. *Prerequisite:* Senior Standing.

BAF 481 Finance Internship; (1.0) 1 cr. Interns will have the opportunity to develop new and practical skills by working under the direction and supervision of an experienced practitioner. The internship will be done in cooperating and department approved firms. A minimum of 150 hours of internship is required. *Prerequisite:* Senior Standing.

BAF 485 Advanced Corporate Finance (3.0); 3 cr. This course is about corporate financial management from the stand point of the general manager. Integration of financial operations with other operations of a business unit, including working capital management, financial planning and financial control, capital budgeting, the theory of corporate finance. *Prerequisite:* Senior Standing.

The Degree of Bachelor of Business Administration (BBA)

Financial Engineering Emphasis

Financial Engineering is the application of the mathematical tools and computational methods commonly used in engineering to financial problems, especially the pricing and hedging of derivative instruments. It involves the development and creative application of financial theory and Financial instruments such as forwards, futures, swaps, options and related products to structure solutions to complex financial problems and to exploit Financial opportunity.

Financial Engineering is not a tool, It is a profession that uses tools, of which derivatives are one. Importantly, the term “Analysis” means to “decompose in order to understand”. The term “Engineering” means “Build”.

Undergraduate Courses: Financial Engineering

FEN 431 Fixed Income Securities (3.0); 3 cr.

This course provides a quantitative approach to fixed income securities and bond portfolio management. Topics include: Bond Valuation, Duration, yield curve and term structure measurement and theory, mortgage backed securities, as well as interest rate models (Vasicek and Cox Ingersoll Ross). *Prerequisite:* BAF 421.

FEN 442 Financial Risk Management (3.0); 3 cr.

This course explores various aspects of financial risk management, including credit risk, market risk and operational risk. Emphasis is on quantitative measurement techniques, covering value at risk, dynamic portfolio distribution and extreme value analysis. *Prerequisite:* Senior Standing.

FEN 455 Advanced Derivatives Models (3.0); 3 cr.

This course focuses of efficient implementation of advanced derivative models

aimed at pricing and hedging derivative securities. Pseudo codes and algorithms will be studied and programming application developed using VB. Topics include: Black-scholes implementation, trees construction (binomial and trinomial trees), Monte Carlo application to option pricing and implied volatility, and advanced interest rate models, (Ho and Lee, Hulland White, Black-Derman, Toy, Heath-Jarrow-Morton). *Prerequisites:* BAF 450, CSC 216.

FEN 463 Computational Finance and Simulation (3.0); 3 cr.

This course provides the computational skills required in the field of Financial Engineering. Students will learn how to program financial models and develop simulations using VB. *Prerequisites:* CSC 372, BAD 323.

The Degree of Bachelor of Business Administration – Accounting

The major in Accounting is designed to provide students with the opportunity to acquire the basic and advanced knowledge of accounting theory and practice in addition to the analytical skills and tools essential to a solid business education. Courses are designed to enable a student to understand the intellectual threads of modern accounting and its interrelationship to the various fields of business and management.

Accounting majors are increasingly taking and passing the Certified Public Accountant (CPA) Certified Management Accountant (CMA) and Certified International Audit (CIA) examinations through training in Accounting and related fields. It provides the practical and theoretical background needed to succeed in the dynamic and fascinating world of Accounting.

Degree Requirements (106 credits)

General Education Requirements **30 cr.**

Required Common Core Courses **45 cr.**

Major Requirements **25 cr.**

ACO 323, ACO 313, ACO 411, ACO 413, ACO 421, ACO 48, BAF 312,

Choose two (2) faculty elective courses from the following:

ACO 314, ACO 321, ACO 350, ACO 406, ACO 414, BAD 429, BAD 431, BAF 452, BAF 485, CSC 221, CSC 315, CSC 321

Free Electives **6 cr.**

Students are free to choose any six (6) credits offered by the university.

Note: In rare cases graduating students may petition to substitute one business course for another, if the required business course is not offered in any one semester.

The accounting major highlights four (4) areas where students along with their respective advisors can develop their business elective courses in a way to meet their potential job / career requirements. The following four areas are::

- Accounting Information Systems (AIS)
- General Accounting (GA)
- Management Accounting & Control (MA&C)
- Auditing (A)

All Accounting majors must complete an internship course which provides field experience prior to graduation.

The *Accounting Information Systems (AIS)* field was developed in response to employers indicating an increased need for accounting majors with computer expertise.

The AIS program prepares students for career opportunities in the field of accounting systems design, accounting systems management and accounting systems auditing and other systems – related areas of accounting. Electronic processing of financial transactions is now the norm in small and large businesses alike. Accountants must be prepared to design, select, install and configure numerous accounting applications such as accounts receivable and billing systems, human resources management systems, and financial reporting systems.

Other Accounting majors may choose business elective courses meeting the track of *General Accounting (GA)*. This field is designed to provide graduates with the knowledge and skills necessary to enter professional careers leading to an accounting designation or entry – level positions in accounting. Students can expect to develop conceptual and technical accounting competence and analytical abilities.

The *Management Accounting & Control (MA&C)* field of concentration was established to better serve the needs of students interested in industry or government. Typically, careers begin in one area of a company but soon involve work in a number of different functions within the organization such as the Controller's Department, Internal Audit, Treasury and Finance, Cost Accounting, planning and budgeting, etc... The purpose of the required courses in this track is to give students an understanding of these areas and the basic skills required to successfully enter the organization in any of these positions.

This track is distinct, because it gives an increased emphasis on understanding the role of Accounting and in assisting management with decision making and organizational control as well as producing necessary information for external reporting.

The *Auditing (A)* field of concentration is designed for students who desire to reach the top levels in public accounting. It provides the students with a strong technical and theoretical background which is helpful in solving today's complex auditing and reporting problems.

Second semester

ACO 202: Principles of Accounting II

Third semester

Two minor electives

Fourth semester

One minor elective

Undergraduate Courses: Accounting

ACO 201 Principles of Accounting I (3.0); 3 cr. Introduction to the basic principles, concepts, and techniques of financial accounting. Explanation of the basic techniques of measuring, classifying, summarizing, reporting, and interpreting financial information. The passing grade for this course is “C”.

ACO 202 Principles of Accounting II (3.0); 3 cr. A continuation of ACO 201. Explanation and understanding of more advanced procedures of accounting for partnerships, corporations, long-term debts and marketable securities. Includes use of accounting software. The passing grade for this course is “C”. *Prerequisite:* ACO 201.

ACO 311 Managerial Accounting (3.0); 3 cr. Fundamental managerial accounting procedures and techniques used in management decision-making. Topics covered include: cost types; cost behavior patterns; cost-volume-profit relationships; budgeting and planning; and performance evaluation. *Prerequisite:* ACO 202.

ACO 313 Intermediate Accounting I (3.0); 3 cr. An in-depth study of accounting theory and concepts. Topics covered include: issues related to recording revenues, assets, liabilities and equity structure. *Prerequisite:* ACO 202.

ACO 314 Intermediate Accounting II (3.0); 3 cr. This course is the continuation of ACO 313. Topics include: handling of long-term investments, stockholders’ equity, accounting for leases, analysis of financial statements, and other accounting topics. *Prerequisite:* ACO 313.

ACO 321 Cost Accounting (3.0); 3 cr. In-depth study of the procedures for gathering cost information. Topics covered include: mixed cost analysis; relevant costs; capital budgeting; and decision models. *Prerequisite:* ACO 311.

ACO 323 Accounting Information Systems (3.0); 3 cr. Examination of the systems for collecting and processing data necessary in planning, decision-making, and the control of business organizations. Includes use of accounting software packages. *Prerequisites:* ACO 202, CSC 201.

ACO 350 Corporate Financial Reporting (3.0); 3 cr. This course covers the financial reporting system, principal financial statements other sources of financial information, statement of cash flows, foundations of ratio and financial analysis, analysis of business combinations,

analysis of multinational operations, valuation and forecasting. *Prerequisite:* BAF 311.

ACO 406 Government and Non-Profit Accounting (3.0); 3 cr. Principles, procedures and ethics of financial reporting for non-profit organizations including state & local government. Includes the use of funds, budgets appropriations and encumbrances as means of control. *Prerequisite:* ACO 313.

ACO 411 Taxation (3.0); 3 cr. Application of the Lebanese income taxes to business entities and its reporting procedures. Also discussion of the issues related to the Lebanese accounting system such as multi-currency transactions, chart of accounts and closing procedures. *Prerequisite:* Senior Standing.

ACO 413 Auditing I (3.0); 3 cr. This course covers the functions and work of the independent auditor. Topics include: the auditing profession, the professional ethics auditor liabilities, overview of the audit process including the audit evidence, objective, audit program, working papers, planning audit, materiality and risk, post audit and reporting on audited income statement. *Prerequisite:* ACO 202.

ACO 414 Auditing II (3.0); 3 cr. This course is the continuation of Auditing I. This course provides a thorough understanding of the detailed audit procedure, audit planning, complete audit and post audit. The audit covers cash changes (cash flow) assets, inventory, accounts receivable, accounts payable, fixed assets, auditing revenue cycle, other services and reports and assurance services. *Prerequisite:* ACO 413.

ACO 421 Advanced Accounting (3.0); 3 cr. A comprehensive study of financial accounting for partnerships, branches, business combinations, and the reporting of consolidated financial statements. Also discussion of accounting for non-profit organizations. *Prerequisite:* Senior Standing.

ACO 481 Accounting Internship (1.0); 1 cr. Interns will have the opportunity to develop new skills by working under the direction and supervision of an experienced practitioner and acquiring practical skills. The internship will be done in cooperating and department approved firms. A minimum of 150 hours of internship is required. *Prerequisite:* Senior Standing.

The Degree of Bachelor of Business Administration (BBA) - *Economics*

The Economics Major is designed to provide the student with an understanding of the principles and institutions governing economic decisions made by Households, Businesses and Governments. This type of knowledge combined with studies in related areas, provides an appropriate background for employment in financial and non-financial business firms and governmental agencies. It also provides a solid basis for graduate study in economics, business and public administration, international studies, urban planning and law.

Degree Requirements (106 credits)

³ Major Requirements

Minor in Economics (15 credits)

A Minor in Economics is to provide students with the analytical tools which will enable them to apply economic reasoning to problem solving in business, economic and political issues.

A Minor in Economics is an excellent choice for business, political science, public administration and diplomacy majors.

A student who graduates with a minor in economics should be able to :

- Understand the decision making mechanisms of households and firms.
- Understand and analyze economic data.
- Use computers and statistical packages to manipulate, read and interpret data.
- Evaluate the role of the government in the economy .

Students are required to use the following table:

Course #	Description	Credits	Prerequisite
ECN 211	Principles of Microeconomics	3	
ECN 212	Principles of Macroeconomics	3	
ECN 431	International Economics	3	ECN 211, 212

Total		15 cr	

Suggested Program:

First semester

ECN 211: Principles of Microeconomics

ECN 212: Principles of Macroeconomics

Second semester

Two minor elective courses

Third semester

One minor elective course

Undergraduate Courses: Economics

ECN 200 Survey of Economics (3.0); 3 cr. Survey of microeconomics and macroeconomics principles for non-Business Administration students. Students cannot receive credit for both ECN 200 and ECN 211 or ECN 212.

ECN 211 Principles of Microeconomics (3.0); 3 cr. An introduction to economic concepts, principles, and microeconomics analysis. Topics covered include: demand and supply analysis; consumers' choice; production and costs; price and output determination under different market conditions; and pricing of factors of production. The passing grade for this course for DFAE students only is "C".

ECN 212 Principles of Macroeconomics (3.0); 3 cr. An introduction to macroeconomics analysis. Topics covered include: national income determination; money and banking; unemployment and inflation; fiscal and monetary policy; international trade and finance. The passing grade for this course for DFAE students only is "C".

ECN 313 Introduction to Econometrics (3.0); 3 cr. The classical linear regression model and the multiple regression model in matrix form; the criteria for estimators; multicollinearity, serial correlation, heteroscedasticity; identification and estimation of simultaneous equation models and applications. *Prerequisites:* ECN 211, 212, STA 207, and MAT 205.

ECN 314 Applied Econometrics and Time Series (3.0); 3 cr. The main purpose of this course is to provide a comprehensive treatment of econometric techniques applied in time series models. Topics include: stationary and non-stationary time series models, modeling economic time series, multiequation time series models, notation and interpretation of ARIMA models, forecasting,... An interactive econometric software package is used: Data-Fit or TSP (Time Series Processing). *Prerequisite:* ECN 313.

ECN 321 Intermediate Microeconomic Analysis (3.0); 3 cr. Theory of the firm and consumer. Topics covered include: maximizing behavior of consumers; business firm behavior in price and output decisions under different types of market structures; factor price determination; welfare implications of marketplace performance. *Prerequisites:* ECN 211, ECN 212.

ECN 323 Intermediate Macroeconomic Analysis (3.0); 3 cr. Macroeconomics theory and policy. Topics covered include: measurement of aggregate economic activity; theories of inflation and unemployment; Monetarist-Keynesian-Rational Expectation controversy; business cycles; fiscal and monetary policies. *Prerequisites:* ECN 211, ECN 212.

ECN 325 Labor Economics (3.0); 3 cr. An analytic study of the labor market. Topics covered include: labor force participation and composition; human capital theory; wage determination; demand for and supply of labor; trade-unions; collective bargaining; public policy and unemployment; and the economics of discrimination. *Prerequisites:* ECN 211, ECN 212.

ECN 327 History of Economic Thought (3.0); 3 cr. A study of origins and development of economic thought from mercantilism to the present. *Prerequisites:* ECN 211, ECN 212.

ECN 333 Managerial Economics (3.0); 3 cr. Application of economic analysis to business problems. Topics covered include: risk analysis; theory of consumer choice; estimation and analysis of demand, production and cost functions; forms of competition; pricing techniques; profits; game theory. *Prerequisites:* ECN 211, STA207.

ECN 431 International Economics (3.0); 3 cr. Theoretical and policy approach to the study of international trade and finance. Topics covered include: trade theory; instruments of commercial policy; trade policy in developing countries; economic integration; foreign exchange markets; balance of payments; international monetary system; world debt crisis. *Prerequisites:* ECN 211, ECN 212.

ECN 432 Urban Economics (3.0); 3 cr. An introduction to the existence and growth of cities, and the application of economic principles to the major problems of the modern urban community. Topics covered include: reasons for the existence of cities; market forces in the development of cities; urban economic growth; land rent and land use; land use controls and zoning; causes of poverty and public policy; housing problems and policies; urban transportation; autos and highways; mass transit; education and crime; discrimination; programs

for alleviation or solution of urban problems. *Prerequisite:* Senior standing.

ECN 434 Environmental and Natural Resource Economics (3.0); 3 cr. An introduction to the natural resource and environmental economics, and sustainable development. Topics covered include: introduction to resource and environmental economics; ethical foundations of environmental economics; economic concepts and analysis for examining natural resource use; the valuation of environmental resources; the population problem; sustainability and sustainable development; depletable, recyclable, non-recyclable, replenishable, storable, renewable and reproducible resources; the efficient and optimal use of environmental resources; the economics of pollution and pollution control policy; international and global environmental pollution problems. *Prerequisite:* ECN 321.

ECN 435 Monetary Theory and Policy (3.0); 3 cr. A study of the development of monetary theory and policy. Topics covered include: demand for and supply of money; nature of the Monetarist-Keynesian-Rational Expectation controversy; policy coordination; government monetary policy; inflation and unemployment; international constraints; empirical verification of some theories. *Prerequisites:* ECN 211, ECN 212.

ECN 436 Public Finance and Fiscal Policy (3.0); 3 cr. This course examines the economics of the public sector. It has two broad topics: government expenditures and revenues. Topics include: market failures and optimal taxation;

cost/benefit analysis of government projects; income redistribution and poverty programs; political economy and voting; the economics of local governments; budget deficits, inflation and the lack of adequate financing in the developing countries; tax systems with special emphasis on the Lebanese case. *Prerequisites:* ECN 321.

ECN 437 Contemporary Economic Systems (3.0); 3 cr. An examination and comparison of the organization, operation and performance of contemporary economic systems. Also study of the changing pattern of ideologies and practices. *Prerequisites:* ECN 211, ECN 212.

ECN 439 Economics of Developing Countries (3.0); 3 cr. A study of the economics of developing countries. Topics covered include: meaning of underdevelopment; historical patterns of economic change in the developing countries; population problems; obstacles to development; role of industry and agriculture; inequality of income and wealth distribution; economic planning; foreign aid and indebtedness. *Prerequisites:* ECN 211, ECN 212.

ECN 481 Seminar in Economics (1.0); 1 cr. An in-depth study of a selected topic in theoretical or applied economic. Students have to present a term-paper on a Lebanese government economic institution. With the permission of the instructor, students may repeat this course if topics vary. *Prerequisite:* Senior standing.

The Degree of Bachelor of Business Administration (BBA)

Energy Economics Emphasis

The energy sector is a large and very important component of the Lebanese and Middle Eastern economies. It encompasses many aspects such as exploration, development, processing, production, transportation, marketing and distribution of energy. Energy economics, which is a new of the existing brand of Economics at NDU, integrates the discipline of Economics with energy.

The program is intended to offer students a broad working knowledge of the energy industry and to provide them with the necessary tools to understand its structure and functional elements. In addition, the program provides the student with the historical and Institutional background and the basic tools necessary for an understanding of the operations of world energy markets.

¹ Common Core Requirements

² General Education Requirements

³ Major Requirements

Undergraduate Courses: Energy Economics

ENR 201 Introduction to Energy Economics (3.0); 3 cr. Introduction to energy markets, industry, and economics. Topics covered include: world energy industry; energy markets; industrial and household consumption of energy; trends in world energy markets; energy cycles and crises; energy and economic development; population growth and energy; valuation of energy sources; efficient and optimum use of energy. *Prerequisite:* ECN 321.

ENR 305 Oil and Gaz: From Exploitation to Transportation (3.0); 3 cr. The first part of the course is a survey of the basic principles, procedures, phases, and technologies of oil and gaz production. It deals with transforming crude oil and natural gaz into finished and semi-finished products. It also deals with the basics of refining process and technologies. The second part of the course is an overview of modes and equipments for local and international transportation of oil and gaz. The transportation industry is a wide and diversified fixed of knowledge. This course, however, will tackle specific areas, like time and cost efficient modes of transportation of oil and gaz, transportation regulatory environment, documentation, customs brokers, etc. *Prerequisite:* ENR 201.

ENR 401 Petroleum in the World Economy (3.0); 3 cr. Examination of the structure of the world petroleum industry. Topics covered include: introduction to petroleum industry; market structure; trends in world petroleum markets; demand and supply of petroleum; cost

of production of petroleum; petroleum prices; cartels; petroleum cycles and crises; petroleum policies and strategies. *Prerequisite:* ECN 321.

ENR 405 The Economics of Natural Gas (3.0); 3 cr. Examination of the structure of the world natural gas industry. Topics covered include: introduction to natural gas industry; market structure; trends in world natural gas markets; demand and supply of natural gas; natural gas prices; natural gas policies and strategies. *Prerequisites:* ENR 201, ECN 321.

ENR 410 Solar and Water Energy Economics (3.0); 3 cr. It gives familiarity with the terms, concepts, components, costs and economics of solar and water energy. Topics include: market structures, demand and supply, pricing and strategies. *Prerequisites:* ENR 201, ECN 321.

ENR 452 Applied Energy Economics within International Energy Institutions (3.0); 3 cr. Application of theoretical knowledge of energy economics in energy organizations and institutions concerned with Energy. It applied economic tools to analyze energy institutions like OPEC, OAPEC, GCC, WEC, and IEA.

ENR 461 Selected Topics in Energy Economics (1.0); 1 cr. Various topics in Energy are considered. They will vary upon recent development in the field. *Prerequisite:* Senior Standing.

DEPARTMENT OF MANAGEMENT AND MARKETING

Chairperson: *Dr. Atef Harb*

Secretary: *Mrs. Grace Kanaan*

Minor in Management (15 credits)

In response to great demand from our student body, the Department of Management and Marketing has designed a minor in **Management**. This minor is intended to enhance our students' area of expertise, through acquiring knowledge of management theory and its application, which will allow them to be successful members in the global environment. The world we live in is marked by rapid change. To cope with this rapid geometrically increasing flux, both managers and employees need to handle change as well as manage the day-to-day functions in the market-driven economy.

For those students who come from a business background, this minor will enhance their scope and depth in the managerial area. For those who come from another background, a minor in **Management** will expose them to the key managerial functions of planning, organizing, leading, and controlling, and, in doing so, will increase their level of efficiency and effectiveness in the work context.

Learning Outcomes:

Having obtained a minor in Management, the student will now:

- Use analytic-thinking skills in evaluating management methods and practices, current literature in the management field, and contemporary management models and theories.
- Make effective use of planning, decision-making, and strategic skills in the context of efficient companies.
- Have a working knowledge of traditional organizations and the management practices to run them.
- Understand the importance of the contemporary organization structure, of leading, and of controlling in management.
- Become aware of the practical and intellectual benefits and drawbacks of using team-based management
- Apply basic management concepts in the case study method.

Students are required to use the following table:

Course#	Description	Credits	Prerequisite
BAD 201	Fundamentals of Management	3	None
BAD 317	Organizational Behavior	3	BAD 201
BAD 429	Operations Management	3	Senior Standing
	CHOOSE TWO OF THE FOLLOWING		
BAD 321	Managing a small Business	3	None
BAD 421	International Business Management	3	Senior Standing
BAD 423	Business Research	3	Senior Standing
BAD 433	Business Policy & Strategic Management	3	Senior Standing
BAD 453	e-Business	3	Senior Standing
MGT 202	Business Negotiations	3	MGT 201
MGT 411	Leadership, Quality, and Performance	3	Senior Standing
Total		15 cr.	

Suggested Program

First semester: BAD 201

Second semester: BAD 317, and any elective course from the pool

Third semester: BAD 429, and any elective course from the pool

Undergraduate Courses: Business Administration

BAD 101 Introduction to Business (3.0); 3 cr.

An orientation to the field of business. Topics covered include: types of business organizations; financing of businesses; marketing functions; management functions; human resources management; production management; accounting; international business.

BAD 201 Fundamentals of Management (3.0);

3 cr. An introduction to the basic elements of the managerial process and the basic theories of management. Topics covered include: management objectives; organizational structure; material and human resource utilization; human relations; decision making, planning, organizing, staffing, directing and controlling.

BAD 311 Business Law (3.0); 3 cr.

Survey of Lebanese Commercial Law. Topics covered include: the nature of the law; the courts system; contracts; property sales and secured transactions; insurance; commercial papers; agency; business organizations; bailment; bankruptcy; banking operations; taxation.

BAD 315 International Business (3.0); 3 cr.

An introduction to international business management principles and an overview of global organizations. Topics covered include: nature and importance of international business; human, cultural, political, economic and legal considerations in international business; commercial policies; international agreements; international trade and investment; the international monetary system. *Prerequisites:* BAD 201, ECN 212.

BAD 317 Organizational Behavior (3.0); 3 cr.

An examination of the study of individual and group behavior in organizations. Topics covered include: perception; motivation; leadership; organizational development; communication; power politics; group behavior; conflicts; work design. *Prerequisite:* BAD 201.

BAD 321 Managing a Small Business (3.0); 3

cr. Procedures and techniques needed to start-up, purchase and manage a small firm. Emphasis on the differences between small and large firm environments and problems. Topics covered include: franchising; market research; site selection; sales and advertising; pricing and credit policies; managing human resources; financial planning; accounting and budgeting. *Prerequisite:* Junior Standing.

BAD 323 Software Tools for Business Applications (3.0); 3 cr.

Application of software to business information processing and decision making in different business areas. *Prerequisite:* Junior Standing

BAD 325 International Business Law (3.0); 3

cr. An introduction to the legal aspects and ramifications of international trade. Topics covered include: international business transactions including sales contracts, agency and distribution contracts, investment contracts, licensing agreement, joint ventures; intellectual property; arbitration; dispute settlement before the WTO; problems in foreign investment; tariff regulation; taxation regulation; technology transfer. *Prerequisite:* BAD 311.

Minor in Marketing Management (15 credits)

The Marketing Management minor was developed to allow students to broaden their intellectual base and increase their employment opportunities. Many university graduates obtain entry-level jobs which not only allow them to apply the knowledge obtained in their major field, but also require an understanding of marketing principles and practices as a prerequisite for success.

Students will be able to successfully confront problems in areas of marketing management, marketing research, purchasing management, market analysis, product management, retailing sales promotions and international marketing.

Students are required to use the following table:

Course #	Description	Credits	Prerequisite
MRK 201	Fundamentals of Marketing	3	None
MRK 311	Consumer Behavior	3	MRK 201
MRK423	International Marketing	3	MRK 201
	<i>CHOOSE TWO OF THE FOLLOWING</i>		
MRK 205	Principles of Channel Management	3	MRK 201
MRK 313	Salesmanship	3	MRK 311
MRK 321	Promotional Strategy	3	MRK 311
MRK 325	Services Marketing	3	MRK 311

Total		15 cr.	

Suggested program:

First Semester: MRK 201

Second Semester: MRK 205, MRK 215

Third Semester: MRK 335, MRK 345

Undergraduate Courses: Marketing

MRK 201 Fundamentals of Marketing (3.0); 3 cr. Introduction to the marketing process in social, economic and legal environments. Topics covered include: consumer and institutional behavior patterns; market segmentation; product and service development; pricing strategy and promotion; channels of distribution; retailing and wholesaling; marketing research.

MRK 205 Principles of Channel Management (3.0); 3 cr.; This course surveys, organizes, and integrates theories and practices relative to current issues of marketing channel management, with a focus on key strategic marketing principles. Physical distribution is reviewed as a functional area within the firm and its interface with channel intermediaries is analyzed. Topics include retailing, wholesaling, industrial marketing, transportation, warehousing, location, inventory control, and channel design. *Prerequisite:* MRK 201.

MRK 215 Fundamentals of Purchasing (3.0); 3 cr; This course is designed to present the purchasing process as it relates to such topics as inventory control, price determination, vendor selection, negotiation techniques, and ethical issues. The focus of the course will be on the role and function of purchasing in the Logistics Management Process. *Prerequisite:* MRK 201.

MRK 311 Consumer Behavior (3.0); 3 cr. Concepts and theories to explain the decision making process of consumer and organizational buying. Attention is focused on economic, psychological, sociological and anthropological variables to understand, predict and control purchasing behavior. *Prerequisite:* MRK 201.

MRK 313 Salesmanship (3.0); 3 cr. Examination of persuasive techniques used in promotional presentations conducted on a person-to-person basis. Emphasis on effective selling techniques, understanding the company and its products, understanding the customer and the selling environment, recognizing selling opportunities, and planning, implementing, and control of the personal selling programs. *Prerequisite:* MRK 311.

MRK 315 Import-Export Management (3.0); 3 cr. Application of management theories to efficient management of an import-export business. Topics covered include: starting an import-export business; international trade; export financing; import-export documentation;

export promotion; tariffs and duties. *Prerequisites:* BAD 315, MRK 311.

MRK 321 Promotional Strategy (3.0); 3 cr. Introduction to various promotional strategies adopted by different companies and guidelines for determining a company's promotional mix. Topics covered include: advertising; personal selling; publicity and promotion; determination of objectives and budgets; situation analysis. Also, discussion of managerial issues and problems. *Prerequisite:* MRK 311.

MRK 323 Retail Management (3.0); 3 cr; Application of management and marketing theories to retailing. Topics covered include: Management, organization and control of retail outlets, consumer behavior, store location, financial management, promotion, presentation, pricing, control of inventories, advertising, personnel, and wholesaler-retailer relationship. *Prerequisites:* MRK 205, MRK 311.

MRK 325 Services Marketing (3.0); 3 cr. An introduction to the distinctive aspects of service marketing. Topics covered include: understanding services marketing; improving service quality and productivity; positioning a service in the marketplace; managing the customer portfolio; creating and delivering services; developing and managing the customer service function. *Prerequisite:* MRK 311.

MRK 335 Materials and Warehouse Management (3.0); 3 cr. This course covers the organization and operations of warehouses and distribution centers. Topics covered include the role, types and functions of warehouses and distribution centers, location analysis, facility layout and design, equipment handling, employee safety, public and private warehouses, computer control and tracking, conveyance equipment, and hazardous materials handling. *Prerequisite:* MRK 205.

MRK 345 Logistics and Supply Chain Management (3.0); 3 cr. This course develops an integrated approach to the analysis of physical distribution problems. It deals with transportation and assignment problems; application of network techniques to production; distribution systems design; optimal allocation of inventory; cost allocation methods; pricing policies; and power structure of shareholders within a firm. *Prerequisite:* MRK 205.

MRK 372 Internet Marketing (3.0); 3 cr. e-marketing is traditional marketing using electronic methods. It helps students develop the skills necessary to understand and integrate Internet technology and characteristics into marketing strategy. It helps students recognize and understand the implications of the Internet not only as a market place but also as a set of tools and opportunities. *Prerequisites:* MRK 201, BAD 323.

MRK 404 Transportation Management (3.0); 3 cr. This course includes an introduction to the principles of transportation with emphasis on transportation modal operations (rail, highway, air, pipeline, water transportation) and transportation management. Consideration is given to the economical, social and political aspects of the transportation industry and strategic issues in transportation management. *Prerequisite:* MRK 345.

MRK 421 Sales Management (3.0); 3 cr. Development, operation and control of a sales organization. Topics covered include: managing the sales force; selecting, training and compensating the sales force; forecasting sales and establishing budgets; structuring a sales organization; motivating salespeople. *Prerequisite:* Senior Standing.

MRK 422 Packaging, Warehousing and Inventory Control (3.0); 3 cr. The course deals with important supports for a modern material handling process. Among other things, it discusses packaging and carriers and their importance to logistics. Furthermore, it deals with systems and IT tools for material handling, such as warehouse management systems (WMS), bar codes and other identification systems, transport administration systems and systems for controlling material flows in logistical networks. The course also gives an overview of material handling equipment, such as forklifts, storage systems, bar code scanners etc. *Prerequisite:* MRK 335.

MRK 423 International Marketing (3.0); 3 cr. Analysis and strategies for marketing in an area with different social, political, legal and economic environment. Topics covered include: cross-national consumer behavior; direct foreign

investment; strategy of international product development, pricing, promotion and distribution policies; forms of international involvement. *Prerequisites:* MRK 201; ECN 212.

MRK 425 Business-to-Business Marketing (3.0); 3 cr. Development of principles of distribution of industrial goods and management of industrial marketing organizations. Topics covered include: industrial marketing system and organization buying behavior; management of industrial marketing mix; industrial market-research; planning, pricing, selling and advertising decisions; strategies for industrial markets. *Prerequisite:* MRK 423.

MRK 431 Marketing Research (3.0); 3 cr. Techniques and procedures of collecting and analyzing information to identify marketing problems and facilitate their solution. Topics covered include: marketing research design; questionnaire construction; sample design; data analysis. *Prerequisite:* MRK 201, STA 207.

MRK 433 Marketing Strategies and Policies (3.0); 3 cr. A capstone course in marketing. Emphasis on strategic and executional issues connected to marketing policy. Integration of materials previously taken, utilizing readings, projects and case studies. *Prerequisite:* Senior Standing.

MRK 481 Marketing Internship (1.0); 1 cr. Interns will have the opportunity to develop new skills by working under the direction and supervision of an experienced practitioner and acquire practical skills. The internship will be done in cooperating and department approved firms. A minimum of 120 hours of internship is required. *Prerequisite:* Senior Standing.

MRK 482 Distribution and Logistics Management Internship (1.0); 1 cr. Interns will have the opportunity to develop new skills by working under the direction and supervision of an experienced practitioner and acquire practical skills in logistics and distribution. The internship will be done in cooperating and department approved firms. A minimum of 120 hours of internship is required. *Prerequisite:* Senior Standing.

BAD 427	Human Resources Management	3	BAD 317
Total		15 cr.	

Suggested Program

First semester: MGT 201

Second semester: MGT 210, and any elective course from the pool

Third semester: MGT 325. and any elective course from the pool

Undergraduate Courses: Human Resource Management

MGT 201 Principles of Human Resources Management (3.0); 3 cr. Theories, policies and practices of human resources management in a firm. Topics covered include employee selection, training and development, performance appraisal and compensation, job analysis and design, benefits administration, and labor-management relations.

MGT 202 Business Negotiations (3.0); 3 cr. Negotiation permeates human interactions. It affects the balance and distribution of resources among nations, organizations, families, and individuals. Students will understand the theory behind successful negotiation, recognize situations that call for negotiation, and study the utilization of alternative negotiating strategies and tactics. *Prerequisite:* Junior Standing.

MGT 210 Organizational Staffing (3.0); 3 cr. This course provides an in-depth examination of the organizational staffing process. Procedures for human resources needs assessment such as personnel audits and forecasting are discussed. Recruitment strategies and the process of organizational choice of candidates are explored. There is emphasis on understanding basic types of assessment tools and procedures for choosing new employees. *Prerequisite:* MGT 201.

MGT 312 Training and Career Development (3.0); 3 cr. The course is an advanced study of personnel training and development in contemporary organizations. Emphasis is placed on the identification of training needs, program design, selection of training methods, monitoring the process, and evaluating the results. *Prerequisite:* MGT 210.

MGT 325 Compensation and Reward Systems (3.0); 3 cr. This course provides the study of labor markets and examines the general structure of an organization and the rewards employees seek in exchange for their services and contributions to the firm. Topics covered include developing pay structure, measuring performance, providing employee benefits, rewards and a motivating work environment, and administering the compensation plan. *Prerequisite:* MGT 210.

MGT 337 Recruitment and Selection (3.0); 3 cr. The objective of this course is to describe to students how organizations search for prospective employees and influence them to apply for available jobs. It is an advanced study of recruitment and selection practices of organizations. *Prerequisite:* MGT 210.

MGT 411 Leadership, Quality and Performance (3.0); 3 cr. The purpose of this course is to focus on the major traits which come together in a leader to produce Leadership. Theory, Power, Motivation, and Communication, this course explores the causes and consequences of effective leadership in organizations. *Prerequisite:* Senior Standing.

MGT 453 Global Human Resources Management (3.0); 3 cr. This course is designed to help students develop skills as global managers and to provide them with an understanding of critical issues in the management of multinational organizations. Topics covered include international leadership skills, cross-cultural negotiations, ethical dilemmas in cross-cultural environments, and designing and managing multinational organizations. *Prerequisite:* Senior Standing.

MGT 475 Managing Employment Relations (3.0); 3 cr. This course provides an overview of the relationships between human resources and parties to employment. It considers contract negotiations, discipline and grievance procedures, and human resources department assistance in conflict resolutions. Special attention is given to the organizational structure of the parties and their diversified objectives. *Prerequisites:* MGT 210, BAD 329.

MGT 483 Human Resources Management Internship (1.0); 1 cr. The Internship program is designed to provide the Interns with the opportunity to develop professional skills related to their studies by working under the supervision of an experienced business practitioner. Internship is conducted under the supervision of a program director at NDU and in cooperation with the Interns employer. A minimum of 120 working hours are required. *Prerequisite:* Senior Standing.

The Degree of Bachelor of Business Administration (B.B.A.)

Health Care Management Emphasis

Health Care Management: Why?

The health care industry size is growing worldwide and throughout the whole Middle East. Growth is driven by the following:

1. Increasing consumerism and health needs
2. Advancing technologies
3. Changing regulation
4. Aging Population

In addition to providing effective care, today's health care organizations urgently need to be effectively managed in terms of organizational issues, human resources, and costs. The health care management program at NDU provides students with business management skills and knowledge of healthcare delivery system needed to work in this growing field.

Business orientation is essential and the health care profession's tracks need preparation and exposure to the health care industry.

There is a real market demand for graduates that are well educated in this field.

Program Objective

The BBA- Health Care Management option is designed to provide students with an understanding of the processes and structures of Health Care Organizations to enable them to be more effective managers. The courses taken in addition to the required common courses provide the students with proficiency in appropriate-management skills and decision-making.

This program has an innovative approach whereby the first year is common to all our faculty programs and the concentration courses start in the second semester of the second year. It has a unique market-oriented approach to curriculum design and course administration. All concentration courses will be taught by professionals having a thorough experience in the health care industry.

Careers in health care management

This program prepares candidates for managerial responsibilities in both the private and public sectors of the health care industry. Health care management majors will be qualified for making a career in:

- Long- term care facilities
- National and international pharmaceuticals firms and medical suppliers
- Insurance companies
- Government and non governmental organizations (NGO)

Admissions Requirements

Applicants must pass the Lebanese Baccalaureate Part II (Any Strand) or its equivalent as identified by the Lebanese Ministry of Education. They are required to sit for an English Entrance Test (EET) or TOEFL and a Mathematics Test.

Graduation Requirements

Students seeking the degree of Bachelor of Business Administration must complete a total of 106 credits with an overall average of at least 2.0/4.0 and a minimum average of 2.3/4.0 in the common core and major requirements. The passing grade for all Required Major (HCM) Courses is C. These 106 credits are divided into:

Degree Requirements (106 credits)

Undergraduate Courses: Health Care Management

HCM 301 Introduction to Health Care Management (3.0), 3 cr. This course provides an overview of the evolution, structure and current issues in the health care system. It examines the unique features of health care as a product, and the changing relationships between patients, physicians, hospitals, insurers, employers, communities, and government. The course examines three broad segments of the health care industry: payers, providers, and suppliers. Within the payer segment, the course examines the sources and destinations of spending, MOH, CNSS, insurance, technology assessment and renewal, and payer strategy. Within the provider segment, the course examines the impact of cost containment and competition on hospitals and integrated HC delivery systems, and physicians' relationships. Within the supplier segment, the course will examine developments in the biotechnology, pharmaceutical, medical devices (equipment and supplies), genomic and IT industries.

HCM 302 Health Care Economics (3.0), 3 cr. This course is designed to build an understanding of the healthcare delivery system from an applied economics perspective. The application of these skills will be drawn from examples that illustrate the production of and demand for health. The economic analysis of health care delivery is based on microeconomic theory: elasticity of demand, price sensitivity, etc. As the managed care model develops, greater emphasis is being placed on individual choice and responsibility as determinants of healthcare utilization. This trend has resulted in greater emphasis on the use of economic theory to both plan and evaluate the healthcare setting. Insurance is a major economic lever of these trends. The rationale for government intervention in medical markets as well as the effectiveness and efficiency of various health policies, including: MOH medical aid, CNSS coverage, price regulation of hospitals, physician payment reform, are surveyed. *Prerequisite:* ECN 212.

HCM 401 Management Of Health Care Organizations I (3.0), 3 cr. The purpose of this course is to prepare you for managing health care organizations within an environment of cost containment and quality management of health care services. In Module I, we will first focus on the profession of health care management. This will present a picture of the daily tasks health

care managers faces and knowledge, skills, and abilities needed to be successful. The second focus is on the management of health care teams. This section will equip the student to participate in and successfully manage, coach and/or mentor teams of clinicians, managers, and others. *Prerequisites:* ENS 312 HCM 301, HCM 302.

HCM 402 Management Of Health Care Organizations II (3.0), 3 cr. The purpose of this course is to prepare you for managing health care organizations within an environment of cost containment and quality management of health care services. In Module II, we will focus on quality improvement since many health care facilities are turning to total quality management concepts and processes as they strive for efficiency in operations and improvement of medical care delivered. Cost containment programs will be discussed with an emphasis on supply chain management and IT driven processes. *Prerequisite:* HCM 401.

HCM 403 Health Care Strategic Management (3.0), 3 cr. This course provides an introduction to how healthcare organizations (Payers, Providers, Suppliers) identify, create, and market their services within the context of a long-term strategic plan. The course will analyze the evolution of strategic management within the healthcare industry, and how it has responded to individuals in need of healthcare services. The class will also examine the core components of a strategic management approach, including situation analysis, formulation of a strategy, implementation, and follow-up relative to the mission and vision of the healthcare organization. As an adjunct to these concepts, the class will review real world cases studies from throughout the healthcare industry. Finally, the communication of the organization's mission, vision, and overall strategic management plan will be discussed. *Prerequisites:* HCM 301, HCM 302.

HCM 404 Health Care Marketing Management (3.0), 3 cr. This course focuses on strategic and tactical marketing issues facing health systems including: payers, providers and suppliers. The course requires a basic understanding of what is marketing. Emphasis is placed on analyzing market and patient needs and on understanding branding, service line marketing, patient retention, patient satisfaction, measuring marketing effectiveness, internet

marketing and marketing implementation programs. The course explores the practical application of these marketing concepts on major industry players: Hospitals, Insurers, Medical Device Suppliers, and Pharmaceutical companies. *Prerequisites:* MRK 201, HCM 301, HCM 302.

HCM 405 Health Care Financial Management (3.0), 3 cr. This course examines the tools and methods of financial management in health care organizations with emphasis on allocation and use of funds in managing the components of health care delivery systems. Analysis of cost drivers and constraints of alternative source of funds, and the application of financial decision instruments and their effect on operational management and market value of the entity, including valuation methodology and risk management, are covered. Modeling profitability analysis and planning for health care providers and payers is surveyed. *Prerequisites:* BAF 311, HCM 301, HCM 302.

HCM 406 Health Care Legal Environment (3.0); 3 cr. This course examines the tools and methods of financial management in health care organizations with emphasis on allocation and use of funds in managing the components of health care delivery systems. Analysis of cost drivers and constraints of alternative source of funds, and the application of financial decision instruments and their effect on operational management and market value of the entity, including valuation methodology and risk management, are covered. Modeling profitability analysis and planning for health care providers

and payers is surveyed. *Prerequisites:* HCM 301, HCM 302.

HCM 407 Seminars and Topics in Health Care Management (3.0); 3 cr. Health care organizations are under continued pressure to contain costs while maintaining high quality health care. The purpose of this course is twofold: (1) to help you learn about the many controversial issues facing the healthcare industry; and (2) to prepare you for analyzing the issues affecting health care institutions, including payers, providers, and suppliers. You will learn how the various sectors of the health care delivery system deal with conflicting demands from an assortment of stakeholders, including governments, insurers, suppliers, employers, health care professionals, and patients. *Prerequisites:* HCM 401, HCM 402, HCM 403.

HCM 408 Health Care Internship Program (1.0); 1 cr. This course is required of all students in the Health Care Management Program. The course is designed to give students first hand experience in a health care setting. Students receive practical experience under the supervision of a qualified professional. In collaboration with the preceptor, students define a complex problem in the assigned firm/facility and in the area of responsibility, conduct an analysis of the problem and conceptualize a project to resolve the problem. In addition, upon completion of the course students should have the tools to effectively search for their first job. *Prerequisites:* HCM 301, HCM 302.

DEPARTMENT OF HOSPITALITY AND TOURISM MANAGEMENT

Chairperson: *Mr. Ghassan Beyrouthy*

Secretary: *Mrs. Dunia Akiki*

Assistant Professor

Zgheib, Youssef, Ph.D. 2002, *International Hospitality Management*, University of Strathclyde, Scotland, UK

Assaker, Guy, M.B.A., 2003, *Hotel Management and Tourism*, Cornell University (NY)/Essec (France); DESS, 2004, Université Paris I-Pantheon Sorbonne, France

Beyrouthy, Ghassan, M.B.A., 1999, *Hospitality and Tourism Management*, Notre Dame University-Louaize, Lebanon

The Degree of Bachelor of Hotel Management and Tourism

Hospitality, travel and tourism are rapidly growing industries. The NDU program of Bachelor of Hotel Management and Tourism is designed to prepare students for successful professional and executive careers in the hospitality and tourism industries by allowing them to specialize in one of the following three concentrations: Hospitality Services Management, Food & Beverage Operations Management, as well as Travel and Tourism Management.

The various concentrations provide a sound foundation in hotel and restaurant management as well as tourism administration through focused academic coursework, hands-on work experience, and intense interaction with the industry. They also provide relevant educational opportunities for persons currently employed in these industries and wishing to upgrade their skills.

Hospitality and Tourism Management students at NDU benefit from a rare opportunity to learn the international management techniques for success in the hospitality and tourism field, while also seeking knowledge more adapted to their professional career orientations and specializations.

In 2006 NDU's Department of Hospitality and Tourism Management signed a unique educational venture partnership with SHMS², a leading Swiss Hotel Management School. This collaboration intends to combine the Swiss art of *hôtellerie* and the more American science of management in practice at NDU. It comprises exchange of know how, faculty and students, industry consultancy, and leads to a potential dual diploma-degree in Hospitality Management.

Graduation Requirements

Students seeking the degree of Bachelor of Hotel Management and Tourism must complete a total of 103 credits with an overall average of at least 2.0/4.0 and a minimum average of 2.3/4.0 in the major and concentration requirements. The passing grade for all courses is "D" except for ENL 105, ENL 110 whereby it is "C". These 103 credits are divided into:

¹ Leave of Absence for the year 2008-2009

² Swiss Hotel Management School, composed of three main city campuses located in: Caux, Montreux and Leysin

**Degree Requirements
(103 credits)**

General Education Requirements **30 cr.**

Major Requirements **51 cr.**

TTM 201, TTM 204, HSM 205, HSM 211, HSM 224, HSM 226, TTM 237, HSM 281, HSM 311, FBM 313, HSM 314, FBM 315, HSM 319, FBM 324, TTM 326, FBM 351, HSM 411, HSM 451, HSM 459

TTM 342: Travel Agency & Tour Management

Third semester

Choice of two minor electives

Fourth semester

TTM 382: Internship III: Travel Agency & Tour Operations

Undergraduate Courses: Hotel Management and Tourism

TTM 201 Introduction to Tourism & Hospitality Management (3.0); 3 cr. A comprehensive overview of the tourism and hospitality global industry. The course is a broad introduction of the industry's scope, supply and demand components, socio-economic and environmental impacts, operations, career opportunities and requirements for success. Students further gain exposure to the basic managerial functions and how they relate to the tourism and hospitality industry.

TTM 204 Economics of Tourism (3.0); 3 cr. This course applies economic principles to the tourism and hospitality industry. Special emphasis is placed on supply and demand and the determination of prices. It also discusses the impact of the GDP, growth and fluctuations on the Tourism industry. The course further focuses on the contribution of tourism to the overall performance of the economy.

HSM 205 Principles of Hospitality Financial Accounting (3.0); 3 cr. Hospitality accounting principles, concepts and practices pursuant to the industry's systems of accounts. Careful consideration is given to practical transaction analysis, flow of accounting data to the financial statements and their implications with respect to cash flow, revenues, expenses, assets, liabilities and equity management. *Corequisite:* TTM 201.

HSM 211 Hospitality and Tourism Law (3.0); 3 cr. A study of the legal responsibilities affecting the operations of the hospitality and tourist industries, including aspects of innkeeping, occupier's liability, trades practices, licensing, health, taxation and employment. Other topics include: corporation legislation, the law of contract, the role of ethics and a comparative approach to foreign legislations relating to hospitality and tourism industries. *Prerequisite:* TTM 201.

HSM 224 Front Office Operations and Management (3.1); 3 cr. The course acquaints the student with the operations and procedures involved in managing the guest services area of a lodging operation. Functions covered deal with the guest cycle from reservations through checkout including the night audit and their interaction with other operations. Intensive lab applications. *Prerequisite:* TTM 201.

HSM 226 Housekeeping Operations and Management (1.3); 1 cr. This course is a guide

to various aspects of housekeeping in a lodging industry from cleanliness, hygiene, maintenance and aesthetic upkeep of the property. It deals with duties from those of executive housekeeper to room attendant. Intensive lab applications. *Corequisite:* HSM 224.

TTM 237 Hospitality and Tourism Marketing (3.0); 3 cr. An introduction to the concept, principles and practices of contemporary marketing as they apply to the specialized needs of the hospitality industry. Subjects covered are marketing concepts and environment, segmentation and positioning, consumer behavior and marketing mixed strategies. The development of a practical marketing plan for an actual hospitality business is a special feature of this course. *Prerequisite:* TTM 201.

HSM 281 Internship I: Rooms Division Operations 1 cr. A supervised on-the-job work experience in the lodging business. Arranged with a Department approved cooperating institution. This field experience - of no less than 500 hours - emphasizes front office and housekeeping operations and management tasks. Student must check course guidelines before registering. *Prerequisites:* HSM 224, HSM 226.

HSM 311 Hospitality Managerial Accounting (3.0); 3 cr. This course focuses on the use of accounting information for management decision-making and control. Topics include costing, management control systems and performance measurement. Emphasis is on cost-volume analysis, budgeting and pricing decisions. *Prerequisite:* HSM 205.

FBM 313 Food Production (3.0); 3 cr. An introduction to food production techniques and management. The course is designed to familiarize students with food composition and properties, commercial food preparation, safety and sanitation. Students will develop the ability to standardize recipes, plan menus and manage potential production problems. Practical involvement in food production is included. Intensive lab applications.

HSM 314 Human Resources Management in the Hospitality Industry (3.0); 3 cr. Knowledge of the human resources management function in the context of hospitality organizations is developed. In addition to personnel management techniques, exposure will focus on the HRM activities aimed at

attracting, retaining and motivating hospitality employees. *Prerequisite:* TTM 201.

FBM 315 Food Production Lab (0,3); 1 cr. Practical implementation of the culinary concepts and techniques taught in Food Production (FBM 313). (*Corequisite:* FBM 313 for HTM students only).

HSM 319 Information Technology in the Hospitality Industry (3.1); 3 cr. This course aims to provide students with a competence in the computerized property management systems used in hotels and restaurants. Information processing concepts, equipments and systems with respect to front office and restaurant automation are introduced. Applied software programs are used intensively. Intensive lab applications. *Corequisite:* HSM 224.

FBM 324 Restaurant Operations and Floor Management (3.1); 3 cr. An extensive theoretical and practical exposure to dining room operations and management. Students learn and practice different service and functions concepts as well as learn to manage scheduling, hosting, selling, cashiering, sanitation and safety, and operational performance. Service and related software labs are intensely used.

TTM 326 Domestic Travel and Tourism Development (3.0); 3 cr. The course provides a complete description and geography of domestic tourism from the view-point of the traveler and the travel/tourism entrepreneur. Students will gain a solid practical understanding of local travel and tourism development and potentials from a specific destination and potentials. Field trips and projects are part of this course. *Junior Standing*

FBM 332 Catering, Functions and Banqueting Management (3.0); 3 cr. Course leading to a thorough understanding of the different catering concepts for special functions. Lectures and demonstrations focus on menu planning, working methods, catering equipment, kitchen and service layout, service, events preparation and execution, sales, and human resources organization. The course will equip students to operate and manage different types of food and beverage service, on and off premises. *Corequisite:* FBM 313.

HSM 334 Resort & Recreations Management (3.0); 3 cr. Resorts & Recreation systems include the environmental, social, managerial resources and the methods for development of full service resorts and recreations. Comparison

of specialized requirements for different types of resorts based on location, climate, activities, human resources and life style. The goal of this course is to help students develop a related understanding of the principles of project development, construction, supervision, pre-opening requirements and operations.

FBM 335 Institutional and Contract Foodservice Management (3.0); 3 cr. Administration of foodservice operations in noncommercial, convenience and contract-managed facilities. Characteristics and operations of specialty businesses such as health-care, cafeteria, industrial, foodservice vending and in-flight catering are studied. Field Trips and projects supplement classroom sessions. *Corequisite:* FBM 324.

TTM 341 International Air Law (3.0); 3 cr. This course establishes a solid core of knowledge of the principal instruments of international air law. It will allow the student to understand interpret and apply the main rules and regulations of air law. It will also explain the legal framework governing aircraft security, interception of aircraft & piracy, alliances & their impact, and the legal issues surrounding the airline distribution.

TTM 342 Travel Agency and Tour Management (3.0); 3 cr. A thorough examination of the services and functions of retail and wholesale travel agencies. Specifically covered are agency organization, automation and operations as well as wholesale package planning, implementation and evaluation. Field trips and actual projects will supplement classroom discussions. *Junior Standing*

FBM 343 Purchasing for Hospitality Operations (3.0); 3 cr. A comprehensive exposure to the basic principles of purchasing food, beverage, equipment, supplies and contract services. Specific topics include product specifications and ordering, supplier selection, store management and negotiations. Field Trips included. *Corequisite:* FBM 313.

TTM 344 International Travel and Tourism (3.0); 3 cr. A complete description and geography of international travel, notably current trends and cultural behavior, popular destinations, and international tourism organizations as well as major international travel transportation modes and routes. A comparative approach and evaluation of national

and international destinations organization, management and marketing.

TTM 345 Airline Passenger Services (3.0); 3 cr. An introduction to the most important air transport service and safety skills essential to maintain traveller satisfaction. The course enables students to understand the application of international air transport standards relating to passenger and baggage handling functions. Practical working knowledge of airport passenger service functions will be acquired. *Junior Standing*

TTM 346 Automated Travel System (3.0) 3 cr. A comprehensive, hands-on computer learning experience. Students will progress from the characteristics and development of automation in the retail travel agency to practical applications in computerized reservations and back-office systems. *Corequisite:* TTM 342.

FBM 349 International Cuisine (3.1); 3 cr. Broadens students knowledge of menus and the popular national cuisines riding the international trendy wave. Emphasis is placed on concepts, cultural contexts, food preparation and service characteristics. Managerial perspective is also used related to nutrition, menu adaptability, architectural layouts, costing and marketing. Course is heavily application oriented. *Prerequisite:* FBM 313.

FBM 351 Food, Beverage and Labor Cost Control (3.0); 3 cr. This fundamental course is designed to familiarize the student with the theory and practice of internal cost controls in the hospitality industry. A comprehensive and thorough understanding of quality assurance versus cost impact on profitability management is provided. Practical financial problems and actual operational techniques of functioning systems of internal control are studied. The focus is to provide future hospitality managers with the ability to handle the diverse issues regarding service quality, employee morale and cost management. *Prerequisites:* FBM 313.

FBM 381 Internship II: Food and Beverage Operations 1 cr. A supervised on-the-job work experience in the food and beverage business, particularly restaurants and catering. Arranged with a Department approved cooperating institution, this field experience - of no less than 500 hours - emphasizes operations and management functions in service, production, inventory and cost control. Student must check

course guidelines before registering. *Prerequisite:* FBM 324.

TTM 382 Internship III: Travel Agency and Tour Operations 1 cr. A supervised on-the-job work experience in the travel and tourism business, particularly travel agency and tour operations. Arranged with a Department approved cooperating institution, this field experience - of no less than 500 hours - emphasizes agency and group travel operations and management functions. Student must check course guidelines before registering. *Corequisites:* TTM 342.

HSM 411 Hospitality Managerial Finance (3.0); 3 cr. Understanding the role of the hospitality financial controller through the application of accounting, finance and cost control principles, aimed at maximizing the organization value. Focus areas include: preparation of financial statements, bond and stock valuation, working capital management, short-term financing, capital budgeting and alternative financing arrangements. *Prerequisite:* HSM 311.

HSM 412 Intermediate Business Finance (3.0); 3 cr. Building on the concepts developed in HSM 411, this course focuses on corporate financial management including risk analysis, security markets operations and international finance. *Prerequisite:* HSM 411.

FBM 413 Advanced Food Production (1.3); 3 cr. The course aims to examine latest techniques and production systems in the food service industry. Commercialized innovations in forms of food, techniques in production, storing and serving, and new technological developments in food service equipments are explored. *Prerequisite:* FBM 313.

FBM 424 Restaurant Development and Management (3.0); 3 cr. Students systematically plan and develop a restaurant from concept to operations. The course comprises concept analysis, feasibility study, menu development and pricing, technical and architectural planning, staffing, and pre-opening, opening and operational administration. An applied project approach is used. *Prerequisite:* FBM 324.

HSM 432 Hospitality Property Management (3.0); 3 cr. This course provides an understanding of the peculiar responsibilities of the engineering and maintenance department. It includes a basic technical understanding of the

major building operating systems (HVAC, sound, water, safety and security), landscaping as well as the related operating energy and cost management. Field property visits included.

HSM 437 Hospitality Sales and Promotional Techniques (3.0); 3 cr. An analysis of hospitality buyers' motivations and behavior, and the related effective promotional and sales techniques. This partly experiential course provides the opportunity to develop and practice promotional and personal-selling skills. *Prerequisite:* TTM 237

HSM 439 Market and Feasibility Studies (3.0) 3 cr. Study of the techniques used to conduct standard market and feasibility studies for hospitality properties and tourism developments. Analysis include supply, demand, site evaluation, risk assessment and operational and financial projections. *Prerequisite:* TTM 237, STA 206.

TTM 440 Tourism and Multicultural Management (3.0) 3 cr. In-depth examination of differences in culture, customs and behaviors in the hospitality/tourism industry. Students will focus on cultural differences and the varying needs of international tourists. This course addresses the significance of art, customs, traditions, and visitor management to educate the traveler and preserve cultural diversity.

FBM 444 Alcoholic Beverages Appreciation (3.0); 3 cr. This course provides knowledge and appreciation of the major alcoholic beverage from cultural background to production, evaluation purchasing, storing and service etiquette. Wine, whisky, arak, beer and spirits are emphasized. A further introduction to coffee, tea and non-alcoholic beverages is provided. Evaluation by tasting is an integral part of the course. Laboratory fee.

TTM 445 Sustainable Tourism (3.0); 3 cr. A deeper understanding and analysis of the business-society interface. Policy guidelines to bring both hospitality business and society towards sustainable, workable and mutually beneficial solutions are studied. Topics investigated: ecotourism, corporate policy and social responsibility, ethics and values in business, business interests and community issues, business and media relations, corporation and government relations.

FBM 446 Bartending and Beverage Operations Management (3.1); 3 cr. The course deals specifically with the operations and

administration of beverage businesses. Students acquire valuable practical knowledge in planning, mixology, cost control, loss prevention, creative merchandising and alcohol liability. The course is highly application oriented. Laboratory fee. Senior Standing

HSM 447 Advanced Hospitality and Tourism Marketing (3.0) 3 cr. This elective course builds on the student's previous exposure to the principles and practices of marketing. The key feature is the comprehensive and in-depth coverage of global market analysis for business opportunities and sustainable competitive advantage. A strong emphasis is placed upon the development of a greater appreciation of consumer behavior and competition analysis, selling and communication strategies and management as well as business negotiations. The course is heavily case oriented. *Prerequisite:* TTM 237.

HSM 449 Meetings, Conventions, Exhibitions and Events Management (3.0); 3 cr. Introduction to the environment and characteristics of the meetings, conventions and exhibitions segments of the hospitality industry. Emphasis is on managerial decisions involved in targeting, planning, organizing, selling and servicing. Applied case analysis and field projects.

HSM 450 Hospitality Project Planning and Facilities Design (3.0) 3 cr. An introduction to project management from concept and feasibility planning to space and architectural design then construction and procurement management. Emphasis is on setting appropriate facilities requirement, layout and detailed design them, the implementation of properties decisions within a balanced design, operations and financial framework.

HSM 451 Hospitality Management (3.0); 3 cr. Analysis of hospitality operating practices and policies and their managerial implications on the individual and group behavior in the organizational setting. The focus is on the acquisition and implementation of leadership styles to enhance organizational effectiveness and individual well being. The course includes the study of group behavior, attitudes and stress management, communication, motivation, leadership, power politics, conflict and organizational culture. Life case discussions and field projects are included. *Prerequisite:* HSM 314.

TTM 454 Strategic Airline Business Operations (3.0); 3 cr. This course aims at emphasizing the strategic airline business planning through the development of key airline success factors and how to influence them. The student is introduced to Airline economics, bilateral agreements, contemporary issues, product specification and distribution that are necessary to formulate integrated and effective plans.

HSM 459 Hospitality and Tourism Strategic Management (3.0); 3 cr. This capstone course in hospitality and tourism features the integration of business theories and practices into strategic decision making. Focus is on external and internal analysis for business opportunities, organizing for market competitive orientation, quality assurance and sustainable competitive advantage. The course is heavily case-oriented to bring forward realism, and develop critical thinking and decision making ability.

HSM 460 Special Topics in Hospitality (3.0); 3 cr. Selected readings and case studies referring to current topics and developments within the lodging and food service industries. The purpose is to expose students to recent developments,

current challenges and future trends affecting the industry. Studied during the course is the impact of change on hotel and food service management. This is a seminar and case study course.

TTM 462 Special Topics in Travel and Tourism (3.0); 3 cr. An overview and analysis of current developments, trends and challenges in travel and tourism. Studied during the course are the impact and decision challenges faced by management due to macro and micro environmental changes with the resulting shifts of tourism destinations and expectations. This is a seminar and case study course.

FBM 464 Special Topics in Food and Beverages (3.0); 3 cr. This course provides students discussion and problem solving in major and current topics in the F&B field. Topics are announced in the term schedule

HSM 485 Seminar in Hospitality and Tourism Management (3.0); 3 cr. Individual and group studies of a hospitality and tourism business in an area of special interest. It is an in-depth dissection of the managerial functions of the business concern. Findings and decisions are reported and discussed in class. *Corequisite:* HSM 451.

The Degree of Bachelor of Hotel Management and Tourism

Management of Event Production Emphasis

Topics covered are: Planning in Artistic production, decision making, organizing, staffing employees (actors, singers, technicians, etc...) related to the type of production, Leading the production, and controlling processes.

EPM 205 Costume design, make-up and hairdressing Management (3.0); 3 cr. A course for designers in the techniques of preparing a scene design for production in a shop. Drafting techniques, sheet layout, conventions, and symbols are stressed. Detailed practical experience in the preparation of costumes for the stage, including sketches for projected designs and plans for their execution.

EPM 206 Management of Sound, Light, and Setting (3.0); 3 cr. An introduction to the aesthetics and the process of scenic design through critique and discussion of weekly projects. This course prepares students for the demanding artistic and practical situations to be faced in the professional background. Large-scale and somewhat complex production problems, such as multiset plays, musical comedies, operas, ballets, events, and repertory situations may be addressed by students for presentation and critique.

EPM 211 Law and the Arts (3.0); 3 cr. An overview on the legal rights and responsibilities of artists and artistic institutions. The course includes topics about: laws of intellectual

property, laws related to theater and T.V., moral rights, personality rights (defamation, publicity, and privacy) and freedom of expression. The course also introduces the structure and the language of contractual agreements and includes discussions of several types of contracts employed in the theater, show and TV. Other legal issues relating to nonprofit arts organizations may also be discussed.

EPM 207 Economics in Event Production (3.0); 3 cr. This course applies economic principles to the Artistic production industry. Special emphasis is placed on supply and demand and the determination of prices. It also discusses the impact of the GDP, growth and fluctuations on the Artistic Production industry. The course further focuses on the contribution of Artistic Production to the overall performance of the economy. Topics include: Money and banking; unemployment and inflation; national income determination; fiscal and monetary policy related to Artistic Production Industry.

EPM 215 Business Communication (3.0); 3 cr. Through a series of exercises in written and oral communication, the course seeks to enhance students' ability to express themselves clearly and effectively. It provides students with the practical technical skills required for professional business communication.

EPM 216 Music and Sound for the Theater (3.0); 3 cr. This applied course provides a laboratory for conceiving and realizing music and sound for the theater. A primary objective is the development of a strong and dynamic relationship between the director, sound designer, and/or composer. Through a series of projects based on scripts and themes, participants explore the vast potential of designed sound while building an aural vocabulary and a critical ear.

EPM 217 British, American, and Modern Event Production Management (3.0); 3cr. An overview of organizational practice in the British, American, and modern professional Artistic Production. Starting from historic precedent, the course surveys the commercial production and the nonprofit production as organizational models. Topics include limited partnerships, nonprofit corporate structure, staff organization, and budgeting.

EPM 301 Financial Management (3.0); 3 cr. A study of the broad role of financial management in the realization of organizational goals. Topics include management control, resource allocation, analysis, funds acquisition and management, and elementary investment alternatives. *Prerequisite:* EPM 201.

EPM 302 Principles of Sales Management of Event Production (3.0); 3 cr. This course explores the fundamentals of marketing and public relations in Artistic Production and the interrelation of these two functions. It offers a practical guide to such marketing techniques as planning subscription campaigns, writing advertising copy, managing telemarketing campaigns, and targeting potential audiences. The basic tools of public relations are also covered, including dealing with journalists, writing press releases, pitching feature stories, and managing photo calls. Topics include economics of marketing, consumer behavior, matching of services with demand, efficient distribution, pricing, and effective communications.

EPM 303 Management of Event Production II (3.0); 3 cr. Applications of management techniques and organizational principles to technical production. Emphasis is placed on leadership and interpersonal skills as well as on organization, planning, and facilities utilization. Assignments provide further exploration of related topics in the form of written and/or presented material. *Prerequisite:* APM 203.

EPM 311 Contracts Law (3.0); 3 cr. Intends to teach how to read, write, and administer individual employment contracts. Topics covered include artistic employment contracts, duties of employer and employees; impact of legislation providing for safety, and welfare.

EPM 315 Theater Planning and Characteristics (3.0); 3 cr. This course introduces the process of planning and building a performing arts facility. Emphasis is placed on the planning process as practiced in architecture, with stress on space allocation, budgeting, functional layout, and construction procedures. The course also surveys the standard phases of architectural planning, bidding and project management, construction, building and fire code requirements, and the effect of architectural design considerations on performing arts facility design.

EPM 317 Planning Sound (3.0); 3 cr. Detailed experience in the preparation of sound, including sketches for projected designs and plans for their execution. This course is meant to enable the student know the use of the needed material in Event, Theater, and TV. *Prerequisite:* EPM206.

EPM 321 Labor Relations(3.0); 3 cr. An investigation of employee relations, with emphasis on the collective bargaining process. Topics discussed include wages and hours, personnel policy, grievances, negotiation of individual contracts, employment discrimination, union negotiations, and contract administration.

EPM 323 Managing the Production Processes (3.0); 3 cr. An investigation of the relationship between the artistic director and the managing director. This course explores the role of a managing director in the production process of regional theater, including season planning, artistic budgeting, contract negotiations, artist relationships, and production partnering.

EPM 330 Directing and Acting for Production Managers (3.0); 3 cr. An examination of the director's process and techniques, this course is intended to explore the relation of script requirements to the development of production style. Areas of focus include an overview of the process, conceptual beginnings, the design process, working with the script, and the acting process throughout rehearsals and performance. *Prerequisites:* EPM 205, EPM 206.

EPM 332 Planning the Scene Design (3.0); 3 cr. An introduction for all non-design students to the aesthetics and the process of scenic design through critique and discussion of weekly projects. Emphasis is given to the examination of the text and the action of the play, the formulation of design ideas, the visual expression of the ideas, and especially the collaboration with directors and all other designers. *Prerequisites:* EPM 205, EPM 206.

EPM 336 Design Studio (3.0); 3 cr. This course introduces different types of studios in Event, Theater, and TV. The student should be able to identify needed equipment and material for the above stated types.

EPM 401 Financial Management of Art (3.0); 3 cr. A study of the broad role of financial management in the realization of organization goals. Topics include management control, resource allocation, analysis, funds acquisition

and management, and elementary investment alternatives. A study of the broad role of financial management in the realization of organizational goals. Topics include management control, resource allocation, analysis, funds acquisition and management, and elementary investment alternatives. *Prerequisite:* EPM 301.

EPM 480 Internship Management – Theater (1.0); 1 cr. A supervised on-the-job work experience in the Artistic Production business. Being in theater, The student must arrange the job with the department and approve it with the related institution. Minimum 90 hours. *Prerequisites:* EPM 330, EPM 332.

EPM 481 Internship Management – Event (1.0); 1 cr. A supervised on-the-job work experience in the Artistic Production business. Being in event, The student must arrange the job with the department and approve it with the related institution. Minimum 90 hours. *Prerequisites:* EPM 330, EPM 332.

EPM 482 Internship Management–Television/Movie (1.0); 1 cr. A supervised on-the-job work experience in the Artistic Production business. Being in television, The student must arrange the job with the department and approve it with the related institution. Minimum 90 hours. *Prerequisites:* EPM 330, EPM 332

EPM 402 Critique in Artistic and Event Production Management (3.0); 3 cr. An in depth analysis of several readings, plays, events, films, etc...This course will enable the students reason clearly towards the choice of any Artistic Production, identify and screen any project while allocating properly resources. It provides a workshop in critical writing in which the student's work is analyzed and discussed by the class and the instructor. The class is divided into sections.

EPM 403 Strategic Planning and Conceptual Feasibility (3.0); 3 cr. Strategy is the match between a theater organization's qualifications and the opportunities afforded by a changing environment. It provides a guide to allocating human and financial capital when times are good, and to seeing opportunities for progress when times are bad. In seven four-hour sessions consisting primarily of case discussions, this course shows how to identify the organization's mission, analyze its internal and external environments, identify its strategy, resolve

tensions between mission and strategy, analyze organizational culture, and adapt the culture in order to implement robust strategies. *Prerequisite:* EPM 303.

EPM 415 Planning Scene Design II (3.0); 3 cr. Criticism of design problems for plays, musicals, ballet, and opera. This course continues the work started in EPM 332, carrying it a step further and focusing on design realization. *Prerequisites:* EPM 332.

EPM 430 Popular Theater and Commercial Aspects (3.0); 3 cr. This seminar surveys the business aspects of producing. Relationships examined include those with the author, director, cast, other personnel, the theater owner, unions, and agents. Other topics include financing, touring, and press relations.

EPM 433 Theater Safety (3.0); 3 cr. An introduction to theater safety and occupational health. Topics include chemical and fire hazards, accident and fire prevention, code requirements, emergency procedures, and training and certification in first aid and CPR.

EPM 434 Show Business (3.0); 3 cr. Describes the type of shows the processes used and adapted for each type. It helps the students learn internationally and locally about current and potential events that can be created.

EPM 435 Control Systems for Live Entertainment (3.0); 3 cr. The rapidly developing field of "show control" is the focus of this course. Show control is the convergence of entertainment, computing, networking, and data communication technologies.

EPM 437 Management of Television and Programs (3.0); 3 cr. It enables the student with advanced knowledge about television. An in-depth studies about television departments and probable creation of programs.

EPM 490 The Production Manager's Senior Project Theatre (3.0); 3 cr. Through practice auditions of varied material and visits from Theater industry professionals (working actors, agents, casting agents, and directors), third-year actors acquire the information and skills they need to make the transition into the professional world. In their final term, students choose and rehearse scenes, which are presented to agents, casting agents, and producers. *Co-requisite:* EPM 330, EPM 403.

EPM 491 The Production Manager's Senior Project Event (3.0); 3 cr. Through practice auditions of varied material and visits from Event industry professionals (working actors, agents, casting agents, and directors), third-year actors acquire the information and skills they need to make the transition into the professional world. In their final term, students choose and rehearse events, which are presented to agents, casting agents, and producers. *Co-requisite:* EPM 330, EPM 403.

EPM 492 The Production Manager's Senior Project TV/Movie (3.0); 3 cr. Through practice auditions of varied material and visits from Television industry professionals (working actors, agents, casting agents, and directors), third-year actors acquire the information and skills they need to make the transition into the professional world. In their final term, students choose and rehearse scenes, which are presented to agents, casting agents, and producers. *Co-requisite:* EPM 330, EPM 403.

GRADUATE PROGRAMS

Director: *Dr. Rock-Antoine Mehanna*

Administrative Assistant: *Miss Maya Rashed*

The Degree of Master of Business Administration (MBA)

The MBA Program consists of four parts:

I. Preparatory Courses

Applicants to a graduate degree program who do not have a BBA or its equivalent will be required to take some preparatory courses. These courses provide a management base upon which students can build the courses required for a graduate degree.

These courses are in addition to the MBA degree requirements. The grades of these courses are not included in the GPA. MBA candidates should score an overall average of “B” in these courses. Only upon successful completion of these courses candidates join the regular MBA program.

The preparatory courses are:

ACO	500	Fundamentals of Financial Accounting	3 cr.
BAD	500	Fundamentals of Management	3 cr.
BAF	500	Fundamentals of Financial Management	3 cr.
ECN	500	Fundamentals of Micro and Macro Economics	3 cr.
¹ HTM	500	Fundamentals of Hospitality Management and Tourism	3 cr.
STA	500	Applied Statistics for Business and Economics	3 cr.

These or some of these courses may be waived upon the recommendation of the Faculty Graduate Committee based upon the undergraduate degree or work experience of the student. They could also be waived based on proficiency tests.

II. Required Common Core Courses (18 cr.)

All candidates for the graduate degree, irrespective of their area of concentration, must complete the following six common core courses. These courses develop an understanding of the modern business organizations and their functioning, and build a strong foundation in principles, theories of business, upon which students can build a variety of specializations within the degree program.

The required common courses are:

ACO	603	Financial and Managerial Accounting	3 cr.
BAD	601	Contemporary Management	3 cr.
BAF	601	Financial Management	3 cr.
ECN	601	Microeconomic and Macroeconomic Theory I	3 cr.
MRK	601	Marketing Strategy	3 cr.
RMC	605	Research Methodology	3 cr.

These core courses are thought not as separate, independent disciplines but as integrated, coordinated basic set of tools for managerial decision making, and they can be applied in a broad range of professional settings in the private and the public sectors.

III. Concentration Requirements (12 cr.)

After completing the core courses, degree candidates build further skills and depth of knowledge in their choice of concentration in one particular area of business. See below the curriculum of each area of concentration.

¹ Required only of candidates who choose the MBA-Hotel Management and Tourism program.

IV. Faculty Electives (3-6 cr.)

Graduate students have the opportunity to choose three credits (in case they choose the thesis option) or six credits (in case they choose the research project option) offered by the Faculty to either diversify their background, or widen their area of concentration.

V. Research (3-6 cr.)

After completing 30 graduate credits, students have to write a thesis (6 cr.) on a significant problem in business administration selected from their area of concentration, or work on a research project (3 cr.).

The Curriculum of MBA Economics Emphasis - Degree Requirements (39 credits)

Required Common Core Courses **18 cr.**

ACO 603, BAD 601, BAF 601, ECN 601, MRK 601, RMC 605.

Concentration Requirements **12 cr.**

ECN 603, ECN 607, ECN 609, ECN 615.

Faculty Electives **3-6 cr.**

Option I: Thesis Option

ONE course to be chosen from the following: BAD 617, ECN 605, ECN 611, ECN 619, ECN 629, ECN 631, ECN 635, ECN 639.

Option II: Research Project Option:

TWO courses to be chosen from the following: BAD 617, ECN 605, ECN 611, ECN 619, ECN 629, ECN 631, ECN 635, ECN 639.

Research **3-6 cr.**

Option I: Thesis Option BAD 690 (6 cr.)

Option II: Research Project Option: BAD 680 (3 cr.)

The Curriculum of MBA Finance Emphasis - Degree Requirements (39 credits)

Required Common Core Courses **18 cr.**

ACO 603, BAD 601, BAF 601, ECN 601, MRK 601, RMC 605.

Concentration Requirements **12 cr.**

BAF 603, BAF 605, BAF 619, BAF 625.

Faculty Electives **3-6 cr.**

Option I: Thesis Option

ONE course to be chosen from the following: BAD 639, BAF 607, BAF 609, BAF 613, BAF 615, BAF 617, BAF 621, ECN 615.

Option II: Research Project Option:

TWO courses to be chosen from the following: BAD 639, BAF 607, BAF 609, BAF 613, BAF 615, BAF 617, BAF 621, ECN 615.

Research **3-6 cr.**

Option I: Thesis Option BAD 690 (6 cr.)

Option II: Research Project Option: BAD 680 (3 cr.)

**The Curriculum of MBA
Project and Operations Management Emphasis - Degree Requirements
(39 credits)**

Required Common Core Courses **18 cr.**
ACO 603, BAD 601, BAF 601, ECN 601, MRK 601, RMC 605.

Concentration Requirements **12 cr.**
PRM 601, PRM 603, PRM 605, BAF 607.

Faculty Electives **3-6 cr.**

Option I: Thesis Option

ONE course to be chosen from the following: BAD 639, BAF 609, BAF 613, BAF 615, BAF 617, BAF 621, ECN 615, ECN 639.

Option II: Research Project Option:

TWO courses to be chosen from the following: BAD 639, BAF 609, BAF 613, BAF 615, BAF 617, BAF 621, ECN 615, ECN 639.

Research **3-6 cr.**

Option I: Thesis Option BAD 690 (6 cr.)

Option II: Research Project Option: BAD 680 (3 cr.)

**The Curriculum of MBA
Management and Strategy Emphasis - Degree Requirements
(39 credits)**

Required Common Core Courses **18 cr.**
ACO 603, BAD 601, BAF 601, ECN 601, MRK 601, RMC 605.

Concentration Requirements **12 cr.**
BAD 603, BAD 611, BAD 631, BAD 645.

Faculty Electives **3-6 cr.**

Option I: Thesis Option

ONE course to be chosen from the following: BAD 605, BAD 609, BAD 615, BAD 617, BAD 621, BAD 639, MRK 613, PRM 601.

Option II: Research Project Option:

TWO courses to be chosen from the following: BAD 605, BAD 609, BAD 615, BAD 617, BAD 621, BAD 639, MRK 613, PRM 601.

Research **3-6 cr.**

Preparatory Courses: For Non-Business Undergraduate Degree Holders

ACO 500 Fundamentals of Financial Accounting (3.0); 3 cr. Focuses on the basic financial accounting principles and more advanced procedures of accounting for sole proprietorships, partnerships and corporations. Explanation of the techniques of measuring, classifying, summarizing, reporting and interpreting financial information. Accounting software is used.

BAD 500 Fundamentals of Management (3.0); 3 cr. An introduction to the basic principles and theories of management. It covers management objectives, organizational structures, material and human resource utilization, decision making, planning, and organizing.

BAF 500 Fundamentals of Financial Management (3.0); 3 cr. A condensed version of financial management including the role of the financial manager and the techniques for obtaining and using funds to maximize the value of the firm. Topics covered include: discounted CF analysis, valuation methods, risk and return, financial analysis, financial planning and control, working capital management, cost of capital, capital structure, common stock and long term debt financing, and credit management.

ECN 500 Fundamentals of Micro and Macro Economics (3.0); 3 cr. Covers the basic principles, theories, and policies in both Micro and Macro Economics. At the Micro level, it

covers demand and supply analysis, consumer's theory, production costs, and market structure. At the Macro level it covers national income and output determination, money and banking, unemployment and inflation, and fiscal and monetary policies

HTM 500 Fundamentals of Hospitality Management and Tourism (3.0); 3 cr. An examination of hospitality operations and the areas of critical importance to the tourism industry. Required only of students with no academic background in hospitality and tourism management.

STA 500 Applied Statistics for Business and Economics (3.0); 3 cr. The course covers the following main topics: Introduction to statistics and probability, discrete and continuous random variables, sampling distribution, hypothesis testing and estimations, analysis of variance, simple and multiple regression, and time-series analysis. The course also applies these concepts and techniques to actual real world business and economic situations.

Graduate Courses: Accounting

ACO 603 Financial and Managerial Accounting (3.0); 3 cr. The course reviews the accounting system used to prepare financial statements of companies and groups in a national and international environment. It

analyzes the business transactions, deals with financial recording and accounting procedures, contributes to the measuring of product and activity segment performance, and provides managers with decision analysis tools.

Graduate Courses: Economics

ECN 601 Microeconomic and Macroeconomic Theory I (3.0); 3 cr. This course focuses on the fundamental foundations of microeconomic and macroeconomic theories. Topics covered include: theory of choice; elasticity; utility theory; production and cost theories; production and pricing under different market structures; factor markets; determination of national income; economic growth models; money and central banking; fiscal and monetary policies and economic activity; inflation and unemployment.

ECN 603 Microeconomic and Macroeconomic Theory II (3.0); 3 cr. This course investigates more thoroughly and more rigorously the topics covered in ECN 601. Additional topics will cover: intertemporal choice; decision making under uncertainty; general equilibrium analysis; New Classical, New Keynesian and Real Business Cycle models of macroeconomy; open economy macroeconomics. *Prerequisite:* ECN 601.

ECN 605 Monetary Economics (3.0); 3 cr. The course examines the theoretical and practical aspects of money's role in the economy. Topics covered include: definitions of money; demand and supply of money; the transmission mechanism of monetary policy; central banking and money supply control; the theory of monetary policy; money, inflation, and unemployment; Keynesian-Monetarist-Neoclassical debate. *Prerequisite:* ECN 601.

ECN 607 Public Finance and Fiscal Policy (3.0); 3 cr. This course analyzes the role of the public sector in the economy. The aim is to understand the reasons for government interventions and the extent of intervention, and the response of individuals and firms to government intervention. Topics covered include: different views about government role, market failures, externalities, public goods, voting, the efficiency and equity consequences of welfare policies and programs, the efficiency and equality consequences of different tax systems and deficit financing. *Prerequisite:* ECN 601.

ECN 609 Econometrics (3.0); 3 cr. This course represents an introduction to the basic tools of econometrics. It offers a combination of econometric theory and hands-on practical training for graduate courses. The aim of this course is to provide realistic applications through numerous real-world examples of model specification, estimation, and hypothesis testing. The course includes background information on mathematics, probability, statistics, and software applications. Moreover, this course will present a balanced treatment of both microeconomic analysis (cross-sectional) and macroeconomic analysis (time-series). *Prerequisites:* ECN 601 and RMC 605.

ECN 611 Economics and Politics (3.0); 3 cr. The course explores the most important frameworks for understanding the relation between politics and economics. It studies for example how the timing of elections, the ideological orientation of governments, and competition among political parties influence unemployment, economic growth, inflation, and various monetary and fiscal policy instruments. *Prerequisite:* ECN 601.

ECN 615 International Economics (3.0); 3 cr. The course is designed to apply international trade theory in order to provide an understanding of the principles governing the design, formulation, and implementation of trade

policies, and the international financial aspects of foreign trade. Topics covered include: survey of international trade theories; foreign direct investment; regional trading agreements; instruments of trade policy; trade regulations and industrial policies; balance of payments; foreign exchange rate systems; foreign exchange forwards, futures and options; balance of payments adjustment; open economy macroeconomics; the international financial system. *Prerequisite:* ECN 601.

ECN 619 E- Commerce Economics (3.0); 3 cr. The purpose of this course is to apply the basic principles of economics to the area of electronic commerce and to study the impact of the economic commerce revolution on the economy. Topics covered include: Foundations of electronic commerce; business strategies and conduct in electronic marketplace; internet marketing and advertising; intellectual property rights and the internet; online financial markets; economics of online banking; digital cash and electronic payments; regulatory issues in electronic markets; electronic marketplace and aggregate economic activity; electronic commerce and the world trading system. *Prerequisite:* ECN 601.

ECN 629 Economic Development (3.0); 3 cr. The purpose of this course is to survey the socio-economic problems of the developing countries with a special focus on ME countries and to sharpen the student's analytical skills in analyzing these problems and finding solutions. The course will be covering theories of underdevelopment and development, structural diversity and common characteristics of developing countries, strategies of economic development and the financing of economic development. *Prerequisite:* ECN 601.

ECN 631 Environmental and Natural Resource Economics (3.0); 3 cr. This course is an introduction to the natural resources, environmental economics, and sustainable development. Topics covered include: introduction to resources and environmental economics; ethical foundations of environmental economics; economic concepts and analysis for examining natural resource use; the valuation of environmental resources; the sustainable development; depletable, recyclable, non-recyclable, replenishable, storable, renewable and reproducible resources; the efficient and optimal use of environmental resources; the economics of pollution and pollution control policy;

international and global environmental pollution problems; global warming; oil economics.
Prerequisite: ECN 601.

ECN 635 Behavioral Economics (3.0); 3 cr. The course integrates psychological and economic analysis of behavior. Psychological topics include social preferences, impulsivity, bounded rationality, loss aversion, over-confidence, etc. It discusses how psychological experiments have been used to learn about preferences, cognition, behavior, etc. Economic topics include arbitrage, equilibrium, rational choice, game theory, etc. It integrates these psychological and economic concepts to understand behavioral phenomena, such as

portfolio choice, credit-card borrowing, retirement saving, auction bidding, etc.
Prerequisite: ECN 601.

ECN 639 Labor Economics (3.0); 3 cr. The course studies the labor market, collective bargaining and union impacts. Topics covered include: demand for and supply of labor; wage determination; labor force participation rates; investment in human capital; labor unions and collective bargaining; economic impacts of unions; labor legislation; labor market discrimination; wage structure; wage theories; labor productivity; inflation and unemployment.
Prerequisite: ECN 601.

Graduate Courses: Finance

BAF 601 Financial Management (3.0); 3 cr. This course provides a comprehensive and contemporary coverage of the financial management, focusing on shareholder wealth maximization and cash flow management, as well as on the international aspects of financial management. In addition, this course covers financial analysis and financial decisions, capital budgeting decisions under risk, and capital structure theory. *Prerequisite:* ACO 603.

BAF 603 Investment and Portfolio Analysis (3.0); 3 cr. The course covers the functioning of the credit markets in both the advanced and the developing economies (emerging markets). It evaluates the role of credit markets in financing economic development both at the project level (micro) and the level of a whole sector or the over-all economy (macro). In addition the course focuses on the analysis of marketable securities, other types of investments, evaluation, trading systems. Case studies will be widely used.
Prerequisite: BAF 601.

BAF 605 Commercial Bank Financial Management (3.0); 3 cr. The objective of this course is equip students with principles and tools which allow them to understand sources and uses of bank funds and the risk of banking, to manipulate economic models of bank performance and valuation, to properly operate the bank's Asset-Liability Management and interest rate risk, to be familiar with the traditional approach to business lending and with modern methods for analyzing and managing credit, to perform the liquidity risk and liquidity management, and to go into the operational risk,

securitization, and derivatives in greater depth.
Prerequisite: BAF 601.

BAF 607 Investment Valuation (3.0); 3 cr. Valuation is at the heart of every investment decision, whether that decision is to buy, sell, or hold. But the pricing of any financial asset has become a more complex task in modern financial markets. Investment Valuation provides expert instruction on how to value any type of asset-stocks, bonds, options, futures, real assets, and much more. The use of real-world examples and the most current valuation tools will be done through the theory and application of valuation models. *Prerequisite:* BAF 601.

BAF 609 Entrepreneurial Finance (3.0); 3 cr. This course covers the process of starting a business, raising capital, managing the finances of the business throughout its growth, and ultimately cashing out of the business. It also includes the process on purchasing a business via a leveraged buyout. The course is very practical but rigorous to fit middle market and emerging business firms. It gives students real-world experiences and approaches rather than theories. Entrepreneurial Finance delivers real-world advice and insightful information sought by those who want to start their own businesses.
Prerequisite: BAF 601.

BAF 613 Short Term Financial Management (3.0); 3 cr. This course includes broader and integrated coverage of treasury and working capital management, while using valuation and the cash flow timeline as integrating themes. Up to date presentations of developments in treasury management, banking deregulation, globalization of financial services delivery,

electronic commerce, international cash management, and foreign exchange risk, will be covered in this course. *Prerequisite:* BAF 601.

BAF 615 Financial Engineering (3.0); 3 cr. The objective of this course is to present the numerous tools and the different techniques enabling a company or a shareholder to conserve or to acquire the control of a company while minimizing Financial contribution in terms of equity. Main subjects to be covered: leverage (legal leverage, earn-out, financial leverage, financial set-up with leverage effect, Leverage Build-Up LBO, Leverage Buy-out, etc.), consolidation and acquisition strategies (MBI, MBO, etc), operations concerned with financial engineering (Take Over Bid TOB, Share Exchange Offer SEO, acquisitions, mergers, etc). *Prerequisite:* BAF 601.

BAF 617 Investment Banking (3.0); 3 cr. The course focuses on the theory and practice of investment banking. Topics covered include corporate restructuring, evaluation of the cost-benefit of mergers, underwriting, packaged syndicated loans, and other forms of financing corporate deals emphasized. *Prerequisite:* BAF 601.

BAF 619 Corporate Financial Analysis in a Global Environment (3.0); 3 cr. Corporate Financial Analysis in a Global Environment emphasizes the financial concepts and tools essential for understanding the financial impacts of business decisions. Current examples of

actual business situations will be applied to demonstrate how financial tools, concepts, and theories can be used by managers to improve decision-making and enhance business performance. The course includes a discussion of international financial statements and the financial impacts of changes in foreign exchange rates. *Prerequisite:* BAF 601.

BAF 621 Capital Budgeting (3.0); 3 cr. This course explores all areas of capital budgeting and all the strategies used to make long-term financing decisions. Utilizing a strategic framework, it discusses how the key concepts synchronize with overall corporate strategies and goals. Most important topics to be covered: Alternate measures of capital investment desirability, measuring incremental cash flows, single investment risk analysis, Arbitrage Pricing Theory, Option Pricing Theory, lease analysis, capital rationing, etc. *Prerequisite:* BAF 601.

BAF 625 Derivatives (3.0); 3 cr. This course focuses on options and/ or futures, derivatives, and/ or risk management at an advanced level. It presents a detailed but flexible coverage of options, futures, forwards, swaps, and risk management – as well as a solid introduction to pricing, trading, and strategy – and offers an outstanding blend of institution material, theory, and practical applications. *Prerequisite:* BAF 601.

Graduate Courses: Hospitality Management

HTM 605 Legal and Ethical Aspects in Hospitality and Tourism (3.0); 3 cr. An advanced study of the local and international legislation and directives as they apply to the hospitality and tourism industry. Special emphasis on the application of contemporary law and ethics in employee, guest, vendor and environment relations. Contract negotiation, specification and interpretation are also reviewed. Cases of legal risks in tourism are examined.

HTM 607 Cost Control in Hospitality Operations (3.0); 3 cr. In-depth analysis of different methods of cost control strategy and operations, including information systems and computerized cost control. Focusing on issues that affect a manager's decisions using real-world cases in order to provide solutions to cost

control problems and improve performance in hospitality operations. *Prerequisite:* ACO 603.

HTM 609 Competitive Strategic Management for Hospitality and Tourism (3.0); 3 cr. An integrative course designed to develop strategic thinking, planning and implementation for competitive advantage. Focus is on change management in the global dynamic corporate environment. *Prerequisites:* ECN 601, MRK 601, HTM 607

HTM 613 Creating and Managing for Service Excellence (3.0); 3 cr. Advance usage of marketing concepts and techniques to create, operate and evaluate service systems for hospitality/ tourism enterprises. Emphasis on managing the design, communication and delivery of differentiating quality service.

HTM 629 Advanced Food and Beverage Management (3.0); 3 cr. Advanced operational and managerial skills needed to be successful in food & beverage operations. Emphasis on market-based analysis, concept development, menu planning, operations and catering management, customer service processes, and analysis of food and beverage current issues.

HTM 637 Productivity and Quality Performance in Hospitality Management (3.0); 3 cr. Holistic implementation of contemporary management principles and leadership styles in the hospitality industry. Emphasis on continuous service improvement, human resource involvement and customer satisfaction through the use of total quality management. Current issues, workplace diversity, organizational change and global citizenship are examined and challenged.

HTM 640 Hospitality Asset Management (3.0); 3 cr. Managing the hospitality investment portfolios to meet the specific objectives of shareholders in order to maximize return on

investment and build strategies for value creation through optimization of asset management. Topics include analyses and negotiation of management contracts, benchmarking property performance, capital improvement decisions, and financial projections and valuations. *Prerequisite:* BAF 601.

HTM 650 Hospitality Strategies and Operational Simulation (3.0); 3 cr. An extensive problem-solving course integrating all aspects of hospitality operations management handling internal and external challenges and changes. Group workshop style of instruction throughout. *Corequisite:* HTM 609.

HTM 654 Problems and Critical Issues in Hospitality Operations (3.0); 3 cr. Analysis of special recurring problems and issues confronting the hospitality and tourism industry. Extensive use of critical thinking skills, synthesis of information, impact assessment and decision making skills to solve operational dilemmas. *Prerequisite:* HTM 607.

Graduate Courses: Management and Strategy

BAD 601 Contemporary Management (3.0); 3 cr. The complexity of management as a field of study is reflected in the range of approaches taken to its presentation in this course students will learn how to relate traditional management concepts to contemporary management challenges on issues such as people, governance, total quality, social responsibility, and the global business environment.

BAD 603 Management of Organizations (3.0); 3 cr. This course prepares students to manage organizations and to develop their leadership and management skills. It helps students to better read the business environment, handle a variety of critical situations, understand the behavioral nature of management and explore the means by which managers can achieve successful results in organizations.

BAD 605 Intercultural Management (3.0); 3 cr. The course enables students to better understand the national and international specificity of organizations. It compares and analyzes organizations worldwide from managerial, sociological and ethnological standpoints as open systems interacting with economic and institutional environments.

BAD 609 Managing Information Technology (3.0); 3 cr. The course explores the competitive and strategic uses of information technology (IT) in modern business organizations. Topics covered include management in the information age, IT's strategic business role, the need for planning and developing an IT strategy, modern telecommunications system, and controlling information resources.

BAD 611 Entrepreneurship I (3.0); 3 cr. This course will be an overview of entrepreneurship, with emphasis on the role of entrepreneurs, finding products/ services suitable for new ventures, financing new ventures, and preparing business plans. Case studies will be discussed. Each student will prepare an abbreviated business plan for a venture developed by the student. The projects will be flexible enough to accommodate students with special interests. Ideally, projects will have the potential of becoming significant businesses. There will be several guest entrepreneurs and some cases illustrating new business creation in Lebanon and the Middle East.

BAD 615 Entrepreneurship II (3.0); 3 cr. This course will focus in further depth on developing a plan for a new business. Class work will

consist of additional topics related to entrepreneurship, including legal, accounting, managerial, and financial aspects of starting new companies. Some cases and guest lectures will be included. The principal project will be a group assignment of up to four students to develop a complete business plan for a new venture normally taken from those developed in the Entrepreneurship I course.

BAD 617 Corporate Governance (3.0); 3 cr. Corporate governance has become an important issue because of its vital role in the well being of a company as a whole. Market globalization widens the possibilities of financing companies but creates new constraints to satisfy requirements of transparency, efficiency, profitability, and risk minimization for investors.

BAD 621 Personality Theory (3.0); 3 cr. The course develops in students the knowledge of the main psychological theories of personality and individual behavior and presents the main schools of thought in personality and behavioral analysis. It deals also with personal development in professional life and with the techniques of personal development.

BAD 623 Strategic Human Resources Development (3.0); 3 cr. Strategic Human Resources Development, needs to be seen as part of the strategic management process of a given organization, since the organization is dependent on effectively utilizing and enhancing all of its sources to cope with current and future contingencies. It is about human resources development strategies which can contribute to the over all direction of organization.

BAD 625 Aligning Human Resources and Business Strategy (3.0); 3 cr. As a company's strategies change, the type of management competencies and styles need to change as well, and human resources development is responsible for this alignment. This course will help the student to identify and evaluate current and emergent themes which professionals in the human resources development field need to know in order to increase their strategic awareness and effectiveness.

BAD 627 E-Marketing and Business Models (3.0); 3 cr. The course explores the latest applications in electronic trading and the necessary infrastructure needed to make e-business possible and efficient. It deals also with the concepts and tools that marketing managers

have to master in order to design and implement their company's e-marketing strategies.

BAD 630 Organization Theory and Design (3.0); 3 cr. The course studies the crucial issue of leadership in large and small businesses, in local and international setting, and evaluates the different theoretical models on management leadership. It also applies the models to specific cases and eminent individuals that symbolize leadership in business and other settings.

BAD 631 Strategic Management (3.0); 3 cr. The course integrates the relevant dynamic components of all the functional areas of management. Emphasis is put on strategy formulation and implementation. Decision simulation models for strategic global planning are analyzed and applied.

BAD 634 Labor-Management Relations (3.0); 3 cr. The course discusses the relationships between unions, workers, management and government. Topics covered include collective bargaining, labor disputes resolution, strikes, arbitration, wages, employment security and labor legislation.

BAD 639 Financial Criminal Law (3.0); 3 cr. The purpose of this course is to identify all kind of penal risks such as: money laundering, hunch backed, fraudulent bankruptcy, forgery, breach of trust, checks without provision, fraud, etc. Moreover, this course will provide students with real-life cases.

BAD 642 Management Leadership (3.0); 3 cr. The course is an in-depth examination of the nature of contemporary complex organizations. Topics covered include organizational goals, environment, technology, change, information, power, conflicts, structures and personal satisfaction.

BAD 645 Operations Management (3.0); 3 cr. The course covers topics such as operations strategy, product and process designs, the choice of appropriate technology, quality control, scheduling, supply chain management, JIT systems, etc...

BAD 680 Research Project 3 cr. The purpose of this course is the application of research methodology and is related to the required research project to be completed by each MBA student after the accomplishment of his/her 30 credits.

BAD 690 Thesis 6 cr. Research on a significant problem in business administration selected by

the candidate from a concentration area or from other topics of the MBA program.

Graduate Courses: Marketing

MRK 601 Marketing Strategy (3.0); 3 cr. This course examines the business environment and the strategic marketing decisions faced by the top management. It presents the key concepts of marketing strategy, strategic decision-making, and develops a business strategy in a field project. Examples of different types of organizations are utilized, with emphasis on finding solutions to real world business problems.

MRK 603 Product Development and Management (3.0); 3 cr. The course explores each step in the strategy, opportunity identification, design, testing, launching, and management stages of a new product. Topics include perpetual mapping, estimating potential sales, quality control and customer services. Students are expected to create complete programs for new products.

MRK 605 Interactive Marketing (3.0); 3 cr. The media tools, the Internet and interactive television are dramatically changing marketing practices and consumer relations to the firm. The course introduces students to the key concepts of this new marketing medium as well as to promoting a brand over the Internet, and the emergence of new services on interactive media.

MRK 611 Marketing Research (3.0); 3 cr. The course makes use of both quantitative and qualitative research methods for obtaining and analyzing data for marketing decisions. Topics include the marketing research process, research design procedure and choices, techniques of primary and secondary data collection, analytical methods such as regression analysis, multidimensional scaling and conjoint, cluster, factor, discriminate and logic analyses. An appropriate software is used in the course.

MRK 613 Brand Management (3.0); 3 cr. This course deals with brands, why they are important, what they represent to consumer, and what should be done by firms to manage them properly. The course materials will provide the student with insight into how profitable brand strategies can be created by building, measuring, and managing the most valuable intangible assets "Brand".

MRK 615 Consumer Behavior and Rights (3.0); 3 cr. This course examines the many forms of consumer behavior, the principles explaining why consumers behave the way they do, the implications for marketing and advertising, and the methodologies and research techniques used for studying consumer behavior. It focuses on the main rights of the consumer and the different means to protect them.

MRK 619 Customer Relationship Management (3.0); 3 cr. Customer relationship management is at the core of consumer and business-to-business markets. The concept of (CRM) is based on the simple idea of treating different customers differently, it can be applied to all industries and in numerous business settings. The commonly held view is that business success hinges on creating long-term, profitable, customer relationship.

MRK 621 Sales Force and Sales Promotion (3.0); 3cr. The course shows how to enhance selling effectiveness, sales organization, and sales management decision problems. It presents the different stages of behavioral communication policy, and the techniques for measuring promotional results.

Graduate Courses: Project and Operations Management

PRM 601 Project and Operations Management (3.0); 3 cr. This course covers tools and keys used to project success. The system development life cycle will be drawn and deeply analyzed. Majors topics to be treated: concept of a project, analysis & design, development, transition to development, scope, time estimation and management, cost estimation, cost tracking, and procurement management, reducing risk, defining and delivering quality, teamwork, integration, etc. *Prerequisite:* BAF 601.

PRM 603 Project Planning and Control (3.0); 3 cr. This course teaches students how to create a business plan. Many real-life examples and exercises demonstrating in detail the process of writing a business plan are provided in this course. Examples will be drawn from product type companies, service companies and retailers, covering the majority of issues that are unique to

each of these industries. The course also discusses the techniques of controlling the project. *Prerequisite:* BAF 601.

PRM 605 IT Tool for Project Management (3.0); 3 cr. This course focuses on systems issues. The primary focus is to examine the many issues facing MIS project managers. It incorporates the Project Management Institutes Body of Knowledge (PMBOK). Traditional project management topics will be covered such as project adoption, planning, scheduling, and implementation while encouraging students to view the projects holistically and analytically. Utilizing the most current software and project management tools, the course provides students with the most effective strategies for today's IT project managers.

Graduate Courses: Research Methodology

RMC 605 Research Methodology (3.0); 3 cr. This course develops an intensive and advanced study of the objectives and methodologies of research for business decisions and how to design and report experiments. Topics covered include Techniques for defining problems; Research Design; Research proposal; how to write a research; Fundamental of data

Manipulation: Analysis and Interpretation using the statistical package "SPSS"; Multiple Regression; ANOVA; MANOVA; Principal Components Analysis; Factor Analysis and Canonical Correlation.

THE EXECUTIVE MBA/MIB JOINT PROGRAM

Program Features

- Conceived as an executive program specializing in International Business, the MBA-MIB jointly offered by Notre Dame University and Bordeaux Management School (or Bordeaux École de Management—BEM) offers a unique opportunity to enhance both professional development and global corporate exposure.
- The program is taught entirely in English by a renowned international faculty from NDU, Europe and the US. The program is scheduled over an 10-month period of teaching at NDU campus. Courses are offered in the evening and, exceptionally, on Saturday mornings.
- To complete their academic experience participants are required to do a *Global Corporate Experience (GCE)*, which will further enhance their hands-on experience of global organizations.
- Throughout the academic year, participants will work in groups in the elaboration of a *Global Business Plan (GBP)* on a company they would like to create or on an existing one.
- To meet the requirements of the program, participants need to submit a thesis and defend it in front of a jury.
- The program starts at the beginning of October and ends in July. For those participants who require it, the preparatory period will take place during the last two weeks of September.
- ***Graduates will receive two degrees: the MBA from Notre Dame University (NDU) and the Master of Science (MS) from Bordeaux Management School (BEM) in France.***

Program Details

- It is a high-quality Executive program leading to both a Lebanese degree (MBA) and a French degree (MIB).
- The Master of International Business (MIB) is an internationally accredited degree by the *Grandes Ecoles* system in France and by the Lebanese government.
- Bordeaux Management School possesses the accreditations (EQUIS, AMBA) of the best European Business Schools.
- Through the Bordeaux Management School, this global joint Executive MBA program is affiliated with the *Bordeaux Chamber of Commerce and Industry*.
- Participants having successfully completed the MBA-MIB program may apply for a doctoral program in any university in Europe or overseas.
- The program is conducted 100% in English.
- It specializes in International Business with a strong focus on the geo-political and cultural environment of international business.
- Participants have the opportunity to attend seminars in Bordeaux or in any of the program partners such as Wuhan University in China.
- It is a practice-oriented program with hands-on teaching objectives.
- The teaching methodology includes both individual and teamwork.
- The faculty team is made up of a highly qualified international faculty from NDU, BEM, and other major international universities. Professors enrich the program with their global corporate experience, outstanding academic background, and complementary teaching styles.

- Courses are divided into the following teaching units:
 - Accounting
 - Business Law
 - Corporate Finance, Economics
 - Negotiation, Communication
 - Strategy, Marketing
 - Human Resources, Business Ethics
 - International Business
 - Production, Operations, Logistics
- The *Global Corporate Experience (GCE)* is intended to enhance participants' exposure to the global challenges of organizations. The *GCE* could take the form of attendance to a Corporate Seminar either in Lebanon or abroad. It could also be the result of a short experience in a company, preferably other than the one where the participant is currently working. Participants will submit a report on their *GCE*. The Academic Committee will approve participants' choice of *GCE*.
- For the *Global Business Plan (GBP)* participants will choose a company they would like to create or an existing one seeking to expand its international operations. The *GBP* will be presented at the end of the year in front of a group of *virtual* investors. The *GBP* is intended to improve participants' entrepreneurial, organizational, and decision-making skills.
- Graduates from this joint executive program will benefit from the global network of both NDU and BEM Alumni Associations.

Program Highlights

- The program mainly attracts executives seeking to enhance their global corporate exposure.
- Participants come from different backgrounds and a wide range of economic sectors (e.g., business, engineering, law, sciences, arts, social sciences, health care, etc.)
- There is a strong linkage between the program and the corporate world.
- The program's Advisory Board is made up of key business actors from major international companies based in Lebanon and overseas.
- The program is international and cross-disciplinary.
- Free discussions from a global and strategic perspective are an essential part of the teaching methodology.
- There is intensive commitment from both participants and faculty.
- Professors are evaluated by students.

REGULAR PROGRAM (Starts first week of October)

Accounting

Course Title	Hours
Managerial Accounting	18

Business Law

Course Title	Hours
International Business Law and Property Rights	18
International Business Transactions	18

Corporate Finance, Economics

Course Title	Hours
Economic Analysis: Prices and Markets	12
Monetary Systems and Capital Markets	12
International Financial Analysis	18
International Trade and Public Policies	18
Corporate Finance	18
Financial Instrument and Risk Management	18
Portfolio Management	18
Islamic Banking and Finance	12

Negotiation, Communication

Course Title	Hours
Organizational Leadership and Team Development	12
International Commercial Negotiations	18
Business Communication	12

Strategy, Marketing

Course Title	Hours
Marketing Management	12
Mergers, Acquisitions and Strategic Alliances	16
International Marketing	18
Strategic Risk Management	16
Corporate Strategy	12
International Corporate Strategy	12
Business Simulation	30

Human Resources, Business Ethics

Course Title	Hours
International Organizational Behavior and HR Management	18
Business Ethics	12

International Business

Course Title	Hours
Global Business Environment	18
Doing Business in the Middle East	18
Intercultural Management	18
Global Political Economy: China and India	12
Global Political Economy: The Arab World	12
Geo-economy and Competitive Intelligence	18

Production, Operations, Logistics

Course Title	Hours
Operations Management	18
Business Research and Case Methodology	18
International Supply Chain Management	18
Management Information Technology and E-business	18

Auxiliaries

Course Title	Hours
Global Corporate Experience and Report	25
Global Business Plan	25
MS thesis	N/A

TOTAL NUMBER OF HOURS:**586****Summer Preparatory Program**

Applicants having little or no background in business or economics are required to attend a two-week Preparatory Session from mid September until the end of it. Courses will take place during the evening.

Course Title	Hours
Management and Marketing	12
Accounting	12
Economics	12
Quantitative Methods for Decision Makers	12

FACULTY OF ENGINEERING

Dean: *Dr. Elias Nassar*

Administrative Assistant: *Miss Jeanette Elias*

HISTORICAL OVERVIEW

In 1993, a project for establishing the Faculty of Engineering (FE) was submitted to the Lebanese Government; in 1996 the FE was established by Decree no 9278. The four majors in the initial decree were: Civil Engineering (150 credits) Architecture (202 credits) Mechanical Engineering (150 credits) Electrical Engineering (150 credits), Computer Engineering (150 credits). After one year, in 1997, Computer Engineering program started at NDU-NLC. The first Engineering degrees were awarded in Spring 1998.

The name of the Computer Engineering degree was changed to Computer and Communication Engineering in 1999, by Decree No. 1948. In 2001, Computer and Communication Engineering program started at NDU-Shouf Campus; In 2006, the name if the Civil Engineering Department changed to Civil and Environmental Engineering.

Deans of the Faculty of Engineering

Late Dr. Fares Helou (Acting Dean) 1996-1997

Late Dr. Fares Helou 1997-2000

Dr. Shahwan Khoury 2000-2006

Dr. Elias Nassar 2006-Present

MISSION, VISION AND VALUES

Mission

The Faculty of Engineering at Notre Dame University endeavors to graduate engineers who understand the ethical, social, economic and environmental context of their profession and who apply their knowledge with judgment and responsibility in order to develop ways to utilize the materials and forces of nature for the benefit of mankind. In its commitment to the education of the whole person and through its applied undergraduate curricula, research and extra-curricular activities, the Faculty of Engineering encourages its students to pursue lives of global citizenship, community service, life-long learning and exemplary leadership.

Vision

To be recognized as a regional center of excellence for engineering education where highly qualified faculty and outstanding students pursue knowledge in a context of ethical and social values. This distinguished education will enable our students to contribute in a socially responsible manner to the development of Lebanon and the region.

Values

Excellence in education and scholarship: highly qualified faculty educate students through theory and hands-on instruction using the latest available technologies. High quality research addresses problems of relevance to the community and enhances classroom instruction.

Life-long learning: Our students will be equipped with the tools and skills that enable them to keep up to date in their field.

Service: our students will be encouraged to use their knowledge for the service of the community through engineering projects and extra-curricular activities.

Faith and integrity: In keeping with the tradition of the Maronite Mariamite Order, we aim to graduate students that are rooted in their faith in God. This faith expresses itself in respect for God's creation and integrity in their daily professional and social interactions.

FACULTY PROFILE

The Faculty of Engineering endeavors to graduate engineers who understand the ethical, social, economic and environmental context of their profession and who apply their knowledge with judgment and responsibility to develop ways to utilize the materials and forces of nature for the benefit of mankind.

The programs in civil, computer and communication, electrical and mechanical engineering prepare the students to enter immediately the professional practice upon graduation and to pursue graduate study.

The curricula of the Engineering Departments share three basic tenants: scientific and technological competence, balance between theory and practice, and commitment to self-maintained and enduring personal and professional development.

Courses are enhanced by excellent computing facilities and by extensive hands-on state-of-the-art laboratory experiences that are integrated throughout the five-year curricula.

Class and laboratory enrollment is maintained at small class sizes to ensure personal attention by a faculty that is committed to outstanding instruction as well as close student-faculty interaction both within and outside the classroom.

The Faculty supports and counsels on-campus chapters of international professional organizations that engage in a variety of activities to provide the students with national and international exposure.

Academic Departments and Programs

The Faculty of Engineering (FE) consists of the following departments:

- Department of Civil and Environmental Engineering
- Department of Electrical and Computer and Communication Engineering
- Department of Mechanical Engineering

and offers programs in Civil Engineering (CE), Mechanical Engineering (ME), Electrical Engineering (EE), and Computer and Communication Engineering (CCE), leading to the degree of Bachelor of Engineering.

The Department of Civil and Environmental Engineering offers a minor in Engineering Management which is open to all Engineering students.

Facilities

The states-of-the-art and extensive laboratories of the Faculty of Engineering are available for faculty and student research, senior engineering projects, engineering competition projects and instruction, through open hours and scores of regularly scheduled laboratory courses.

Faculty members in the academic ranks are responsible for the lab course content, relevance to the curriculum, project supervision and the facilities development and update. Dedicated instructors supported by the laboratory staff are in charge of the laboratory courses instruction.

With these academic functions, laboratories have the effective capabilities, practical functionalities and excellent quality to provide wide-ranging services to the engineering

profession. These services include certified testing to the construction industry as well as advanced and unique experimental research.

Curricula

The curriculum of each program is listed under the appropriate department. All engineering curricula share a common General Education Requirements (GER) component:

General Education Requirements

27 cr.

Communications Skills

9 cr.

A: English (6 cr.)

ENL 213: *Sophomore English rhetoric*

And

ENL 223: *Communication Arts*

Or

ENL 230: *English in the Workplace*

B: Arabic (3 cr.)

One course from:

ARB 211: *Appreciation of Arabic Literature*

ARB 212: *Advanced Arabic Grammar*

ARB 224: *Philosophy and Literature*

ARB 231: *Technical Arabic*

Study and Learning skills

0 cr.

Note:

Old students with ID numbers 2007 or earlier have to take 24 credits in GER courses.

These students can take any course listed above (if not already taken) as part of their two GER free electives on condition of not taking more than one Arabic course.

Faculty of Engineering Courses:

ENG 201 Introduction to Engineering (3.0); 3 cr. Engineering design: needs, specifications, feasibility, models. System, detailed alternative and optimum design. Reliability and liability. Communication. Patents and copyrights. Ethics.

ENG 202 Computers and Engineering (3.0); 3 cr. Operating systems.

Application softwares: MATLAB. Programming and Languages. Computer Architecture. Input/output. Storage. Network Architecture. Hardware applications: Data acquisition, PLC.

ENG 210: Introduction to Engineering Economy (3.0); 3 cr. Interest and time value of money. Investment, financing, depreciation, and economic selection. Analysis of engineering costs and capital investment in the design and implementation of engineering projects. *Prerequisite:* ENG 201.

ENG 310: Ethics in Engineering (3.0); 3 cr. Ethical issues in the practice of engineering: corporate responsibility; personal rights; honesty, ethical aspects of safety, risk and liability and conflicts of interest; environmental issues and sustainability; codes of ethics; emphasis on developing the capacity for independent ethical analysis of real cases.

The Degree of Bachelor of Engineering in Civil Engineering

This program aims at graduating civil engineers capable of applying their knowledge to serve society's needs in the design and construction of civil systems, while respecting nature and environmental ethics.

Admission Requirements

Admission to the Civil and Environmental Engineering program is governed by the university admission requirements as outlined in the university catalog.

In addition to the University general admission requirements, Civil Engineering transfer students may be accepted in the Faculty of Engineering provided they satisfy the Department's and Faculty's requirements for transfer students. Transfer applicants should inquire about the relevant rules and regulations available in the Department. The number of transfer credits is determined by the Department of Civil and Environmental Engineering according to the guidelines of the Faculty of Engineering.

Residency Requirements

Full time students entering the civil engineering program of first year standing must complete the listed program within eight years of the date of enrollment in the program.

A transfer candidate with a bachelor degree in Civil Engineering from an accredited institution is required to successfully complete a minimum of 45 credits of upper-division course work including a graduation project. A transfer student without a bachelor degree in civil engineering is required to successfully complete a minimum of 60 credits of upper-division course work including 3 credits of project work.

Course Load Requirements

In general, students are not allowed to carry more than 17 credits per semester, nor more than 9 credits in a summer session unless otherwise specified in their suggested program. Restrictions may be imposed on students whose overall grade-point average is less than 2.3/4.0. Upon the approval of the advisor, a student whose overall grade-point average is no less than 3.2/4.0 may be permitted to carry a maximum load of 18 credits per semester.

Students in their last semester may petition to take up to 19 crs. given they are in good academic standing and they satisfy the minimum residency requirement for the major.

Graduation Requirements

To obtain the degree of bachelor of engineering in civil engineering, a student must complete a total of 150 credits with an overall grade-point average of at least 2.0/4.0 and a minimum average of 2.0/4.0 in the major requirements and technical electives. In addition, each major requirement course as well as technical elective courses must be successfully completed with a minimum grade of C-. These 150 credits are divided into:

Degree Requirements (150 credits)

General Education Requirements 27 cr.

Core Requirements 45 cr.

CHM 211, CSC 212, EEN 205, ENG 201, ENG 202, MAT 213, MAT 215, MAT 224, MAT 235, MAT 326, MEN 201, MEN 210, MEN 320, PHS 203, GEO 201

Major Requirements 58 cr.

CEN 202, CEN 203, CEN 250, CEN 251, CEN 270, CEN 204, CEN 210, CEN 311, CEN 220, CEN 325, CEN 221, CEN 271, CEN 330, CEN 343, CEN 443, CEN 360, CEN 361, CEN 392, CEN 462, CEN 463, CEN 465, CEN 430, CEN 431, CEN 440, CEN 495

Approved Summer Training 3 cr.

CEN 496

Technical Electives 12 cr.

Choose any four courses from the following pool: CEN 393, CEN 407, CEN 510, CEN 511, CEN 512, CEN 513, CEN 514, CEN 515, CEN 516, CEN 520, CEN 521, CEN 522, CEN 530, CEN 531, CEN 523, CEN 524, CEN 541, CEN 450, CEN 543, CEN 544, CEN 560, CEN 461, CEN 370, CEN 471, CEN 580, CEN 581, CEN 582, CEN 493, CEN 594, MEN 400, MAT 339

Or follow one of the tracks below:

Track A: Structural and Material Engineering

CEN 407, CEN 510, CEN 511, CEN 512, CEN 513, CEN 514, CEN 515, CEN 516, CEN 520, CEN 521, CEN 522, CEN 523, CEN 524, CEN 541, CEN 580, CEN 581, CEN 582, CEN 392, CEN 493, CEN 594, MEN 400, MAT 339

Track B: GeoEnvironmental Engineering

CEN 392, CEN 393, CEN 530, CEN 531, CEN 560, CEN 461, CEN 580, CEN 581, CEN 582, CEN 493, CEN 594, MAT 339

Track C: Transportation and Planning Engineering

CEN 392, CEN 393, CEN 450, CEN 543, CEN 544, CEN 493, CEN 594, MAT 339.

Track D: Construction Management

CEN 370, CEN 392, CEN 393, CEN 471, CEN 493, CEN 594, MAT 339.

Free Electives 5 cr.

Include any course offered of particular interest, of sophomore level (200 level) or above

**Bachelor of Engineering in Civil Engineering
Suggested Program (150 Credits)**

Year 1

Fall Semester I (15 Credits)

CEN	202	Statics	3 cr.
PHS	203	General Physics III	3 cr.
ENL	213	Sophomore English Rhetoric (GER)	3 cr.
ENG	201	Introduction to Engineering	3 cr.
MAT	213	Calculus III	3 cr.

Spring Semester I (17 Credits)

CEN	203	Mechanics of Materials	3 cr.
CEN	250	Surveying	2 cr.
CEN	251	Field Surveying	1 cr.
CEN	270	Engineering Graphics	1 cr.
CEN	271	Civil Engineering CAD	1 cr.

Minor in Engineering Management (18 credits)**Motivation**

Management of Engineering projects has gained a significant importance in a competitive global market. The proposed Undergraduate Minor in Engineering Management aims at assisting engineering students to enhance their engineering skills by acquiring managerial skills. Through a selectivity of courses, the students will be able to learn the business aspect of Engineering projects. Interaction with industry is then easier, and this additional skill to engineering is highly valued.

Objective and Outcome

The Objective of this minor is to provide engineering students with a better exposure on project management methods, planning, engineering economy and leadership. It offers students the necessary tools for managing technical projects in an interdisciplinary environment. This minor is addressed to prepare engineering students in any engineering discipline to acquire specific useful management skills, and be able to use technology more appropriately.

The Outcome is: Graduates who understand the market and financial investments of engineering projects.

Eligibility

The Minor in Engineering Management program is open to NDU undergraduate engineering students:

1. In their second or third year of studies
2. Who are in a good academic standing (GPA>2.0)
3. Who have applied and been admitted into the program

Curriculum

The Minor in Engineering Management requires at least six courses (18 credits) chosen as follows:

A- Required Course (12 credits)

ACO 201	Principles of Accounting I
BAD 201	Fundamentals of Management
CEN 392	Engineering Economy
Or	
ENG 210	Introduction to Engineering Economy
CEN 393	Project Management

B- Elective Courses (6 credits)

Choose 2 courses from the following pool:

BAD 317	Organizational Behavior
BAD 429	Operations Management
BAD 425	Quantitative Techniques for Management
CEN 471	Civil Engineering Laws and Ethics
CEN 493	Construction Planning
ECN 200	Survey of Economics
MAT 339	Numerical Analysis
MGT 201	Principle of Human Resources
MGT 411	Leadership Quality & Performance
MRK 201	Fundamentals of Marketing

A minimum grade of "C" in each course of the minor is required. The overall GPA should be a minimum of 2.0

Application Procedure

Application Form is available in "The Department of Civil and Environmental Engineering." Besides, students must submit a petition to the registrar as part of the application. All application forms must be received by **July 10** for the **Fall** enrollment and **January 10** for **Spring** enrollment. Late or incomplete application forms will not be considered.

Withdrawal Procedure

Withdrawal from the Minor in Engineering Management must be done in writing, and the letter addressed to the Department of Civil and Environmental Engineering.

Faculty of Engineering
Notre Dame University-Louaizé, Lebanon

Undergraduate Courses: Civil Engineering

CEN 201 Engineering Mechanics (3.0); 3cr. Forces; free body diagrams; beams; trusses, tension, compression, shear and bending moment diagrams; stress-strain relationship; stress in beams due to bending and shear forces; torsion of circular members, buckling of columns. Opened only to EE and CCE students.

CEN 202 Statics (3.0); 3cr. Forces, moments and couples; free body diagrams; problems involving beams, trusses, and various engineering applications.

CEN 203 Mechanics of Materials (3.0); 3cr. Tension, compression, shear and bending moment diagrams; torsion; stress-strain relationship; stresses in beams; pressure vessel; combined loading and unsymmetric bending; Mohr's circle beam deflections; buckling of columns. *Prerequisite:* CEN 202.

CEN 204 Mechanics of Materials Laboratory (0.2); 1cr. Testing for material characterization. Experiments related to static and fatigue testing of various types of materials. Tests include tension, compression, bending and buckling. *Prerequisite:* CEN 203.

CEN 210 Structures I (3.0); 3cr. Structural forms; analysis of structurally determinate structures; moving loads, influence lines; introduction to indeterminate structures. Collapse and analysis. *Prerequisite:* CEN 203.

CEN 220 Soil Mechanics (3.0); 3cr. Stress-strain relations and properties of soil, seepage and flow nets. Bearing capacity of soils, footings on sand and clay. *Prerequisite:* CEN 203.

CEN 221 Soil Mechanics Laboratory (0.2); 1 cr. The nature of soil behavior; laboratory tests include physical properties of soils, stress-strain relationships, compressibility, and shear strength. *Prerequisite:* CEN 220.

CEN 250 Surveying (2.0); 2 cr. Surveying and instrumentation; Introduction to optical, photographic, mathematical, and geometrical principles relevant to photogrammetry and remote sensing; introduction to global positioning system.

CEN 251 Field Surveying (0.2); 1 cr. Field plane surveying; topographic mapping; location survey and route surveying. *Corequisite:* CEN 250.

CEN 270 Engineering Graphics (0.2); 1 cr. Drawing of three-dimensional objects,

orthographic, sectional, pictorial view. Developed surfaces and intersections. *Corequisite:* CEN 271.

CEN 271 Civil Engineering CAD (0.2); 1 cr. This is an introductory course lab on CAD tools to be used by engineers and architects. CAD systems are interface soft wares. The CAD systems shall be used in conjunction with civil engineering basic drafting tools to form visualizations in 2D and 3D engineering entities. It constitutes the basic knowledge in AutoCAD, TransCAD, and other CAD software systems.

CEN 311 Structures II (3.0); 3 cr. Analysis of statically indeterminate structures; methods of consistent deformations, slope, deflection, and moment distribution. Energy theorems and applications to trusses, beams, and frames. *Prerequisite:* CEN 210.

CEN 325 Shallow Foundations (3.0); 3cr. Subsurface explorations, methods of exploration and sampling, design of sheeting and bracing systems for shallow foundations. Consolidation theory, settlement analysis. *Prerequisite:* CEN 220.

CEN 330 Concrete Design I (3.0); 3 cr. Behavior of reinforced concrete. Ultimate strength design method. Design of beams for flexure and shear, one-way slabs, and short columns. *Prerequisite:* CEN 210.

CEN 343 Transportation Engineering I (3.0); 3 cr. Transportation in society, and mobility; people and goods. Introduction to operating principles and procedures for transportation systems. Level-Of-Service, vehicle flow and capacity. Traffic analyses and control. Transportation Planning; Travel Demand Forecasts; demand-supply relationships; modeling. Project. *Prerequisites:* Third Year Standing. *Corequisite:* MAT 326.

CEN 360 Hydraulics (3.0); 3 cr. Open channel flow, momentum and energy principles; water surface profiles; flow measurement. *Prerequisite:* MEN 320.

CEN 361 Hydraulics Laboratory (0.2); 1 cr. Applying continuity, momentum, and energy principles to flow problems. Experiments include laminar and turbulent flows, major and minor losses, hydraulic jump, weirs, flow measurements. *Prerequisite:* CEN 360.

CEN 370 Electrical, Mechanical, and Sanitary Systems (3.0); 3 cr. Electrical requirements and distribution in buildings; design of heating, cooling, and ventilation systems; selection and design of water distribution and plumbing systems.

CEN 392 Engineering Economy (3.0); 3 cr. Engineering economic analysis for project and design evaluation, decision making including replacement and retention, budget limitation, breakeven and sensitivity analysis. Case studies in the design/system analysis process, time value of money and economic evaluation of alternatives, risk analysis, and the effects of depreciation and taxes.. *Prerequisite:* ENG 201, Junior Standing.

CEN 393 Project Management (3.0); 3 cr. Fundamentals of Project Management, engineering organization, planning, budgeting, scheduling and cost controls, bidding process, tender documents and contracts. Examples will be given in all fields of Engineering. *Prerequisite:* Junior Standing.

CEN 407 Advanced Mechanics of Materials (3.0); 3 cr. Three dimensional strain and stress states, application of energy methods, torsion of noncircular members, nonsymmetrical bending of straight beams, shear center for thin-wall beam cross sections, curved beams. *Prerequisite:* CEN 210.

CEN 430 Concrete Design II (3.0); 3 cr. Study of the strength, behavior, and design of indeterminate reinforced concrete structures, with primary emphasis on slab systems; emphasis on the strength of slabs and on the available methods of design of slabs spanning in two directions, with or without supporting beams. Analysis and design of long columns, and footings. *Prerequisite:* CEN 330.

CEN 431 Concrete and Pavement Design Laboratory (0.2); 1 cr. Experiments dealing with concrete and asphalt properties, proportioning, design and analysis. *Prerequisites:* CEN 330, CEN 443.

CEN 440 Steel Design (3.0); 3 cr. Design of steel beam girders, tension member columns, bolted, riveted, and welded connections. *Prerequisite:* CEN 210.

CEN 443 Transportation Engineering II (3.0); 3 cr. The geometric design of highways, drainage, roadbed, environmental concerns, cost. Highway interchanges concepts. Roadbed

construction; pavement design, construction, and management. Intermodal stations, airports design concepts. Project. *Prerequisite:* Fourth Year Standing. *Corequisite:* CEN 430.

CEN 450 Advanced Surveying (3.0); 3 cr. Subdivision theory, usage of total station in field surveying. *Prerequisites:* CEN 250, CEN 251.

CEN 461 Water Pollution control and treatment (3.0); 3 cr. Fundamental principles and engineering application of physical, chemical, and biological processes (like sedimentation, filtration, coagulation, flocculation, membranes, aerobic, anaerobic biological processes) are discussed. *Prerequisite:* CEN 462, or instructor's approval.

CEN 462 Environmental Engineering (3.0); 3 cr. Quantitative evaluation of the environmental, economic, and technical problems involved in control of pollutants of the air, water, and land. *Prerequisite:* MEN 320.

CEN 463 Water and Waste Water Networks (3.0); 3 cr. Quantities of water and wastewater; collection, transportation, and distribution; water distribution network; design of sanitary and storm- water sewer systems. *Prerequisite:* CEN 360.

CEN 465 Environmental engineering Laboratory (1.0); 1 cr. Laboratory and field experiments related to pollution of air, water and soil. Tests include air sampling, water testing, sound measurement, wastewater treatment, compost tests and landfill cover performance. *Prerequisite:* CEN 462.

CEN 471 Civil Engineering Laws and Ethics (3.0); 3 cr. Survey of Lebanese construction codes and regulations; civil engineering practice as related to environmental destruction and moral behavior.

CEN 493 Construction Planning (3.0); 3 cr. Job Planning and management, selection of construction equipment, soil stabilization, tractors, scrapers, excavating equipment, trucks, operation analysis, drilling rock, blasting, tunneling.

CEN 495 Engineering Project; 3 cr. Individual supervised work in one of the main field of Civil Engineering. *Prerequisite:* CEN 491, ENL 230.

CEN 496 Approved Summer Training; 6 cr. Department approved summer training practice in Civil Engineering. A report is required. *Prerequisite:* Senior Standing.

CEN 510 Elasticity (3.0); 3 cr. Stress-Strain, elasticity formulation, solution by potentials, stress functions, torsion, thick cylinders, rotating disks, thermal stresses, straight simple beams, curved beams. *Prerequisite:* CEN 407.

CEN 511 Advanced Elasticity (3.0); 3 cr. Semi-infinite elastic medium and related problems, energy problems, variational methods, columns, beam columns, bending of thin plate, theory of thin shells, *Prerequisite:* CEN 510.

CEN 512 Stress Wave Propagation (3.0); 3 cr. Waves and vibration in strings, longitudinal waves in thin rods, flexural waves in thin rods, waves in membranes, thin plates, and shells. Waves in infinite media. *Prerequisite:* CEN 510.

CEN 513 Advanced Stress Wave Propagation (3.0); 3 cr. Waves in infinite media, waves in semi-infinite media scattering and diffraction of elastic waves, wave propagation in plates and rods. *Prerequisite:* CEN 512.

CEN 514 Experimental Stress Analysis (3.0); 3 cr. Methods of strain measurements and strain determination, brittle coating, electrical resistance gage, photo elastic techniques. *Prerequisite:* CEN 204.

CEN 515 Energy Methods (3.0); 3 cr. Principles of virtual work, total potential energy, complimentary virtual work, total complimentary energy, and Reissner's principle for solid mechanics problems. Applications to bars, columns and plates. *Prerequisite:* CEN 407.

CEN 516 Continuum Mechanics (3.0); 3 cr. Tensor notation and manipulation, stress and deformation in a continuum. Eulerian forms of physical laws governing the motion of a continuum. Application to solids. *Prerequisite:* CEN 407.

CEN 520 Matrix Method for Structural Analysis (3.0); 3 cr. Displacement (stiffness) method, truss applications, rectilinear, tapered and curved beams, matrix transformation, frame analysis, influence coefficients and coordinate transformation, force method. *Prerequisite:* CEN 311.

CEN 521 Dynamics of Structures (3.0); 3 cr. Theory and application of structural dynamics for single and multiple degree-of-freedom models of buildings due to dynamic forces. Concepts of overall seismic design of buildings, proportioning, and detailing to achieve

satisfactory seismic response. *Prerequisite:* Senior Standing.

CEN 522 Structural Project (3.0); 3 cr. Usage of commercial software packages in the analysis and design of multi-story concrete and steel buildings, Bridges and storage tanks. *Prerequisites:* CEN 430, CEN 440.

CEN 523 Design of Structural Systems (3.0); 3 cr. The whole structural design process including definition of functional requirements, selection of structural scheme, formulation of design criteria, preliminary and computer-aided proportioning, and analysis of response, detailing. *Prerequisites:* CEN 430, CEN 440, or instructor's approval.

CEN 524 Prestressed Concrete (3.0); 3 cr. Fundamentals of analysis and design of post-tensioned and pre-tensioned structural members, proportioning of members, calculation of the amount and positioning of reinforcement. *Prerequisite:* CEN 430 or instructor's approval.

CEN 530 Slope Stability (3.0); 3 cr. Slope stability analysis methods. Use of software packages. *Prerequisite:* CEN 325.

CEN 531 Deep Foundations (3.0); 3 cr. Subsurface exploration and sampling, design of sheeting and bracing systems for deep foundations. Pile and corrosion analysis. *Prerequisite:* CEN 325.

CEN 541 Advanced Steel Design (3.0); 3 cr. Design of structural systems for multiple loads, combined loading, torsion, and fatigue in structural members, plate and box members. *Prerequisite:* CEN 440.

CEN 543 Transportation Engineering III (3.0); 3 cr. One, two, or three topics in Transportation Engineering shall be offered. The course shall be concerned with the process of analyses and design of the topic concerned. Topics like airports; ports and harbours; railways and railway stations; traffic; supply-demand modelling; others. Projects. Topics shall be specified when the course is offered.. *Prerequisite:* Fourth Year Standing *Co-requisite:* CEN 443.

CEN 544 Disigns of Highway Bridges and Interchanges (3.0); 3 cr. Geometric design of highway interchanges and analyses and design of simple highway bridges. Project. *Prerequisites:* Fourth Year Standing, Instructor approval.

CEN 560 Air pollution Engineering (3.0); 3 cr. Characterization of sources, emissions, transport, transformation, effects, and control of air pollutants. *Prerequisites:* CEN 462, or instructor's approval.

CEN 580 Finite Element Methods I (3.0); 3 cr. Theory and application of finite element methods as an analysis tool for two-dimensional stress problems in engineering. *Prerequisite:* CEN 203 or MEN 202.

CEN 581 Finite Element Methods II (3.0); 3 cr. Solution of advanced three-dimensional stress problems in engineering. *Prerequisite:* CEN 580.

CEN 582 Nonlinear Finite Element Methods (3.0); 3 cr. Isoparametric finite element discretization, incremental equations of motion. Total and update lagrangian formulation. Nonlinear geometry, nonlinear material problems. Use of software packages for final solutions. *Prerequisite:* CEN 581.

CEN 594 Selected Topics in Civil Engineering (3.0); 3 cr. Structured presentations of new and developing areas of knowledge in civil engineering offered by the department to augment the formal courses available. *Prerequisite:* Individually identified for each offering under this course number.

CEN 598 Engineering Design I (1.0); 1 cr. The objective of this course is to develop a project proposal that includes the following items: Choice of project topic, literature survey, market analysis, feasibility study, project timeline, list of materials and cost, engineering ethics issues, social and environmental impact, etc. *Prerequisite:* ENL 230 and Department approval.

CEN 599 Engineering Design II (2.0); 2 cr. Implementation of the engineering design project that was proposed in CEN 598. Includes report, final presentation. *Prerequisite:* CEN 598.

The Degree of Bachelor of Engineering in Computer and Communication Engineering

This program is concerned with the design and use of computing devices and communication systems for processing, retrieval and storage of information. Areas include design of computer hardware, software and networks and design of telecommunication devices and systems.

Admission Requirements

Admission to the Computer and Communication Engineering program is governed by the university admission requirements as outlined in the university catalog.

In addition to the university general admission requirements, computer and communication engineering transfer students may be accepted into the Faculty of Engineering provided they satisfy the department's and Faculty's requirements for transfer students. Transfer applicants should inquire about the relevant rules and regulations available in the Department. The number of transfer credits is determined by the Faculty of Engineering.

Residency Requirements

Full time students entering the computer and communication engineering program of first year standing must complete the listed program within eight years of the date of enrollment in the program.

A transfer candidate with a bachelor degree in computer and communication engineering from an accredited institution is required to successfully complete a minimum of 45 credits of upper-division course work including a graduation project. A transfer student without a bachelor degree in computer and communication engineering is required to successfully complete a minimum of 60 credits of upper-division course work including 3 credits of project work.

Course Load Requirements

In general students are not allowed to carry more than 17 credits per term and not more than 7 credits in a summer session unless otherwise specified in their suggested program.

Restrictions may be imposed on students whose overall grade point average is less than 2.3/4.0. Upon the approval of the advisor, a student whose overall grade-point average is no less than 3.2/4.0 may be permitted to carry a maximum load of 18 credits per semester.

Students in their last semester may petition to take up to 19 crs. given they are in good academic standing and they satisfy the minimum residency requirement for the major.

Graduation Requirements

To receive a degree of Bachelor of Engineering in computer and communication engineering, a student must complete a total of 150 credits with an overall grade point average of at least 2.0/4.0 and a minimum average of 2.0/4.0 in the major requirements and technical electives. In addition all major requirements and technical elective courses must be successfully completed with a minimum grade of C-. These 150 credits are divided into:

Degree Requirements (150 credits)

General Education Requirements **27 cr.**

Core Requirements **39 cr.**

CEN 201, ENG 201, ENG 202, MAT 211, MAT 213, MAT 215, MAT 224, MAT 235, MAT 326, MAT 335 CHM 211, PHS 212, PHS 213.

Major Requirements **61 cr.**

CSC 212, CSC 213, CSC 312, CSC 414/CSC415, CSC 425, EEN 201, EEN 202, EEN 203, EEN 210, EEN 220, EEN 221, EEN 311, EEN 312, EEN 322, EEN 324, EEN 325, EEN 330, EEN 331, EEN 340, EEN 344, EEN 371, EEN 443, EEN 598, EEN 599.

Technical Electives **20 cr.**

Students should complete 20 credits of approved technical electives in EEN and CSC courses including two elective laboratories.

Year 3 Technical Electives (2 CSC courses): CSC 301, CSC 311, CSC 313, CSC 316, CSC 323, CSC 385, CSC 387.

Year 4 Technical Electives (2 EEN and 2 EEN/CSC courses, at most one EEN 300 level course may be taken as part of Year 4 Electives): CSC 412, CSC 422, CSC 423, CSC 426, CSC 431, CSC 432, CSC 463, EEN 315, EEN 326, EEN 327, EEN 342, EEN 350, EEN 360, EEN 416, EEN 421, EEN 422, EEN 426, EEN 430, EEN 431, EEN 432, EEN 433, EEN 436, EEN 473, EEN 480, EEN 523, EEN 545, EEN 546, EEN 547, EEN 548, EEN 583, EEN 585.

Technical Elective Lab. 1 courses: EEN 328, EEN 363, EEN 365.

Technical Elective Lab. 2 courses: EEN 439, EEN 444, EEN 481.

Free Elective **3 cr.**

This elective is chosen by the students according to their interests in broadening their knowledge. It can be any course offered by the university provided that it is of Sophomore level (200 level) or above.

**Bachelor of Engineering in Computer and Communication Engineering
Suggested Program (150 Credits)**

Year 1

Fall Semester I (15 Credits)

CHM	211	Principles of Chemistry	3 cr.
ENG	201	Introduction to Engineering	3 cr.
ENL	213	Sophomore English Rhetoric (GER)	3 cr.
MAT	213	Calculus III	3 cr.
MAT	215	Linear Algebra I	3 cr.

Spring Semester I (15 Credits)

CEN	201	Engineering Mechanics	3 cr.
ENG	202	Computers & Engineering	3 cr.
MAT	224	Calculus IV	3 cr.
PHS	212	Electricity & Magnetism	3 cr.
—	—	General Education Requirement	3 cr.

Summer Session I (9 Credits)

ENL	223	Communication Arts (GER)	3 cr.
Or			
ENL	230	English in the Workplace (GER)	
MAT	211	Discrete Mathematics	3 cr.
—	—	General Education Requirement	3 cr.

Year 2

Fall Semester II (16 Credits)

CSC	212	Program Design and Data Abstraction I	3 cr.
EEN	201	Circuits Analysis I	3 cr.
EEN	220	Introduction to Logic Design	3 cr.
EEN	221	Logic Design Laboratory	1 cr.
MAT	235	Ordinary Differential Equations	3 cr.
—	—	General Education Requirement	3 cr.

Spring Semester II (16 Credits)

CSC	213	Program Design and Data Abstraction II	3 cr.
EEN	202	Circuits Analysis II	3 cr.
EEN	203	Circuits Laboratory	1 cr.
EEN	210	Electronic Circuits I	3 cr.
MAT	335	Partial Differential Equations	3 cr.
PHS	213	Modern Physics	3 cr.

Summer Session II (9 Credits)

CSC	312	Computer Architecture	3 cr.
MAT	326	Probability and Statistics for Engineers	3 cr.
—	—	General Education Requirement	3 cr.

Year 3

Fall Semester III (16 Credits)

CSC	—	Technical Elective 1	3 cr.
EEN	311	Electronic Circuits II	3 cr.
EEN	312	Electronic Circuits Laboratory	1 cr.
EEN	330	Electromagnetics I	3 cr.

—	—	General Education Requirement	3 cr.

The Degree of Bachelor of Engineering in Electrical Engineering

The Electrical Engineering program promotes the development of technologies that affect our every day life. An Electrical Engineer's work includes the design of analog and digital electronic systems, design and operation of power systems (generation, transmission and distribution), design of auxiliary models to stabilize and/or modify the dynamics of systems (autopilot of aircraft, on-board control systems of automobiles), design of devices for telecommunication systems (cellular phones, microwave links).

Admission Requirements

Admission to the Electrical Engineering program is governed by the university admission requirements as outlined in the university catalog.

In addition to the university general admission requirements, electrical engineering transfer students may be accepted into the Faculty of Engineering provided they satisfy the Department's and Faculty's requirements for transfer students. Transfer applicants should inquire about the relevant rules and regulations available in the Department. The number of transfer credits is determined by the Faculty of Engineering.

Residency Requirements

Full time students entering the electrical engineering program of first year standing must complete the listed program within eight years of the date of enrollment in the program. A transfer candidate with a bachelor degree in electrical engineering from an accredited institution is required to successfully complete a minimum of 45 credits of upper division course work including a graduation project. A transfer student without a bachelor degree in electrical engineering is required to successfully complete a minimum of 60 credits of upper-division course work including 3 credits of project work.

Course Load Requirements

In general, students are not allowed to carry more than 17 credits per term and not more than 7 credits in a summer session unless otherwise specified in their suggested program. Restrictions may be imposed on students whose overall grade point average is less than 2.3/4.0. Upon the approval of the advisor, a student whose overall grade-point average is no less than 3.2/4.0 may be permitted to carry a maximum load of 18 credits per semester.

Students in their last semester may petition to take up to 19 crs. given they are in good academic standing and they satisfy the minimum residency requirement for the major.

Graduation Requirements

To receive a degree of Bachelor of Engineering in electrical engineering, a student must complete a total of 150 credits with an overall grade point average of at least 2.0/4.0 and a minimum average of 2.0/4.0 in the major requirements and technical electives. In addition, all major requirement and technical elective courses must be successfully completed with a minimum grade of C-. These 150 credits are divided into:

Degree Requirements (150 credits)

General Education Requirements **27 cr.**

Core Requirements **42 cr.**

CEN 201, ENG 201, ENG 202, MEN 210, MAT 213, MAT 215, MAT 224, MAT 235, MAT 324, MAT 326, MAT 335, CHM 211, PHS 212, PHS 213.

Major Requirements **55 cr.**

CSC 212, CSC 213, CSC 312, EEN 201, EEN 202, EEN 203, EEN 210, EEN 220, EEN 221, EEN 311, EEN 312, EEN 324, EEN 330, EEN 331, EEN 340, EEN 350, EEN 352, EEN 360, EEN 371, EEN 416, EEN 598, EEN 599.

Technical Electives **23 cr.**

Students should complete 23 credits of approved technical electives in EEN and CSC courses including two elective laboratories.

Year 3 Technical Electives (1 EEN course and 1 EEN/CSC course): CSC 313, CSC 318, CSC 387, EEN 315, EEN 322, EEN 326, EEN 327, EEN 344. The EEN/CSC course can be substituted by CEN 270, MEN 270, and MEN 370 or a course from the Technical Elective Labs 1 and 2.

Year 4 Technical Electives (4 EEN and 1 EEN/CSC course):

One course from the Electronics pool: EEN 411, EEN 412, EEN 413, EEN 421, EEN 422, EEN 426, EEN 455, EEN 523.

One course from the Electromagnetics pool: EEN 430, EEN 431, EEN 432, EEN 433, EEN 435, EEN 436, EEN 437, EEN 534.

Two courses from the Power and Control pool: EEN 353, EEN 355, EEN 356, EEN 357, EEN 451, EEN 453, EEN 455, EEN 457, EEN 458, EEN 461.

One course chosen from the above areas or from the following courses:

(Communication Pool): EEN 342, EEN 443, EEN 545, EEN 546, EEN 548.

(Signal Processing Pool): EEN 473, EEN 480, EEN 583, EEN 585.

(Computer Science Pool): CSC 414, CSC 425, CSC 426.

Technical Elective Lab. 1 courses: EEN 325, EEN 328, EEN 363, EEN 365, EEN 462.

Technical Elective Lab. 2 courses: EEN 439, EEN 444, EEN 456, EEN 459, EEN 481.

Free Elective **3 cr.**

This elective is chosen by the students according to their interests in broadening their knowledge. It can be any course offered by the university provided that it is of Sophomore level (200 level) or above.

Undergraduate Courses: Electrical Engineering and Computer and Communication Engineering

EEN 201 Circuits Analysis I (3.0); 3 cr. Passive elements. Circuits laws. Node and mesh analysis. Introduction to ideal operational amplifier circuits. Energy storage elements. RC, RL and RLC circuits. Forced and natural response. *Prerequisite:* ENG 201, *Corequisites:* PHS 212 and MAT 235.

EEN 202 Circuits Analysis II (3.0); 3 cr. Analysis of AC networks. Fourier and Laplace analysis. Frequency domain circuit analysis. Bode plots. Driving point and network transfer functions. Synthesis and design of first and second order linear time invariant circuit systems. Two port networks. One-phase and polyphase networks. *Prerequisite:* EEN 201.

EEN 203 Circuits Laboratory (0.2); 1 cr. Introduction to circuit laboratory instruments, Ohm's, Kirchhoff's laws. Mesh, Nodal, Superposition, Thevenin's. RC, RL, RLC networks, operational amplifiers. *Corequisite:* EEN 202.

EEN 205 Electric Circuits (3.0); 3 cr. Fundamentals of electric circuits. Resistive circuit techniques and methods of analysis. Introduction to operational amplifiers. AC network analysis. Sinusoidal frequency response. Transient analysis. AC power and transformers. Polyphase systems. Not open to EE and CCE students. *Corequisite:* MAT 235.

EEN 206 Electronics (3.0); 3 cr. Semiconductor theory. Diodes and applications. Transistor fundamentals. Transistor amplifiers and switches. Operational amplifiers. Digital Logic circuits. Digital Systems. Principles of electromechanics. Introduction to electric machines. Not open to EE and CCE students. *Prerequisite:* EEN 205.

EEN 207 Instrumentation and Circuits Laboratory (0.2); 1 cr. Measuring equipment such as voltmeter, ammeter, ohmmeter, function generator, and oscilloscope. Experiments in circuits, electronics, digital circuits, electronic transducers and machines. Not open to EE and CCE students. *Prerequisite:* EEN 206.

EEN 210 Electronic Circuits I (3.0); 3 cr. Properties, operation, and biasing of pn junction diodes, bipolar junction and field-effect transistors. Large and small signal models and their applications. Analog signal amplification. Op amp applications. *Corequisite:* EEN 202.

EEN 220 Introduction to Logic Design (3.0); 3 cr. Binary and non-binary systems. Boolean algebra. Logic gates. Logic minimization, combinational circuits, sequential circuits, flip-flops, synthesis of synchronous sequential circuits. PLDs (ROM, PLA, PAL). *Prerequisite:* ENG 202.

EEN 221 Logic Design Laboratory (0.2); 1 cr. Experiments with basic Logic gates, combinational network design, sequential network design. Designing with counters, registers, decoders, multiplexers, and adders. *Corequisite:* EEN 220.

EEN 311 Electronic Circuits II (3.0); 3 cr. Differential amplifiers. Frequency response of amplifiers. Concepts of feedback. Audio amplifiers. Concept of active filters. *Prerequisite:* EEN 210.

EEN 312 Electronic Circuits Laboratory (0.2); 1 cr. Experiments based on EEN 210 and EEN 311. Introduces the practical applications of analog circuits, including transistor and diode circuits, operational amplifiers applications, simple amplifiers, filters, and oscillators. *Prerequisite:* EEN 203, *Corequisite:* EEN 311.

EEN 315 Simulation and Design Tools in Electrical and Computer Engineering (3.0); 3 cr. Introduction to circuit simulation tools such as Orcad/Pspice. Introduction to engineering applications of Matlab and other engineering software packages. Design examples from circuits, electronics, and signal processing. *Prerequisite:* EEN 202.

EEN 322 Digital Integrated Circuits (3.0); 3 cr. Properties and definitions of digital ICs. Basic logic circuit families: TTL, CMOS, dynamic CMOS, BiCMOS, ECL, and GaAs; with emphasis on CMOS digital logic. Oscillators, Schmitt Trigger. *Prerequisites:* EEN 220 and EEN 311.

EEN 324 Microprocessor System Design (3.0); 3 cr. Microprocessor internal architecture. Registers, CPU, memory organization. Instructions, execution and timing. Interfacing with peripherals. Interrupts. Designing and Interfacing with state of the art microprocessors. Assembly language programming. *Prerequisite:* EEN 210 and CSC 312.

EEN 325 Microprocessor Laboratory (0.2); 1 cr. Experiments and design project related to the course EEN 324. *Prerequisite:* EEN 221, *Corequisite:* EEN 324.

EEN 326 Microcontroller System (3.0); 3 cr. Highly integrated processors and peripherals on a single microchip. System architecture. Embedded and real-time system specification and mapping this hardware. Machine language programming for monitoring and control applications. Includes a design project. *Prerequisite:* EEN 324.

EEN 327 Advanced Logic Design (3.0); 3 cr. Combinational and sequential network design. State machine SM charts, Asynchronous sequential Networks. State Assignment and Flow Tables. Hazards, PLDs and hardware description languages (HDL). *Prerequisite:* EEN 220.

EEN 328 Advanced Digital Design laboratory (0.2); 1 cr. Designing combinational and sequential digital circuits with an FPGA board (Xilinx, Altera or similar) and a CAD tool (HDL). *Prerequisite:* EEN 327.

EEN 330 Electromagnetics I (3.0); 3 cr. Sinusoidal steady state and transient analysis of transmission lines. Static electric and magnetic fields. Laplace and Poisson's equations. Resistance, inductance and capacitance. Conductors, dielectrics and magnetic materials. Polarization and magnetization. Electromagnetic devices. Bioelectromagnetics. *Prerequisites:* PHS 212 and MAT 335.

EEN 331 Electromagnetics II (3.0); 3 cr. Maxwell's equations. Plane wave propagation reflection and transmission in lossless and lossy media. Normal and oblique incidence. Waveguides. Impedance matching. Electromagnetic effects in high-speed circuits. Computer simulation. *Prerequisite:* EEN 330.

EEN 340 Signals and Systems (3.0); 3 cr. Basic concepts in linear system theory. Analyzing continuous and discrete signals and linear systems. Superposition, convolution and impulse response. Sampling theorem. Spectral analysis. Fourier series and transforms. Laplace transforms. Transfer functions. Bode plots and stability. Discrete-Time Fourier transform. Introduction to z-transforms. *Prerequisites:* EEN 202 and MAT 335.

EEN 342 Random Signals and Noise (3.0); 3 cr. Probability and random variables, density

functions, statistics of one and two random variables, estimation theory, hypothesis testing. Random processes, correlation and cross-correlation functions. Applications to filtering. *Prerequisites:* EEN 340 and MAT 326.

EEN 344 Communication Systems I (3.0); 3 cr. Mathematical analysis and signal processing used in analog communication systems. Spectral analysis. Signal transmission. Amplitude, phase, frequency and pulse modulations. Modulation and demodulation techniques. Frequency and time multiplexing. Application to radio and television. Random processes and noise. Signal-to-noise ratios in analog communication systems. *Prerequisites:* EEN 340 and MAT 326.

EEN 350 Energy Conversion (3.0); 3 cr. Magnetic materials. Fundamental operation of transformers, DC and AC machines. Design considerations of rotating machinery. *Prerequisite:* EEN 202, *Corequisite:* EEN 331.

EEN 352 Energy Conversion Laboratory (0.2); 1 cr. Experiments with single phase and three-phase transformers. DC and AC machines. *Prerequisite:* EEN 350.

EEN 353 Electric Machines (3.0); 3 cr. Operation of DC and AC machines. Control of electric machines. Induction motor, stepper motor. *Prerequisite:* EEN 350.

EEN 355 Fundamentals of Power Engineering (3.0); 3 cr. Steady state and transient operation of power transmission lines. Overhead and underground cable types and ratings. Resistance, inductance and capacitance of transmission lines. Power system modeling. *Prerequisites:* EEN 330 and EEN 350

EEN 356 Power System Analysis (3.0); 3 cr. Power system modeling. Load flow studies using computer tools. Economic operation. Symmetrical and asymmetrical short-circuit studies. *Corequisite:* EEN 355.

EEN 357 Power Plant Engineering (3.0); 3 cr. Generation of electric power. Overview of the different types of power plants. Investigation of new and environment-friendly methods for power generation. *Prerequisite:* EEN 355.

EEN 360 Modern Control Systems (3.0); 3 cr. Mathematical models for control systems. State variables and transfer functions representations. System performance and design criteria. Stability, sensitivity, time response of linear control systems. Use of Hurwitz, root-locus,

Nyquist and Bode methods for analysis and synthesis of linear systems. *Prerequisite:* EEN 340.

EEN 363 Instrumentation Laboratory (0.2); 1 cr. Input and output transducers. Position, temperature, light intensity, force, speed and sound measurements and display. Introduction to PCB design techniques. Design project. *Prerequisite:* EEN 312.

EEN 365 Programmable Logic Control Laboratory (0.2); 1 cr. Programmable control applications. Advanced PLC control techniques using pneumatic sequencer. Control of an automation system. *Prerequisite:* EEN 324.

EEN 370 Practical Training (6.0); 6 cr. Department approved practice in industry in one of the areas of Electrical, Computer and Communication Engineering. A report is required. (Only open to students admitted before Fall 2008). *Prerequisite:* Department approval.

EEN 371 Practical Training (3.0); 3 cr. Department approved practice in industry in one of the areas of Electrical, Computer and Communication Engineering. A report is required. *Prerequisite:* Department approval.

EEN 411 Integrated Circuit Fabrication Processes (3.0); 3 cr. The fundamental principles of integrated circuit fabrication processes, physical and chemical models for crystal growth, oxidation, ion implantation, etching, deposition, lithography, and back-end processing. *Prerequisites:* EEN 331 and PHS 213.

EEN 412 Analog Integrated Circuit Design (3.0); 3 cr. Analysis and design of MOS analog integrated circuits, emphasizing quantitative measures of performance, figures of merit, and circuit limitations. Evaluation of circuit performance by means of hand calculations and computer-aided circuit simulations. Design of operational amplifiers, broadband amplifiers, biasing circuits, and voltage references. *Prerequisite:* EEN 311.

EEN 413 Analog Filter Design (3.0); 3 cr. Systematic analysis and design for active filters. Bilinear transfer function. Cascade design. The Biquad circuit. Filter approximations and synthesis techniques. Monolithic integrated filters. Computer simulation verification. *Prerequisite:* EEN 311.

EEN 416 Principles of Semiconductor Devices (3.0); 3 cr. Fundamentals of the physical properties of semiconductors. Doping. Fermi-Dirac statistics. Generation-recombination properties of excess carriers in semiconductors. Optical absorption and luminescence. Carrier drift and diffusion. Properties of the p-n junction under forward and reverse bias. Characteristics of semiconductor devices, and advanced device issues relevant to state-of-the-art integrated-circuit technologies. *Prerequisites:* PHS 213 and EEN 331.

EEN 421 Introduction to VLSI Design (3.0); 3 cr. Large-scale MOS Design. Topics: MOS transistors, static and dynamic MOS gates, MOS circuit fabrication, design rules, resistance and capacitance extraction, power and delay estimation, scaling, MOS combinational and sequential logic design, registers and clocking schemes, memory and data-path. Elements of computer-aided circuit analysis, synthesis, and layout techniques. *Prerequisite:* EEN 322.

EEN 422 Testing and Fault Tolerance of Digital Systems (3.0); 3 cr. The fundamental principles of testing computer systems and designing for testability. Failure and fault models. Deterministic and probabilistic techniques of test generation and testing. Design for testability. Basic considerations in the design of reliable computing systems. Concurrent checking techniques. Redundancy and evaluation methods. *Prerequisite:* EEN 327.

EEN 426 Biomedical Engineering (3.0); 3 cr. Design consideration for clinical and health care devices. Design of biomedical devices. Involves analog, digital and microprocessor / microcontroller based designs. Design of monitoring devices. *Prerequisites:* EEN 311 and EEN 324.

EEN 430 Antenna Design for Wireless Communications (3.0); 3 cr. Fundamentals of radiation from antennas. Wire antennas such as monopole, dipole and loop antennas. Aperture antennas such as horn and reflector antennas. Wideband antennas. Antenna arrays. Application to cellular systems. Course includes design project. *Prerequisite:* EEN 331.

EEN 431 Microwave Circuit Design (3.0); 3 cr. Coverage of passive and active microwave devices including transformers, couplers, resonators, circulators, oscillators and amplifiers. Course includes project consisting of

computer-aided design of a microwave circuit.
Prerequisites: EEN 311 and EEN 331.

EEN 432 Numerical Methods for Wireless Propagation (3.0); 3 cr. Basic coverage of the main numerical techniques in electromagnetics. Topics include the Finite Difference Time Domain (FDTD) and Finite Element (FE) methods. Use of a high level programming language such as Fortran, C, Pascal or Matlab to simulate radiation and propagation of waves in a wireless communication environment.
Prerequisite: EEN 331.

EEN 433 Wave Propagation for Wireless Communications (3.0); 3 cr. Prediction methods for tropospheric, ground wave and ionospheric propagation. Propagation, diffraction and reflection in cellular communication systems and wireless local area networks. *Prerequisite:* EEN 331.

EEN 435 Electromagnetic Compatibility (3.0); 3 cr. Fundamentals of Electromagnetic Compatibility (EMC) are covered including regulations, grounding, shielding and cross talk. Modeling and reduction techniques of noise and interference phenomena in electrical circuits. Effect of radiation on the human body. Design of electronic devices to minimize undesired radiation and susceptibility to electromagnetic emissions. *Prerequisite:* EEN 331.

EEN 436 Fiber Optics (3.0); 3 cr. Ray optics and wave optics. Design optimization of fibers for optical data transmission. Fiber fabrication. Signal degradation in optical fibers. Fiber connections and diagnostics. *Prerequisite:* EEN 331.

EEN 439 Electromagnetics Laboratory (0.2); 1 cr. Properties of magnetic materials. Electromagnetic devices. Transmission lines. Impedance matching. Antennas and microwave circuits. Includes design project and computer simulations. *Prerequisite:* EEN 331.

EEN 443 Communication Systems II (3.0); 3 cr. Digital transmission techniques with application to computer and space communications. Digital modulation. Equalizers. Baseband data transmission. Digital switching. Multiplexing. Design and detection of digital signals for low error rate. Forward and feedback transmission techniques. Matched filters. Modems, block and convolution coding. *Prerequisite:* EEN 344.

EEN 444 Communication Systems Laboratory (0.2); 1 cr. Introduction to Amplitude Modulation. Fault detection in DSB and SSB systems, FM modulators and demodulators. Analog to Digital conversion A/D, Digital to Analog conversion D/A, Encoding/Decoding. Pulse Modulation, PAM, PPM, PDM. Coherent detection of signal in noise. Frequency Shift Keying (FSK). *Corequisite:* EEN 443.

EEN 451 Power System Protection and Switchgear (3.0); 3 cr. Relays, circuit breakers and fuses for power system protection. Protection of machines, transformers and lines. Instrument transformers. *Prerequisite:* EEN 356.

EEN 453 Electric Drives (3.0); 3 cr. Introduction to elements of drive systems, characterization of mechanical loads, requirements of electric drive systems, dc drives with various power electronics based conversion sources, dynamic equations and closed loop control of dc drives, induction motor drives, ac controller, slip-energy recovery, volts/Hz control, synchronous motor drives, permanent magnet motors, reluctance motors. *Prerequisites:* EEN 210 and EEN 350.

EEN 455 Power Electronics (3.0); 3 cr. Switching power supplies. AC power controllers. Controlled rectifiers. DC choppers and DC-AC converters. Bridge structure inverters. *Prerequisites:* EEN 210 and EEN 350.

EEN 456 Power Electronics Laboratory (0.2); 1 cr. Experiments based on EEN 455. *Corequisite:* EEN 455.

EEN 457 Industrial Electrification (3.0); 3 cr. Lighting design for residential and industrial facilities. Emphasis on latest lighting technologies. Cable types and sizing. Motor control centers. Includes design project. *Prerequisite:* EEN 350.

EEN 458 Computer Methods for Power System Analysis and Design (3.0); 3 cr. Use of computer software to simulate power flow and other power engineering problems. *Prerequisite:* EEN 356.

EEN 459 Power Engineering Laboratory (0.2); 1 cr. Experiments and simulations in power engineering and power system analysis. *Prerequisite:* EEN 355.

EEN 461 Digital Control (3.0); 3 cr. Sampling and data reconstruction in computer control

systems. Z-transforms and state equations to describe discrete and mixed data systems. Analysis of digital feedback systems using frequency domain techniques and state space techniques. Non-linear digital feedback systems. *Prerequisite:* EEN 360.

EEN 462 Control Systems Laboratory (0.2); 1 cr. Laboratory based on EEN 360 and EEN 461. Analog and digital control systems, PID control, PLC systems. *Prerequisite:* EEN 461.

EEN 473 Special Topics in Electrical Engineering (3.0); 3 cr. Material includes coverage of recent developments in Electrical Engineering that are needed to update students on the latest technologies. Department determines topics to be covered and *prerequisites* when offered. Open to EE and CCE students.

EEN 480 Discrete-Time Signal Processing (3.0); 3 cr. Fundamental concepts of discrete-time signals and systems. Digital signal processing of discrete signals. Sampling theory and reconstruction. Discrete Fourier transforms and analysis of digital filters in the frequency domain. Z-transforms, causality and stability. State-space equations. Design and analysis of FIR and IIR digital filters. Windowing. Bilinear transformation. Filter structures. *Prerequisite:* EEN 340.

EEN 481 Signal Processing Laboratory (0.2); 1 cr. Digital filtering techniques. Architectural feature of single-chip DSP processors. Design project. *Prerequisite:* EEN 480.

EEN 523 Neural Networks (3.0); 3 cr. Principles of neural networks, architecture and circuit implementations. *Prerequisites:* MAT 235 and MAT 326.

EEN 527 Optoelectronic Devices (3.0); 3 cr. Principles of light-emitting diodes (LEDs), lasers, and photodetectors. Population inversion at a junction. Generation of coherent radiation. Heterojunctions, quantum-well LEDs and lasers, and vertical cavity surface-emitting lasers (VCSELs). PIN and avalanche photodiodes. Photonic fabrication and packaging. *Prerequisite:* EEN 416.

EEN 534 Radar Systems and Remote Sensing (3.0); 3 cr. Operation of a radar system including antennas, circuitry and wave propagation. Remote sensing and mapping of the earth. Ground penetrating radar, intelligent

vehicle highway system. Aircraft navigation. *Prerequisite:* EEN 344 and EEN 430.

EEN 545 Optical Communication (3.0); 3 cr. Fundamental of lightwave communication systems. Propagation of waves in dielectric thin films and cylindrical guides. Bit limitation rate due to dispersion and multimoding step-index and multi-index fibers. Switching and modulation by integrated optics techniques. *Prerequisites:* EEN 331 and EEN 443.

EEN 546 Algebraic Coding and Information Theory (3.0); 3 cr. Information theory and its relation to statistics. Kolmogorov complexity, entropy and inference. Shannon theory of communication. Source coding for noisy channels. Capacity theorems for multiple user channels. *Prerequisite:* EEN 443.

EEN 547 Statistical Communication Theory (3.0); 3 cr. Concepts of probability and random process theory necessary for advanced study of communications. Stochastic control. Detection and estimation problems. *Prerequisite:* EEN 443.

EEN 548 Wireless Communications (3.0); 3 cr. Introduction to wireless systems and cellular principles, modulation techniques for mobile radio, speech and channel coding, multiple access techniques, applications to wireless systems. *Prerequisites:* EEN 331 and EEN 443.

EEN 571 Engineering Project (3.0); 3 cr. Design project approved by a faculty advisor. Includes report, final presentation. *Prerequisites:* ENL 230 and Department approval.

EEN 583 Advanced Signal Processing (3.0); 3 cr. Advanced techniques in signal processing. Multirate signal processing. Upsampling and downsampling in the Z-domain. Non-stationary signals. Frequency-domain adaptive filtering. The correlation matrix. Least-squares adaptive algorithms. Linear prediction. The wavelet transform. *Prerequisite:* EEN 480.

EEN 585 Biomedical Signal Processing (3.0); 3 cr. Analysis of biological signals. Random signals. Windowing with Fourier transform, z-transform, and wavelet transform. Signal processing techniques applied to vital signs signals such as: ECG, EEG, and EMG. High resolution CG and signal averaging. *Prerequisite:* EEN 480.

EEN 598 Engineering Design I (1.0); 1 cr. The objective of this course is to develop a project

proposal that includes the following items:
Choice of project topic, literature survey, market analysis, feasibility study, project timeline, list of materials and cost, engineering ethics issues, social and environmental impact, etc.
Prerequisite: ENL 230 and Department approval.

EEN 599 Engineering Design II (2.0); 2 cr.
Implementation of the engineering design project that was proposed in EEN 598. Includes report, final presentation. Prerequisite: EEN 598

DEPARTMENT OF MECHANICAL ENGINEERING

Chairperson: *Dr. Michel El-Hayek*

Secretary: *Ms. Ghada Khoury*

Professor Emeritus

Assaf, Walid, Ph.D., 1965, Nuclear Engineering, Iowa State University, USA

Associate Professor

Asmar, Ghazi, Ph.D., 1998, *Mechanical and Aerospace Engineering*, University of Missouri, Columbia, USA

El-Hayek, Michel, Docteur Européen, 1997, *Sciences Appliquées*, Faculté Polytechnique de Mons, Belgium

Assistant Professors

Bou-Mosleh, Charbel, Ph.D., 2005, *Aerospace Engineering Sciences*, University of Colorado, Boulder, Colorado, USA

Francis, Francis, Ph.D., 2003, *Mechanical Engineering*, University of New South Wales, Sydney, Australia

Metni, Najib, Docteur, 2006, *Automatique et Traitement du Signal et des Images*, Université de Nice – Sophia Antipolis, France

Laboratory Assistant

Daou, Wissam, B.E., 2000, *Mechanical Engineering*, Notre Dame University-Louaize, Lebanon

The Degree of Bachelor of Engineering in Mechanical Engineering

This program is designed to give students the background needed to define and solve problems related to the conception and construction of mechanical systems. It is concerned with all forms of power generation, the design of machines, control, and material handling.

Admission Requirements

Admission to the Mechanical Engineering is governed by the university admission requirements as outlined in the university catalog.

In addition to the University's general admission requirements, mechanical engineering transfer students may be accepted to the Faculty of Engineering provided they satisfy the Department's and Faculty's requirements for transfer students. Transfer applicants should inquire about the relevant rules and regulations available in the Department. The number of transfer credits is determined by the Department of Mechanical Engineering according to the guidelines of the Faculty of Engineering.

Residency Requirements

Full time students entering the mechanical engineering program of first year standing must complete the listed program within eight years of the date of enrollment in the program.

A transfer candidate with a bachelor degree in mechanical engineering from an accredited institution is required to successfully complete a minimum of 45 credits of upper-division course work including a senior project. A transfer student without a bachelor degree in mechanical engineering is required to successfully complete a minimum of 60 credits of upper-division course work including 3 credits of project work.

Course Load Requirements

In general, students are not allowed to carry more than 17 credits per term, nor more than 7 credits in a summer session unless otherwise specified in their suggested program. Restrictions may be imposed on students whose overall grade-point average is less than 2.3/4.0. Upon the approval of the advisor, a student whose overall grade-point average is 3.2/4.0 or higher may be permitted to carry a maximum load of 18 credits per term.

Students in their last semester may petition to take up to 19 crs. given they are in good academic standing and they satisfy the minimum residency requirement for the major.

Graduation Requirements

To receive the degree of Bachelor of Engineering in Mechanical Engineering, a student must complete a total of 150 credits with an overall grade-point average of at least 2.0/4.0 and a minimum average of 2.0/4.0 in the major requirements and technical electives. In addition, all major requirement courses and mechanical engineering electives must be successfully completed with a minimum grade of C-. These 150 credits are divided into:

Degree Requirements (150 credits)

General Education Requirements **27 cr.**

Core Requirements **34 cr.**
CHM 211, PHS 203, PHS 212, EEN 205, EEN 206, EEN 207, ENG 201, ENG 202, CSC 212, MAT 215, MAT 235, MAT 335.

Major Requirements **69 cr.**
CEN 202, CEN 204, CEN 270, CSC 270, MAT 213, MAT 224, MEN 200, MEN 201, MEN 202, MEN 210, MEN 211, MEN 270, MEN 302, MEN 310, MEN 320, MEN 321, MEN 325, MEN 330, MEN 340, MEN 370, MEN 376, MEN 399, MEN 401, MEN 430, MEN 431, MEN 435, MEN 437, MEN 440, MEN 471, MEN 598, MEN 599.

Major Electives **15 cr.**
Choose any five courses from the following pool: MEN 400, MEN 410, MEN 439, MEN 500, MEN 501, MEN 502, MEN 503, MEN504, MEN 505, MEN 507, MEN 510, MEN 515, MEN 517, MEN 520, MEN 521, MEN 525, MEN 530, MEN 534, MEN 540, MEN 550, MEN 580, MEN 581, MEN 590, MAT 339.

Laboratory Electives **2 cr.**
Choose any two courses from the following pool: MEN 571, 573, MEN 576, MEN 578.

Free Electives **3 cr.**
Choose any course of sophomore level or higher offered by the university.

**Bachelor of Engineering in Mechanical Engineering
Suggested Program (150 Credits)**

Year I

Fall Semester I (16 Credits)

CEN	202	Statics	3 cr.
CEN	270	Engineering Graphics	1 cr.
ENG	201	Introduction to Engineering	3 cr.
ENL	213	Sophomore English Rhetoric	3 cr.
MAT	213	Calculus III	3 cr.
PHS	203	General Physics III	3 cr.

Spring Semester I (16 Credits)

ENG	202	Computers & Engineering	3 cr.
MAT	215	Linear Algebra I	3 cr.
MAT	224	Calculus IV	3 cr.
MEN	201	Engineering Mechanics: Dynamics	3 cr.
MEN	202	Mechanics of Materials I	3 cr.
MEN	270	Computer-Aided Design	1 cr.

Summer Semester I (9 Credits)

ENL	230	English in the Workplace	3 cr.
CHM	211	Principles of Chemistry	3 cr.
—	—	General Education Requirement	3 cr.

Year II

Fall Semester II (16 Credits)

CEN	204	Mechanics of Materials Laboratory	1 cr.
EEN	205	Electric Circuits	3 cr.
MAT	235	Ordinary Differential Equations	3 cr.
MEN	200	Science of Materials	3 cr.
MEN	210	Thermodynamics I	3 cr.
PHS	212	Electricity and Magnetism	3 cr.

Spring Semester II (16 Credits)

CSC	212	Program Design and Data Abstraction I	3 cr.
EEN	206	Electronics	3 cr.
MEN	211	Thermodynamics II	3 cr.
MEN	302	Mechanics of Materials II	3 cr.
MEN	320	Fluid Mechanics I	3 cr.
MEN	370	Graphics for Mechanical Engineers	1 cr.

Summer Semester II (9 Credits)

—	—	General Education Requirement	3 cr.
—	—	General Education Requirement	3 cr.
—	—	General Education Requirement	3 cr.

Year III

Fall Semester III (17 Credits)

MEN	335	Partial Differential Equation	3 cr.
MEN	321	Fluid Mechanics II	3 cr.
MEN	330	Mechanical Vibrations	3 cr.
MEN	340	Manufacturing Processes	3 cr.
MEN	376	Thermo/Fluid Laboratory	1 cr.
EEN	207	Instrumentation and Circuits Laboratory	1 cr.
—	—	General Education Requirement	3 cr.

Spring Semester III (16 Credits)

MEN	310	Heat Transfer	3 cr.
MEN	401	Introduction to Mechatronics	3 cr.
MEN	430	Theory of Machines	3 cr.
MEN	437	Mechanical Design	3 cr.
MEN	471	Manufacturing Technology Laboratory	1 cr.
—	—	General Education Requirement	3 cr.

Summer Semester III (3 Credits)

MEN	380	Practical Training in Mechanical Engineering	3 cr.
-----	-----	--	-------

Year IV**Fall Semester IV (17 Credits)**

MEN	435	Automated Controls	3 cr.
MEN	440	Computer Aided Design and Manufacturing	3 cr.
MEN	598	Engineering Design I	1 cr.
MEN	—	ME Laboratory Elective	1 cr.
MEN	—	ME Technical Elective	3 cr.
MEN	—	ME Technical Elective	3 cr.
—	—	General Education Requirement	3 cr.

Spring Semester IV (15 Credits)

MEN	599	Engineering Design II	2 cr.
MEN	—	ME Laboratory Elective	1 cr.
MEN	—	ME Technical Elective	3 cr.
MEN	—	ME Technical Elective	3 cr.
MEN	—	ME Technical Elective	3 cr.
—	—	Free Elective	3 cr.

Undergraduate Courses: Mechanical Engineering

MEN 200 Science of Materials (3.0); 3 cr. Material microstructures, dislocations and defects. Alloying and analysis of phase diagrams. Mechanical properties of metals, polymers, and composites. Heat treatment of metals, elastic and plastic behavior of materials, strain hardening, and fracture.

MEN 201 Engineering Mechanics: Dynamics (3.0); 3 cr. Description of force, position, velocity and acceleration in fixed and moving reference frames. Kinematics and kinetics of particles, of collections of particles and of rigid bodies. Energy and momentum concepts. *Prerequisite:* CEN 202.

MEN 202 Mechanics of Materials I (3.0); 3 cr. Equilibrium, force and moment resultants. Stress/strain concepts, generalized Hooke's law, classification of material behavior. Axial loads, torsion of rods and circular bars. Pressure vessels. Bending and shear stresses in beams. Analysis of Statically determinate and indeterminate structures. Stress transformation, combined loading. *Prerequisite:* CEN 202.

MEN 210 Thermodynamics I (3.0); 3 cr. Fundamentals of engineering thermodynamics: properties and behavior of pure substances, concepts of work and heat, systems and control volume analyses, first law, second law, entropy and entropy production, introduction to availability, Carnot cycle. *Prerequisite:* PHS 203 or CEN 201

MEN 211 Thermodynamics II (3.0); 3 cr. Thermodynamic cycles: steam and gas power systems, refrigeration and heat pump systems. Compressible substances: thermodynamic properties, general thermodynamic relations, virial equations of state. Introduction to psychrometrics. Introduction to combustion and equilibrium calculation. *Prerequisite:* MEN 210.

MEN 270 Computer-Aided Design (0.2); 1 cr. Application of existing CAD software to engineering problems: Basic concepts of engineering graphics in a computerized environment; Representation of engineering objects; 2D/3D representations, CAD Standards. *Prerequisite:* CEN 270.

MEN 302 Mechanics of Materials II (3.0); 3 cr. Analysis of more complicated problems in stress and strain. Energy methods, torsion of non-circular members. Shear center concept. Curved beams, thick cylinders and rotating

disks. Contact stresses. *Prerequisites:* MEN 202, MAT 235.

MEN 310 Heat Transfer (3.0); 3 cr. Mechanisms of heat transfer. Steady and transient conduction: one and multiple dimensions, approximate and exact solution procedure, introduction to numerical methods. Forced and free convection. Applications to heat exchanger design and performance evaluation. Introduction to thermal radiation. *Corequisite:* MEN 321.

MEN 320 Fluid Mechanics I (3.0); 3 cr. Fundamentals of fluid mechanics: Fluid properties, fluid statics and kinematics, inviscid flow, potential flow, simple viscous incompressible flow. Flow analyses: Control volume analysis, differential analysis, dimensional analysis and similitude. Flow equations: continuity, momentum and energy equations. *Prerequisites:* MEN 210, MAT 235.

MEN 321 Fluid Mechanics II (3.0); 3 cr. Incompressible and compressible flows: laminar/turbulent flows, pipe flow, boundary layers, lift and drag, introduction to turbulence, elementary gas dynamics. Unsteady flow phenomena. Introduction to centrifugal and axial flow machinery: pumps, fans, hydraulic turbines, and torque converters. *Prerequisite:* MEN 320.

MEN 330 Mechanical Vibrations (3.0); 3 cr. Free and forced vibrations for undamped and viscously damped single-degree-of-freedom systems. Conservation of energy approach and Rayleigh's method. Vibration of multi-degree-of-freedom systems, eigenvalue problems and mode shapes. Modal analysis. *Prerequisites:* MEN 201, MEN 202, MAT 235

MEN 340 Manufacturing Processes (3.0); 3 cr. Fundamentals and technologies used in processing various industrial materials: casting, forging, machining, metal-sheet processing, joining techniques, etc. *Prerequisites:* MEN 200, MEN 360.

MEN 370 Graphics for Mechanical Engineers (0.2); 1 cr. Application of the basic concepts of engineering graphics to the representation of mechanical components: shafts, bearings, fasteners, keys, springs, gears, cams, etc.; Assembly drawings; Dimensioning and tolerancing; Standards. CAD tools are to be used throughout the course for representation purposes. *Prerequisite:* MEN 270.

MEN 376 Thermo/Fluid Laboratory (0.2); 1 cr. Experiments related to fundamentals of fluid and thermal sciences. Topics include fluid properties, flow regimes, flow measurement, energy and power, heat transfer modes, pressure and temperature measurement, data acquisition. *Prerequisite:* MEN 210. *Corequisite:* MEN 320.

MEN 380 Practical Training in Mechanical Engineering (3.0); 3 cr. Two-month-training in a mechanical engineering environment in which the student is exposed to different aspects of mechanical engineering practice and equipment: design, construction, testing, maintenance, etc. *Prerequisite:* Senior standing.

MEN 400 Mechanics of Composite Materials (3.0); 3 cr. Introduction to composite materials. Lamina and laminate mechanical properties. Micromechanics. Mechanical and hygrothermal behavior of laminae and laminates. Lamina and laminate strength theories. *Prerequisite:* MEN 302.

MEN 401 Introduction to Mechatronics (3.0); 3 cr. Analysis of intelligent electro-mechanical systems: electronics and logics, microprocessors; electro-mechanical devices, programmable logic controllers, sensors and transducers. Introduction to micro-electromechanical systems. *Prerequisites:* ENG 202, EEN 206.

MEN 410 Internal Combustion Engines (3.0); 3 cr. Analysis of internal combustion engines: dynamics, thermodynamics, combustion, friction and wear, and other factors affecting power, efficiency and emissions. Design and operating characteristics of different types of engines. *Prerequisites:* MEN 310.

MEN 430 Theory of Machines (3.0); 3 cr. Kinematics of machinery: linkages, cams, gears, bearings, belts, etc. Static and dynamic balancing and force analysis of machines. *Prerequisites:* MEN 201, MEN 370.

MEN 431 Mechanical Engineering Laboratory (0.2); 1 cr. Applications of mechanical engineering theories and design techniques to complex mechanical systems. Topics include air-conditioning and refrigeration, hydro-power generation, solar energy, combustion systems, pump systems, bearings, assembly processes, vibrations systems. *Prerequisite:* MEN 376.

MEN 435 Automated Controls (3.0); 3 cr. Feedback control design and analysis for linear

dynamic systems with emphasis on mechanical engineering applications: transient and frequency response, stability, system performance, control modes, state space technique, introduction to digital control systems. *Prerequisites:* MEN 201, MAT 235.

MEN 437 Mechanical Engineering Design (3.0); 3 cr. Design of machine elements. System reliability. Interchangeability of mechanical devices. Stress-strain relationship in mechanical elements configuration. *Prerequisite:* MEN 302.

MEN 439 Engineering Instrumentations (3.0); 3 cr. Fundamentals of experimental methods, data acquisition and treatment, error analysis. Design and selection of measurement tools used in mechanical engineering. *Prerequisite:* MEN 401.

MEN 440 Computer Aided Design and Manufacturing (3.0); 3 cr. Principles of computer aided design and manufacturing: design process, geometric modeling, design for assembly, design for manufacturability, design/manufacture interface, computer numerical control, product development, production planning and control, standards. *Prerequisites:* MEN 340.

MEN 460 Senior Project (3.0); 3 cr. A mechanical engineering project in which the student is exposed to the design process from concept through analysis to layout and report. Projects are proposed from the different areas of mechanical engineering and reflect the expertise of the instructing faculty. *Prerequisite:* Senior standing.

MEN 471 Manufacturing Technology Laboratory (0.2); 1 cr. Experiments related to fundamentals of manufacturing processes. Topics include properties of materials, metrology, foundry processes, cold and hot working of metals, machining processes and machines tools, welding and joining processes, heat treating techniques. *Prerequisite:* MEN 340.

MEN 500 Energy Principles and Variational Methods in Mechanics (3.0); 3 cr. Calculus of Variations, virtual work and energy principles, stationary variational principles, Hamilton's principle, energy theorem of structural mechanics, Ritz method, weight residual methods, finite element method. *Prerequisite:* MEN 302.

MEN 501 Continuum Mechanics (3.0); 3 cr. Introductory course in the mechanics of continuous media. Basic concepts of stress, strain, constitutive relationships; conservation laws are treated using Cartesian tensor notation. Examples from both solid and fluid mechanics investigated. *Prerequisites:* MEN 302, MEN 321.

MEN 502 Theory of Elasticity (3.0); 3 cr. Stress and strain at a point. General equations of elasticity. Plane stress, plain strain problems; torsion of prismatic bars. Energy methods. *Prerequisite:* MEN 302.

MEN 503 Theory of Plates and Shells (3.0); 3 cr. Rectangular and circular plates. Variational methods in the analysis of plates and shells. Plates of unusual shape. Shear deformation effects. Large deformation analysis. Analysis of cylindrical shells. *Prerequisite:* MEN 302.

MEN 504 Theory of Elastic Stability (3.0); 3 cr. Buckling of Columns, frames and plates. Kinematic approach to stability. Large deflections. Energy approach to buckling. Plate and shell buckling. Inelastic buckling of columns. Creep buckling. *Prerequisite:* MEN 302.

MEN 505 Theory of Plasticity (3.0); 3 cr. Plastic yield conditions and stress-strain relations. Behavior of elastic-perfectly plastic members. Plain strain in plastic members. *Prerequisites:* MEN 502.

MEN 507 Fracture Mechanics (3.0); 3 cr. Mechanics of flawed structure. Concepts include Griffith theory, Irwin analysis, energy analysis of cracked bodies, fracture toughness testing, plane strain, plane stress, transition temperature concepts, subcritical flaw growth. *Prerequisite:* MEN 302.

MEN 510 Energy Conversion (3.0); 3 cr. Methods and techniques used in energy conversion from thermal, hydraulic, solar, wind, geothermal, etc. to electrical energy, thermal powerplants, photovoltaic systems, fuel cells. *Prerequisite:* MEN 310.

MEN 515 Heating, Ventilating and Air-Conditioning (3.0); 3 cr. Design and analysis of HVAC systems and components, comfort, cooling and heating load calculations, piping and duct design, domestic hot and cold water system. Introduction to refrigeration. *Prerequisite:* MEN 310.

MEN 517 Solar Energy (3.0); 3 cr. Fundamentals of solar radiation, design and analysis of solar systems for both low and high temperature applications, passive and active solar thermal engineering, design of solar collectors, energy storage systems. *Prerequisite:* MEN 310.

MEN 520 Fluid Power Control (3.0); 3 cr. Fundamentals of fluid power technology: hydraulic fluids and system components like pumps, valves, motors, and cylinders; pneumatic systems, fluidic components. Design, analysis and control of fluid power circuits. *Prerequisite:* MEN 321.

MEN 521 Viscous Flow and Boundary Layers (3.0); 3 cr. Fundamentals of real flow phenomena: concepts of stress and strain and derivation of Navier-Stokes equations. Application to boundary layers, creeping flows and lubrication. Flow instabilities and turbulence. *Prerequisite:* MEN 321.

MEN 525 Combustion and Flame (3.0); 3 cr. Introduction to combustion processes; combustion thermodynamics and reaction kinetics; combustion phenomena: ignition, quenching, detonation and deflagration; flame instabilities; diffusion and premixed flames; introduction to turbulent combustion. *Prerequisite:* MEN 310.

MEN 530 Advanced Vibration Analysis (3.0); 3 cr. Advanced topics in vibration theory and its application to Mechanical Systems. Topics include vibration analysis of multi-degree of freedom, distributed and nonlinear systems, random vibration analysis, and vibration control. *Prerequisite:* MEN 330.

MEN 534 Joining Processes: Welding, Soldering and Brazing (3.0); 3 cr. Analysis of various joining processes: mechanisms of surface bonding; welding metallurgy; effect of heat input on resulting microstructures; residual stresses and distortion; welding processes: MIG, TIG, Laser, electron beam, spot welding, resistance welding. *Prerequisite:* MEN 340.

MEN 540 Robots and Manipulators (3.0); 3 cr. Concepts underlying the design and application of computer-controlled manipulators: Manipulator geometry, work volume, sensors, feedback control of manipulator linkages, kinematics, trajectory planning, programming, robot system architecture, applications in mechanical

engineering. *Prerequisites:* MEN 430, MEN 435.

MEN 550 Computational Methods in Thermal and Fluid Mechanics (3.0); 3 cr. Physical and mathematical foundations of computational fluid mechanics and heat transfer with emphasis on applications: governing equations and mathematical approximations; partial differential and integral equations, discretization and solution methods, stability and convergence. Introduction to physical modeling of turbulence, combustion, and radiation. *Prerequisites:* MEN 310, MAT 335, CSC 212.

MEN 571 Design and Machinery Laboratory (0.2); 1 cr. Applications of mechanical design techniques to complex systems. Topics include mechanisms – linkages, springs, gears and gear trains, bearings, etc... - assembly processes, geometric dimensioning and tolerancing, mechanical vibrations, balancing of machineries. *Prerequisites:* MEN 330, MEN 430, and MEN 471.

MEN 573 Mechatronics and Control Laboratory (0.2); 1 cr. Applications of control theory to mechanical systems and evaluation of their performance. Topics include feedback systems, PLC control systems, mechatronics systems, etc. *Prerequisites:* MEN 401, MEN 435, and EEN 207.

MEN 576 Applied Fluid Mechanics Laboratory (0.2); 1 cr. Applications of thermo-fluid theories to the design and evaluation of turbomachinery. Topics include pumps and pumping stations, hydraulic turbines, fans and compressors, drag and lift experiments using wind tunnels. *Prerequisites:* MEN 321, and MEN 376.

MEN 578 Applied Energy Laboratory (0.2); 1 cr. Experiments dealing with energy related

technology. Topics include heating, ventilating, air-conditioning, refrigeration, combustion techniques, energy conversion, renewable energy – solar, wind, etc... *Prerequisites:* MEN 310, MEN 376.

MEN 580 Finite Elements Methods (3.0); 3 cr. The concepts and fundamentals of the finite element method with applications to problems in solid and fluid mechanics. *Prerequisite:* MEN 202.

MEN 581 Special Topics in Mechanical Engineering (3.0); 3 cr. Material includes coverage of recent developments in mechanical engineering that are needed to update students on the latest technologies. Department determines topics to be covered and *prerequisites* when offered.

MEN 590 Mechanical Engineering Software (3.0); 3 cr. Development and utilization of software packages related to various areas in mechanical engineering, graphical user interface, CAD, mesh generators, solvers, post-processors. *Corequisites:* MEN 550, MEN 580.

MEN 598 Engineering Design I (0.2); 1 cr. Development of a project proposal that includes the following items: Choice of project topic, literature survey, market analysis, feasibility study, project timeline, list of materials and cost, engineering ethics issues, social and environmental impact, etc. *Prerequisite:* ENL 230, and Department approval.

MEN 599 Engineering Design II (2.0); 2 cr. Implementation of the engineering design project that was proposed in MEN 598. Includes report, final presentation. *Prerequisite:* MEN 598.

Al Achy, Samer, B.A., 2006, *Communication Arts/RTV*, Notre Dame University-Louaize, Lebanon, *Studio Assistant and Academic Support*

Ghanem, Milo, T.S. Electricien, 1983, CIT, Lebanon, *Audio Visual University Services*

Bou Chebel, Melhem, B.T. Electricien, 1985, Deir Al Kamar Technical School, Lebanon, *Audio-Visual University Services*

Bejjani, Abdo, *Audio Visual University Services*

Tarabay, Charbel, *Events Assistant*

¹ On tenure appointment

Staff Members

Chemaly, Wassil, M.A., 2008, Media Studies, Notre Dame University-Louaize, Lebanon, *Administrative Assistant to the Dean*

Eid, Alice, *Secretarial Studies*, 1992, Bechara Technical School, Lebanon, *Secretary, Mass Communication Department*.

Jabbour, Vera, B.A., 2002, Translation and Interpretation, Notre Dame University-Louaize, Lebanon, *Secretary, English, Translation & Education Department*

Noufaily, Christine, M.A., 2007, Graphic Design, Notre Dame University-Louaize, Lebanon, *Secretary, Social and Behavioral Sciences Department*

FACULTY OF HUMANITIES

Dean: *Dr. Carol Kfouri*

Administrative Assistant: *Mrs. Wassil Chemaly*

HISTORICAL OVERVIEW

The Faculty of Humanities had its place with the two other founding faculties at NDU: The Faculty of Business Administration and Economics, and The Faculty of Natural and Applied Sciences.

During its early years as LCHE, the Faculty mainly provided the NDU community with service courses in the English language, Human Thought, Arabic, Religion, Political Science among others. In 1987, a B.A. in Communication Arts and a B.A. in Interior and Graphic Design were offered. In 1991, the B.A. in Advertizing and Marketing was introduced. Between 1993 and 1999, additional degrees in English, Translation, Physical Education, Arabic, International Affairs and Diplomacy on both the undergraduate and graduate levels were successfully introduced.

The Faculty of Humanities had become so large by 1999 that as of 2000, the Faculty of Political Science and the Faculty of Architecture, Art and Design were founded as independent entities.

Since 2000, the Faculty has added a B.A. in Psychology; an application for authorization by the Ministry of Education to offer an M.A. in Educational Psychology was approved in 2008.

Today, in addition to offering General Education courses and a large variety of elective courses, the Faculty of Humanities offers 8 undergraduate degrees and 7 M.A. programs. It also offers Teaching Diplomas and Certificates and welcomes a large number of Intensive English students each semester.

Deans of the Faculty of Humanities

Mrs. Fay Niewiadomsky 1987-1991

Dr. Nemer Frayha 1991-1994

Dr. Assad Eid 1993-2000

Dr. Boulos Sarru' 2000-2006

Dr. Carol Kfouri (Acting Dean) 2006-2007

Dr. Carol Kfouri 2007- present

MISSION, VISION AND VALUES

Mission

The mission of the Faculty of Humanities is to provide opportunities for NDU students to develop their intellectual and interpersonal capacities to their full potential. The Faculty also aims to encourage students to appreciate their culture and to work for justice and peace in their world. With a liberal arts education as the foundation of our programs, our mission is to equip students with a well rounded knowledge base enabling them to think critically and independently, to reflect on timeless issues and to shape progress. The faculty also aims to train students in professional career-based degrees.

Vision

During the upcoming five years, the Faculty will strive to become a university of choice for undergraduate degrees in Education, English, Physical Education, Psychology, Arabic, Translation and Mass Communications. To attain this goal, the curriculum will be reviewed and updated with special emphasis given to the inclusion of courses which offer students exposure to the career they have chosen. In addition, efforts will be made to promote interdisciplinary studies as well as a greater emphasis on research both for students and faculty members. In line with JPPII's *Ex Corde Ecclesiae*, "research activities will study serious contemporary problems in areas such as the dignity of human life, the promotion of justice for all, the quality of personal and family life, the protection of nature and the search for peace and political stability...." (Article 32). Graduate programs will continue to be expanded to welcome adult learners who wish to further their specialization. The Faculty of Humanities is also in the process of developing Ph.D. programs which will cater to graduate students in the region.

Values

As an integral part of a Catholic university which embraces the Maronite tradition of faith in the role of education to empower its members, the Faculty of Humanities places special emphasis on the following in all of its courses and activities:

- Academic integrity
- Academic excellence
- Personal ethics
- Belief in one's own worth
- Responsibility of the individual towards one's family and community
- Respect for tradition
- Becoming independent, critical thinkers
- Serving others
- Compassion
- Developing the ability to work in a team atmosphere for the good of the entire group
- Cross-cultural understanding
- Social consciousness
- Encouraging dialogue between faith and reason (*Ex Corde Ecclesiae* # 15)

FACULTY PROFILE

The Faculty of Humanities plays two roles in the academic life of the university. The first is to offer degree-granting programs on both the undergraduate and graduate levels; the second is to provide a large array of general education requirements, foreign language courses, and special programs designed for students at the various stages of their academic careers.

Three departments are housed under the Faculty of Humanities:

Department of English, Translation, and Education

Department of Mass Communication

Department of Social and Behavioral Sciences

General Education Requirements

Students (I.D.'s 2008 and on) whose majors fall under the Faculty of Humanities must fulfill the General Education Requirements as outlined below.

I. Communication Skills

9 cr.

English (6 cr.)

ENL 213: *Sophomore English Rhetoric*

And

ENL 223: *Communication Arts*

Or

ENL 230: *English in the Workplace*

Arabic (3 cr.) One course from:

ARB 211: *Appreciation for Arabic Literature*

ARB 212: *Advanced Arabic Grammar*

ARB 224: *Arabic Literature and Human Thought*

ARB 231: *Technical Arabic*

ARB 317: *Themes of Modern Arabic Literature in Lebanon (20th century)*

II. Philosophy and Religion

6 cr.

Religion (3 cr.)

REG 213: *Catholicism*

REG 212: *Religion and Social Issues*

REG 314: *Marriage and Family in the Catholic Church*

REG 313: *The Maronites: Faith and Cultural Heritage*

Philosophy and Ethics (3 cr.)

PHL 211: *Logic and the Scientific Method*

PHL 311: *Ethics and the Modern World*

POS 345: *Ethics and Leadership*

ENS 205: *Environment, Society and Ethics*

COA 360: *Media Ethics*

III. Cultural Studies and Social Sciences

6 cr.

Cultural Studies (3 cr.)

HUT 305: *Human Thought to 1500*

HUT 306: *Human Thought from 1500 to the Present*

LIR 214: *Introduction to Literary Genres*

MUS 210: *Music Appreciation*

FAP 215: *Art and Culture*

ARP 215: *Cultural Themes in Lebanese Arch*

COA 359: *Media and Society*

COA 315: *World Cinema Survey*

NTR 215: *Foods and Nutrition of World Cultures*

Social Sciences (3 cr.)

PSL 201: *Introduction to Psychology*

SOL 201: *Introduction to Sociology*

SOL 301: *Introduction to Anthropology*

BAD 201: *Fundamentals of Management*

ECN 200: *Survey of Economics*

ECN 211: *Principles of Micro Economics*

ECN 212: *Principles of Macro Economics*

IV. Citizenship

6 cr.

Two courses from the following pool:

POS 201: *Introduction to Political Science*

HIT 211: *History of Lebanon and the Middle East*

POS 210: *Government and Politics in Lebanon*

POS 212: *Political History of the Near East until WWI*

POS 240: *Law and Society*

IAF 301: *Modern Political Ideologies*

COA 350: *Current Issues*

V. Science and Technology

6 cr.

Mathematics/Statistics/Computer Science (3 cr.)

CSC 201: *Computers and Their Use*

CSC 202: *Computers for Visual Arts*

CSC 203: *Introduction to Programming*

MAT 201: *Fundamentals of Mathematics*

MAT 202: *Mathematics for Arts*

MAT 204: *Mathematics for Business and Economics I*

MAT 211: *Discrete Mathematics*

STA 201: *Statistics for Social Sciences*

STA 202: *Statistics for Humanities*

STA 206: *Applied Statistics for Business and Economics I*

Natural Sciences (3 cr.)

PHS 211: *Principles of Physics*

PHS 207: *Development of Science and Technology*

AST 201: *Discovering Astronomy*

AST 210: *Introduction to Astronomy and Astrophysics*

CHM 211: *Principles of Chemistry*

ENS 201: *Introduction to Environmental Science*

ENS 202: *Environment and Sustainable Development*

ENS 205: *Environment, Society, and Ethics*

ENS 206: *Ecotourism*

GEO 202: *Geology for Architects*

BIO 202: *Mystery of Life*

BIO 203: *Discover Biology*

HEA 201: *Health Awareness*

NTR 201: *Basic Human Nutrition*

VI. Study and Learning Skills

0 cr.

Notes:

1. Psychology students will take 30 credits of GERs.
Psychology students will be required to take 3 credits from the Cultural and Social Sciences category. They satisfy their Cultural and Social Sciences requirement with any course other than PSL 201.
They must take STA 202 as 3 credits of the Science and Technology requirements
2. Students majoring in Mass Communication may satisfy their Philosophy requirement by taking COA 360 Media Ethics.
3. Mass Communication students may satisfy 3 credits of their Citizenship requirements by taking COA 350 Current Issues.
4. COA courses listed in the Cultural Studies and Social Sciences category do not satisfy GER requirements for Mass Communication students. These courses must only be taken as core or major courses.
5. Mass Communication students must take STA 202 as 3 credits of the Science and Technology requirements.
6. Education students must take STA 202 as 3 credits of the Science and Technology requirements.
7. ARB 212 does not count as a GER Arabic course where it is a part of the major requirements.
8. English students may not take LIR 214 to satisfy a GER requirement.
9. Journalism students may not take COA 350 to satisfy a GER requirement.

DEPARTMENT OF ENGLISH, TRANSLATION, AND EDUCATION

Chairperson: *Dr. Mary-Angela Willis*

Secretary: *Ms. Vera Jabbour*

Professors

Eid, Assad, Doctorate, 1986, *Applied Linguistics and TEFL*, Université Saint-Joseph, Lebanon

Oueijan, Naji, Ph.D., 1985, *English Literature*, Baylor University, USA

Sarru', Boulos, Ph.D., 1979, *English and American Studies*, Indiana University, USA

Associate Professors

Abou-Chedid, Kamal, Ph.D., 1997, *Education*, Manchester University, UK

Jahshan, Paul, Ph.D., 2000, *American Studies*, Nottingham University-Nottingham, UK

Kfouri, Carol, Doctorate 1^{ère} Catégorie, 1997, *Philosophie et Sciences Humaines*, Université du Saint-Esprit Kaslik, Lebanon

Malek, Amal, Doctorate 1^{ère} Catégorie, 2000, *Philosophie et Sciences Humaines*, Université du Saint-Esprit Kaslik, Lebanon

Sabieh, Christine, Doctorate 1^{ère} Catégorie, 1998, *Philosophie et Sciences Humaines*, Université du Saint-Esprit Kaslik, Lebanon

Assistant Professors

Akar, Bassel, Doctor of Philosophy, 2009, *Education*, Institute of Education, University of London, UK

El-Meouchy, Rita, Ph.D., 2007, *Education of the English Language*, Université Saint-Joseph, Lebanon

Guldimann, Colette, Ph.D., 2004, *English*, University of London, UK

Kopaly, Tony, Doctorate 1^{ère} Catégorie 2007, *Philosophie et Sciences Humaines*, Université du Saint-Esprit Kaslik, Lebanon

Willis, Mary-Angela, Ph.D., 2001, *Francophone Literature*, University of Alabama, USA

Yazigy, Amal, Ph.D., 1992, *Applied Linguistics*, Leicester University, UK

Senior Lecturer

Akkari, Juliet, M.A., 1971, *TEFL*, American University of Beirut, Lebanon

Khoury, Mary, M.A., 1995, *English Language and Literature*, Lebanese University, Lebanon

Lecturers

Bassil, Janet, M.B.A., 1996, *International Affairs and Diplomacy*, Notre Dame University-Louaize, Lebanon

Chibani, Wissam, M.A., 2001, *TESOL*, Oklahoma City University, USA

Hajj, Micheal, M.A., 1997, *English Literature*, Notre Dame University-Louaize, Lebanon

Nassif, Nadim, *Intl. Master in Management, Law and Humanities of Sport*, 2002, De Monfort University, Leicester, U.K.

Samrani, Diana, M.A., 1990, *Education*, Andrews University of Michigan, USA

Instructors

Karam, Mirna, M.A., 2005, *Applied Linguistics*, Notre Dame University-Louaize, Lebanon (SC)

The Department of English, Translation, and Education offers the following degree programs:

B.A. in Education
B.A. in English
B.A. in Physical Education and Sport
B.A. in Translation and Interpretation
M.A. in English Language and Literature
M.A. in Education
M.A. in Translation and Interpretation

Teaching Diploma
Teaching Certificate

Minor in English
Minor in Translation

In addition, the Department offers:

Intensive English Program
Communication Skills Courses
Language Courses (Chinese, French, German, Italian, Latin, Spanish and Syriac)

Intensive English Program

Students who score less than 400 on the NDU EET are offered the opportunity to take a one-semester 12 credits. Intensive English course. Students may also take one Math remedial course simultaneously. The passing grade in Intensive English is “C” (70). A student who scores a “B” or above is placed automatically in ENL 110. Students may repeat this course only once.

Intensive English is divided into two components:

Grammar and Writing (6cr.)
Reading and Oral (6cr.)

In addition to the traditional class setting, students are encouraged to participate in the University’s academic life by sitting in on regular university classes, and will have access to the Mariam and Youssef Library and the Writing Center.

Communication Skills Courses

The placement of students in Communication Skills Courses is based upon their EET scores (see Undergraduate Admission).

ENL 105 - College English I (5 non-credit carrying; passing grade is “C”) *Note: Students who score “B” or above will be placed in ENL 213*
ENL 110 - College English II (3 non-credit carrying; passing grade is a “C”)
ENL 213 - Sophomore English Rhetoric (3cr.)
ENL 223 - Communication Arts (3cr.)
ENL 230 - English in the Workplace (3cr.)

Languages

The Department offers courses in the following languages:
Chinese, French, German, Italian, Latin, Spanish, and Syriac

Teaching Diploma

The purpose of the Teaching Diploma program is to prepare school teachers.

The program is designed to cater to both the freshly-out-of- school, inexperienced graduate and the teacher who has already had some experience but who lacks scientific preparation.

The course material will cover the various aspects of teaching, regardless of the subject matter. Such aspects include general educational theories of acquisition, basic educational psychology, discipline and management in the classroom, testing and evaluating, and the different methods of the teaching-learning process.

Admission Requirements

To qualify for admission, a candidate must either be working towards a BA/BS degree, or hold a recognized BA/BS degree in the following: English, Mathematics, Biology, and Physical Education. All candidates must pass the EET with a minimum score of 500.

Recognition

The Government of Lebanon recognizes the Teaching Diploma as equivalent to the “License d’Enseignement” if the student holds the Lebanese Baccalaureate Part II and has successfully passed the number of credits required for the Diploma over and above the total number of credits required for the BA/BS degree.

Graduation Requirements

In order to obtain the Teaching Diploma, students must successfully pass 18 credits with a GPA of 2.0/4.0 or above in the following courses:

EDU 201 Introduction to Education

EDU 313 Psychology of Education: Learning

EDU 343 Classroom Management

or

EDU 330 Curriculum Development and Evaluation

Depending on their original Bachelor’s degree, English, Mathematics, Biology, Physical Education, students must select an additional set of 3 courses suited to their discipline. NDU students may elect to begin their Teaching Diploma parallel to their degree program. T.D. courses are offered during Summer Session as well as Fall and Spring semesters.

Teaching Diploma in Arabic Language and Literature

The purpose of the Teaching Diploma program is to prepare school teachers.

The program is designed to cater to both the freshly-out-of- school, inexperienced graduate and the teacher who has already had some experience but who lacks scientific preparation.

The course material will cover the various aspects of teaching Arabic. Such aspects include general educational theories of acquisition, basic educational psychology, discipline and management in the classroom, testing and evaluating, and the different methods of the teaching-learning process.

Admission Requirements

To qualify for admission, a candidate must either be working towards a BA degree in Arabic or hold a recognized BA degree in Arabic.

Recognition

The Government of Lebanon recognizes the Teaching Diploma as equivalent to the “License d’Enseignement” if the student holds the Lebanese Baccalaureate Part II and has successfully passed the number of credits required for the Diploma over and above the total number of credits required for the BA degree in Arabic.

Graduation Requirements

In order to obtain the Teaching Diploma, students must successfully pass 18 credits with a GPA of 2.0/4.0 or above in the following courses:

- EDU 202 Introduction to Education (in Arabic)
- EDU 314 Educational Psychology (in Arabic)
- EDU 315 Literary Criticism (in Arabic)
- EDU 345 Methods of Teaching Arabic Language and Literature (in Arabic)
- EDU 359 Curriculum Design (in Arabic)
- EDU 414 Writing Styles and Textual Analysis (in Arabic)
- EDU 477 Practicum in Teaching Arabic (in Arabic)

Teaching Certificate

The Teaching Certificate program is designed to help school teachers conduct their classes scientifically. The candidate is not required to hold a university degree to join. This program will cater to elementary school teachers who are already teaching in a school but do not hold a university degree.

Admission Requirements

To qualify for admission, a candidate must hold a Lebanese Baccalaureate Part II or its equivalent. The candidate must prove English language proficiency, by passing the EET with a minimum score of 500. The candidate must also sit for an oral interview before he/she can be admitted to the program.

Academic Requirements

In order to obtain the Teaching Certificate, a candidate must successfully complete 18 credits with a GPA of 2.0/4.0 or above in the following courses:

- | | |
|---------|--|
| EDU 201 | Introduction to Education |
| EDU 313 | Psychology of Education: Learning |
| EDU 343 | Classroom Management |
| EDU 350 | Methods of Teaching - Elementary Level |
| EDU 430 | Tests, Measurement and Evaluation - Elementary Level |
| EDU 460 | Teaching Practicum - Elementary Level |

Teaching Certificate in Arabic Language and Literature

The Teaching Certificate program is designed to help school teachers conduct their classes scientifically. However, this is not a graduate program: the candidate is not required to hold a university degree to join. This program will cater to elementary school teachers who are already teaching in a school but do not hold a university degree.

Admission Requirements

To qualify for admission, a candidate must hold a Lebanese Baccalaureate II or its equivalent. The candidate must prove Arabic language proficiency. The candidate must also sit for an oral interview before he/she can be admitted to the program.

Academic Requirements

In order to receive the Teaching Certificate, a candidate must complete 18 credits with a GPA of 2.0/4.0 or above in the following courses:

- EDU 202 Introduction to Education (in Arabic)
- EDU 314 Educational Psychology (in Arabic)
- EDU 315 Literary Criticism (in Arabic)
- EDU 345 Methods of Teaching Arabic Language and Literature (in Arabic)
- EDU 359 Curriculum Design (in Arabic)
- EDU 414 Writing Styles and Textual Analysis (in Arabic)
- EDU 477 Practicum in Teaching Arabic (in Arabic)

The Degree of Bachelor of Arts in Education

The purpose of the BA Education comes in line with the University's commitment to serve the community around it, and with the national strategy of educational reform.

Students majoring in Education may choose one of the following options: Early Childhood, Learning Disabilities, or Education of the Gifted.

Graduation Requirements

Students must complete a total of 105 credits with a minimum overall GPA of 2.0/4.0 and a minimum average of 2.4/4.0 in the core and major requirements. The 105 credits are divided into:

Degree Requirements (105 credits)

General Education Requirements **33 cr.**

Core Requirements **24 cr.**

PSL 211, ENL 311, SOL 313, EDU 201, EDU 213, EDU 313, EDU 343, EDU 360

Major Requirements **42 cr.**

Option I – Early Childhood

EDU 311, EDU 332, EDU 344, EDU 355, EDU 411, EDU 413, EDU 465, EDU 475

Students must choose an additional 18 credits as described below: **18 cr.**

Group I: EDU 301 or EDU 321 (3 credits)

Group II: EDU 361, EDU 362, EDU 402, EDU 420, EDU 421, EDU 422, EDU 430, EDU 450 (12 credits)

Group III: EDU 401 or SOL 312 (3 credits)

Option II – Learning Disabilities

EDU 311, EDU 324, EDU 344, EDU 357, EDU 422, EDU 430, EDU 460, EDU 470

Students must choose an additional 18 credits as described below:

Group I: EDU 302 or EDU 325 (3 credits)

Group II: EDU 342 (3 credits)

Group III: EDU 362, EDU 402, EDU 412, EDU 413, EDU 420, EDU 421, EDU 451 (9 credits)

Group IV: EDU 401 OR SOL 312 (3 credits)

Option III – Education of the Gifted

EDU 322, EDU 323, EDU 341, EDU 344, EDU 361, EDU 430, EDU 460, EDU 470

Students must choose an additional 18 credits as described below:

Group I: EDU 330 or EDU 331 (3 credits)

Group II: EDU 301, EDU 311, EDU 321, EDU 324, EDU 402, EDU 413, EDU 420, EDU 421, EDU 422 (12 credits)

Group III: EDU 401 or EDU 412 (3 credits)

Undergraduate courses: Education

EDU 201 Introduction to Education (3.0); 3 cr. Introduces the history and philosophy of education, structure and components of the school, and the role of the teacher.

EDU 202 Introduction to Education (2.0); 2 cr. Introduces the history and philosophy of education, structure, and components of the school, and the role of the teacher. (In Arabic)

EDU 212 Sociological Perspectives on Schools (3.0); 3 cr. Aims to give students a thorough understanding of pupils and current procedures in the classroom. *Corequisite:* EDU 201.

EDU 213 Human Growth and Development (3.0); 3 cr. Introduces students to the field of developmental psychology and its influence on education. *Corequisite:* EDU 201.

EDU 214 Youth in Contemporary Society (3.0); 3 cr. Aims at developing an awareness of the Lebanese adolescent society by focusing on psychological and social development of the adolescent. *Corequisite:* EDU 201.

EDU 301 Introduction to Arts Education (3.0); 3 cr. Involves both a practical and a theoretical approach to dance, music and visual art in the community. *Corequisite:* EDU 201.

EDU 302 Introduction to the Education of the Mentally Disabled (3.0); 3 cr. Involves the diagnosis, classification, learning potential, and general characteristics of the disabled child. *Corequisite:* EDU 201.

EDU 311 Children's Literature (3.0); 3 cr. Introduces criteria for selection of children's literature, children's reading interests and preparation of materials. *Corequisite:* EDU 201.

EDU 313 Psychology of Education: Learning (3.0); 3 cr. Learning and its relation to growth and development. Surveys the theories of learning and their pedagogical implications. *Corequisite:* EDU 201.

EDU 314 Educational Psychology (3.0); 3 cr. Examines the interrelationship between education and psychology, presents the theoretical and practical perspectives of teaching, and compares the Western to the Arab theories and views. (In Arabic)

EDU 315 Literary Criticism (3.0); 3 cr. Introduces a wide variety of literary disciplines

and methods and applies these disciplines to selected ancient and modern texts. (In Arabic)

EDU 321 Education and the Media (3.0); 3 cr. Examines and interprets the role that the press, radio, film, television and advertising play in developmental attitudes and behavior. *Corequisite:* EDU 313

EDU 322 Education of Talented and Gifted Students (3.0); 3 cr. Offers theoretical background and practical concerns for educating exceptionally able students. *Corequisite:* EDU 313.

EDU 323 Behavioral Problems of Exceptional Students (3.0); 3 cr. Introduces teaching methods appropriate to the needs of students with emotional and behavioral problems. *Corequisite:* EDU 313.

EDU 324 Counseling in Special Education (3.0); 3 cr. Presents approaches to working with exceptional individuals and their parents in the school, home and community. *Corequisite:* EDU 313.

EDU 325 The Needs of the Disabled (3.0); 3 cr. Is designed to develop awareness of the educational needs of the disabled and the competencies to meet those needs. *Corequisite:* EDU 313.

EDU 330 Curriculum Development and Evaluation: Elementary (3.0); 3 cr. Examines basic elements and foundations of a curriculum. Emphasis is on the elementary level. *Corequisite:* EDU 313.

EDU 331 Curriculum Development and Evaluation: Secondary (3.0); 3 cr. Same as EDU 330 but emphasizes the secondary level. *Corequisite:* EDU 313.

EDU 332 Curriculum Development and Evaluation: Early Childhood (3.0); 3 cr. Same as EDU 330 but emphasizes early childhood. *Corequisite:* EDU 313.

EDU 333 Curriculum Development and Evaluation: the Disabled (3.0); 3 cr. Same as EDU 330 but emphasizes students with learning disabilities. *Corequisite:* EDU 313

EDU 341 Reading Skills for the Gifted (3.0); 3 cr. Focuses on the special reading skills of gifted students. Current programs and teaching

approaches are critically examined. *Corequisite:* EDU 313.

EDU 342 Instructional Strategies for the Disabled (3.0); 3 cr. Provides techniques for teaching the disabled, such as basic stimulus control, positioning, eating, toileting, etc. *Corequisite:* EDU 313.

EDU 343 Classroom Management (3.0); 3 cr. Examines the role of the teacher in a classroom situation: teacher-student interaction and variations in class activities. *Corequisite:* EDU 201.

EDU 344 School Libraries (3.0); 3 cr. Introduces library skills and provides students with ideas related to the structuring and enrichment of library material. *Corequisite:* EDU 201.

EDU 345 Methods of Teaching Arabic Language and Literature (3.0); 3 cr. Examines the most recent methods of teaching Arabic. Aims to develop the teachers abilities to motivate and inspire students. (In Arabic)

EDU 350 Methods of Teaching: Elementary (3.0); 3 cr. Provides principles and techniques of language, arithmetic, and science teaching in the elementary classes. *Corequisite:* EDU 313.

EDU 351 Methods of Teaching English as Foreign Language (3.0); 3 cr. Same as EDU 350 but focuses on the teaching of the four language skills at various learning stages. *Corequisite:* EDU 313.

EDU 352 Methods of Teaching Mathematics (3.0); 3 cr. Examines methods of teaching mathematics: educational objectives, mathematical logic and teaching aids. *Corequisite:* EDU 313.

EDU 353 Methods of Teaching Science (3.0); 3 cr. Examines methods of teaching science: educational objectives, basic concepts, lab skills and teaching aids. *Corequisite:* EDU 313.

EDU 354 Methods of Teaching Social Studies (3.0); 3 cr. Deals with different approaches to teaching history, geography and civics. *Corequisite:* EDU 313.

EDU 355 Methods of Teaching: Early Childhood (3.0); 3 cr. Methods and materials for the young child's learning: the use of manipulative and multi-sensory materials. *Corequisite:* EDU 313.

EDU 356 Methods of Teaching: the Handicapped (3.0); 3 cr. Methods for handicapped students: curriculum needs, teaching techniques and behavior management. *Corequisite:* EDU 313.

EDU 357 Methodology of Teaching: Learning Disabilities (3.0); 3 cr. Introduces dimensions of learning disabilities: identification, characteristics, development, habilitation. *Corequisite:* EDU 313.

EDU 359 Curriculum Design (2.0); 2 cr. Examines basic elements and foundations of the curriculum of Arabic language and literature in K-12 classes. (In Arabic)

EDU 360 Instructional Technology (3.0); 3 cr. The practical application of audio-visual materials, the operation and maintenance of equipment, and the construction of aids.

EDU 361 Applications of Computers in Teaching (3.0); 3 cr. The implications of computer application in the classroom. Students will learn software evaluation skills.

EDU 362 Education and the Lebanese Law (3.0); 3 cr. Studies the various laws in the Lebanese Constitution that determine the educational process in Lebanon.

EDU 401 Intercultural Communication (3.0); 3 cr. Introduces the comparative study of communication variables that influence interaction between persons of different social groups.

EDU 402 Foundations of Counseling Services (3.0); 3 cr. Studies the philosophy, theory, organization and administration of school and agency counseling services.

EDU 411 Early Childhood Education (3.0); 3 cr. Investigates the significance of early childhood years (0-8) in the education of children. A comparative study is made of early childhood education in Lebanon.

EDU 412 Gender and Human Interaction (3.0); 3 cr. Examines gender and communication and the relationship of gender to self-disclosure, self assertion, listening and empathy.

EDU 413 Early Childhood General Health, Nutrition and Safety (3.0); 3 cr. Investigates effective techniques for dealing with health, safety and nutrition in early childhood education.

EDU 414 Writing Styles and Textual Analysis (3.0); 3 cr. Surveys a variety of writing styles. It aims to develop the students' ability to write and analyze texts based on content and style. (In Arabic)

EDU 420 Crisis Intervention (3.0); 3 cr. Examines the crisis intervention services in community health, mental health, substances misuse, and child welfare.

EDU 421 Children at Risk (3.0); 3 cr. Identifies potential risks to which children may be exposed. Also shows how the teacher, school and community can cooperate with child to foster a positive sense of worth and ability.

EDU 422 Learning and Behavioral Difficulties (3.0); 3 cr. Presents adaptive teaching/learning procedures. Also prescribes instructional strategies and techniques.

EDU 430 Tests, Measurement and Evaluation: Elementary (3.0); 3 cr. Critically examines the basic principles and techniques of testing and evaluation on the elementary level. *Corequisite:* EDU 350.

EDU 431 Tests, Measurement and Evaluation in English (3.0); 3 cr. A critical examination of the basic principles and techniques of testing and evaluation in English. *Corequisite:* EDU 351.

EDU 432 Tests, Measurement and Evaluation in Mathematics (3.0); 3 cr. Same as EDU 431 but relates to the testing of mathematics. *Corequisite:* EDU 352.

EDU 433 Tests, Measurement and Evaluation in Science (3.0); 3 cr. Same as EDU 431 but relates to the testing of science subjects. *Corequisite:* EDU 353.

EDU 434 Tests, Measurement and Evaluation in Social Studies (3.0); 3 cr. Same as EDU 431 but relates to the testing of social studies. *Corequisite:* EDU 354.

EDU 438 Tests, Measurement and Evaluation in Arabic (3.0); 3 cr. Same as EDU 431 but relates to the testing of Arabic language.

EDU 450 Law and the Disabled (3.0); 3 cr. Discusses relevant laws pertaining to the disabled.

EDU 451 Clinical Assessment in the School (3.0); 3 cr. Studies the nature of psychological tests, standardization procedures, and types of scales and scores.

EDU 460 Elementary Teaching Practicum I (1.2); 3 cr. Guided and supervised practice in the application of elementary level teaching methods. Part I. *Corequisite:* EDU 430.

EDU 461 English Teaching Practicum I (1.2); 3 cr. Same as EDU 460 but involves the teaching of English. Part I. *Corequisite:* EDU 431.

EDU 462 Mathematics Teaching Practicum I (1.2); 3 cr. Same as EDU 460 but involves the teaching of mathematics. Part I. *Corequisite:* EDU 432.

EDU 463 Science Teaching Practicum I (1.2); 3 cr. Same as EDU 460 but involves the teaching of science subjects. Part I. *Corequisite:* EDU 433

EDU 464 Social Studies Teaching Practicum I (1.2); 3 cr. Same as EDU 460 but involves the teaching of social studies. Part I. *Corequisite:* EDU 434.

EDU 465 Early Childhood Teaching Practicum I (1.2); 3 cr. Same as EDU 460 but deals with teaching on the early childhood level. Part I. *Corequisite:* EDU 430.

EDU 466 Teaching of the Disabled Practicum I (1.2); 3 cr. Same as EDU 460 but deals with the teaching of the handicapped. Part I. *Corequisite:* EDU 356.

EDU 468 Arabic Teaching Practicum I (1.2); 3 cr. Same as EDU 460 but involves the teaching of the Arabic language.

EDU 470 Elementary Teaching Practicum II (1.2); 3 cr. Similar to EDU 460. Part II. *Corequisite:* EDU 460.

EDU 471 English Teaching Practicum II (1.2); 3 cr. Similar to EDU 461. Part II. *Corequisite:* EDU 461.

EDU 472 Mathematics Teaching Practicum II (1.2); 3 cr. Similar to EDU 462. Part II. *Corequisite:* EDU 462.

EDU 473 Science Teaching Practicum II (1.2); 3 cr. Similar to EDU 463. Part II. *Corequisite:* EDU 463.

EDU 474 Social Studies Teaching Practicum II (1.2); 3 cr. Similar to EDU 464. Part II. *Corequisite:* EDU 464.

EDU 475 Early Childhood Teaching Practicum II (1.2); 3 cr. Similar to EDU 465. Part II. *Corequisite:* EDU 465.

EDU 476 Teaching of the Disabled Practicum II (1.2); 3 cr. Similar to EDU 466. Part II. *Corequisite:* EDU 466.

EDU 477 Practicum in Teaching Arabic (3.0); 3 cr. Aims to develop students' ability not only to develop lesson plans but also to follow them across all school levels. (In Arabic)

EDU 478 Arabic Teaching Practicum II (1.2); 3 cr. Similar to EDU 468 Part II. *Corequisite:* EDU 468.

EDU 480 Elementary Teaching Internship (1.0); 1 cr. The student will choose a pedagogical issue, discuss its treatment/application in schools and present a written report.

EDU 481 English Teaching Internship (1.0); 1 cr. Same as EDU 480 but with emphasis on the teaching of English as a foreign language.

EDU 482 Mathematics Teaching Internship (1.0); 1 cr. Same as EDU 480 but with emphasis on the teaching of mathematics.

EDU 483 Science Teaching Internship (1.0); 1 cr. Same as EDU 480 but with emphasis on the teaching of science subjects.

EDU 484 Social Studies Teaching Internship (1.0); 1 cr. Same as EDU 480 but with emphasis on the teaching of social studies.

EDU 485 Early Childhood Teaching Internship (1.0); 1 cr. Same as EDU 480 but with emphasis on early childhood.

EDU 486 Teaching of the Disabled Internship (1.0); 1 cr. Same as EDU 480 but with emphasis on the teaching of the handicapped.

EDU 487 Counseling and Guidance Internship (1.0); 1 cr. Same as EDU 480 but with emphasis on counseling and guidance.

EDU 488 Arabic Teaching Internship (3.0); 3 cr. Same as EDU 480 but with emphasis on the teaching of Arabic.

The Degree of Bachelor of Arts in Physical Education and Sport

The B.A. in Physical Education and Sport is designed to meet the needs of those who plan on pursuing careers as teachers, coaches, or trainers. Students majoring in Physical Education and Sport must also study for their Teaching Diploma in Physical Education. The B.A. in Physical Education will increase students' theoretical knowledge, develop students' practical skills in various sports activities, including sports required in international baccalaureate programs, instill a commitment to health and fitness, and prepare students to practice their skills and compete in the job market.

- Students must either pass PES 321 before taking major elective courses or register concurrently in PES 321 and other major elective courses.
- Courses are part lecture and part activity.

Graduation Requirements

To graduate, students must successfully complete a total of 120 credits with a minimum overall GPA of 2.0/4.0 and a minimum average of 2.4/4.0 in the core and major requirements.

Degree Requirements (120 credits: Major courses 99 cr. & - TD 21 cr.)

General Education Requirements: **30 cr.**

Core Requirements **33 cr.**

PES 204, PES 205, PES 250, PES 301, PES 321, PES 354, PES 358, PES 420, PES 421, PES 422, PES 426, PES 492

Major Electives **32 cr.**

- 6 courses from the following pool: PES 326, PES 327, PES 328, PES 329, PES 330, PES 331, PES 332, PES 347
- 10 courses from the following pool: PES 322, PES 333, PES 334, PES 335, PES 336, PES 337, PES 338, PES 339, PES 340, PES 341, PES 342

Free Electives **4 cr.**

Teaching Diploma **21 cr.**

**Bachelor of Arts in Physical Education and Sport

Undergraduate Courses: Physical Education and Sport

PES 201 Introduction to PE (3.0); 3 cr. Nature, aims, motivation and profession. *Corequisite:* ENL 105.

PES 202 History of PE (3.0); 3 cr. Egyptian, Phoenician, Greek and Roman; later developments till the modern age. *Corequisite:* ENL 105.

PES 203 Introduction to Physical Therapy (3.0); 3 cr. The discipline of physical therapy, opportunities, and responsibilities. *Corequisite:* ENL 105.

PES 204 Foundations of Physical Education (3.0); 3 cr. This course examines the historical, philosophical and sociological foundations of sport and serves as an introduction to the physical education, exercise and sport-related fields. The course will also incorporate contemporary trends and issues. This course should be taken during the first academic year.

PES 205 Physical Therapy & Athletic Injuries (3.0); 3 cr. The student will learn a wide variety of rehabilitation and physical therapy techniques in relation to injuries associated with sports activities, their prevention and care. The material will also cover basic first aid and CPR.

PES 250 Motor Development & Motor Learning (3.0); 3 cr. This course explores specific principles of learning and the control of movement and motor skills. Students will also study the neurophysiological activation of muscles, reflexes, etc. during movement.

PES 251 Motor Learning (3.0); 3 cr. Exploration and explanation of materials, methods and mechanisms. *Prerequisite:* PES 201.

PES 252 Athletic Injuries (3.0); 3 cr. Care and prevention, first aid methods (CPR).

PES 301 Anatomical Kinesiology (3.0); 3 cr. An understanding of human anatomy and basic mechanical principles related to efficient movement

PES 311 Basketball (1.0); 1 cr. Basic skills, rules, refereeing, training - theory and practice.

PES 312 Volleyball (1.0); 1 cr. Basic skills, refereeing, training - theory and practice.

PES 313 Football (1.0); 1 cr. Basic skills, refereeing, training - theory and practice.

PES 314 Handball (1.0); 1 cr. Basic skills, refereeing, training - theory and practice.

PES 315 Tennis (1.0); 1 cr. Basic skills, refereeing, training - theory and practice.

PES 316 Racquet Sports (1.0); 1 cr. (squash, table-tennis, badminton) basic skills, rules, refereeing, training - theory and practice.

PES 317 Tae-Kwon-Do (1.0); 1 cr. Basic skills, refereeing, training - theory and practice.

PES 318 Swimming (2.0); 2 cr. Basic swimming strokes, diving, and swimming competitions.

PES 319 Judo (1.0); 1 cr. Basic skills, refereeing, training - theory and practice.

PES 320 Water-Polo (1.0); 1 cr. Basic skills, refereeing, training - theory and practice.

PES 321 Physical Exercise (1.0); 2 cr. (Aerobics, stretching, etc.) basic skills, rules, training - theory and practice.

PES 322 Dancing (2.0); 2 cr. Beginning skills in dance techniques - classical and modern.

PES 323 Weight-lifting (1.0); 1 cr. Basic skills, rules, refereeing, training - theory and practice.

PES 324 Track & Field (2.0); 2 cr. Basic skills, refereeing, training - theory and practice.

PES 325 Gymnastics (1.0); 1 cr. Fundamentals of various types of gymnastics for men and women (classical and rhythmic).

PES 326 Basketball (2.0); 2cr. This course is designed primarily for physical education majors. Emphasis is placed on the development of fundamental skills and acquisition of techniques of teaching basketball, the rules, and refereeing.

PES 327 Volleyball (2.0); 2cr. This course is designed primarily for physical education majors. Emphasis is placed on the development of fundamental skills and acquisition of techniques of teaching volleyball, the rules, and refereeing.

PES 328 Football (2.0); 2cr. This course is designed primarily for physical education majors. Emphasis is placed on the development of fundamental skills and acquisition of

techniques of teaching football, the rules, and refereeing.

PES 329 Tennis (2.0); 2cr. This course is designed primarily for physical education majors. Emphasis is placed on the development of fundamental skills and acquisition of techniques of teaching tennis, the rules, and refereeing.

PES 330 Badminton (2.0); 2cr. This course is designed primarily for physical education majors. Emphasis is placed on the development of fundamental skills and acquisition of techniques of teaching badminton, the rules, and refereeing.

PES 331 Table Tennis (2.0); 2cr. This course is designed primarily for physical education majors. Emphasis is placed on the development of fundamental skills and acquisition of techniques of teaching table tennis, the rules, and refereeing.

PES 332 Weight-Lifting (2.0); 2cr. This course is designed primarily for physical education majors. Emphasis is placed on the development of fundamental skills and acquisition of techniques of teaching weight-lifting and the rules.

PES 333 Swimming I (2.0); 2cr. This course is designed primarily for physical education majors. Emphasis is placed on the development of fundamental skills and acquisition of techniques of teaching the different strokes (freestyle, backstroke, crawl), the rules, and refereeing.

PES 334 Swimming II (2.0); 2cr. This course is designed primarily for physical education majors. Emphasis is placed on the development of fundamental skills and acquisition of techniques of teaching the different strokes (breaststroke, butterfly), the rules, and refereeing.

PES 335 Track and Field I (2.0); 2cr. This course is designed primarily for physical education majors. Emphasis is placed on the development of fundamental skills and acquisition of techniques of teaching running (sprint, 100m, 200m, endurance, etc.), the rules, and refereeing.

PES 336 Track and Field II (2.0); 2cr. This course is designed primarily for physical education majors. Emphasis is placed on the development of fundamental skills and

acquisition of techniques of teaching jumping (long jump, high jump, etc.), the rules, and refereeing.

PES 337 Track and Field III (2.0); 2cr. This course is designed primarily for physical education majors. Emphasis is placed on the development of fundamental skills and acquisition of techniques of teaching throwing (discus, shot-put, javelin, etc.), the rules, and refereeing.

PES 338 Combat Sports I (2.0); 2cr. This course is designed primarily for physical education majors. Emphasis is placed on the development of fundamental skills and acquisition of techniques of teaching combat sports (Striking: Tae-Kwon-Do, Karate, etc.), the rules, and refereeing.

PES 339 Combat Sports II (2.0); 2cr. This course is designed primarily for physical education majors. Emphasis is placed on the development of fundamental skills and acquisition of techniques of teaching combat sports (Grappling: Wrestling, Judo, etc.), the rules, and refereeing.

PES 340 Gymnastics I (2.0); 2cr. This course is designed primarily for physical education majors. Emphasis is placed on the development of fundamental skills and acquisition of techniques of teaching gymnastics (floor techniques), the rules, and refereeing.

PES 341 Gymnastics II (2.0); 2cr. This course is designed primarily for physical education majors. Emphasis is placed on the development of fundamental skills and acquisition of techniques of teaching gymnastics (apparatus techniques), the rules, and refereeing.

PES 342 Winter Sports (2.0); 2cr. Emphasis is placed on the development of fundamental skills and acquisition of techniques of teaching skiing and snowboarding. This is an accelerated course that will take place during the winter season over the course of a specific number of trips to ski resorts for intensive practical sessions. Priority is given to Physical Education majors.

PES 343 Pilates and Yoga (2.0); 2cr. This course is designed primarily for physical education majors. Emphasis is placed on the development of the fundamental skills of Pilates and Yoga and the techniques of teaching them. Pilates will focus on increasing breathing capacity and improving postural alignment through simultaneous stretching and

strengthening movements. Hatha Yoga is a vigorous cardiovascular workout which increases strength, flexibility, balance, conditioning, and endurance.

PES 344 Cardio Fitness and Toning (2.0); 2cr. This course is designed primarily for physical education majors. Emphasis is placed on the development of fundamental skills in cardiovascular workouts and acquisition of techniques of teaching. The course combines aerobic activities with muscle toning strength movements. Instruction will include the safe and effective use of fitness apparatus including, bench step, physio balls, resistance bands and hand weights.

PES 345 Chess (1.0); 1 cr. This course is designed to help students engage in cognitive processing mechanisms, and accordingly develop competence in the logical thinking needed to play chess.

PES 346 Lifeguard Training (2.0); 2 cr. This course introduces and develops skills and knowledge necessary to prepare individuals for lifeguard responsibilities. It teaches students to prevent, recognize, and respond to aquatic-related emergencies. Teaching methodology includes lectures, demonstrations, and instructional video with hands-on training and practice. Pre-requisite: Students must pass a swimming test.

PES 347 Handball Handball (2.0); 2 cr. This course will provide the basic skills of team handball including fundamental strategies and rules. The course is also designed to provide physical education students with teaching skills and methods necessary for the instruction of handball. For Physical Education majors.

PES 348 Basic Life Support and First Aid (2.0); 2 cr. This course trains students in Basic Life Support skills and first aid care according to International Red Cross standards. It combines lectures and demonstrations with hands-on training and practice. Focus will be on bone fractures, joint dislocations, ligament sprains, muscle strain, major wounds, burns, basic airway management, bleeding control, and spinal dislocation.

PES 351 Development of Motor Control (3.0); 3 cr. Neurophysiological activation of muscles, reflexes, etc. during movement.

PES 352 Exercise and Mental Health (3.0); 3 cr. Theories related to mental health consequences of physical activities.

PES 354 Athletic Fitness Training (2.0); 3 cr. This comprehensive course is designed to provide the student with the knowledge and skills needed to develop fitness programs for competitive athletes in different sports. The course focuses on advanced topics in training the aerobic and anaerobic systems, developing strength and power, planning and periodization, in addition to topics in sports nutrition and exercise physiology.

PES 355 Methods in PE (3.0); 3 cr. Planning, strategies, techniques, and methods of teaching PE.

PES 356 Individual and Dual Sports (3.0); 3 cr. Strategies and materials in planning, implementing, and teaching programs.

PES 357 Team Sports (3.0); 3 cr. Strategies and materials in planning, implementing and teaching programs.

PES 358 Physiology of Exercise (3.0); 3 cr. Physiological changes that occur as a result of exercise and work.

PES 360 Consumer Health (3.0); 3 cr. Consumer discrimination of health information, products and services.

PES 361 Sports Policy and Management (3.0); 3 cr. The aim of this course is to have the students expand their knowledge in the economic and political aspects of Sports and Physical Education. They will be able to identify the roles and responsibilities of a sport manager, agent, and coordinator. Students will also develop their understanding in the planning and management of different sports programs in schools, universities, health clubs, competitive sports clubs, sports federations, sports companies and companies related to sports and athletic fitness.

PES 411 Advanced Prevention and Care (3.0); 3 cr. Of athletic injuries. Prerequisite: PES 252.

PES 412 Administration of PE (3.0); 3 cr. Procedures in secondary education - curriculum development and planning.

PES 413 PE in Elementary Schools (3.0); 3 cr. Development of positive body image, basic movement, and manipulative skills.

PES 414 Alcohol, Tobacco, and Drugs (3.0); 3 cr. Use, misuse and abuse of drugs in relation to all sides of human development.

PES 420 Theory of Fitness Coaching (3.0): 3 cr. This course incorporates the basic components of fitness and wellness in order to better understand human health and well-being. Students will learn to design, implement and evaluate personal fitness and wellness programs. Topics covered will include incorporating exercise into every lifestyle including youth, the elderly, expecting mothers. In addition, nutrition, weight management and stress management will be studied. The latest fitness and wellness research will also be analyzed and interpreted. *Corequisite:* PES 358

PES 421 Coaching (3.0); 3 cr. Leadership, supervision, democracy and behavior in sports; also methods of coaching.

PES 422 Biomechanics (3.0); 3 cr. Improved teaching/coaching through biomechanical and anatomical analyses of sports and related activities.

PES 423 Dynamic Fitness (3.0); 3 cr. Develops positive health practices in physical activity, diet, rest, and relaxation of living.

PES 424 Therapeutic Use of Exercise (3.0); 3 cr. How to use exercise in physical therapy.

PES 425 Adapted Physical Education (3.0); 3 cr. Exercise programs adapted to the needs of the special student.

PES 426 Adapted Physical Fitness (3.0): 3 cr. Designed to promote knowledge and understanding of the needs and abilities of the special student in addition to the procedures and responsibilities of physical education for the special student. Emphasis will be placed on the development of methods to competently modify physical activities to suit students with various individual needs. *Corequisite:* PES 358.

PES 430 Evaluation of PE (3.0); 3 cr. Nature and use of a variety of tests - practical application and interpretation of results.

PES 461 Teaching Practicum Elementary (3.0); 3 cr. Application of PE and Sport methods in elementary schools.

PES 470 Laboratory Practice in Kinesiology (3.0); 3 cr.

PES 472 Laboratory Practice in Kinesiology II (3.0); 3 cr.

PES 491 Senior Project (3.0); 3 cr. Paper based on scientific research - topic chosen by student and approved by the department.

PES 492 Internship (1.0): 1 cr. Supervised, practical experience in teaching physical education activities or with approved professionals in select athletic training settings. Student must submit final report. *Prerequisite:* Senior standing and department chair approval.

The Degree of Bachelor of Arts in English Language

The B.A. English Language

- helps students obtain that mastery of the English language which is now necessary in most non-teaching careers,
- provides the necessary background required by those who intend to engage in teaching English language and/or literature, and
- prepares students to pursue graduate studies in language and/or literature.

Graduation Requirements

Students majoring in English must successfully complete a total of 102 credits with an overall GPA of at least 2.0/4.0 and a minimum average of 2.0/4.0 in the major requirements. A minimum grade of “C” is required in ENL 213 and ENL 223.

Degree Requirements (102 credits)

General Education Requirements	33 cr.

Minor in English (18 credits)

Students minoring in English must successfully complete a total of 18 credits with a minimum average of 2.0/4.0 in the minor courses. Students must earn a “B” or higher in ENL 213 to be eligible to register for English minor courses.

Option I: Language (18 cr.)

ENL 301

9 credits at the 300-level

6 credits at the 400-level

Option II: Literature (18 cr.)

LIR 214

3 credits at the 200-level

12 credits at the 300 and 400-levels

Undergraduate Courses: English

ENL 001 Intensive English I (20.0); 0 cr. Designed to raise students' level of English to university standards.

ENL 002 Intensive English II (12.0); 0 cr. Designed to improve the students' level of English and to prepare for University. Emphasis on reading, writing, speaking and grammar. Students who score a B or above may register for ENL 110. Passing Grade is “C”.

ENL 105 College English I (5.0); 5 cr. This course places emphasis on listening, speaking, reading, and writing skills that will enable students to succeed in other courses offered at NDU. The passing grade for this course (non-credit carrying) is C. Students who earn a B or above may register directly in ENL 213.

ENL 107 Freshman English II (5.0); 5 cr. Designed to strengthen student proficiency in academic English. Students will master research techniques. *Corequisite:* ENL 105 or Placement.

ENL 109 Freshman English I for Science (3.0); 3 cr. Aims at facilitating the science students' access to university courses given in the English language.

ENL 110 College English II (3.0); 3 cr. This course bridges the gaps for those students who need to reinforce the basic skills taught in ENL 105 in order to succeed in sophomore-level university courses. Emphasis is on consolidating research techniques and further development of academic reading and writing skills. The passing grade for this course (non-credit carrying) is C. *Corequisite:* ENL 105 or Placement.

ENL 111 Public Speaking (3.0); 3 cr. Introduces Freshman students to the art of public speaking and communication in the English language. Emphasizes personal experience, informative and persuasive speaking. The course also aims to prepare for a successful transition into academic life. For Freshman students.

ENL 213 Sophomore English Rhetoric (3.0); 3 cr. Aims at developing the use of logic and reasoning in argumentation. A properly documented critical paper is required. *Prerequisite:* ENL 105 or ENL 110 or placement.

ENL 223 Communication Arts (3.0); 3 cr. Designed to introduce the student to the art and science of speech making and communicating with others. *Corequisite:* ENL 213

ENL 230 English in the Workplace (3.0); 3 cr. Provides students with the practical technical skills required for professional communication. *Corequisite:* ENL 213.

ENL 301 Introduction to the Study of Language (3.0); 3 cr. An introduction to the study of language; its nature, structure, and development. *Corequisite:* ENL 213.

ENL 311 Phonetics (3.0); 3 cr. Study of articulatory phonetics with emphasis on English sound systems. Practice in phonetic transcription. *Corequisite:* ENL 301.

ENL 312 Morphology (3.0); 3 cr. Word formation and the attempts to formulate a theory of word structure. *Corequisite:* ENL 301.

ENL 313 Syntax (3.0); 3 cr. Analysis of phrase and sentence structure in English and their

immediate constituents and types. *Corequisite:* ENL 312.

ENL 314 English Vocabulary (3.0); 3 cr. A detailed study of meaning relationships, with a study of borrowings from other languages. *Corequisite:* ENL 312.

ENL 315 Transformational Grammar (3.0); 3 cr. Involves students in solving exercises in a transformational generative syntax of English. Chomsky's grammar models are included. *Corequisite:* ENL 313.

ENL 316 Fundamentals of Discourse Analysis (3.0); 3 cr. Aims at introducing students to the different structural and communicative levels of discourse: textual organization (reference, cohesion, coherence, etc.), shared beliefs (presupposition, implicature, given-new information structure, etc.) and conversational analysis (turn-taking, interruptions, etc.). *Prerequisite:* ENL 301.

ENL 317 Language Acquisition Theories (3.0); 3 cr. Studies the process by which language develops in humans. Theories concerning first language acquisition as well as second language acquisition are discussed.

ENL 321 Semiotics (3.0); 3 cr. A study of the various patterns of bodily activities, and/or gestures which different English speaking communities systematically use in order to communicate.

ENL 322 Language and Culture (3.0); 3 cr. A study of cultural matter i.e. customs, traditions, ways of thinking, taboos, etc. which influence 'meaning' in language use.

ENL 324 Creative Writing (3.0); 3 cr. A course in creative writing through practical experiment, discussion, and stylistic study of models. Students will practice various writing genres. *Corequisite:* ENL 213

ENL 411 History of the English Language (3.0); 3 cr. A study of the major phonological,

syntactic and lexical developments since 9th century. *Corequisite:* ENL 314.

ENL 412 Phonology (3.0); 3 cr. Studies phonological theory development. Emphasizes generative phonology of English. *Corequisite:* ENL 311.

ENL 413 Advanced English Grammar (3.0); 3 cr. Study of English grammar as dealt with by the traditional grammarians. *Corequisite:* ENL 313.

ENL 414 Sociolinguistics I (3.0); 3 cr. Treats language as a social phenomenon. Linguistic variations, social, and contextual factors are studied. *Corequisite:* ENL 314.

ENL 415 Applied Linguistics (3.0); 3 cr. Studies the application of modern linguistics to teaching. Includes contrastive analysis between English and Arabic and error analysis. *Corequisite:* ENL 314.

ENL 416 Language Theories (3.0); 3 cr. Studies the historical development of linguistic theory with a critical analysis of the competing theories of language. *Corequisite:* ENL 411.

ENL 417 Introduction to Critical Linguistics (3.0); 3 cr. Looks at language from a functional systemic perspective. It utilizes linguistic techniques (tense, reference, deixis, transitivity, voice, theta roles, modality, etc.) in order to uncover implicit ideologies inherent in texts. Texts covered include scientific, religious, literary, political, and advertising texts. *Prerequisite:* ENL 301

ENL 421 Varieties of English (3.0); 3 cr. A systematic analysis of the major features/characteristics of the different 'styles' of English, i.e. commercial, scientific, legal, etc.

ENL 430 Special Topics in Linguistics (3.0); 3 cr. Investigation of special topics of current interest in Linguistics. May be repeated for credit with change of topic. *Prerequisite:* ENL 301.

Undergraduate Courses: Languages

CHI 201 Basic Chinese (3.0); 3 cr. This course introduces students to basic Chinese conversation. Students practice everyday situations and learn how to read elementary Chinese. At the end of the course students will be able to give oral summaries.

CHI 202 Intermediate Chinese (3.0); 3 cr. This course is a continuation of Chinese 201. Emphasis is on improving conversational Chinese in addition to reading and writing.

FRC 105 Freshman French I (3.0); 3 cr. This course introduces the student to basic spoken

and written French. Students will practice conversation on subjects of a daily nature. They will read and write on an elementary level. This course is designed for students who have no previous knowledge of the French language. For beginners only.

FRC 110 Freshman French II (3.0); 3 cr. This is an intermediate-level course in which students will improve their ability to hold conversations in French. They will read and write on an intermediate level; they will write paragraphs; summarizing and paraphrasing will also be practiced. Pre-requisite: placement test.**FRC 222 Sophomore French I (3.0); 3 cr.** Emphasizes writing critical analysis, and argumentation.

FRC 223 Sophomore French II (3.0); 3 cr. Emphasizes fluency in French. Students will present both extemporaneous and prepared speeches.

FRC 231 French for Business (3.0); 3 cr. This course aims to prepare students with a French education to work in a career setting which uses the French language as its language of correspondence and negotiation. Students will practice both oral skills of business presentations and the written skills of report writing, resumé preparation, external and internal business correspondence. An aptitude test is obligatory before the “drop and add period.”

GEM 201 German I (3.0); 3 cr. Practice in basic spoken German.

GEM 202 German II (3.0); 3 cr. Continuation of GEM 201. Emphasis on writing and reading.

ITL 201 Italian I (3.0); 3 cr. Practice in basic spoken Italian.

ITL 202 Italian II (3.0); 3 cr. Continuation of ITL 201. Emphasis on writing and reading

LTN 201 Latin I (3.0); 3 cr. Explanation of the different characteristics of the Latin language.

LTN 202 Latin II (3.0); 3 cr. Continuation of LTN 201. Emphasis on writing and reading.

SPA 101 Introduction to Spanish (3.0); 3 cr. This course introduces Freshman students to the Spanish language and civilization. Students will practice speaking, reading, and writing. Emphasis will be developing the ability to communicate with Spanish-speaker. For Freshman students.

SPA 201 Spanish I (3.0); 3 cr. Practice in basic spoken Spanish.

SPA 202 Spanish II (3.0); 3 cr. Continuation of SPA 201. Emphasis on writing and reading.

Undergraduate Courses: Literature

LIR 101 Introduction to Literature in English (3.0); 3 cr. This introductory course is aimed at providing freshman students with an opportunity to appreciate literature and improve their English communication skills. Students will study significant literary genres, including fiction, poetry, and drama. Material covered will be representative of pre-Modern, Modern and Post-Modern literature originally written in English, and will include Women’s, Children’s, and Minority literature. For Freshman students.

LIR 211 Survey of English Literature I (3.0); 3 cr. Surveys English poetry and prose from the Anglo-Saxon period to the rise of Romanticism.

LIR 212 Survey of English Literature II (3.0); 3 cr. Continuation of LIR 211 from Romantic period to the mid-twentieth century.

LIR 213 Survey of American Literature (3.0); 3 cr. Surveys poetry and prose from the Colonial Period to the mid-19th century.

LIR 214 Introduction to Literary Genres (3.0); 3 cr. Studies the essential features of poetry, fiction, and drama. Selections include representative texts by British, Irish, and American literary figures. *Corequisite:* ENL 213.

LIR 215 Introduction to Literary Criticism (3.0); 3 cr. Presents the basic principles of literary criticism from its beginnings with Plato to the end of the 19th century. *Corequisite:* ENL 213

LIR 216 English Literature to the End of the 19th Century (3.0); 3 cr. Surveys the literary currents and movements of poetry and prose, excluding fiction and drama, from the Anglo-Saxon period to the end of the 19th century. *Corequisite:* ENL 213

LIR 217 American Literature to the End of the 19th Century (3.0); 3 cr. Studies major American authors and movements from the

Colonial period to the end of the 19th century.
Corequisite: ENL 213

LIR 301 Introduction to Fiction (3.0); 3 cr. Studies the formal elements of fiction. Selections will be from British and American writers.

LIR 302 Introduction to Poetry (3.0); 3 cr. Studies the elements of poetry with emphasis on prosody, imagery, and language. Selections from British and American poets.

LIR 303 Introduction to Drama (3.0); 3 cr. Studies drama as literary genre. Readings include representative selections from the Middle Ages to the Modern Period.

LIR 304 Introduction to Shakespeare (3.0); 3 cr. Studies the major works of Shakespeare.

LIR 305 Novel to the End of the 19th Century (3.0); 3 cr. A study of the development of the novel to 1900. Selections will include representative novels by Defoe, Richardson, Austen, Dickens, the Bronte sisters, Eliot, and Hardy.

LIR 306 Drama to the End of the 18th. Century (3.0); 3 cr. A study of the development of drama from its origins to 1800. Selections will include major representative works.

LIR 311 Twentieth Century Literature (3.0); 3 cr. Studies the major themes in contemporary American literature.

LIR 312 Literary Criticism (3.0); 3 cr. A survey of literary disciplines and methods from Plato to the Modern Age.

LIR 313 Orientalism in English Literature (3.0); 3 cr. This course gives a definition of the term "Orientalism" and traces the germination and development of Oriental scholarship in England ever since the medieval period and up to the nineteenth century.

LIR 314 Creative Literary Writing (3.0); 3 cr. Workshop course in the writing of literary pieces, fictional and poetic, emphasizing discussion of student work.

LIR 315 Modern and Contemporary Novel (3.0); 3 cr. Presents the major works of British and American novelists of the 20th century. Contemporary authors are emphasized.

LIR 316 Lebanese Writers (3.0); 3 cr. Studies major Lebanese writers and their impact on both

the East and the West with emphasis on Lebanese immigrant literature.

LIR 323 Orientalism and Post-Colonial Studies (3.0); 3 cr. Defines Orientalism and Post-Colonialism, and traces their germination and development.

LIR 324 Modern and Contemporary Poetry (3.0); 3 cr. Presents the major works of British and American poets of the 20th and 21st centuries. Contemporary authors are emphasized.

LIR 325 Science Fiction (3.0); 3cr. Envisioning the advances of science through the exercise of creative imagination, this course on science fiction traces the evolution of its dominant themes, metaphors, and techniques, and its cultural significance. Material covered includes written text, film, and digital representations.

LIR 411 Shakespeare (3.0); 3 cr. Studies the major dramatic works of Shakespeare and his contemporaries.

LIR 412 Modern and Contemporary Drama (3.0); 3 cr. Presents the major works of British and American playwrights of the 20th and 21st centuries. Contemporary authors are emphasized. *Prerequisites:* LIR 214 and LIR 215.

LIR 413 Restoration and 18th Century Literature (3.0); 3 cr. A study of the poetry and prose, excluding novel and drama, of principal writers from Butler to Johnson

LIR 414 19th Century Literature (3.0); 3 cr. A study of both the Romantic and the Victorian movements and their representative poets from Wordsworth to Arnold.

LIR 415 20th Century Novel and Drama (3.0); 3 cr. Readings and analysis of representative works by principal novelists and playwrights.

LIR 416 20th Century Poetry (3.0); 3 cr. A study of the modern poetic temper as reflected in the works of major British and Irish poets.

LIR 417 Lebanese-American Writers (3.0); 3 cr. A study of the major Lebanese-American writers, known as the Lebanese immigrant writers, and their literary impact.

LIR 418 Comparative Literature (3.0); 3 cr. A study of the concepts of comparative literature

and literary theory and their applications to several literary topics and disciplines.

LIR 421 Modern and Contemporary Critical Theory (3.0); 3 cr. Presents the major developments of modern and contemporary critical theory from its beginnings with Formalism, passing by New Criticism and Structuralism, to the latest developments in Post-Structuralist theory. Latest trends are stressed. *Prerequisites:* LIR 214 and LIR 215.

LIR 422 Urban Studies [“The City as Literary Artefact”] (3.0); 3 cr. Studies the representation of the city as literary artefact based on literary and critical theory paradigms. *Corequisite:* LIR 421

LIR 423 Film and Media Studies (3.0); 3 cr. Presents the juncture between literary theory and the latest developments in film and media studies. *Prerequisites:* LIR 214 and LIR 215

LIR 424 Gender Studies (3.0); 3 cr. Traces themes of gender in literature through the prism of a critical theory that addresses the feminine and masculine.

LIR 425 Women Writers (3.0); 3 cr. Studies the ways female writers have contributed to, challenged, and reshaped the literary tradition. Traces women writers’ choice of themes and genres, the relationship between expectations for

women writers and readers and what women wrote, and the changing social role of the woman author writing for herself and for others across several centuries of cultural change.

LIR 426 World Literature (3.0); 3 cr. This course is a critical study of world masterpieces in translation.

LIR 427 Marketing Literature: The Best-Seller (3.0); 3 cr. Literature as marketed through various institutions such as book prizes, media advertising, reviews, and the role of critical assessment in the formation of canons and counter-canons are explored in connection with the phenomenon of the best-seller. Questions such as how and why best-sellers are produced, and how they influence and shape the existing narrative discourse are raised.

LIR 428 Travel Literature (3.0); 3 cr. This course explores the germination and development of travel writing and its influence on cross-cultural awareness; representations of discourse, landscape, and ethnicity; and movements across cultural landscapes through narratives embodied in novels, explorer journals, travelogues, and others.

LIR 430 Special Topics in Literature (3.0); 3 cr. Explores particular authors, topics, themes in depth. May be repeated for credit with change of topic. *Prerequisites:* LIR 214 and LIR 215.

The Degree of Bachelor of Arts in Translation and Interpretation

The purpose of the B.A. in Translation and Interpretation is to prepare expert translators and interpreters to meet the present and future demands of translation in the fields of law, economics, politics, diplomacy, the humanities, media, and the arts.

The program is designed to refine students' linguistic skills in Arabic, English, and French. In this program, Arabic and English are the principal languages of translation.

Special skills include:

- Developing verbal and written messages,
- Developing proficiency in speech delivery with accurate pronunciation, intonation, tempo and rhythm,
- Acquiring the latest methods of translation, summary, reporting, analysis, and interpreting,
- Integrating knowledge and experience in the use of modern translation and interpreting equipment and technology, and
- Developing intellectual and cultural formation.

Students may choose to emphasize either Translation or Interpretation.

Once admitted to the program students are required to develop competence in the three languages: English, Arabic, and French. Students may be required to take remedial courses in these languages in which a "C" or above is required.

Graduation Requirements

Students majoring in Translation and Interpretation must successfully complete a total of 108 credits with a minimum grade-point average of 2.0/4.0 and a minimum average of 2.0/4.0 in the major requirements including the emphasis area. These credits are divided into:

**Degree Requirements – Translation Emphasis
(108 credits)**

General Education Requirements **33 cr.**

Core Requirements **52 cr.**

ENL 314, ENL 312, TRA 201, TRA 211, TRA 212, TRA 301, TRA 302,
TRA 311, TRA 312, TRA 331, TRA 401, TRA 402, TRA 411, TRA 412,
TRA 421, TRA 422, INT 431, INT 432

Major Translation Requirements **16 cr.**

TRA 403, TRA 431, TRA 432, TRA 433, TRA 434, TRA 480

Free Electives **7 cr.**

**Degree Requirements – Interpretation Emphasis
(108 credits)**

General Education Requirements **33 cr.**

Core Requirements **52 cr.**

Minor in Translation (16 credits)

Students minoring in Translation must successfully complete a total of 16 credits with a minimum average of 2.0/4.0 in the minor courses. Students in this minor would choose between two language options: Arabic/ English or Arabic/French. Students must earn a B or higher in the Arabic and French Assessment Exams and in ENL 213.

Option I: Arabic/English (16 cr.)

TRA 201	Translation Theory and Methodology (3 cr.)
TRA 211	Translation of English Contemporary Texts (3 cr.)
TRA 301	Translation of English Documents (4 cr.)
TRA 331	Mechanical Translation (3 cr.)
TRA 401	Translation of English Business Texts (3 cr.)

Option II: Arabic/French (16 cr.)

TRA 201	Translation Theory and Methodology (3 cr.)
TRA 212	Translation of French Contemporary Texts (3 cr.)
TRA 302	Translation of French Documents (4 cr.)
TRA 331	Mechanical Translation (3 cr.)
TRA 402	Translation of French Business Texts (3 cr.)

Undergraduate Courses: Interpretation

INT 431 Interpreting: English-Arabic I (3.0); 3 cr. Aims to help students develop competence in consecutive interpretation needed at international congresses. *Prerequisite:* TRA 421.

INT 432 Interpreting: French-Arabic I (3.0); 3 cr. Aims to help students develop competence in consecutive interpretation needed at international conferences. *Prerequisite:* TRA 422.

INT 433 Interpreting: French-English I (3.0); 3 cr. Aims to help students develop competence in simultaneous interpretation needed at international conferences. *Prerequisites:* INT 431 or INT 432.

INT 434 Interpreting: English-Arabic II (3.0); 3 cr. Aims to help students develop competence

in simultaneous interpretation needed at international conferences. *Prerequisite:* INT 431.

INT 435 Interpreting: French-Arabic II (3.0); 3 cr. Aims to help students develop competence in simultaneous interpretation needed at international congresses. *Prerequisite:* INT 432.

INT 436 Interpreting: French-English II (3.0); 3 cr. Aims to help students develop competence in simultaneous interpretation needed at international conferences. *Prerequisite:* INT 433.

INT 480 Interpreter Internship; 1 cr. Practical training in a professional setting at conferences using simultaneous interpretation supervised by the instructor. *Prerequisite:* INT 433.

Undergraduate Courses: Translation

TRA 201 Translation Theory and Methodology (3.0); 3 cr. Provides students with a firm foundation of both translation and methodology.

TRA 202 Translation Theory and Methodology II (3.0); 3 cr. Provides students with further understanding of translation methodology. *Prerequisite:* TRA 201.

TRA 211 Translation of English Contemporary Texts (3.0); 3 cr. Familiarizes

students with different genres and contemporary literature English/Arabic. *Corequisites:* TRA 201, ENL 213.

TRA 212 Translation of French Contemporary Texts (3.0); 3 cr. Familiarizes students with different genres and features of contemporary literature. French/Arabic. *Corequisite:* TRA 201.

TRA 301 Translation of English Documents (3.2); 4 cr. Develops competence in translating

official, legal, and judicial English/Arabic texts. *Corequisite:* TRA 212.

TRA 302 Translation of French Documents (3.2); 4 cr. Trains students in translating official, legal, and judicial French/Arabic texts. *Prerequisite:* TRA 212.

TRA 311 Translation of English Legal Documents (3.0); 3 cr. Trains students in interpreting and translating English and Arabic texts which cover diverse areas of law. *Prerequisite:* TRA 301.

TRA 312 Translation of French Legal Documents (3.0); 3 cr. Trains students in interpreting and translating French and Arabic texts which cover diverse areas of law. *Prerequisite:* TRA 302.

TRA 331 Mechanical Translation and Interpretation (3.0); 3 cr. Use of modern equipment in the field of translation and interpretation. *Prerequisites:* TRA 301 or TRA 302.

TRA 332 Mechanical Translation and Interpretation (3.0); 3 cr. Further practice in the use of modern equipment in the field of translation and interpretation. *Prerequisite:* TRA 331.

TRA 401 Translation of English Business Texts (3.0); 3 cr. Aims to train students in interpreting and translating English and Arabic texts which cover diverse areas of business. *Prerequisite:* TRA 301.

TRA 402 Translation of French Business Texts (3.0); 3 cr. Trains students in interpreting and translating French and Arabic texts which cover diverse areas of business. *Prerequisite:* TRA 302.

TRA 403 Translation Practicum (3.0); 3 cr. Offers intensive practice in translating contemporary English into French and vice versa. *Prerequisite:* TRA 402.

TRA 411 Translation of English Films (2.0); 2 cr. Focuses on the translation of the literature and language (English and Arabic) of motion pictures and television. *Prerequisite:* TRA 301.

TRA 412 Translation of French Films (2.0); 2 cr. Focuses on the translation of the literature and language (French and Arabic) of motion pictures and television. *Prerequisite:* TRA 302.

TRA 421 Translation of English Literature (2.0); 2 cr. Offers intensive practice in translating English literary and artistic texts into Arabic. *Prerequisite:* TRA 301.

TRA 422 Translation of French Literature (2.0); 2 cr. Offers intensive practice in translating French literary and artistic texts into Arabic. *Prerequisite:* TRA 302.

TRA 431 Translation of Cultural Texts I (3.0); 3 cr. Focuses on intensive practice in translating Arabic cultural texts (historical, religious, philosophical, etc.) into English. *Corequisite:* TRA 421.

TRA 432 Translation of Cultural Texts II (3.0); 3 cr. Focuses on intensive practice in translating English cultural texts into Arabic. *Corequisite:* TRA 421.

TRA 433 Translation of Cultural Texts III (3.0); 3 cr. Focuses on intensive practice in translating Arabic cultural texts into French. *Corequisite:* TRA 422.

TRA 434 Translation of Cultural Texts IV (3.0) 3 cr. This course focuses on intensive practice in translating French cultural texts into Arabic. *Corequisite:* TRA 422.

TRA 480 Translation Internship (1.0); 1 cr. Practical training in a professional setting supervised by the instructor. *Corequisite:* TRA 422.

The Degree of Master of Arts in English Language and Literature

Literature Emphasis

The M.A. in English Language and Literature, Literature emphasis, is intended to crystallize students' expertise in English studies and to augment their exposure to contextual areas of the discipline. The techniques and fields of research are set to provide students with opportunities either to pursue further graduate studies or engage in research or teaching.

Graduation Requirements

To satisfy the requirements for the Master of Arts in English Language and Literature emphasis, the student must complete 36 credits with an overall average of 3.0/4.0 including submitting and defending a thesis. Over and above these requirements, a candidate must take a three non-credit course in a second European language. Students may be exempted from this requirement if they:

1. Sit for a proficiency test in the second European language and score 500 or above
or
2. Submit proof of proficiency certificate from an acknowledged institute of education.

Major Requirements

ENL 601, LIR 605, LIR 662, LIR 699

15 cr.

Electives

Students may select electives from the following:

LIR 604, LIR 606, LIR 607, LIR 608, LIR 609, LIR 610, LIR 612, LIR 613, LIR 615, LIR 616, LIR 617, LIR 618, LIR 619, LIR 620, LIR 626, LIR 627, LIR 628, LIR 629, LIR 630, LIR 634, LIR 635, LIR 636, LIR 637, LIR 640, LIR 682

21 cr.

Graduate Courses: English Language and Literature Literature Emphasis

LIR 604 Literature and War in the 20th and 21st Centuries (3.0); 3 cr. This course will explore contemporary literature that responds to and depicts war and violence including the World Wars, the Vietnam War, the Lebanese Civil War, the Palestinian/Israeli crisis and the Iraq War among others. The objective of this course is to explore the modalities of war and violence in a range of forms and contexts and the role they play in the construction/reconstruction of subjectivities and narratives. Writers will include Kurt Vonnegut, Virginia Woolf, Tim O'Brien, Ghada Al-Samman, Nuha Al-Radi, René Girard, Elaine Scarry and others.

LIR 605 Critical/Literary Theory (3.0); 3 cr. A major course which lays the ground for advanced interpretative studies and skills, Critical/Literary Theory addresses contemporary critical issues dealing with the ways in which literary texts are read in the context of an increasingly rich and complex multi-cultural and multi-disciplinary world.

LIR 606 Tracing the Imaginary in Literary Studies (3.0); 3 cr. From Plato to Descartes, to Coleridge, and on to Lacan, Deleuze, Castoriadis, and Crapanzano in the twentieth-century, the imaginary has been a productive concept in appreciating the value of literature and art, as well as approaching the theme of the constitution of selfhood. In this course we will trace how the imaginary has been conceptually valued and employed in literary studies and philosophy.

LIR 607 Satire: From Dryden to Byron (3.0); 3 cr. The course studies satire as a dominant form of poetic expression from 1660 until the 1830s. The poetic and prosaic works of Butler, Dryden, Pope, Swift, Johnson, Blake, Shelley, and Byron are studied in relation to the targets of their satire in their respective periods. Special consideration is on the humanistic role of satire and its impact on the course of political, social, and economic events not only in England and Ireland but also on the continent, especially after the expansion of industrialism during the eighteenth century and the advancement of liberalism during the late eighteenth and early nineteenth centuries.

LIR 608 Feminist Literary Criticism (3.0); 3 cr. This course will examine the ways in which developments in feminist criticism reflect trends in mainstream contemporary literature and culture. Topics studied may include Feminism and Colonialism, Feminism and Psychoanalysis, French Feminism, Marxist Feminism, and Eco-Feminism and writers will include Hélène Cixous, Julia Kristeva, Judith Butler, Luce Irigaray, Donna Haraway, Caroline Marchant, and Simone de Beauvoir.

LIR 609 Postmodernism and Beyond: The Rise and Fall of Theory (3.0); 3 cr. Postmodernism has been hailed as one of the most significant transformations in the interpretative history of humanity, and a body of principles and practices, known as "Theory," has stormed academia since the last quarter of the twentieth century. The most notable theoreticians of this peculiar interest have been centered mainly in Europe but also in the United States. Yet, at the beginning of the third millennium, voices have been raised against what is perceived as the hegemony of "theory," and attempts are being made, on the one hand, to break the dictatorship of postmodernist thought and, on the other hand, to delineate the features of the new age. Theorists include J. Hillis Miller, Terry Eagleton, Fredric Jameson, Umberto Eco, and others.

LIR 610 Postcolonial Discontents (3.0); 3 cr. "What is English about English literature?" writes Salman Rushdie, effectively giving voice to a primary theme and preoccupation of postcolonial literary theory. In this course we will read both postcolonial theory and postcolonial literatures, so as to gain some appreciation of these forms of writing and critical inquiry. Novels include Malouf's *An Imaginary Life*, Harris' *Palace of the Peacock*, Rhys' *Wide Sargasso Sea*, Conrad's *Lord Jim*, Morrison's *Beloved*.

LIR 612 Dramatic Literature of the Jacobean and Restoration Periods (3.0); 3 cr. Extensive reading of Jacobean and Restoration drama.

LIR 613 Advanced Shakespearean Studies (3.0); 3 cr. This advanced course deals with the latest trends in Shakespearean studies and criticism, such as playwriting, theater, and performance.

LIR 615 The Irish Dramatic Movement (3.0); 3 cr. Analysis of the rise of Irish drama.

LIR 616 Romantic Narrative Poetry: A Seminar (3.0); 3 cr. The course studies the Romantics' long narrative poetic works. It explores romantic narrative poetry as a reflection of the romantics' concern in the hero as a person of magnitude facing the mystifying and incomprehensible or as a common person living the tragic events of everyday life. The course pays particular attention to long narrative poetry as a replacement for the epic. Texts include: Wordsworth's *The Prelude*, *The Ruined Cottage*, and *Michael*, Coleridge's *Christabel* and *The Rime of the Ancient Mariner*, Byron's *Don Juan* and *Childe Harold's Pilgrimage*, Shelley's *Alastor* and *Epipsychidion*, and Keats's *Endymion*, *Isabella*, and *Hyperion*.

LIR 617 Identity Through Writing: Women Writers of the Arab World (3.0); 3 cr. This course will examine how Arab women have articulated and expressed their subjectivity, responded to cultural, social, political and familial demands and created a literary and feminist aesthetic. Authors include Naomi Shihab Nye, Ahdaf Soueif, Evelyne Accad, Etel Adnan, Margot Badran, Fadia Faqir, and Diana Abu-Jaber.

LIR 618 Representations of the City in 20th-Century American Fiction (3.0); 3 cr. The city has been, since Theodore Dreiser's *Sister Carrie*, one of the important loci of American fiction. As the city landscape developed, the relationship between city-dwellers and their urban practices has evolved and produced a narrative which attempts to fictionalize the experience of living and moving in the city, as well as inscribing the self in the frame of the emerging polis. Authors include Thomas Pynchon, Paul Auster, Don DeLillo, Steven Millhauser, E.L. Doctorow, and others.

LIR 619 Seductive Identifications (3.0); 3 cr. Multicultural or ethnic minority literature has come to be recognized as an important aspect of the cultural landscapes of Australia, Canada, and the United States. In this course we will read both creative and critical literatures in English that define specific sites of multicultural engagement. Readings include Castro's *Birds of Passage*, Haikal's *Seducing Mr Maclean*, Kureishi's *The Buddha of Suburbia*, and the poetry of Antigone Kefala.

LIR 620 Lord Byron and the Orient: A Seminar (3.0); 3 cr. The course is an in-depth study of the Oriental peoples, cultures, traditions, sites, climes, themes, and colorings of Lord Byron's Eastern Tales: *The Bride of Abydos*, *The Giaour*, *The Corsair*, and *Siege of Corinth*. Short selections of other major works like *Lara*, *Childe Harold's Pilgrimage*, and *Don Juan*, which allude to the Orient, will be studied as well. Students will investigate Byron's Oriental scholarship and his authenticity in representing the various elements of the East.

LIR 626 Visual Storytelling(3.0); 3 cr. An unexplored literary genre, the graphic novel provides a unique interplay of words and images whereby the narrative is relayed through words accompanied by illustrative art. The course will examine the link between visuality and narrativity and will focus on meaning, agency, representation, semiotics, and myth. Students will study the evolution of the genre, its structure, language and impact on today's readers. Authors might include the Pulitzer-Prize winner Art Spiegelman, Raymond Briggs, R. Crumb, Marjane Satrapi, Paul Auster, Jean Baudrillard, Walter Benjamin, and Roland Barthes.

LIR 627 Re-Creations of the Industrialized Past and Visions of the Virtual Future: The Influence of Steampunk and Cyberpunk (3.0); 3 cr. The last two decades of the twentieth century have been marked by unprecedented advances in science, and fiction has been quick to incorporate the findings of what is called the "New Technologies" into its narrative representations of the nature of reality, society, and the individual. Recreated memories of an advanced past and visions of a dystopian future, and imagined virtual worlds challenging our notions of what reality is, have been the centerpiece of the two new genres of steampunk and cyberpunk. The works of Bruce Bethke, William Gibson, Bruce Sterling, Pat Cadigan, Neal Stephenson, Jeff Noon, Greg Bear, and others are included.

LIR 628 Reading Masculinity (3.0); 3 cr. This course is concerned with how literature has contributed to symbolic and signifying networks of exchange in which masculinity is constructed, negotiated, parodied and explored as a site of eroticism, romanticism, and violence. We will read Bob Connell's *Masculinities* and other critical works, as well as a selection of novels that lend themselves to a critical approach to the

theme. Readings include Hemmingway, Wilde, Patricia Highsmith's *The Cry of the Owl*, Christos Tsiolkas' *Loaded*.

LIR 629 Ameen Rihani and Kahlil Gibran: A Seminar (3.0); 3 cr. The course studies the English works of the Lebanese-American writers Ameen Rihani and Kahlil Gibran. Emphasis will be on *The Book of Khalid* and *The Prophet* and their enormous influence on building bridges between the East and the West. Those and other works like Rihani's essays and Gibran's prophetic narratives, which have become so well known and studied in the curricula of world universities, will be studied as advancing East-West cross-cultural integration.

LIR 630 Contemporary Voices in Exile (3.0); 3 cr. What is the relationship between exile and literary creativity? Does exile contribute to creative freedom or entrap the writer in nostalgia? Why do some writers choose to write in the language of their adopted country? The condition of exile has produced a distinctive literary voice where the dilemmas of language, identity, politics and diaspora are examined. This course will examine the effects of such dilemmas on writers living and writing in exile. Authors may include Amine Maalouf, Hanif Kureishi, Andrea Levy, Miroslav Jancic, Samuel Beckett, Salman Rushdie, Etel Adnan, Vladimir Nabokov and Chinua Achebe.

LIR 634 The Detective Story: History and Themes (3.0); 3 cr. This course traces the development of the detective story from its creation by Edgar Allan Poe to the present day. Starting with classical novels of detection and moving to "hard-boiled" private eyes and culminating with the "metaphysical" and postmodern detective, key figures like Arthur Conan Doyle, Wilkie Collins, G. K. Chesterton, Agatha Christie, Dorothy L. Sayers, Ellery Queen, Dashiell Hammett, Raymond Chandler, Rex Stout, Georges Simenon, Paul Auster, Patricia Cornwell, and Michael Dibdin are presented along their representative works.

LIR 635 Out-Posting Empire (3.0); 3 cr. The works of Edward Said, Homi Bhabha and

Gayatri Spivak among others, study postcolonial criticism of imperial culture. In this course we will trace the trajectory of their works. Some of the themes covered are: critique of textualism, engagement with the work of Foucault, and intellectual vocation.

LIR 636 Western Images of the East (3.0); 3 cr. This course studies the major Western figures, literary ones, artists, travelers, scientists, explorers, and so on, who projected the image of the East in their literary and scholarly works and in their travelogues and documents. Students study particularly, but not exclusively, Orientalists like Sir William Jones, Simon Ockley, Sir Henry Holland, Lady Mary Wortley Montagu, Sir Richard Burton, Godfrey Higgins, John Lewis Burckhardt, Eugene Delacroix, and others.

LIR 637 From Modernism to Postmodernism: Readings in 20th-Century British and American Fiction (3.0); 3 cr. This course explores the ways in which British and American fiction have developed between the first and second halves of the twentieth century. The passage from modernism to postmodernism has been most obvious in literary discourse and the study of British and American narratives in these two periods will help not only understand this epochal shift in consciousness but will also place these narratives in their social and cultural frame. Authors include Anthony Burgess, John Fowles, Kurt Vonnegut, Norman Mailer, Thomas Pynchon, and others.

LIR 640 Selected Topics and/or Figures (3.0); 3 cr. This course aims at accommodating the students' particular research interests.

LIR 662 World Literature (3.0); 3 cr. A study of major literary works by non-Anglo-Saxon authors.

LIR 682 Seminar in Selected Topics (3.0); 3 cr. An in-depth analysis of selected topics and themes as delineated in literature.

LIR 699 Thesis 6 cr. The research for the master thesis must show the student's proficiency in approved topics in literature.

The Degree of Master of Arts in English Language and Literature

Applied Linguistics and TEFL Emphasis

The M.A. in English Language and Literature, Applied Linguistics and TEFL emphasis is designed to help students develop language teaching competence. Holders of the degree may choose to move on to careers such as lecturers in teacher training colleges, advisors in ministries of education, specialist inspectors, heads of departments, syllabus designers, materials and test writers etc. Others may wish to pursue further graduate studies and make a significant contribution to advanced research work.

Admission Requirements

Preference is given to applicants with additional qualifications and professional experience (teaching). Applicants must provide evidence of a high level of proficiency in English before their application can be considered; a minimum of 600 in the EET (English Entrance Test) is required for admission. For those who take the GRE (Graduate Record Exam), proof of a satisfactory performance is required.

Graduation Requirements

To satisfy the requirements for the M.A. in English Language and Literature, Applied Linguistics and TEFL emphasis, the student must complete a total of 36 credits with an overall average of 3.0/4.0 including submitting and defending a thesis.

Major Requirements

24 cr.

These consist of the following: ENL 601, ENL 602, ENL 612, ENL 613, ENL 623, ENL 631, ENL 699

Electives

12 cr.

Students may select electives from the following: ENL 611, ENL 621, ENL 622, ENL 624, ENL 632, ENL 633, ENL 641, EDU 681, EDU 682, EDU 683, EDU 684

Graduate Courses: English Language and Literature Applied Linguistics and TEFL Emphasis

ENL 601 Bibliography and Methodology of Research (3.0); 3 cr. Studies the materials, tools, and methods of research.

ENL 602 Intro. to Applied Linguistics and Lang. (3.0); 3 cr. Introduces the fundamental concepts of language learning and teaching.

ENL 603 Linguistics (3.0); 3 cr. A study of major trends and methodologies in linguistics.

ENL 611 Analytical English Grammar (3.0); 3 cr. Analyzes the problems of teaching grammar in light of current developments in the field.

ENL 612 Psycholinguistics (3.0); 3 cr. Emphasizes learners' strategies L1 and L2 acquisition and motivation.

ENL 613 Sociolinguistics II (3.0); 3 cr. Studies the links between sociolinguistic theory and L2 acquisition.

ENL 621 Arabic Linguistics and Sociolinguistics (3.0); 3 cr. Emphasizes Arabic phonology, semantics, and syntax as well as language varieties in the Lebanese community.

ENL 622 Contrastive Analysis and Error Analysis (3.0); 3 cr. A classroom-based study of L1 (Arabic) and L2 (English) along with detailed analysis of Lebanese learners' errors.

ENL 623 Language Teaching Methodology (3.0); 3 cr. Relates language-teaching theory to teaching aural/oral reading and writing skills. *Corequisites:* ENL 612, ENL 613.

ENL 624 Discourse Analysis (3.0); 3 cr. Emphasizes text analysis in order to produce relevant teaching material.

ENL 631 Measurement and Evaluation (3.0); 3 cr. Investigates linguistic tests and measurements and emphasizes test evaluation.

ENL 632 Syllabus and Materials Design (3.0); 3 cr. Studies syllabus design; EAP and ESP course designs are stressed. *Corequisite:* ENL 623

ENL 633 Data Processing in L2 Teaching (3.0); 3 cr. Emphasizes the use and design of computer programming for L2 learning.

ENL 641 Field Methodology (3.0); 3 cr. Considers the theory and practice of training teachers of English as a foreign or second language. *Prerequisite:* ENL 623.

ENL 699 Thesis 6 cr. Research for the master's thesis must show the student's proficiency in approved topics in applied linguistics.

The Degree of Master of Arts in Education

The degree of Master of Education is offered to promote educational professionalism and to enhance the University's role in the field of education. The M.A. program concentrates on three areas: Special Education, School Management and Educational Leadership, and Educational Technology. The general educational objective of the program to better serve the community is met by offering necessary specializations and pioneering programs.

Admission Requirements:

Candidates are expected to have completed the degree of Bachelor of Education, Bachelor of Arts in Education, or Bachelor of Arts with a Teaching Diploma from an accredited university. Candidates holding the degree of Bachelor of Arts or Sciences in a related field from an accredited university will be considered on an individual basis, pending the decision of the Department concerning special admission conditions.

Graduation Requirements:

To satisfy the requirements for the degree of Master of Arts in Education, the student must complete a total of 33 credits with an overall average of 3.0/4.0, inclusive of a thesis.

Degree Requirements (33 credits)

Major Requirements 15 cr.

Complete the following required courses:
EDU 610, EDU 611, EDU 622, EDU 699

Electives 9 cr.

Three out of the following courses
EDU 612, EDU 613, EDU 614, EDU 621, EDU 623, EDU 624.

Concentration Areas: 9 cr.

1. Special Education: The Special Education concentration prepares educators to work with students with special needs. The program emphasizes interaction between students, teacher, and school administrations.

- Three from the following courses: EDU 641, EDU 642, EDU 643, EDU 644

2. School Management and Educational Leadership: Educators who wish to pursue a career in school administration will be exposed to best practice in policy making, leadership skills, law and methodology.

- Three from the following courses: EDU 651, EDU 652, EDU 653, EDU 654

3. Educational Technology: Educators interested in applying modern technology to the classroom will benefit from this concentration. Courses focus on practical application of technology to enhance student learning.

- Three from the following courses: EDU 661, EDU 662, EDU 663, EDU 664

The Degree of Master of Arts in Education - School Leaders' Option

The Professional degree of Master of Arts in Education is offered in the field of Educational Leadership to candidates who are presently working in the educational administrative domain as school principals, coordinators, department heads, or other positions of leadership.

Admission Requirements

This program will consider applicants who have a minimum of three years of school administrative experience.

Graduation Requirements

To satisfy the requirements for a Professional Master of Arts in Education, the student must complete a total of 33 credits with an overall average of 3.0/4.0.

Required Courses

EDU 610, EDU 611, EDU 612, EDU 614, EDU 621, EDU 623, EDU 624, EDU 651, EDU 652, EDU 653, EDU 654

Graduate Courses: Education

EDU 610 Educational Research Methods (3.0); 3cr. This course presents key concepts and issues in statistics and their use in educational research, including descriptive and inferential research. Both qualitative and quantitative research methodologies will be explored in relation to improving educational programming. Particular emphasis will be placed on developing skills in applying research to educational decision-making, including conducting needs assessment and analyzing, interpreting, and communicating educational data.

EDU 611 Educational Models and Curriculum Design (3.0); 3cr. This course introduces procedures and plans which incorporate social, political, economic, intellectual, and other values in determining what to include in a curriculum. It also examines the question concerning the nature and history of the “curriculum” concept by looking at both the content and pedagogy of important curriculums employed in the Ancient and Medieval worlds.

EDU 612 Ethics and Politics in Education (3.0); 3cr. This course addresses the inevitable tension that exists in education between the realm of politics and the realm of ethics. It examines concepts of power and communication especially as these relate to pressure groups and advisory bodies. The course seeks to overcome this tension by helping students to understand how it is possible to both ethical and politically astute at the same time. *Corequisite:* EDU 610

EDU 613 Education and a Pluralistic Society (3.0); 3cr. This course addresses current issues that are related to the challenges of education in a pluralistic society. It concentrates upon designing curricula, strategies, and techniques that will best serve to educate students of diverse cultural, social, economic, and religious backgrounds. *Corequisite:* EDU 610

EDU 614 Technology and Education (3.0); 3 cr. This course emphasizes the impact of technology on the total school environment. Students critically analyze the role of technology in instruction and develop strategies for infusing technological resources into the curriculum and the classroom, to improve the teaching-learning process. *Corequisite:* EDU 610

EDU 621 Advanced Educational Psychology (3.0); 3cr. This course presents an in-depth study in advanced psychological theories of learning and the relationship between the theories and instructional strategies. *Corequisite:* EDU 610

EDU 622 Comparative Education (3.0); 3cr. This course analyses educational systems as related to values and cultures; compares the Lebanese educational system to other Arab, European, and American systems.

EDU 623 Advanced Educational Measurement (3.0); 3cr. This course provides an advanced theoretical and practical training in techniques of test construction, evaluation and standardization, validation, reliability, item analysis, norm setting, criterion referencing, selection and interpretation of standardized tests. *Corequisite:* EDU 610

EDU 624 Advanced Methodology (3.0); 3cr. This course presents an in-depth analysis of current methods and techniques of instruction. *Corequisite:* EDU 610

EDU 641 Special Education: Issues and Trends (3.0); 3cr. This course attempts to define both the concept and practice of “special education” by examining its history and evolution in education. It analyzes the contemporary issues and trends in special education and critically examines many of the major “special education” categories.

EDU 642 Special Education: Assessment and Treatment (3.0); 3cr. This course focuses on traditional and contemporary methods of assessment and treatment as related to the standard categories of “special education”.

EDU 643 Motivation in Special Education (3.0); 3 cr. This course examines motivational strategies that help to improve self-image, and that enhance learning and the desire to achieve. Examines motivational strategies regarding self-image, achievement, and the learning process.

EDU 644 The Special Student and The Regular Classroom (3.0); 3cr. This course studies ways of providing foundations for educational partnerships between regular and special educators/students. Examines some of the most recent and innovative methods used to meet the needs of special students.

EDU 651 Leadership for School Improvement (3.0); 3cr. This course defines leadership skills and abilities and develops the dynamics of team functioning, decision-making, problem-solving communicating, and self-improvement.

EDU 652 Instructional Management and its Evaluation (3.0); 3cr. This course studies the management and evaluation of instruction; emphasizes the use of systemic management and evaluation models by teachers.

EDU 653 Administrative Leadership Skills (3.0); 3cr. This course studies the theory of leadership in the different contexts of public and private schools.

EDU 654 School Business Management and Facilities (3.0); 3cr. This course presents guiding principles for developing financial programs. Studies sources of revenue and the management of school funds and facilities.

EDU 661 Technology-Oriented Instructional Materials (3.0); 3 cr. This course examines the production of instructional materials using technology as a tool. It uses basic and advanced techniques, materials and mechanics to accomplish such production.

EDU 662 Issues and Implications of Telecommunications in Education (3.0); 3 cr. This course focuses on creating virtual entities, developing a sense of community using online tools, the developing communication infrastructure. Looks into how new technologies affect pupils in the school, the home, and the future job market. Studies the computer as a communication tool, whether online or offline, and looks into the advantages and disadvantages of utilizing this tool in the modern classroom.

EDU 663 Developing Multimedia Productions (3.0); 3cr. This course presents elements of

instructional design and storyboarding techniques to translate instruction into various types of multimedia presentation. Improves skills, knowledge, and creativity used in video production. Assists students to plan, write, produce, and edit for educational and informational productions. Students discuss the potential, limitations, and techniques for effectively using the television, radio, distance learning, telecommunications, and interactive video.

EDU 664 Information Retrieval Through Technology (3.0); 3cr. This course develops search strategies and uses information retrieval technology to access sources. Focuses on developing media center retrieval systems.

EDU 681 Seminar in Teaching Reading (3.0); 3 cr. Recent trends and research in teaching reading to L2 learners are treated. *Prerequisite:* ENL 623.

EDU 682 Seminar in Teaching Writing and Composition (3.0); 3 cr. Recent trends and research in teaching writing to L2 learners. *Prerequisite:* ENL 623.

EDU 683 Seminar in Teaching Literature (3.0); 3 cr. Recent trends and research in teaching literature to L2 learners. *Prerequisite:* ENL 623.

EDU 684 Seminar in Teaching ESP Courses (3.0); 3 cr. Recent trends and research in teaching English for professional learner purposes to L2 learners. *Prerequisite:* ENL 623

EDU 699 Thesis 6cr. This course researches an issue directly related to the field of concentration with a fieldwork study.

The Degree of Master of Arts in Translation

The M.A. in Translation aims at further equipping the students with increased competence and expertise in the areas of translation and interpretation. It also prepares graduate students for further academic studies at the doctoral level.

The program serves the needs and the career goals of those already working in the field who may want to upgrade their knowledge in these areas.

Admission Requirements

M.A. candidates must pass a written language proficiency test in French and Arabic. A grade of 70 or above is required in both exams. In addition, an interview in English, French, and Arabic is also required. If only a small deficiency in one of the three languages is detected, remedial courses will be required during the first semester. A grade of **B** must be obtained in the remedial courses.

Graduation Requirements

To satisfy the requirements for a Master of Arts in Translation/Interpretation, the student must complete 36 credits with an over-all average of 3.0/4.0.

Degree Requirements (36 credits)

Translation Emphasis

Major Requirements

TRA 610, TRA 620, TRA 621, TRA 622, TRA 630, TRA 631, TRA 632, TRA 633 or TRA 634, TRA 635 or TRA 636, TRA 637, TRA 638 or TRA 639, TRA 690

30 cr.

Electives

Choose 2 from the following: ENL 611, LIR 601, LIR 662, IAF 641, IAF 621, IAF 605, INT 610, or any two 600 level INT Courses.

6 cr.

Interpretation Emphasis

Major Requirements

Complete the following required courses: TRA 610, TRA 620, TRA 621, TRA 622, TRA 630, INT 610, INT 620, INT 621, INT 622

30 cr.

Electives

Choose 2 of the following: ENL 611, LIR 601, LIR 662, or any two 600 level BAD, COA or IAF courses.

6 cr.

Graduate Courses: Translation

INT 610 Consecutive and “A Vue” Translation ARB/ENL/FRC(3.0); 3 cr. An advanced course with emphasis on language use.

INT 620 Conference I ARB/ENL (4.0); 4 cr. An advanced course with emphasis on U.N. agencies, education and development texts.

INT 621 Conference II ARB/FRC (4.0); 4 cr. Terminology and intensive practice in all aspects of medical translation and relevant scientific concepts.

INT 622 Conference III ARB/ENL (4.0); 4 cr. Terminology and intensive practice in science and technology related to Middle East development.

TRA 610 Advanced English Writing (3.0); 3 cr. Fine points of English writing including: clarity, accuracy style, proofreading and revision.

TRA 620 Linguistics for Translation Students (3.0); 3 cr. The nature and structure of language, its role in society, the theory and methods of linguistics: phonology, syntax, semantics and lexicon as applied in translation.

TRA 621 Comparative Stylistics for Translation (3.0); 3 cr. Presentation and analysis of texts related to interlinguistic transfer. Intensive workshop approach treating both English/Arabic and French/Arabic texts.
Prerequisite: TRA 620.

TRA 622 Terminology ARB/ENL (3.0); 3 cr. History of Terminology. The terminologist's task. Terminographics research methods. Use of documentation. Practical work in term research and subject field research.

TRA 630 Computer Assisted Translation (3.0); 3 cr. Computer aids for translation, desktop publishing, terminology management. Machine and machine-assisted translation.

TRA 631 Advanced Translation of Literature ARB/ENL (3.0); 3 cr. Study and analysis of translated works. Translation into Arabic of a work which was not translated before.

TRA 632 Advanced Translation of Literature ARB/FRC (3.0); 3 cr. Study and analysis of translated works. Translation into Arabic of work which was not translated before.

TRA 633 Advanced Legal Translation ARB/ENL (2.0); 2 cr. Translation of highly specialized legal texts.

TRA 634 Advanced Legal Translation ARB/FRC (2.0); 2 cr. Translation of highly specialized legal texts.

TRA 635 Advanced Business & Economic Texts ARB/ENL (2.0); 2 cr. Translation of highly specialized business, economic, and administrative texts.

TRA 636 Advanced Business & Economic Texts ARB/FRC (2.0); 2 cr. Translation of highly specialized business, economic, and administrative texts.

TRA 637 Advanced Medical Translation ARB/FRC/ENL (2.0); 2 cr. Medical terminology and phraseology which would allow the translator to correctly translate medical texts. Relevant basic scientific concepts.

TRA 638 Advanced Translation of Media ARB/ENL (2.0); 2 cr. Translation of various genres of media.

TRA 639 Advanced Translation of Media ARB/FRC (2.0); 2 cr. Translation of various genres of media.

TRA 690 Internship (1.0); 1 cr. A supervised practicum designed to allow students to put their knowledge of translation and terminology to work in an actual translation service.

Doctor of Education (Ed. D.) in collaboration with Saint Louis University, USA

Notre Dame University offers an Ed.D in collaboration with Saint Louis University, USA. The program is made up of 44 credit hours including two obligatory pre-requisite courses. Students go through the 3 year program as a cohort.

Admission Requirements

This program will consider applicants who have an M.A. in Education, or in a related field and who have experience in teaching. Students must submit their files to the NDU Admissions. Office.

Graduation Requirements

To satisfy the requirements for an Ed.D, students must complete 44 credits with a 3.0 G.P.A., sit for written comprehensive exams, an oral examination, and complete and defend a doctoral project.

Major Requirements

EDU 615, EDU 620, EDU 601, EDU 616, EDU 619, EDU 630, EDU 639, EDU 640, EDU 647, EDU 650, EDU 655, EDU 656, EDU 673, EDU 685, EDU 697, EDU 698.

Program of Study

Prerequisites

Fall One

EDU 615	Introduction to inferential Statistics (NDU)	3 cr.
EDU 620	General Research Methods (NDU)	3cr.

Spring One

EDU 630	School Law NDU	2cr.
EDU 619	School/Community Relations (SLU: On-line)	3cr.

Summer One Saint Louis University- Cyprus

EDU 697	Research: Topics in Educational Adm. (SLU Cyprus)	3cr.
EDU 655	School District Administration/Leadership (SLU Cyprus)	3cr.
—	Selection of Project Protocol	
—	Selection of Project Team	
—	Appointment of Advisor and Committee	

Fall Two

EDU 616	Politics of Education (NDU)	3 cr.
EDU 656	Ethics of School Leadership (SLU: On-line)	3 cr.

Spring Two

EDU 698	Project Guidance (SLU: On-line)	1 cr.
---------	---------------------------------	-------

Summer Two Saint Louis University-USA

EDU 640	Human Resources Administration (SLU)	3 cr.
EDU 650	Managing the District Curriculum (SLU)	3 cr.
EDU 601	Doctoral Residency	0 cr.

Fall Three

EDU 685	Internship- Superintendent (NDU)	4 cr.
---------	----------------------------------	-------

Spring Three

EDU 698	Project Guidance (SLU: On-line)	1 cr.
EDU 673	Staff Development and Evaluation (SLU: On-line)	3 cr.
—	Final Draft of Doctoral Project Submitted to Committee	
—	Written Comprehensive Examination	

Summer Three - Saint Louis University USA

EDU 639	Gateway Leadership Conference (SLU)	2 cr.
EDU 647	Planning School Facilities (SLU)	3 cr.
EDU 698	Project Guidance (SLU)	1 cr.
	Oral Examination	

Graduate Doctor of Education Courses (Ed.D)

Pre-requisites Courses:

EDU 615 Introduction to Inferential Statistics (3.0); 3 cr. Survey of basic statistical methods including descriptive statistics, z and t test of means and proportions, chi-square analyses, correlation and regression analyses. Intended as a terminal course for upper division undergraduates and as a background course for graduate level courses in the program. **RMG 410 (SLU)**

EDU 620 General Research Methods (3.0); 3 cr. Prerequisite: REMET 410 or an equivalent introductory inferential statistics course. Survey of the techniques, methods and tools of research in the behavioral sciences and social sciences. General discussion of the research process followed by examination of several different study designs such as observational, experimental, descriptive and sample survey. Overview of different methods of data collection and analysis frequently used in research literature. **RMG 520 (SLU)**

Program Course of Studies:

EDU 601 Doctoral Residency (0.0); 0 cr. Student will research and proceed with data collection under the supervision of the advisor. **EDL 601 (SLU)**

EDU 616 Politics of Education (3.0); 3 cr. An overview of the politics of education with attention to local-state-federal relationships, teacher-administrator-school board relationships, policy development and analysis in schools, rural/suburban/urban school systems and problems, and the place of the school in society. **EDL 614 (SLU)**

EDU 619 School/Community Relations (3.0); 3 cr. A study of the nature, scope, principles and practices of public relations including organization and administration. **EDL 520 (SLU)**

EDU 630 School Law (2.0); 2 cr. Detailed examination of school laws, legal research, analysis of selected cases. **EDL 630 (SLU)**

EDU 639 Seminar: Gateway Leadership Conference (2.0); 2 cr. Designed for advanced degree students who will select a problem in educational administration for intensive study

under the direction of the professor. **EDL 639 (SLU)**

EDU 640 Human Resources Administration (3.0); 3 cr. An introduction to the basic principles and practices of public school human resource administration. Topics will include motivation, leadership, recruitment, selection, induction, orientation, staff development, salary administration, collective bargaining, evaluation and supervision. **EDL 640 (SLU)**

EDU 647 Planning School Facilities (3.0); 3 cr. Problems concerning predictions of enrollment; projection of educational programs; educational specifications of buildings; site location, size acquisition; architectural and construction contracts; lay and professional staff committees, bonding, staffing and equipping buildings. **EDL 647 (SLU)**

EDU 650 Managing the District Curriculum (3.0); 3 cr. Practice in using the processes of curriculum development through examination of existing programs, developing new segments of curriculum, making curriculum guide revisions or structuring the process of revision. **EDL 645 (SLU)**

EDU 655 School District Administration/Leadership (3.0); 3 credits Organization and operation of city and suburban public school systems; school-community relations and school politics; basic principles, concepts issues; federal, state and local relations in education; reality in school administration. **EDL 611 (SLU)**

EDU 656 Ethics of School Leadership (3.0); 3 cr. Course centers on identifying, and analyzing, and developing effective methods of confronting ethical issues in educational leadership. Case studies will be utilized to emphasize the interplay between theory and practice. **EDL 620 (SLU)**

EDU 673 Staff Development and Evaluation (3.0); 3 cr. This course considers the importance and difficulty of motivating educators to seek life long personal improvement as reflective professional practitioners. Strategies of adult motivation and techniques of adult behavioral change are studied. Current systems of staff evaluation are analyzed and specific evaluative techniques and methods are practiced. **EDL 573 (SLU)**

EDU 685 Internship-Superintendent (4.0); 4 cr. Candidates for the doctorate and specialist degrees in school administration are required to intern with a practicing school administrator for one semester. Advance permission required. Work includes all administrative areas encompassed in the responsibility of the school superintendent. **EDL 584 (SLU)**

EDU 697 Research Topics in Educational Administration (3.0); 3 cr. Study of research methods and design applicable to research in Educational Administration. **EDL 697 (SLU)**

EDU 698 Project/Thesis Guidance (1.0); 1 cr. Student will receive one on one guidance from the thesis advisor concerning the outcome of their research. **EDL 696 (SLU)**

DEPARTMENT OF MASS COMMUNICATION

Chairperson: *Dr. Joseph Ajami*

Secretary: *Ms. Alice Eid*

Associate Professors

Ajami, Joseph, Ph.D., 1987, *Mass Communication*, Ohio University, USA

Fakih, Khalid, Ph.D., 1992, *Journalism*, University of Missouri, USA

Assistant Professors

Chidiac, May, Doctorate, 2008, *Information Sciences*, Université Pantheon, Assas, Paris II, France

Darouny, Kamal, M.A., 1986, *Marketing and Advertising*, Sussex College of Technology, UK

Donerian, Vatche, M.A., 1987, *Theater and TV Directing*, Yerevan State Institute of Dramatic and Fine Arts, Armenia

Today we communicate through various means: newspapers, magazines, radio, television, Internet, public relations, advertising, photography, and others.

The Department prepares students for a career in mass communication. It offers specific sequences in print media, electronic media, and advertising and marketing, leading to the degrees of:

Bachelor of Arts in Advertising and Marketing

Bachelor of Arts in Communication Arts – Journalism Emphasis

Bachelor of Arts in Communication Arts – Radio and Television Emphasis

Minor in Advertising and Marketing

Minor in Radio and Television

Master of Arts in Media Studies with emphasis areas in:

Advertising

Electronic Media

Journalism

The Degree of Bachelor of Arts in Advertising and Marketing

The advertising sequence prepares students for careers in account handling, media planning and management, and creative roles in advertising agencies, in-house advertising, and in the media. The program also incorporates principles of marketing, consumer behavior, marketing policy, strategy, and other marketing courses.

Graduation Requirements

Students pursuing this major must complete a total of 102 credit hours with a minimum cumulative GPA of 2.3/4.0 in their major courses. These 102 credits are divided as follows:

Degree Requirements (102 credits)

General Education Requirements	33 cr.
Core Requirements COA 201, COA 223, COA 252, COA 359, COA 362, PDP 201,	18 cr.
Major Requirements ADM 216, ADM 341, ADM 352, ADM 453, ADM 481, ADM 490, FDP 201, FDP 214, COA 270, COA 312, COA 475, MRK 201, MRK 311, MRK 321	38 cr.
Students must choose 6 credits from the following pool: ADM 351, COA 275, COA 311, COA 315, COA 350, COA 352, COA 360, COA 365, COA 368, COA 369, COA 499, JOU 210, JOU 325, JOU 340, JOU 370, JOU 460, MRK 313, STA 206	9 cr.

Minor in Advertising and Marketing (18 credits)

The NDU Minor in Advertising and Marketing is comprised of 18 credits. Any student may elect to do a Minor in this area provided that he/she is in good academic standing that is if he or she has a G.P.A of 2.0/4 and above. A student can only count up to six credits which he/she may have taken from the list of the required courses for this "Minor" prior to electing a "Minor" in Advertising and Marketing.

Courses required:

ADM 216 Principles of Advertising	(3 cr.)
ADM 341 Media Planning and Analysis	(3 cr.)
ADM 352 Creativity and Copywriting	(3 cr.)
FDP 214 Basic Design for Advertising	(3 cr.)

And

MRK 311 Consumer Behavior	(3 cr.)
---------------------------	---------

OR

MRK 321 Promotional Strategy	(3 cr.)
------------------------------	---------

And

ADM 351 E-Commerce	(3 cr.)
--------------------	---------

OR

ADM 453 Global Advertising	(3 cr.)
----------------------------	---------

Undergraduate Courses: Advertising

ADM 216 Principles of Advertising (3.0); 3 cr.

This course introduces the first year advertising student to the field of advertising and its relationship to marketing and mass media. Basic theories of advertising are studied. Elements of successful ads are also analyzed. Local, regional and world advertising agency structures are examined.

ADM 341 Media Planning (3.0) 3 cr. Role of media in achieving marketing and advertising objectives. Examines channels of communication. Students study the process of planning an advertising campaign. A complete campaign including budget, personnel and strategies is required for the course. *Prerequisite:* ADM 216.

ADM 351 E-Commerce (3.0) 3cr. The focus of this course is on today's electronic market environment. Students are to develop proficiencies with interactive business and communication technologies and must have access to an e-mail account. *Prerequisite:* CSC 201 or computer literacy.

ADM 352 Creativity and Copywriting (3.0); 3 cr. The course studies theory and application of

the creative side of advertising. Students practice the various principles through designing and executing print, electron and outdoor advertising. In class peer evaluation and analysis of ads is carried out. *Prerequisite:* ADM 216.;*Corequisite:* FDP 214.

ADM 453 Global Advertising (3.0); 3 cr. This course analyses the history, development and current status of international advertising based on the cultural, economic, political and linguistic characteristics of the countries studied. Students are required to develop an innovative project with an international dimension. Importance of diversity to global advertising is stressed. *Prerequisite:* ADM 341; *Corequisite:* ADM 352.

ADM 481 Internship in Advertising (1.0); 1 cr. Supervised work in the "real" world of advertising and/or marketing. *Corequisite:* ADM 453.

ADM 490 Senior Study in Advertising (3.0); 3 cr. Involves the conceptualization of an advertising campaign for a "real" client. Includes an exit exam. *Prerequisite:* COA 362.

The Degree of Bachelor of Arts in Communication Arts

Journalism Emphasis

This sequence prepares students to become reporters in various print media outlets. Students will also augment their journalistic skills with a variety of public relations courses that will broaden their communication skills and improve their career opportunities in different organizational and professional settings. Students will practice and refine their writing, reporting, and other journalistic skills.

Graduation Requirements

Once admitted to the program, students are required to develop competence in both Arabic and English. They must also complete an internship at one of the media outlets in the Lebanese market. Students pursuing this major must complete a total of 102 credit hours with a minimum cumulative GPA of 2.3 / 4.0 in their major requirements. These 102 credits are divided as follows:

Degree Requirements (102 credits)

General Education Requirements **33 cr.**

Core Requirements **21 cr.**
COA 201, COA 223, COA 252, COA 359, COA 450, PDP 201, ARB 212

Undergraduate Courses: Communication Arts Journalism Emphasis

JOU 210 Mass Media Language (3.0); 3 cr. Principles of effective writing in Arabic with emphasis on grammar, structure, and style. In -class exercises in producing clear, balanced, and vivid basic news stories. *Corequisite:* ARB 212 or ARB 231.

JOU 310 News Writing and Reporting I (3.0); 3 cr. Fundamentals of writing for the mass media. Also reporting techniques and information gathering. Elements of news, leads, and styles of advanced news stories. Emphasis on developing stories and interviewing techniques. *Prerequisites:* JOU 210 and COA 201.

JOU 314 Specialized Translation (3.0); 3 cr. Provides students with skills needed to handle English language copy. *Prerequisites:* TRA 201 and JOU 210.

JOU 325 Photojournalism (3.0); 3 cr. Role of the photographer as a communicator and a member of the editorial team. Photo assignments required. *Prerequisites:* PDP 201 and JOU 210

JOU 340 Public Relations Techniques (3.0); 3 cr. The use of different communication tools in reaching specific audiences. *Prerequisite:* COA 252.

JOU 370 Newspaper Production (2.0); 2 cr. Students must produce a campus publication. *Prerequisite:* JOU 310.

JOU 410 Newswriting and Reporting II (3.0); 3 cr. Practical problems encountered in real situations in covering beats, interviewing techniques and writing headlines. *Prerequisite:* JOU 310.

JOU 450 Specialized Journalism (3.0); 3 cr. Different areas of journalism such as foreign affairs, sports, life-style, environment, and others. In Arabic. *Prerequisite:* JOU 310.

JOU 460 Case Studies in Public Relations (3.0); 3 cr. Evaluation and analysis of PR campaigns in real-life situations. *Prerequisite:* COA 252.

JOU 480 Journalism Internship (1.0); 1 cr. Practical training in a professional print media outlet.

JOU 490 Senior Study (3.0); 3 cr. A major final project in print journalism that studies in-depth an area in the field.

The Degree of Bachelor of Arts in Communication Arts

Radio and Television Emphasis

The Radio and Television program at NDU prepares students for opportunities in electronic media production, programming and "on-air" broadcasting, scriptwriting, directing, and film techniques. In addition to a variety of courses in social sciences, English, and other GER courses, the program stresses the skills that will help prepare Radio and Television students in their careers. Introductory and advanced instruction in audio and video techniques are supported by hands-on experiences in our well-equipped studio.

Graduation Requirements

Students pursuing this major must complete a total of 103 credit hours with a minimum cumulative GPA of 2.3 / 4.0 in their major requirements.

The program culminates in a senior project that incorporates the skills acquired during the years spent at NDU. A "C" grade and above on this project is required for graduation. The 103 credits are divided as follows:

Degree Requirements (103 credits)

General Education Requirements **33 cr.**

Core Requirements **9 cr.**
COA 201, COA 359, COA 362

Major Requirements **37 cr.**
COA 225, COA 226, COA 272, COA 273, COA 275, COA 276, COA 310, COA 311, COA 312, COA 315, COA 325, COA 330, COA 430, COA 480, COA 490.

Students must choose one group of the following concentration areas: **12 cr.**
Scriptwriting and Directing: COA 435, COA 445, COA 455, COA 457
Audio and Sound Production: COA 436, COA 446, COA 456, COA 466
Film and Video Techniques: COA 437, COA 447, COA 455, COA 457
Electronic News: COA 415, COA 425, COA 426, COA 427

Students must choose 12 credits from the following pool: **9 cr.**
ADM 216, COA 203, COA 204, COA 210, COA 213, COA 215, COA 216, COA 223, COA 252, COA 313, COA 320, COA 350, COA 355, COA 360, COA 365, COA 366, COA 367, COA 369, COA 370, COA 413, COA 416, COA 417, COA 475, COA 476, COA 499, CSC 202, CSC 277, CSC 343, FDP 201, FDP 214, JOU 210, JOU 310, JOU 340, JOU 460, MUS 211, MUS 221, MUS 331, MUS 475, PDP 201

Free Electives **3 cr.**

Minor in Radio and Television

The NDU Minor in Radio and Television is comprised of **17 credits**. Any student with a good academic standing that is if he/she has a G.P.A of 2.0/4 and above may enroll in this minor. He or she may only count six credits which he/she may have taken from the list of the R/TV Minor requirements while pursuing another major.

Courses required:

COA 225 Lighting 1	(2 cr.)
COA 270 Studio Workshop	(1 cr.)
COA 275 Editing 1	(2 cr.)
COA 312 TV Production Techniques	(3 cr.)
COA 310 Scriptwriting	(3 cr.)

COA 330 Documentary and Non Theatrical Film (3 cr.)

OR

COA 311 Radio Programming (3 cr.)

And **One** course from the following:

COA 325 Directing and Acting Skills	(3 cr.)
COA 430 Television Drama	(3 cr.)
COA 457 Cinematography	(3 cr.)
COA 475 Computer Graphics and Animation	(3 cr.)

Undergraduate Courses: Communication Arts Radio and Television Emphasis

COA 201 Mass Media Essentials (3.0); 3 cr. This course focuses on the study of various types of mass media. It surveys the cultural industries from multiple perspectives, including historical, economic, regulation, and social effects.

COA 203 Make up and Color (0.2) 1 cr. Introduction to the basic principles of makeup for film and video, and to theatrical makeup application as it relates to camera.

COA 204 Set Design (0.2); 1cr. Basic techniques of set design for the stage and the TV. Emphasis on the use of imagery to support the dramatic intent of a particular production. Class project will engage students in using a variety of mediums to explore how architecture, the arrangement of space, and the elements of design are used dramatically. Also introduces the use of the virtual studio.

COA 205 Archive Organization (1.0); 1 cr. Teaches students the effective use of archive resources in a library setting.

COA 210 Stage Acting (3.0); 3 cr. Teaches acting for the stage, body movement, and basic physical warm-up techniques. Includes exploration of stage space, building characters, and acting situations through improvisation and text work.

COA 213 History of Film (3.0); 3 cr. Overview of history of motion pictures and their artistic, technological, and industrial development. Includes an introduction to major film movements, including their formation, development, aesthetic and thematic qualities, and to leading film artists.

COA 215 History of the Theater (3.0); 3 cr. Study of the history of the western theater from its origin till the 20th century. Major theater movements, schools, and genres, including their formation, development, aesthetic and thematic qualities; includes an introduction to leading theater artists. Also includes an overview of Asian and oriental theater.

COA 216 Sacred Drama: Gods, Muses, and the Storyteller. (3.0); 3 cr. What is the role, if not the duty, of the storyteller, especially when the storyteller is visited by a Muse or supernatural visitor and aided in the artistic adventure? This course answers the question with examples from poetry, theater, film, dance,

and art, with a study of the influence of mythology on the performing arts and on arts in general.

COA 223 Speech Communication (3.0); 3 cr. Trains students in researching, organizing and delivering various types of speeches. *Prerequisites:* COA 201.

COA 225 Lighting I (2.0); 2 cr. Theoretical and practical use of lighting in TV studio productions: drama, talk shows, and news. *Corequisite:* COA 272.

COA 226 Lighting II (1.2); 2 cr. Continuation of COA 225 with emphasis on cool lighting and outdoor lighting for video and film camera. *Prerequisite:* COA 225

COA 252 Public Relations (3.0); 3 cr. History, principles and practices of public relations with emphasis on publicity, public opinion and crisis management.

COA 270 Studio Workshop I (1.0); 1 cr. Functions and operations of radio and TV equipment. Students will spend 80 percent of their time working directly with the equipment and developing solid familiarity with cameras, digital technology, and other useful tools. Essential for subsequent R/TV courses. Intended for ADV/MRK students.

COA 272 Workshop in Audio and Video (2.0); 2 cr. Teaches the students image and sound techniques, function, and operations of radio and TV analog and digital equipment.

COA 273 Workshop in Audio, Video and Film (2.0); 2 cr. Continuation of COA 272. A workshop on sound, camera, and editing equipment, in addition to working with 16mm film and 35mm Camera and the techniques used in shooting and developing films. *Prerequisite:* COA 272.

COA 275 Editing I (2.0); 2 cr. Provides students with the basic skills needed for working on different types of editing systems- Linear and Non-Linear. Topics include basic setup, adjusting and customizing preferences, and various editing and trimming techniques, among others. *Corequisite:* COA 272 only for students majoring in R/TV.

COA 276 Editing II (2.0); 2 cr. Continuation of COA 275. This course provides students with an

overview of off-line and on-line video editing, music editing (an ability to apply music choices in creating soundtrack), editing theory, paper editing, working with editors, and possible post production pathways. It will also introduce students to the potential of digital technologies in the creation of television programs, the production of graphics, digital special effects, and the uses of high-end compositing systems. *Prerequisite:* COA 275.

COA 310 Scriptwriting (3.0); 3 cr. Students will study film terms and formats, work with treatment, scenario and shooting scripts, analyze film and television clips, shorts, tapes, and full-length films with emphasis on understanding the writer's perspective. Numerous writing assignments and exercises will be assigned with the intent of developing a student's ability to write for a visual medium. Students must write a script of a short film or video.

COA 311 Radio Programming (3.0); 3 cr. Audio production concepts and techniques using audio laboratory studio equipment. Practical experience in producing, editing, and other aspects of radio programming emphasized. Students visit local radio stations.

COA 312 TV Production Techniques (3.0); 3 cr. Introduction to multi-camera studio production and location video recording. Explores directing techniques, operation of studio and control room, conceptualization, basic scriptwriting, audio board operations, and lighting in a studio setting. *Prerequisites:* COA 270 and COA 275.

COA 313 Art of the Film (3.0) 3 cr. Stylistic analysis of filmmaking, emphasizing the technical and creative process. Screening of different film genres and studying of cinematography techniques.

COA 315 World Cinema Survey (3.0); 3 cr. Overview of world cinema including American (north and Latin), European, Asian, African, Middle Eastern, and Lebanese cinema. Includes historical review and their influence on global cinema.

COA 320 The Film Director (3.0); 3 cr. An introductory study on the work of the director, from the scriptwriting to the staging process, including pre-production, production, and postproduction. The work with actors, the managerial responsibilities. *Prerequisites:* COA 273 and COA 276; *Corequisite:* COA 310.

COA 325 Directing and Acting Skills (3.0); 3 cr. Teaches acting and directing actors and the director-actor relationship, with focus on different methods and styles of acting, in relationship to the script and the characters. Includes building of a character, creating a role, and performing in front of an audience and in front of a camera. *Corequisite:* COA 310.

COA 330 Documentary and Non-Theatrical Film (3.0); 3 cr. A study of non-theatrical films, such as documentary, news, educational and public relations films, video clips, etc. Involves shooting and editing reports and a video clip. Students will also produce a short documentary by the end of the semester. *Prerequisite:* COA 312

COA 350 Current Issues (3.0); 3 cr. In this course students will be introduced to local, regional, and international events and issues that are affecting the world today. The role and responsibility of the world citizen will be emphasized as the class conducts research on, develops understanding of, and examines the coverage given by the media, solutions proposed by NGOs, local, regional and international institutions. Class discussions and presentations of various political, economic, and social issues constitute a sizable bulk of the course's material. Topics may include: Globalization, Environmental concerns, Energy sources, Nuclear Proliferation, Education, the relationship between developing countries and developed countries.

COA 352 Censorship and Responsibility in Media and Film (3.0); 3 cr. A study of different types of censorship and their relationship to moral codes, religions, politics, laws, and society. Overview of media law in Lebanon.

COA 355 Mass Media in Lebanon and the Middle East (3.0); 3 cr. Communication in Lebanon and the Middle East; cultural, economic, political, and social influences. Role of communication media in affecting social change in different countries. *Prerequisite:* COA 201.

COA 359 Mass Media and Society (3.0); 3 cr. Interactive relationship between media and society. Relationships among the media, the individual, the group, society, and the culture. *Prerequisite:* COA 201

COA 360 Media Ethics (3.0); 3 cr. Analysis of ethical issues pertaining to the media: Dubious methods in news gathering, conflict of interests,

invasion of privacy, and stereotyping among others.

COA 362 Mass Communication Research (3.0); 3 cr. Students will become familiar with research design, data collection analysis, and the various quantitative and qualitative means of measurement of public opinion and hypothesis testing of media-related issues. Students will practice conducting a focus group and interpreting the results. They will write and conduct a questionnaire. A fully formatted, documented research paper incorporating the principles of the course is required. May not be taken concurrently with COA 490.

COA 365 Talk Shows (3.0); 3 cr. Preparing, hosting, and executing a TV program that deals with various issues in front of a live audience. *Corequisite:* COA 312 or by permission.

COA 366 Diction and Presentation (3.0); 3 cr. Arabic and English. In this course students will learn how to speak for different types of programs. They will do exercises on pronunciation in Arabic and English, and they will learn the phonetics of both languages.

COA 367 Foreign Correspondence (3.0); 3 cr. The role of the foreign correspondent in news gathering. The history of foreign correspondence, techniques, roles, and other tips. *Prerequisite:* COA 201.

COA 368 International Communication (3.0); 3 cr. Mass media systems of the world. Flow of information, and role of media in the development of the Third World. *Prerequisite:* COA 201.

COA 369 Selected Topics I (3.0); 3 cr. Rotating topics in audio, video and, film production. Representative topics include music for film and television, digital audio effects, documentary production, lighting for cinematography, and directing for film. Other topics may be recommended by the department. *Prerequisite:* COA 201 or by permission.

COA 370 Selected Topics II (3.0); 3 cr. Individual study topics on audio, video, and film production to be proposed by students or instructors, and approved by the department prior to commencing work. Other non-technical topics may be offered. *Prerequisite:* COA 201 or by permission

COA 413 Film Movements and Genres (3.0); 3 cr. Analysis of major international film

movements such as: German Expressionism, Italian New-Realism, Latin American and, and New Chinese Cinema. Analysis of specific film genres such as: western, comedy, musical, and documentary. **COA 415 Broadcast News Operations (3.0); 3 cr.** Gathering, preparation, and presentation of a generic broadcast news product. Teaches students the process of directing news in all its phases, including equipment operation and crew management (camera operators, anchors, VTR operator, prompter, character generator, etc.). *Prerequisite:* COA 312 or by permission

COA 416 Film Analysis and Aesthetics (3.0); 3 cr. Structure, composition, design, and effect are studied through close frame-by-frame examination of motion pictures. Focuses on a particular director (Godard, Hitchcock, Altman, Losey, Bergman...), period, or style (film noir, suspense...) and studies how meaning is structured and perceived in the screen image. Includes close examination of the ways scholars, critics, and filmmakers have explained and discussed the materials used to make movies and how these materials may be used to construct films and produce meaning. Experiences of the viewer, critic, and community are discussed in addition to the role of aestheticians and theorists.

COA 417 Comparative Cinema (3.0); 3 cr. Compares trends, genres, and directors of various nations. Investigates several genres: the documentary, science-fiction, dramatic, comic, political, and romantic films. Covers early animation and special effects, serials, avant-garde, surrealism, "poetic realism," fantasy, etc.

COA 425 Writing and Reporting for the Electronic Media (3.0); 3 cr. Principles and practices of news-writing and reporting for the electronic media. Includes an overview of the major forms of writing, news styles, news gathering, and news evaluation. *Prerequisite:* Senior Standing.

COA 426 Electronic News Gathering (3.0); 3 cr. Shooting, editing and producing for the electronic news media. Lecture and lab course provides students with experience as producers and directors for news programs. Also includes an overview of ENG equipment as well as EFP (Electronic Field Production) techniques and equipment and digital video production on location. *Prerequisite:* COA 312

COA 427 Media and Information Society (3.0) 3 cr. Introduces the latest technologies in

the news field; online news reporting, web journalism, blogging; electronic publishing, design and techniques of electronic publishing using a journalistic approach. *Corequisite:* COA 426.

COA 430 TV Drama (3.0); 3 cr. This course involves both the theory and the practical elements needed to shoot, direct, and edit a TV dramatic production. Students shoot before a live audience. Final project requires a complete tv drama beginning with the original script to the final tape. *Prerequisite:* COA 310.

COA 435 Writing for TV and Film (3.0); 3 cr. An advanced inquiry into the art of investigating, structuring, and writing original screenplays. Mastery of researching and developing authentic characters, as well as generating solid story plot devices using professional screenplay style. Different film genres and story techniques will also be explored, in addition to the process of literary adaptation and how to adapt a play, novel, or short story into a feature-length film. *Prerequisite:* COA 310.

COA 436 Advanced Radio Production (3.0); 3 cr. Advanced training in the art and technique of audio production in radio. Includes producing radio programs. *Prerequisite:* COA 311.

COA 437 Lighting for Film (3.0); 3 cr. Operations with camera, lighting, and grip equipment as they apply to different film forms (narrative, documentary, experimental), genres, and styles. In-class and outside class group assigned filming exercises. Film screenings and field trips to complement class lectures, demonstrations, and discussions. *Prerequisite:* COA 226.

COA 445 Directing Actors for Camera (3.0); 3 cr. Directing actors through exploration of equipment used in media performance: blue screen acting, ear prompting, teleprompting, and microphone applications in voice performance and voice over. Continued exploration and skill-building of techniques used in performance before the camera including but not limited to advanced character development, make-up techniques, and special problems in character preparation for feature film. *Prerequisite:* COA 325.

COA 446 Theory of Sound (3.0); 3 cr. This course focuses on sound theory, sound as media, and the relationship between sound and image. These topics will be examined through reading

and writing assignments, screenings and listening sessions, in-class presentations, recording assignments. Concepts of different theorists in sound will be introduced to students. Workshops on sound recording and sound editing may be held during the second half of the semester based on the technical requirements of student projects. This class encourages a critical, creative approach to the medium, non-traditional solutions, and awareness of the history of sound technology and media production. *Prerequisite:* COA 311, senior standing.

COA 447 Lighting Design and Techniques (3.0); 3 cr. Lighting design for stage and video design, organization, graphic representation of lighting for stage, video and film production. Laboratory work on actual stage presentations, video productions, and film shoots. Venues include performing arts stages, video studios, and sound stages along with shooting on location. *Prerequisite:* COA 226

COA 455 Directing Techniques and Aesthetics (3.0); 3 cr. An advanced study of the job of a director, beginning with an artistic identity, to the screen craft and how to deal with the directing process through all the production stages. *Prerequisites:* COA 310, COA 312.

COA 456 Sound Design and Postproduction (3.0); 3 cr. A comprehensive technical examination of the role of sound as an emotional motivator and major storytelling component in both fiction and nonfiction films. Covers location and sound recording, track building, mix preparation, music editing and scoring, and the spectrum of postproduction technologies. Introduces current digital innovations in the field and in postproduction, and provides a workshop for solving ongoing editing and track-building problems. *Corequisite:* COA 446.

COA 457 Cinematography (3.0); 3 cr. Cinematographic techniques for film and video. Analysis of cinematographic styles, including qualities of camera movement and composition, lenses, and lighting as expressive tools. Explores aesthetics, techniques, and responsibilities of the cinematographer. Hands-on experience shooting scenes with film and video cameras, lighting, and grip equipment. *Prerequisite:* COA 226.

COA 466 Sound for Animation (3.0); 3 cr. The principles of sound track design to accompany the unique properties of the animated image. Techniques of musical

synchronization and lip-synched character.
Corequisite: COA 475.

COA 475 Computer Graphics and Video Animation (3.0); 3 cr. Applying computer graphics in developing video animation projects. Includes the use of computer animation as applied to a variety of art media. Principles of movement and timing, lighting, cinematography, and multi-plane dimensionality as applicable to computer and traditional drawn animation. Drawn representation of telephoto or wide-angle lens perspective and depth of field. *Prerequisite:* COA 312.

COA 476 Compositing (3.0); 3 cr. Explores basic and intermediate aspects of compositing, animating, and creating special effects and motion graphics with compositing software. The student learns to add effects, enhance the look of existing footage, and create entire animations

from inception. Practical application and use of compositing software in the commercial world.
Corequisite: COA 312 .

COA 480 Internship for Radio, TV, and Film; 1 cr. Supervised off-campus work experience in a job that relates to the student's career objective. *Prerequisite:* Senior Standing.

COA 490 Senior Study; 3 cr. Overview of film production phases and procedures. Senior project presentation. May vary according to concentration choice. *Prerequisite:* senior standing. A "C" grade or above is required.

COA 499 Independent Study (3.0); 3 cr. Advanced topics in mass communication chosen to meet individual student needs and interests, supervised by assigned instructors. *Prerequisite:* senior standing or permission by the head of the department.

The Degree of Master of Arts in Media Studies

The department of Mass Communication offers the Master's of Arts degree in Media Studies with a choice of concentration in the areas of Advertising, Journalism, and Electronic Media.

The program provides students with conceptual and analytical tools and practical experience in order to prepare them to pursue careers in communication, to further academic enhancement at the doctoral level, and to help those already working in those fields upgrade their knowledge in their chosen area of study.

Admission Requirements:

The program admits students holding Bachelor degrees in any of the areas listed above as well as those holding degrees in other majors.

Students from non related majors must take and pass a number of preparatory courses (a maximum of three courses) which the department deems necessary to pursue a Master of Arts in Media Studies.

Candidates should have a GPA of 3.0. Applicants with a GPA between 2.8 and 3.0 may be admitted on a probationary basis. They must achieve a GPA of 3.0 in their first semester in order to continue in the program.

Candidates must also submit three letters of recommendation, an updated C.V., and a personal statement explaining their educational goals and reasons for selecting this area of study. Other university graduate admission requirements may apply as specified in this catalog.

Graduation Requirements:

All students must take a total of 15 credits in the general field of Mass Communication in addition to 15 credit hours in the concentration area. The remaining three credits will be selected from a pool of courses offered by the program or by another program at NDU after securing the approval of the chair.

Students must write a 6-credit thesis to bring the total to 39 hours required for graduation.

Students must maintain an overall GPA of 3.0/4.0 for the 39 credits required to graduate.

Students must repeat any course on which they earned a C⁻ grade or less.

Degree Requirements (39 credits)

Core Courses	15 cr.
COA 610, COA 652, COA 680, COA 681, and JOU 631	
Major Requirements - Advertising	21 cr.
ADM 620, ADM 621, ADM 650, ADM 651, ADM 681.	15 cr.
ADM 690 (Thesis)	6 cr.
Major Requirements – Electronic Media	21 cr.
COA 611, COA 620, COA 630, COA 650, COA 651	15 cr.
COA 690 (Film or Thesis)	6 cr.
Major Requirements - Journalism	21 cr.
JOU 610, JOU 620, JOU 621, JOU 630, JOU 650	15 cr.
JOU 690 (Thesis)	6 cr.
Free Electives	3 cr.

Note: The 6-hour thesis may be replaced with a major TV, video, or film production for those who select Electronic Media as their area of emphasis. Arrangements will be made with student's advisor and the department.

Graduate Courses: Media Studies

ADM 620 Advertising & Marketing Management (3.0); 3 cr. The course examines the general array of agency personnel and studies the functions of each department including the duties and responsibilities of key decision-makers in the agency.

ADM 621 Seminar in Integrated Marketing Communication (3.0); 3 cr. The course applies the theories of integrated communication tools such as marketing, advertising, public relations, e-commerce, and others. It also looks at IMC's usage, management, and limitations.

ADM 650 Advanced Media Planning (3.0); 3 cr. Discussion of up-to-date media planning theories and concepts and their implications in the modern media systems. Studies the effects of horizontal and vertical media planning.

ADM 651 Advanced Creative Strategy in Advertising (3.0); 3 cr. Social science findings as guides for effective creative process by devising advertising message content using various creative approaches. Advanced writing and production of advertising messages for various media. Use of consumer behavior concepts in shaping advertising messages and improving media selection.

ADM 660 Independent Study (3.0); 3 cr. Topic takes into consideration the instructor's specialization and the student's interest. Requires completion of research paper. *Prerequisite:* written proposal and approval of instructor and department.

ADM 681 Seminar in Advertising and Society (3.0); 3 cr. Role of advertising in cultural, economic, and communication contexts. Actual campaigns and their implications in the modern world. Also includes the study of linguistics and semantics in advertising.

ADM 690 Thesis (6.0); 6cr. Specific research on a significant topic selected by the candidate upon consultation with advisor. *Prerequisites:* COA 652 and passing a minimum of 21 credit hours.

COA 610 Theories of Mass Communication (3.0); 3 cr. Studies various theories that explain the origins, developments, uses, abuses and effects of communication messages and explains the relationship between theoretical concepts and their application. Areas of study include media and violence, agenda-setting theory, uses and gratifications approach, etc.

COA 611 Issues in Communication Technology (3.0); 3 cr. Study of new technology and its actual and potential repercussions on media messages, the communication process and on society at large. Issues include restructuring and redefining the mass media and the characteristics of the emerging technologies.

COA 620 Comparative Broadcasting (3.0); 3 cr. A study of global electronic media systems. A comprehensive examination of rules governing the regulations and flow of programming between nations. Also study of the new satellite and transmission systems.

COA 630 Broadcast Station Management (3.0); 3 cr. Study of the problems of management, programming, sales, promotion, and marketing. Exploration of issues such as decision-making, news evaluation, budgeting in both commercial and noncommercial broadcast media.

COA 631 Media and Politics: (3.0); 3 cr. The impact of mass media on the political process especially in democratic societies. The interplay of influence between the two. Role of media consultants is also examined. *Prerequisite:* COA 610.

COA 650 Advanced Video Production (3.0); 3 cr. Examination of aesthetic decisions and skills in the planning and production of television programs: initial research through writing, to final production. Students are expected to develop and execute several programs for television.

COA 651 Advanced Electronic Newsgathering and Reporting (3.0); 3 cr. Real life experiences in gathering, writing, editing, and presenting news for the electronic media. Also, website reporting and various sources of news and information will be examined. *Prerequisite:* COA 650.

COA 652 Advanced Research Methods in Mass Communication (3.0); 3 cr. Techniques for study of communication content and messages, audiences and effects. Emphasis on research methods, and the data gathering, sampling and the application of those methods in Mass Communication and Advertising. *Corequisite:* COA 610.

COA 660 Independent Study (3.0); 3 cr. Topic takes into consideration the instructor's specialization and the student's interest. Requires completion of research paper. *Prerequisite:* written proposal and approval of instructor and department.

COA 680 Seminar in Mass Communication Law and Ethics (3.0); 3 cr. Study of legal and ethical controls of media such as government's regulations of the media and other Lebanese "taboos." Codes of ethics and traditional societal or self-imposed guidelines that govern the performance of the media will be addressed. Incorporated in this course is the Catholic church's stand on the legal and ethical functions of the mass media. *Corequisite:* COA 610.

COA 681 Seminar in Cross-Cultural Communication (3.0); 3 cr. The study of the impact of culture, norms, languages and values on the shaping and the perception of communication messages within and across national and international boundaries. Issues may include verbal and non-verbal communication, and others. *Prerequisite:* COA 610.

COA 682 Seminar on the Lebanese Media (3.0); 3 cr. An in-depth survey of the Lebanese media (both print and broadcast). Areas include history, economics, and trends. The course examines current figures and issues peculiar to the Lebanese media.

COA 690 Thesis (6.0); 6 cr. Specific research on a significant topic in the field selected by the candidate upon consultation with advisor. *Prerequisites:* COA 652 and passing a minimum of 21 credit hours.

JOU 610 Newsroom Management (3.0); 3 cr. Internal management of newspaper operation, status of personnel, and effects of technological

developments. Defining objectivity and improving news coverage.

JOU 620 The Art of Interviewing (3.0); 3 cr. Techniques and tools of gathering information from news sources.

JOU 621 Editorial Operation (3.0); 3 cr. Discussion of decision-making process in the newsroom. Various elements influencing the day-to-day operation of the print media. Roles of owners, and gatekeepers are examined. *Corequisite:* JOU 610.

JOU 630 PR Programs and Campaigns (3.0); 3 cr. Overall planning and operation of PR programs by various industries and institutions. Analysis and discussion of specific problems in real-life cases.

JOU 631 International Public Relations (3.0); 3 cr. Discussion of the role of public relations in the new age of global marketing and communication. Issues include global campaigns, international corporate PR, and cyberspace PR.

JOU 650 Advanced Reporting and Newswriting (3.0); 3 cr. In-depth reporting: theory and practice. Investigative and interpretative reporting. Also examines most recent means of gathering information and data needed to produce thorough, well-written journalistic work. *Corequisite:* JOU 620.

JOU 680 Seminar in Selected Topics (3.0); 3 cr. Discussion of various topics such as freedom of press, media and gender, media and religion, and other topics.

JOU 690 Thesis (6.0); 6 cr. Specific research on a significant topic selected by the candidate upon consultation with the advisor. *Prerequisites:* COA 652 and passing a minimum of 21 credit hours.

DEPARTMENT OF SOCIAL AND BEHAVIORAL SCIENCES

Chairperson: *Dr. Mansour Eid*

Secretary: *Ms. Christine Noufaily*

Professor

Eid, Mansour, Doctorate, 1985, *Arabic Language and Literature*, Université Saint-Joseph, Lebanon

Rihani, Ameen A., Ph.D., 1996, *Bilingual Literature*, Lebanese University, Lebanon

Associate Professors

Alam, Edward, Ph.D., 1996, *Philosophy*, University of Utah, USA

Salameh, Doumit, Ph. D., 1988, *Philosophy*, St. Louis University, USA

Yaacoub, Youssef, Ph.D., 1990, *Philosophy of Education/Minor Counseling Psychology*
Loyola University of Chicago, USA

Assistant Professors

El- Doaihi, Jamil, Ph.D., 1998, *Arabic Literature*, Sydney University, Australia

El Khoury, Akram (Fr.), Ph.D., 2006, *Canon Law*, Pontificia Universitas Lateranensis-Rome, Italy

Fahed, Ziad, Doctorate, 2001, *Théologie Canonique*, Université Catholique de Lyon, France

Karam, Clovis, Doctorate, 1984, *Scholastic Philosophy*, Université Catholique de Lyon, France

¹*Matar, Suhail*, C.A.P.E.S., 1969, *Arabic Language and Literature*, Lebanese University, Lebanon

Visiting Faculty Member

Akl, Said, Poet, and Philosopher

Senior Lecturers

Abou-Jawdeh, Simon, D.E.S., 1992, *Clinical Psychology*, Lebanese University, Lebanon

Wehbe, Boulos (Fr.), M.A., 1981, *Middle Eastern Studies*, American University of Beirut, Lebanon.

The Social and Behavioral Sciences (SBS) Department offers a BA and an MA in Arabic Language and Literature, and a BA in Psychology with three concentrations – Clinical, Educational, and Industrial. In addition to these two majors, the SBS Department offers:

A Minor in Arabic

A Minor in Psychology

And,

- A cluster of undergraduate level courses, otherwise known as General Education Requirement (GER) courses - which are necessary for a comprehensive university education.
- A four week Summer Arabic Program which is intended for foreign students who want to learn Arabic.

The Degree of Bachelor of Arts in Arabic Language and Literature

Advisor: *Eid, Mansour*, Ph.D.

The Bachelor degree in Arabic Language and Literature covers the following areas: syntax, etymology, contemporary and classical literary works, comparative literature, along with emphasis on Lebanese writers' contribution to Arab and world literature. Methods of criticism are also highlighted. A degree in Arabic Language and Literature opens the door to a career in teaching, research, or government administrative positions.

Admission Requirements

In addition to the University admission requirements, candidates must take the Arabic Entrance Test (AET).

Graduation Requirements

Students enrolled in the degree of Bachelor of Arts in Arabic Language and Literature must complete a total of 103 credits with an overall average of at least 2.0/4.0 and a minimum average of 2.3/4.0 in the core and major requirements. These courses are divided into:

Degree Requirements (103 credits)

General Education Requirements	33 cr.
Core Requirements ARB 213, ARB 214, ARB 215, ARB 216, ARB 311, ARB 313, ARB 314, ARB 321, ARB 323, ARB 331, ARB 333	31 cr.
Major Requirements ARB 317, ARB 318, ARB 332, ARB 334, ARB 335, ARB 336, ARB 415, ARB 416, ARB 423, ARB 424, ARB 425	33 cr.
Free Elective	6 cr.

Bachelor of Arts in Arabic Language and Literature
Suggested program (103 credits)

Fall Semester I (14 Credits)

ENL	213	Sophomore Rhetoric (GER)	3 cr.

Minor in Arabic Language and Literature (15 credits)

The minor in Arabic offered by the SBS Department would be of particular benefit to students in the following majors:

Translation and Interpretation
Advertising and Marketing
Journalism
Business
Radio/TV
Political Science and Diplomacy
Engineering

In order to complete a minor in Arabic Language and Literature, the student must take the two courses below:

ARB 212 Applied Arabic Grammar
ARB 231 Technical Arabic

Two from the following pool:

ARB 211 Appreciation of Arabic Literature
ARB 224 Arabic Literature & Human Thought
ARB 317 Themes of Modern Arabic Literature in Lebanon (20th Century)
ARB 333 Modernism in Abbasid Poetry

One of the following courses:

ARB 423 The Evolution of the Critical Movement in Lebanon
ARB 415 The Arabic Modernization Movement

Total number of credits = 15 credits

Undergraduate Courses: Arabic Language and Literature

ARB 101 Arabic Essay Reading and Writing I (3.0); 3 cr. Concentrates on the essay, its development and its various types. For Freshman students.

ARB 102 Arabic Essay Reading and Writing II (3.0); 3 cr. Continuation of ARB 101. *Prerequisite:* ARB 101 or placement. For Freshman students.

ARB 111 Standard Arabic (3.0); 3 cr. Designed to help non-Arabic speaking students study Standard Arabic. For Freshman students.

ARB 201 Introduction to Arabic Syntax (3.0); 3 cr. Addresses the rise of the schools of Arabic syntax; morphological, and syntactic rules are studied in selected texts.

ARB 210 Literary Texts (3.0); 3 cr. A study of literary texts from different ages, with emphasis on the cultural components of the Arabic text and its artistic and aesthetic elements.

ARB 211 Appreciation of Arabic Literature (3.0); 3 cr. Addresses essential characteristics of literature as well as literature themes, schools, and genres. *Prerequisite:* Sophomore Standing.

ARB 212 Advanced Arabic Grammar (3.0); 3 cr. Designed to improve students' command of Arabic grammatical structures and their application in discourse. *Prerequisite:* Sophomore Standing.

ARB 213 Literary Genres (2.0); 2 cr. Offers a study of the aesthetic characteristics of poetry, epic, theater, essay, elocution, and narration.

ARB 214 Arabic Rhetoric and Prosody (3.0); 3 cr. Focuses on the rise of Arabic rhetoric and its development: rhetoric, semantics, metaphor, prosody, and rhyme. Stylistics and writing crafts in all their forms are highlighted. *Prerequisite:* ARB 201.

ARB 215 Literary Schools (2.0); 2 cr. A study of the classic, romantic, realist, symbolic, existentialist, naturalist, and surrealist schools through selected texts. *Prerequisite:* ARB 211

ARB 216 Research Methods (3.0); 3 cr. A study of scientific research methodology and its implementation in contemporary literary studies.

ARB 221 History of Civilizations and Religions (3.0); 3 cr. A comprehensive view of the history of civilizations, the role of religions in the development of thought and action, and its

relation to arts in general, and literature in particular.

ARB 224 Arabic Literature and Human Thought (3.0); 3 cr. This course studies the relationship between philosophical thought of selected Arab and Lebanese writers and the philosophical concepts in Arabic literature from "al Jahiliyah" until the present. Students will analyse and discuss the various philosophical views and theories in the passages studied.

ARB 231 Technical Arabic (3.0); 3 cr. Designed to train students in using proper Arabic linguistic tools pertaining to various technical, scientific, and professional settings. *Prerequisite:* Sophomore Standing.

ARB 301 Introduction to Comparative Literature (3.0); 3 cr. A pragmatic introduction to comparative literature and its various schools and critical approaches through selected works.

ARB 311 Arabic Grammar and Dictionaries (3.0); 3 cr. This is an in-depth study of Arabic morphology and syntax, in conjunction with glossary building.

ARB 312 Arabic Philology (3.0); 3 cr. Consists of a study of the development of Arabic philology and its characteristics. Phonetics, etymology, derivations, post classical arabization and borrowed words, dialectology, and colloquial vs classical modern Arabic. Arabic writing and calligraphy are highlighted.

ARB 313 Linguistics (3.0); 3 cr. A comprehensive approach to concepts of syntax, phraseology, styles, morphology, phonetics and phonology.

ARB 314 Linguistic Phenomenon in Lebanon (3.0); 3 cr. Explores the contribution of the modern Lebanese Arabic language. Trends in linguistic thought, semantics, morphology, and syntax are studied.

ARB 317 Themes of Modern Arabic Literature in Lebanon (20th Century) (3.0); 3 cr. Cultural effects and literary evolution are studied through selected texts.

ARB 318 Lebanese Literature Overseas (4.0); 4 cr. Emigration and its effects on Lebanese literature in content and form are critically addressed. Selections pertaining to writers in the Writer's League and Andalusian Union are studied in depth.

ARB 321 Ancient Western Literature (2.0); 2 cr. Studies the characteristics of ancient Western literature. The effects of Greek and Latin writings on world thought are highlighted.

ARB 323 Western Renaissance Literature (3.0); 3 cr. French, English, Italian, Russian, Spanish, and German literary selections pertaining to the European Renaissance are studied.

ARB 331 Pre-Islamic and Islamic Literature (3.0); 3 cr. This course addresses studies on the Pre-Islamic period of Arabic literature and its characteristics through selected texts as well as the transformation of Arabic literature under the influence of Islam during the period of Rashidian successors and the Umayyads.

ARB 332 The Holy Qur'an and Literature (2.0); 2 cr. This course offers a study of the Qur'anic language and its effect on Arabic literature.

ARB 333 Modernism in Abbasid Poetry (3.0); 3 cr. A study of the evolution of poetry in the Abbasid era through selected texts. The renovation trend and its reflection on literature are also addressed. The Sho'ubian movement, Sufism, and their effect on philosophical thought and translations are highlighted.

ARB 334 Prose in the Abbasid Era (3.0); 3 cr. This course analyzes the development of prose in the Abbasid era through selected texts. The renovation trend and its reflection on literature are also addressed.

ARB 335 Andalusian Literature (3.0); 3 cr. This course consists of a study of the evolution of Andalusian Arabic literature, its tradition, evolution and its large range of subjects in

poetry and prose. The relation between East and West through the Andalusian artistic flora is also highlighted through selected texts.

ARB 336 Literature of Modern Arabic Renaissance (4.0); 4 cr. This course analyzes the effects of Western thought on the Eastern Renaissance and its reflection on Arabic literature. Also, the conflict between tradition and evolution is studied through selected texts.

ARB 415 The Arabic Modernization Movement (3.0); 3 cr. Studies on the development of Arabic poetry in literature and criticism through selected texts.

ARB 416 Pioneers of Arabic Literature (3.0); 3 cr. This course consists of a study of groundbreaking 20th century Arabic literature.

ARB 421 Lebanese Literature in English (3.0); 3 cr. Selected Lebanese writings in English are addressed in this course.

ARB 422 Lebanese Literature in French (3.0); 3 cr. Selected Lebanese writings in French are studied in this course.

ARB 423 The Evolution of the Critical Movement in Lebanon (3.0); 3 cr. A study of the Lebanese contribution to Arabic criticism, trends of criticism in Lebanon in relation to Arabic criticism in the modern age, the role of journalism in literary criticism.

ARB 424 Experimental Lebanese Literature (3.0); 3 cr. The works of prominent Lebanese writers are studied in this course.

ARB 425 Colloquial Literature (3.0); 3 cr. This course focuses on the form and content of the spoken language through selections in fiction and poetry.

The Degree of Master of Arts in Arabic Language and Literature

The Master of Arts in Arabic Language and Literature offers a large selection of courses designed to deepen the level already attained at the undergraduate level. Both ancient and modern prose and poetry are studied in depth.

Admission Requirements

In order to be admitted to the Master program, candidates must fulfill the following:

1. Hold a Bachelor degree in Arabic Language and Literature from a recognized institution of higher learning
2. Comply with NDU rules and regulations for graduate work
3. Sit for the Arabic Entrance Test offered by NDU (AET).
4. Provide three letters of recommendation

Graduation Requirements

Students seeking the degree of Master of Arts in Arabic Language and Literature must meet the University graduation requirements and complete a total of 30 credits with a minimum overall average of 3.0/4.0. Courses are divided into:

Degree Requirements (30 credits)

Major Requirements ARB 601, ARB 611, ARB 612, ARB 613, ARB 614, ARB 621	18 cr.
Free Elective ARB 622, ARB 623, ARB 624, ARB 631, ARB 632, ARB 633, ARB 634, ARB 641	6 cr.
Thesis ARB 699	6 cr.

Graduate Courses: Arabic Language and Literature

ARB 601 Bibliography and Methods of Research (3.0); 3 cr. Materials, tools, and methods of research are studied in this course.

ARB 611 Analytical Study of Abbasid Prose (3.0); 3 cr. Designed to offer a study of Arabic prose in its first stages, from the Islamic Age to the end of the Abbaid Period, focusing on the stages of transformation and modernization.

ARB 612 Analytical Study of Modern Prose (3.0); 3 cr. Starting from the end of World War I, this course focuses on the prose stations of transformation and modernization.

ARB 613 Parallelism in Ancient Arabic Poetry (3.0); 3 cr. Offers a comparative study of Ancient Arabic literature from the Pre-Islamic Age to the Abbasid Age, focusing on the interaction of the different trends of the most important poets and on the elements of imitation and renovation.

ARB 614 Analytical Study of Modern Poetry (3.0); 3 cr. Covers poetry starting from the end of World War I, focusing on the stages of transformation and modernization.

ARB 621 Study of a Contemporary Literary Work (3.0); 3 cr. A modern literary work written by a 20th century poet, author, or novelists, is studied and analyzed on the basis of modern critical trends.

ARB 622 Trends of Ancient Arabic Criticism (3.0); 3 cr. Application of Arabic critical methods to ancient Arabic literature i.e., prose and poetry.

ARB 623 Parallelism between the Koufi and Basra Schools (3.0); 3 cr. A comparative study

of Arabic grammar as presented by the Koufi and Basra schools.

ARB 624 Methods of Teaching Arabic (3.0); 3 cr. Covers the methods of teaching Arabic grammar, poetry, and prose, (text to the rule and vice versa).

ARB 631 Twentieth Century Prose (3.0); 3 cr. The works and characteristics of one prominent writer of the 20th century are studied in depth.

ARB 632 Renaissance Prose Writing (3.0); 3 cr. Studies and analyzes prose works starting from the early Arabic Renaissance until the end of World War I, focusing on the transformation and renovation stages.

ARB 633 Prominent 20th Century Poet (3.0); 3 cr. Offers a study of the work and characteristics of a prominent 20th century poet as well as his/her relation to renovation and modernization.

ARB 634 Transformation in Renaissance Age Poetry (3.0); 3 cr. Consists of analysis and study of poetry starting from the early Renaissance Age until the end of World War I, focusing on the transformation stages.

ARB 641 Arabic Dictionaries (3.0); 3 cr. Introduction to Arabic lexicography. An in-depth study of one dictionary identifying its special characteristics and its relation to other dictionaries.

ARB 699 Thesis (6.0); 6 cr. Preparation of a thesis with the help of an advisor. The themes and conditions of the thesis are defined in accordance with the requirements set for the Master degree.

The Degree of Bachelor of Arts in Psychology

Advisor: *Yaacoub, Youssef*, Ph.D.

The psychology program offered by the SBS Department at NDU provides students with three essential fields of concentration:

Clinical Psychology
Educational Psychology
Industrial Psychology

The psychology program at NDU is specifically developed to promote the ability to deliver service skills within the community. At the BA level, students will not be qualified to function independently as a private psychologist; however, they will be able to cope with work in a community setting.

The program will train a student to be aware of problems that exist and of the possible approaches to resolve them. Using psychological assessment, strategies, and methods of intervention, the student will work within the community, continuously evaluating the ways to create better adjustment within it in relation to psychological, physical, social, political, and religious domains.

Admission Requirements

For a student to be admitted to the program, a grade of “C” or above is required in the following courses: PSL 201, STA 202, ENL 213, ENL 223.

Graduation Requirements

In order to graduate, a student must meet the General Education Requirements, and successfully complete a total of 106 credits with a minimum GPA of 2.0/4.0, and a minimum average of 2.3/4.0 in the major and concentration requirements. Electives may be chosen from other concentration courses within the major of Psychology or from the different majors offered by the University

Minor in Psychology

The minor in Psychology is particularly useful for students who wish to complement their chosen major with psychology courses.

A minor in psychology is merited upon successful completion of **18** credit hours in psychology. The passing grade per course is “**C**”.

Students following a bachelor’s degree in any other major and who already passed Psychology 201 with a C are required to take 15 credits of psychology from the courses listed below.

The program of the minor in psychology consists of six courses taken from three levels of study:

The student should complete the six courses in the list below:

- PSL 201 Introduction to Psychology
- PSL 211 Psychology of the Young Child
- PSL 217 Personality Psychology
- PSL 319 Abnormal Psychology
- PSL 345 Counseling Psychology
- PSL 481 Undergraduate Seminar in Psychology

Undergraduate Courses: Psychology

PSL 101 Principles of Psychology (3.0); 3 cr. Introduces students to the basic concepts of psychology. Topics include learning, memory, motivation, and habits. For Freshman students.

PSL 201 Introduction to Psychology (3.0); 3 cr. Offers a critical survey of general topics, principles, and findings of modern psychology.

PSL 211 Psychology of the Young Child (3.0); 3 cr. Covers the study of the individual from conception through the early school years. Emphasis is placed on the child between 3 and 5 years old.

PSL 213 Psychology of Learning (3.0); 3 cr. Introduces various principles and theories of learning and memory. *Prerequisite:* PSL 201.

PSL 215 Social Psychology (3.0); 3 cr. This course explores the principles of personality theories such as psychoanalytic, analytic psychology, neo-Freudian, behavioral, cognitive and humanistic. Inherited and learned traits are also covered. *Prerequisite:* PSL 201.

PSL 217 Psychology of Personality (3.0); 3 cr. Examines personality theories, methods and applications to social and clinical concerns. Classic theories of personality are discussed including psychoanalytic, behavioral, trait, humanistic, cognitive and social roles are explored and evaluated. *Prerequisite:* PSL 201.

PSL 230 Theories of Psychotherapy (3.0); 3 cr. Places an emphasis on understanding the theories and techniques of psychotherapy. Topics considered: individual, family, and group therapy. *Prerequisite:* PSL 201

PSL 310 Psychology of the Family (3.0); 3 cr. Explores relations between the individual and the family within a community. Focus is placed on diverse family patterns due to social class, race, ethnicity, and gender within a historical and sociopolitical context. By examining epidemiological, cross cultural, and clinical data, a student is introduced to intervention techniques to reduce malfunction and/or abusive situations. *Prerequisite:* PSL 201.

PSL 313 Psychology of Adolescence (3.0); 3 cr. Introduces theories and research on social, cognitive, sexual and identity development in adolescence in order to promote a healthier adult. Implications within the community are focused on. *Prerequisite:* PSL 201.

PSL 315 Sensation and Perception (3.0); 3 cr. Examines basic data and theories concerning the sensory system. The focus is on understanding sensory and perceptual processes as they relate to higher cognitive functions. *Prerequisite:* PSL 201.

PSL 317 Cognitive Psychology (3.0); 3 cr. Addresses the theoretical and experimental foundations for current understanding of how humans acquire and use knowledge. Piaget, Bruner, and Uygotsky theories of cognitive growth are studied. Topics discussed include the development of language, reasoning, problem solving, creativity, and intelligence. *Prerequisite:* PSL 201.

PSL 319 Abnormal Psychology (3.0); 3 cr. Introduces abnormal behavior and resulting disorders. Emphasis is on theories, etiology, classifications and various modalities of treatments. *Prerequisites:* PSL 201, PSL 217.

PSL 320 Psychopathology (3.0); 3 cr. Focuses on psychological and/or organic determinants of behavior disorders. *Prerequisite:* PSL 319.

PSL 321 Experimental Psychology (3.0); 3 cr. Introduces the research process in psychology. Topics include methodology, data collection, descriptive statistics, analysis, and report writing. *Prerequisites:* STA 201, PSL 213 or PSL 317.

PSL 322 Industrial Psychology (3.0); 3 cr. Applies a socio-psychological approach to an individual in a work setting. Topics discussed include management in an organization to promote productivity, change, role definition, and leadership qualities. *Prerequisites:* PSL 201.

PSL 323 Deviance (3.0); 3 cr. Focuses on deviant behavior as a social process. Antecedents, determinants, social relations processes and consequences of deviant acts are emphasized. Topics include juvenile delinquency, homosexuality, homicide, alcoholism, abuse, drugs, suicide, and mental illness. *Prerequisites:* PSL 201.

PSL 324 Educational Psychology (3.0); 3 cr. Introduces basic principles of psychology applied to the field of education. Topics include learning and instruction, motivation, classroom management, and testing and evaluation. *Prerequisite:* PSL 201.

PSL 332 Personnel and Human Factors in the Work Community (3.0); 3 cr. Addresses the human capabilities, needs, and limitations within a system. Concentration on job analysis, satisfaction, testing, training, group dynamics, leadership and social influence, motivation, equipment design. Consumer behavior and its effect on productivity and work quality within the community are examined. *Prerequisite:* PSL 322.

PSL 345 Counseling Psychology (3.0); 3 cr. Prevention of psychological crisis is the focus of the course. Practices of the various schools of psychology are explored such as behaviorism, psychoanalysis, phenomenology, rational emotive therapy, Existentialism and other contemporary theories. *Prerequisites:* PSL 217.

PSL 362 Psychology of Work and Law (3.0); 3 cr. This course provides an introduction to the application of psychological methodology and research on practical and applied problems. Areas concerned include marketing, advertising, management, and law. Psychological human factors serve as background to this course. *Prerequisite:* PSL 201

PSL 382 Practicum I: Clinical (1.3); 3 cr. Provides a student with supervised work experience within his/her concentration. Specific duties during the internship will be determined by the department and the institution supervisor. *Prerequisite:* junior/senior standing.

PSL 385 Practicum I: Educational (1.3); 3 cr. Provides a student with supervised work experience within his/her concentration. Specific duties during the internship will be determined by the department and the institution supervisor. *Prerequisite:* junior/senior standing.

PSL 386 Practicum I: Industrial (1.3); 3 cr. Provides a student with supervised work experience within his/her concentration. Specific duties during the internship will be determined by the department and the institution supervisor. *Prerequisite:* junior/senior standing.

PSL 411 Stress Causes, Consequences and Management (3.0); 3 cr. Gives students an understanding of the meaning of stress, its definition and, explanation, enabling them to recognize factors that may influence the individual or the situation. Possible outcomes - at the behavioral, cognitive and physical level -

are studied to promote adaptive means of coping and stress management. *Prerequisite:* PSL 201.

PSL 413 History and Systems of Psychology (3.0); 3 cr. Surveys the major schools of psychology; introducing the major psychologists and approaches within the field to give students an understanding of how psychology development into a science. *Prerequisite:* PSL 201.

PSL 415 Intelligence Testing (3.0); 3 cr. Allows the student to gain knowledge of the skills needed in administering, scoring and interpreting intelligence tests. Test focus will be on WAIS for adults, WAIS for children, and the Stanford Binet. *Prerequisites:* STA 202, PSL 211, PSL 317.

PSL 417 Personality Assessment (3.0); 3 cr. Allows the students to gain knowledge of the skills needed to use the various instruments in assessing personality. Emphasis is on research and methodological steps in evaluating an individual's personality. *Prerequisites:* STA 202, PSL 217, PSL 319.

PSL 424 Community Psychology (3.0); 3 cr. Concentrates on the interaction between individual and environment. Emphasis is placed on various models of intervention as they relate to both individual and community needs. Topics include poverty, prejudice, diversity, change, personal space, crowding, territoriality, and social stress. *Prerequisites:* PSL 215, PSL 322.

PSL 481 Undergraduate Seminar in Psychology (3.0); 3 cr. This course focuses on selected topics in psychology, varying from year to year depending on student, community and curriculum needs and on availability of professionals in relation to selected topics. Senior Standing.

PSL 484 Practicum II: Clinical (1.3); 3 cr. Provides students with supervised work experience within their concentration. Specific duties during the internship will be determined by the department and the institution supervisor. *Prerequisite:* Junior or Senior standing.

PSL 491 Special Topics in Psychology (3.0); 3 cr. This course is designed to be given to a student either independently or in a group setting. Topic reading and research is supervised by a faculty member. *Prerequisites:* STA 202, PSL 321, senior standing.

Undergraduate Courses: Human Thought

HUT 305 Human Thought to 1500 (3.0); 3 cr. Traces the development of human thought from the initial stage of thinking to the end of the 16th century.

HUT 306 Human Thought from 1500 to the Present (3.0); 3 cr. Introduces the

issues/challenges which man faced and is facing from the Reformation to the present.

HUT 411 Aesthetics (3.0); 3 cr. Acquaints students with the art of detecting, producing, and appreciating beauty in works of art. *Prerequisite:* ENL 213.

Undergraduate Courses: Philosophy

PHL 101 Introduction to Philosophy (3.0); 3 cr. Covers the history of philosophical thought by providing a preview of the major works of prominent philosophers, such as Plato, Aristotle, Augustine, Aquinas, and Descartes, to name a few. For Freshman students.

PHL 111 Introduction to Ethics (3.0); 3 cr. This is a philosophy course that introduces students to ethical (moral) thinking. It also highlights the fact that we are moral agents, i.e. we are endowed with a sense of responsibility, and with a capacity to choose and make decisions. We address things and actions as good or bad, and judge decisions as right or wrong. We also feel obligated to be just and honest. We face life problems we need to examine (euthanasia, genetic engineering, among others) and make a decision. Decisions may be made based on different factors: looking for what is right for me or for anyone? What is beneficial?

Is God a factor in making such decisions? This course aims to improve thinking about the considerations that may count as reasons for and against the moral judgments students are tempted to make. For Freshman students.

PHL 211 Logic and the Scientific Method (3.0); 3 cr. Explores the methods of enquiry practiced by the natural, social, and behavioral sciences.

PHL 311 Ethics and the Modern World (3.0); 3 cr. Offers a general analysis of major schools in ethics, by defining each school's concept of right and wrong, good and bad, and its consequent approach in providing solutions to selected ethical problems. Texts directly related to major schools are treated. *Prerequisite:* ENL 213.

Undergraduate Courses: Religion

REG 101 Introduction to Religion (3.0); 3 cr. This course offers an elementary comprehensive approach to the characteristics of religions that have influenced history: The major concept(s) of what man is; the essential need man has for religion; the meaning, function, and objective(s) of religion; the different approaches to salvation; religion's basic constituents; the different concepts of God in relation to man and to the universe; the different forms of communication between man and God(s)... and finally the ever rising focal importance of religion, and therefore of God, in human life. For Freshman students.

REG 212 Religion and Social Issues (3.0); 3 cr. This course introduces the contributions of the three major monotheistic religions to reach a better understanding of the relationship of the human being to the universe: God, Human Being and Nature. The mainstream beliefs of the three

religions will be examined through an overview of major issues relevant to the religions studied.

REG 213 Catholicism (3.0); 3 cr. This course offers studies on the Catholic doctrine regarding both faith and morals. *Prerequisite:* ENL 105.

REG 313 The Maronites: Faith and Cultural Heritage (3.0); 3 cr. This course is an introduction to the cultural heritage of the Maronite people. It addresses Maronite theology and spirituality in the context of secular, social, and ecclesiastical history from ancient through contemporary times, with a particular emphasis on the question of Maronite identity, while highlighting contributions of the Maronite faith and cultural heritage to the development of the region.

REG 314 Marriage and Family in the Catholic Church (3.0); 3 cr. This course will

examine traditional and contemporary views of marriage and family in the light of Catholic theology and doctrine. An inquiry into the sacramental nature of marriage will shed light upon the Catholic view of the Family as “a little Trinity” and “a domestic Church”. The course will therefore attempt to present the Catholic teaching on marriage and the family based on basic Trinitarian and Ecclesiological Catholic truths. Investigation into the question of the nature of the human being as man and as woman founded on Patristic exegesis of Sacred Scripture

will inform deeply the content of the course. A particular emphasis will be given to the ancient and contemporary Syriac-Marionite contributions to the Catholic view of marriage and the family on both the theological and practical levels.

REG 412 History of Religious Thought in the Middle East (3.0); 3 cr. This course offers studies on the major theological interpretations of the three monotheistic religions as presented by their major thinkers. *Prerequisite:* REG 212.

Undergraduate Courses: Sociology

SOL 101 Essentials of Sociology (3.0); 3 cr. This course introduces students to the basic theories and theoretical perspectives of sociology. Areas included are family and gender roles, work and occupations, race and ethnicity. Students will also study their own community beginning with the student community of their own class. For Freshman Students.

SOL 201 Introduction to Sociology (3.0); 3 cr. Designed to introduce students to the basic principles that govern social relationships and scientific points of view.

SOL 301 Introduction to Anthropology (3.0); 3 cr. Introduces fundamental concepts of anthropology. Discusses the nature of man, culture, and society.

SOL 312 Social Problems (3.0); 3 cr. Covers social problems in contemporary society with special reference to Middle Eastern society. *Prerequisite:* SOL 201.

SOL 313 Family Violence and Child Abuse (3.0); 3 cr. Integrates current knowledge about family violence from the areas of psychology, sociology, social work, and law enforcement.

The Degree of Master of Arts in Psychology- Educational Psychology

Mission Statement:

The M.A. program in Psychology at NDU offered by the Department of Social and Behavioral Sciences in the Faculty of Humanities is designed to offer students with a theoretical and practical understanding of the principles of psychology within the framework of the area of concentration. Consequently, it trains the students to perform psychological services so as to function competently in a variety of applied settings such as to work in community health units, healthcare organizations, hospitals, schools, universities, industries, medical systems, counseling centers, governmental agencies, and military services.

- **Master's degree in Educational Psychology:** A program that focuses on the application of psychology to the study of the behavior of individuals in the roles of teacher and learner, the nature and effects of learning environments, and the psychological effects of methods, resources, organization and non-school experience on the educational process. It includes instruction in learning theory, human growth and development, research methods, and psychological evaluation.
- Students accepted in the program must fulfill the 36 credit-hours required or the 30 credit-hours course work in addition to a 6 credit-hours thesis. The Grade Point Average must not be less than a B or 3.00/4.00. Students, in case of failure in one of the courses, are given one chance to repeat the course work. A second failure will result in the expulsion of the student from the program. Following registration a three years time limit is given to the students to complete his/her degree. Students are not allowed to repeat more than two courses.

Admission Requirements

The minimum requirements for admission to the M.A. program in Educational Psychology are:

1. A Bachelor's degree in psychology or its equivalent from an accredited university; a Bachelor degree in any other major will be evaluated separately.
2. A cumulative undergraduate grade point average of a minimum GPA 2.75, as long as they satisfy the general admission requirements for graduate studies of NDU.
3. A personal statement of background, goals and values.
4. Three professional recommendations from instructors of the student's B.A. program.
5. A personal interview at the discretion of the department.

Transfer

Credits from accredited universities can be transferable according to the following conditions:

- Acceptance by the Admission Office of Notre Dame University (NDU).
- Any course whose grade is below 80, i.e., B is not transferable. This is according to the NDU grading policy and the NDU Bylaws.
- Only nine credit-hours are granted to the new student provided that the transferable course/s is/are transferred from an accredited university and correspond/s to the NDU course requirements.

Educational Outcomes

Upon the completion of the Masters Program in Educational Psychology students must be prepared for:

- A professional understanding of the individuals in the roles of a teacher and a learner.
- The nature and effects of the learning environment.

The effects of psychological methods, resources, organization and the informal and the formal experiences on the educational process

Degree Requirements (36 credits)

Core Courses			9 cr.
PSL 601	Professional Counseling Skills		
PSL 602	Assessment & Psychometric Methods		
PSL 609	Research Methods and Design		
Track Option			6cr.
Research Track:	PSL 699	Thesis	6 cr.
Or			
Applied Track:	PSL 692	Practicum II - Educational	3 cr.
	PSL 695	Practicum III - Educational	3 cr.
Educational Psychology Major Courses			21 cr.
PSL 610	Developmental Psychology		3 cr.
PSL 622	Theory of Learning and Cognitive Processes		3 cr.
PSL 631	Psychoeducational Assessment		3 cr.
PSL 642	Practicum I - Educational		3 cr.
PSL 662	Consultation, Intervention and Prevention		3 cr.
PSL 682	Seminar in Educational Psychology		3 cr.
Elective			3 cr.

Graduate Courses: Psychology

PSL 601 Professional Counseling Skills (3.0); 3cr. The course provides practical experience in developing basic clinical skills, such as effective inquiry, empathic listening, helping responses, and interpretation. Emphasis on matching therapist style with client characteristics; students are trained to work with clients of diverse backgrounds and in different settings.

PSL 602 Assessment & Psychometric Methods (3.0); 3cr. The course reviews the fundamentals of testing and assessment skills in administering and interpreting standardized tests in the areas of personality assessment and intelligence testing. Special emphasis will be on Rorschach, TAT, MMPI, WAIS-III, WISC-III and Kauffman ABC.

PSL 609 Research Method and Designs (3.0); 3cr. With the goal of gaining competence in critical evaluation of published research; this course will provide training in the application of research techniques to problems in psychology and human services. Quantitative and Qualitative research design, conducting, reporting and analyzing assessment and program evaluation.

PSL 610 Developmental Psychology (3.0); 3cr. The course studies the human lifespan development; a foundation for understanding principles and concepts of physical, cognitive, personality, emotional and social development from conception through death. It also introduces developmental disabilities.

PSL 622 Theory of Learning and Cognitive Processes (3.0); 3cr. The course explores theoretical areas of learning and cognition, including cognitive psychology, memory, information processing, attention, problem solving, learning strategies and reinforcing as well as the design of classroom learning situation.

PSL 631 Psychoeducational Assessment (3.0); 3cr. The course focuses on administering, scoring and interpreting standardized instruments and tests to assess cognitive

abilities, learning behaviors, emotional disturbances, social maladaptive and sensory motor functioning of school-age children with emphasis on psychoeducational diagnosis.

PSL 642 Practicum I (3.0); 3cr Educational Psychology (to be approved by the advisor).

PSL 662 Consultation, Intervention and Prevention (3.0); 3cr. The course builds a framework for educational psychologists to address the concepts, processes and issues related to the practice of school-based consultation as an intervention technique of educational psychologists.

PSL 682 Seminar in Educational Psychology (3.0); 3cr. This course is a forum for student to put together knowledge and ideas across the subdisciplines of psychology and an impetus for expansion of thinking. It includes but not limited to: *Socio-developmental*: issues relating to education, topics include; role theory, attitude theory formation and change, transitions from home to school, Elementary/Secondary, High School/University to work. *Instructional Psychology*: it includes designing, implementing and evaluating learning strategies and programs from preschool to high school. *Instructional Decision Making*: focuses on direct and indirect approaches to interact and help students, teachers and families to reduce behavioral and academic problems. Assists students with developmental disabilities. *Contemporary Educational Problems and Motivation. Developing Human Potentials*: techniques that emphasize human relation skills, self-image, values, and stress management.

PSL 692 Practicum II (3.0); 3cr. Educational Psychology (to be approved by the advisor).

PSL 695 Practicum III (3.0); 3cr. Educational Psychology (to be approved by the advisor).

PSL 699 Thesis (6.0); 6cr. to be approved by the advisor.

Summer Arabic Program

sbs@ndu.edu.lb or summerarabic@ndu.edu.lb

Program Objective

Make the Arabic language (colloquial, formal, and written) accessible to students in the most efficient and beneficial way possible.

Program Overview

This program engages students in the culture of contemporary Lebanon, one of the world's most dynamic countries. Participants study at Notre Dame University, Lebanon, where the SAP program is set for teaching formal and colloquial Arabic at the preliminary, preparatory, intermediate, and advanced levels. Intensive personalized classroom instruction is supplemented by review sessions, individual tutorials, and daily practice with Lebanese conversation partners chosen mostly from NDU students and staff. Group excursions in Lebanon give students insight into Lebanese culture, society, and lifestyle, and provide students with opportunities to use their language skills with native speakers.

Program Duration

5 weeks: Classes begin the first week of July.

N.B. Credits acquired in the SAP Sessions are transferable

Admission Requirements:

Anyone who is interested in the program is kindly requested to submit the following documents:

- Application form (downloaded from website www.ndu.edu.lb under Summer Arabic Program – Faculty of Humanities)
- Official transcript of grades (if applicable)
- Arabic language teacher's recommendation (if applicable)
- Writing sample from the most recent Arabic course (if applicable)
- Non-refundable application fee of US\$30 (check order made payable to Notre Dame University, Lebanon)
- Application Deadline is June 15th

Courses: Summer Arabic Program (SAP)

The SAP is made up of 4 levels:

Level I (Preliminary Arabic):

ARB 100 Emphasis A: The Formal Language; 3 cr. Designed to initiate non-Arabic-speaking students to the study of standard Arabic, the course aims at enabling foreign students to use and properly pronounce simple Arabic words and to listen, speak, read and write simple sentences. This course also offers a preliminary approach to Arabic grammar. Beginners need not have any previous knowledge of Arabic.

ARB 104 Emphasis B: The Spoken (Colloquial) Language-The Lebanese Dialect; 3 cr. Emphasis is placed on the elementary means of expression, the basics of pronunciation, and the knowledge of

articulation. The course initiates speech and dialogue through audiovisual aids, periodic stays with families, programmed visits to industrial plants, shops, markets, cafes, and sight-seeing in groups or individually. Developing elementary vocabulary, learning proper pronunciation, getting the feel of the language. No previous knowledge of Arabic is required.

Level II (Preparatory) :

ARB 203 Emphasis A: The Formal Language; 3 cr. This course introduces basic vocabulary and sentence structure in standard Arabic, and focuses on developing basic skills of listening, speaking, reading, and writing simple sentences that are used frequently. Designed to help non-Arabic speaking students study standard Arabic, the course aims at enabling foreign students to use simple Arabic words and

basic phrases, to listen, speak, use and compose sentence structures, and to acquire the basics of Arabic grammar. *Prerequisite:* ARB 100 or equivalent.

ARB 202 Emphasis B: The Spoken (Colloquial) Language-The Lebanese Dialect;

3cr. In this course the emphasis is placed on the basic means of expression and the basics of pronunciation and articulation. It introduces the students to speech and dialogue and to the description of facts and recounting of events through audiovisual aids, periodic stays with families, programmed visits to industrial plants, shops, markets, cafes, and sight-seeing in groups or individually, etc. Developing a basic vocabulary, learning proper pronunciation, getting the feel of the language. *Prerequisite:* ARB 104 or equivalent.

Level III (Intermediate):

ARB 205 Emphasis A: The Formal Language; 3 cr.

This course is designed to improve student's writing and reading skills through the following approaches: in-depth applied study of grammar and parsing (قواعد النحو) و الاعراب; familiarity with figures speech and of style; development of advanced skills in pronunciation. The course aims at improving the student's linguistic competence in preparation for further Arabic studies. *Prerequisite:* ARB 203 or equivalent.

ARB 204 Emphasis B: The Spoken (Colloquial) Language-The Lebanese Dialect;

3 cr. This course develops basic language skills used in day-to-day conversation. Exercises focus on structured practice in vocabulary, listening, and articulating. The content themes include: shopping, answering or making telephone calls,

visiting a doctor, looking for a job, giving a present, attending wedding ceremonies, enjoying local cuisine, taking holidays, etc... Provides students with a rich package of selected vocabulary suitable for different occasions, helps students to adapt to social settings appropriate for different occasions. *Prerequisite:* ARB 202 or equivalent.

Level IV (Advanced Arabic):

ARB 225 Emphasis A: The Formal Language

3 cr. This course focuses on further language skills in simple modern written styles through reading and writing together with improving fluency in oral communication. It includes the study of Arabic prose and poetry texts. Oral presentations and written reports are required. The aim of this course is to improve students' ability to read, write, and understand correct, simple and practical modern Arabic. *Prerequisite:* The successful completion of Preparatory and Intermediate Arabic or their equivalents.

ARB 226 Emphasis B: The Spoken (Colloquial) Language-The Lebanese Dialect;

3 cr. In this course the student will practice holding conversations on common daily concerns. The content themes include: shopping, answering or making telephone calls, visiting a doctor, looking for a job, giving a present, learning adequate behavior at social occasions (etiquette for weddings, birthday parties, regular daily visits, enjoying local cuisine, taking holidays, etc.) The aim of this course is to give students the opportunity to develop their communication skills in the spoken language in order to achieve spontaneity in speech and a smooth social integration.

HISTORICAL OVERVIEW

Although the FNAS was established since the official inception of NDU in the academic year 1987-1988, it was only in 1991-1992 that our Faculty started legally, with licensed diplomas, by offering two majors: a **BS in Computer Science** and a **BS in Mathematics** (Date of the legal licensing for both: 16/5/1991)¹. Each major was affiliated to a separate department, the *Department of Computer Science (DCS)* and the Department of Mathematics, respectively, but there was a chairperson only for the first. The next step was taken in 1993, with the licensing of two additional majors: a **BS in Actuarial Science** (03/06/1993), and a **BS in biology** (25/11/1993). Accordingly, there was a department of actuarial sciences as of 1993-1994, and a *Department of Sciences (DS)* as of 1995-1996, maybe a year earlier, but with no chairpersons for both. The department of mathematics and the department of actuarial sciences subsequently merged into the *Department of Mathematics and Statistics (DMS)* as of 1995-1996. From this time on, the FNAS departmental trilogy kept its nomenclature up to the present². The DMS and the DS officially acquired their first chairpersons in 1994-1995 and 1997-1998, respectively.

An important step was taken in 1994 with the introduction of the first Masters program in the FNAS: the **MS in Computer Science** (DCS; 14/01/1994). The next move had to wait for three more years, with the introduction of a **BS in Environmental Science** (DS; 23/01/1997). Around the Fall semester of the academic year 2000-2001, five new majors were obtained in a row: a **BS in Physics** (DS; 24/01/2000), and four majors licensed on the same date (24/03/2000): a **BS in Applied Statistics** (DMS), a **BS in Geographic Information Systems** (DCS), a **BS in Business Computing** (DCS), and a **BS in Medical Lab Technology** (DS). In 2001, the second Masters program in the FNAS was licensed: it was the **MS in Mathematics** (DMS; 30/11/2001).

More recently, the DS was enriched with two new majors: a **BS in Nutrition & Dietetics** (01/10/2004), and a **BS in Chemistry** (15/04/2005).

Although the DS does not offer any Masters program yet, its Department supervises a *Freshman Sciences Program* since 1997. This program is meant for those students who have lived outside the country, had at least two years of secondary education abroad, and are one year short of having a certificate equivalent to the Lebanese Baccalaureate, which is the necessary condition for admitting a student into a University major program. A successful completion of the Freshman Sciences program would be recognized by the Lebanese Ministry of Education as equivalent to the Lebanese Baccalaureate.

Finally, and as a result of the launching of the Faculty of Nursing and Health Sciences at NDU on October 1st, 2008 (officially licensed on 05/09/2008), both the BS in Nutrition & Dietetics and the BS in Medical Lab Technology were transferred to the new Faculty as of its starting date.

¹ In the sequel, the official licensing dates will be given between brackets.

² When necessary, both the acronym of the corresponding department and the official licensing date for each major will be given between brackets.

The following tables summarize, per department, the chronology of the degrees offered (or previously offered) by the FNAS:

Programs	Department	Licensing Dates
B.S. Mathematics	Mathematics and Statistics	16/05/1991
B.S. Actuarial Science	Mathematics and Statistics	03/06/1993
B.S. Applied Statistics	Mathematics and Statistics	24/03/2000
M.S. Mathematics	Mathematics and Statistics	30/11/2001

Programs	Department	Licensing Dates
B.S. Computer Science	Computer Science	16/05/1991
M.S. Computer Science	Computer Science	14/01/1994
B.S. Geographic Information Systems	Computer Science	24/03/2000
B.S. Business Computing	Computer Science	24/03/2000

Programs	Department	Licensing Dates
B.S. Biology	Sciences	25/11/1993
B.S. Environmental Science	Sciences	23/01/1997
B.S. Physics	Sciences	24/01/2000
B.S. Medical Lab Technology	Sciences (until October 1, 2008)	24/03/2000
B.S. Nutrition & Dietetics	Sciences (until October 1, 2008)	01/10/2004
B.S. Chemistry	Sciences	15/04/2005
Freshman Sciences Program	Sciences	1997

The following tables list the names and mandates of the Faculty deans and the department chairpersons since the licensing of the first FNAS programs of study in 1991-1992:

FNAS Dean	Mandate
Dr. Michel Kraïdy	01/10/91 – 09/30/1993
Dr. George Eid	01/10/93 – 09/30/2000
Dr. Youssef Kamal El-Hage	01/10/2000 – 08/02/2001
Dr. Jean Fares	09/02/2001 – 30/09/2006
Dr. Youssef Kamal El-Hage	01/10/2006 – 30/09/2009

Chairperson-DCS	Mandate
Mr. Pierre Khorassandjian	01/10/1991 – 30/09/1995
Dr. George Maani (acting)	01/10/1995 – 30/09/1996
Dr. Jean Fares	01/10/1996 – 30/09/1997
Dr. Fouad Chedid	01/10/1997 – 30/09/2001
Dr. Hoda Maalouf	01/10/2001 – 28/02/2006
Dr. Hikmat Farhat	01/03/2006 – 30/09/2008
Dr. Fouad Chedid	01/10/2008 –

Chairperson-DMS	Mandate
Dr. Jean Fares	01/10/1994 – 08/02/2001
Dr. Amer Jajou	09/02/2001 – 30/09/2006
Dr. Elias Saleeby	01/10/2006 – 30/09/2008
Dr. Ramez Maalouf	01/10/2008 –

Chairperson-DS	Mandate
Dr. Layla Khalaf	01/10/1997 – 30/09/2001
Dr. Doris Jaalouk	01/10/2001 – 30/09/2004
Dr. Tanos G. Hage	01/10/2004 – 30/09/2007
Dr. Antoine Farhat	01/10/2007 – 30/09/2008
Dr. Tanos G. Hage	01/10/2008 –

MISSION, VISION AND VALUES

Mission

Consonant with the mission statement of Notre Dame University-Louaize (NDU), the Faculty of Natural and Applied Sciences (FNAS) addresses itself to meeting the academic needs of students majoring in the scientific disciplines as well as the requirements of every other NDU student for scientific literacy. The FNAS is committed to provide excellent teaching with a strong emphasis on laboratory work and student research that wed theory and practice, to promote sustained intellectual vitality in computer science, mathematics and the natural sciences, to develop and disseminate scientific knowledge through research and outreach activities, and to guide students towards acquiring leadership and management roles in the professions. To meet these objectives, the FNAS acknowledges its responsibility in embodying an academic environment that is respectful, innovative, adaptive, and accountable.

Vision

The Faculty of Natural and Applied Sciences will be a reputable locus of educational and intellectual excellence in the exact sciences, fostering creative learning systems, building a solid research tradition, sustaining an environment that supports the education of the whole person, and promoting a culture of joyful quest of the ultimate truth (*Gaudium de Veritate*) about man and nature.

Values

The Faculty of Natural and Applied Sciences shares the following values that reflect its culture and priorities and are inspired by the core values to which the whole NDU community is dedicated:

- **Academic Excellence:** Whether in education or in research, we seek academic excellence as a landmark of our curricula, believing in a fruitful connection between good research and creative classroom instruction.
- **Lifelong Learning:** We are committed to inculcate lifelong learning and the concept of continuous self-development.
- **Intellectual Freedom:** We respect the right of all to pursue knowledge freely, scholarly, ethically, and critically.
- **Integrity:** We believe in equity and honesty and aspire to incorporate these values in every aspect of our personal and academic lives.
- **Dialogue:** We encourage constant dialogue between officers, faculty and students, and are under obligation to listen to the concerns and critiques of our students.
- **Accountability:** We accept the responsibility of being accountable for our actions, and are dedicated to a transparent and efficient use of resources.

- Service: We value the virtue of service as a golden path towards becoming true leaders and as the fullest expression of our humanity.
- Diversity: We value the diversity of religious, ethnic and cultural backgrounds among our students, our faculty and our staff within the vision and framework set by the apostolic constitution “Ex Corde Ecclesiae” on Catholic universities (August 15, 1990).
- Faith: We believe that faith in God, who manifested His love to the entire human family in Jesus Christ, shapes our profound commitment to serve the University and the community.

FACULTY PROFILE

The FNAS provides students at the undergraduate and graduate levels with a modern and comprehensive education in all fields of natural and applied sciences. This education develops both their theoretical knowledge and technical competence within the comprehensive objective of helping them build a rich cultural identity, sound citizenship, irreproachable morality and firm faith, in conformity with the University mission. Our full-time faculty members are predominantly Ph.D. holders who are engaged in research, teaching, curriculum development and academic administration. Curricula are constantly adjusted to meet acknowledged academic standards and to go along with new advances in didactics and research. The FNAS subscribes to a sizable number of scholarly journals to keep up with new scientific, technological, pedagogical and cultural developments. The science laboratories and the computer center are endowed with modern equipment that is regularly upgraded.

Departments

The FNAS consists of the following departments:

- Department of Computer Science.
- Department of Mathematics and Statistics.
- Department of Sciences.

The Undergraduate Program

Each undergraduate program offered at the FNAS is composed of three components:

- General Education Requirements (GER)
- Core and Major Requirements.
- Free Elective Requirements.

Undergraduate Degrees

The **Department of Computer Science** offers undergraduate programs leading to the degrees of:

- BS in Business Computing (91 credits).
- BS in Computer Science (104 credits).
- BS in Computer Science (concentration: ¹CIS) (102 credits).
- BS in Computer Science (concentration: ²CGA) (108 credits).
- BS in Geographic Information Systems (90 credits).

The **Department of Mathematics and Statistics** offers undergraduate programs leading to the degrees of:

- BS in Actuarial Science and Insurance (112 credits).
- BS in Applied Statistics (90 credits).

¹ Computer Information Systems

² Computer Graphics & Animation.

- BS in Mathematics (three concentrations: Pure Mathematics, Computational Maths, or Mathematics Education) (103 credits).

The **Department of Sciences** offers undergraduate programs leading to the degrees of:

- BS in Biology (102 credits).
- BS in Chemistry (98 credits).
- BS in Environmental Science (104 credits).
- BS in Physics (95 credits).

The Department of Sciences also offers a **Freshman Science** program. This program leads to a certificate that is equivalent to the official Lebanese Baccalaureate Part II (Scientific Strands).

Graduate Programs And Degrees

The FN&AS offers graduate programs in computer science and mathematics that lead to the degrees of

- Master of Science (MS) in Computer Science.
- MS in Computer Information Systems.
- MS in Mathematics (two tracks: Pure Mathematics or Applied Mathematics).

This graduate program has two options: a “*course-work*” option and a “*thesis*” option.

Minors

As of the current academic year, the FN&AS is launching five minors in

- Mathematics
- Mathematical Insurance
- Applied Statistics
- Geographic Information Science
- Physics

The first three minors are offered by the Department of Mathematics and Statistics, the fourth by the Department of Computer Science, and the last by the Department of Sciences.

In Short: All FNAS Programs Of Study

The following table encapsulates, in alphabetical order, all programs of study offered by the FNAS along with the corresponding total number of credits required:

Programs of study	Degrees & Certificates	Credits
Actuarial Science and Insurance	BS	112
Applied Statistics	BS	90
Applied Statistics	Minor	18
Biology	BS	102
Business Computing	BS	91
Chemistry	BS	98
Computer Science	BS	104
	MS	30
Computer Science (CIS)	BS	102
	MS	30
Computer Science (CGA)	BS	108
Environmental Science	BS	104
Freshman Science	Certificate	Min. of 30
Geographic Information Systems	BS	90
Geographic Information Systems	Minor	15

Mathematical Insurance	Minor	18
Mathematics	BS	103
	MS	33
Mathematics	Minor	15
Physics	BS	95
Physics	Minor	16

DEPARTMENT OF COMPUTER SCIENCE

Chairperson: *Dr. Fouad Chedid*

Secretary: *Mrs. Eliana Yazbeck-Kosseify*

Professor

Chedid, Fouad, Ph.D., 1990, *Parallel and Distributed Computing, Algorithms Theoretical Computer Science*, Illinois Institute of Technology, USA

Associate Professor

Khair, Marie, Doctorate, 1996, *Databases, Computer Security, Medical Informatics*, Aristotle University of Thessaloniki, Greece

Assistant Professors

Challita, Khalil, Ph.D., 2005, *Complexity Theory, Qualitative Spatial Reasoning, Temporal Logic*, Paul Sabatier University, France

El-Khalidi, Khaldoun, Doctorate, 1996, *Image Processing, OOP.*, Université de Franche-Comté, Besançon, France

Farhat, Hikmat, Ph.D., 1998, *Computer Networks, Information Security*, Mc-Gill University, Canada

Maalouf, Hoda, Ph.D., 1998, *Digital Communications, Computer Networks, Computer Architecture*, Imperial College, University of London, England

Senior Lecturer

Hawi, Nazir, M.S., 1991, *Business Management*, Lebanese American University, Lebanon

Lecturer

Sawma, Victor, M.S. 2003, *Computer Science*, University of Ottawa, Canada

Programs of Study

The Department of Computer Science offers both undergraduate and graduate programs leading to the degrees of:

- BS in Business Computing (91 Credits).
- BS in Computer Science (104 Credits).
- BS in Computer Science – (CIS) (102 Credits).
- BS in Computer Science – (CGA) (108 Credits).
- BS in Geographic Information Systems (90 Credits).
- MS in Computer Science (30 Credits).
- MS in Computer Science – (CIS) (30 Credits).

The department also offers the following minor for the first time:

- Minor in Geographic Information Systems (15 Credits).

Our Undergraduate Program

Our undergraduate program is designed to prepare students for graduate studies in computer science, computer information systems (CIS), computer graphics & animation (CGA), business computing, geographic information systems, or for a professional career in computer-based environments.

The Degree of Bachelor of Science in Computer Science

Students enrolled in the Computer Science program will acquire enough technical and theoretical background to become inventors of technology rather than skilled user of technologies invented by others. The breadth of the program allows our graduates to design and implement non-trivial software, be leaders in complicated software projects, and come up with innovative ways to use computers systems.

Admission Requirements

For admission requirements to the degree of BS in Computer Science, refer to the section entitled "Undergraduate Admission" of this catalog.

Graduation Requirements

To receive the degree of BS in computer science, a student must fulfill all requirements of the degree program, complete all required courses, accumulate a total of 104 credits with an overall grade point average (GPA) of at least 2.0/4.0 and a minimum GPA of 2.0/4.0 in both the core and major requirements, and clear all accounts with the university. Candidates for degrees are reminded that grades of "I" assigned during the last semester to courses required for graduation will result in delaying their graduation.

Degree Requirements (104 credits)

General Education Requirements

33 cr.

A - Communication Skills in English and Arabic

9 cr.

- Two courses from the subcategory *English* (6 cr.)

ENL 213 And

ENL 223 Or ENL 230

- One course from the subcategory *Arabic* (3 cr.)

ARB 211, ARB 212, ARB 224, ARB 231, ARB 317

B - Philosophy and Religion

3 cr.

- One course from the subcategory *Religion* (3 cr.) REG 212, REG 213, REG 313, REG 314

- One course from the subcategory *Philosophy* (3 cr.)

ENS 205, PHL 211, PHL 311, POS 345

C - Cultural Studies and Social Sciences

9 cr.

- Two courses from the category *Cultural Studies and Social Sciences* (6 cr.)

HUT 305, HUT 306, MUS 210, FAP 215, COA 359, COA 315, NTR 215, ARP 215, PSL 201, SOL 201, SOL 301, BAD 201, ECN 200, ECN 211, ECN 212

D - Citizenship

3 cr.

- Two courses from the category *Citizenship* (6 cr.)

HIT 211, POS 201, POS 210, POS 240, IAF 301, POS 319, POS 337

E - Science and Technology

6 cr.

- One course from the subcategory *Mathematics/Statistics/Computer Science* (3 cr.)

CSC 201, MAT 201, MAT 202, MAT 204, MAT 211, STA 202, STA 210

- One course from the subcategory *Natural Sciences* (3 cr.)

AST 201, BIO 202, BIO 203, CHM 211, ENS 201, ENS 202, ENS 206, HEA 201, NTR 201, PHS 207

Students majoring in Computer Science are not allowed to count CSC courses within the pool of required GER courses.

Core Requirements

25 cr.

CSC 212, CSC 213, CSC 222, CSC 313, CSC 371, MAT 211, MAT 213, MAT 215, MAT 224.

Major Requirements

40 cr.

CSC 218, CSC 311, CSC 316, CSC 325, CSC 385, CSC 414, CSC 423, CSC 425, CSC 426, CSC 431, CSC 480, CSC 490, MAT 325.

Choose one course from the following list: CSC 318, CSC 323, CSC 387, CSC 412, CSC 417, CSC 422, CSC 432, CSC 463, CSC 485, MAT 339. 3 cr.

Free Electives

6 cr.

**Bachelor of Science in Computer Science
Suggested Program (104 Credits)**

Fall Semester I (12 Credits)

CSC	201	Computers and Their Use (GER)	3 cr.
CSC	212	Program Design & Data Abstraction I	3 cr.
ENL	213	Sophomore English Rhetoric (GER)	3 cr.
MAT	213	Calculus III	3 cr.

The Degree of Bachelor of Science in Computer Science

Computer Information Systems (CIS) Emphasis

The aim of our program in Computer Information Systems is for our graduates to have the right combination of knowledge and practical expertise to manage the information technology infrastructure of any organization. The CIS program replaces theoretical courses in the CS program by more practical courses.

Admission Requirements

For admission requirements to the degree of BS in Computer Science with a concentration in Computer Information Systems, refer to the section entitled “Undergraduate Admission” of this catalog.

Graduation Requirements

To receive the degree of BS in Computer Science (CIS), a student must fulfill all requirements of the degree program, complete all required courses, accumulate a total of 102 credits with an overall grade point average (GPA) of at least 2.0/4.0 and a minimum GPA of 2.0/4.0 in both the core and major requirements, and clear all accounts with the university. Candidates for degrees are reminded that grades of “I” assigned during the last semester to courses required for graduation will result in delaying their graduation.

The Degree of Bachelor of Science in Computer Science

Computer Graphics and Animation (CGA) Emphasis

The B.S. in Computer Science (CGA) is the study of the technical foundations, design and development of Computer Graphics and Animation. This program prepares students for careers as graphics software developers and for graduate study in computer graphics.

Admission Requirements

For admission requirements to the degree of BS in Computer Science (CGA), refer to the section entitled "Undergraduate Admission" of this catalog.

Graduation Requirements

To receive the degree of BS in Computer Science (CGA), a student must fulfill all requirements of his/her degree program, complete all required courses, accumulate a total of 104 credits with an overall grade point average (GPA) of at least 2.0/4.0 and a minimum GPA of 2.0/4.0 in both the core and major requirements, and clear all accounts with the university. Candidates for degrees are reminded that grades of "I" assigned during the last semester to courses required for graduation will result in delaying their graduation.

Degree Requirements (108 Credits)

General Education Requirements

33 cr.

A - Communication Skills in English and Arabic

9 cr.

The Degree of Bachelor of Science in Business Computing

A business computing graduate will play a key role in determining the requirements for an organization's information systems. After completing this program our students will have a sound understanding of organizational principles and the information that a computing system can provide to aid the enterprise.

Admission Requirements

For admission requirements to the degree of BS in Business Computing with a concentration in Computer Information Systems, refer to the section entitled "Undergraduate Admission" of this catalog.

Graduation Requirements

To receive the degree of BS in Business Computing, a student must fulfill all requirements of the degree program, complete all required courses, accumulate a total of 91 credits with an overall grade point average (GPA) of at least 2.0/4.0 and a minimum GPA of 2.0/4.0 in both the core and major requirements, and clear all accounts with the university. Candidates for degrees are reminded that grades of "I" assigned during the last semester to courses required for graduation will result in delaying their graduation.

Degree Requirements (91 credits)

General Education Requirements

30 cr.

A - Communication Skills in English and Arabic

9 cr.

- Two courses from the subcategory *English (6 cr.)*

ENL 213 And

ENL 223 Or ENL 230

- One course from the subcategory *Arabic (3cr.)*.

ARB 211, ARB 212, ARB 224, ARB 231, ARB 317

B - Philosophy and Religion

6 cr.

- One course from the subcategory *Religion (3cr.)*

REG 212, REG 213, REG 313, REG 314

- One course from the subcategory *Philosophy (3cr.)*

ENS 205, PHL 211, PHL 311, POS 345

C - Cultural Studies and Social Sciences

6 cr.

- Two courses from the category *Cultural Studies and Social Sciences (6 cr.)*

HUT 305, HUT 306, MUS 210, FAP 215, COA 359, COA 315, NTR 215, ARP 215, PSL 201, SOL 201, SOL 301, BAD 201, ECN 200, ECN 211, ECN 212

D - Citizenship

6 cr.

- Two courses from the category *Citizenship (6 cr.)*

HIT 211, POS 201, POS 210, POS 240, IAF 301, POS 319, POS 337

E - Science and Technology

3 cr.

- One course from the subcategory *Mathematics/Statistics/Computer Science (3 cr.)*

CSC 201, MAT 201, MAT 202, MAT 204, MAT 211, STA 202, STA 210

OR

- One course from the subcategory *Natural Sciences (3 cr.)*

AST 201, BIO 202, BIO 203, CHM 211, ENS 201, ENS 202, ENS 206, HEA 201, NTR 201, PHS 207

Students majoring in Business Computing are not allowed to count CSC courses within the pool of required GER courses.

Core Requirements

28 cr.

CSC 216, CSC 217, CSC 226, CSC 480, ACO 201, ECN 211, MAT 205, MAT 214,
STA 206, STA 207

Major Requirements

27 cr.

CSC 204, CSC 305, CSC 306, CSC 417, CSC 435, CSC 446, CSC 490, ACO 202,
ECN 212.

Free Electives

6 cr.

**Bachelor of Science in Business Computing
Suggested Program (91 Credits)**

Fall Semester I (13 Credits)

CSC	480	Internship	1 cr.
CSC	201	Computers and Their Use (GER)	3 cr.
CSC	204	Programming Logic	3 cr.
ENL	213	Sophomore English Rhetoric (GER)	3 cr.
—	—	GER	3 cr.

Spring Semester I (15 Credits)

CSC	216	Computer Programming I	3 cr.
CSC	226	Database Programming for Business	3 cr.
MAT	205	Math for Business and economics II	3 cr.
STA	206	Applied Statistics for Business & Economics I	3 cr.
ENL	230	English in the Workplace (GER)	3 cr.

Summer Semester I (6 Credits)

ARB	—	GER	3 cr.
—	—	GER	3 cr.

Fall Semester II (15 Credits)

CSC	217	Computer Programming II	3 cr.
ECN	211	Principles of Microeconomics	3 cr.
STA	207	Applied Statistics for Business & Economics II	3 cr.
—	—	GER	3 cr.

Spring Semester II (15 Credits)

CSC	306	Web Design	3 cr.
CSC	305	System Analysis and Design	3 cr.
ECN	212	Principles of Macroeconomics	3 cr.
MAT	214	Applied Linear Algebra	3 cr.
—	—	GER	3 cr.

Fall Semester III (15 Credits)

CSC	435	Operating Systems and Networks	3 cr.
CSC	417	Advanced Programming Technologies	3 cr.

REG	212/ 213	GER	3 cr.
—	—	Free Elective	3 cr.

Spring Semester III (12 Credits)

CSC	446	Applied Database Systems	3 cr.
CSC	490	Senior Project	3 cr.
ACO	202	Principle of Accounting II	3 cr.
—	—	Free Elective	3 cr.

Undergraduate Courses: Computer Science

CSC 200 Keyboarding (0.2); 1 cr. This course introduces the basic skills in operating an electronic keyboard and prepares students to proper typing procedures.

CSC 201 Computers and Their Use (3.0); 3 cr. This course introduces the difference and interface between hardware and software. It prepares the students, to use computers as a tool.

CSC 202 Computers for Visual Arts (3.0); 3 cr. This course introduces the basic concepts of computers and prepares visual arts students to the use of the state-of-the-art software packages for their projects.

CSC 204 Programming Logic (3.0); 3 cr. This is a language independent course that focuses on programming logic. Students learn to develop essential tools for problem solving such as hierarchy charts, pseudocode, and flowcharts. It places special emphasis on concepts such as visual, event-driven, and object-oriented programming. The course serves as a strong and thorough preparation for a sequence of up to date computer programming courses.

CSC 209 Introduction to Computers (3.0); 3 cr. An introduction to the history of computers and their use. Topics include hardware components, system software, interacting with the computer, data storage and retrieval, introduction to data communications and computer networks, the Internet, the use of computers in a variety of personal and professional context including word processing, spreadsheet analysis, database management, electronic presentation, and an introduction to computer programming using Pascal.

CSC 211 Fundamentals of Computing Using Pascal (4.0); 4 cr. The programming language PASCAL is used to provide the concepts of problem analysis and program design. Programming topics include control structures, I/O, arrays, functions and procedures.

CSC 212 Program Design and Data Abstraction I (3.0); 3 cr. This course is an introduction to computer programming using C++. Topics include problem solving using computers; structural programming; control structures; arrays; functions; pointers; recursion; data abstraction; classes; introduction to object-oriented programming paradigm.

CSC 213 Program Design and Data Abstraction II (3.0); 3 cr. This course is a continuation of CSC 212. Emphasis is placed on the object-oriented features of C++. Topics include classes; operator overloading; inheritance; virtual functions; polymorphism; stream I/O; templates; file processing. *Prerequisite:* CSC 212.

CSC 214 Fundamentals of Computing For Engineers (3.0); 3 cr. The programming language FORTRAN is used to provide the concepts of problem analysis and program design. Programming topics include control structures, I/O, arrays, functions and procedures.

CSC 215 File Processing and Business Programming Using COBOL (3.0); 3 cr. Introduces concepts and techniques for the organization and manipulation of files through the study of the business oriented programming language COBOL. *Prerequisite:* CSC 204 or CSC 212.

CSC 216 Computer Programming I (3.0); 3 cr. This course is an introduction to computer programming using Visual Basic. Topics include problem solving using computers, object-oriented, event-driven programming (OOED), form and control properties, variables, assignments statements, arithmetic, control structures, arrays, functions, subs, and modules. *Prerequisite:* CSC 201.

CSC 217 Computer Programming II (3.0); 3 cr. This course is a continuation of CSC 216. Topics include security and files in Visual Basic (VB), using VB to work with databases, using VB to create graphics, and creating objects in VB. *Prerequisite:* CSC 216.

CSC 218 Principles of Communication Systems (3.0); 3 cr. Spectral analysis, random variables and processes, introduction to queuing theory, analogue communication, digital communication, analogue to digital conversion, digital-modulation techniques, representation of noise, demodulation techniques, introduction to information theory. *Prerequisite:* CSC 212.

CSC 219 Digital Computer Fundamentals (3.0); 3 cr. Fundamentals of logic design, the design of switching circuits using small and medium scale integrated devices. Flip flops, counters, decoders, multiplexes, and registers.

CSC 220 Programming in Java I (3.0); 3 cr. Object-Oriented programming using Java. Topics include: Objects, classes, Methods, Interface Access, Composition, Inheritance, Polymorphism, Interfaces & Inner Classes. Introduction to predefined Classes: Array List, Vector, String & String Buffer. Handling Errors with Exception, I/O system, Templates/Generics. *Prerequisite:* CSC 212

CSC 221 Introduction to Database Programming for Business (2.0); 2 cr. Analysis, design and implementation of computerized business projects using the FoxPro language. *Prerequisite:* CSC 201.

CSC 222 Computer Organization and Assembly Language (3.0); 3 cr. Machine level architecture, functional units, memory, debugging, input/output structures, storage systems, instruction sets, machine cycle, assemblers, macroassemblers and microprocessors.

CSC 226 Database Programming for Business (3.0); 3cr. This course covers the concept of database and database modeling using ER and EER. The procedure of transforming the conceptual model to logical model (relational) is introduced, the SQL language, the relational algebra and the database design. *Prerequisite:* CSC 201.

CSC 231 Multimedia Applications (3.0); 3 cr. An Introduction to the multimedia world and a preparation to some of the well known software packages. *Prerequisite:* CSC 212 or CSC 217.

CSC 270 Computer Aided Engineering Design (0.3); 1 cr. Introduction to computer aided drawing. Applications of existing CAD software to engineering problems.

CSC 271 Workshop in Desktop Publishing (0.3); 1 cr. Laboratory sessions to gain practical experience with typesetting, procedures in a multilingual environment which includes Arabic. *Prerequisite:* CSC 201.

CSC 272 Workshop in Computer Aided Engineering Design (1.4); 3cr. Aims at applying CAD concepts in developing engineering projects. *Prerequisites:* CSC 201 or CEN 170.

CSC 273 Workshop in Computer Aided Architectural Design (1.4); 3 cr. Aims at applying CAD concepts in developing

architectural projects. *Prerequisite:* CSC 201 or RCT 102.

CSC 274 Software Packages for Architect I (2.0); 2 cr. Aims at using 3D Studio VIZ for creating complex 3D Models, Rendering and animation.

CSC 275 Software Packages for Architect II (2.0); 2 cr. The main purpose of this course is to communicate to students the ability of working on Photoshop as a final Rendering Software which follows AutoCAD and 3Dmax. Also, illustrator Software will be taught for creating professional looking graphics such as logos, working with creative type effects and photographs from line drawings.

CSC 277 Software Packages for Computer Graphics I (0.3); 3 cr. Introduction to 3-D studio program to students in computer graphics.

CSC 278 Software Packages for Computer Graphics II (0.3); 3 cr. This course covers the tools available in Alias/Wavefront's Maya software for the creation of 3D digital animation. *Prerequisite:* CSC 231.

CSC 279 Software Packages for Computer Graphics III (0.3); 3 cr. This course is mostly training on 3rd party software or plugins for major applications in the market (Autodesk 3D studio max, Autodesk Maya...).

CSC 300 Advanced Keyboarding(0.2); 1 cr. Continuation of CSC 200. *Prerequisite:* CSC 200.

CSC 301 Management Information Systems (3.0); 3cr. This course is an introduction to the fundamentals of information technologies and to the strategic opportunities and challenges presented by these technologies. The topics covered in this course are strategic uses of information systems, information technology in business: hardware, software, telecommunications. Data and knowledge management, artificial intelligence and expert systems. *Prerequisite:* CSC 216 or CSC 212.

CSC 305 System Analysis and Design (3.0); 3cr. Business systems as tools for solving information flow problems within the framework of a structured methodology. Case studies provide the students with practical applications. *Prerequisite:* CSC 221 or CSC 226.

CSC 306 Web Design (3.0); 3cr. This course teaches the design of Web sites through an advanced software package. The course takes

the students stage-by-stage through the design of specific sites, ranging from personal sites to creating and managing a corporate intranet. Emphasis on advanced topics such as scripting, databases, and the design of site interaction. *Prerequisite:* CSC 217 or CSC 213.

CSC 311 Theory of Computation (3.0); 3 cr. Strings and languages, regular sets, finite automata, Kleene's theorem, languages and grammars, Chomsky classification, Turing machines, complexity. *Prerequisites:* CSC 313 and MAT 211.

CSC 312 Computer Architecture (3.0); 3 cr. Von Neumann architecture, machine instructions and formats, addressing techniques, microprogramming, fast arithmetic, advanced memory and I/O practices. *Prerequisite:* CSC 222 or EEN 220.

CSC 313 Data structures using C++ (3.0); 3cr. The course will introduce students to the use of Abstract Data type and Data Structures. Topics include: Linked Lists and Recursion, Stacks, queues and their applications, Trees, Balanced trees (AVL, Red-Black) and their implementations, Maps and Hashing, Priority Queues, Heaps, Huffman coding, Graphs vocabulary and implementation, Backtracking. *Prerequisite:* CSC 213.

CSC 314 Programming Languages (3.0); 3 cr. A comparative study of programming languages: syntax, semanticist and implementation. Students will also have to learn and gain working familiarity with the ANSI Standard C programming language. *Prerequisite:* CSC 212.

CSC 315 Computer Information Systems (3.0); 3 cr. Business systems as tools for solving information flow problems within the framework of a structured methodology. Case studies provide the students with practical applications. *Prerequisite:* CSC 221 or CSC 226.

CSC 316 Computers Security and Their Data (3.0); 3 cr. This course covers the main concepts of computer security specially, the ones concerned with the latest technology. Encryption (symmetric & asymmetric), and the most important protocols using encryption are introduced. Also, program security, viruses, operating system security, network security and firewalls are explained. *Prerequisite:* CSC 217 or CSC 213.

CSC 318 Geographic Information Systems (3.0); 3 cr. Principles techniques and applications of geographic information systems.

CSC 320 Programming in Java II (3.0); 3 cr. This course is the continuity of Java I. Topics include: Creating Windows & Applets, 2D and 3D painting, Run-Time Type Identification, Multiple Threads, Introduction to Distributed Computing: JSP, JDBC, RMI. *Prerequisite:* CSC 220.

CSC 321 Advanced Software Packages (3.0); 3 cr. An in-depth practical experience with new generation software packages in the areas of office automation and management. *Prerequisite:* CSC 221 or CSC 226.

CSC 323 Object-Oriented Programming Using C++ (3.0); 3 cr. Abstract data types, classes, objects basic properties, inheritance, polymorphism and dynamic binding, multiple inheritance, object-oriented software engineering, modeling and prototyping. *Prerequisite:* CSC 213 or CSC 217.

CSC 325 Analysis of Algorithms (3.0); 3cr. An introduction to the analysis of the efficiency and accuracy of algorithms. Dynamic Programming. Greedy Algorithms. Graph Algorithms. Selected topics. *Prerequisite:* CSC 313.

CSC 343 Character Animation (0.3); 3 cr. This course introduces the professional tools required for building and animating 3D characters. *Prerequisite:* CSC 277 or CSC 278.

CSC 330 Commercial Software Development (3.0); 3cr. Topics include software design, development, testing, documentation, and maintenance. Also examines team work, scheduling, prime management, and project management topics. Students develop, test, and market a commercial piece of software in a team setting. *Prerequisite:* CSC 315.

CSC 371 Workshop in Advanced Programming (0.3); 1 cr. Language laboratory with projects requiring the proper choice of data structures, control structures, and tools of software based on solid theoretical computing concepts. Laboratory 2 hours per week, tutorial 1 hour per week.

CSC 372 Mathematical Software Packages (1.0); 1 cr. Introduction to computer programming and simulation using mathematical software packages such as Matlab, Maple, Mathematica.

CSC 375 Computer Modeling and Simulation (3.0); 3 cr. Introduction to basic concepts of simulation modeling: data acquisition, model construction and validation, experimentation, implementing the results. Discrete systems simulation using Matlab software. *Prerequisite:* CSC 313 or CSC 320.

CSC 376 Applied Security lab (1.2); 1 cr. This course applies the theoretical concepts of encryption by building or using some security packages. It studies and compares different security features of the current commercial anti-virus and anti-intrusion software, operating systems, database management systems, firewalls and risk analysis packages. *Prerequisite:* CSC 316 CSC 316.

CSC 385 Internet Computing (3.0); 3 cr. The topics covered in the course include Introduction to Internet, WWW, XHTML, Javascript, MySQL, Apache, PHP, and XML. *Prerequisite:* CSC 213 or CSC 217 or CSC 220.

CSC 387 Advanced programming using Java (3.0); 3cr. From C++ to Java, interfaces, inner classes, I/O system, Templates/Generics. Creating Windows & Applets, 2D and 3D painting, Multiple Threads, Java Database Connectivity (JDBC), Java Networking: Client/Server Architecture, Servlet, Java Server Page (JSP). *Prerequisite:* CSC 213.

CSC 412 Introduction to Computer Graphics (3.0); 3 cr. Video basics, raster scan graphics, Bresenham algorithm, viewports, geometric forms and models, polygon filling and antialiasing, halftoning, convex boundaries, interior and exterior clipping, hidden lines and hidden surfaces. *Prerequisite:* CSC 313 or CSC 320.

CSC 414 Applied Operating Systems (3.0); 3 cr. Fundamental concepts that are applicable to a variety of operating systems. Detailed case studies of Unix, Linux and Windows NT systems. *Prerequisite:* CSC 312.

CSC 415 Introduction to Operating Systems (3.0); 3 cr. Topics include operating system concepts; system calls; interprocess communication; race condition; mutual exclusion with/without busy waiting; semaphores; monitors; the problem deadlock; process scheduling; memory management, file systems; security; I/O. *Prerequisites:* CSC 312.

CSC 416 Fundamentals of Data Retrieval (3.0); 3cr. Topics include information system

types and related file structures, inverted files, text analysis and automatic indexing; database management systems and query languages, overview on natural language processing. *Prerequisite:* CSC 313.

CSC 417 Advanced Programming Technologies (0.3); 3 cr. This course covers advanced programming topics using Visual Basic.NET. This includes databases, Web applications, XML, Web services, mobile applications. *Prerequisite:* CSC 213 or CSC 217.

CSC 422 Introduction to Image Processing (3.0); 3 cr. Image perception, sampling and quantization techniques, image transforms, image enhancement techniques like noise reduction, blurring, sharpening, edge detection, and contrast enhancing. *Prerequisite:* CSC 213 or CSC 220.

CSC 423 Software Engineering (3.0); 3 cr. Techniques of software development, testing, and management. *Prerequisite:* CSC 323 or CSC 320.

CSC 425 Data Communications and Computer Networks (3.0); 3 cr. Topics include data communications; transmission media; asynchronous/synchronous transmission; error control; data link control protocols; LAN types and protocols; high-speed LANs; MANs; bridges; WANs; packet/circuit switched data networks; internetworking; Internet IP. *Prerequisites:* CSC 218 or CSC 312.

CSC 426 Principles of Database Systems (3.0); 3 cr. The objective of this course is to introduce the fundamental concepts necessary for designing, using and implementing database systems. The course will study data modeling by understanding the concepts data schema, data representation, relations and attributes, normalization, data description language, data definition language and data manipulation languages. The course will also provide an introduction to the next generations systems and basically OODBS. Also the course will cover a number of issues that are important in the design of DBMS including recovery, consistency, security, integrity and query optimization. *Prerequisite:* CSC 313 or CSC 217.

CSC 430 Computer Graphics and Animation (3.0); 3 cr. Topics include: mathematical techniques for curve and surfaces; color systems; fractals hidden lines and hidden shad up; surface mapping and ray tracing; techniques of

animation. *Prerequisite:* CSC 412 or its equivalence.

CSC 431 Compiler Design (3.0); 3 cr. Principles and practices in the design of programming language compilers. Topics: lexical analysis, parsing theory (LL, LR, and LALR parsing), symbol tables, type checking, common representations for arrays, runtime conventions for procedure calls, storage allocation for variables, and generation of code. Students construct two compilers as the programming projects: the first is a simple predictive parser and the second is a rather large project using Lex and Yacc. *Prerequisites:* CSC 311.

CSC 432 Introduction to Artificial Intelligence (3.0); 3 cr. Basic concepts of artificial intelligence, predicate calculus, proof by refutation (Oring algorithm), natural language processing, game trees, heuristic, introduces two programming languages LISP and PROLOG. *Prerequisite:* CSC 313.

CSC 433 Applied Artificial Intelligence (3.0); 3 cr. The aim of this course is to introduce Game-related Artificial Intelligence fundamental concepts: Intelligent agents, Heuristic Search, Planning, Uncertainty and Decisions Making (Fuzzy Logic), Learning (Genetic Algorithms). *Prerequisites:* CSC 320 and MAT 340.

CSC 435 Operating Systems and Networks (3.0); 3 cr. This course provides an introduction to the concepts underlying operating systems and computer networks. Detailed studies of Unix, Linux, Windows NT, Ethernet and TCP/IP protocols. Senior Standing.

CSC 443 Computer Games Design (3.0); 3 cr. In this course, the student learns about the main components that are required to design a computer game. The work includes project design activities where the students will be expected to make use of existing programming tools. *Prerequisites:* CSC 343.

CSC 446 Applied Database Systems (3.0); 3 cr. This course is intended to be a practical study of the fundamentals of current database

technologies and database management systems. Wide range of topics will be covered including uses of databases, database architecture, design, real world implementations, security and integrity issues, performance and concurrency. *Prerequisite:* CSC 221 or CSC 226.

CSC 463 Advanced Software Development (3.0); 3 cr. This course addresses advanced topics in programming using the relatively new programming language C#.NET, a part of the .NET IDE envelope. The language is intriguing and is intended to programming, using an object-oriented approach, Internet applications with emphasis on Windows interfaced packaged software. It is an integration language that agrees well with almost any other application across the internet. *Prerequisite:* CSC 213.

CSC 475 Network Programming Lab (1.2); 1 cr. Applied networking and distributed computing in Java. Networking with sockets. TCP/IP, Multicast, HTTP, RMI, Finger, and ping clients and servers. Multiprotocol chat systems & whiteboards. *Prerequisite:* CSC 425.

CSC 476 Database Programming lab (1.2); 1 cr. This course applies the theoretical concepts of database design using a specific application on a commercial database management system. The general concepts of this DBMS including transaction handling, optimization, recovery, and security are checked and compared with other commercial DBMS. *Prerequisites:* CSC 426 or CSC 446.

CSC 480 Internship 1 cr. Assigned work at an industrial establishment. The grade will be based on employer's evaluation, written report and oral discussions. *Prerequisite:* Senior Standing.

CSC 485 Seminar (3.0); 3 cr. This course is designed to provide students an opportunity to study some topics in computer science that have not been included in the curriculum. *Prerequisite:* Senior Standing.

CSC 490 Senior Study 3 cr. Assigned project supervised by a faculty member. The grade will be based on project evaluation and individual oral presentation. *Prerequisite:* Senior Standing.

The Degree of Bachelor of Science in Geographic Information Systems

Geographic Information Systems is a growing field in computer technology. Our program in GIS offers a hands-on learning environment that prepares our students to join many of the emerging areas of applications of GIS such as infrastructure management, public health and safety as well as other business uses.

Admission Requirements

For admission requirements to the degree of BS in Geographic Information Systems, refer to the section entitled "Undergraduate Admission" of this catalog.

Graduation Requirements

To receive the degree of BS in Geographic Information Systems, a student must fulfill all requirements of the degree program, complete all required courses, accumulate a total of 90 credits with an overall grade point average (GPA) of at least 2.0/4.0 and a minimum GPA of 2.0/4.0 in both the core and major requirements, and clear all accounts with the university. Candidates for degrees are reminded that grades of "I" assigned during the last semester to courses required for graduation will result in delaying their graduation.

Degree Requirements (90 credits)

General Education Requirements

30 cr.

A - Communication Skills in English and Arabic

9 cr.

- Two courses from the subcategory *English (6 cr.)*

ENL 213 And

ENL 223 Or ENL 230

- One course from the subcategory *Arabic (3cr.)*

—	—	GER	3 cr.

¹ GIS 211 or CSC 318 could be taken.

Minor in Geographic Information Systems (15 credits)

The main goal behind starting a minor in Geographic Information Science is to provide students from different backgrounds with the capacity to apply GIS in their area of knowledge and to enhance their skills in a rapidly expanding market of computer-based technology.

Geographic Information Systems has been growing at an extraordinary rate. In fact, computer cartography has revolutionized traditional cartography to vastly improve map making and visualization of geographic information in a multimedia environment.

Geographic Information Systems includes Geographic Information Systems, Global Positioning Systems and Remote Sensing:

- A Geographic Information Systems (GIS) is a computer-based tool for mapping and analyzing things that exist, and events that happen on earth. GIS technology is a special case of information systems where database consists of features, activities, or events that are definable in space as points, lines, or areas.
- Global Positioning System (GPS) is a satellite system that allows users to collect precise geographic data for use in mapping.
- Remote sensing refers to any technique whereby information about objects and the environment is obtained from a distance with the aid of aircrafts and satellites.

There is a strong demand for people who are trained in Geographic Information Systems and this minor will assist the students in finding a large variety of jobs in this rapidly growing field.

Students declaring this minor will receive extensive training in processing vector and raster data, making spatial analysis, GIS modeling, and displaying the information products in a professional cartographic way. Thus, the GIS minor will not only provide the fundamentals of GIS to students without any previous knowledge of GIS, but will prepare them for careers in virtually all areas of the public or private sector where GIS is increasingly in use.

In short:

- GIS is very useful for efficient management, thorough policy analysis and cost-effective decision making.
- GIS is a powerful planning and maintenance tool for any business or engineering project.
- GIS mapping, editing and geo-processing is widely deployed in the defense industry and in many social, political and environmental studies.

The multidisciplinary nature of the geographic information systems allows students from any field of study— i.e. whose majors include engineering, natural and applied sciences, business, management, marketing, public administration, social sciences, political science, architecture, education and others— to declare this minor.

Admission Requirements

General requirements for admission to this minor are those of the University policy on Undergraduate Academic Minors. No additional requirements are needed.

Pool of Courses

CSC 318; GIS 311; GIS 352; GIS 441; GIS 321 or GIS 452

Graduation Requirements and Suggested Schedule

To satisfy the graduation requirements of a minor in Geographic Information Systems, a student must pass **five courses** from the pool of courses as follows:

- First semester (2 courses; 6 credits)
CSC 318; GIS 352
- Second semester (2 courses; 6 credits)
GIS 311; GIS 441
- Third semester (1 course; 3 credits)
GIS 321 or GIS 452

D is the passing grade for each course, and the minor should be completed with a GPA of 2.0.

Undergraduate Courses: Geographic Information Systems

GIS 211 Principles of GIS (3.0); 3 cr. An introduction to Geographical Information System, data structure and information, topology, attributes and database organization, map basics and cartographic representations, and Remote Sensing & GPS.

GIS 311 Desktop GIS (3.0); 3 cr. Topics include spatial data entry, data format and structure, maps and raster image registration and rectification, data base design and management, spatial data analysis (vector representation), and handling all types of geographical data with Arc Info Workstation. *Prerequisite:* GIS 211 or CSC 318

GIS 321 Spatial analysis and Modeling (3.0); 3 cr. Introduction to spatial analysis, vector spatial analysis, network analysis, raster spatial data development, raster analysis, surface modeling, 3-D analysis. *Prerequisite:* GIS 311.

GIS 331 Implementations of GIS (3.0); 3 cr. This course focuses on applications in vector data analysis and manipulation, network analysis, spatial analysis, surface modeling, 3-D modeling, and field trips. *Prerequisite:* GIS 321.

GIS 341 Cartography and Automated Mapping (3.0); 3 cr. Elements of thematic cartography, cartographic theory, and cartographic projections. Properties of photogrammetric and remotely sensed images; photography, elements of map, photograph, and image interpretation.

GIS 351 Photogrammetry and Remote Sensing (3.0); 3 cr. the nature of remote sensing. Optical radiation models. Sensor models. Data models. Spectral and spatial transforms. Correction and calibration. Image registration and fusion. Introduction to photogrammetry. Basic elements and techniques of image interpretation. Various aerial camera systems and platforms. Films and filter

combination. Geometry and Aerial photography. Scale and area and height measurement. Stereoscopy. Flight planing and ground control of aerial photography. Orthophotography.

GIS 352 Theories of Remote Sensing (3.0); 3 cr. Concepts of Remote Sensing, physics of Remote Sensing, introduction to air photo interpretation, photogrammetry, Remote Sensing sensors and platforms, digital image processing, and overview of applications of remote Sensing.

GIS 411 Geodetic Science and Satellite Positioning (3.0); 3 cr. Description of the geodetic mode of the Earth. Relationship between terrestrial observations and grid coordinates. Use of satellites for navigation and positioning. History and review of satellite positioning systems. Measurement techniques using gps. Future trends in satellite positioning technology. *Prerequisite:* MAT 213.

GIS 441 Cartography, Geodesy and GPS (3.0); 3 cr. This course introduces the nature of cartography, basic geodesy, map projections, scaling, referencing and coordinate systems, cartographic perception and design. It also describes Global Positioning System (GPS), map data collection and design.

GIS 452 Advanced Remote Sensing (3.0); 3 cr. This course focuses on hands on applications of Remote Sensing data collection, data preparation and processing, image distortion, radiometric and geometric corrections, image enhancement and classification, image mosaicking, space triangulation, and digital representation of relief stereoscopy. *Prerequisite:* GIS 352.

GIS 490 Senior Project (3.0); 3 cr. Assigned project supervised by a faculty member. The grade will be based on project evaluation and individual oral presentation. *Prerequisite:* Senior Standing.

Our Graduate Program

Our graduate program in Computer Science is designed to prepare students to do research in advanced topics in Computer Science and to gain further practical skills and knowledge in the computer profession.

The Degree of Master of Science in Computer Science

Admission Requirements

In addition to the university graduate admission requirements, candidates are expected to have a sufficient background in computer science and mathematics. Those who do not meet these requirements may be given provisional admission pending satisfactory completion of some undergraduate courses. The credits earned for these courses will not be counted towards the 30 credits required for the degree of Master of Science (MS) in computer science.

Graduation Requirements

To satisfy the requirements for the degree of MS in Computer Science, the student must complete a total of 30 credits with an overall average of at least 3.0/4.0. A student can complete the required 30 credits by following one of the two options:

1. **Course-work option:** 15 credits of required courses and 15 credits of elective courses.
2. **Thesis option:** 15 credits of required courses, 9 credits of elective courses and a 6-credit thesis.

The thesis option is more research oriented and therefore more appropriate for students planning to pursue a Ph. D. The course-work option is more hands-on and project oriented and therefore more appropriate for students planning to join the market place.

Degree Requirements (*Course Work Option*) (30 Credits)

1- Complete the following five required courses **15 cr.**
CSC 611, CSC 616, CSC 622, CSC 626, MAT 661.

2- Complete five elective courses from the following list **15 cr.**
CSC 603, CSC 621, CSC 623, CSC 625, CSC 631, CSC 632, CSC 636, CSC 647,
CSC 670

3-Pass two comprehensive examinations after having completed at least 18 credits with an overall average of 3.0/4.0:

The first exam is composed of topics covered in CSC 616 and CSC 626. The second exam is composed of topics covered in CSC 611, CSC 622 and MAT 661.

**MS in Computer Science (Course Work Option)
Suggested Program (30 Credits)**

Fall Semester (6 Credits)

CSC	611	Advanced Theory of Computation	3 cr.
CSC	6xx	Elective	3 cr.

Spring Semester (9 credits)

CSC	616	Advanced Database Systems	3 cr.
CSC	6xx	Elective	3 cr.
CSC	6xx	Elective	3 cr.

Fall Semester II (9 Credits)

CSC	622	Advanced Analysis of Algorithms	3 cr.
CSC	626	Computer Communication and Networks	3 cr.
CSC	6xx	Elective	3 cr.

Spring Semester II (6 Credits)

MAT	661	Computational Mathematics	3 cr.
CSC	6xx	Elective	3 cr.

**Degree Requirements (*Thesis Option*)
(30 Credits)**

1- Complete the following five required courses **15 cr.**
CSC 611, CSC 616, CS 622, CSC 626, MAT 661.

2- Complete three elective courses from the following list **9 cr.**
CSC 603, CSC 621, CSC 623, CSC 625, CSC 631, CSC 632, CSC 636, CSC 647, CSC 670

3- Complete the MS thesis requirements **6 cr.**
CSC 691 and CSC 692

**Master of Science in Computer Science (Thesis Option)
Suggested Program (30 Credits)**

Fall Semester (6 Credits)

CSC	611	Advanced Theory of Computation	3 cr.
CSC	626	Commuter Communications & Networks	3 cr.

Spring Semester (9 credits)

MAT	661	Computational Mathematics I	3 cr.
-----	-----	-----------------------------	-------

Spring Semester I (9 Credits)

CSC	616	Advanced Database Systems	3 cr.
CSC	622	Advanced Analysis of Algorithms	3 cr.
CSC	6xx	Elective	3 cr.

Fall Semester II (6 Credits)

MAT	661	Computational Mathematics I	3 cr.
CSC	691	Master Thesis in Computer Science I	3 cr.
CSC	6xx	Elective	

Spring Semester II (6 Credits)

CSC	692	Master Thesis in Computer Science II	3 cr.
CSC	6xx	Elective	3 cr.

The Degree of Master of Science in Computer Science

Computer Information Systems Emphasis

The purpose of the graduate program CS-CIS is to teach students how to combine general management knowledge with the latest software tools and techniques to create information systems which allow organizations to compete in on the global market place. Graduates will be prepared for careers in a variety of areas such as programming, system development, database administration, network development & support, and consulting.

Admission Requirements

In addition to the university graduate admission requirements, candidates are expected to have a sufficient background in computer science and mathematics. Those who do not meet these requirements may be given provisional admission pending satisfactory completion of a set of undergraduate courses. The credits earned for these courses will not be counted towards the 30 credits required for the degree of Master of Science in CS-CIS.

Graduation Requirements

To satisfy the requirements for the degree of Master of Science in CS-CIS, the student must complete a total of 30 credits with an overall average of at least 3.0/4.0. A student can complete the required 30 credits by following one of the two options:

1. **Thesis option:** 15 credits of required courses, 9 credits of elective courses and a 6-credit thesis.
2. **Course-work option:** 15 credits of required courses, 15 credits of elective courses.

The thesis option is more research oriented and therefore more appropriate for students planning to pursue a Ph. D. The course-work option is more hands-on and project oriented and therefore more appropriate for students planning to join the market place

Degree Requirements of CS CIS Emphasis (*Course Work Option*) - (30 Credits)

1- Complete the following five required courses **15 cr.**
CSC 605, CSC 616, CSC 623, CSC 626, STA 614

2- Complete five elective courses from the following list **15 cr.**
CSC 603, CSC 621, CSC 625, CSC 631, CSC 632, CSC 636,
CSC 647, CSC 670, PRM 601, PRM 603, PRM 605, BAD 630, BAD 634.
At least two courses from this pool should be Computer Science (CSC prefix) courses.

3- Pass a comprehensive examination after having completed at least 18 credits with an overall average of 3.0/4.0

The exam will cover topics from CSC 616, CSC 623 and CSC 626.

MS in Computer Science
CIS Emphasis (CourseWork Option) - Suggested Program (30 Credits)

Fall Semester I (9 Credits)

CSC	605	System Analysis and Design	3 cr.
STA	614	Advanced Statistical Methods for Business Decision Systems	3 cr.
CSC	6xx	Elective	3 cr.

Spring Semester I (9 Credits)

CSC	616	Advanced Database Systems	3 cr.
CSC	6xx	Elective	3 cr.
		Elective	3 cr.

Fall Semester II (6 Credits)

CSC	626	Computer Communications& Networks	3 cr.
CSC	6xx	Elective	3 cr.

Spring Semester II (6 Credits)

CSC	623	Advanced Software Engineering	3 cr.
—	—	Elective	3 cr.

Degree Requirements of CS
CIS Emphasis (*Thesis Option*) - (30 Credits)

1- Complete the following five required courses **15 cr.**
 CSC 605, CSC 616, CSC 623, CSC 626, STA 614.

2- Complete three elective courses from the following list **9 cr.**
 CSC 603, CSC 621, CSC 625, CSC 631, CSC 632, CSC 636, CSC 647, CSC 670, PRM 601, PRM 603, PRM 605, BAD 630, BAD 634. At least two courses from this pool should be Computer Science (CSC prefix) courses.

3- Complete the MS thesis requirements **6 cr.**
 CSC 691 and CSC 692

Master of Science in Computer Science
CIS Emphasis (Thesis Option) - Suggested Program (30 Credits)

Fall Semester I (9 Credits)

CSC	605	System Analysis and Design	3 cr.
STA	614	Advanced Statistical Methods for Business Decision Systems	3 cr.
		Elective	3 cr.

Spring Semester I (9 Credits)

CSC	616	Advanced Database Systems	3 cr.
CSC	626	Computer Communication and Networks	3 cr.
CSC	6xx	Elective	3 cr.

Fall Semester II (6 Credits)

CSC	623	Advanced Software Engineering	3 cr.
CSC	691	Master Thesis I	3 cr.

Spring Semester II (6 Credits)

CSC	692	Master Thesis II	3 cr.
		Elective	3 cr.

Regulations concerning the “thesis courses” of the Master of Science in Computer Science or in CS: CIS Emphasis

Master Thesis

Students may register for the thesis (CSC 691 & CSC 692) upon the completion of at least 18 credits with an overall average of at least 3.3/4.0 and after receiving the approval of both the department chairperson and the thesis advisor.

Duration of Work

The work for the thesis is expected to be completed within a period of two semesters. Otherwise, the student shall register for one credit every semester thereafter.

Jury for the Oral Defense

After receiving a written note of completion along with five bound copies of the master thesis from the master thesis advisor, the department chairperson shall appoint the jury for the oral defense and its chairperson, and shall distribute to each member one copy of the master thesis. The jury shall consist of the master thesis advisor and three full-time faculty members one of whom is from outside the department.

Schedule for the Oral Defense

The oral defense for the master thesis shall be scheduled by the jury chairperson one month from the date of the appointment of the jury at the latest.

Evaluation and Grade

Bound master thesis copies are required for the evaluation. The jury shall evaluate the work for the master thesis and assign the appropriate grade by a majority vote. In case of a tie, the committee chairperson shall have the casting vote.

Final Copy of the Master Thesis

The student shall submit seven bounded copies of the approved final copy of the master thesis to the jury chairperson who, in turn, shall distribute them to the Library, Faculty, Department, and to each member of the jury.

Graduate Courses: Computer Science

CSC 603 Objected-Oriented Applications (3.0); 3 cr. Emphasizes the use of Object-Oriented Architectures and Components in order to build business to business and business to client applications. The multi-tier architecture will be studied in depth through Enterprise Java Beans (EJB) specifications. The development environment is Jbuilder 4 of Borland.

CSC 605 System Analysis and Design (3.0); 3 cr. Emphasizes the design aspects of systems development, including logical and physical design, implementation, testing and operation. State-of the art system development process, methods and tools are presented.

CSC 606 Operating Systems and Security (3.0); 3 cr. This is a hands-on system vulnerabilities like stack and heap overflows, return to libc attacks etc... Attack counter measures such as stack guard and address space randomization are discussed. The students are expected to write their own exploits in addition to applying known exploits in a controlled linux/x86 environment. Viruses and worms are covered along with defenses like disinfection, integrity checking and sandboxing.

CSC 611 Advanced Theory of Computation (3.0); 3 cr. Topics include: primitive recursive functions, Church thesis, recursive and recursively enumerable sets, time and space complexity measures, the classes P and NP-completeness, and hierarchy of complexity.

CSC 612 Advanced Computer Graphics (3.0); 3 cr. Topics include: mathematical techniques for curve and surfaces; color systems; fractals hidden lines and hidden shading; surface mapping and ray tracing; techniques of animation.

CSC 613 Computer Vision and its Applications (3.0); 3 cr. Focuses on computer techniques for understanding and interpreting visual data, physics of vision, boundary detection of objects, region growing, analysis of texture and motion, and analysis on objects in scenes.

CSC 614 Modeling and Simulation in OOP (3.0); 3 cr. Encapsulation, use of inheritance (including multiple inheritance), collections and iterators, run-time typing identification, exception handling. Some aspects of distributed and parallel object-oriented systems.

CSC 615 Advanced Computer Architecture (3.0); 3 cr. Early systems, parallelism and parallel processing, vector processors, array processors, associative processors, VLIW architecture, memory and I/O subsystems, networking. Case Study: RISC architecture.

CSC 616 Advanced Database Systems (3.0); 3 cr. Topics include: Data modeling using ER model; relational model; relational algebra; SQL; functional dependencies and normalization; query processing and optimization; distributed database design procedure; distributed query optimization concurrency control; recovery; integrity and security; data warehouse and data mining.

CSC 621 Advanced Compiler Design (3.0); 3 cr. The course will cover some of the core-topics, already studied in CSC 431 (or in some equivalent course at another university), but with more details and rigor. Some of the topics are: lexical analysis, parsing theory (LL, LR, and LALR parsing), symbol tables, type checking, common representations for arrays, runtime conventions for procedure calls, storage allocation for variables, generation of code, and code optimization.

CSC 622 Advanced Analysis of Algorithms (3.0); 3 cr. The course will cover some of the core-topics, already studied in CSC 325 (or in some equivalent course at another university), but with more details and rigor. In addition, we will present a selection of advanced topics, mainly the theory of NP-completeness and algorithms for parallel computers.

CSC 623 Advanced Software Engineering (3.0); 3 cr. Advanced Topics in software engineering are covered including: formal methods, cleanroom software engineering, component-based development, client/server software engineering, web engineering, reengineering, computer-aided software engineering.

CSC 625 Advanced Operating Systems (3.0); 3 cr. Special emphasis on distributed computing, and the services provided by distributed operating systems. Important topics include naming, security, remote procedure call, networks, concurrency, transactions, parallel computing, shared memory, message passing, and scale.

CSC 626 Computer Communications and Networks (3.0); 3 cr. Computer communications and layered network architecture; implementation and configuration of local Area Network (LANs), and Wide Area Network (WANs), TCP/IP, Internetworking and network management.

CSC 631 Multimedia Systems (3.0); 3 cr. This course provides the background needed for the design and development of computer-based systems that combine text, still images, sound, animation, and full motion video. The course will examine design methodologies used in planning these systems, and authoring languages used to create such systems.

CSC 632 Artificial Intelligence (3.0); 3 cr. Principles of problem solving and planning and machine learning systems. Introduction to current State-of-the art expert systems and expert systems tools.

CSC 633 Digital Image Processing (3.0); 3 cr. Image perception, sampling, quantization techniques, transforms, enhancement techniques, like noise reduction, blurring, sharpening, edge detection, and contrast enhancing, image restoration and analysis.

CSC 636 Computer Security (3.0); 3 cr. This is a graduate course on computer security. The emphasis is on formal model and the foundations of computer security. Topics include: access control and protection models. Security, confidentiality and integrity policies are also discussed and representative models like Bell-LaPadula, Biba and Chinese wall are chosen as examples. Information flow, auditing and vulnerability analysis are also covered.

CSC 645 Neural Networks for Computing (3.0); 3 cr. Introduction to neural networks algorithms, adaptive behavior, associative learning. Applications to cognitive information processing and control and signal processing.

CSC 647 Decision Support Systems (3.0); 3cr. Decision Support Systems (DSS) help users in solving problems and in reaching a decision based on available data, knowledge bases, and decision models. This course will expose students to theoretical DSS concepts, and to practical issues. Students will gain hands on experience by creating a real world DSS. Topics include: DSS analysis, modeling, and development; data warehousing, mining and OLAP; knowledge management (acquisition, validation, representation) and inference techniques.

CSC 670 Selected Topics in Computer Science (3.0); 3 cr. Topics of current interest in computer science.

CSC 685 Readings in Computer Science (3.0); 3 cr. Designed primarily for those students wishing to study a particular area in computer science under the supervision of a faculty member.

CSC 690 Master Thesis in Computer Science 6 cr. The research for the master thesis must show the student's proficiency in approved topics in computer science.

CSC 691 Master Thesis in Computer Science I 3 cr. The research for the master thesis must show the student's proficiency in approved topics in computer science.

CSC 692 Master Thesis in Computer Science II 3 cr. Continuation of CSC 691.

DEPARTMENT OF MATHEMATICS AND STATISTICS

Chairperson: *Dr. Ramez Maalouf*

Secretary: *Mrs. Nelly Geara Nakad*

Associate Professors

Haddad, John, Ph.D., 1992, *Statistics*, University of Waterloo, Canada

Keirouz, Malhab, Ph.D., 1991, *Differential Topology*, Purdue University, USA

Saliba, Holem, Ph.D., 1997, *Mathematical Logic, Algebra and the Theory of Numbers*, Moscow State University, Russia

Assistant Professors

Ghalayini, Bassem, Ph.D., 1995, *Differential Equations*, University of California, Los Angeles, USA

Jajou, Amer F., Ph.D., 1987, *Operations Research, Numerical Analysis*, Univerzita Karluva, Czechoslovakia

Maalouf, Ramez, Ph.D., 1994, *Complex Analysis, Fractal Geometry*, Imperial College London, England

Rached, Ziad, Ph.D., 2002, *Mathematics, Communications*, Queen's University, Canada

Senior Lecturer

Saadé, Ban, M.S., 1978, *Algebra*, American University of Beirut, Lebanon,

Lecturers

Freji-Bou Nassif, Claudia, M.S., 1991, *Applied Statistics*, Ohio State University, USA; *Financial Economics*, M.S., 1998, University of London, U.K.

Hajjar-Muça, Theresa, M.P.H., 1994, *Biostatistics*, American University of Beirut, Lebanon

Programs of Study

The department offers programs in mathematics, actuarial science & insurance, and applied statistics leading to the degrees of:

- BS in Mathematics (103 Credits).
- BS in Actuarial Science and Insurance (112 Credits).
- BS in Applied Statistics (90 Credits).
- MS in Mathematics (33 Credits)

The department also offers the following minors for the first time:

- Minor in Mathematical Insurance (18 credits)
- Minor in Applied Statistics (18 Credits)
- Minor in Mathematics (15 Credits)

Our Undergraduate Program

Our undergraduate program is designed to prepare students for graduate studies in Mathematics and in mathematics related fields such as Applied Mathematics, statistics, Actuarial Science and Financial engineering. The program main potential employers are organizations concerned with risk such as Insurance companies, banks, actuarial consultancy and statistical agencies.

The Degree of Bachelor of Science in Actuarial Science and Insurance

Academic Advisor: *Mrs. Claudia Freiji Bou Nassif*

Actuarial Science is a field concerned with the applications of mathematics and statistics to long-term financial problems. These problems are frequently associated with life / casualty assurance and pension provision. An actuary has to:

- Assess risks.
- Project mortality rates.
- Take account of economic factors.
- Determine levels of premiums on long-term contracts.
- Forecast short- and long-term benefits and contributions for environments such as social security, pension funds, insurance companies, and banks.

The BS degree in Actuarial Science and Insurance prepares students for careers as:

- Assistant Actuaries in the insurance and reinsurance industries.
- Analysts of risk and uncertainty regarding potential financial losses.
- Underwriters in insurance companies and government agencies.
- Consultants in financial and investment corporations.

Students enrolled in the BS degree will be prepared to take a series of examinations in actuarial science leading to ASA / ACAS designation under the American Society of Actuaries (SOA) and Casualty Actuarial Society (CAS). They also would benefit from VEE approved credits for Economics, applied statistics and corporate finance required for the attainment of the above mentioned designation.

Admission Requirements

For admission requirements to the degree of BS in Actuarial Science and Insurance, refer to the section entitled “Undergraduate Admission” of this catalog.

Graduation Requirements

To receive the degree of BS in Actuarial Science and Insurance, a student must fulfill all requirements of the degree program, complete all required courses, accumulate a total of 112 credits with an overall grade point average (GPA) of at least 2.0/4.0 and a minimum GPA of 2.0/4.0 in both the core and major requirements, and clear all accounts with the university. Candidates for degrees are reminded that grades of “I” assigned during the last semester to courses required for graduation will result in delaying of graduation.

**Degree Requirements
(112 credits)**

General Education Requirements	30 cr.
A - Communication Skills in English and Arabic	9 cr.
- Two courses from the subcategory <i>English (6 cr.)</i> ENL 213 And ENL 223 Or ENL 230	
- One course from the subcategory <i>Arabic (3cr.)</i> ARB 211, ARB 212, ARB 224, ARB 231, ARB 317	
B - Philosophy and Religion	6 cr.
- One course from the subcategory <i>Religion (3cr.)</i> REG 212, REG 213, REG 313, REG 314	
- One course from the subcategory <i>Philosophy (3cr.)</i> ENS 205, PHL 211, PHL 311, POS 345	
C- Cultural Studies and Social Sciences	6 cr.
- Two courses from the category <i>Cultural Studies and Social Sciences (6 cr.)</i> HUT 305, HUT 306, MUS 210, FAP 215, COA 359, COA 315, NTR 215, ARP 215, PSL 201, SOL 201, SOL 301, BAD 201, ECN 200, ECN 211, ECN 212	
D- Citizenship	6 cr.
- Two courses from the category <i>Citizenship (6 cr.)</i> HIT 211, POS 201, POS 210, POS 240, IAF 301, POS 319, POS 337	
E - Science and Technology	3 cr.
- One course from the subcategory <i>Mathematics/Statistics/Computer Science (3 cr.)</i> CSC 201, MAT 201, MAT 202, MAT 204, MAT 211, STA 202, STA 210	
OR	
- One course from the subcategory <i>Natural Sciences (3 cr.)</i> AST 201, BIO 202, BIO 203, CHM 211, ENS 201, ENS 202, ENS 206, HEA 201, NTR 201, PHS 207	
<i>Students majoring in Actuarial Science and Insurance are not allowed to count ACS courses within the pool of required GER courses.</i>

Minor in Mathematical Insurance (18 credits)

This minor introduces students to the mathematical foundation of risk assessments under an insurance context. It suits students majoring in Business, Computer Science, Mathematics, or Engineering interested in developing their understanding of future risk evaluation.

Admission Requirements

General requirements for admission to this minor are those of the University policy on Undergraduate Academic Minors. No additional requirements are needed.

Pool of Courses

ACS 310; ACS 314; ACS 324, MAT 205 or MAT 206; MAT 213; MAT 325 or MAT 326; STA 207 or STA 210.

Graduation Requirements and Suggested Schedule

To satisfy the graduation requirements of a minor in mathematical insurance, a student must pass **six courses** from the pool of courses as follows:

Students with a deficient background in mathematics can exclude ACS 324, while students with a sufficient background in mathematics can take the 3 ACS courses and 3 other math courses from the pool.

D is the passing grade for each course, and the minor should be completed with a minimum GPA of 2.0.

Undergraduate Courses: Actuarial Science and Insurance

ACS 300 Actuarial Problem Solving (1.0); 1 cr. This course is designed specifically to help students prepare to sit for the Society of Actuaries Exam P/1. Problems from previous actuarial exams and other relevant sources are tackled in class focusing on techniques and shortcuts used to enhance problem solving skills under time pressure.

ACS 310 General Insurance (3.0); 3 cr. This is a general non mathematical introduction to the major functions of insurance companies starting from their “raison d’etre” and ending with an explanation of the different coverage offered under Personal Insurance; Topics include: Types of Risk and Risk Management Methods; Objectives of Risk Management; Risk Pooling and Risk reduction through Pooling and Insurance Institutions; Cost of Risk Pooling (Insurer Insolvency, Insurer Operations and Reinsurance); Insurance Pricing (Determinants of Premium, Investment Income and Loadings); Experience Rating (Full and Partial Credibility); Estimation of outstanding claim provisions, delays in claim reporting and settlement; Chain Ladder method with and without inflation; Estimation of Incurred but not yet reported Claims (IBNR); Demand of Insurance by Individuals and by Businesses; Types of Personal Insurance (Automobile, Homeowners and life insurance and annuities) explaining for each the exposed to risk population, the pricing and underwriting cycle. *Prerequisite:* STA 210.

ACS 314 Actuarial Mathematics I (3.0); 3 cr. Introduces the basis of actuarial Mathematics. Topics include Risk Aversion and the different Utility functions; Survival distribution for future lifetime as well as curtate future lifetime random variable; Force of Mortality and its relation to the survival function; Life tables and their use in calculating probabilities of survival; Expectation of future lifetime (Complete and Curtate); Assumptions regarding Fractional ages; Special Laws of Mortality (Gompertz, Makeham, etc); Ultimate Life tables; Life Insurance payable at the moment of death (continuous) or at the end of year of death (discrete); Term Insurance; Deferred Insurance and Endowment Insurance; Varying Benefit Insurance (Increasing/Decreasing); Relation between expected present value of a benefit paid at the moment of death and that payable at the end of the year of death. *Prerequisite:* MAT 325.

ACS 320 Mathematics of Demography (3.0); 3 cr. Measures and characteristics of mortality; life tables; mortality projections; measures of morbidity. Adjusted average; difference equations and mathematical formula methods. *Prerequisite:* MAT 325.

ACS 324 Actuarial Mathematics II (3.0); 3 cr. This course assesses Life Annuities (paid in advance, in arrears or Continuous) for a whole life, term or deferred period. Annuities with Level or Varying payments done annually or monthly; Net Premium Determination through the equation of Equivalence for fully continuous, discrete and monthly payments; Apportionable premiums; Accumulation type Benefits; Net Premium Reserves (fully continuous, Discrete and semi-continuous) Prospective and Retrospective Reserves; Reserves at fractional durations; Differential Equations for fully continuous reserves. *Prerequisite:* ACS 314.

ACS 327 Risk Theory (3.0); 3 cr. Individual Risk model for the short term; Models for independent claim random variable and approximation for the distribution of the sum of multiple claims; Collective Risk Model for a Single Period; Compound Distributions and the evaluations of moments for the aggregate distribution; Collective Risk Model over an Extended Period; Surplus Process and Ruin; Claims Processes (Poisson and Compound Poisson Process); Adjustment Coefficient; Claim amount Distribution in Cases of Fire Insurance, Automobile Physical Damage Insurance, short term disability, Hospital Insurance,...etc; Stop-Loss Reinsurance Premium Determinants; Effect of Reinsurance on the Probability of Ruin. *Prerequisite:* MAT 325.

ACS 330 Insurance Law and Regulations (3.0); 3 cr. Elements of business law as it applies to insurance; government and social policy as it relates to general insurance; automobile insurance and assigned risk plans.

ACS 421 Credibility Theory and Loss Distributions (3.0); 3 cr. Estimation of future claims frequency, claim’s severity, pure premium as well as aggregate losses by associating credibility factor to previous experience; The Credibility factor is computed according to: Limited Fluctuation Credibility, Partial Credibility: Bühlmann and Bühlmann Straub Credibility. Bayesian approach to Credibility is discussed in general and through

Conjugate Prior Distributions such as Poisson-Gamma, Normal-Normal, Binomial-Beta and Exponential-Inverse Gamma mixed distributions. Non-parametric and Semi-parametric Methods in computing Credibility factor in the absence of fully defined distributions. *Prerequisite:* STA 315.

ACS 424 Pension Fund Mathematics (3.0); 3 cr. Valuation theory for pension plans; Description of benefit, Benefit calculations; Funding. Accrued Benefit Method, Projected Cost Method, Aggregate method; Introduction to gains and losses. *Prerequisite:* ACS 314; *Corequisite:* ACS 460.

ACS 430 Loss Models (3.0); 3 cr. Introduces the Modeling cycle in solving business problems. Selection of the parametric models; Estimation of the associated parameters using Method of Moments, Maximum Likelihood Estimation, Percentile matching and Bayesian Estimation; Calibration and the evaluation of the suitability of the Model using Kolmogorov-Smirnov, Anderson-Darling, Chi-Square

goodness of fit and Likelihood Ratio tests. *Prerequisite:* STA 315.

ACS 450 Investment and Asset Management (3.0); 3 cr. Financial securities and markets Efficient portfolios and efficient frontiers, The single index model; Utility analysis, The standard capital asset pricing model; Efficient markets, Interest rate theory; Options and Futures. *Prerequisite:* MAT 325.

ACS 460 Multi-life and Multi-Decrement Models (3.0); 3 cr. The joint life and last-survivor status; Insurance and annuity benefits, simple contingent functions; Insurance models including expenses; Types of expenses; Net premium and reserves. Multiple decrement models; Multiple and Associate single decrement tables; Net single Premium. *Prerequisites:* ACS 324.

ACS 480 Internship 1 cr. Assigned work at an industrial establishment. The grade will be based on employer's evaluation, written report and oral discussions. *Prerequisite:* Senior Standing.

The Degree of Bachelor of Science in Applied Statistics

The degree of BS in Applied Statistics prepares students for careers as statistical analysts and consultants, biostatisticians, pollsters, general statisticians, or teachers in:

- Engineering and operations management companies.
- Hospitals, health centers, medical and applied science laboratories.
- Academic and educational institutions.
- Testing and measurement offices.
- Industrial psychology.
- Government agencies and ministries.

Admission Requirements

For admission requirements to the degree of BS in Applied Statistics, refer to the section entitled “Undergraduate Admission” of this catalog.

Graduation Requirements

To receive the degree of BS in Applied Statistics, a student must fulfill all requirements of his/her degree program, complete all required courses, accumulate a total of 91 credits with an overall grade point average (GPA) of at least 2.0/4.0 and a minimum GPA of 2.0/4.0 in both the major and core requirements, and clear all accounts with the university. Candidates for degrees are reminded that grades of “I” assigned during the last semester to courses required for graduation will result in delaying of graduation.

Degree Requirements (90 credits)

General Education Requirements

30 cr.

A - Communication Skills in English and Arabic

9 cr.

- Two courses from the subcategory *English (6 cr.)*

ENL 213 And

ENL 223 Or ENL 230

- One course from the subcategory *Arabic (3cr.)*

ARB211, ARB 212, ARB 224, ARB 231, ARB 317

B – Philosophy and Religion

6 cr.

- One course from the subcategory *Religion (3cr.)*

REG 212, REG 213, REG 313, REG 314

- One course from the subcategory *Philosophy (3cr.)*

ENS 205, PHL 211, PHL 311, POS 345

C - Cultural Studies and Social Sciences

6 cr.

- Two courses from the category *Cultural Studies and Social Sciences (6 cr.)*

HUT 305, HUT 306, MUS 210, FAP 215, COA 359, COA 315, NTR 215, ARP

215, PSL 201, SOL 201, SOL 301, BAD 201, ECN 200, ECN 211, ECN 212

D - Citizenship

6 cr.

- Two courses from the category *Citizenship (6 cr.)*

HIT 211, POS 201, POS 210, POS 240, IAF 301, POS 319, POS 337

E - Science and Technology

3 cr.

- One course from the subcategory *Mathematics/Statistics/Computer Science (3 cr.)*

CSC 201, MAT 201, MAT 202, MAT 204, MAT 211, STA 202, STA 210

OR

- One course from the subcategory *Natural Sciences (3 cr.)*

AST 201, BIO 202, BIO 203, CHM 211, ENS 201, ENS 202, ENS 206, HEA 201, NTR 201, PHS 207

Students majoring in Applied Statistics are not allowed to count STA courses within the pool of required GER courses.

Core Requirements

18 cr.

MAT 213, MAT 215, MAT 224, STA 210, ECN 211, ECN 212.

Major Requirements

36 cr.

MAT 315, MAT 325, MAT 330, STA 305, STA 312, STA 315, STA 325, STA 354, STA 360, STA 415, STA 450, STA 490.

Free Electives

6 cr.

**Bachelor of Science in Applied Statistics
Suggested Program (90 Credits)**

Fall Semester I (15 Credits)

CSC	201	Computers and Their Use (GER)	3 cr.
ECN	211	Principles of Microeconomics	3 cr.
ENL	213	Sophomore English Rhetoric (GER)	3 cr.
MAT	213	Calculus III	3 cr.
STA	210	Statistics for Business and Economics	3 cr.

Spring Semester I (15 Credits)

ECN	212	Principles of Macroeconomics	3 cr.
MAT	215	Linear Algebra I	3 cr.
ENL	230	English in the Workplace (GER)	3 cr.
MAT	224	Calculus IV	3 cr.

STA	490	Senior Project	3 cr.
—	—	GER	3 cr.

Minor in Applied Statistics (18 credits)

This minor develops the statistical tools applicable to most fields of studies such as Engineering, Business, or Computer Science. Depending on the choice of courses from the pool provided, the student can enhance his understanding of time series, stochastic processes, multiple regressions, all of which provide applied tools useful in the fields of finance, industrial quality control, optimization as well as statistical decision making.

Admission Requirements

General requirements for admission to this minor are those of the University policy on Undergraduate Academic Minors. No additional requirements are needed.

Pool of Courses

MAT 213; MAT 325 or MAT 326; STA 207 or STA 210; STA 312; STA 315; STA 370

Graduation Requirements and Suggested Schedule

To satisfy the graduation requirements of a minor in applied statistics, a student must pass **six courses** from the pool of courses as follows:

- First semester (2 courses; 6 credits)
MAT 213; STA 207 or STA 210
- Second semester (2 courses; 6 credits)
STA 312; MAT 325 or MAT 326
- Third semester (2 courses; 6 credits)
STA 315; STA 370

D is the passing grade for each course, and the minor should be completed with a minimum GPA of 2.0.

Undergraduate Courses: Statistics

STA 201 Statistics for Social Sciences (3.0); 3 cr. Topics include: Frequency distribution; measures of central tendency; measures of dispersion; quartiles and percentiles, laws of probability, sampling distributions, estimation, testing hypothesis and chi-square distribution. A statistical software package will be used. *Prerequisite:* Sophomore Standing.

STA 202 Statistics for Humanities (3.0); 3 cr. This course is designed to introduce students of the humanities to the most important basic statistical techniques used in their field of research, and to the SPSS software package. The course material covers data collection, organization and graphing; describing distributions: scores, central tendency, and variation; sampling and probability distributions; estimation and hypothesis testing; chi-square test; correlation; analysis of variance. The associated computer lab sessions allow the students to apply the methods learned to data sets and interpret findings.

STA 203 Biostatistics (3.0); 3 cr. Converse the fundamental principles of statistics as they apply to biological problems, including statistical inference, analysis of variance, and correlation regression. A software package will be used. *Prerequisite:* Sophomore Standing.

STA 204 Epidemiology for Nursing (3.0); 3 cr. Important epidemiological principles and methods. Causation and distribution of diseases. *Corequisite:* STA 203.

STA 206 Applied Statistics for Business and Economics I (3.0); 3 cr. Descriptive statistics; measures of central tendency and dispersion; introduction to probability; conditional probability; independence; random variables; discrete probability distributions. A statistical software package will be used. *Prerequisite:* Sophomore Standing.

STA 207 Applied Statistics for Business and Economics II (3.0); 3 cr. Sampling distributions; inferences about a population mean, proportion and variances; experimental design; analysis of variance and covariance; linear regression and correlation. A statistical software package will be used. *Prerequisite:* STA 206.

STA 209 Applied Statistics (3.0); 3 cr. Frequency distribution; measures of central tendency and dispersion; probability laws;

random variables; sampling and estimations. A statistical software package will be used. *Prerequisite:* Sophomore Standing.

STA 210 Statistics for Business and Economics (3.0); 3 cr. Descriptive statistics; measures of central tendency and dispersion, probability laws; random variables, sampling distributions; estimation; hypothesis testing simple linear regression; analysis of variance and chi-square. A statistical software package will be used. *Prerequisite:* Sophomore Standing.

STA 303 Statistical Inference (3.0); 3 cr. Logic of statistical inference; sampling distributions; point and interval estimations hypothesis testing; correlation; regression. *Prerequisite:* STA 210.

STA 305 Sampling Theory (3.0); 3 cr. Topics include: selection of sampling unit; determination of sample size; random and stratified sampling; purposive selection; sub-sampling and sampling clusters; sampling from finite universe. *Prerequisite:* STA 210.

STA 312 Introductory Time Series Analysis (3.0); 3 cr. Introduces the basic concepts of regression analysis starting with two variable models then proceeds to three variable and multi-variable regression models. Thorough discussion of: The assumptions underlying linear regression models; Diagnostic tests, and correction methods for heteroscedasticity, multicollinearity and serial correlations. The second part of the course introduces deterministic and stochastic time series models and discusses: Basic smoothing and extrapolation techniques; Autocorrelation Function (ACF) and Partial Autocorrelation Function (PACF) for the different models; Stationarity, nonstationarity and Invertibility conditions; Model specification, Parameter estimation and forecasting for the different stationary time series models AR (p), MA (q), ARMA (p, q), and the homogenous non-stationary models of order d ARIMA. *Prerequisite:* STA 210.

STA 315 Mathematical Statistics (3.0); 3 cr. Sampling; estimation; hypothesis testing; t-distribution; chi-square distribution; F-distribution; linear regression and correlation. Analysis of variance and covariance; multiple regression. *Prerequisite:* MAT 325.

STA 325 Design of Experiments (3.0); 3 cr. Single-factor experiments, randomized blocks, Latin squares, factorial and fractional experiments, surface fitting design. *Prerequisite:* STA 210.

STA 330 Probability Models (3.0); 3cr. Conditional probability and conditional expectation, discrete and continuous Markov chains, the Exponential distribution and Poisson process, queuing theory and reliability theory. *Prerequisite:* MAT 325.

STA 354 Applied Regression Analysis (3.0); 3 cr. An applied introduction to Linear and Multiple Regression Models; Testing of Hypothesis in Multiple Regression; Multiple, Partial and Multiple Partial Correlation; Confounding and Interaction in Regression; Regression Diagnostics; Dummy Variables in Regression and selection of the Best Regression Equation. The course stresses the knowledge of how to develop a regression model and how to interpret the output by statistical packages without resorting to rigorous mathematical development. *Prerequisite:* STA 315.

STA 360 Applied Multivariate Statistical Analysis (3 cr.); 3 cr. Multivariate analysis, matrix algebra and random vectors, random sampling; The multivariate normal distribution,

inferences about multivariate means and linear models, comparisons of several multivariate means, and multivariate linear regression. *Prerequisite:* STA 315.

STA 370 Stochastic Processes (3 cr.); 3 cr. This course introduces the basic probabilistic methods of stochastic processes. Topics include: Markov Chains; Exponential distribution and Poisson Process; Continuous – time Markov Chains; Renewal Theory and its application; Brownian Motion and Stationary Processes.

STA 415 Statistical Quality Control (3 cr.); 3cr. Methods and philosophy of statistical control; charts; for variables and for attributes, cumulative and exponentially weighted moving average control charts. Other statistical process techniques; Process capability analysis. *Prerequisite:* STA 315.

STA 450 Topics in Applied Statistics (3.0); 3 cr. Multivariate distributions; regression analysis; non-parametric statistics; sequential analysis; decision theory; *Prerequisite:* STA 303.

STA 490 Senior Project 3 cr. Assigned project supervised by a faculty member. The grade will be based on project evaluation and individual oral presentation. *Prerequisite:* Senior Standing.

Graduate Courses: Statistics

STA 500 Applied Statistics for Business and Economics (3.0); 3 cr. The course covers the following main topics: Introduction to Statistics and Probability, discrete and continuous random variables; Sampling distribution; Testing hypothesis and estimation; Analysis of variance; Simple and multiple regression; And time-series analysis. The course also applies these concepts and Techniques to actual real world business and economic situations.

STA 614 Advanced Statistical Methods for Business Decisions (3.0); 3 cr. This course develops an analytical approach to risk in management decisions. Topics include decision analysis; correlation and multiple regression; discriminant; judgment; canonical; cluster and factor analysis.

STA 653 Stochastic Processes (3.0); 3 cr. Poisson processes: waiting time distributions, non-homogeneous Poisson processes. Renewal theory: Wald's equation; Renewal reward processes. Discrete Markov chains:

classification of states; Limit theorems. Continuous-time Markov chains: limiting probabilities; Birth and death processes. Martingales: stopping times; Martingale convergence theorem; Azuma's inequality. Brownian motion: hitting times; Backward and forward diffusion equations. *Prerequisite:* MAT 325.

STA 654 Methods of Multivariate Analysis (3.0); 3 cr. Least Square and multiple regression analysis; Canonical correlation Principle component analysis, Hotelling's T^2 procedures; Multivariate analysis of variance; Discriminant analysis; Cluster analysis. *Prerequisite:* STA 315.

STA 663 Time Series Analysis (3.0); 3 cr. Topics include stationary models and autocorrelation function; Estimation and elimination of trend and seasonal components; Stationary processes: properties, ARMA processes, estimation of mean and autocorrelation function; forecasting stationary

time series; Spectral analysis; Non-stationary and seasonal time series models: ARIMA models, forecasting ARIMA models, seasonal ARIMA models. Applications using real and simulated data. *Prerequisite:* STA 315 or equivalent.

STA 664 Probability and Statistical Inference (3.0); 3 cr. Functions of random variables and sampling distribution: normal distribution, t-distribution, chi-square distribution, F-distribution. Stochastic convergence: convergence in probability; Convergence in

distribution; The central limit theorem. Point estimation: properties of estimators; Finding estimators; Rao-Blackwell theorem; Cramer-Rao inequality. Confidence interval estimation: one population and two populations. Hypothesis testing theory: power function, Neyman-Pearson lemma, likelihood ratio test. Applications: Testing various unknown parameters of one population and several populations. Bayesian methods: prior and posterior distributions, credible intervals. *Prerequisite:* MAT 325.

The Degree of Bachelor of Science in Mathematics

The Department of Mathematics and Statistics offers a BS program in Mathematics with the following emphasis: Pure Mathematics, Computational Mathematics and Mathematics Education.

The degree of BS in Mathematics prepares students for careers in:

- Academic and educational institutions.
- Computer firms.
- Engineering industry.
- Government laboratories.
- Business and management corporations.
- Research centers.

Admission Requirements

For admission requirements to the degree of BS in Mathematics, refer to the section entitled “Undergraduate Admission” of this catalog.

Graduation Requirements

To receive the degree of BS in Mathematics, a student must fulfill all requirements of his/her degree program, complete all required courses, accumulate a total of 103 credits with an overall grade point average (GPA) of at least 2.0/4.0 and a minimum GPA of 2.0/4.0 in both the core and major requirements, and clear all accounts with the university. Candidates for degrees are reminded that grades of “I” assigned during the last semester to courses required for graduation will result in delaying of graduation. The student can choose one out of the three possible concentrations within the B.S. in Mathematics:

Degree Requirements (103 credits)

General Education Requirements	33 cr.
A - Communication Skills in English and Arabic	9 cr.
- Two courses from the subcategory <i>English</i> (6 cr.)	
ENL 213 And	
ENL 223 Or ENL 230	
- One course from the subcategory <i>Arabic</i> (3cr.)

NTR 201, PHS 207

Students majoring in Mathematics are not allowed to count MAT courses within the pool of required GER courses.

Core Requirements **22 cr.**

Twenty two credits: CSC 212, CSC 213, MAT 211, MAT 213, MAT 215, MAT 220, MAT 224, MAT 235.

Major Requirements (for the pure mathematics concentration) **42 cr.**

1. Required courses: 18 credits

MAT 325, MAT 333, MAT 411, MAT 412, MAT 413, MAT 423.

2. Twenty four credits to be chosen from the following set:

MAT 305, MAT 312, MAT 335, MAT 339, MAT 400, MAT 418, MAT 421, MAT 430, MAT 431, MAT 460, STA 315, STA 370, CSC 311, CSC 313, CSC 325.

Free Elective **6 cr.**

Six credits with the approval of the advisor.

Major Requirements (for the computational mathematics concentration) **42 cr.**

1. Required courses: 27 credits: MAT 325, MAT 333, MAT 411, MAT 412, MAT 413, MAT 423, CSC 311, CSC 313, CSC 325.

2. Six credits to be chosen from the following set: MAT 305, MAT 312, MAT 335, MAT 339, MAT 400, MAT 418, MAT 421, MAT 430, MAT 431, MAT 460, STA 315

3. Nine credits to be chosen from the following set: CSC 222, CSC 312, CSC 415, CSC 425, CSC 426, CSC 432

Free Elective **6 cr.**

Major Requirements (for the mathematics education concentration) **42 cr.**

1. Required courses: 21 credits

MAT 325, MAT 333, MAT 337, MAT 411, MAT 412, MAT 413, MAT 423

2. Six credits to be chosen from the following set:

MAT 305, MAT 312, MAT 335, MAT 339, MAT 400, MAT 418, MAT 421, MAT 430, MAT 431, MAT 460, STA 315.

3. Required courses in education: 15 credits

EDU 313, EDU 343, EDU 352, EDU 432, EDU 462.

Free Elective **6 cr.**

MAT	413	Introduction to Real Analysis I	3 cr.
—	—	Elective (major requirement)	3 cr.
—	—	Free Elective	3 cr.
—	—	GER	3 cr.

Spring Semester III (15 Credits)

—	—	Elective (major requirement)	3 cr.
MAT	423	Introduction to Real Analysis II	3 cr.
—	—	Free Elective	3 cr.
—	—	GER	3 cr.
—	—	GER	3 cr.

Bachelor of Science in Mathematics
Mathematics Education Emphasis - Suggested Program (103 Credits)

Fall Semester I (15 Credits)

		GER	3 cr.
MAT	211	Discrete Mathematics	3 cr.
MAT	213	Calculus III	3 cr.
MAT	215	Linear Algebra I	3 cr.
ENL	213	Sophomore English Rhetoric (GER)	3 cr.

Spring Semester I (15 Credits)

CSC	212	Program Design and Data Abstraction	3 cr.
MAT	224	Calculus VI	3 cr.
MAT	235	Ordinary Differential Equations	3 cr.
EDU	313	Psychology of Education: Learning	3 cr.
—	—	GER	3 cr.

Summer Session I (7 Credits)

		GER	3 cr.
ARB	211 /	GER	3 cr.
	231		
MAT	220	Introduction to Mathematical Software Packages	1 cr.

Fall Semester II (15 Credits)

CSC	213	Program Design and Data Abstraction II	3 cr.
MAT	412	Topology I	3 cr.
EDU	343	Classroom Management	3 cr.
MAT	325	Elements of Probability	3 cr.
REG	212 /	GER	3 cr.
	213		

Spring Semester II (15 Credits)

MAT	337	Foundations of Geometry	3 cr.
MAT	333	Complex Variables	3 cr.
EDU	352	Methods of Teaching Mathematics	3 cr.
—	—	GER	3 cr.
—	—	GER	3 cr.

Summer Session II (6 Credits)

EDU	432	Tests, Measurement and Evaluation in Mathematics	3 cr.
—	—	Elective (major requirement)	3 cr.

Fall Semester III (15 Credits)

MAT	411	Group Theory	3 cr.
MAT	413	Introduction to Real Analysis I	3 cr.
EDU	462	Mathematics Teaching Practicum I	3 cr.
—	—	Free Elective	3 cr.
—	—	GER	3 cr.

Spring Semester III (15 Credits)

		Elective (major requirement)	3 cr.
MAT	423	Advanced Calculus II	3 cr.
—	—	Free Elective	3 cr.
—	—	GER	3 cr.
—	—	GER	3 cr.

Minor in Mathematics (15 credits)

This minor is intended primarily for students in fields of study that require strong mathematical skills such as Engineering, Computer Science and Physics. Dependent on the choice of courses, the student can, for instance, enhance his understanding in the areas of real and complex analysis, algebra, and/or numerical analysis.

Admission Requirements

General requirements for admission to this minor are those of the University policy on Undergraduate Academic Minors. No additional requirements are needed.

Pool of Courses

MAT 215; MAT 224; MAT 235; MAT 305; MAT 324; MAT 326 or MAT 325; MAT 333; MAT 335; MAT 339; MAT 411; MAT 412; MAT 418

Graduation Requirements and Suggested Schedule

To satisfy the requirements of a minor in mathematics, a student must pass **five courses** from the pool of courses as follows:

- First semester (2 courses; 6 credits)
MAT 224; MAT 215 or MAT 235
- Second semester (2 courses; 6 credits)
Choose two courses from the pool: MAT 325 or MAT 326; MAT 305; MAT 324 or MAT 333; MAT 335; MAT 339
- Third semester (1 course; 3 credits)
Choose one course from the pool: MAT 411; MAT 412; MAT 418

D is the passing grade for each course, and the minor should be completed with a GPA of 2.0.

Undergraduate Courses: Mathematics

MAT 101 Pre-Calculus (3.0); 3 cr. Integer exponents, scientific notation, measurements, polynomials equations, factoring, rational equations; complex numbers; quadratic equations and inequalities, roots and radicals, rational exponents; radical equations. *Prerequisite:* Placement or Freshman Standing.

MAT 105 Principles of Calculus (3.0); 3 cr. Coordinate systems; lines in the plane, functions and graphs. Limits and continuity. Differentiation. Variation and concavity, maxima and minima, graphing. Exponential and logarithmic functions. Antiderivatives. Definite and indefinite integrals. *Prerequisite:* Placement or Freshman Standing.

MAT 111 Calculus and Analytic Geometry I (3.0); 3 cr. Functions and graphs, Rate of change, graphing, limit and continuity. Derivatives; differentiation rules. Applications of derivatives; maximum, minimum, the mean value theorem, L'Hôpital's rule. *Prerequisite:* Placement or Freshman Standing.

MAT 112 Calculus and Analytic Geometry II (3.0); 3 cr. Integration; applications of definite integrals; areas, volumes, length, moments. Transcendental functions; Inverse functions and their derivatives, hyperbolic functions and their derivatives, Techniques of integration. *Prerequisite:* MAT 111 or Placement.

MAT 113 Intensive Calculus (3.0); 3 cr. The course covers rapidly and thoroughly the main concepts in single variable calculus. It covers the concepts of limits and continuity; differentiation: differentiation rules, chain rule, implicit differentiation, related rates, extreme values of functions, Mean-Value Theorem, curve sketching, L'Hopital's rule; Integration: definite integral, Fundamental Theorem of Calculus, area between curves, volumes of rotation; transcendental functions; techniques of integration: integration by parts, trigonometric integrals and substitutions, integration of rational functions. *Prerequisite:* Placement or Freshman Standing.

MAT 201 Fundamentals of Mathematics (3.0); 3 cr. Sets; the real number system; absolute value and its properties; exponents and radicals; polynomials, applied linear equations and inequalities; Cartesian product; coordinate axes; graphs, and functions. *Prerequisite:* Sophomore Standing or Placement.

MAT 202 Mathematics for Arts (3.0); 3 cr. Principles of coordinate geometry; symmetry of motion; rigid motions; reflections; rotations; translation; glide reflections; classifying patterns; symmetry of scale and fractals. *Prerequisite:* Sophomore Standing.

MAT 204 Mathematics for Business and Economics I (3.0); 3 cr. This course is designed to introduce topics in calculus and matrix analysis with applications to business, management, economics and social science. *Prerequisite:* Sophomore Standing.

MAT 205 Mathematics for Business and Economics II (3.0); 3 cr. Sequences; arithmetic and geometric progression. Simple interest; compound interest. Continuous compounding; annuities; amortization and sinking funds. Bonds and stocks. Capital budgeting and depreciation. *Prerequisite:* Sophomore Standing. Accumulation and discounting, simple and compound interest, effective and nominal interest, discount rates, forces of interest and discount, varying interest. Equations of value. Annuities immediate and due. Perpetuities. Amortization schedules and sinking funds. Introduction to bonds. *Prerequisite:* Sophomore Standing.

MAT 206 Financial Mathematics (3.0); 3 cr. This course describes the fundamental concepts of financial mathematics and how these values are applied in calculating the present and accumulated values of various streams of cash flows as a basis for future use in: reserving, valuation, pricing, asset/liability management, investment income, capital budgeting and valuing contingent cash flows. Also the course introduces financial instruments such as derivatives and the concept of no-arbitrage. *Prerequisite:* Sophomore Standing.

MAT 211 Discrete Mathematics (3.0); 3 cr. Arithmetic in different bases; set theory; relations and functions; mathematical reasoning and induction; counting techniques; permutations and combinations; logic; Boolean algebra; and lattice theory. *Prerequisite:* Sophomore Standing.

MAT 213 Calculus III (3.0); 3 cr. Improper integrals. Infinite sequences and series, power series. Taylor and Maclaurin series. Polar coordinates: graphing, integration and areas in polar coordinates. Vectors and vector-valued

functions and motion in space. *Prerequisite:* MAT 112 or MAT 113 or Placement.

MAT 214 Applied Linear Algebra (3.0); 3 cr. An introduction to basic ideas and techniques of Linear Algebra for sophomore students. The course covers Linear systems Matrices, Determinants, Eigen values and Eigen vectors. Each of these topics is followed by one or more applications. *Prerequisite:* Sophomore Standing.

MAT 215 Linear Algebra I (3.0); 3 cr. Linear systems and matrices and their applications; determinants; vector spaces; subspaces, basis and dimension, rank and nullity. Eigenvalues and eigenvectors; linear transformations and their algebraic properties. *Prerequisite:* Sophomore Standing.

MAT 220 Introduction to Mathematical Software Packages (1.0); 1 cr. The course introduces commercial software packages, such as Matlab, Maple, Mathematica and Derive, for numerical computations and symbolic manipulations. *Prerequisite:* Sophomore standing.

MAT 224 Calculus IV (3.0); 3 cr. Cylinders and quadric surfaces. Functions of several variables: limits, continuity, partial derivatives, Chain Rule, directional derivatives, gradients, tangent planes, differentials, extreme values, and Lagrange multipliers. Multiple integrals: areas and volumes, triple integrals in rectangular, cylindrical and spherical coordinates. Integration in vector fields, Green's Theorem in the plane, Stoke's Theorem, the Divergence Theorem. *Prerequisite:* MAT 213

MAT 225 Vector Calculus (3.0); 3 cr. This course introduces vectors in Cartesian and curvilinear coordinate systems, the graphs and gradient of a real valued function, paths are length and vector fields, geometry of maps, double and triple integrals, line and surface integrals, and projective geometry, *Prerequisite:* MAT 213.

MAT 235 Ordinary Differential Equations (3.0); 3 cr. First-order ordinary differential equations. Higher-order linear differential equations. Power series solution: ordinary and singular points. Laplace transform, convolution. Systems of linear differential equations. *Prerequisite:* MAT 213.

MAT 303 Mathematical Logic and Set Theory (3.0); 3 cr. Axiomatic theory of sets; the axiom of choice; propositional logic;

quantification theory; formal construction of the sets \mathbb{N} ; \mathbb{Z} ; \mathbb{Q} ; \mathbb{R} ; and \mathbb{C} . Cardinal numbers and their arithmetic; ordinal numbers and transfinite induction. *Prerequisite:* MAT 211.

MAT 305 Number Theory (3.0); 3 cr. Foundations of arithmetic; properties of integers and prime numbers; unique factorization; congruence; Diophantine equations; theorems of Fermat; Euler; and Wilson; quadratic reciprocity. *Prerequisite:* MAT 211.

MAT 312 Graph Theory 3 cr. Basic concepts of graph theory, the use of paths and cycles in some applied algorithms such as the traveling salesman problem, the use of trees in computing and computer networks, planarity of graph and its use in coloring problem, the directed graph with applications on the marriage problem, the Latin squares and network flows. *Prerequisite:* MAT 211.

MAT 315 Linear Algebra II (3.0); 3 cr. Inner product spaces, orthonormal spaces, orthogonal matrices, change of basis. Eigenvalues, orthogonal diagonalization. Applications. General linear transformations. Inverse of and matrix of a linear transformation, similarity. *Prerequisite:* MAT 215.

MAT 323 Vector and Tensor Analysis (3.0); 3 cr. Cartesian and curvilinear coordinate systems. Line integrals; Green's theorem; the divergence theorem; and Stock's theorem. Curl and divergence. Introduction to tensor analysis and its applications. *Prerequisite:* MAT 224.

MAT 324 Mathematics for Engineering (3.0); 3 cr. Functions of a complex variable, Cauchy-Riemann equations; integration in the complex plane; series and residues, evaluation of real integrals. *Prerequisite:* MAT 224.

MAT 325 Elements of Probability (3.0); 3 cr. Probability of events; axioms of probability; conditioning and independence; random variable and expectations; discrete and continuous distributions; moment generating functions; the Central Limit Theorem. *Corequisite:* MAT 224.

MAT 326 Probability & Statistics For Engineers (3.0); 3 cr. Concepts of probability, random variables, mathematical expectation, variance, confidence intervals. Estimation, testing of statistical hypotheses, regression and correlation, analysis of variance. *Corequisite:* MAT 224.

MAT 333 Complex Variables (3.0); 3 cr. Analytic functions; derivatives; Cauchy-Reimann equations; complex integration; Cauchy integral theorem; power series; Laurent series; residue theorem; conformal mapping; Cauchy-Christoffel transformation. *Prerequisite:* MAT 224.

MAT 335 Partial Differential Equations (3.0); 3 cr. Second order linear partial differential equations – heat, wave and Laplace’s equations; Fourier series; separation of variables; Fourier Integral; Fourier and Laplace transforms; Dirichlet and Neumann problems for different domains; first order equations; characteristic method; systems of equations. *Prerequisite:* MAT 224, MAT 235.

MAT 336 Numerical Methods for Finance (3.0); 3 cr. Basics of financial theory; basics of numerical analysis; numerical integration, deterministic and Monte-Carlo methods; finite difference methods for partial differential equations.

MAT 337 Foundations of Geometry (3.0); 3 cr. Introduces the axiomatic method, Euclidean and non-Euclidean geometries; historical developments in geometry. This course is primarily designed for students interested in mathematics education. *Prerequisite:* MAT 215, MAT 224.

MAT 339 Numerical Analysis (3.0); 3 cr. Error analysis; roots for non-linear equations; polynomial interpolation; approximation of functions by polynomials; numerical differentiation and integration. *Prerequisite:* MAT 224 and a Computer Programming Language.

MAT 340 Game Theory (3.0); 3 cr. Introduction to zero-sum games - normal and extensive forms; Minimax theorem; Solution by Graphical and linear programming techniques, dominance; infinite continuous and discrete games; convex-concave games; introduction to non-zero sum games. *Prerequisite:* MAT 211.

MAT 400 Elementary Differential Geometry (3.0); 3 cr. The main purpose of this course is the study of curves and surfaces in three-dimensional Euclidean space: Tangent space, vector fields, Gauss map, geodesics, curvature, minimal surfaces, the Gauss-Bonnet Theorem, and an introduction to smooth manifolds. *Prerequisite:* MAT 224.

MAT 411 Group Theory (3.0); 3 cr. Groups; permutation groups; finite abelian groups; the Sylow theorems and their applications. *Prerequisite:* Senior standing.

MAT 412 Topology I (3.0); 3 cr. This course covers review of set theory and logic, metric spaces, topological spaces, connectedness and compactness. *Prerequisite:* MAT 211 and Senior Standing.

MAT 413 Introduction to Real Analysis I (3.0); 3 cr. The topological properties of the real number system; uniform continuity; Weierstrass approximation theorem; Riemann-Stieltjes integral; uniform convergence; improper integrals with a parameter; the Beta and Gamma functions. *Corequisite:* MAT 412 and Senior Standing.

MAT 418 Numerical Linear Algebra (3.0); 3 cr. The course presents mathematical algorithms and analysis to solve linear systems of equations and matrix eigenvalue problems. Matrix norms and analysis. Direct and iterative methods: including factorization methods, singular value decomposition, Jacobi and Gauss-Seidel iteration, power methods, QR algorithm. Operation counts, condition numbers and error analysis. *Prerequisite:* MAT 215, MAT 224, and a Programming language.

MAT 421 Rings and Fields (3.0); 3 cr. Rings; ideals; quotient rings; Euclidean rings; polynomial rings; field extensions; automorphism of fields; separable and normal extensions; finite fields; Galois theory.. *Prerequisite:* MAT 411 and senior standing.

MAT 423 Introduction to Real Analysis II (3.0); 3 cr. Jacobian’s of transformations; functional dependence; transformations of multiple integrals; extremal problems of functions of several variables; integrals over curves and surfaces; differential forms; independence of path; exact differential forms. *Prerequisite:* MAT 413.

MAT 430 Topology II (3.0); 3 cr. This course is a continuation of Topology I, it introduces countability and separation axioms, completely regular spaces, Complete metric spaces, the fundamental groups and covering spaces. *Prerequisite:* MAT 412.

MAT 431 Vector Spaces and Modules (3.0); 3 cr. Vector spaces and modules; homomorphisms; groups, rings, and modules of matrices; exact sequences; direct sum

decompositions; dual spaces; canonical forms; multilinear algebra. *Prerequisite:* MAT 411.

MAT 450 Introduction to General Topology (3.0); 3 cr. Topological spaces; metric spaces; compactness and connectedness; continuity; product and quotient spaces; function spaces; separation and countability axioms; normal and

completely regular spaces. *Prerequisite:* Senior Standing.

MAT 460 Selected Topics in Mathematics (3.0); 3 cr. Students study selected contemporary topics in Mathematics. *Prerequisite:* Specified when Offered.

Our Graduate Program

The department of mathematics and statistics offers a Master of Science degree in Mathematics with a possible track either on pure mathematics or applied mathematics depending on the choice of courses by student.. The purpose of the MS program is to prepare students for continued advanced study of mathematics, college teaching, or certain jobs requiring an in- depth understanding of mathematics.

The Degree of Master of Science in Mathematics

Admission Requirements

In addition to the university graduate admission requirements, candidates are expected to have a sufficient background in mathematics. Those who do not meet these requirements may be given provisional admission pending satisfactory completion of a set of undergraduate courses. The credits earned for these courses will not be counted towards the 33 credits required for the degree of Master of Science in Mathematics.

Graduation Requirements

To satisfy the requirements for the degree of Master of Science in Mathematics, the student must complete a total of 33 credits with an overall average of at least 3.0/4.0.

Tracks Offered

The department offers two tracks: One in pure mathematics and one in applied mathematics. Within each track students have also a choice to pursue a course work option or a thesis option.

Degree Requirements Pure Mathematics Emphasis (33 credits)

Core courses

Course work and Thesis option

MAT 621, MAT 623, MAT 625, MAT 632, MAT 634, MAT 636

18 cr.

Course work option

MAT 681

3 cr.

Elective Courses

12 cr.

Course work option: 12 credits to be chosen from the following pool

Thesis option: 9 credits to be chosen from the following pool

MAT 635, MAT 641, MAT 642, MAT 645, MAT 655, MAT 657, MAT 659,
MAT 664, MAT 671, MAT 673

Comprehensive written examination for course-work option

Pass three Comprehensive Written Examinations (CWE1, CWE2 and CWE3) after having completed at least 18 credits with an overall GPA of 3.0/4.0

CWE1 is an exam in MAT 621.

CWE2 is an exam in MAT 623.

CWE3 is an exam either in a one-year-sequence of two graduate courses (the sequence is to be freely chosen by the student), or in the complementary courses of MAT 621 and MAT 623, which are MAT 632 and MAT 634. Those who fail any CWE are allowed to retake it, but no later than the end of the following academic year.

Thesis courses for thesis option

Two “thesis courses” MAT 691 and MAT 692

6 cr.

**Degree Requirements
Applied Mathematics Emphasis
(33 credits)**

Core courses

Course work and Thesis option

21 cr.

MAT 621, MAT 623, MAT 625, MAT 641, MAT 642, MAT 667, MAT 668,

Course work option

3 cr.

MAT 681

Elective Courses

Course work option: 9 credits to be chosen from the following pool

Thesis option: 6 credits to be chosen from the following pool

9 credits to be chosen from the following pool:

9 cr.

MAT 600, MAT 601, MAT 634, MAT 635, MAT 645, MAT 661, MAT 662,
MAT 664, MAT 669, MAT 683, STA 500, STA 614, STA 653, STA 654, STA
663, STA 664

Comprehensive written examination for course work option

**Pass three Comprehensive Written Examinations (CWE1, CWE2 and
CWE3) after having completed at least 18 credits with an overall average of
3.0/4.0**

CWE1 is an exam in MAT 621.

CWE2 is an exam in MAT 623.

CWE3 is an exam in a one-year-sequence of two graduate courses. (The
sequence is to be freely chosen by the student). Those who fail any CWE are
allowed to retake it, but no later than the end of the following academic year.

Thesis courses for thesis option

Two “thesis courses” MAT 691 and MAT 692

6 cr.

Regulations concerning the “thesis courses” of the Master of Science in Mathematics

Master Thesis

Students may register for the thesis courses MAT 691 & MAT 692 upon the completion of at least 18 credits with an overall average of at least 3.3/4.0 and after receiving the approval of both the department chairperson and the thesis advisor.

Duration of Work

The work for the thesis is expected to be completed within a period of two semesters.

Jury for the Oral Defense

After receiving a written note of completion along with five bound copies of the master thesis from the master thesis advisor, the department chairperson shall appoint the jury for the oral defense and its chairperson, and shall distribute to each member one copy of the master thesis. The jury shall consist of the master thesis advisor and three full-time faculty members one of whom is from outside the department.

Schedule for the Oral Defense

The oral defense for the master thesis shall be scheduled by the jury chairperson one month from the date of the appointment of the jury at the latest.

Evaluation and Grade

Bound master thesis copies are required for the evaluation. The jury shall evaluate the work for the master thesis and assign the appropriate grade by a majority vote. In case of a tie, the committee chairperson shall have the casting vote.

Final Copy of the Master Thesis

The student shall submit seven bound copies of the approved final copy of the master thesis to the jury chairperson who, in turn, shall distribute them to the Library, Faculty, Department, and to each member of the jury.

Graduate Courses: Mathematics

MAT 600 Graph Theory (3.0); 3 cr. Graphs; subgraphs; connectivity; trees; Hamilton graphs; matchings; coverings; coloring; Ramsey graph theory; connectedness in digraphs. Euler and Hamilton graphs; networks. *Prerequisite:* Graduate Standing.

MAT 601 Optimization Theory (3.0); 3 cr. The course deals with the mathematical theory and algorithms for optimization. Convex functions and sets; Unconstrained optimization: steepest descent, Newton, gradient methods, search methods, least squares; Constrained optimization theory: Kuhn-Tucker conditions; linear programming, quadratic programming, nonlinear programming, penalty methods. Some applications are also considered. *Prerequisite:* Graduate Standing.

MAT 621 Algebra I (3.0); 3 cr. Free Abelian groups; finitely generated Abelian groups; the action of a group on a set; the Sylow theorems; nilpotent and solvable groups. Rings and localization; polynomial rings and factorization. *Prerequisite:* Graduate Standing.

MAT 623 Real Analysis I (3.0); 3 cr. Measure spaces; Borel and Lebesgue measure; abstract integration and differentiation; integration on product spaces; functions of bounded variations; L spaces. *Prerequisite:* Graduate Standing.

MAT 625 General Topology (3.0); 3 cr. Topological spaces; the metric topology; connected spaces; compact spaces; Homotopy of paths; the Fundamental groups; Cospaces; essential and inessential maps. *Prerequisite:* Graduate Standing.

MAT 632 Algebra II (3.0); 3 cr. Basic properties of rings. Ideals and quotient rings. Ring Homeomorphisms. Polynomial rings. Left and right modules. Free modules. Direct sums of modules. Finitely generated modules over a p.i.d. Artinian and Noetherian modules. Completely reducible modules. Tensor product of modules. Bimodules. Algebras and coalgebras. Projective and injective modules. Primitive and semi-primitive rings. The radical of a ring. *Prerequisite:* MAT 621.

MAT 634 Complex Analysis (3.0); 3 cr. Power series representation; conformal mappings; zeros of holomorphic functions; analytic continuation; normal families; HP spaces. *Prerequisite:* MAT 623.

MAT 635 Harmonic Analysis & Potential Theory (3.0); 3 cr. Harmonic and subharmonic functions. Convexity. Elements of potential Theory. Thinness. Harmonic measure. Green's Functions. Capacity. Applications to spaces and Banach algebras. *Prerequisite:* MAT 623.

MAT 636 Algebraic Topology (3.0); 3 cr. Singular homology theory; attaching spaces with maps; the Eilenberg - Steenrod axioms; products; manifolds and Poincaré duality; fixed point theory. *Prerequisite:* MAT 625.

MAT 641 Theory of Ordinary Differential Equations (3.0); 3 cr. Existence and Uniqueness Theorems. Linear systems with constant coefficients. Matrix analysis and Matrix Exponential. Stability. Periodic coefficients. Two-Dimensional Autonomous linear and nonlinear systems. Phase plane analysis. Liapunov stability. Limit cycles and the Poincaré-Bendixson Theorem. Stability of Linear non-autonomous systems. *Prerequisite:* Graduate Standing.

MAT 642 Theory of Partial Differential Equations (3.0); 3 cr. The single First-Order equation. The Cauchy problem. Systems of First-Order equations. Characteristics. The Cauchy-Kowalevski Existence and Uniqueness Theorem. Elliptic equations. The Laplace equation. The Lagrange-Green identity. The Maximum principle. Harmonic and subharmonic functions. Green's function and the Poisson formula. Hyperbolic equations in higher dimensions. The wave equation. The method of Spherical means. Hadamard's method of descent. Hyperbolic equations with constant coefficients. Solution by the n-dimensional Fourier Transform. Parabolic equations. The Heat equation. *Prerequisite:* Graduate Standing.

MAT 645 Theory of Integral Equations (3.0); 3 cr. The course covers an introduction to the theory of linear and nonlinear integral equations. Solutions of Volterra and the Fredholm equations of the first and second kind. Fredholm's alternative theorem. Orthonormal eigensystems of a symmetric Fredholm operator. The Hilbert-Schmidt expansion theorem and its applications to Sturm-Liouville problems. *Prerequisite:* MAT 641.

MAT 655 Field Theory (3.0); 3 cr. Basics on fields. Splitting fields. Extension fields. The Galois group. Galois criterion for solvability by

radicals. Finite fields. Ordered fields. Algebraic closure of fields. Separability and normality of extension fields. Kummer extension fields. Algebras over a field. Derivations of subalgebras. *Prerequisites:* MAT 621, MAT 632

MAT 657 Commutative Algebra (3.0); 3 cr. Commutative Rings and their ideals. Modules over commutative rings. Localization of rings and modules. Integral extensions. Valuations and valuation rings. Completion. Dimension theory. Basic elements of algebraic geometry. *Prerequisites:* MAT 621, MAT 632, MAT 655.

MAT 659 Category Theory & Homological Algebra (3.0); 3 cr. General categories. Functors. Functorial morphisms. Equivalence of categories. Products and coproducts. The Hom functors. Universal objects. Inductive and projective objects. Additive and Abelian categories. Complexes and homology. Resolutions and derived functors. Ext and Tor functors. Cohomology of algebras. Homological dimension. *Prerequisite:* MAT 632.

MAT 661 Computational Mathematics I (3.0); 3 cr. Matrix norm; residual vector; condition number; perturbation analysis; operations count; sparse matrices; LU-decomposition diagonally dominant matrices; iterative techniques for linear systems; and eigenvalues and eigenvectors. *Prerequisite:* Graduate Standing.

MAT 662 Computational Mathematics II (3.0); 3 cr. QR-decomposition; over determined linear systems; least-square solutions; the generalized inverse A^+ ; positive-definite matrices; Cholesky's decomposition; the singular value decomposition; Given's and Householder's algorithms. *Prerequisite:* MAT 661.

MAT 663 Information Theory (3.0); 3 cr. Measures of information: entropy, relative entropy and mutual information. Basic inequalities: Jensen, log-sum, Fano, data processing theorem. Typicality and the asymptotic equipartition property. Entropy rate of stationary sources. Data compression of discrete memoryless sources: Kraft inequality, Huffman code, Shannon-Fano-Elias code. Discrete memoryless channels: definition of capacity and its computation. Communication over discrete channels: the channel coding theorem and the physical significance of capacity. The joint source-channel coding theorem. Measures of information for sources

with continuous range. Discrete-time Gaussian channels and their capacity. *Prerequisite:* Graduate Standing.

MAT 664 Functional Analysis (3.0); 3 cr. Spaces and operators: Metric spaces, normed and Banach spaces, linear operators, inner product, Hilbert spaces. Fundamental theorems: Hahn-Banach theorem, uniform boundedness theorem, open mapping theorem, closed graph theorem. Spectral theory: basic concepts, operators on normed spaces, compact operators, self-adjoint operators. *Prerequisite:* MAT 623.

MAT 667 Numerical Analysis I (3.0); 3 cr. Linear Systems. LR and QR Decomposition. Basic Functional Analysis. Matrix Norms. Completeness. The Banach Fixed Point Theorem. Iterative Methods for Linear Systems. Ill-conditioned Linear Systems. *Prerequisite:* Graduate Standing.

MAT 668 Numerical Analysis II (3.0); 3 cr. Iterative Methods for Nonlinear Systems. Least Squares Problems. Matrix Eigenvalue Problems. The QR-Algorithm. Interpolation. Numerical Integration. Convergence of Quadrature Formulas. *Prerequisite:* MAT 667.

MAT 669 Numerical Analysis III (3.0); 3 cr. Initial Value Problems. Picard-Lindelöf Theorem. Single and Multi-Step Methods. Boundary Value Problems. Finite Difference Methods. The Finite-Element Method. Integral Equations. Stability. *Prerequisites:* MAT 668.

MAT 671 Differential Geometry (3.0); 3 cr. Smooth manifolds, smooth maps, the inverse function theorem, vector fields on manifold, vector bundles, cotangent bundle, submersions, submanifolds, Lie groups, tensor fields on manifold, differential forms, and integration on manifolds. *Prerequisite:* Graduate Standing.

MAT 673 Differential Topology (3.0); 3 cr. Manifolds and maps, manifolds with boundary, transversality, vectors bundles and tubular neighborhoods, degrees of maps, intersection numbers and the Euler characteristics, Lefschetz fixed-point theorem, Borsuk-Ulam theorem, and Morse theory. *Prerequisites:* MAT 625, MAT 671.

MAT 681 Master Project (3.0); 3 cr. A substantial project in a topic in mathematics under the supervision and the approval of a faculty member.

MAT 683 Directed Reading (3.0); 3 cr. A topic in mathematics of interest will be studied under the supervision of a faculty member – evaluated as a tutorial course.

MAT 691 Master Thesis in Mathematics I; 3 cr. The research for the master thesis must show

the student's proficiency in approved topics in mathematics. *Prerequisite:* Advisor Consent.

MAT 692 Master Thesis in Mathematics II; 3 cr. Continuation of MAT 691. *Prerequisites:* MAT 691 and Advisor Consent.

DEPARTMENT OF SCIENCES

Chairperson: *Dr. Tanos G. Hage*

Secretary: *Mrs. Yolla Chalhoub-Abboud*

Associate Professors

El-Hage, Youssef Kamal, Ph.D., 1990, *Physics*, Technische Universität München, Germany; M.A., 1985, *Philosophy*, Lebanese University, Lebanon

Khalaf-Keirouz, Layla, Ph.D., 1995, Westfälische Wilhelms-Universität, Germany
Environmental Geology

Assistant Professors

Dib, Robert, Doctorate, 1998, *Biochemistry*, Université de Nantes, France

Hage, Tanos G., Ph.D., 1995, *Plant Biochemistry and Molecular Biology*, Pennsylvania State University, USA

Hajjar, Roger, Ph.D., 1997, *Physics and Astronomy*, Université de Montréal, Canada

Jaalouk, Doris, Ph.D., 1997, *Cell Biology*, Université de Sherbrooke, Canada

Kabrita-Bou Serhal, Colette, Ph.D., 1998, *Circadian Biology*, Northeastern University, Boston, USA

Sabra, Bassem, Ph.D., 2000, *Physics*, Ohio University, USA

Trarat, Christophe, Ph.D., 1999, *Organic Chemistry*, Université de Paris V, France

Academic Assistants

El-Ghossein-Maalouf, Nada, M.S., 1996, *Biology*, American University of Beirut, Lebanon

El-Hage-El-Amm, Rita, M.P.H., 1988, *Public Health*, American University of Beirut, Lebanon

Zoghbi, Catherine, DEA, 2003, *Physics*, Lebanese University, Lebanon

Laboratory Assistant

Saliba-Tabet, Elizabeth, B.S., 1999, *Biology*, Lebanese University, Lebanon

Programs of Study

The Department of Sciences offers a Freshman Science program and an undergraduate program leading to the degrees of:

- BS in Biology (102 Credits) (3 tracks)
- BS in Environmental Science (104 Credits)
- BS in Physics (95 Credits)
- BS in Chemistry (98 Credits) (4 tracks)

The Department offers the following minor for the first time:

- Minor in Physics (16 Credits)

The Department of Sciences also offers a variety of undergraduate service courses in astronomy, biology, chemistry and geology. These courses are meant to serve academic programs offered by other Faculties of the University.

Our Freshman Science Program

Academic Advisor: *Dr. Doris Jaalouk*

The **Freshman Science** program consists of a minimum of 30 credits. This program is equivalent to the official Lebanese Baccalaureate Part II (Scientific Strands). It normally requires a minimum period of 2 semesters. For more details on this program, refer to the subsection “*Freshman Program*” within the section “*GER, Freshman Program and Degrees*”.

Our Undergraduate Program

The Degree of Bachelor of Science in Biology

The biology program is designed to prepare students for a wide range of employment opportunities, including access to professional schools in medicine, veterinary science, dentistry, agriculture and education. It also provides solid background for those interested in careers related to environmental protection, wildlife management, biotechnology and genetic engineering. A BS degree in biology can also lead to post-graduate studies & research careers in universities, research institutes, hospitals & industrial or governmental laboratories.

Admission Requirements

For admission requirements to the degree of BS in biology, refer to the section entitled “Undergraduate Admission” of this catalog.

Graduation Requirements

To receive the degree of BS in Biology, a student must fulfill all requirements of the degree program, complete all required courses, accumulate a total of 102 credits with an overall grade point average (GPA) of at least 2.0/4.0 and a minimum GPA of 2.0/4.0 in both the core and major requirements and clear all accounts with the university. Candidates for degrees are reminded that grades of “*F*” assigned during the last semester to courses required for graduation will result in delaying of graduation.

Degree Requirements (102 credits)

General Education Requirements	33 cr.
A - Communication Skills in English and Arabic	9 cr.
- Two courses from the subcategory <i>English (6 cr.)</i> ENL 213 And ENL 223 Or ENL 230	
- One course from the subcategory <i>Arabic (3cr.)</i> ARB 211, ARB 212, ARB 224, ARB 231, ARB 317	
B – Philosophy and Religion	6 cr.
- One course from the subcategory <i>Religion (3cr.)</i> REG 212, REG 213, REG 313, REG 314	
- One course from the subcategory <i>Philosophy (3cr.)</i> ENS 205, PHL 211, PHL 311, POS 345	
C - Cultural Studies and Social Sciences	6 cr.
- Two courses from the category <i>Cultural Studies and Social Sciences (6 cr.)</i> HUT 305, HUT 306, MUS 210, FAP 215, COA 359, COA 315, NTR 215, ARP 215, PSL 201, SOL 201, SOL 301, BAD 201, ECN 200, ECN 211, ECN 212	
D - Citizenship	6 cr.
- Two courses from the category <i>Citizenship (6 cr.)</i> HIT 211, POS 201, POS 210, POS 240, IAF 301, POS 319, POS 337	
E - Science and Technology	6 cr.
- One course from the subcategory <i>Mathematics/Statistics/Computer Science (3 cr.)</i> CSC 201, MAT 201, MAT 202, MAT 204, MAT 211, STA 202, STA 210	
- One course from the subcategory <i>Natural Sciences (3 cr.)</i> AST 201, CHM 211, ENS 201, ENS 202, ENS 206, HEA 201, NTR 201, PHS 207	
Core Requirements	34 cr.
BIO 211, BIO 212, BIO 220, BIO 227, CHM 211, CHM 215, CHM 221, CHM 222, CHM 272, PHS 208, PHS 209, PHS 278, PHS 279, STA 203.	
Major Requirements	29 cr.
BIO 324, BIO 335, BIO 485 Choose two biology courses 4 credits each. Choose four biology courses 3 credits each, excluding BIO 202 and BIO 203.	
Free Electives	6 cr.

**Bachelor of Science in Biology

Undergraduate Courses: Biology

BIO 101 Introduction to Biology (3.0); 3 cr.

An introduction to the fundamental principles of biology. Covers chemical basis of life, structure and function of cells and tissues, basic genetic concepts, as well as structure and function of human body systems. *Prerequisite:* Freshman Standing.

BIO 171 Introduction to Biology Laboratory (0.3); 1 cr. Laboratory course illustrating the concepts and theory taught in Introduction to Biology.

BIO 202 Mystery of life (3.0); 3 cr. “Big picture” of cosmic evolution: Formation of chemical elements, stars and planets, prebiotic evolution, origin and evolution of life on Earth. The way humans are affecting the course of evolution by altering the genetic makeup of organisms, as well as other aspects of applied biology. Not open for Biology students.

BIO 203 Discover Biology (3.0); 3 cr. A general introductory course that covers the basic principles and concepts of Biology with current applications. Not open for Biology students.

BIO 207 Biochemistry for Nursing (3.0); 3 cr. This course is a general overview of the basic concepts in biochemistry. It reviews the essentials of general and organic chemistry, discusses the main biochemical pathways in the cell and emphasizes the relevance of the concepts to clinical disorders.

BIO 211 General Biology I (3.2); 4 cr. This course introduces major concepts of biology including the organization of life on all levels; metabolism and energy transactions involved in life processes; the transfer of information and the diversity and classification of organisms. *Prerequisite:* Sophomore Standing.

BIO 212 General Biology II (3.2); 4 cr. It covers the study of structure and life processes in plants and animals. *Prerequisite:* BIO 211.

BIO 214 Human Anatomy (3.0); 3 cr. General human anatomy, emphasizing human scales, proportions, articulation, and factors influencing movements. *Prerequisite:* BIO 211.

BIO 215 Human Physiology (3.0); 3 cr. A study of the fundamental principles and mechanisms that govern body functions in humans. *Prerequisite:* BIO 211.

BIO 216 Microbiology and Immunology for Nursing (3.0); 3 cr. A study of the essentials of basic and clinical microbiology and immunology that includes immunology, bacteriology, virology, physiology and mycology. *Prerequisite:* BIO 207.

BIO 217 Pathophysiology (3.2); 4 cr. The content of this course refers to three major areas based on the health-illness continuum: control of normal body function, alteration in body function, and failure in any system or part of body function. *Prerequisite:* BIO 215.

BIO 218 Histology (2.2); 3 cr. An introduction to the microscopic structure of tissues and organs, with particular emphasis on the interrelation between structure and function. *Prerequisite:* BIO 211.

BIO 219 Pathophysiology for Nursing (2.0); 2 cr. This course offers an integrated approach to biological alterations that affect human equilibrium. The content of this course refers to three major areas based on the health – illness continuum: control of normal body function, alteration in body function, and failure in any system or part of body function. *Prerequisite:* BIO 215.

BIO 220 Genetics (3.0); 3 cr. Mendelian genetics & extensions of Mendelian analysis; population & quantitative genetics; molecular genetics: DNA structure and replication, organization of DNA in chromosomes, gene & chromosomal mutations, gene expression and its regulation, recombinant DNA technology. *Prerequisite:* BIO 211.

BIO 222 Immunology (3.0); 3 cr. Detailed description of the components of the immune system: their development, differentiation & functioning during an immune response; immune response to pathogens, tumors & grafts; immunopathologies; basic immunological techniques. *Prerequisite:* BIO 211.

BIO 226 Evolution (3.0); 3 cr. Study of processes that bring about evolutionary changes in organisms, evolutionary trends, patterns of adaptations, and principal factors that influence the patterns of speciation. *Prerequisite:* BIO 220.

BIO 227 Introductory Biochemistry (3.0); 3 cr. An introduction to the structure-function relationships of biomolecules, enzymes,

metabolic reactions & biochemical energetic of living cells. Prerequisite: BIO 211, *Prerequisite*: CHM 221 or *Corequisite*: CHM 213.

BIO 228 Parasitology (3.2); 3 cr. Provides a general overview on the classification, morphology, development & physiology of human and animal parasites. *Prerequisite*: BIO 212.

BIO 314 Ecology (3.0); 3cr. Principles of ecosystems; the interaction of organisms & their environment. Food web, energy flow & nutrient cycling in ecosystems. Factors which affect the distribution & abundance of species: Wildlife resources & extinction. *Prerequisite*: BIO 212, also listed as ENS 303

BIO 316 Economic Botany (3.0); 3cr. The course provides an introduction to the study of botany and the economic uses of plants in industry, production of food and medicine. *Prerequisite*: BIO 212.

BIO 320 Microbiology (3.2); 4 cr. Covers structures, isolation, classification and metabolic diversity of microorganisms. *Prerequisite*: BIO 220 or BIO 227.

BIO 322 Virology (3.0); 3 cr. Provides a general overview on the classification, biophysical & biochemical characteristics of bacterial, plant and animal viruses. *Prerequisite*: BIO 212.

BIO 324 Plant Physiology (3.2); 4 cr. Basic principles of plant physiology; the physiological processes of green plants and the effect of the environment on these processes. *Prerequisites*: BIO 212, BIO 227.

BIO 325 Marine Biology (3.2); 4 cr. Covers biology of marine life, with emphasis on the roles that marine plants and animals assume in their environmental situations, & the structural and physiological adaptations necessary to fulfill those roles. *Prerequisite*: BIO 212.

BIO 332 Developmental Biology (3.2); 4 cr. The course sheds light on the major events and processes that accompany animal development—from the fusion of two cells to the creation of a more complex multicellular organism. The molecular mechanisms underlying such developmental processes are considered. The impacts of special environmental and pharmacological agents on animal development are also emphasized. *Prerequisite*: BIO 212.

BIO 334 Molecular Biology; (3.0) 3cr. Provides an understanding of the molecular basis of biological phenomena with emphasis on the fundamental processes common to all organisms: enzyme catalysis, DNA, RNA and protein synthesis, and mechanism of gene expression. Includes a description of common molecular biology techniques for gene study and manipulation. *Prerequisites*: BIO 220, BIO 227.

BIO 335 Cell Biology (3.2); 4 cr. Provides students with a basic understanding of the structure and function of the eukaryotic cell. *Prerequisite*: BIO 227.

BIO 336 Basic Biotechnology (3.0); 3 cr. Covers broadly the development of the field of biotechnology: methods and applications. Covers topics such as principles of recombinant DNA technology and its applications to studies of animals, plants, medicine, forensics and human genome project. *Prerequisite*: BIO 227.

BIO 337 Biochemical Methods; (3.0) 3 cr. Introduction to basic methods used in studies of enzymes, proteins, nucleic acids and their interactions. Different methods of extraction, purification, analysis and production of biomolecules are discussed in general but also by means of some precise examples. *Prerequisite*: BIO 227.

BIO 340 Metabolic Endocrinology (3.0) 3 cr. A comprehensive study of the general principles of endocrinology with emphasis on intermediate metabolism and heritable endocrine disorders. *Prerequisite*: BIO 215.

BIO 400 Bioinformatics (3.2); 4 cr. An introduction to computer analysis of macromolecular structure information. This course describes how to access, process and interpret structural information regarding biological macromolecules as a guide to experiments in Biology. *Prerequisites*: BIO 220, BIO 227, senior standing.

BIO 411 Plant Taxonomy (3.2); 4 cr. An introductory study of identification, naming and classification as well as the history of systematics and the role of evolution in systematics. Laboratory emphasis is on knowledge of the major families of vascular plants and on the collection and identification of local vascular plants. Of particular importance is gaining an understanding of the philosophical bases in taxonomy and the relevance of this field to other areas of biology. *Prerequisite*: BIO 212.

BIO 412 Plant Propagation (3.2); 4 cr. Principles, practices and techniques in sexual and asexual propagation of horticultural plants, in which seed technology, and seed propagation, rooting and propagation by cutting, grafting and budding systems, layering and propagation by specialized plant structures, biotechnology and tissue culture systems for micropropagation are discussed. *Prerequisites:* BIO 212.

BIO 413 Plant Tissue Culture and Biotechnology (3.2); 4 cr. Principles and techniques for the in vitro culture, propagation, and genetic manipulation of plant cells. *Prerequisites:* BIO 212.

BIO 414 Ornamental Plant Materials (3.0); 3 cr. Identification and description of ornamental plants suitable for Lebanon; discussion of cultural and aesthetic aspects of plants of value in ornamental plantings.

BIO 420 Neurobiology and Behavior (3.0); 3 cr. The course aims at highlighting the basic neural mechanisms which underlie all animal behavior, including the high cognitive processes such as learning and memory. The different types of neural circuits and nerve cell cross-talks in both invertebrates and vertebrates are considered. *Prerequisite:* BIO 212.

BIO 424 Conservation Biology (3.0); 3 cr. The application of biological principles to issues in the conservation biology will be examined within a context that integrates biology, land management, protection and development. *Prerequisite:* BIO 314. Also listed as ENS 424.

BIO 451 Environmental Biotechnology (3.0); 3 cr. The use of biotechnology as it relates to various environmental technologies: biodegradation, remediation, biodegradable materials, energy saving process and chemical production from renewable resources. *Prerequisites:* BIO 211, BIO 212. Also listed as ENS 451.

BIO 460 Selected Topics in Biology (3.0); 3 cr. Students study recent and current biological issues and topics. *Prerequisites:* Specified when offered.

BIO 485 Seminar; 1 cr. Students work on selected papers from recent biological journals. Under the supervision of an advisor. *Prerequisite:* Senior Standing.

BIO 495 Research in Biology; 1, 2 or 3 cr. An independent research project in an area of biology under the direction of a faculty mentor. *Prerequisite:* Senior standing and consent of the instructor.

The Degree of Bachelor of Science in Chemistry

The chemistry program is designed to provide students with a broad and up-to-date education in rapidly growing areas. The program seeks to prepare students for excellence in graduate school and employments in research institutes, industry, government and teaching. The B.Sc. degree in chemistry stresses a solid foundation in the traditional areas of chemistry namely physical, inorganic, organic and analytical chemistry. The program has been designed to provide maximum flexibility to students and offer elective subjects in three specialized areas: Pharmaceutical, Industrial and Environmental. In addition, a strong emphasis is placed on laboratory and undergraduate research experience which will assist graduates throughout their career.

Admission Requirements
For admission requirements to the degree of BS in Chemistry, refer to the section entitled "Undergraduate Admission" of this catalog.

Graduation Requirements

To receive the degree of BS in Chemistry, a student must fulfill all requirements of the degree program, complete all required courses, accumulate a total of 98 credits with an overall grade point average (GPA) of at least 2.0/4.0 and a minimum GPA of 2.0/4.0 in both the core and major requirements and clear all accounts with the university. Candidates for degrees are reminded that grades of "I" assigned during the last semester to courses required for graduation will result in delaying of graduation.

Degree Requirements (98 credits)

General Chemistry

General Education Requirements

30 cr.

A - Communication Skills in English and Arabic

9 cr.

Two courses from the subcategory *English* (6 cr.)

ENL 213 And

ENL 223 Or ENL 230

- One course from the subcategory *Arabic* (3cr.)

ARB 211, ARB 212, ARB 224, ARB 231, ARB 317

B – Philosophy and Religion

6 cr.

- One course from the subcategory *Religion* (3cr.) REG 212, REG 213, REG 313, REG 314

- One course from the subcategory *Philosophy* (3cr.)

ENS 205, PHL 211, PHL 311, POS 345

C - Cultural Studies and Social Sciences

6 cr.

- Two courses from the category *Cultural Studies and Social Sciences* (6 cr.)

HUT 305, HUT 306, MUS 210, FAP 215, COA 359, COA 315, NTR 215, ARP 215, PSL 201, SOL 201, SOL 301, BAD 201, ECN 200, ECN 211, ECN 212

D - Citizenship

6 cr.

- Two courses from the category *Citizenship* (6 cr.)

HIT 211, POS 201, POS 210, POS 240, IAF 301, POS 319, POS 337

E - Science and Technology

3 cr.

- One course from the subcategory *Mathematics/Statistics/Computer Science* (3 cr.)

CSC 201, MAT 201, MAT 202, MAT 204, MAT 211, STA 202, STA 210

OR

- One course from the subcategory *Natural Sciences* (3 cr.)

AST 201, BIO 202, BIO 203, ENS 201, ENS 202, ENS 206, HEA 201, NTR 201, PHS 207

Students majoring in Chemistry are not allowed to count CHM courses within the pool of required GER courses.

Core Requirements

25 cr.

CHM 211, CHM 215, CHM 221, CHM 222, CHM 272, MAT 213, MAT 224, PHS 212, PHS 271

Major Requirements

37 cr.

CHM 321, CHM 322, CHM 326, CHM 327, CHM 331, CHM 335, CHM 372, CHM 440, CHM 490

Choose three Chemistry courses, 3 credits each. These courses should be at the 300 level and above.

Free Electives

6 cr.

Undergraduate Courses: Chemistry

CHM 101 General Chemistry I (3.0); 3 cr. An introductory course about the atomic theory, chemical bonding and periodicity, stoichiometry; the state of matter, gases and solutions.

CHM 102 General Chemistry II (3.0); 3 cr. Cover chemical equilibrium, acids and bases, electrochemistry, an overview of the groups in the periodic table, and an introduction to organic chemistry and nuclear chemistry. *Prerequisite:* CHM 101.

CHM 103 Introductory Chemistry (3.0); 3 cr. Improves the students knowledge of the fundamental concepts in chemistry. The course brings about sharpening judgements on chemical questions and enhancing problem solving skills. The materials covered deal with stoichiometry, atomic structure, chemical periodicity and bonding, gases, thermochemistry, solutions, and chemical equilibria.

CHM 171 General Chemistry I Laboratory (0.3); 1 cr. Selected experiments in general chemistry I. *Corequisite:* CHM 101.

CHM 172 General Chemistry II Laboratory (0.3); 1 cr. Selected experiments in general chemistry II. *Corequisite:* CHM 102.

CHM 211 Principles of Chemistry (3.0); 3 cr. Deals with stoichiometry, gases, atomic structure, bonding, liquids, gaseous and solution equilibria, thermochemistry, thermodynamics, properties of solution. The course is designed for sciences and engineering students.

CHM 213 Basic Organic Chemistry (3.0) 3 cr. This course provides a brief overview to basic principles in Organic Chemistry including the nomenclature, structure, synthesis and reaction of the main function groups of organic compounds. *Corequisite:* CHM 211.

CHM 215 Quantitative Analysis (3.3); 4 cr. This course deals with the theoretical and practical aspects of chemical analysis. It covers the principles of chemical equilibrium and its application on gravimetric and titrimetric methods of analysis in addition to the fundamental principles of spectrometry. Statistical evaluation of the accuracy and precision of experimental data is discussed. *Prerequisite:* CHM 211.

CHM 221 Organic Chemistry I (3.0); 3 cr. Introduction to the basic principles and concepts of organic chemistry with an emphasis on the relation between structure and properties, chemistry of hydrocarbons and stereochemistry. *Prerequisite:* CHM 211.

CHM 222 Organic Chemistry II (3.0); 3 cr. A study of substitution and elimination reactions and of the chemistry of aromatic compounds, alcohols, ethers, epoxides, aldehydes and ketones, carboxylic acids and derivatives, amines and carbohydrates. *Prerequisite:* CHM 221.

CHM 271 Principles of Chemistry Laboratory (0.2); 1 cr. Introduction to laboratory techniques, selected experiments in chemical analysis. *Corequisite:* CHM 211.

CHM 272 Organic Chemistry Laboratory (1.2); 2 cr. The aim of this course is to familiarize students with the main techniques encountered in organic chemistry lab such as extraction, recrystallization, simple and fractional distillation, thin layer and column chromatography, identification of functional groups, conduct chemical reactions. Emphasis is placed on the theory of these techniques. *Corequisite:* CHM 222.

CHM 273 Organic Chemistry Laboratory (0.2); 1 cr. This course is designed for nutrition students and introduces the methods of separation and purification including extraction, recrystallization, simple and fractional distillation and thin layer chromatography. Identification of functional groups and chemical reactions will be also included. *Corequisite:* CHM 213.

CHM 321 Physical Chemistry I (3.0); 3 cr. This course covers fundamental principles of chemical dynamics and chemical thermodynamics. A theoretical study of the macroscopic behavior and microscopic structure of matter using mathematical models; kinetic theory of gases, rate laws, mechanism, collision theory, activated complex theory; the three laws of thermodynamics and their application to chemical systems; thermodynamics of chemical reactions, thermodynamics of solutions, thermodynamics of phase transformation, chemical equilibrium. *Prerequisite:* CHM 211, *Corequisite:* MAT 235.

CHM 322 Physical chemistry II (3.3); 4 cr. This course deals with Quantum Chemistry and Spectroscopy. Topics covered are Quantum theory, postulates, Schrodinger equation, harmonic oscillator model, hydrogen atom, hydrogenic wave function, Pauli principle, rotational motion, atomic structure, molecular electronic structure, Huckel approximation, hybridization, symmetry, rotational and vibration spectroscopy, electronic spectroscopy of molecules. *Prerequisite:* CHM 321.

CHM 325 Inorganic Chemistry (3.3); 4 cr. Covers electronic structure and properties of atoms; structure and bonding of inorganic substances, the unit cell, VSEPR theory, bond energies; periodicity and correlation with the electronic structure, properties of the main-group elements and the d-transition metals; organometallic complexes and their applications in synthesis and catalysis. *Prerequisite:* CHM 211.

CHM 326 Inorganic Chemistry I (3.3); 4 cr. Covers atomic structure, chemical bonding (MOT), molecular geometry (VSEPR model), solid state (metals, ionic, covalent molecules), crystal field theory, symmetry and point group, acid-base concepts, e.m.f. diagram and its uses, chemistry of selected main group and transition elements with emphasis on physical properties and their applications in industrial chemistry. *Prerequisite:* CHM 211.

CHM 327 Inorganic Chemistry II (3.0); 3cr. Includes structures, stereochemistry, reaction mechanisms and physical properties with emphasis on transition metal coordination and sigma and pi bonded organometallic compounds and their role in catalysis. Metals in biological system will be covered. *Prerequisite:* CHM 326.

CHM 331 Organic Identification and Structure (1.4); 3cr. This course studies the theoretical and practical aspects of the separation, purification and identification of organic compounds. The identification of pure compounds and of components of mixtures of organic compounds is accomplished by chemical and spectral methods and/or synthesis of derivatives. It covers the theory of NMR (including two-dimensional proton), infrared and mass spectrometry with emphasis on spectral interpretation skills needed for the elucidation of structure. *Prerequisite:* CHM 222, CHM 272.

CHM 335 Biological Chemistry (3.0); 3cr. Topics covered include structures and functions

of important biomolecules, methods of structure determination, kinetics of enzyme-catalyzed reactions and enzyme mechanisms. *Prerequisite:* CHM 222

CHM 372 Advanced Synthesis Laboratory (0.4); 2cr. Advanced laboratory methods for the preparation of organic and inorganic molecules; synthetic techniques, purification techniques and multi-step syntheses with the characterization of intermediates and products by IR, NMR and MS. *Prerequisite:* CHM 325, CHM 331

CHM 410 Physical Chemistry III (3.0); 3cr. A course that deals with a variety of areas in advanced dynamics, thermodynamics, technical physical analysis, transport properties: diffusion, viscosity, ion transport, thermal conductivity, rates of reactions, statistical mechanics, catalysis, thermodynamics of mixtures, equilibrium thermochemistry, electrochemical potential, complex reaction mechanism, fundamental spectroscopic techniques: NMR, laser spectroscopy, EPR, surface analysis, and imaging techniques, X-ray crystallography. *Prerequisite:* CHM 322.

CHM 415 Environmental Chemistry I (3.0); 3cr. Covers the natural chemical processes on Earth and the anthropogenic effects on the environment. The chemical processes occurring in the lithosphere, hydrosphere, and atmosphere are analyzed. The effects of primary and secondary pollutants, their interactions between each other and natural substances, and their propagation in the environment are covered. *Prerequisite:* Senior Standing.

CHM 416 Environmental Chemistry II (3.0); 3cr. Covers special chemistry topics relevant to environmental protection and environmental systems such as water, air, and soil. Selected topics include: polluted sites decontamination, wastewater and oil spill treatment, hazardous waste management, chemical sources of renewable energy, and an overview of Green Chemistry. *Prerequisite:* Senior Standing

CHM 420 Industrial Chemistry I: Unit Operations (3.0); 3cr. This course covers the study of unit operations: distillation, liquid-liquid extraction, gas-liquid extraction, gas absorption, filtration, evaporation, centrifugation, drying and leaching operations. The fundamentals of material balances will be introduced. *Prerequisite:* Senior Standing

CHM 421 Industrial Chemistry II: Chemical Processes (3.0); 3cr. This course provides a

broad overview of technologies and processes involved in chemical industry. Topics covered: industrial production of organic and inorganic chemicals, fermentation processes, Petroleum refining, Polymer processing, industrial catalysis, product development from bench to pilot plant to full-scale manufacturing, process economics and environmental considerations.

Prerequisite: CHM 222, CHM 326

CHM 425 Modern Methods of Organic Synthesis (3.0); 3cr. The course presents the most important reaction types as tools for research scientist to use in synthesis. Topics include formation of carbon-carbon bonds, molecular rearrangement, cycloaddition and pericyclic reactions, photochemical and free radical reactions, oxidation and reduction reactions with emphasis on chemo-, regio- and stereoselectivity. General principles of retrosynthetic analysis will be used to design simple synthetic schemes for synthesis of target molecules, including important natural products.

Prerequisite: CHM 222

CHM 427 Pharmaceutical Chemistry (3.0); 3cr. It explores in depth the synthesis of pharmaceutically important molecules such as antibiotics, cardiovascular, anti-inflammatory, chemotherapeutic agents and more. Special attention is placed on the strategy and tactics in synthesis and reaction mechanisms. Real case studies of process development of drug substances in pharmaceutical industry will be illustrated to show the problems which may be encountered in scaling up chemical synthesis and the ways these problems may be overcome.

Prerequisite: CHM 425.

CHM 428 Drug Design and Action (3.0); 3cr. This course will give an overview of how drugs are designed and function to help synthetic chemists improve their understanding of drug chemistry. It covers stages of drug discovery process, drug-target interactions, pharmacological properties in drug design, elucidation of mechanism of action of drugs, description of routes for the delivery of drugs in the human body, chemical aspects of drug metabolism and the concept of pro-drugs.

Prerequisite: CHM 222 and CHM 335 or BIO 227.

CHM 430 Polymer Chemistry (3.0); 3cr. Covers structure, characterization, synthesis and classification of polymers; mechanical properties; stability; and applications in

packaging, insulators and fibers etc.
Prerequisites: CHM 222, CHM 322.

CHM 431 Atmospheric Chemistry & Pollution (3.0); 3 cr. Covers the chemical composition of the earth's atmosphere and the major factors that control its chemical composition. Emphasizes the effects of the biosphere and the changes induced by human activities. Topics such as climate change, ozone depletion, urban air pollution and acid rain will be developed.

Prerequisite: CHM 322.

CHM 432 Chemistry & Processing of Food (3.0); 3 cr. Provides an overview of the chemical and physical properties of food components and additives. Covers the processing operations of important food classes (beverages, fruits and vegetables, dairy products); major chemical changes taking place during processing and storage of foods; and principal methods of analysis used in the food industry.

Prerequisite: CHM 222.

CHM 433 Soil Chemistry & Pollution (3.3); 4 cr. Covers chemistry of inorganic and organic soil components with emphasis on environmental significance of soil solution-solid phase equilibrium, sorption phenomena, ion exchange processes, reaction kinetics, redox reactions, and acidity and salinity processes. Also covers soil pollution: sources, dispersion, and remediation methods.

Prerequisites: CHM 215, CHM 222, BIO 211.

CHM 434 Materials Chemistry (3.0); 3 cr. This course gives an introduction to materials chemistry and solid state chemistry together with an overview of common synthesis and characterization of materials with emphasis on molecular understanding of their chemical, electrical, optical, mechanical, thermal and magnetic properties. Topics covered include inorganic solids, polymers, nanoscale materials and biological materials with their potential technological applications.

Prerequisite: CHM 222, CHM 322, CHM 325

CHM 435 Aquatic Chemistry & Pollution (3.3); 4 cr. Covers chemical, biological and toxicological properties of water and their effects on the biosphere. Substances that alter the natural water. Sources, reactions, transports and fates of organic, inorganic, and pathogenic pollutants in water. Analytical testing methods used to assess the toxicity impact of pollutants, and pollution remediation techniques.

Prerequisites: CHM 215, CHM 222, BIO 211.

CHM 440 Instrumental Analysis (3.3); 4 cr. Covers theory, practice and applications of modern analytical instrumentation: different aspects of instrumental analysis in areas of separation sciences and spectroscopy. Introduces instrumental methods of analysis, including gas and liquid chromatography; atomic, ultraviolet/visible, infrared, and fluorescence spectroscopy; nuclear techniques; and electrochemical methods. The use and the

interpretation of data from these instruments will be practiced in the laboratory. *Prerequisite:* CHM 215.

CHM 490 Chemistry Project; 1, 2 or 3 cr. Upon the consent of an advisor the student carries out a research project, gaining deeper skills in problem-solving, performing a literature review, experimental techniques, designing experiments, analyzing data and preparing a final report. *Prerequisite:* Senior standing.

The Degree of Bachelor of Science in Environmental Science

The recent environmental challenges on the local, regional and global levels are making environmental issues a major concern in our professional and social lives. Exponential population growth, industrialization and the tapping of energy resources are polluting our environments and depleting our resources. Environmental Science provides an understanding of ecological systems, of environmental components like air, water and soil, and of pollution sources and environmental degradation. Environmental scientists are equally prepared for problem solving, pollution prevention, environmental protection and conservation of natural resources.

Holders of a BS degree in environmental science will be ideally suited for careers in:

- *Public agencies*: Ministries of environment, water resources, electricity, oil and urban planning.
- *Industry*: Emission and waste monitoring, pollution clean-up.
- *Engineering*: Environmental impact assessment, remediation techniques.
- *Environmental and health agencies*: Performing laboratory analysis.
- *Teaching and research*.

Admission Requirements

For admission requirements to the degree of BS in environmental science, refer to the section entitled "Undergraduate Admission" of this catalog.

Graduation Requirements

To receive the degree of BS in environmental science, a student must fulfill all requirements of the degree program, complete all required courses, accumulate a total of 104 credits with an overall grade point average (GPA) of at least 2.0/4.0 and a minimum GPA of 2.0/4.0 in both the core and major requirements, and clear all accounts with the university. Candidates for degrees are reminded that grades of "I" assigned during the last semester to courses required for graduation will result in delaying of graduation.

Degree Requirements (104 Credits)

General Education Requirements

33 cr.

A - Communication Skills in English and Arabic

9 cr.

- Two courses from the subcategory *English (6 cr.)*

ENL 213 And

ENL 223 Or ENL 230

- One course from the subcategory *Arabic (3cr.)*

ARB 211, ARB 212, ARB 224, ARB 231, ARB 317

B – Philosophy and Religion

6 cr.

- One course from the subcategory *Religion (3cr.)*

REG 212, REG 213, REG 313, REG 314

- One course from the subcategory *Philosophy (3cr.)*

ENS 205, PHL 211, PHL 311, POS 345

C - Cultural Studies and Social Sciences

6 cr.

- Two courses from the category *Cultural Studies and Social Sciences (6 cr.)*

HUT 305, HUT 306, MUS 210, FAP 215, COA 359, COA 315, NTR 215, ARP 215, PSL 201, SOL 201, SOL 301, BAD 201, ECN 200, ECN 211, ECN 212

D - Citizenship

6 cr.

- Two courses from the category *Citizenship (6 cr.)*

HIT 211, POS 201, POS 210, POS 240, IAF 301, POS 319, POS 337

E - Science and Technology

6 cr.

- One course from the subcategory *Mathematics/Statistics/Computer Science (3 cr.)*

CSC 201, MAT 201, MAT 202, MAT 204, MAT 211, STA 202, STA 210

- One course from the subcategory *Natural Sciences (3 cr.)*

AST 201, BIO 202, BIO 203, CHM 211, ENS 201, ENS 202, ENS 206, HEA 201, NTR 201, PHS 207

Students majoring in Environmental Science are not allowed to count ENS courses within the pool of required GER courses.

Core Requirements**41 cr.**

BIO 211, BIO 212, CSC 318, CHM 215, CHM 221, CHM 222, CHM 272, ENS 303, ENS 321, GEO 201, GEO 311, PHS 208, STA 203.

Major Requirements**24 cr.**

ENS 201, ENS 322, ENS 323, ENS 430, ENS 450, ENS 471, ENS 490
and also one freely chosen 3 credits Environmental Science course.

Free Electives**6 cr.**

—	—	GER	3 cr.

Undergraduate Courses: Environmental Science

ENS 201 Introduction to Environmental Science (3.0); 3 cr. Introduction to the basic environmental global problems facing the Earth with emphasis on pollution and the use of energy resources. *Prerequisite:* Sophomore Standing.

ENS 202 The Environment and Sustainable Development (3.0): 3 cr. Introduction to sustainable development: concepts, goals, ecological, economic and social aspects. Fundamental environmental issues in sustainable development: natural resources management, population, food production, energy. International organizations and efforts. Standards and policies. Emerging technological applications and their impact. Resolution of environmental conflicts.

ENS 205 Environment, Society and Ethics (3.0); 3 cr. Population dynamics and community organization. World's economic unbalance and consequent impacts on human health and quality of life. International Politics and the environment. Environmental Law. Ethics and sustainability.

ENS 206 Ecotourism (3.0); 3 cr. Principles, characteristics and organization. Sustainability based on environmental protection, conservation and beneficial community and social interests. International experience, domestic ecotourism: description and geography. Field trips to the major nature reserves and sites of natural beauty in Lebanon.

ENS 303 Ecology (3.0); 3 cr. Principles of ecosystems; the interaction of organisms & their environment. Food web, energy flow & nutrient cycling in ecosystems. Factors which affect the distribution & abundance of species: Wildlife resources & extinction. *Prerequisite:* BIO 212. Also listed as BIO 314.

ENS 312 Environmental Health (3.0); 3 cr. Provides general understanding of how environmental factors are involved in the transmission of communicable diseases. Health hazards resulting from exposure to chemical and physical factors in the environment are emphasized as well.

ENS 321 Soil Pollution (3.0); 3 cr. Soil formation, soil chemistry. Soil erosion, weathering, salinity, soil rehabilitation. Soil contamination from environmental contaminants: Their fixation/ mobility.

Dispersion in the environment. Soil remediation methods.

ENS 322 Water Pollution (3.0); 3 cr. Natural water quality. Contaminant Hydrogeology: Chemical and physical contaminants. Marine Pollution. Problems arising from water treatment and resource use.

ENS 323 Air Pollution (3.0); 3 cr. Composition of the atmosphere. Climate and weather. Global atmospheric changes. Indoor and outdoor air pollution. Air pollution control processes, air pollutants dispersion modeling. *Prerequisite:* ENS 201.

ENS 332 Plants and Pollution (3.0); 3 cr. Biomes on Earth. Loss of biodiversity and desertification. Preventive measures. Forest resources and conservation. Interaction between plants and pollution, plant pollutant uptake and physiological responses. *Prerequisite:* BIO 212.

ENS 420 Energy Resources (3.0); 3 cr. Fossil fuels energy resources. Mineral resources. Alternative energy resources. Technological hazards and environmental impacts including political, economic and social consequences of their exploitation.

ENS 422 Pollution of Marine Environment, (3.0); 3 cr. Introduction to the marine ecosystems, sources and types of pollutants, environmental degradation and its impact. Marine pollution management. International legislation for the conservation of marine environment.

ENS 423 Water and Wastewater Quality and Treatment (3.0); 3 cr. Water and wastewater treatment processes. Consequent health impacts. Water and wastewater control techniques. Water protection.

ENS 424 Conservation Biology (3.0); 3 cr. The application of biological principles to issues in the conservation biology will be examined within a context that integrates biology, land management, protection and development. *Prerequisites:* ENS 203. Also listed as BIO 424.

ENS 425 Forest Resource Conservation (3.0); 3 cr. Ecological, social and economic principles applied in the management of forest and wildland resources, forests, range, water, fish and game. Evaluation of alternate management plans: introduction to integrative planning: The interactions of water, wood, wildlife, range

fisheries, and recreation resources. *Prerequisite:* BIO 212.

ENS 430 Solid Waste Management (3.0); 3 cr. Solid waste management and disposal. Treatment processes: Recycling, composting, landfilling. Introduction to hazardous/toxic waste.

ENS 431 Industrial Waste Management (3.0); 3 cr. Industrial waste: sources, types, quality, quantity and impact assessment. Treatment processes and detoxification. Disposal.

ENS 440 Environmental Natural Hazards (3.0); 3 cr. Seismic hazards; volcanoes; Atmospheric hazards; floods and Hydrologic hazards; landslides and rockfalls; design with nature; human interaction with the environment; risk maps; case studies.

ENS 441 Mitigation Measures and Policies (3.0); 3 cr. Rehabilitation concepts; mitigation procedures, design, and methodology; application to quarries, landfills, coastal erosion, landslides, floods.

ENS 445 Environmental Law & Regulations (2.0); 2 cr. Provides an overview of national and international environmental law and regulations, enforcement, and liability. Emphasizes practical working knowledge about the workings of environmental law, regulations, and the regulatory agencies. *Prerequisite:* Senior standing.

ENS 450 Environmental Impact Assessments (3.0); 3 cr. The assessment of a project environmental limitations, precautions,

mitigation, legal measures and the various methodologies of technical investigation, monitoring and assessment.

ENS 451 Environmental Biotechnology (3.0); 3 cr. The use of biotechnology as it relates to various environmental technologies: biodegradation, remediation, biodegradable materials, energy saving process and chemical production from renewable resources. *Prerequisites:* BIO 211, BIO 212. Also listed as BIO 451.

ENS 471 Field and Laboratory Work (1.2); 3 cr. Investigation of polluted sites and risk assessments. Environmental field work. Sampling methods. Laboratory analysis.

ENS 475 Selected Topics in Environmental Science (3.0); 3 cr. Students study recent and current environmental issues and topics. *Prerequisite:* Specified when offered.

ENS 485 Seminar; 2 cr. Students work on selected papers from recent biological, earth and environmental science journals. Under the supervision of an advisor. *Prerequisite:* Senior Standing.

ENS 490 Senior Project; 3 cr. After consultation with the Department, students run an environmental research project (case study) that will be presented as a seminar.

ENS 495 Research in Environmental Science; 1, 2 or 3 cr. An independent research project in an area of environmental science under the direction of a faculty mentor. *Prerequisite:* Senior standing and consent of the instructor.

The Degree of Bachelor of Science in Physics

Physics is the discovery of the inner fundamental unity of the natural world, from the whole universe to the insides of the smallest nucleus. It is the science that studies the basic laws of nature that produce the wealth of phenomena observed in everyday life.

Holders of a BS in physics can pursue a career in teaching or follow graduate studies. Other options include, among others, working in hospitals as medical physicists or in industry for running quality control labs or devising numerical simulations.

Admission Requirements

For admission requirements to the degree of BS in physics, refer to the section entitled "Undergraduate Admission" of this catalog.

Graduation Requirements

To receive the degree of BS in physics, a student must fulfill all requirements of the degree program, complete all required courses, accumulate a total of 95 credits with an overall grade point average (GPA) of at least 2.0/4.0 and a minimum GPA of 2.0/4.0 in both the core and major requirements, and clear all accounts with the university. Candidates for degrees are reminded that grades of "I" assigned during the last semester to courses required for graduation will result in delaying of graduation.

Degree Requirements (95 credits)

General Education Requirements 30 cr.

A - Communication Skills in English and Arabic 9 cr.

- Two courses from the subcategory *English (6 cr.)*

ENL 213 And

ENL 223 Or ENL 230

- One course from the subcategory *Arabic (3cr.)*

ARB 211, ARB 212, ARB 224, ARB 231, ARB 317

B – Philosophy and Religion 6 cr.

- One course from the subcategory *Religion (3cr.)*

REG 212, REG 213, REG 313, REG 314

- One course from the subcategory *Philosophy (3cr.)*

ENS 205, PHL 211, PHL 311, POS 345

C - Cultural Studies and Social Sciences 6 cr.

- Two courses from the category *Cultural Studies and Social Sciences (6 cr.)*

HUT 305, HUT 306, MUS 210, FAP 215, COA 359, COA 315, NTR 215, ARP 215, PSL 201, SOL 201, SOL 301, BAD 201, ECN 200, ECN 211, ECN 212

D - Citizenship 6 cr.

- Two courses from the category *Citizenship (6 cr.)*

HIT 211, POS 201, POS 210, POS 240, IAF 301, POS 319, POS 337

E - Science and Technology 3 cr.

- One course from the subcategory *Mathematics/Statistics/Computer Science (3 cr.)*

CSC 201, MAT 201, MAT 202, MAT 204, MAT 211, STA 202, STA 210

OR

- One course from the subcategory *Natural Sciences (3 cr.)*

AST 201, BIO 202, BIO 203, CHM 211, ENS 201, ENS 202, ENS 206, HEA 201, NTR 201, PHS 207

Students majoring in Physics are not allowed to count PHS courses within the pool of required GER courses.

Core Requirements**26 cr.**

MAT 213, MAT 215, MAT 224, MAT 235, PHS 206, PHS 212, PHS 213, PHS 275, PHS 276, EEN 205.

Major Requirements**33 cr.**

PHS301, PHS 303, PHS 351 (or MAT 335), PHS 373, PHS 374, PHS 415, PHS 417, PHS 435, PHS 497, AST 210

Two courses of the following (headings are suggestions):

Astrophysics courses: AST 320, 321, 370 (Students opting for two of these courses are encouraged to take the third as a free elective)

Hydrodynamics courses: MEN 320, MEN 321 (Students opting for these two courses are encouraged to take MEN 550 (Computational Methods in Thermal and Fluid Mechanics) as a free elective).

Semiconductors courses: EEN 206, PHS 405 (Students opting for these two courses will be encouraged to take EEN 416 (Semiconductor devices) as a free elective)

Nuclear & Particle Physics courses: PHS 315, PHS 403

Other: PHS 460

Free Electives**6 cr.**

—	—	GER	3 cr.

Minor in Physics (16 credits)

The Minor in Physics aims at giving students who are literate in mathematics a basic background enabling them to approach any applied or advanced topic in physics. It makes them eligible for graduate work in physics without the need for remedial courses or a disadvantage vis-à-vis physics majors. More specifically, the Minor in Physics will:

- Prepare students to work on advanced topics in Physics.
- Give a math major an edge when pursuing a teaching career in sciences and mathematics.
- Give the engineer more problem-solving techniques, crucial for his/her career.

The Minor proposed is aimed at scientifically minded students who already possess the necessary mathematical skills to tackle advanced physics courses. It will be most attractive for engineering and math students.

Admission Requirements

General requirements for admission to this minor are those of the University policy on Undergraduate Academic Minors. No additional requirements are needed.

Pool of Courses

PHS 213; PHS 303; PHS 415; PHS 417*; PHS 435 (4 cr.)

Graduation Requirements and Suggested Schedule

To satisfy the graduation requirements of a minor in Physics, a student must pass **all five courses** from the pool of courses above. Students are not exempted from the prerequisites of these courses. The level of mathematics required in PHS 303 and above is MAT 335. A suggested schedule is as follows:

- First semester (1 course; 3 credits)
PHS 213[♦]
- Second semester (2 courses; 6 credits)
PHS 303; PHS 417
- Third semester (2 courses; 7 credits)
PHS 415; PHS 435 (4 cr.)

D is the passing grade for each course, and the minor should be completed with a GPA of 2.0.

* EEN 330 taken at the departments of Electrical Engineering and Computer & Communication Engineering is equivalent to PHS 417. Students from these majors may ask to replace PHS 417 with EEN 330.

[♦] This course is part of the undergraduate majors in Electrical Engineering, Computer and Communication Engineering, and Mathematics.

Undergraduate Courses: Physics

PHS 101 General Physics I (3.0); 3 cr. A basic course covering: vectors, Newton's laws of motion, particle kinematics and dynamics, work, energy, linear and angular momentum, rotational motion, rigid body, equilibrium and Statistics. *Prerequisite:* Freshman Standing.

PHS 102 General Physics II (3.0); 3 cr. A basic course covering electric fields and electrical potential; DC-circuits; magnetic fields; capacitance and inductance; AC-circuits and electromagnetic waves. *Prerequisite:* Freshman Standing.

PHS 171 General Physics I Laboratory (0.3); 1 cr. Laboratory course illustrating the principles and experiments taught in General Physics I. *Corequisite:* PHS 101.

PHS 172 General Physics II Laboratory (0.3); 1 cr. Laboratory course illustrating the principles and experiments taught in General Physics II. *Corequisite:* PHS 102.

PHS 203 General Physics III (3.0); 3 cr. A course covering waves and corpuscles, sound, acoustics, reflection and refraction of light; interference and diffraction; polarization, spectrometry, and laser optics. *Prerequisite:* Sophomore Standing.

PHS 204 Applied Mechanics (4.0); 4 cr. Newton's laws and applications. Conservation of energy and linear momentum, collision. Rotational kinematics and dynamics, angular momentum and its conservation. Equilibrium. Oscillations. Universal gravitation. *Prerequisite:* Sophomore Standing.

PHS 205 Thermodynamics and Waves (4.0); 4 cr. An introduction to thermodynamics and the physics of waves: it covers concepts of temperature and heat, the laws of thermodynamics, heat engine and refrigerators, entropy; the kinetic theory of gases. Added to these, it covers the basic concepts of waves: harmonic waves, energy, superposition principle, reflection of waves, standing waves, with applications to mechanical waves (sound, surface waves...) and light. *Prerequisite:* Sophomore standing.

PHS 206 Heat, Vibration and Waves (3.0); 3cr. Introduction to thermodynamics: Kinetic Theory, Zeroth, First and Second Law of

Thermodynamics. Vibrations: Simple Harmonic Motion, Damped and Forced Oscillators, Coupled Oscillators and Normal modes, Damped and Forces Coupled Oscillators. Waves: Mechanical waves as a chain of coupled oscillators, harmonic waves, Fourier combination of waves. *Prerequisite:* Sophomore standing.

PHS 207 Development of Science and Technology (3.0): 3 cr. The principal periods in the development of the scientific thought. The contribution of individuals like Aristotle, Ptolemy, Copernicus, Galileo, Newton, Darwin, Mendel, and Einstein. *Prerequisite:* Sophomore Standing.

PHS 208 Physics for Life Sciences I (3.0); 3 cr. This course covers mechanics, relativity, hydrostatics, hydrodynamics, thermodynamics, and the physics of waves, with special emphasis on biological applications, *Prerequisite:* Sophomore Standing.

PHS 209 Physics for Life Sciences II (3.0); 3 cr. This course covers electricity and magnetism, modern physics: early quantum theory with emphasis on atomic and molecular applications, spectroscopy, nuclear physics, statistical mechanics, with special emphasis on biological and medical applications. *Prerequisite:* Sophomore Standing.

PHS 212 Electricity and Magnetism (3.0); 3 cr. Electrostatics: field, potential and dielectric. DC circuits and laws. Magnetic field, Ampere's and Faraday's laws, induction. AC circuits. Qualitative discussion of Maxwell's equations. *Corequisite:* MAT 224.

PHS 213 Modern Physics (3.0); 3 cr. Special Relativity. Quantization of electricity, charge, and light, blackbody radiation. particle-wave duality. Bohr model of Hydrogen. Schrodinger wave equation and application to one dimensional problems. Three-dimensional solution of the Hydrogen atom. Angular momentum and spin. *Corequisite:* MAT 235.

PHS 271 Electricity and Magnetism Laboratory (0.2); 1 cr. Selected experiments in electricity and magnetism. Emphasis is placed on statistical treatment of data and error estimation. *Corequisite:* PHS 212.

PHS 272 Modern Physics Laboratory (0.2); 1cr. Selected experiments in modern physics.

Emphasis is placed on statistical treatment of data and error estimation. *Corequisite*: PHS 213.

PHS 275 Experimental Physics I (0.3); 1 cr.

The first of a sequence of two sophomore physics labs. It includes selected experiments in classical mechanics, electricity and magnetism, and modern physics such as collisions, vibrations and waves, electric and magnetic field measurements, emission line spectroscopy, etc. Students learn about error analysis, software packages for data visualization and data analysis such as Excel, Matlab, and lab report writing. *Corequisite*: PHS 206.

PHS 276 Experimental Physics II (0.3); 1 cr.

A continuation of PHS 275 with additional experiments and topics. *Prerequisite*: PHS 275

PHS 278 Physics for Life Sciences I Lab (0.2); 1 cr.

Lab to accompany PHS 208. Experiments are performed in Mechanics, Hydrodynamics, Heat transfer and Waves. *Corequisite*: PHS 208.

PHY 279 Physics for Life Sciences II Lab (0.2) 1 cr.

Lab to accompany PHS 209. Experiments in Electricity and Magnetism: Hall Effect, Circuits, Helmholtz Coil, and Modern Physics: Blackbody Radiation, Spectroscopy... *Corequisite*: PHS 209.

PHS 301 Optics (3.0); 3 cr.

Topics covered: wave optics and properties of light including interference, Fraunhofer and Fresnel diffraction, polarization and double refraction. Introduction to lasers and holography. *Prerequisite*: PHS 206, PHS 212.

PHS 303 Analytical Mechanics (3.0); 3 cr.

Particle kinematics and dynamics, central force problem, motion in non-inertial frames of reference, kinematics and dynamics of rigid bodies, Lagrangian mechanics, small oscillations, and relativistic momentum and energy. *Corequisite*: PHS 351 or MAT 335.

PHS 315 Nuclear Physics (3.0); 3 cr.

General nuclear properties, radioactivity, nucleon-nucleon interaction, scattering, nuclear models, and nuclear reactions. *Prerequisite*: PHS 213.

PHS 346 Mathematical Methods for Physics I (3.1); 3 cr.

The first of two courses covering mathematical tools relevant to the solution of physical problems. Topics include diagonalization of matrices, transformation of coordinates, Jacobian, functions of complex variables, gradient, curl, divergence, and elements of vector analysis. Both courses

include a weekly lab session on a mathematical software package. *Prerequisites*: MAT 215, MAT 224.

PHS 350 Mathematical Methods for Physics II (3.1); 3 cr.

Second of the series of two courses in mathematical tools of physics. Topics include partial differential equations, Fourier series and transforms, special functions, orthogonal functions, Greene's functions, integral equations. *Prerequisites*: MAT 215, MAT 224, MAT 235, PHS 346.

PHS 351 Mathematical Methods for Physics (3.0); 3 cr.

Topics include partial differential equations, Fourier series and transforms, wavelets, special functions, orthogonal functions, Greene's function, integral equations. *Prerequisites*: MAT 215, MAT 224, MAT 235.

PHS 373 Experimental Physics III (0.3); 1 cr.

The first of a sequence of two junior physics labs with more advanced experiments that may include forced oscillations and resonance, the Hall effect, diffraction, Zeeman effect, etc. Emphasis will continue on data and error analysis and report writing. *Prerequisite*: Junior Standing

PHS 374 Experimental Physics IV (0.3); 1 cr.

The second of a sequence of two junior physics labs with more advanced experiments that will include long experiments on measurements of fundamental constants and other advanced topics. This lab will serve as a preparation for the Senior Project. *Prerequisite*: PHS 373.

PHS 375 Experimental Physics (0.6); 3 cr.

Experiments in atomic and molecular physics, optics, and mechanical vibrations. Students have to perform open-ended experiments, and use computers for data analysis. *Prerequisites*: PHS 271 and PHS 272.

PHS 403 Elementary Particle Physics (3.0); 3 cr.

Survey of elementary particles: leptons, hadrons, and quarks. Invariance principles and conservation laws. Detectors and accelerators. Phenomenological study of interactions. *Prerequisites*: PHS 435.

PHS 405 Solid State Physics (3.0); 3 cr.

Topics include crystal structure, the band theory, the free-electron and Fermi-Dirac theory, and the physical properties of semiconductors and metals. *Prerequisites*: PHS 415

PHS 415 Thermal and Statistical Physics (3.0); 3 cr.

Topics include: entropy and

probability, energy and temperature, the three laws of thermodynamics, Maxwell-Boltzmann, Bose-Einstein and Fermi-Dirac statistics, equation of state for simple systems, and elementary theory of phase transitions. *Prerequisites:* Senior Standing.

PHS 417 Electromagnetic Theory (3.0); 3 cr. Maxwell equations with applications to physical problems. Topics include: electrostatics, magnetostatics, Laplace and Poisson equations, dielectric and magnetic materials, electromagnetic waves and radiation, and special theory of relativity. *Prerequisites:* PHS 212, PHS 351 or MAT 335.

PHS 435 Quantum Mechanics (4.0) 4 cr. “Modern” quantum Mechanics. Hilbert space, operators, eigenvalues and eigenfunctions.

Matrix formulation of quantum mechanics. Time-independent and time dependent perturbation theories. Scattering theory and interaction of radiation with matter. *Prerequisites:* PHS 213, PHS 303.

PHS 460 Selected Topics in Physics (3.0); 3 cr. Advanced topics selected from the different disciplines of physics. *Prerequisite:* Senior Standing.

PHS 497 Senior Project. 3 cr. A selected project in one of the different fields of physics. The project is expected to be an introduction to research through the involvement in an actual project carried by faculty members. *Prerequisites:* Senior standing and consent of the instructor.

Undergraduate Courses Astronomy

AST 201 Discovering Astronomy (3.0); 3 cr. A non-calculus based introduction to astronomy. It explores the wonders of the universe using observations from space and from the ground. It covers the solar system, stars and their evolution (black holes, white dwarfs...), galaxies and cosmology (the Big-Bang...). The course will include an observing night to discover the night sky, readings, and some elementary observations. Not open to physics students

AST 210 Introduction to Astronomy and Astrophysics (3.0); 3 cr. This introductory astrophysics course is designed for students majoring in physics. The course will include an introduction to the night sky and coordinate systems, magnitudes, and telescope types. The course will also introduce students to stellar astrophysics, the solar system, and galaxies. *Corequisite:* PHS 213

AST 320 Astrophysics I: Stars (3.0); 3 cr. This course will specifically concentrate on stellar astrophysics. The course will discuss stellar

structure and nuclear astrophysics, stellar atmospheres and radiative transfer, star formation processes, and evolution of stars beyond the main sequence (pulsations, AGBs, white dwarfs, neutron stars, supernovae). *Prerequisite:* AST 210

AST 321 Astrophysics II: Galaxies (3.0); 3 cr. This course deals with the nature and properties of galaxies and provides an introduction to cosmology. The course will cover the Milky Way, and properties of spiral, elliptical, and irregular galaxies. The course will also cover the basic elements of cosmology and the birth and evolution of the Universe as a whole. *Prerequisite:* AST 210.

AST 370 Observational Astronomy (0.9); 3 cr. An introduction to the major observational techniques used in astrophysics and their corresponding instrumentation, based on practical observational projects. This course will also include a discussion of telescope optics. *Prerequisite:* AST 210.

Undergraduate Courses: Geology

GEO 201 Physical Geology (3.0); 3 cr. Basic principles of structural and depositional geologic processes. Structure of the Earth. Minerals, rocks and soils. Minerals and Rocks identification. Geological maps interpretation. *Prerequisite:* Sophomore Standing.

GEO 202 Geology for Architects (2.0) 2 cr. Minerals and Rocks, Earthquakes, Interpreting and Reading Topographical and Geological Maps, Geology of Lebanon, Laboratory Application and Field Trips.

GEO 311 Hydrogeology (3.0); 3 cr. Hydrologic cycle; meteorology; groundwater resources and

uses; groundwater movement, natural and artificial discharge. Groundwater erosion and deposition. Lebanon's water resources.

GEO 312 Engineering Geology: 3 cr. Weather and soil-forming Processes: Application of engineering geology in foundations design; properties of rock substance and rock mass; Tunnels; Mass-Wasting Process; Ground Water in Engineering Geology; Fluvial Processes; Dams; Land subsidence; coastal engineering geology; Earthquakes; Case Studies. *Prerequisite:* GEO 201.

FACULTY OF NURSING AND HEALTH SCIENCES

NU FNHS

Antoine G. Farhat, Ph.D., *Acting Dean*

FACULTY DIRECTORY

Office of the Acting Dean

FNAS Building, 3rd floor, Room S 325

Tel: 09-218950/51/52 (Extension 2093)

e-mail: afarhat@ndu.edu.lb

FACULTY OF NURSING AND HEALTH SCIENCES

LIST OF FULL-TIME FACULTY MEMBERS

Assistant Professor

Doumit Jaqueline, Doctorate, 1996, *Biomedical Engineering*, Université de Saint-Etienne, France

Farhat, Antoine, Ph.D., 1999, Nutrition, McGill University, Canada

Co-Academic

Abou-Jaoude, Maya, MS, 1999, *Food Technology*, American University of Beirut, Lebanon

Staff Member

Fahed-Mozaya, Nathalie, B.A. Advertising and Marketing, 2001, Notre Dame University, Lebanon, Dean's Administrative Assistant, Faculty of Nursing and Health Sciences

FACULTY OF NURSING AND HEALTH SCIENCES (FNHS)

Acting Dean: *Dr. Antoine Farhat*

Administrative Assistant: *Mrs. Nathalie Fahed-Mozaya*

HISTORICAL OVERVIEW

NDU requested from the ministry of Education, the establishment of a Faculty of Nursing along with a Health Sciences component during the academic year 2006–2007.

Specific requirements, such as the installation and the equipment of clinical Nursing labs on campus, contract agreements with nearby accredited hospitals, qualified administrators and faculty members in Nursing, were met during the Fall 2007–2008 and, accordingly the Faculty of Nursing and Health Sciences was recognized by the ministry of Education in March 2008 and officially licensed on September 5, 2008. Within the newly established Faculty of Nursing and Health Sciences, three programs of studies are now being offered:

- BS in Nursing
- BS in Nutrition and Dietetics
- BS in Medical Lab Technology

MISSION, VISION AND VALUES

Mission

The Faculty of Nursing and Health Sciences prepares young men and women to become effective professional capable of providing scientific, efficient and appropriate quality care to clients in various settings within the health care system.

The program offers students comprehensive knowledge and clinical experience that enable them to assess, plan, implement and evaluate an adequate treatment for clients in different settings throughout the life cycle.

FNHS students will be prepared to become leading practitioners in their professions and agents of change in the health care system.

Vision

The faculty of Nursing and Health Sciences aims at establishing a professional leading programs in Lebanon by offering well developed curricula with biological, social, behavioral, and professional components, fostering a life-long learning process and developing leaders in the health care system.

The Medical Lab Technology, Nursing and Nutrition / Dietetics are unique professions involving competence as well as caring and compassion. They are increasingly emerging as a result of research and evidence-based practice.

Professional care givers are prepared to function independently, interdependently, and collaboratively in a variety of settings.

Values

The followings are the values that inspire the work of the FNHS faculty, students and staff:

- Academic integrity
- Academic excellence
- Ethical behavior and conduct
- Belief in the welfare of the caretaker
- Confidentiality

- Lifelong learning
- Service to the community
- Teamwork
- Cross-cultural understanding

FACULTY PROFILE

Undergraduate Program

Each undergraduate program offered at the FNHS is composed of three components:

- General Education Requirements (GER)
- Core and Major Requirements
- Free Elective Requirements

The Faculty of Nursing and Health Sciences offers undergraduate programs leading to the degree of:

- BS in Medical Laboratory Technology (103 credits)
- BS in Nursing (105 credits)
- BS in Nutrition and Dietetics (94 credits)

DEPARTMENT OF NURSING AND HEALTH SCIENCES

The Degree of Bachelor of Science in Medical Laboratory Technology

Medical Laboratory Technology (MLT) is a clinically-oriented curriculum that combines academic and professional training. It is designed specifically to meet modern requirements for the profession of medical laboratory technology. MLT is an important contributor to the medical team involved in the diagnosis and treatment of diseases. Physicians rely heavily upon laboratory test results before making decisions. Thus, students will be trained to develop their ability to interpret generated laboratory results in order to provide reliable data for disease diagnosis. An MLT graduate may be employed as laboratory technician, researcher, assistant to a physician, or any other technical position in scientific, medical or pharmaceutical laboratories of hospitals and universities.

Admission Requirements

For admission requirements to the degree of BS in Medical Laboratory Technology, refer to the section entitled "Undergraduate Admission" of this catalog.

Graduation Requirements

To receive the degree of BS in Medical Laboratory Technology, a student must fulfill all requirements of the degree program, complete all required courses, accumulate a total of 103 credits (including clinical training), with a overall grade point average (GPA) of at least 2.0/4.0, and a minimum GPA of 2.3/4.0 in both the core and major requirements, and clear all accounts with the university. Candidates for degrees are reminded that grades of "I" assigned during the last semester to courses required for graduation will result in delaying of graduation.

Degree Requirements (103 Credits)

General Education Requirements

30 cr.

a) Communications Skills in English and Arabic

9 cr.

- Two courses from the subcategory *English* (6 cr.)

ENL 213 and

ENL 223 or ENL 230

- One course from the subcategory *Arabic* (3 cr.)

ARB 211, ARB 212, ARB 224, ARB 231, ARB 317

b) Philosophy and Religion

6 cr.

- One course from the subcategory *Religion* (3 cr.)

REG 212, REG 213, REG 313, REG 314

- One course from the subcategory *Philosophy* (3 cr.)

ENS 205, PHL 211, PHL 311, POS 345

c) Cultural Studies and Social Sciences

6 cr.

Two courses from the category *Cultural Studies and Social Sciences* (6 cr.)

HUT 305, HUT 306, MUS 210, FAP 215, COA 359, COA 315, NTR 215, ARP

215, PSL 201, SOL 201, SOL 301, BAD 201, ECN 200, ECN 211, ECN 212

d) Citizenship

6 cr.

Two courses from the category *Citizenship* (6 cr.)

HIT 211, POS 201, POS 210, POS 240, IAF 301, POS 319, POS 337

e) Science and Technology **3 cr.**

- One course from the subcategory *Mathematics/Statistics/Computer Science (3 cr.)*

CSC 201, MAT 201, MAT 202, MAT 204, MAT 211, STA 202, STA 210

OR

- One course from the subcategory *Natural Sciences (3 cr.)*

AST 201, BIO 202, BIO 203, CHM 211, ENS 201, ENS 202, ENS 206, HEA 201, NTR 201, PHS 207, PHS 211

Students majoring in Medical Lab Technology are not allowed to count MLT courses within the pool of required GER courses.

Core Requirements **18 cr.**

BIO 211, BIO 215, BIO 227, CHM 213, CHM 215, CHM 273

Major Requirements **49 cr.**

BIO 222, MLT 312, MLT 313, MLT 315, MLT 317, MLT 323, MLT 324, MLT 326, MLT 328, MLT 330, MLT 340, MLT 410, MLT 420, MLT 430, MLT 440, MLT 450, MLT 460, MLT 470

Free Electives **6 cr.**

Students are encouraged to take STA 203

**Bachelor of Science in Medical Laboratory Technology
Suggested Program (103 Credits)**

Fall Semester I (16 Credits)

BIO	211	General Biology I	4 cr.
CHM	211	Principles of Chemistry (GER)	3 cr.
ENL	213	Sophomore English Rhetoric (GER)	3 cr.
—	—	(GER)	3 cr.
—	—	Free Elective	3 cr.

Spring Semester I (16 Credits)

BIO	215	Introductory Human physiology	3 cr.
CHM	215	Quantitative Analysis	4 cr.
CHM	213	Basic Organic Chemistry	3 cr.
—	—	(GER)	3 cr.
BIO	222	Immunology	3 cr.

Summer Session I (6 Credits)

ARB	—	GER	3 cr.
ENL	223/ 230	(GER)	3 cr.

Fall Semester II (15 Credits)

CHM	273	Organic Chemistry Laboratory	1 cr.
MLT	312	Clinical Chemistry I	3 cr.
MLT	313	Clinical Bacteriology I	3 cr.
MLT	315	Clinical Parasitology I	2 cr.
MLT	317	Clinical Pathology I	3 cr.
—	—	GER	3 cr.

Spring Semester II (16 Credits)

BIO	227	Introductory Biochemistry	3 cr.
MLT	323	Clinical Chemistry II	3 cr.
MLT	324	Clinical Bacteriology II	3 cr.
MLT	326	Clinical Parasitology II	2 cr.
MLT	328	Clinical Pathology II	3 cr.
MLT	330	Clinical Histopathology and Cytology Techniques	2 cr.

Summer Session II (6 Credits)

REG	—	GER	3 cr.
—	—	Free Elective	3 cr.

Fall Semester III (14 Credits)

MLT	340	Serology	2 cr.
MLT	410	Training in Clinical Chemistry	4 cr.
MLT	420	Training in Clinical Hematology	4 cr.
MLT	430	Training in Clinical Bacteriology	4 cr.

Spring Semester III (14 Credits)

MLT	440	Training in Clinical Parasitology & Urinalysis	2 cr.
MLT	450	Training in Serology	2 cr.
MLT	460	Trainig in Blood Banking	2 cr.
MLT	470	Training in Phlebotomy, Cytogenetics & Histological Techniques	2 cr.
—	—	GER	3 cr.
—	—	GER	3 cr.

Undergraduate Courses: Medical Laboratory Technology

MLT 311 Clinical Chemistry I (2.0); 2 cr. Concepts of clinical chemistry, mechanisms of diseases and the correlation of laboratory data with those diseases. Clinical interpretation of normal and abnormal values. *Prerequisite:* CHM 211.

MLT 312 Clinical Chemistry I (3.0); 3 cr. Concepts of clinical chemistry, mechanisms of diseases and the correlation of laboratory data with those diseases. Clinical interpretation of normal and abnormal values. *Prerequisite:* CHM 211.

MLT 313 Clinical Bacteriology I (3.0); 3 cr. Fundamental aspects of basic and clinical bacteriology. The course consists of lectures and demonstrations in general bacteriology. *Prerequisite:* BIO 211.

MLT 315 Clinical Parasitology I (2.0); 2 cr. An introductory course on the theory and laboratory techniques used in the diagnosis of parasitic infections of humans. *Prerequisite:* BIO 211.

MLT 317 Clinical Pathology I (3.0); 3 cr. The course consists of lectures and demonstrations in hematology, serology and blood banking.

MLT 322 Clinical Chemistry II (2.0); 2 cr. Continuation of MLT 311. *Prerequisite:* MLT 311.

MLT 323 Clinical Chemistry II (2.0); 2 cr. Continuation of MLT 312. *Prerequisite:* MLT 312.

MLT 324 Clinical Bacteriology II (2.2); 3 cr. Deals with practical experiments in clinical bacteriology which include preparation of smears and culture media, identification tests, for different types of bacteria encountered in clinical microbiology. *Prerequisite:* MLT 313.

MLT 326 Clinical Parasitology II (1.2); 2 cr. Continuation of MLT 315, deals with basic clinical parasitology. Lectures and demonstrations in laboratory techniques that are used in the diagnosis of parasitic infections of humans. *Prerequisite:* MLT 315.

MLT 328 Clinical Pathology II (3.0); 3 cr. Continuation of MLT 317.

MLT 330 Clinical Histopathology and Cytology Techniques (2.0); 2 cr. Series of lectures in cell biology and normal histology of various human tissues. Lectures on techniques of tissue handling, preparation and staining of specimens and smear of cytological material.

MLT 340 Serology (2.0); 2 cr. Basic aspects of clinical serology which involves the study of mechanisms, different formats, interfering factors, application and interpretation of commonly used serological tests.

MLT 401 Selected Topics in Laboratory Medicine I; 1 cr. Lectures on recent advances or special topics in the various disciplines of laboratory medicine.

MLT 402 Selected Topics in Laboratory Medicine II; 1 cr. Continuation of MLT 401.

MLT 410 Practical Training in Clinical Chemistry; 4 cr. 5-weeks practical training in clinical chemistry.

MLT 420 Practical Training in Clinical Hematology; 4 cr. 5-weeks practical training in clinical hematology.

MLT 430 Practical Training in Clinical Bacteriology; 4 cr. 5-weeks practical training in clinical bacteriology.

MLT 440 Practical Training in Clinical Parasitology and Urinalysis; 2 cr. 4-weeks practical training in clinical parasitology and urinalysis.

MLT 450 Practical Training in Blood Banking; 2 cr. 4-weeks practical training in serology.

MLT 460 Practical training in Blood Banking; 2 cr. 4-weeks practical training in blood banking.

MLT 470 Practical Training in Phlebotomy, Cytogenetics & Histological Techniques; 2 cr. 4-weeks practical training in phlebotomy, cytogenetics & histological techniques.

The Degree of Bachelor of Science in Nursing (BSN)

The BSN prepares young men and women to become effective professional nurses capable of providing scientific, efficient and appropriate quality nursing care to clients in various settings within the health care system.

The program offers nursing students comprehensive knowledge and clinical experience that enable them to assess, plan, implement and evaluate an adequate treatment plan for clients in different settings throughout the life cycle.

Nursing students will be prepared to become leading practitioners in their profession and agents of change in the health care system.

The BSN aims at establishing a professional leading program in Lebanon by offering a well developed curriculum with biological, social, behavioral, and professional components, fostering a life-long learning process and developing leaders in the health care system.

Nursing is a unique profession involving competence as well as caring and compassion. It is increasingly emerging as a result of research and evidence-based practice.

Professional nurses are prepared to function independently, interdependently, and collaboratively in a variety of settings.

Admission Requirements

For admission requirements to the degree of BS in Nursing, refer to the section entitled “Undergraduate Admission” of this catalog.

Graduation Requirements

To receive the degree of BS in Nursing, a student must fulfill all requirements of his/her degree program, complete all required courses, accumulate a total of 105 credits with a minimum overall grade point average (GPA) of at least 2.0/4.0, and a minimum GPA of 2.3/4.0 in core and major courses.

Degree Requirements (105 Credits)

General Education Requirements	27 cr.
a) Communications Skills in English and Arabic	9 cr.
ENL 213, ENL 230 ARB 211 or ARB 231	
b) Philosophy and Religion	6 cr.
REG 212 or REG 213 or REG 313, NUR 203	
c) Cultural Studies	6 cr.
EDU 213, PSL 201	
d) Citizenship	3 cr.
POS 240 or POS 319	
e) Science and Technology	3 cr.
NTR 210 or NTR 215

Undergraduate Courses: Nursing

NUR 202 Nursing Concepts: Theory and Practice (1.0); 1 cr. The course offers an introduction to Nursing theory and practice emphasizing the principles of clinical procedures, the use of medical instruments and the various ways of handling patient care throughout the nursing care delivery.

NUR 203 Introduction to Bioethics (3.0); 3 cr. The course presents the basic principles and guidelines of bioethical issues. Moral problems arising in the delivery of health care are addressed within the ethical context.

NUR 204 Health Assessment across the Life Span (2.0); 2 cr. This course provides the student with the knowledge and skills needed to assess the physical, psychosocial and cultural health status of individuals from infancy to old age in order to identify normal and abnormal findings.

NUR 205 Nurse – Patient Relationship (2.0); 2 cr. This course explores aspects of therapeutic communication skills in the nurse – patient relationship. The goal is to achieve a therapeutic professional outcome in the process of health care delivery. Moreover, the course brings insight and behavioral change in the exchange process.

NUR 301 Adult Health Nursing I – Theory (3.0); 3 cr. This course develops the knowledge and application of scientific principles in the care of adults presenting medical – surgical problems. It builds on the holistic approach to nursing care of the client through the application of the nursing process.

NUR 302 Adult Health Nursing I – Clinical (0.6); 3 cr. Using the nursing process, this course gives the student the opportunity to apply in a clinical setting the concepts and principles stated in NUR301. *Corequisite:* NUR 301.

NUR 303 Adult Health Nursing II – Theory (3.0); 3 cr. This course is a continuation of NUR 301 with an emphasis on dysfunctions related, among others, to metabolic, endocrine, neurologic, rheumatic and chronic conditions.

NUR 304 Adult Health Nursing II – Clinical (0.6); 3 cr. Using the nursing process, this course gives the student the opportunity to implement the concepts stated in NUR 303 in a variety of settings. *Corequisite:* NUR 303.

NUR 305 Geriatric Nursing – Theory (3.0); 3 cr. The course will focus on theories and concepts of the aging process, health problems and needs of the elderly, and health promotion and maintenance of the elderly in the community.

NUR 306 Geriatric Nursing – Clinical (0.6); 3 cr. The course will help in assessing and evaluating the impact of the aging process on the individual, the family and the society, as well as in planning and implementing appropriate nursing care for the elderly person. *Corequisite:* NUR 305.

NUR 307 Pharmacology for Nursing (2.0); 2 cr. This course focuses on the study of basic concepts in pharmacology and introduces the student to the different groups of therapeutic drugs used in professional nursing. It also introduces the role and responsibilities of the professional nurse in the administration of medication.

NUR 308 Community Health Nursing – Theory (2.0); 2 cr. The course presents the theories and concepts of health care in the community, the different nursing roles in community health, and the various legal, social and environmental issues affecting community health.

NUR 309 Community Health Nursing – Clinical (0.4); 2 cr. The course focuses on individual, family and community responses to actual or potential health problems. Health promotion, disease prevention, and care of clients with long-term illness are addressed. The clinical nursing process is used to determine the appropriate intervention in cooperation with team workers. *Corequisite:* NUR 308.

NUR 310 Legislation for Nursing (2.0); 2 cr. This course provides an understanding of the legal issues related to the nursing profession, and gives the student awareness and discernment in the process of performance within the health system, especially in Lebanon.

NUR 402 Obstetric Nursing – Theory (3.0); 3 cr. This course will focus on the nursing care of the woman during the maternity cycle and the care of the newborn, taking into consideration the physical, psychological and emotional needs of the woman during the pregnancy and post partum periods.

NUR 403 Obstetric Nursing – Clinical (0.6); 3 cr. The course emphasizes the implementation of the nursing concepts and process in maternal and neonatal care units. *Corequisite:* NUR 402.

NUR 404 Pediatric Nursing – Theory (3.0); 3 cr. This course presents theories and concepts associated with the response of children to acute and chronic illness. The emphasis is on the child's growth and development in relation to illness. The impact of developmental variables from infancy to adolescence is integrated throughout the course.

NUR 405 Pediatric Nursing – Clinical (0.6); 3 cr. This course focuses on the application of the theory of pediatric nursing in the clinical process for a variety of settings, using the nursing interventions in the care of the children and their families to help them in coping with acute and chronic health problems. *Corequisite:* NUR 404.

NUR 406 Psychiatric and Mental Health Nursing – Theory (3.0); 3 cr. This course introduces the student to principles and concepts associated with psychiatric and mental health nursing, and to the care of individuals and families with acute and chronic mental health problems.

NUR 407 Psychiatric and Mental Health Nursing – Clinical (0.6); 3 cr. This course focuses on the application of the nursing process

regarding the interventions in the clinical setting on patients suffering from acute and long-term mental health problems. Special emphasis is placed on assessing, planning, and establishing a nurse – patient therapeutic relationship in collaboration with the multi-disciplinary health team. *Corequisite:* NUR 406.

NUR 408 Leadership and Management in Nursing – Theory (3.0); 3 cr. The course will focus on the theories, concepts and modalities of leadership and management in nursing. It will assist the student in understanding the professional role of the nurse as a potential leader in various areas of health care.

NUR 409 Leadership and Management in Nursing – Clinical (0.6); 3 cr. The course will allow the student to make the transition from a dependent role as a student to a relatively independent role as a nurse-leader by observing, assisting and practicing the different modalities and skills of leadership and management in a variety of health care settings. *Corequisite:* NUR 408.

NUR 410 Nursing Research (3.0); 3 cr. The course introduces the student to the research scientific process and its application to nursing. Emphasis is placed on the basic research steps towards the assessment and evaluation of the data and the potential use of the findings.

The Degree of Bachelor of Science in Nutrition and Dietetics

Nutrition and Dietetics is an interdisciplinary field that focuses on the principles of human nutrition and foods. Nutrition is the study of food intake influence on health and well-being. It covers specific nutrients' requirements in the diet, their physiological functions in the body and the consequences of nutrients deficiency. It requires an understanding of the composition of food and factors that determine food choice and availability. The study of nutrition also explores the role of diet in the causation of diseases of multi-factorial origin, such as heart disease, diabetes and cancer. The importance of nutrition in preventing diseases has now become well recognized in both developing and developed countries. Dietetics is becoming increasingly important in health promotion and wellness of people throughout the life cycle, from infancy to old age, and in the care of people who are ill. Rapid advances in medicine increase the dietitian's role as a member of the health care team.

Various career opportunities are available to the nutritionist and registered dietitian. Clinical nutritionists and dietitians work closely with other health professionals in hospitals, nursing homes, out-patient clinics, public health agencies and food service/or food processing industries. Administrative dietitians direct the planning, purchasing, production and service of meals in medical centers, restaurants and schools. Holders of graduate degrees in nutrition and dietetics may teach in universities or do research in the field. Experienced registered dietitians may become consultants and go into private practice.

Admission Requirements

For Admission requirements to the degree of BS in Nutrition or BS in Nutrition and Dietetics, refer to the section entitled "Undergraduate Admission" of this catalog.

Graduation requirements

To receive the degree of BS in Nutrition and Dietetics a student must fulfill all requirements of the degree program, complete all required courses, accumulate a total of 94 credits with an overall grade point average (GPA) of at least 2.0/4.0 and a minimum GPA of 2.3/4.0 in both the core and major requirements, and clear all accounts with the university. Candidates for degrees are reminded that grades of "I" assigned during the last semester to courses required for graduation will result in delaying of graduation.

Dietetics Internship

Graduates wishing to qualify as professional dietitians must complete a dietetics internship by spending a minimum of six months in a hospital. Although it is the responsibility of the graduate to make all arrangements for the dietetics internship with a hospital, the University may provide orientation and assistance in identifying internship opportunities. The certificate or attestation that a graduate has completed the required training period will be granted by the hospital.

Degree Requirements (94 Credits)

General Education Requirements	30 cr.
a) Communications Skills in English and Arabic	9 cr.
- Two courses from the subcategory <i>English (6 cr.)</i> ENL 213 and ENL 223 or ENL 230 - One course from the subcategory <i>Arabic (3 cr.)</i> ARB 211, ARB 212, ARB 224, ARB 231, ARB 317	
b) Philosophy and Religion	6 cr.
- One course from the subcategory <i>Religion (3 cr.)</i> REG 212, REG 213, REG 313, REG 314 - One course from the subcategory <i>Philosophy (3 cr.)</i> ENS 205, PHL 211, PHL 311, POS 345	
c) Cultural Studies and Social Sciences	6 cr.
Two courses from the category <i>Cultural Studies and Social Sciences (6 cr.)</i> HUT 305, HUT 306, MUS 210, FAP 215, COA 359, COA 315, NTR 215, ARP 215, PSL 201, SOL 201, SOL 301, BAD 201, ECN 200, ECN 211, ECN 212	
d) Citizenship	6 cr.
Two courses from the category <i>Citizenship (6 cr.)</i> HIT 211, POS 201, POS 210, POS 240, IAF 301, POS 319, POS 337	
e) Science and Technology	3 cr.
- One course from the subcategory <i>Mathematics/Statistics/Computer Science (3 cr.)</i> CSC 201, MAT 201, MAT 202, MAT 204, MAT 211, STA 202, STA 210 OR - One course from the subcategory <i>Natural Sciences (3 cr.)</i> AST 201, BIO 202, BIO 203, CHM 211, ENS 201, ENS 202, ENS 206, HEA 201, NTR 201, PHS 207, PHS 211 <i>Students majoring in Nutrition and Dietetics are not allowed to count HEA and NTR courses within the pool of required GER courses.</i>	
Core Requirements	15 cr.

Undergraduate Courses: Nutrition and Dietetics

NTR 201 (3.0); 3 cr. An introduction to the study of carbohydrates, fats, proteins, vitamins and minerals and their effects on health. An overview of the processes of digestion, absorption and their metabolism. *Prerequisite:* Sophomore Standing and ENL 105.

NTR 210 Human Nutrition (3.0); 3 cr. Study of macro- and micro-nutrients and their roles in the body, as well as the nutritional needs of an individual throughout the lifespan.

NTR 212 Food Sanitation and Safety (3.0); 3 cr. Food microbiology and food hygiene; causes of food poisoning and food-borne infections; prevention and safety. *Prerequisite:* NTR 201 or NTR 210.

NTR 215 Foods and Nutrition of World Cultures (3.0); 3 cr. The focus of the course is to enhance the student's basic understanding of the cultural factors, which influence food intake and nutritional status. Food and diet patterns of various culture groups will be explored through lecture, food preparation, food sampling, and guest speakers.

NTR 227 Nutritional Biochemistry (3.0); 3 cr. General biochemistry, with emphasis on the biochemical functions of nutrients and their metabolism. *Prerequisite:* BIO 211, and NTR 210, *Corequisite:* CHM 213.

NTR 313 Foodservice Management (3.0); 3 cr. The course focuses on planning and service of safe, nutritionally balanced meals within budgetary margins as well as technical operations in a foodservice system. It includes regulations and standards, and the basics of total quality management in health care and other institutions. *Prerequisite:* NTR 201 or NTR 210.

NTR 320 Food Chemistry (2.0); 2 cr. Covers chemical composition, physical and sensory properties of foods. Focuses on the structural considerations of food components (water in foods, lipids, carbohydrates and proteins), chemicals in foods, browning reactions and flavor of foods. *Prerequisite:* NTR 227.

NTR 321 Food Microbiology (3.2); 4 cr. A study of microorganisms with emphasis on food spoilage, food poisoning, and the control of pathogenic microorganisms in food. *Prerequisite:* BIO 211.

NTR 325 Food Analysis (1.2); 2 cr. Introduces the laboratory methods for chemical analysis of

nutrients and chemicals in food products. *Prerequisite:* CHM 215. *Corequisite:* NTR 320.

NTR 330 Community Nutrition (3.0); 3 cr. Focuses on community nutrition education programs in schools, health centers, government institutions, and mass media. Emphasis on current research in assessing community nutrition program needs as well as program implementation. *Prerequisite:* NTR 210.

NTR 335 Sports Nutrition (3.0); 3 cr. In-depth coverage of both nutrition and exercise physiology while delivering practical, applied information useful to provide dietary and training guidelines for different kinds of sports. *Prerequisite:* NTR 201 or NTR 210.

NTR 425 Food Processing (2.2); 3 cr. Covers the changes in basic constituents of foods (carbohydrates, lipids, proteins, vitamins, minerals, food enzymes, and water) resulting from processing and preparation. Focuses on the principles of food spoilage and food preservation, and the different laboratory methods of food processing. *Prerequisite:* NTR 320.

NTR 430 Advanced Human Nutrition (3.0); 3 cr. Covers human physiological needs for energy requirements; body needs from food groups such as carbohydrates, proteins and fats; control of nutrient metabolism; and methods of the nutritional assessment. *Prerequisite:* NTR 227 and BIO 215.

NTR 435 Nutrition in the Life Cycle (3.0); 3 cr. Covers the basic nutritional needs of people throughout their life cycle (infancy, childhood, adolescence, adulthood and elderly people) and the special nutritional requirements during pregnancy and lactation. *Prerequisite:* NTR 430.

NTR 440 Therapeutic Nutrition (3.2); 4 cr. Covers the nutritional needs of individuals throughout their life cycle and in various diseases. Provides the students with an understanding of how nutritional status is assessed in relation to health and disease at the individual and community levels by covering case studies reports and study modules. *Prerequisite:* NTR 430.

NTR 445 Introduction to Dietetics Profession (2.0); 2 cr. Reviews basic skills needed by the dietician including nutritional care, ethics, role

and responsibilities in various employment settings. *Prerequisite:* Senior Standing.

NTR 450 Dietetics Counseling and Communication (3.0); 3 cr. Application of the principles of dietetics in a hospital setting. Focuses on the techniques in collection and interpretation of dietary intake. Emphasis on the team concept of patient care and strategies for promoting change in nutritional education. *Prerequisite:* Senior Standing.

NTR 451 Advanced Nutrition I (3.0); 3 cr. Covers carbohydrates, proteins, lipids, fiber and other nutrients, and examines their body metabolism. *Prerequisite:* Senior standing and NTR 430.

NTR 452 Advanced Nutrition II (3.0); 3 cr. Covers the nutritional, biochemical and

physiological aspects of vitamins and minerals in human body. *Prerequisite:* NTR 451 and NTR 430.

NTR 455 Diet Therapy in Inborn Errors of Metabolism (3.0); 3 cr. The course deals with congenital defects that require special diet manipulations and possible nutrition support. *Prerequisite:* NTR 440.

NTR 460 Therapeutic Nutrition Practicum (1.3); 2 cr. Case study evaluation of selected topics in advanced therapeutic nutrition and related current pertinent research. *Corequisite:* NTR 440.

NTR 495 Project in Nutrition; 3 cr. Emphasizes current research in nutrition and dietetics. *Prerequisite:* Senior standing and consent of instructor.

Undergraduate Courses: Health

HEA 201 Health Awareness (3.0); 3 cr. Comprehensive prevention-oriented approach to personal health topics: stress management, mental health, physical fitness, nutrition and weight control, human sexuality, communicable and chronic diseases, addictive substances and personal safety.

HEA 203 Health Assessment (2.0); 2 cr. Lectures in the assessment of health throughout the life span, where students learn to identify normal and abnormal situations

FACULTY OF POLITICAL SCIENCE, PUBLIC ADMINISTRATION AND DIPLOMACY

Dean:

Administrative Assistant: *Mrs. Nayla Basbous*

HISTORICAL OVERVIEW

The Faculty of Political Science, Public Administration and Diplomacy was founded and licensed in 2000. It emerged from the Faculty of Humanities around the core degree programs of International Affairs and Diplomacy.

The rapid evolution of the new Faculty was the outcome of a dedicated collaborative effort of the expert faculty members and administrators who launched a persistent campaign of courses development and programs design. The incorporated new programs include in addition to the International Affairs and Diplomacy, MA level concentrations in International Law and Comparative Law; Bachelor and Masters level degrees in Political Science, with undergraduate concentrations in American Studies and Euro-Mediterranean Studies; and Public Administration.

In 2006, the Faculty of Political Science, Public Administration and Diplomacy introduced new BA and MA level concentrations in NGOs, under the major of Political Science. This was an integral part of our continuous efforts to implement further curricular innovations towards the accomplishment of the proposed objective of a comprehensive structural transformation into a Faculty of Law and Politics. To that effect, we are currently developing BA and MA degrees in Public Law and Corporate Law, and a PhD in Political Science.

Deans of the Faculty of Political Science, Public Administration & Diplomacy

Dr. Talal Tarabay 2000-2001

Dr. Michel Nehme 2001-2006

Dr. Chahine A. Ghais 2006-2009

MISSION, VISION AND VALUES

Mission

The mission of the Faculty of Political Science, Public Administration and Diplomacy is to provide quality education that helps build in our students the characteristics of high intellect, moral integrity, responsible leadership, enlightened citizenship, and human solidarity. We serve our community by enhancing the awareness about human rights, the common good, and other basic precepts of democratic governance, and by connecting it to the rest of the world through educational networks of cooperation.

Vision

The Faculty of PSPAD envisions itself as a leading national and regional platform of intellectual and scholarly discourse on issues of government, politics, international relations, and human organization. We consistently strive to provide our students and community with the most evolved education by introducing new courses and programs that cover new and expanding disciplines. The aim is to enrich the minds of our students with the most developed analytical and critical thinking approaches that transform them into leaders in the service of the community and essential interlocutors in the cultural/civilizational dialogue.

Values

True to the Maronite Catholic traditions of NDU, the Faculty of PSPAD is dedicated to serve as a beacon of enlightenment in the continuous search for truth and better life. In this pursuit, we are guided by a value system founded on:

- Academic excellence
- Individual initiative
- Dedication in work
- Intellectual freedom
- Enlightened citizenship
- Human solidarity
- Responsible leadership
- Participation in solving public problems
- Wealth in diversity
- Inter-cultural dialogue and cooperation

FACULTY PROFILE

The Faculty of Political Science, Public Administration and Diplomacy consists of three Departments:

Department of International Affairs and Diplomacy

Department of Political Science

Department of Public Administration

The Faculty of Political Science, Public Administration and Diplomacy offers programs leading to the degrees of:

Bachelor of Arts in International Affairs and Diplomacy

Master of Arts in International Affairs and Diplomacy

Master of Arts in International Affairs and Diplomacy - International Law Emphasis

Bachelor of Arts in Political Science

Bachelor of Arts in Political Science – American Studies

Bachelor of Arts in Political Science – Euro-Mediterranean Studies

Bachelor of Arts in Political Science – NGOs Emphasis

Master of Arts in Political Science – NGOs Emphasis

Master of Arts in Political Science

Master of Arts in Political Science - Comparative Law Emphasis

Bachelor of Arts in Public Administration

Bachelor of Arts in Public Administration - Criminal Justice Emphasis

Master of Arts in Public Administration

Bachelor of Arts Degrees

Admission Requirements:

Compliance with the general rules and regulations applied by NDU in the general Catalogue.

Graduation Requirements:

Students seeking the degree of Bachelor of Arts in the Faculty of PSPAD must complete a total of 105 credits with an overall average of at least 2.0/4.0 and a minimum average of 2.3/4.0 in the major requirements.

Master's Degrees

Program Guidelines

The M.A. degrees in the Faculty of Political Science, Public Administration and Diplomacy, require each 36 credit hours, including a thesis. Courses are offered primarily in the late afternoon to allow students to pursue part-time employment or internship, if they so choose. The graduate programs require usually a minimum of four semesters of study depending on the full-time or part-time status of the student.

Objectives

The main objectives are to train students for government and public service as well as for employment in business and non-profit sectors that employ graduates to lead their organizations and international operations.

The programs are intended to prepare and train in theory and practice students for careers in research, national and foreign diplomatic service, contemporary political and economic issues, public service, international and regional organizations, multi-national corporations, financial institutions, media enterprises and the like.

Admission Requirements

In addition to the University graduate admission requirements, applicants should have a B.A. in Political Science, or Public Administration, or International Affairs and Diplomacy, International Law, or other related fields.

Successful passing of the EET Entrance Exam with a minimum score of 600 is required (p. 66 general catalogue), students' undergraduate GPA of 3.0 minimum, work experience, letters of recommendation, motivation for a career and leadership are all taken into consideration. The Faculty may require the GRE exam for non-NDU students, and the following prerequisite courses may be required of non-major applicants.

For M.A. in Political Science:

IAF 211, POS 201, POS 210 or equivalent by petition.

For M.A. in Public Administration:

PAD 201, POS 201, POS 210 or equivalent by petition.

For M.A. in International Affairs and Diplomacy :

IAF 211, IAF 321, POS 201 or equivalent by petition.

For M.A. in International Affairs and Diplomacy - International Law Emphasis:

IAF 211, IAF 401, POS 442

Graduation Requirements:

Students seeking the degree of M.A. in the Faculty of PSPAD must meet the University graduation requirements and complete one of the following two options with a G.P.A. of at least 3.0/4.0:

36 credits of course work in addition to a comprehensive written and oral examination; or

2. successful completion of 30 credits course work and six credits thesis.

DEPARTMENT OF INTERNATIONAL AFFAIRS AND DIPLOMACY

The Department of International Affairs and Diplomacy offers three programs leading to the degrees of Bachelor of Arts and Master of Arts in International Affairs and Diplomacy and International Law.

The Degree of Bachelor of Arts in International Affairs and Diplomacy

The program of International Affairs and Diplomacy is designed to provide students with broad knowledge in the field. Graduates are prepared to work in several career areas. These include the Lebanese Government, notably the Ministry of Foreign Affairs; international and regional organizations such as the United Nations and its various agencies, multinational corporations, banking institutions, educational institutions, and, among others, media enterprises and the like.

Undergraduate Courses: International Affairs and Diplomacy

IAF 211 Introduction to International Relations (3.0); 3 cr. An examination of the nature and evolution of the major concepts that shape international relations: the balance of power, the role of states in the international system, international law, and the elements of foreign policy. *Prerequisite:* ENL 107

IAF 231 World Political Geography (3.0); 3 cr. A general survey of states in the world that focuses on politically relevant geographic information: location, size, population, principal cities, major resources.

IAF 301 Modern Political Ideologies (3.0); 3 cr. An introduction to the most influential political ideas in the modern world since the mid-nineteenth century. The focus is on the ideologies that have been influential and effective in the international system. *Prerequisite:* ENL 107

IAF 321 Diplomacy: Theory and Practice (3.0); 3 cr. An examination of the principles and practice of diplomacy, international relations, and an analysis of the structures, functions, and procedures of diplomatic and consular services, including diplomatic privileges, immunities, and recruitment of diplomatic and consular personnel. *Prerequisite:* IAF 211 or consent of instructor.

IAF 322 Lebanese Diplomacy (3.0); 3 cr. Covers the legal and practical evolution of the Lebanese diplomatic corps and focuses on the framework within which Lebanese diplomacy operates, the direction(s) which it generally takes regionally and internationally, and the approaches and strategies followed. (Arabic/English).

IAF 331 Geopolitics (3.0); 3 cr. The course provides an analysis of the reciprocal effects of geography and political organization on the geopolitical positions of states, in the international system, including size and location demography, national resources, spatial strategies and maritime power. Other topics include: theories of geopolitics, the impact of nationalism on geopolitics, political geography, and the interrelations among geopolitics and international relations. *Prerequisite:* IAF 231 or consent of instructor.

IAF 332 Introduction to strategic Studies (3.0); 3 cr. This course introduces students to the field of strategy; the basic concepts and

issues of strategy, deterrence, defense, and arms control, an overview of defense policies, programs, and problems. Students will learn how to relate International Relations and Political Science theory to Strategy. Furthermore, students will be able to understand how political military leaders develop policies during times of war and peace. Strategy is a byproduct of geopolitics. Currently, International Relations, as well as Political Science are both directly related to the field of Strategy.

IAF 333 Terrorism (3.0); 3 cr. This course studies terrorism in modern times, its definition, its history, its roots and its geographical spread. Other topics include: The political, religious, social, cultural, economic, and ideological causes of terrorism as well as international cooperation in the fight against terrorism. The course is supplemented by a number of case studies including the September 11 terrorist attack and other examples selected from various countries.

IAF 401 Public International Law (3.0); 3 cr. A study of the sources of Public International Law and its application in interstate relations.

IAF 402 Human Rights in International Politics (3.0); 3 cr. This course covers the conceptual bases of the fundamental rights of the human being. It focuses on international principles, conventions, and treaties signed by governments on the question of human rights at the international, regional and national levels, and the ways and means through which violations of human rights may be documented and countered.

IAF 407 International and Regional Organizations (3.0); 3 cr. An examination of the structures, functions, and agencies of the United Nations and other regional international organizations, and their role in the international system. *Prerequisite:* IAF 211 or consent of instructor.

IAF 409 Foreign Policy Making of the Major Powers (3.0); 3 cr. An analysis of the making and objectives of the foreign policy of the major states in the international system in the context of globalization, the new world order, European integration, and other regional factors. *Prerequisite:* IAF 211 or consent of instructor.

IAF 411 Conflict Management and Resolution (3.0); 3 cr. This course examines the

causes of conflict, its management and neutral resolution. It prepares the student to define the nature of conflict, understand its causes and ramifications, study ways to manage and limit its scope, and then search for solutions. *Prerequisite:* IAF 211 or consent of instructor.

IAF 453 Euro-Mediterranean Partnership (3.0); 3 cr. A study of the historical and Evolving relationships between Europe and the Middle East, and the factors of trade, resources, security, and geo-strategic consideration which influence these relationships.

IAF 471 Modern Europe and the European Union (3.0); 3 cr. A study of the European Union and its economic, political, social, financial, and legal institutions. Attention is given to the impact of the European integration process in Europe and beyond. *Prerequisite:* IAF 211 or consent of instructor.

IAF 474 China, India and the Arab World (3.0); 3 cr. A study of the growing relationships of China and India with the Arab World,

particularly after 2000, and the impact of globalization on these relationships. Topics include: examination of political, economic, cultural, religious, and military interactions between China, India, and the Arab World, and the future trends in their relationships. *Prerequisite:* IAF 211 or consent of instructor.

IAF 488 Current Issues in International Affairs and Diplomacy (3.0); 3 cr. A seminar highlighting topic areas and theoretical approaches of particular interest to the study of international affairs and diplomacy as a profession. This course will deal with both the critical thinking and practice in a specific area. The content and focus of the course will be altered from semester to semester in order to remain up to date with technical experience and scholarly discourse in the field.

IAF 490 Senior Study (3.0); 3 cr. Special topics in International Affairs and Diplomacy.

The Degree of Master of Arts in International Affairs and Diplomacy

The program is designed to provide students with indepth knowledge in international affairs and diplomacy, national foreign service, and contemporary political and economic issues. It offers a variety of courses in international relations, comparative government, international organizations, international law, and draws on some courses in economics and business.

Admission Requirements

Refer to the University graduate admission policy.

Graduation Requirements

Students seeking the degree of M.A. in International Affairs and Diplomacy must meet the University graduation requirements and complete one of the following two options with a G.P.A. of at least 3.0/4.0:

1. 36 credits of course work in addition to a comprehensive written and oral examination;
or
2. successful completion of 30 credits course work and six credits thesis.

Graduate Courses: International Affairs and Diplomacy

IAF 601 International Relations; Theory and Practice (3.0); 3 cr. The seminar surveys major theories of international relations and evaluates their utility for understanding international politics. It emphasizes: (1) The broad trends and theoretical frameworks which shape relations among states, both at the international and regional levels; (2) The implications of the power factors on the external and domestic policies of states; and (3) The factors leading to international cooperation and confrontation and their implications.

IAF 602 Economics of International Politics (3.0); 3 cr. The course investigates the relationship between economic and political processes in the international system, and the institutions involved in conducting these processes. Major theoretical understandings of international political economy are examined along with specific issues in the field. These issues include: International trade, trade and developing nations, transnational corporations, multinational investment, and the World Trade Organization.

IAF 603 Advanced International Relations Theories (3.0); 3 cr. The seminar analyzes the writings of major international theorists in the field of IR theories and evaluates the validity and significance of these theories in explaining and understanding contemporary international relations in particular and world politics and history in general. Emphasis is on the use, application, development of IR theories in the context of academic studies of world politics in recent decades.

IAF 604 Human Rights in International Politics (3.0); 3 cr. This seminar focuses on the role played by the UN and other intergovernmental organizations in protecting, promoting, and advancing these rights. Special emphasis is placed on problems of human rights violations worldwide, on international conventions, and the role of human rights organizations internationally.

IAF 605 International Organizations and Specialized Agencies (3.0); 3 cr. This seminar focuses on the role played by the UN and other intergovernmental organizations in international affairs. Special emphasis is placed on the operations of the specialized agencies (IMF,

World Bank), the determinants of their policies, and the impact of these policies internationally.

IAF 609 Ethnic Conflict and Conflict Resolution (3.0); 3 cr. The seminar focuses on the theories and methods of conflict resolution, the relevant literature in the field, and the importance of conflict resolution mechanisms and modalities in international politics. These theories and modalities are applied to various intra- and interstate conflicts in the international system, some of which are focused upon as case studies in the seminar.

IAF 611 Globalization (3.0); 3 cr. Analyzes the multitude of factors that have increasingly been leading to the phenomenon of globalization in the international system: political, economic, technological, communication, cultural, organizational, financial, legal, and structural/political. The seminar focuses on case studies in the various dimensions of globalization worldwide, and on directed individual and group research.

IAF 612 International Political Economy and Globalization (3.0); 3 cr. Focuses on the factors, powers, and actors shaping international economies, explores the politics of transnational economic flows, the globalization of production, the phenomenal expansion of the MNCs, as well as the relationship between power and wealth in the global economy. Emphasis is on the structural and market factors shaping economic interactions in the world, and the political economic settings shaping globalization.

IAF 613 Theories of War and Peace (3.0); 3 cr. Comprehensive analysis of the contending theories on war and peace, including causes, applications, and outcomes. The course covers the various philosophical, economic, religious, ideological, national, regional, and international factors that affect the phenomena of war and peace globally, and the institutional frameworks that address the problems of war or manage and promote peace regionally and internationally.

IAF 615 Statesmanship and Diplomacy (3.0); 3 cr. Deals with the role of leaders and diplomats in protecting and promoting countries' interests and in influencing international politics, and addresses the factors that may guide or constrain statesmen in conducting foreign policy.

IAF 617 Democracy and Democratization in the International System (3.0); 3 cr. Covers the recent trends towards democratization and the factors which promote or hinder democracy internationally. The seminar covers the theories of democracy and their evolution since the late eighteenth century, the development and expansion of democracy in various parts of the world or the constraints limiting its spread in others, as well as the implications of these questions on peoples, states, and international relations.

IAF 619 Nationalism and the politics of identity (3.0); 3 cr. Studies the different and complex factors shaping identity and national formations of groups and states, and explores how issues of ethnic and national identities have shaped world politics, and how subnationalism, supranationalism, and/or internationalism are reshaping it. Covers recent research and literature in the field concerning questions of identity in the international system and their effects on national integration and/or disintegration.

IAF 621 Contemporary International Issues (3.0); 3 cr. Provides an overview of the contemporary issues in international affairs that have political, strategic, and socio-economic significance in interstate relations. These issues range from ideological conflicts to technology and politics, warfare and politics, violence and terrorism, and nuclear proliferation.

IAF 623 The European Integration: Its impact (3.0); 3 cr. Analysis of the institutional structures of the European Union. Emphasis is on the economic and political effects of the integration process on Europe and beyond.

IAF 631 U.S. Foreign Policy Making (3.0); 3 cr. The seminar explores the United States' foreign policy-making from an institutional perspective. It focuses on Congress, the Presidency, and the relevant executive agencies. Attention is given to U.S. policy toward the Middle East.

IAF 632 Diplomacy (3.0); 3 cr. The focus in this seminar is on the role of diplomacy in interstate relations and how diplomacy can facilitate interaction among governments and nations and help to achieve national goals. It emphasizes the basics of diplomatic negotiations and bargaining along with the etiquettes of diplomatic and political relations.

IAF 633 Comparative Foreign Policy (3.0); 3 cr. The focus in this course is on how foreign policy is made in the context of a state's declared objectives. A primary attention is directed to the foreign policy-making of the major states in the international system and the various processes used to accomplish political goals. Ideologies, national interest, and the type of political system are focused upon insofar as they shape a state's foreign policy direction.

IAF 635 Terrorism in the international System (3.0); 3 cr. Generically defined as violence targeting indiscriminately civilians and civil communities and milieus at the national or international levels, terrorism, in recent decades, has become a concern of global scale. The seminar analyses the factors causing the spread of this phenomenon and the measures or policies applied, or that may be applied, to deal with such threats.

IAF 641 Public International Law (3.0); 3 cr. A graduate seminar that deals with the sources and development of international law, with a special attention given to current trends and problems. A critical evaluation of contemporary problems of world legal order is provided, covering issues related to global resources regimes, war, social and economic and trade laws.

IAF 645 Political Risk Analysis (3.0); 3 cr. This course aims at investigating current international events and highlighting their potential negative impacts in the political, economic, social, and business arenas. Students will be given case studies in the detection and analysis of risk indicators and their probable consequences.

IAF 649 International Energy and Environmental Issues (3.0); 3 cr. A study of energy questions globally from the perspectives of economic developmental needs, on the one hand, and environmental considerations and concerns, on the other. The seminar surveys the evolution of energy usage internationally and assesses the use of different sources of energy over time, the efficiency of these various sources, and their effects on development, the environment, and human society.

IAF 651 Comparative Economic Systems (3.0); 3 cr. A study of the major economic systems around the world in their theories as well as practices. Emphasis is on comparing and contrasting the tenets of these systems, how they

are applied, and their advantages and shortcomings.

IAF 657 Politics of International Economic Relations (3.0); 3 cr. Theories of international interdependence, dependence, and integration; politics of decision making on protectionism and international finance; role of multinational corporations in world political economy; North-South debate; economic issues and national security.

IAF 660 Special Topics in International Affairs (3.0); 3 cr. The seminar deals with current issues in international affairs that have political, strategic, or economic significance at

the global or regional levels. The questions to be studied in this seminar are based on current international developments and are chosen according to the specialty of the professor directing the course.

IAF 699 Thesis; 6 cr. The thesis involves the application of research methods to a significant topic of current relevance to the spheres of international affairs and diplomacy. The project involves the incorporation of the student's hypotheses, methods of testing, test results and conclusion in a sound, written report available to later researchers.

The Degree of Master of Arts in International Affairs and Diplomacy International Law Emphasis

Objectives:

In an increasingly interactive world influenced by state and non-state actors in which governments, peoples, and large varieties of organizations and multinational corporations interact on a daily basis through an enormity of contracts, regulations, laws and procedures, it has become required that higher educational institutions stress in their academic curricula the importance of International Law. This specialty helps students understand the basic different legal systems applied in international relations.

Admission Requirements:

Compliance with the general rules and regulations applied by NDU in the general Catalogue.

Graduation Requirements

Successful completion of 36 semester credits with an overall GPA of at least 3.0/4.0.

Degree Requirements (36 credits)

Core Requirements

IAF 601, PAD 604, POS 681

9 cr.

Major-related Electives: choose 5 courses

Choose any 5 INL courses from those listed in the catalog.

Free Electives

Option I: Thesis (INL 699) in addition to 30 credits of course work.
Option II: Successful completion of 36 credits of course work culminating in comprehensive written and oral exams.

6 or 12 cr.

Graduate Courses: International Law

INL 620 International and Comparative Patent Law (3.0); 3 cr. A study of patent reform issues including domestic patent reform legislation and ongoing harmonization treaty discussions under WIPO; review of selected topics with comparative study from the viewpoint of Japan, the United States, and Europe.

INL 622 International Environmental Law (3.0); 3 cr. Studies of the treaty negotiation process, role of international institutions in developing and implementing environmental agreements, relationship between environmental law and international issues, developing countries' perspectives on environmental law. Issues covered include climate change, export of hazardous waste, deforestation and biodiversity, Antarctica, and environmental concerns in war, human rights, and development financing.

INL 624 International Business Transactions (3.0); 3 cr. U.S. law and practice relating to characteristic forms of international transactions, including the transnational sale of goods (the law governing the documentary sale, various forms of letters of credit, commercial terms and insurance); the export of technology through franchising, distributorship, and licensing contracts; and the export of capital through the establishment, operation, and withdrawal of foreign direct investment. The impact of relevant international organizations and/or emerging substantive international commercial law (e.g., the United Nations convention on Contracts for the International Sale of Goods). Specialized problems in the negotiation and structure of international transactions.

INL 626 International Trade Law (3.0); 3 cr. Study of domestic and international laws and institutions governing foreign trade. Legal aspects of U.S. participation in the World Trade Organization, NAFTA, and other international forums, laws regulating customs and tariffs, most-favored nation treatment, subsidies, dumping, unfair trade practices, and disruptive imports under the escape clause. Specialized problems in regulating exports under the Export Administration Act, boycotts, corrupt practices, and restrictive business practices may be covered.

INL 628 International Litigation (3.0); 3 cr. Study of the history, forms, progress, problems, and future of interstate, third party dispute

resolution. Examination of basic issues and principles of public international litigation and arbitration between governments and between a government and a private entity. Investigation of the guiding principles and essential elements of conducting litigation in the arena of public international law and with state parties through in-depth examination of leading cases before the International Court of Justice. Problems of mixed and interstate arbitration, both ad hoc and institutional.

INL 630 Immigration Law (3.0); 3 cr. Theory and application of the Immigration and Nationality Act and 8 Code of Federal Regulations. Examination of practice before the Executive Office of Immigration Review, Immigration and Naturalization Service, Department of State and Department of Labor. Removal, political asylum, adjustment of status, naturalization, and other issues. Focus on family-and employment-based immigration practice. Examination of the procedural aspects of obtaining lawful permanent resident status in the U.S. through the family and/or employment preferences categories, as well as the process for obtaining non-immigrant admission.

INL 632 Refugee and Asylum Law Seminar (3.0); 3 cr. Selected topics from the areas of international law pertaining to the protection of refugees and domestic law of political asylum.

INL 634 International Banking (3.0); 3 cr. Study of the legal aspects of international banking and finance, including international laws and regulations concerning the structure and transactions of international banks and institutions. Topics include the institutional, legal and regulatory framework for international commercial banking and development finance; the emerging rules regarding international trade in financial services; international supervision of banking activities and regulation of banking transactions; contractual instruments for international financial transactions; and international debt and development crisis.

INL 636 Foreign Direct Investment (3.0); 3 cr. An examination of the legal, business and financial problems involved in investing across national borders. Focuses on the strategies and techniques for structuring such investments and on the framework of regulation that affects them. The analysis includes US regulation of foreign investors, different types of foreign regulation of

US investments, and international controls on domestic regulation of foreign investment through treaties and conventions. Model international transactions and sample documents are used to illustrate basic issues.

INL 638 International Law of Human Rights (3.0); 3 cr. An overview of international and regional human rights instruments and institutions, focusing on the manner in which the U.N., Middle Eastern, European, Inter-American, African and Asian human rights systems seek to protect individual and group rights. Examination of the problems these systems have encountered in discharging their mandate and exploration of ways to strengthen international and regional governmental and non-governmental efforts in the human rights field.

INL 640 Air and Space Law (3.0); 3 cr. Study of the development of international law related to the use of air space and outer space; analysis of air and space treaties in force; the role of various inter-governmental and non-governmental international organizations; consideration of special problems such as liability resulting from space activities, space technology, reusing of earth resources, arms control, and pollution and contamination of outer space.

INL 642 Law of the Sea (3.0); 3 cr. International law related to the use of ocean space. Development of international law concerning internal waters, territorial sea, contiguous zone, high seas, continental shelf-fisheries, exclusive economic zone, maritime boundaries, marine environment, marine scientific research, deep seabed and settlement of disputes. Current legal and policy issues associated with these areas.

INL 644 International Law of Territory (3.0); 3 cr. Basic principles of the international law of territory, including the definition of territory, the forms it may take, its relationship to states and other subjects of international law, how territory is acquired, how it is lost and how it is transferred, how it is delimited and demarcated, how the title to territory is affected by historical and demographic factors, and traditional and

contemporary principles and mechanisms for resolution of territorial disputes. Consideration of the modification of these principles since World War II and their possible application to several intense post-Cold War territorial disputes.

INL 646 Law of War (3.0); 3 cr. Examines the origins of the law of war, the 1949 Geneva Conventions for the Protection of War Victims, the Geneva Protocols of 1977, the 1980 Geneva Conventional Weapons Convention, other treaties and customary international law relating to means and methods of warfare, the role of the International Committee of the Red Cross, war crimes and enforcement mechanisms, and current problems in the regulation of hostilities.

INL 648 International Criminal Law (3.0); 3 cr. Study of selected issues attending the application of criminal law across international boundaries. Topics may include war crimes, terrorism, narcotics trafficking, money laundering, business fraud, extradition, and the recognition of foreign penal judgments.

INL 650 International Arbitration (3.0); 3 cr. Survey of arbitration and related mechanisms of dispute resolution in the international legal system that arise out of commercial, financial, and governmental transactions. Analysis of the arbitration agreement, the process of arbitration, and the enforcement of arbitrate awards as well as the common principles governing the disposition of claims. Review of the various arbitrate tribunals and their rules.

INL 652 International Negotiations (3.0); 3 cr. The art and science of international negotiations from a practitioner's perspective: analysis of the roles of the legislative and executive branches; examination of the inter- and intra-agency processes, including pre-, during, and post-negotiation, impact of external influences; and arms control negotiations, and practical exercises in negotiations.

INL 699 Thesis; 6 cr. The thesis involves The application of research methods to a significant Topic of current relevance to the spheres of international law.

DEPARTMENT OF POLITICAL SCIENCE

The Department of Political Science offers two programs, leading to the degrees of Bachelor of Arts and Master of Arts.

The Degree of Bachelor of Arts in Political Science

The program is designed to provide students with full awareness of the discipline of Political Science. The major program will equip students with deep knowledge, and will afford them a smooth and solid transition into the graduate studies as well as professional preparation in areas which include: Public sector, foreign service, international and regional organizations, multi-national corporations, banking institutions, media and other enterprises.

Degree Requirements (105 credits)

The Degree of Bachelor of Arts in Political Science

NGOs Emphasis

Non-governmental organizations (NGOs) play an important role in creating an open and viable democratic society. This rapidly expanding sector faces the challenges posed by the transition economy and society, and Lebanese and Middle East NGO managers point out the lack of managerial skills as their main problem in coping with these realities. The results of surveys of the NGO sector in this region confirmed that there is a great interest in conceptual knowledge on NGO management as a science and profession. Existing short-term training programs and seminars, proposed mostly by the NGOs themselves, can provide the participants with operational skills, but fundamental practical and theoretical knowledge is needed.

We see the Degree Program of training in NGO management and civil society to be a most adequate option for developing a stratum of professional managers in this sector in Lebanon and the Arab World. The Program allows to match basic management education with NGO management and civil society specialized knowledge and skills. The Program will be realized through BA and MA degrees in the Semester format, built up of 1575 and 540 academic hours respectively of in-class work in total. Special courses have been designed for the Program and a resource library is built up for the use of students and teachers.

This program is designed to provide students with broad knowledge in the field of International and Civil Society Organizations and specifically NGOs and NPOs. Acquaintance of the Third Sector, Development Cooperation, Civil Society Organizations, government institutions, multi-lateral and bilateral back-donors, networking with multinational corporations, and, among others, media enterprises and the like, will be part of the curricula at large. Graduates will be prepared to work in several career areas, specifically in independent international, regional and local organizations and those that operate under the umbrella of the United Nations and its various agencies, as well as other major development actors in the MENA-region and Arab World and beyond.

Admission Requirements

Applicants must pass the Lebanese Baccalaureate Part II (any strand) or its equivalent as identified by the Lebanese Ministry of Education. They are required to sit for an English Entrance Test (EET) or Test of English as a Foreign Language (TOEFL).

Graduation Requirements

You will need to complete:

- a. 33 credits of General Education Requirements; as the name indicates, those credits consist of 11 courses introducing basic knowledge of English and Arabic proficiency, political science, history, general science and humanities.
- b. 48 credits of Major Requirements; 16 courses will bring you to the world of NGOs, Civil Society and Development, and more specifically into the role of the NGOs in Lebanon and the MENA region, their concerns and the management of NGOs, in addition to elementary knowledge of international relations and organizations, public administration and public policy.
- c. 18 elective credits chosen from the wide range of courses offered in the Faculty of PSPAD.
- d. 6 free elective credits; 2 courses selected from the whole university course offering.

Minor in Middle Eastern Studies (18 credits)

This program introduces students to the study of political systems in the Middle East, highlighting the Arab states of the region, but also focusing on Cyprus, Iran, Israel and Turkey. Along with general required Political Science courses, students will take specialized courses on the dialogue of civilizations, human rights – with an emphasis on the Middle East and NGOs in the region – and comparative public administration. The Government and Politics series of courses – including the non-Arab countries of the region – will be tailored around the needs of students interested in working in the MENA region within an international and cross-cultural context. This program will equip students with the knowledge and skills needed to work with international and regional governmental organizations, international corporations, research and advocacy based NGOs and regional and international media outlets. It will also help them bridge the gap between the economies and political systems of Europe and the Middle East and take advantage of the expanding trade relationships within the greater Mediterranean market.

The Minor in Middle Eastern Studies would be of particular benefit to students in the following majors and fields of study

- Arabic Literature, Political Science, Public Administration, International Affairs and Diplomacy, Business Administration, Energy Economics, International Business Management, Education, Communication Arts, Advertising and Marketing, Graphic Design
- Sociology, Religion and Philosophy

Core Minor Requirements (9 credits)

POS 353	Governments of the Middle East
POS 405	Religion and Politics in the Middle East
POS 424	Political Economy of the Middle East

Minor Electives (9 credits) out of a pool of the following courses:

POS 212	Political History of the Middle East
NGO 204	Civil Society in the MENA Region
NGO 306	NGOs and Development
COA 355	Mass Media in Lebanon and the Middle East
ARB 336	Literature of Modern Arabic Renaissance
POS 303	Government and Politics of Cyprus, Turkey and Iran
POS 304	Government and Politics of Israel
POS 305	Government and Politics in North Africa
POS 306	Government and Politics of Egypt, Syria and Iraq
POS 307	Government and Politics in the Arab Gulf
POS 308	Human Rights in the Middle East
ENR 401	Petroleum in the World Economy
ECN 439	Economics of Developing Countries
POS 403	Arab-Israeli Conflict
REG 412	History of Religious Thought in the Middle East
POS 425	Business Law in the Middle East
POS 406	Cultural Pluralism in the Middle East
IAF 453	Euro-Mediterranean Partnership
ARB 415	The Arabic Modernization Movement

Minor in Peace and Conflict Studies (18 credits)

I. The importance of Peace and Conflict studies as an Academic Discipline

A. Worldwide

Academic and professional programs in peace and conflict studies have considerably grown in number over the last decades to prepare students to become professional conflict resolvers. Universities that are not prepared to host such programs have opted for a minor in peace and conflict studies (e.g. the Justice and Peace Program at Georgetown University, the Justice and Peace Studies Program at the University of St. Thomas, the Certificate in Peace and Justice Studies at the University of San Francisco, etc...). These programs are key in giving students the necessary skills and credentials to:

1. Enroll in a Masters program in conflict resolution
2. Work as crisis management experts, activists, mediators, etc.
3. Widen one's horizons

Become active members in peace and justice related organizations (see table 1) and contribute to the many existing peace and conflict journals

B. In Lebanon

In addition to helping widen their students' academic horizons and increase their employment opportunities, universities in Lebanon have the social responsibility of introducing their students to peace and justice concepts and skills.

Lebanon remains a conflict zone with few grassroots initiatives aimed at managing its disputes. The absence of grassroots inventiveness is the consequence of a shortage in conflict resolution trainings and programs. Conflict resolution education empowers students by imparting the necessary skills and knowledge-base for managing social change and conflict.

The youth's powerlessness in the face of conflict leads it to despair and increase its dependency on the ruling class and/or migrate. Lebanese Universities must engage in building a qualified peace taskforce and NDU must take the lead in shaping Lebanon's future conflict resolvers.

II. A Peace and Conflict Studies Minor's Connection to the Goals of Notre Dame University

Initiating a peace and conflict academic minor would draw from a variety of already established departments – Sociology, Economics, Politics, Psychology, Religion and others by bringing these varied disciplines into dialogue and collaboration, the peace and conflict minor would enable a comprehensive and original understanding with which to address the topics of peace and war. A minor that brings established fields of study together through course requirements would also bring students into dialogue.

III. Design of the Peace and Conflict Studies Minor

9 credits Core Minor requirements

POS 315	Conflict Analysis and Intervention: a multitrack approach
POS 405	Diasporas: Conflict and Peacebuilding
POS 425	Understanding and Creating Social Change

9 credits out of a pool of the following courses

IAF 402	Human Rights in International Politics
IAF 411	Conflict Management and Resolution
IAF 333	Terrorism
IAF 407	International and Regional Organizations

Undergraduate Courses: American Studies Courses

AMS 305 Cultural Pluralism in America (3.0); 3 cr. Survey of the development of American Society focusing on the role of Afro Americans, concepts of cultural pluralism, racism and inter-group relations explored within a comparative historical framework.

AMS 316 American History (3.0); 3 cr. Studies the various stages in the American history, colonial England, Independence, Confederacy and Federacy, the Civil War, WWI, the New Deal, WWII and after.

AMS 408 American Foreign Policy (3.0); 3 cr. The process of formulating US foreign policy,

with emphasis on the Department of State and the Foreign Services. Analyzes the major problems of American policy in action.

AMS 481 American Constitutional Law (3.0); 3 cr. The development of constitutional doctrine concerning public power that has resulted from US supreme court cases and decisions.

AMS 483 Social Welfare in America (3.0); 3 cr. Advanced survey of social services, public policies, and the profession of social work. Issues include dependency, deviancy, crime, social security, public health, social reforms, public and voluntary institutions.

Undergraduate Courses: Euro-Mediterranean Courses

EMS 303 Modern European Thought (3.0); 3 cr. Overview of the history of ideas in Europe beginning with the Renaissance and covering the liberal age, authoritarian ideologies, and contemporary liberal democracy.

EMS 371 European Civic Politics (3.0); 3 cr. Focuses on the role of civic society in influencing governmental institutions and shaping the political, economic, and social settings. Particular attention is given to parties and citizens' groups.

EMS 373 Politics and Culture of Germany (3.0); 3 cr. This course will provide an introduction to German politics and culture, students will study the origins of Germany as a state, from unification in the 19th century – through the two World War – to reunification in 1990. Emphasis will be placed on the social, cultural, geopolitical and economic roots of the

German political system and its current role within the European Union.

EMS 391 European Politics (3.0); 3 cr. A survey of the new Europe, from Dublin to Moscow, in relation to its political history and future prospects. Geography, economic issues, and military matters are stressed along with the European cultural and sub-cultural identities.

EMS 483 Politics and Culture of Russia and Eastern European Countries (3.0); 3 cr. The ideology, political and social structures, of Russia are examined in the context of imperial expansion, the Communist Revolution, and the subsequent collapse of communism and the break-up of the Soviet Union.

EMS 490 Senior Study: Special Topics in Euro-Mediterranean Studies (3.0); 3 cr.

Undergraduate Courses: History

HIT 101 Contemporary History of Lebanon (3.0); 3 cr. Covers Lebanon's contemporary history. Political, economic and social developments are stressed.

HIT 201 History of Lebanon (3.0); 3 cr. Covers the history of Mount Lebanon and its

neighboring area, from the Arab conquest until independence. *Prerequisite:* ENL 105.

HIT 211 History of Lebanon and the Middle East (3.0); 3 cr. Deals with the Middle East since the beginning of the Ottoman domination till the present. *Prerequisite:* ENL 107.

Undergraduate Courses: NGOs

NGO 201 Introduction to NGOs and Civil Society (3.0); 3 cr. An introduction to NGOs and Civil Society Organizations, their scope, size, structure and funding base. A special emphasis on their contribution to poverty alleviation/reduction, sustainable societies and the progress of social welfare. *Prerequisite:* ENL 107

NGO 202 Introduction to Development Theory (3.0); 3 cr. An introduction to key concepts and current paradigms related to development, poverty alleviation/reduction, international cooperation and relief.

NGO 203 Introduction to NGO Management (3.0); 3 cr. An overview of the main areas related to NGO Management such as the context in which the Third Sector is operating, the organizational set-up of NGOs, the relations and the programs, projects and other related activities. The main focus will be on development management. *Prerequisite:* ENL 107

NGO 204 Civil Society in the MENA-region (3.0); 3 cr. An analysis of the interaction and networking that take place between NGOs, the State and Non-formal Social Actors in the Middle East, North Africa-region (MENA). A special focus on the typologies of CSO active in the region and the examination of current data from the Arab World.

NGO 205 Legal Framework of NGOs (3.0); 3 cr. This course will study the laws applied to NGOs, the procedure of their legal registration, restrictions in their activities, in Lebanon and other MENA-countries, and will also compare these laws with the legal framework of NGOs in Western countries.

NGO 301 Introduction to Organization Development (3.0); 3 cr. An examination of current models for organizational assessment and change related to Civil Society Organizations and how different OD-interventions and tools can be applied within the Third Sector. *Prerequisite:* IAF 211 or consent of instructor.

NGO 302 NGOs and Human Resource Management (3.0); 3 cr. An examination of how NGOs are managing their human resources with a special focus on how to build teams with a participatory approach. The course will treat how to do the human resource planning and

implementation, which includes recruitment, management and motivation of the personnel. *Prerequisite:* IAF 211 or consent of instructor.

NGO 303 Financial Management for NGOs (3.0); 3 cr. An introduction to financial management in non-profit organisations introducing the four areas of financial management which includes financial planning, the financial control systems, the monitoring and reporting and the accounting records. In addition, an overview of the basic elements, the preparation for the external audit of the accounts. *Prerequisite:* IAF 211 or consent of instructor.

NGO 304 Project Management for NGOs (3.0); 3 cr. An introduction to how NGOs prepare, design, fund, manage, implement, monitor and report projects mainly in the development sector. Project-tools on Project Cycle Management (PCM) as well as the Logical Framework Approach (LFA) will be introduced.

NGO 305 Civil Society & Globalization (3.0); 3 cr. A study which enables the understanding, analysis and interpretation of the key concepts of globalization and the related current external factors and challenges affecting Civil Society and NGOs.

NGO 306 NGOs and Development (3.0); 3 cr. A study of the changing role of NGOs in the development process. A special emphasis on how the focus have changed from short-term relief & welfare to a more sustainable and community based approach.

NGO 307 Religion and Development (3.0); 3 cr. An exploration of the social and developmental roles of Religion in the Middle East and the challenges, opportunities and threats Islamic and Christian Faith Based Organizations are facing in the current context.

NGO 401 Civil Society and Advocacy (3.0); 3 cr. An introduction to main concepts, definitions and challenges to advocacy in the Third Sector. This course covers how NGOs are building up their advocacy strategies, what kind of tools that are being applied and how the main stakeholders will be involved in the process.

NGO 402 Disaster Response & Humanitarian Assistance (3.0); 3 cr. An introduction to the Humanitarian Charter and Minimum Standards

in Disaster Response. These standards cover areas in water supply, nutrition, food aid, shelter & site planning and health services and have been adopted by all major agencies involved in Humanitarian Assistance.

NGO 403 Social Policy (3.0); 3 cr. An overview on how social policy is being shaped and elaborated in Welfare States and countries with emerging Civil Societies in the MENA-region. A special emphasis on networking between the State and NGOs on how to assure basic social rights.

NGO 404 International Development Cooperation (3.0); 3 cr. An overview of the strategic framework involving Multilateral and Bilateral agencies, International and Local NGOs and their partnerships, alliances and relations in the MENA-context. The course will also treat the current and past paradigms in Development Cooperation.

NGO 405 Management of Social Institutions (3.0); 3 cr. This course will outline the basic theoretical framework, as well as the administrative principles and strategic framework, on how to manage Non-Profit organizations in charge of different kinds of institutions active in sectors like education, health care and social affairs.

NGO 406 Gender & Development (3.0); 3 cr. This course will treat gender inequality and its correlation with poverty which results in acute failure of human capabilities. The women's empowerment deficit in the Arab World will be examined and analysed through the Arab Human Development Reports as well as the strategies to overcome the current obstacles.

NGO 407 NGOs and Sustainable Environment (3.0); 3 cr. This course will examine the concept of sustainable development since the World Commission on Environment and Development in 1987 and the process initiated by the UNCED Conference in Rio 1992. Main areas that will be analyzed are issues related to human needs and the main

environmental factors to take into consideration in the development process.

NGO 408 Social Responsibility and the Private Sector (3.0); 3 cr. This course will study how the Private Sector and Corporations interact with other Civil Society Actors in integrating social and environmental concerns in their operations and activities. Related concepts on Corporate Accountability, Governance & Citizenship as well as Social Responsibility & Ethical Investments, will be examined.

NGO 409 Social Marketing (3.0); 3 cr. This course will introduce the basic principles of social marketing, explaining how techniques like advertising, branding, segmentation and the marketing mix can be used to tackle important social and health problems. It will outline the relevant theories underpinning social marketing, explain the range of techniques marketer's use and show how these can be applied to specific public health challenges. It will also assess criticisms of social marketing and the ethical issues the discipline has to confront.

NGO 410 Volunteer Management in NGOs (3.0); 3 cr. Volunteers are the heart of many NGOs and, like employees, need recruitment, reward, incentives, contracts, termination and committees. This course will study the good practices and ethical issues around management of volunteers in NGOs and community work.
Prerequisite: NGO 302

NGO 490 Special Topics (3.0); 3 cr. Special topics in NGO Management.

NGO 491 (1.0); 1 cr. Internship in an NGO, UN agency or social institution.

NGO 492 (2.0); 2 cr. Internship in an NGO, UN agency or social institution.

NGO 493 (3.0); 3 cr. Internship in an NGO, UN agency or social institution.

Undergraduate Courses: Political Science

POS 101 Principles of Politics & Government (3.0); 3 cr. Introduces the basic political philosophies and governmental processes, and the relationships between rights, liberties, and responsibilities of individuals and governments.

POS 201 Introduction to Political Science (3.0); 3 cr. Covers the basic concepts in political science. *Prerequisite:* ENL 107.

POS 210 Government and Politics of Lebanon (3.0); 3 cr. An introduction to the various characteristics and factors that have shaped the

Lebanese political system in the first and Second Republics. Special focus will be on democracy and national values, the political processes and national institutions, mainly the Parliament, the Executive/Administrative Branch, and the Judicial System. Attention will be given to studying the national Construction along with the separation of powers and administrative centralization and decentralization policies.

POS 212 Political History of the Near East Until World War I (3.0); 3 cr. A survey of political history and culture of the Mediterranean civilizations.

POS 240 Law and Society (3.0); 3 cr. Nature, purposes and sanctions of law sources of law private and public law. Common and civil law, courts and administration of justice. This course is a prerequisite to all law courses. *Prerequisite:* ENL 107.

POS 303 Government and Politics of Cyprus, Turkey and Iran (3.0); 3 cr. This course provides an overview of the political systems in these three non-Arab MENA countries, highlighting their ideological, economic, social and cultural variables. It will provide students with insight into the historical and contemporary ties between these countries and the Arab world, focusing on Lebanon and the Eastern Mediterranean in general.

POS 304 Government and Politics of Israel (3.0); 3 cr. This course provides an overview of the political system of Israel, highlighting its ideological, economic, social and cultural variables. It will introduce students to the historical, geopolitical and ideological foundations of the Israeli state, the nature of its institutions and their particular embeddedness in the Arab world, focusing on Lebanon and the Eastern Mediterranean in general.

POS 305 Government and Politics in North Africa (3.0); 3 cr. This course provides an overview of the political systems of the countries of North Africa, with the exception of Egypt, highlighting their ideological, economic, social and cultural variables. It will concentrate on the changing nature of their political systems, their unique relationship with Europe and the current developmental trends in the region of North Africa.

POS 306 Government and Politics of Egypt, Syria and Iraq (3.0); 3 cr. This course provides an overview of the political systems in these three neighboring Arab countries,

highlighting their ideological, economic, social and cultural variables. Emphasis will be placed both on the historical, geopolitical and ideological foundations of these three states, the nature of their current institutions and their significance for developments in Lebanon.

POS 307 Government and Politics in the Arab Gulf (3.0); 3 cr. This course provides an overview of the political systems of the countries of the Arab Gulf region, highlighting their ideological, economic, social and cultural variables. It will focus on the diversity within the region, the particular role played by energy and trade and the significance of these states for the Eastern Mediterranean and Lebanon in particular.

POS 308 Human Rights in the Middle East (3.0); 3 cr. Survey of the fundamental political, social and cultural rights of the human being in the MENA region; the course focuses on the principles, conventions, treaties and laws ratified by governments on the international, regional and national levels and the ways through which violations of human rights are documented and countered. Emphasis will be placed on the interplay between the human rights traditions of the West and those on the MENA region.

POS 315 Conflict Analysis and Intervention: a Multitrack Approach (3.0); 3 cr. Conflicts are complicated processes. Choosing an appropriate conflict intervention mechanism is largely dependent on the type of conflict under study. Learning the skills to analyze disputes is required to select the most accurate intervention mechanism.

POS 317 Political Parties, Public Opinion, Pressure Groups (3.0); 3 cr. Analysis of pressure politics and political behavior. Impact of parties and pressure group on the governmental efficiency and the public good. Evaluation of public opinions impact on governmental decisions.

POS 319 Democracy and Human Rights (3.0); 3 cr. This primary aim of this course is to teach students to think critically about the political and cultural dimensions of democracy and human rights. The course focuses on different strategies of democracy and their relationship with human rights, the origins and maintenance of democracy in the modern world, and the process of democratization and its impact on the state stability and on global protection of human rights.

POS 320 Media and Politics (3.0); 3 cr. A study of the ways in which the mass media influence politics and vice-versa. The course explores the role that media play in providing information for citizens in the different political systems. Other topics include: the role of mass media in campaigns and elections, the ways in which media influence public opinion, how the media influence the political process, and political attitudes and behaviors.

POS 321 State and Local Government (3.0); 3 cr. Places subnational politics in its social, ideological, and federal setting. Concern is with both formal structure and political process. Focus on the individual's role.

POS 323 Minority Politics (3.0); 3 cr. An examination of the social, cultural and economic factors which affect the political choices of minorities. Analysis of minorities' political rights and actions.

POS 331 Judicial Politics (3.0); 3 cr. Examination of the principal actors in the legal system: police, lawyers, judges, and citizens. About half of the course is devoted to the study of judicial behavior in the courts and political and personal influences on judicial behavior.

POS 335 Classical Political Thought and Ideologies (3.0); 3 cr. Introduction to the origin and development of inquiry about human life and political association with particular reference to ancient and medieval philosophies.

POS 337 Dialogue Among Civilizations (3.0); 3 cr. This course introduces the concepts of tolerance and dialogue and demonstrates how they are the prerequisites for peaceful coexistence. It also emphasizes that terrorism represents the very embodiment of intolerance, thus raising awareness for the need for core values within the national and international communities. Moreover, it makes students aware that in our globalizing and increasingly interconnected world, diverse cultures can provide a needed source of stability and continuity. The challenge is to balance this need against the risk of cultural stagnation. This course assumes that there is no simple solution. Students must always understand that cultures are living, evolving entities, not lifeless artifacts.

POS 345 Ethics and Leadership (3.0); 3 cr. An examination of the nature of the relation between authority and moral duty in light of the long tradition of civil and religious statutes.

POS 350 Comparative Governments and Politics (3.0); 3 cr. A study of the basic approaches to comparative politics. Constitutional comparisons among the political systems of the United States, Great Britain, France, China, and Japan are highlighted.

POS 353 Governments of the Middle East (3.0); 3 cr. A comparative study of the governmental systems and political processes of Middle Eastern countries.

POS 382 Empirical Research Methods (3.0); 3 cr. An exposition of the scientific methods for conducting research, collecting and analyzing data, formulating hypotheses and propositions, and developing well-organized reports.
Prerequisite: ENL 213

POS 403 Arab-Israeli Conflict (3.0); 3 cr. A study of the Arab-Israeli conflict and its effects on the legal, economic, and political patterns of the region and the international community.

POS 405 Religion and Politics in the Middle East (3.0); 3 cr. An exploration of the social, cultural, economic, and developmental roles of religion in the Middle East including the challenges, opportunities and threats that Jewish, Christian and Islamic faith-based political parties and movements are facing in the current context. Emphasis will be placed on the role of religion as a potential force for development, the role of faith-based civil society organizations and the political links to the Mediterranean region and the MENA as a whole.

POS 406 Cultural Pluralism in the Middle East (3.0); 3 cr. Survey of the development of Middle Eastern society focusing on the role of linguistic and confessional minorities, concepts of diversity, ethnic oppression and inter-group relations explored within a comparative historical context. Emphasis will be placed on current theoretical discourse on hybridity, diversity and the roles played by globalization, migration and cyberspace in the region.

POS 415 Diasporas: Conflict and Peacebuilding (3.0); 3 cr. This class introduces students to the impact of diasporas on international relations in the 21st century. Students will look at diasporas as communities whose impact needs to be understood in the host country, in the homeland and on the actual diaspora community simultaneously. Because of the ability of migration studies to intersect with development studies, international security and peacebuilding, this course will adopt an

interdisciplinary approach to the study of diasporic interactions.

POS 421 Environmental Politics (3.0); 3 cr. Political, legal, and economic forces in environmental law and policy. Special emphasis on air and water pollution and on threat to public and agricultural land. Environmental groups and their opponents.

POS 424 Political Economy of the Middle East (3.0); 3 cr. Studies the major economies of the Middle East and the political-administrative systems shaping these economies. The issues addressed include: the major economic centers in the Middle East, concentration of wealth and poverty, redistributive justice and the international factors shaping Middle Eastern politics and economics. Emphasis will be placed on theories dealing with the role of the state in shaping economic development and the difficulties faced when implementing policy decisions.

POS 425 Understanding and Creating Social Change (3.0); 3 cr. This course identifies the causes and patterns of change and explores the origins and types of movements leading social change. Students will be exposed to change agents and change strategies and will learn how to develop a strategic advocacy plan. They will identify proponents and opponents of change and devise a tactic that ensures enough support for the transformation to be sustainable.

POS 442 Constitutional Law (3.0); 3 cr. A study of the precepts and provisions of the Lebanese constitution and its contributions to policy, governance, and democracy.

POS 445 Business Law in the Middle East (3.0); 3 cr. This course provides an overview of business laws applied in different Arab countries, the different legal systems and their origin. Special attention will be given to corporate legislation, and to the conditions required to start a business in the MENA region. The course analyzes the legal challenges confronting foreign corporations in the region, including the role of culture and business practice.

POS 473 Government and Politics of Latin America (3.0); 3 cr. A study of the political systems of major Latin American countries in terms of their ideological, economic, social, and cultural variables.

POS 475 Government and Politics of South East Asia (3.0); 3 cr. A study of the political systems of major countries in South East Asia in terms of their ideological, economic, social, and cultural variables.

POS 477 Government and Politics of Africa (3.0); 3 cr. A study of the political systems of major African countries in terms of their ideological, economic, social, and cultural variables.

POS 479 Government and Politics of the United States (3.0); 3 cr. A study of the constitution of the American government and the determinants of the political process.

POS 480 Internship 1 cr. or POS 481 Internship 2 cr. or POS 482 Internship 3 cr. A supervised on-the-job working experience in International Affairs, Public Administration or Political Science. The internship will be done in cooperation with recognized international and national institutions and organizations from the public and private sector. Interns will have the opportunity to develop new skills by working under the direction and supervision of an experienced practitioner and acquire new skills. A minimum of 120 hours of internship is required. A detailed report is to be submitted as a record of the work accomplished. *Prerequisite:* Senior standing.

POS 488 Current Issues in Political Science (3.0); 3 cr. A seminar highlighting topic areas and theoretical approaches of particular interest to political science as a profession. This course will deal with both the critical thinking and practice in a specific area. The content and focus of the course will be altered from semester to semester in order to remain up to date with technical experience and scholarly discourse in the field.

POS 490 Senior Study - Special Topics in Political Science (3.0); 3 cr.

The Degree of Master of Arts in Political Science

The Department of Political Science offers graduate work leading to the Master of Art in Political Science. This Master's program is aimed at those students planning or embarking upon a career in public service and in related fields.

Admission Requirement

In addition to the University graduate admission requirements, applicants should have a B.A. in Political Science, Public Administration, International Affairs and Diplomacy, International Law, or other related fields.

Successful passing of the EET Entrance Exam with a minimum score of 650 is required. Students' undergraduate GPA of 3.0 minimum, work experience, letters of recommendation, motivation for a career and leadership are all taken into consideration. The Faculty may require the GRE exam for non-NDU students, and the following prerequisite courses may be required of non-major applicants: IAF 211, POS 201, POS 210, or equivalent by petition.

Graduation Requirements:

Students seeking the degree of M.A. in the Faculty of PSPAD must meet the University graduation requirements and complete one of the following two options with a G.P.A. of at least 3.0/4.0:

1. 36 credits of course work in addition to a comprehensive written and oral examination;
or
2. successful completion of 30 credits course work and six credits thesis.

Degree Requirements (36 credits)

Core Requirements

IAF 601, PAD 604, POS 681

9 cr.

Major Electives

IAF 604, IAF 605, IAF 615, IAF 633, IAF 641, IAF 645, PAD 618, PAD 627, PAD 652, PAD 654, POS 611, POS 619, POS 651, POS 659

15 cr.

Free Electives

Option I: Thesis 6 cr. (POS 699) in addition to 30 cr. of course work.

Option II: Successful completion of 36 credits of course work culminating in comprehensive written and oral exams.

6 or 12 cr.

The Degree of Master of Arts in Political Science

NGOs Emphasis

This program is designed to provide students with in-depth knowledge in the field of International and Civil Society Organizations and specifically NGOs and NPOs. The Master's program is aimed at those students planning or embarking upon a career in independent international, regional and local organizations and those that operate under the umbrella of the United Nations and its various agencies, as well as other major development actors in the MENA-region and Arab World and beyond.

Admission Requirements

To be eligible for admission to a graduate program, an applicant must hold a Bachelor degree or its equivalent from an accredited institution of higher education preceded by a secondary school certificate recognized by the Lebanese Ministry of Education as equivalent to the Lebanese Baccalaureate Part II. The minimum GPA must be 3.0/4.0.

Individual Faculties retain the right to request further requirements for admission to graduate programs such as the Graduate management Admission Test (GMAT) and the Graduate Record Examination (GRE). Other requirements may include recommendations from employer(s), auditions interviews, and samples of the student's work or personal statements. These other admission requirements will be stated in the letters of conditional admission authorized by the concerned Faculty.

For further details, applicants are requested to refer to the University catalog or enquire at the Admissions Office.

Graduation Requirements

In addition to the University graduate admission requirements, applicants should have a BA in Political Science – NGOs Concentration, Political Science, International Relations, Public Administration or any other BA or BS degree related to the scope and purpose of a NGOs vocation.

Degree Requirements (36 credits)

Core Requirements

9 cr.

These are 3 courses that introduce you to the basic theories and practices of international organizations and specialized agencies, public administration and scientific methods for conducting research in all later courses.

Major Electives

15 cr.

five courses of your choice from the NGO program will give you advanced knowledge and varied aspects of Civil Society and development, introduce you to tools for project, human resources and financial management, strategic planning, fundraising, monitoring and evaluation, as well as advocacy and social marketing, to mention only some of the topics.

Free Electives

6 or 12 cr.

Option I: you complete 6 elective credits and take the thesis course of 6 credits to conduct and write a research on a significant topic related to the area of your specialization.

Option II: you complete 12 elective credits and sit for comprehensive written and oral exams.

Graduate Courses: NGOs

NGO 601 Development Theory and Practice. (3.0); 3 cr. This course deals with topics and issues related to the current development challenges in the MENA-region in the context of the global order. Case studies of NGOs that are active in different areas will be selected as well as different examples of sustainable projects and programs.

NGO 602 Changing Role of Civil Society Organizations in the MENA-region (3.0); 3 cr. The focus of this course is on the changing role of Civil Society Organizations in the MENA-region based on existing and emerging NGO-networks. The concept of Civil Society is being examined and challenged.

NGO 603 NGO Management (3.0); 3 cr. A comprehensive overview on issues like good governance and accountability, empowerment, partnership, measuring performance & results as well as the contexts in which NGOs are operating. Issues like advocacy and service-delivery will be examined as well as the existing paradigms in development management.

NGO 604 Organization Development (3.0); 3 cr. This course will examine existing theoretical models around Organization Behavior in the Civil Society Sector. Organizational Assessment & Change, OD-interventions, Organizational Culture, Leadership, and principles and practices for Organizational Learning are other main components of the course.

NGO 605 Civil Society, NGOs, Networking and Advocacy (3.0); 3 cr. An examination of how NGOs are networking and campaigning for human rights and core social issues with the State, the public opinion, the private sector and decision-makers on different levels.

NGO 606 Civil Society, Welfare State and Social Policy (3.0); 3 cr. This course will critically analyze how social policy is being shaped and social services delivered by State, Private and NGO Actors in changing political and social contexts both globally and in the MENA-region.

NGO 607 Civil Society & Globalization (3.0); 3 cr. This course will critically study globalization, its causes and effects on emerging Civil Societies and NGOs.

NGO 608 Guiding Values & Principles in Civil Society (3.0); 3 cr. A critical examination

of the values, definitions and concepts and historical background to Civil Society in the West and how it's being applied in the Development sector.

NGO 609 NGOs and Human Resource Management (3.0); 3 cr. A comprehensive study on HRM within the framework of Civil Society. Emphasis on Best Operating Practices (BOP), benchmarking, teamwork, staff empowerment, self-appraisal, incentives & recognitions, purposeful internal and external communication.

NGO 610 Financial Management for NGOs (3.0); 3 cr. This course will treat financial management in non-profit organizations with case studies on how to prepare financial reports and the accounting systems in accordance with Generally Accepted Accounting Principles.

NGO 611 Advanced Course in Project Management for NGOs (3.0); 3 cr. A comprehensive view with case studies on how NGOs prepare, design, fund, manage, implement, monitor and report projects mainly in the development sector.

NGO 612 Project Cycle Management & Log-Frame Approach (PCM & LFA) (3.0); 3 cr. This course will critically examine how NGOs are using PCM and LFA in development and humanitarian assistance projects. The principles of PCM and LFA will be introduced as well as key aspects like the intervention logic, how to define objectively measurable and verifiable indicators, assumptions and risks. *Prerequisite:* NGO 611

NGO 613 Monitoring and Evaluation (3.0); 3 cr. A comprehensive overview how development projects are being monitored and evaluated by the main stakeholders. Other central topics include quantitative and qualitative methods on how to collect, store and analyze data and information as well as how to design the M/E-process as an integral part of the project management system. *Prerequisite:* NGO 611

NGO 614 Impact Assessment for Development (3.0); 3 cr. An overview of how performance, the outcomes and impact can be measured in the development sector and what kind of indicators are being used.

NGO 615 Strategic Planning for NGOs (3.0); 3 cr. This course will treat how NGOs can become more proactive, efficient, focused and committed in their service delivery. The main focus will be to assess current strengths, weaknesses, opportunities and threats and elaborate a strategic framework with the vision & mission statements, guiding values & principles and appropriate plans, programs and projects.

NGO 616 The Participatory Approach in Development Cooperation (3.0); 3 cr. This course will treat different kinds of participatory concepts and tools, such as Participatory Rural Appraisal (PRA), Participatory Learning & Action (PLA), Rapid Rural Appraisal (RRA) and how they are being applied in development cooperation as a mean to empower the poor and marginalized.

NGO 617 Participatory Poverty Assessment (PPA) (3.0); 3 cr. This course will critically examine how to conduct a Participatory Poverty Assessment with existing tools for analysis and change. Cases studies from mainly the Arab World will be used and examples of different studies of poverty assessment will be analyzed and compared. *Prerequisite:* NGO 616

NGO 618 Advanced course in Management of Social Institutions (3.0); 3 cr. This course will examine how to handle financial and human resources within the framework of social institutions in sectors like education, health care and social affairs. This course will build on the subjects, concepts and theoretical models analyzed in NGO 405.

NGO 619 Advanced Course in NGOs and Development (3.0); 3 cr. A comprehensive analysis with case studies on NGOs in the development process. Current practices on social services delivery will be critically examined as well as the right-based approach, in contrast to more traditional welfare and charity-oriented concepts.

NGO 620 Rural Development (3.0); 3 cr. A comprehensive analysis of rural development in order to make long-term improvements in rural living conditions with case studies on food security, safety and quality production of food products, access to markets, sustainable development, environmental concerns, the community based approach and current challenges and opportunities.

NGO 621 Advanced course on Gender & Development (3.0); 3 cr. This course will examine and analyze gender inequality and its correlation with poverty which results in acute failure of human capabilities. The capability approach with its systematization and theoritization, based on current case studies, is also a central part of the course.

NGO 622 NGOs and Micro-Credits (3.0); 3 cr. This course will treat the different kinds of micro credits schemes and income-generation activities that NGOs are involved in with different stake-holders. Special case studies from the MENA-region will be analyzed and examined.

NGO 623 Advanced Course on Religion and Development (3.0); 3 cr. This course will analyze the social and developmental roles of secular and religious NGOs in the Middle East and beyond. The main focus will be on the praxis and the action carried out by Faith Based organizations and Religious Charities.

NGO 624 Islamic Charities and Faith Based Organizations in the MENA-perspective (3.0); 3 cr. This course will analyze the growing importance of Islamic charities as a global phenomenon in social service delivery and as emerging NGOs in the development sector in the MENA-region and beyond.

NGO 625 Christian Charities and Faith Based Organizations in the MENA-perspective (3.0); 3 cr. This course will analyze the way Christian Charities and NGOs are operating in the development sector and the challenges they are facing in the MENA-region and beyond and how they are organized.

NGO 626 Disaster Response & Emergency Preparedness (3.0); 3 cr. This course will study several cases of relief operations regarding man-made and humanitarian disasters utilizing the Humanitarian Charter and Minimum Standards in Disaster Response.

NGO 627 Corporate Social Responsibility in the MENA-region (CSR) (3.0); 3 cr. This course will analyze current models of CSR and how the principles can be applied in the Arab World and beyond. Some real life examples will be studied. Related concepts on Corporate Accountability, Governance & Citizenship as well as Social Responsibility & Ethical Investments, will be examined.

NGO 628 Social Marketing for Advocacy and Campaigning (3.0); 3 cr. This course will analyze how Civil Society Organizations are using social marketing techniques like advertising, branding, and segmentation in advocacy and campaigns. The course will build on the issues presented in NGO 409.

NGO 629 Fundraising Strategies and Proposal Writing for NGOs (3.0); 3 cr. This course will examine how NGOs can look for and approach potential donors and specifically how to prepare a written project proposal with all its components. *Prerequisite:* NGO 611

NGO 630 Managing Diversity in NGOs (3.0); 3 cr. An examination on the impact of confessional and cultural differences among staff and partners of NGOs, both local and

international, including different perceptions of leadership, delegation of tasks and responsibilities, and how to overcome and learn from the differences and develop a well-functioning and efficient work team.

NGO 690 Special Topics (3.0); 3 cr. Special topics in NGO Management.

NGO 691 (1.0); 1 cr. Internship in an NGO, UN agency or social institution.

NGO 692 (2.0); 2 cr. Internship in an NGO, UN agency or social institution.

NGO 693 (3.0); 3 cr. Internship in an NGO, UN agency or social institution.

Graduate Courses: Political Science

POS 601 Contemporary Political Theory (3.0); 3 cr. Analyzes the dominant and recent trends in political science theory, political philosophy, and Western political thought. It focuses on the major theories and theorists, Western and non-Western, whose writings have influenced the academic field and research institutions, and who have made their impact on the understanding and practice of politics.

POS 603 Comparative Legislatures and Legislative Processes (3.0); 3 cr. Analyzes the structures, procedures and norms governing the legislature: making laws, elections, representation, and relations with other branches of government. It focuses on the functions and role of legislatures in general and covers legislatures of select major and non-major states in the international system and the characteristics which make them efficient and influential in the cases of some, or render them ineffective or marginal in the cases of others.

POS 605 Political Parties (3.0); 3 cr. Studies the structures, activities, and role of political parties in government and society. Emphasis is on the positive role of the party in developing the citizen, the political process, and political stability of states, and the factors which make parties effective and relevant. It distinguishes between two broad categories of parties: ideological parties and issue-oriented parties.

POS 607 Civil Liberties (3.0); 3 cr. Examines the development of constitutional law with regard to civil liberties and the protection of all

citizens, including women and children, minorities, and ethnic, linguistic, and religious groups. The functions and roles of the courts to protect civil liberties represent one focus of the seminar, while the role of civic groups to promote them represents another. The course is supplemented by the study of case studies related to civil liberties issues.

POS 609 Security and Conflict Resolution (3.0); 3 cr. Reviews changing patterns of war and security since the early twentieth century. Introduces students to a wide variety of literature and cases. A special focus is on methods, techniques and the management of conflicts. Different approaches are analyzed: management of conflicts bilaterally between states, multilaterally through international or regional organizations, and through the roles of the good offices of diplomats or personalities of international stature.

POS 611 The Middle East in International Politics (3.0); 3 cr. The seminar examines the place of the Middle Eastern countries in the world system and the roles played by outside powers in the Middle East.

POS 613 Politics and the media (3.0); 3 cr. Role of the media in shaping local and international politics and in influencing agenda setting nationally and internationally. Emphasis is on the role of the various media at the local, national, and inter-state settings, and on ethical conduct, professional norms, general

organization, patterns of ownership, and the use of propaganda for various purposes.

POS 617 Arab and Islamic Political Thought (3.0); 3 cr. Examines the major orientations in contemporary Arab and Islamic political thought in the context of their socio-political settings as well as the international setting. Covers Arab and Islamic thought since the early twentieth century, with primary focus given to writers and/or ideologies that have emerged since WWII, the influence of political thought on the rise of fundamentalist groups.

POS 619 Political Communication (3.0); 3 cr. Diffusion of persuasive political communications through standard and created media. Examination of campaign techniques (i.e., research on issues and themes, electorate polling, thematic media approaches, campaign strategies) in management and administration.

POS 625 Policy Analysis and Choice (3.0); 3 cr. Survey of techniques for systematic analysis and evaluation of policy questions and programs, formulation of policy alternatives, cost-benefit analysis, and application of statistical computer models.

POS 651 Contemporary Middle East Governments and Political Processes (3.0); 3 cr. A comparative study of the governmental systems and political processes of the contemporary Middle Eastern countries and their role in world affairs. Topics include elites and political systems, democratization vs. fundamentalization, internal and external conflicts and their impact on nation-building, and constitutional law in the Arab states.

POS 659 Comparative Defense and Intelligence Studies (3.0); 3 cr. An evaluation of national defense policies of the major powers and the strategic roles of key regions in the international military balance. Emphasis is directed to the study of major intelligence

agencies and the role of intelligence in general (military, industrial, etc.) in national security.

POS 661 The European Integration (3.0); 3 cr. Topics covered include an exploration of the economic, political, social, demographic, constitutional, and legal patterns of the European integration process. The course traces the development of the European Union and evaluates its impact on member states, their economies, collective security, and international trade. A particular attention is given to the European Union's interaction with the other two major economic powers: The United States and Japan.

POS 681 Research Methods (3.0); 3 cr. The course introduces students to the scientific methods for conducting research, collecting data, analyzing these data, formulating hypotheses and propositions, and developing these propositions into coherent, well-organized reports.

POS 682 Advanced Research Methodologies (3.0); 3 cr. Focuses primarily on quantitative research methods and their application through various computer programs to conduct and apply socio-political research relating among other things to elections, public opinion polls, and demographic and economic statistics. The objective is to train advanced graduate students to conduct and operationalize major social and political research through the application of relevant methodologies.

POS 699 Thesis in Political Science (6.0); 6 cr. The thesis involves the application of research methods to a significant topic of current relevance to the spheres of Political Science. It requires the incorporation of the student's hypotheses, methods of testing, test results and conclusion in a sound report available to later researchers.

The Degree of Master of Arts in Political Science

Comparative Law Emphasis

In the present world referred to as the “Global Village”, and in view of the international global system controlled to a great extent by non-governmental, multi-national corporations; where governments, peoples, businesses and others do interact on a daily basis through an enormity of contracts, regulations, laws and procedures, it has become necessary to stress in academic curricula the importance of Comparative Law. This specialty would help students of law understand the basic different legal systems applied in the world.

Admission Requirement

In addition to the University graduate admission requirements, applicants should have a B.A. in Political Science, or Public Administration, International Affairs and Diplomacy, International Law, or other related fields.

Successful passing of the EET Entrance Exam with a minimum score of 650 is required. Students’ undergraduate GPA of 3.0 minimum, work experience, letters of recommendation, motivation for a career and leadership are all taken into consideration. The Faculty may require the GRE exam for non-NDU students, and the following prerequisite courses may be required of non-major applicants: POS 201, IAF 401, POS 442.

Graduation Requirements:

Students seeking the degree of M.A. in the Faculty of PSPAD must meet the University graduation requirements and complete one of the following two options with a G.P.A. of at least 3.0/4.0:

1. 36 credits of course work in addition to a comprehensive written and oral examination;
or
2. successful completion of 30 credits course work and six credits thesis.

Degree Requirements (36 credits)

Core Requirements

CPL 603, CPL 605, CPL 625.

9 cr.

Major-related Electives: choose 5 courses

CPL 607, CPL 611, CPL 615, CPL 627, CPL 629, CPL 633, CPL 635, CPL 637, CPL 639, CPL 645, CPL 661, CPL 681, CPL 689, CPL 691

15 cr.

Free Electives

6 or 12 cr.

Option I: thesis 6 cr. (CPL 699) in addition to 30 cr. Of course work.

Option II: Successful completion of 36 credits of course work culminating in comprehensive written and oral exams.

Graduate Courses: Comparative Law

CPL 603 Comparative Concepts and Issues of Justice (3.0); 3 cr. Issues relating to justice policies, perspectives, techniques, roles, institutional arrangements, management, issues of research and innovative patterns to prevent crises and delinquency

CPL 605 Current Issues in Human Rights and Global Justice (3.0); 3 cr. The first part of this course focuses on the dramatic changes in the creation and enforcement of international human rights law that have taken place since World War II. Notwithstanding serious challenges from a variety of sources, no government in the world publicly dissents from the acceptance of support for human rights. Students will examine the existing international human rights regime and explore the impact of the UN charter, the Universal Declaration, and various multilateral and regional human rights treaties and regimes on the behavior of nations today. Using cases from the M.E., Europe, US and international courts, the course will the focus on ethical issues in human rights. Topics will include political repression, informed consent, and human rights. Law can be used to promote human rights

CPL 607 Comparative Law of Lawyering and the Legal Profession (3.0); 3 cr. Lawyers often suppose that the entire law of professional responsibility is contained in the profession's codes. However, "other" law (criminal law, tort law, procedural law, securities law, etc) plays an equally and sometimes more important role in regulating a lawyer's conduct. This three-credit course will focus on an examination of the ways in which ethics' codes and "other" laws work together to shape a lawyer's course of action in different contexts (business transactions, civil litigation, government representation criminal defense.) In addition, students will explore the contours of the profession.

CPL 611 Comparative Constitutional Law (3.0); 3 cr. The aim of this seminar is to develop an understanding of major international constitutional traditions. Students will focus in significant part upon the French, German and other constitutions, using the American Constitution as a comparative background. The course will cover both the citizens rights provisions and basic structures of government.

CPL 615 Comparative Administrative Law (3.0); 3 cr. Law governing the organization,

powers, contracts procedures of the executive and administrative establishments.

CPL 625 Elements of World Law (3.0); 3 cr. This course will outline what law is and how it works among nations and explore the workings of leading international organizations. It examines practical and normative issues in international security, human rights, diplomacy, international finance, and international commerce. Students will be invited to explore a juridical landscape that is peculiarly different from the one they have grown accustomed to. The course will contrast the methods, the sources, and the institutions of the international legal system with the methods, the sources, and the institutions of major world legal systems making

CPL 627 Employment and Labor Law (3.0); 3 cr. This course examines the legal framework governing the relationship between employers and workers. It explores common and Roman laws principles, questions of occupational safety and health; employment discrimination of various sorts, and private sector unionization and collective bargaining. There will be discussion of the employees' selection of unions as collective bargaining representatives collective bargaining and regulation of the bargaining process, use of economic weapons such as strikes and boycotts, and the enforcement of collective bargaining agreements. A recurrent question is the choice of various "models" of employment relationships: freedom of contract, information and incentives, unionization, and direct regulation.

CPL 629 Comparative Substantive Criminal Law (3.0); 3 cr. Criminal liability, crimes against persons' property and society. Government sanctions of individual conduct as formulated by courts and legislation.

CPL 633 Comparative Juvenile Justice System (3.0); 3 cr. This seminar will consider how our legal systems should respond to crimes committed by minors. In particular, students will consider the appropriateness of treating minors differently from adults in the process of preventing, adjudicating, and imposing consequences for criminal behavior. Readings on adolescent development and urban sociology will help discussions.

CPL 635 Comparative Media Law (3.0); 3 cr. This course will survey legal issues involving the traditional mass media primarily newspapers, broadcasting, and cable. Some emphasis on structural regulations will be applied.

CPL 637 Electronic Commerce Law (3.0); 3 cr. The seminar will focus on both the technology involved in electronics, commerce and the law surrounding the emerging field. This course begins with an overview of the history and infrastructure of the Internet, providing students with a working knowledge of the terminology and technology they will likely encounter working in this legal field. Additional background discussion will involve the concept of regulation of the Internet, global vs. national perspectives on the law of the Internet, and conceptions of sovereignty. Topics may include electronic contracts, digital signatures, cybernatories, the application of traditional UCC doctrines such as the mailbox rule and the statute of frauds to in e-commerce.

CPL 639 Comparative Insurance Law and Policy (3.0); 3 cr. This course will examine legal issues relating to first-party and third-party insurance, as well as limited aspects of domestic insurance regulation. Topics will include the special principles of construction applicable to insurance policies, particular problems arising under life and health policies

CPL 641 Comparative Business Law (3.0); 3 cr. Legal and ethical aspects of agency, partnership corporations, bankruptcy, antitrust, securities and other regulations and institutions.

CPL 643 Comparative Religious Law (3.0); 3 cr. An in-depth study of the relationship between religion and the law. The study focuses on Islamic, Christian and Jewish laws.

CPL 645 Comparative Commercial Arbitration: Domestic and International (3.0); 3 cr. Arbitration is a widespread and fast-growing method for resolving commercial disputes. This class examines the legal regime that governs commercial arbitration in both the domestic and international realms. The class begins with a brief overview of the legal regime governing purely domestic arbitration, and then

explores the different (but related) legal regimes that govern international commercial arbitration. Students will look at domestic and foreign statutes, national and international cases, treaties, and several arbitrate institutions.

CPL 661 Globalization and Sovereignty in International Intellectual Property Law (3.0); 3 cr. This course focuses upon the creation, negotiation, and implementation of multinational treaties and organizations aimed at correcting the economic inefficiencies of the international intellectual property laws. Through a rigorous reading of basic legal texts, scholarly comment, and various international working papers, students in this seminar will examine the possible barriers to harmonization efforts

CPL 681 Comparative Family Law (3.0); 3 cr. This course examines the law's regulation of the creation and dissolution of family relationships, and the legal rights and responsibilities that family members have in the context of their family status. These issues will be examined in both modern and historical contexts, with particular emphasis on marital relations. Topics to be covered include: polygamy, marriage and parenthood interracial marriage and adoption, same-sex marriage and parenthood, surrogate motherhood, the economic consequences of divorce, the dissolution of non-marital relationships, and the termination of parental rights.

CPL 689 Comparative Environmental Law (3.0); 3 cr. This course is designed to provide a broad overview of major national and international legislations with the environment, including a clean air, clean water and endangered species. Issues of institutional competence and legitimacy, such as the allocation of authority between international, national governments.

CPL 691 Case Studies: Criminal Law (3.0); 3 cr. Studies important cases in criminal law and provides comparison for such cases in Roman and Common law.

CPL 699 Thesis in Comparative Law. (6.0); 6 cr.

DEPARTMENT OF PUBLIC ADMINISTRATION

The Department of Public Administration offers three programs leading to the degrees of Bachelor of Arts in Public Administration and in Criminal Justice, and Master of Arts in Public Administration.

The Degree of Bachelor of Arts in Public Administration

The program is designed to equip students with comprehensive awareness of the discipline of Public Administration. The major courses will provide students with in-depth knowledge of the field, and will afford them a smooth and solid transition into the graduate studies as well as professional preparation in the following areas: public sector in various ministries of government, budgeting and the budget process, foreign service, international and regional organizations, multi-national corporations, banking institutions, and other enterprises.

Degree Requirements (105 credits)

PAD 461 Comparative Public Administration (3.0); 3 cr. Comparative public administration and theory. Bureaucracies and their input on the political development process.

PAD 462 Public Management (3.0); 3 cr. Analysis of advanced public management techniques. Problems of implementing techniques: Case study and research.

PAD 490 Senior Study - Special Topics in Public Administration (3.0); 3 cr. Special topics in Public Administration.

The Degree of Bachelor of Arts in Public Administration

Criminal Justice Emphasis

Criminal Justice Program (CJS)

The program of Criminal Justice studies the interrelatedness of law enforcement, court services, correction, juvenile justice and private security within the criminal justice continuum.

Objectives

In its institutional thrust as an academic center of higher education, Notre Dame University, Louaize opted to join the on-going dialogue on man as a socio-political constituent. More than ever before, the World's progress is influenced by the protection and enhancement of human rights and security within the confines of a democratic political system based on equality and justice.

The program is designed to provide students with knowledge and awareness of the legal system in relation to police training, law enforcement, court services, correction institutions, criminal rehabilitation, crime prevention and general security of the citizen.

The program will equip students with broad knowledge and afford them a smooth and solid professional preparation in the areas of social security, and legal services.

Degree Requirements (105 credits)

General University Requirements

27 cr.

A. Communication Skills in English and Arabic (6 cr. ENL + 3 cr. ARB)

ENL 213 and ENL 223 or ENL 230, ARB 211, ARB 212, ARB 224, ARB 231, ARB 317

B. Philosophy and Religion (3 cr. REG + 3 cr. PHL or POS)

REG 212, REG 213, REG 313, REG 314, PHL 211, PHL 311, POS 345, ENS 205

Undergraduate Courses: Criminal Justice

CJS 200 History of Criminal Justice (3.0); 3 cr. An introduction to the historical development of the Roman and Anglo-American criminal justice systems from their inception to the present time.

CJS 201 Survey of Criminal Justice (3.0); 3 cr. Overview concerning an understanding of the purpose of law enforcement, courts, penal institutions, probation, parole, and the role of the police officer in contemporary society.

CJS 211 Crime and Justice in America (MGM) (3.0); 3 cr. An overview of the components, structure, and functioning of the criminal justice system in America, including crime victims, law enforcement, courts, corrections, probation, parole, community corrections and juvenile justice

CJS 222 Crime and Justice in Lebanon (3.0); 3 cr. An overview of the components, structure, and functioning of the criminal justice system in Lebanon, including crime victims, law enforcement, courts, corrections, probation, parole, community corrections and juvenile justice. The majority of course time will document the failures of the system to provide equal justice to all people, especially women, children and people of culturally diverse backgrounds.

CJS 250 Introduction to Private Security (3.0); 3 cr. Introduces students to the principles of private security. Includes threat assessment, risk prevention, protection of assets, security systems, and a consideration of the issues, standards and goals of private security.

CJS 311 Political Violence: Strategy, Tactics and Prescriptions (3.0); 3cr. Examines the practice of political violence: the strategy and tactics adopted by those who engage in violence as well as those who eschew violence.

CJS 315 The Correctional Community (3.0); 3 cr. Critical examination of historical development and theories in the functions of correctional development, theories and institutions of punishment and social control. Analysis of contemporary issues: (1) the social systems of prisoners and guards; (2) institutional administration and legal issues in management; policy and strategies of intervention; (3) decision-making in sentencing and parole; and (4) treatment and custodial philosophies and

programs. Emphasis will be on a systemic evaluation of research literature.

CJS 321 Peace Officers Standards and Training: Administration (3.0); 3cr. Study of principles of law enforcement, career influences, stress/crisis intervention, crime prevention, community relations, court testimony, law enforcement communications, and cultural awareness.

CJS 322 Peace Officers Standards and Training: Status (3.0); 3 cr. Study of Lebanese Status relating Lebanon Criminal Code, law enforcement procedures relating to search, arrest, confessions, identification, and evidence, and of Lebanese Status relating to juvenile justice.

CJS 411 Organization and Administration in Criminal Justice (3.0); 3 cr. An overview of the principles of organization and administration in criminal justice. Emphasis is placed on current theories of organization as they relate to the needs of the criminal justice process.

CJS 420 Critical Issues in Law Enforcement (3.0); 3 cr. An overview of the broad spectrum of critical issues facing contemporary law enforcement officials in a free society. Areas relating to ethnic, tribal and confessional tension, civil disobedience, police conduct, unionization, civil disturbances and professionalism within law enforcement are discussed.

CJS 430 Criminal Law (3.0); 3 cr. Principles of criminal Liability, defenses criminal prosecution, elements of major crimes.
Prerequisite: CJS 222

CJS 431 Criminal Procedures (3.0); 3 cr. Development of the law of criminal procedures from arrest through post-trial proceedings.
Prerequisite: CJS 222

CJS 433 Ethical Studies in Criminal Justice (3.0); 3 cr. Development of ethical decisions relating to criminal justice issues.

CJS 441 Probation and Parole (3.0); 3 cr. Examines probation and parole as organizations, sentencing dispositions, and medecures of rehabilitation. The student conducts simulated interviews, pre-sentence investigations and prepares recommendations to the court.
Prerequisite: CJS 222

CJS 455 Private Security and the Criminal Justice Community (3.0); 3 cr. The powers and authority of private security personnel. Stresses requirements and restrictions on private security. Includes criminal and civil liabilities faced by private security personnel. *Prerequisite:* CJS 250

CJS 461 Juvenile Justice Processes (3.0); 3 cr. Focuses on the development of justice for youth; the current conflicts within the system; its weaknesses and strengths. Primary emphasis will be on Lebanon's procedure.

CJS 487 Research in Criminal Justice (3.0); 3 cr. An introduction to the theoretical and

practical consideration of research in criminal justice. Examination of research designs, conceptualization and operationalization of research methods: qualitative and empirical methods of inquiry; analytical techniques, data collection and processing; interpretation of criminal justice research findings.

CJS 490 Seminar in Criminal Justice (3.0); 3 cr. Devoted to an exploration and analysis of special issues in the field of corrections, law enforcement, and the general areas of the administration of justice: includes detailed examinations of vital issues and emerging trends which promise to affect the future.

The Degree of Master of Arts in Public Administration

The department of Public Administration offers graduate work leading to the Master of Arts in Public Administration. This Master's program is aimed at those students planning or embarking upon a career in public service.

Admission Requirements

In addition to the University graduate admission requirements, applicants should have a B.A. in Political Science, Public Administration, International Affairs and Diplomacy, International Law, or other related fields.

Successful passing of the EET Entrance Exam with a minimum score of 650 is required. Students' undergraduate GPA of 3.0 minimum, work experience, letters of recommendation, motivation for a career and leadership are all taken into consideration. The Faculty may require the GRE exam for non-NDU students, and the following prerequisite courses may be required of non-major applicants: PAD 201, POS 201, POS 210, or equivalent by petition

Graduation Requirements:

Students seeking the degree of M.A. in the Faculty of PSPAD must meet the University graduation requirements and complete one of the following two options with a G.P.A. of at least 3.0/4.0:

1. 36 credits of course work in addition to a comprehensive written and oral examination; or
2. successful completion of 30 credits course work and six credits thesis.

Degree Requirements (36 credits)

Core Requirements

IAF 601, PAD 604, POS 681.

9 cr.

Major Electives

IAF 641, IAF 645, INL 626, INL 636, PAD 602, PAD 612, PAD 618, PAD 620, PAD 622, PAD 627, PAD 629, PAD 632, PAD 652, PAD 654, POS 619, POS 625, POS 661

15 cr.

Free Electives

Option I: Thesis 6 cr. (PAD 699) in addition to 30 cr. of course work.

Option II: Successful completion of 36 credits of course work culminating in a comprehensive written and oral exam.

6 or 12 cr.

Graduate Courses: Public Administration

PAD 602 Theories of Organization and the Public Sector (3.0); 3 cr. Examination of theoretical frameworks for studying public and private bureaucracies, with emphasis on ideologies, values, behavioral patterns and concepts of organization.

PAD 603 Public Personnel Management (3.0); 3 cr. Studies in depth the different theories concerning personnel management, the relations between employees and government, including decentralized administrative systems. It covers selection of employees, hiring, downsizing, firing, production, productivity, and recognition as well as job development, labor relations and equal employment opportunities. The course is supplemented with case studies related to personnel management in developed and developing countries.

PAD 604 Public Administration (3.0); 3 cr. Theory and practice of program evaluation and evaluative research. Exploration of scope and limitations of current practice in evaluation, considering economic, political, social and administrative.

PAD 605 Privatization: Theory and Application (3.0); 3 cr. This course addresses privatization as one of the fastest expanding economic phenomena in market economies, particularly in the developing economies of the Third World. It studies the rationale and significance of privatization in different socio-economic sectors and the various theories on privatization, their applications as well as the future of privatization. The course is supplemented with case studies on different forms of privatization.

PAD 607 Administrative Politics and Leadership (3.0); 3 cr. Defines leadership in politics, stressing talent, education, experience, equality of genders, opportunities, evaluation of leaders' roles in administrative development, and the overall effects on administrative efficiency. Emphasis is on the role of leaders and other political/administrative actors in developing and maintaining efficient bureaucracies.

PAD 609 Comparative Local and Regional Administration (3.0); 3 cr. The course addresses the local and regional public administrations from a comparative point of view. It covers problems, methods and

structures of administration in relation to policies, finance, education, laws, regulations, administrative procedures, decision-making process, manpower, and administrative reform. The course is supplemented with practical case studies focusing on administrative reforms and the rule of law in the Arab region.

PAD 611 The Politics of Business Regulation (3.0); 3 cr. Examines the role of government in formulating regulatory policies by the executive and legislative branches. Bureaucratic incentives and the role of the courts and regulatory agencies will be emphasized. The course addresses government policies, laws, regulations specially in the areas of regulations relative to privatized agencies, mergers and acquisitions, the role of state, and the impact of globalization on the politics of business regulation.

PAD 612 Comparative Development and Administration (3.0); 3 cr. Analysis of bureaucratic structures and function in Lebanon; industrialized and less developed countries, primarily at national level.

PAD 613 Planning, Program Analysis and Evaluation (3.0); 3 cr. Covers the elements of public planning, analysis and evaluation of public policies and strategies in the context of declared governmental and social policies as well as public needs and welfare. This course aims at studying models and programs for assessing and evaluating public policies in relation to the administrative and economic and social performance of the public sector.

PAD 615 Organized Interests and the State (3.0); 3 cr. The course covers the study of interest groups, their role in today's globalized world, their role in pushing for privatization of public agencies, and the formulation of new regulatory policies by the executive and legislative branches of government. Other topics include: the study of strategies used by interest groups to push for the approval of their agenda in Europe, the U.S., and other countries through the lobbying means, as well as other methods and application processes.

PAD 617 The Politics of Poverty and Welfare (3.0); 3 cr. Examines the structures of income inequality, the factors which lead to wealth concentration, the policies of wealth redistribution, taxation, unemployment, welfare

support, and their overall effects on society. Evaluates models and approaches that have been implemented in different states for the purposes of alleviating poverty and bridging the gaps between classes.

PAD 618 Public Budgeting (3.0); 3 cr. Theory and techniques of budgeting in governmental fiscal relations and the political processes that relate to decision making within the governmental organization.

PAD 620 Ethics and Public Values (3.0); 3 cr. Ethical obligations of the public administrator. Whether membership in a large governmental bureaucracy vitiates individual moral responsibility. To whom or what the public administrator has moral obligations : Elected officials, the law, hierarchical superiors, professional standards, agency ethos, regime values, universal moral standards.

PAD 622 Special Topics in Development and Planning (3.0); 3 cr. This seminar is organized around topics related to current research in the field of economic development and planning.

PAD 627 Political Development and Social Change (3.0); 3 cr. It examines social change in the light of the political structures governing a state. The focus is on various developmental models used to affect or explain social change and on the social environment that may either propel or constrain change.

PAD 629 Public Sector Labor Relations (3.0); 3 cr. Nature of labor relations processes and practices at all levels. Attention to the political variables that distinguish public sector from private sector labor relations.

PAD 632 Administrative Law (3.0); 3 cr. The law governing public administration. Attention to legal reasoning, liability, due process, informalism, and public access. The apparatus of administration.

PAD 642 The Political Economy of Public Policy (3.0); 3 cr. Nature and functions of public management and problems of choice

within the constraints of law, politics, and resource scarcity. Concepts of public interest and public goods; problems related to revenue and taxation. Basic economic and mathematical tools as appropriate.

PAD 652 Organization Leadership (3.0); 3 cr. This course provides an in-depth examination of the leadership function within the work organization. Essential skills of effective leaders are diagnosed with respect to : Goal setting, written and oral presentation, behavioral flexibility. The behavioral dimension and impact of various skills are emphasized to explain the necessary leadership role of both technical and non-technical personnel in the work organization.

PAD 653 Comparative Public Policy (3.0); 3 cr. Comparative analysis of policy formation; process of social and economic policy decision making in selected industrial societies; interaction of institutions, ideas, and power in decisions concerning social welfare, economic planning, and related policy areas.

PAD 654 Bureaucracy and Public Management (3.0); 3 cr. Familiarity with the Lebanese government. Nature of bureaucracy in modern government with emphasis on Lebanon. Explanation of why government agencies behave as they do. Focus on real and imagined problems with bureaucratic rule, evaluation of commonly proposed solutions for these problems. Example from schools, armies, welfare bureaus, regulatory agencies and intelligence service among others.

PAD 699 Thesis or Project, in Public Administration (6.0); 6 cr. The thesis involves the application of research methods to a significant topic of current relevance to the spheres of Public Administration. The project involves the incorporation of the student's hypotheses, methods of testing, test results and conclusion in a sound, written report available to later researchers.
